**UNIVERSITY COUNCIL.**

The Council consists of the Chancellor, the Trustees, the members of the Senate, and thirty three elective members.

The Chancellor is elected by the Council, except when two or more candidates are nominated, in which case the election is by registered graduates and alumni. He holds office for three years and, as highest officer of the University, presides at meetings of Council and Convocation and at Statutory meetings of Senate. In his absence he is represented by the Vice-Chancellor.

Of the elective members seven retire annually, except in every fifth year, when only five retire. Successors are elected by registered graduates and alumni. Retiring members may be re-elected.

The Council has power to discuss all questions relating to the College and its welfare, to make representations of its views to the Senate or the Board of Trustees, to decide on proposals for affiliation, and to arrange all matters pertaining to the installation of Chancellor, its own meetings and business, the meetings and proceedings of Convocation, and the fees for membership, registration and voting.

### Endowment Fund.

In connection with the endowment scheme, begun in January, 1869, and also with the building and endowment scheme begun in May, 1878, paid subscriptions secure privileges according to the following regulations:—

1. A donor of \$500 founds a SCHOLARSHIP bearing his own name or any other which he may give it, and acquires the privilege of naming *annually* one student to attend College for one session free of class fees. On the founder's death his lineal representatives become entitled to the privilege of free attendance in the order of seniority.

2. Donors of \$100, \$200, \$300, and \$400 may nominate, at any time during life, one, two, three, or four students respectively, to a course in Arts free of class fees.

## GENERAL ANNOUNCEMENTS.

---

QUEEN'S COLLEGE has, under its Royal Charter, "the style and privileges of a University."

The thirty-ninth session will be opened on the first Wednesday (1st) of October, 1879, at 3 o'clock P.M.

Kingston is easily accessible on account of its central situation, and is one of the healthiest localities in Ontario.

*Students are particularly requested to give attention to the contents of the following pages, as all intimations shall be strictly adhered to.*

A complete compilation of statutes and by-laws, containing information as to scholastic requirements and defining the duties of students, is published separately. The regulations in the compilation are applied consistently with any changes introduced into the Calendar. Copies are to be obtained from the Registrar.

**BOARDING.**—No student is allowed to board or lodge in any house not approved of by the Senate, except by permission of parents or guardians given in writing. Information as to approved houses may be obtained from the Registrar. The expense of suitable boarding is moderate.

**REGISTRATION.**—All students are required to have their names, with other particulars, entered in the University Register. At the time of registration they must produce the Treasurer's receipt for fees. Intrants must also present a certificate of character from their ministers or other competent persons, and sign a declaration promising due respect and

obedience  
their stud  
students.

obedience to the University authorities, diligent attention to their studies, and a courteous behaviour towards their fellow-students.

ATTENDANCE AT CHURCH.—All students must attend the churches to which they profess to belong, and produce certificates of attendance from their clergymen when required.

THE LIBRARY contains over 11,000 volumes. All registered students are entitled to the use of it, subject to by-laws.

THE OBSERVATORY.—In 1855 subscribers, aided by the City Corporation, founded an Astronomical Observatory, which was transferred by deed to the University in 1861.

THE MUSEUM.—The Mineralogical and Palæontological collections are extensive and valuable. Occasional demonstrations are given to students. Friendly services towards the furnishing and enlargement of the Museum are solicited.

ACADEMIC COSTUME.—The dress so far as it is common to members of the University, without respect to rank, consists of black gown with long sleeves and cap with one tassel.

The gown worn by undergraduates has red trimming on the front and sleeves. Every undergraduate, when attending class or any college meeting, shall wear the academic costume.

The distinctive part of the costume of Graduates is in the hood as follows:—B.A., black, bordered with red silk; M.A., scarlet; B.Sc., black, lined with light blue, bordered with white; M.D., scarlet, bound on edge with white; B.D., white, with crimson plush border; D.D., black, with white lining; LL.D., black silk, lined with blue silk.

FEES.—The following fees are payable strictly in advance—class fees on University Day (16th October); graduation fees before Convocation Day:—

Students may take French, German or Hebrew at their option during their courses, but those taking French or German must pass the following matriculation :—

FRENCH—Grammar (DeFiva) ; Souvestre, un philosophe sous les toits ; Corneille, Horace ; translation from English into French,

GERMAN—Grammar (Otto) ; Musæus, Stumme Liebe ; Schiller, der Neffe als Onkel ; translation from English into German.

