Ottawa, Aug. 28 .- It is fully expected that Sir Robert Borden will resign the leadership of the Conservative party tomorrow at the caucus which has been called to discuss the question of the formation of a union government, as the result of the terms offered by the western representatives, who had a conference with the prime minister and other members of the federal cabinet in Ottawa and then went to Winnipeg, where they were in consultation with other western politicians. Hon, Arthur Sifton, premier of Alberta, brought back the message, which included among the terms of union with the western Liberals the elimination of Sir Robert Borden as leader.

Following the receipt of the message, Sir Robert Borden will make a statement to caucus tomorrow on the subject, will emphasize the desirability of union and will tender his resignation. .

In conversation with The World, Sir Robert indicated that he still The conversation with the world, she hobert indicated that he shift had strong hopes of the accomplishment of union and made it clear that there would be no effort or action on his part lacking which would be calculated to bring about the result he desired. * * * Whether or not caucus will approve of union on the condition of the resignation of the premier is in no doubt. It can also be said with certainty that strong antagonism to Sir Robert Borden, Hon. Arthur Meighen and Sir Thomas White has developed. They are the men who have been active in promoting the cause of union, and the failure of the negotiations has placed many of the Conservative members, it is claimed, in a trying position before their constituents. Some of them go so far as to assert that the Conservative chances of winning the election have become materially lessened by the fruitless negotiations for union, extending over so long a period as more than two months.

The New Canning Boiler With Removable Tray

A Modern Convenience for the Housewife, Now Available at the Moderate Price of \$1.65.

OW THAT CANNING is a patriotic duty, it behooves us to can much, and can well. And behold in the boiler above an able means to this end. It makes for efficiency and simplicity in the best method of preserving, viz., by filling jars with raw, fresh fruit or vegetables, and submerging them

in boiling water for a given time. Notice the ease with which the bottles on the tray may be lifted out of the boiling water, and contrast it with the tiresome, uncomfortable way of removing

IVING-ROOM, dining-room, bedroom, hall-it may surely be taken for granted that some room in your house or flat is in need of a new rug. And if it is a good rug at a small price for which you are looking, then here is your opportunity—an opportunity to procure a decidedly attrac-tive-looking Axminster square featured as an August Sale "special."

Moreover, it is a seamless square of reliable English make, including in the selection many colorings and patterns of a most pleasing type. There are Oriental medallion effects in tan, terra cotta and blue. There are delightful two-tone designs in brown, green and blue. High Cost of Living Low Cost of Insurance

Midst all the increasing cost of living there's one thing that hasn't advanced, -- that's the cost of Imperial Life policies. In fact, an Imperial policy today requires no greater annual investment than a similar policy taken at a corresponding age a dozen

vears ago.

And the fact that the dividends to policyholders in The Imperial Life have shown a gradual increase every year since the Company's inception makes this investment more attractive now than ever before.

Would you care to know the profit returns being made this year to holders of Imperial profit-sharing policies? Our booklet "The Voice of Experience" gives the information.

THE DAY'S EVENTS REVIEWED

RESIDENT WILSON, in a note to the Vatican, rejects the peace proposals of the Pope and he asserts that permanent peace can only come by agreement between free people on both sides. This declaration, le after consultation in the allied capitals, shows that the allies inmade tend to sign no treaty with the Hohenzollerns and their military caste. He takes the offer of the Pope as a return to the conditions as they existed he takes the other of the Pope as a return to the conditions as they existed before the war. This is impossible, for dealing with the German Govern-ment on the plan proposed would involve a recuperation of its strength and a renewal of its policy. The allies cannot take the word of the pres-ent rulers of Germany as a guarantee of anything that is to endure. It is their business to see that this ruthless power will not have the history of the rest of the world any longer left to its handling. The president strikingly depicts the agony of Europe consequent on the waging of war by Germany at her own time.

The president rejects peace negotiations while autocracy and militarism overlord the central powers. He denounces their ruthless methods of waging war and he implies a fight until Germany becomes a democracy like the allied countries. Peace now, he declares, would deliver new-born Russia to intrigue and to manifold subtle interferences and a certain counter-revolution. In a few words he restates the purpose of the United States in entering the war, to make the world safe for democracy.

A heavy rain on the western front prevented infantry action by the British yesterday. The preceding day's fighting in Flanders brought the British a slight advance on a 1000-yard front astride the St. Julien-belcapelle road. They have now well established their line in the third German system of defence. In the same region they beat off two night attacks in the Inverness Copee, on the Ypres-Menin road.

The Food Controller's Abitrariness.

Hon. W. J Hanna was in the city resterday, food controlling. It appears to be something like fly-fishng, a long time between rises, very few bites, and nothing much landed yet. Since August 4, 1914, there have been no laws of supply and demand in the British Empire, but only laws of life and death, and with these laws we Drovers and Farmers Get a long.

If Mr. Hanna honestly believes that as food controller he can do nothing arbitrary then we are all mistaken and he is not the man for the job. Arbitrary but equitable and rightcous action is what is needed, and it has not been, lacking either in Great Britain or the United States.

President Wilson has been properly arbitrary in fixing prices for almost everything that his government required. Mr. Hoover, who has no compunctions whatever about arbitrary dealing, so long as it is fair dealing, has settled the price of wheat, and a lot of things go along with it.

was \$19.50, a fall in three days of \$2.50 per 100 pounds. The result of this sud-den drop has been a great loss to the drovers, who buy hogs from the farm-ers and bring them to the Toronto mar-ket. They were badly shocked by the experience. The farmers also got a shock. We have several times begged Mr Hanna's attention to the price of bread. The bakers, the millers, the grain men, have not been afraid to be arbitrary. Mr. Hanna would do well to show a little counter-arbitrariness. He would find that the people are looking for it, and that there can be no controlling without it. He will find that the laws of supply and demand have no limit but the' limit he sets them, and that he can't set a limit without being arbitrary. If the arbitrary laws of supply and demand are to regulate everything there is obviously no use for a food controller.