III. In order to pass the Examination, candidates must obtain at least one-fourth of the marks allotted to each subject.

IV. Candidates passing the above Examination rank as undergraduates. A student passing in any subject may attend the class connected therewith, and is eligible for a Scholarship.

V. Ungrammatical language, incorrect spelling, or illegible writing, shall be a sufficient reason for rejecting the papers of candidates.

VI. Candidates who have passed the High School Intermediate are examined only in Classics, unless they desire to compete for rank or Scholarships.

☞ The Examination for 1879-80 will begin in the Convocation Hall on the 2nd of October.

#### CURRICULUM FOR GRADUATION.

I. The Ordinary Curriculum with a view to the degree of Bachelor in Arts (B.A.), (except as provided in the next regulation), shall extend over four sessions, and shall include attendance for not less than one session on each of the following classes, namely, Junior Latin, Junior Greek, Junior Mathematics, Senior Latin, Senior Greek, Senior Mathematics, Chemistry, Logic and Metaphysics, Ethics, Natural Philosophy, Rhetoric and English Literature, not less than one session in either of the classes of History or Natural Science, and not less than one session in either of the classes of French, German, or Junior Hebrew.

II. Any intransigent, who shall satisfy the Senate, on examination, that he is qualified to attend the senior classes of Latin, Greek, and Mathematics, or any one of these classes, may be admitted into such class or classes without being required to attend the junior class or classes, and when a

student shall be thus admitted to the senior classes of both Latin and Greek, his course of study for the degree of Bachelor of Arts may be completed within three sessions.

- III. Candidates for graduation must take the class of Senior Mathematics before the class of Natural Philosophy, the class of Logic and Metaphysics before that of Ethics, and the class of Chemistry before that of Natural Science.
- IV. Except as provided in preceding regulations, the classes may be taken in any order, and any student not intending to graduate may, on payment of the required fees, be enrolled in any class or classes which he may desire to attend.
- V. In each class occasional examinations in writing, held at such times as the Professor may appoint, shall form part of the work of students who follow the ordinary curriculum, but the number of such examinations in any class during a session shall not exceed the number of hours per week at which that class is required to meet.
- VI. Arrangements shall be made for Pass Examinations in April and October on such days and at such hours as the Senate shall appoint.
- VII. When a student, who is a candidate for graduation, shall have completed the required attendance on any class he must present himself for examination on the subject or subjects taught in that class at either the first or second Pass Examination which shall occur next after the completing of his attendance ; but he shall not be allowed to appear for examination on such subject or subjects, at any subsequent Pass Examination, unless with special permission of the Senate granted on account of sickness or some similar cause duly certified.
- VIII. In order to pass on a subject or subjects taught in any class, candidates must obtain at least one-third of the number of marks obtainable.

---

To those who desire to take only a part of the course the greatest freedom is allowed in the selection of classes.

Careful at read, to the Roman and languages authorities c

a degree, are required to attend only such classes and pass such examinations as the Church may prescribe.

Matriculation, when practicable, is advisable, and confers certain advantages, but it is not essential even for students intending to graduate. Thus if a student, having a degree in view, enters the junior classes without matriculating and passes the examination in these classes at the close of the session or at the beginning of the following session, he is admitted to the rank of undergraduate, and is thereafter in all respects as if he had matriculated.

Special subjects of study affect only the few, yet affect these so much that their case claims some consideration in connection with arrangements suited to the majority. The regulations respecting courses for Honours (page 23) and graduation in Science (page 25) are therefore framed for their benefit.

## DEPARTMENTS AND SUBJECTS OF STUDY.

In conducting the student through the following course the Professors endeavour to overtake all the studies prescribed, but they attach much more importance to *thoroughness* in the manner of working than to the quantity of work done. In all the classes exercises or essays are required, and there are frequent oral examinations. Regular and punctual attendance is strictly insisted upon.

### I. CLASSICS.

JUNIOR LATIN.—Cicero in Catilinam, I. Virgil, Æneid, Book VI. Horace, Odes, Book IV.

SENIOR LATIN.—Virgil, Georgics, Book I. Livy, Book XXII. Tacitus, Agricola. Juvenal, Satire X. Plautus, Aulularia.

JUNIOR GREEK.—Homer, Iliad, Book XVIII. Herodotus, Book I. Gospel by John.

SENIOR GREEK.—Demosthenes, Philip III. Plato, Apology. Euripides, Alcestis. Sophocles, Ajax. Thucydides, Book I. Acts of the Apostles.

Careful attention is given to the analysis of the portions read, to the composition and prosody of the languages, and to Roman and Greek Antiquities. The affinities of cognate languages are illustrated, and free use is made of the best authorities on philology.

## II. MATHEMATICS AND NATURAL PHILOSOPHY.

### Junior Mathematics.

Euclid I-IV ; XI, 1-21 ; XII, 1-2 (Potts, Simpson). Algebra (Wood, Todhunter, Hamblin Smith). Elements of Trigonometry. Exercises.

### Senior Mathematics.

Plane and Spherical Trigonometry (Snowball). Geometrical Conic Sections (Whewell). Doctrine of Limits (Whewell). Analytical Geometry (Hann). Exercises.

### Natural Philosophy.

Mechanics (Galbraith and Haughton). Hydrostatics (Phear). Optics (Dupuis). Astronomy (Airey's Lectures),

Lectures on Natural Philosophy with experiments. (Ganot, Deschanel).

## III. LOGIC AND METAPHYSICS, AND ETHICS.

### A. Logic and Metaphysics.

Logic.—Text-Book—Whately's Logic.

Metaphysics.—The Lectures embrace :—

FIRST—A critical account of the main philosophical systems of Greece.

SECOND—A systematic course of Metaphysics :—

- I. Idea of Philosophy and its relation to other spheres of knowledge.
  1. Relation to (1) Common Consciousness and (2) the Special Sciences.
  2. Relation to Religion.
  3. Relation to (1) History and (2) the History of Philosophy.
- II. Philosophy of Nature. 1, Force. 2, Chemical action. 3, Life.
- III. Philosophy of Mind.
  1. Anthropology. (1) Natural qualities—(a) Characteristics of the Race, (b) Characteristics of different Races, (c) Characteristics of the Individual. (2) Natural changes—(a) Stages of individual life. (b) Relation of the Individual to the species. (c) Sleep and Waking. (3) Sensitive Life—(a) Sensation, (b) Impulse, (c) Habit.
  2. Phenomenology. (1) Consciousness—(a) Sensuous consciousness, (b) Observing consciousness, (c) Cognitive consciousness. (2) Self-consciousness—(a) Individual self-consciousness, (b) Relative self-consciousness, (c) Universal self-consciousness.
  3. Psychology. (1) Presentation—(a) Sensation, (b) Attention, (c) Perception. (2) Representation—(a) Recollection, (b) Conception—i Association, ii Productive imagination, iii The Sign, (c) Memory—i Retention, ii Reproduction, iii Mechanical Memory. (3) Thought—(a) Understanding, (b) Reason.
  4. Ontology. (1) The Mind, (2) The World, (3) God.
  5. Transition to Ethics.

### B. Ethics and Political Economy.

The Lectures embrace :—

FIRST—A critical outline of the leading Ethical systems of modern times.

SECOND—A systematic course of Ethics :—

- V. Relation of Philosophy to other spheres of knowledge. 1. Relation of Morality to Religion. 2. Relation of Philosophy to Theology.

#### IV. CHEMISTRY AND NATURAL SCIENCE.

##### A. Chemistry.

The work consists of lectures, illustrated by experiments, and comprehends:—

- I. Principles of Chemical Philosophy. 1. Metrical system of weights and measures. 2. Specific weight. 3. Compound and elementary bodies, elements and their symbols. 4. Physical state of matter and nature of gases. 5. Molecules and atoms, Dalton's atomic theory. 6. Atomic and molecular weight. 7. Laws of combination. 8. Notation and nomenclature.
- II. Molecular Forces. 1. Chemical affinity. 2. Cohesion. 3. Adhesion. 4. Heat, and its place in the general doctrine of energy, (a) Phenomena of expansion, (b) Thermometry, (c) Specific and latent heat, (d) Conduction and convection, (e) Vaporization and ebullition, (f) Sources of heat and heat of combustion. 5. Radiant Forces, (a) Experimental and theoretical consideration, (b) Reflection and refraction, (c) Dispersion and absorption, (d) Spectra and the spectroscope.
- III. Chemistry of the non-metallic elements.
- IV. Chemistry of the metals.
- V. Application of Chemistry to Photography.
- VI. Chemistry of the galvanic battery and electro-chemical decompositions.