Ontario Government Wants Public Opinion.

Another meeting of the committee of citizens, military officials and board of health people who have been consid-ering steps to grapple with the social menace, was held yesterday. As a result four sub-committees on legis-lation, on quack advertising, on wom-ep's organization and on education, were appointed to report back in two weeks. What is particularly needed is the formation of a body of public opinion strong enough to get government ac-tion on the facts which the medicai men, and particularly the army medi-ial men, have at their command. It is estimated that 40,000 men will ry Service Act, and that under pres-it conditions there will be at hear. f citizens, military officials and board

The Gazette's article follows: COMPLICATING THE SITUATION. Editorial Montreal Gazette, August 28: The announcement that the British Gov-ernment will buy no more Canadian hogs ent conditions there will be at least 1000 cases among these in hospital

The announcement that the British Gov-ernment will buy no more Canadian hogs or hacon comes as something of a sur-prise. Conadians have been exhorted to curtail the domestic consumption of ba-ting with this situation. The conditions of vice and immoral-ity are very much worse in Toronto thes they are in England, and thou-sands of diseased women are parading the streets of Toronto infecting so many men with gonorrhoea and syph-ills that the health authorities are ap-palled at the state of affairs. The

IANES A SLUMP Shock Following Britain's IS VERY MYSTERIOUS

who, in turn, has misled the Canadian people It is rot to be supposed that the Canadian food controner would paint to the Canadiar, people an imaginary and fictilious food situation. There is a pos-sible, the unpleasant and unwelcome ex-planation, namely, that Canadian pork packers have dealt unfairly with the Bri-tish Government, that British Govern-ment has found it out, and that the sud-den embarge on imports of Canadian pork is a disciplinary measure. Nobody likes to contemplate a situation of that kind, because the suggestion that any Canadian packing industry would so deal with Great Britain as to warrant an ac-tion of that kind, is one which Canadians generally will not relish. The main point, however, is as to the food situation it-self. If the British Government does not need Canadian bacon, then Canada does not meed baconless days. If the embarge is disciplinary, then it is a mis-taken action, because it is calculated to render extremely difficult the creation of a large exportable surplus of bacon by means of domestic abstinence. In any event, if the British Government is not to import any more Canadian bacon or Canadian hogs it would seem that the food regulations here must be revised. There is no use in depriving the Can-adian consumer of an article of diet that is not wanted abroad. *Prices Drop Elsewhere.* The World also learned that drops in Chicago and Buffalo. Nevertheless, a man who was talking to The World and who scemed to be pretty well posted axid he would not be surprised if all the Bri-tish business had gone to the American packers because of their larger volume of trade and ability to handle. Hon, W. J. Hanna, food controller, yes-terday denied eny responsibility for the order. experience. The farmers also got a shock. So far no satisfactory cause for this drop has been given out. On Monday, Mr. Maclean of South York called the attention of the government in the house of commons to an item in that day's papers to the effect that the food controller of Great Britain had signified that no more Canadian hams and bacon would be bought by the mother country, and asked for an explanation thereof. Sir Robert Borden and Sir Thomas White could give no exact information. The World's reporters on the live stock market in Toronto yesterday tried to get some information, but could only get the word "embargo." meaning that Great Britain had put an embargo on Cana-dian meat products. Partial information was forthcoming in The Monireal Gazette of yesterday, which also dealt with the subject and hinted that the Canadian packers had done something to discredit them in the estimation of the British Government and the allies; and as a consequence they had lost the business. order. If it were true, he considered it most unfortunate, as it might upset con-ditions here, but he had nothing to do with it. In reply to a query as to the effect of such an order upon Canadian hog growers, considering the fact that the United States market was still open, he considered sny readjustment of such a nature could not have other than a disturbing effect upon growers and pack. disturbing effect upon growers and pack-

The New Willys Six Is Shown There For The First Time In Canada

Here it is-the new Willys Six-the car that has proved itself one of the biggest sensations of the show.

Examine it closely. Note the smart new double cowl - the slanting windshield and the long, low racy body lines. It's a perfect beauty from no matter what angle you view it.

And its beauty is more than surface deep.

For the new Willys Six responds with a snap and a go that will surprise and delight you.

That's because the Willys Six strikes a scientifically correct balance between

power and weight-a balance that you feel the instant you drive it.

- The secret is greater power and sturdy light weight to support it—a combination that not only adds greatly to the joy of driving but also the life of your car.
- The 45-horsepower motor develops excess power for all purposes. It is quick as a flash on the getaway; speedy and surprisingly economical.
- Our great experience in building sixes together with the economies of our huge production has enabled us to produce what we believe to be one of the most scientifically balanced, popular priced sixes ever seen in the Dominion.

But, with all its snap and dash, the new Willys Six was not designed for speed alone. It is a real family car, one that will carry seven people-in comfort.

- If you prefer a different type of motor carsay a Light Four or a Big Four or one with a Willys-Knight engine, it will pay you to investigate the Willys-Overland line first.
- Body styles ranging from roadsters and sport models to sedans and limousines are on display in our salesrooms and will be on exhibit in the Transportation Building, during the Canadian National Exhibition.