Books recommended—Roscoe, Fownes (Watts), Valentin, Eliot and Storer, Youmans, Miller's Chemical Physics, Lockyer on the Spectroscope.

##### B. Natural Science.

The lectures embrace an outline of the subjects of (1) Botany, (2) Zoology, (3) Mineralogy, and (4) Geology, and are illustrated by diagrams, specimens, photomicrographs, minerals, rocks, and fossils.

BOTANY.—I. Structural Botany. 1. Organography. 2. Vegetable anatomy.

II. Vegetable physiology.

III. Principles of Systematic Botany.

ZOOLOGY.—Preliminary considerations. Structural study of the following Groups:

- I. Protozoa; II. Coelenterata; III. Echinodermata; IV. Mollusca; V. Annelosa; VI. Vertebrata.

General and comparative study in the higher animals of

1. The Endoskeleton.
2. Nutrition, including Prehension, Digestion, Absorption, Circulation, Respiration and Secretion.
3. The Nervous System, including the functions of the Cerebrum, Cerebellum, Medulla Oblongata, and Spinal Cord.
4. The organs of Special Sense, more particularly the Eye and Ear.

MINERALOGY.—I. Crystallography. (1) Crystallization. (2) Fundamental forms. (3) Secondary forms.

- II. Physical Mineralogy. Properties brought out by (1) light, (ii) Trial by instruments.
- III. Chemical Mineralogy. Action of (1) heat, (2) solvents.
- IV. Metallic ores and their metallurgy.
- v. Study of more commonly occurring minerals.

GEOLOGY.—Origin and structure of the earth—Dynamical Geology—Lithology—Palæontology—Systematic and Chronologic Geology.

Books recommended—Botany, (Gray, Balfour, Wood). Zoology, (Milne Edwards by Knox, Dallas, Agassiz and Gould). Mineralogy, (Dana, Collins). Geology, (Dana, Page).

#### V. HISTORY AND RHETORIC AND ENGLISH LITERATURE.

HISTORY.—Lectures. I. Ancient History—(1) On the antiquity of man and primitive culture. (2) On the development of Greek and Roman civilization ; on the Political Economy of the Greeks.

- II. Modern History—(1) On the fall of Rome and rise of new nationalities. (2) On the progress of civilization in Modern Europe. (3) On the constitutional history of England.

Books recommended—Gladstone's *Juventus Mundi*, Curtius' *History of Greece*, Grote's *History of Greece*, Boeck's *Political Economy of the Greeks*, Mommsen's *History of Rome*:—Guizot's *History of Modern Civilization*, Stubbs' *History of the British Constitution*, Hallam's and May's *History of the British Constitution*, Sir James Stephen's *Lectures on the History of France*.

RHETORIC AND ENGLISH LITERATURE.—Lectures. I. On the philology of the English Language.

- II. On English Literature. Text-book—Bain's *English Rhetoric and Composition*.

Books recommended—Max Muller's *Science of Language*, Marsh's *Lectures on the English Language*, Mætzner's *English Grammar*, Craik's *English Literature*, Taine's *English Literature*.

CLASS PRIZES.

Prizes are awarded by the Professors according to the standing attained at written examinations, and other class-work, during the Session.

COURSES FOR HONOURS.

- I. Honours shall be awarded for distinguished merit at examinations, but only in one or more of the following departments, and only when such merit reaches the prescribed standard in all the subjects of a department :—
  1. Classics, including Latin and Greek.
  2. Mathematics and Natural Philosophy.
  3. Chemistry and Natural Science.
  4. Logic, Metaphysics and Ethics.
  5. History, Rhetoric and English Literature.
- II. Examinations for Honours in any department shall be open to candidates only after they complete their attendance on all the classes prescribed for graduation in that department, and provided they appear at the first or second examination for Honours after completing such attendance.
- III. If a candidate shall present himself at the first examination for Honours after completing the prescribed attendance on classes, and shall fail at that examination on any subject or subjects, he may present himself at the next examination for Honours for examination on the subject or subjects on which he may have previously failed.
- IV. *First-Class Honours* in any department shall be awarded to candidates who obtain one-half the number of marks allotted to each paper and three-fourths of the total number of marks allotted to the department.
- V. *Second-Class Honours* in any department shall be awarded to candidates who obtain one-half the number of marks allotted to each paper and two-thirds of the total number of marks allotted to the department.
- VI. Honours obtained in any department shall be publicly announced immediately after being awarded, and the names of successful candidates shall be inserted in the first merit lists published thereafter, and again, at the

time of graduation, Honour men being graduates shall be announced as having graduated with the Honours obtained by them at any time during their course of study.

Arrangements will be made at the beginning of the Session by the several Professors for occasional meetings with students intending to apply themselves to any portions of the following Honour work :—

### HONOURS.

#### I. CLASSICS.

LATIN.—Quintilian, Book X. Cicero de Oratore, Book II. Horace, Ars Pœtica. Terence, Andrian. Lucretius, Book V.

GREEK.—Homer, Odyssey, Book XII. Demosthenes de Corona. Pindar, Olympic Odes. Æschylus, Prometheus. Aristophanes, the Clouds. Hesiod, Works and Days.

#### II. MATHEMATICS AND NATURAL PHILOSOPHY.

Higher Equations. Analytical Geometry and Trigonometry (Snowball). Differential and Integral Calculus (Duncan, Todhunter, Hall).

Statics (Earnshaw). Dynamics (Earnshaw). Mechanics. Hydrostatics (Phear). Optics (Potter). Astronomy (Loomis). Newton's Principia (Evans, Frost).

#### III. CHEMISTRY AND NATURAL SCIENCE.

Candidates are required to show a general acquaintance with—

- I. The principles of Organic Chemistry and Chemical Analysis.
- II. The principles of Botanical classification and the characters of the more prominent orders of plants.
- III. The outlines of Human Physiology and Comparative Anatomy.
- IV. The principles of Mathematical Crystallography and Mineralogical notation.
- V. The Glacial Epoch, Geology of Canada.

Books recommended—i. Fownes, Armstrong, Schorlemmer, Bowman, Fresenius. ii. Gray, Balfour. iii. Huxley. iv. Tennant, Jamieson, Griffin. v. Croll, Geikie, Chapman.

#### IV. LOGIC AND METAPHYSICS, AND ETHICS.

Candidates are required to show an accurate knowledge of Plato's "Republic," and "Theætetus," Descartes' "Discourse on Method," and "Meditations," and Kant's "Critique of Pure Reason," and a more general knowledge of Locke's "Essay on the Human Understanding," Berkeley's Philosophical Writings (Fraser), Hume's "Treatise on Human Nature," Vol. I (Green and Grose's Edition), and Mill's "System of Logic."

An accurate knowledge is required of Aristotle's "Nichomachean Ethics," Spinoza's "Ethica," and Kant's "Metaphysic of Ethics (Temple)"; and a more general knowledge of Hume's "Treatise on Human Nature," Vol. II (Green and Grose's edition), Hegel's "Philosophy of History," and Maine's "Ancient Law."

The association also assists the convener of the Presbytery's Home Mission Committee in filling appointments for Sabbath day services in the neighborhood of Kingston.

## SCHOLARSHIPS, ETC.

### SCHOLARSHIPS IN ARTS.

Scholarships in Arts have *endowment nominations* connected with them, securing exemption from class fees for *one* session and thereby adding from \$18 to \$24 to the given value of each.

A student, though not an *undergraduate*, is eligible for a scholarship; but scholarships marked *close* can be held only by students having in view the ministry of the Presbyterian Church, they being given by their founders upon that condition.

Scholarships awarded upon matriculation examinations are tenable during the first session, and those awarded upon sessional examinations are tenable during the following session, except open scholarships, gained by students in the last year of their course in Arts, which are paid at once.

Successful candidates for scholarships must make *at least* one-half the number of marks allotted to the subject or subjects upon which the scholarship is awarded.

ANNOUNCEMENT.

The MEDICAL SCHOOL at Kingston will enter upon its Twenty-Sixth term on the first Wednesday in October next, and continue open for six months.

This School being separately incorporated under the title of the "ROYAL COLLEGE OF PHYSICIANS AND SURGEONS, KINGSTON," and possessing independent powers and privileges, is competent to confer upon its own students and others the Diploma of "Licentiate" and "Fellow" of the College, and being moreover, affiliated with Queen's University, its students obtain the Degree of *Doctor of Medicine* from the latter Institution, upon passing the requisite examination.

Certificates of attendance at this College are recognized by the Royal College of Surgeons of London and Edinburgh, so that those holding the License of this College as well as those possessing the Degree of M.D. from Queen's University, are entitled to all the privileges in Great Britain that are accorded to the students and graduates of other Colonial Colleges.

THE COLLEGE BUILDINGS, situated at the foot of Princess Street, having recently undergone a thorough course of repairs and having been fitted up at considerable expense, will be found to be commodious and comfortable, and to offer every convenience requisite in a Medical School.

The class-rooms are well adapted to the requirements of both Teacher and Pupil, being large, conveniently seated, well warmed, lighted, and ventilated. A spacious waiting-room also adds greatly to the comfort of all parties. The *Materia Medica* and Chemistry class-rooms are provided with abundance of materials for examination and experiment; and facilities are afforded in all the class-rooms for a thorough and efficient course of instruction.

The DISSECTING ROOM is large and comfortable, and being

The Matr

situated in the uppermost part of the building, is free from noise and intrusion. It is thoroughly lighted and ventilated, and furnished with all the necessary appliances for making proper dissections.

On account of the abundant supply of dissecting material furnished by the Penitentiary, Jail, Hospitals, and other public institutions in the neighborhood, this school offers unrivalled advantages for the study of Practical Anatomy ; while it is not second to any other Medical School in its advantages for the prosecution of all other branches of medical knowledge.

The Kingston General Hospital and Hotel Dieu, both within a few minutes walk of the College, are open to the visits of students, and offer every advantage desired in the way of Clinical Instruction. Students can, if they desire, visit also the Penitentiary Hospital with Dr. Lavell, and the Insane Asylum.

The General Hospital alone has accommodation for 150 beds, and contains in the "Watkins Wing" an operating amphitheatre, so arranged as to afford all the students an opportunity of witnessing the operations ; the other institutions referred to have a large number of patients constantly under treatment.

As proofs of the quality of the instruction given by this School, the Faculty points with pride to the high position taken by its students at the examinations of the Medical Council of Ontario, and of the Royal College of Surgeons of England, and also to the professional success of its graduates in competition with those of other Canadian Colleges.

Kingston, moreover, is a very healthy and pleasant city, *free from the attractive amusements* that interfere with study, and the inducements to vice, found in many larger cities, while the cheapness of living therein is such as to commend it to the notice of all intending students of Medicine.

Good board in respectable houses may be obtained at prices ranging from \$2½ to \$4 per week, and other necessaries at proportionate figures.

#### MATRICULATION.

The *Matriculation* Examination is the same as that required

for the Medical Council of Ontario and similar to that of other Colleges.

This examination and that for the Medical Council will be held in Kingston on the third Tuesday and Wednesday in August of every year. In this examination Writing and Dictation will be included, correct spelling and legible writing will be imperative. The examination will embrace the following subjects :

ENGLISH LANGUAGE, including Grammar and Composition.

ARITHMETIC, including Vulgar and Decimal Fractions.

ALGEBRA, including Simple Equations.

GEOMETRY—the first two books of Euclid.

LATIN—Grammar and Translation.

And one of the following subjects, the students having the option of naming the one in which he will be examined :

GREEK.

FRENCH.

GERMAN.

NATURAL PHILOSOPHY, including Mechanics, Hydrostatics and Pneumatics.

The following are the text-books in the various branches enumerated above. Where more than one is named the student may elect which he will be examined in :

- a. LATIN—*Cæsar Commentarii de Bello Gallico*, fifth and sixth books ; *Cicero Manilian Law* ; *Virgil, Æneid*, second book.
- b. GREEK—*Xenophon's Anabasis*, first book.
- c. FRENCH—*Voltaire, Charles XII.*, sixth, seventh and eighth books.
- d. GERMAN—*Adler's Reader*, first part.
- e. NATURAL PHILOSOPHY—*Peck's Ganot* ; *Sangster's first book* ; *Stewart's Physics*.

"Graduates in Arts who have attended a course or courses of Lectures on Botany and Theoretical Chemistry, and who have already passed an examination on these subjects, will not be required to undergo an examination on these subjects, provided they produce tickets proving that they have attended one course of lectures on Botany and two on Theoretical Chemistry."

"Every Medical Student, after matriculating, shall be registered in the manner prescribed by the Council, and this shall be held to be the preliminary to his Medical studies, which shall only be considered to begin from the date of such Registration."

### CURRICULUM.

Candidates for either the Degree of the University or the Diploma of the College must have completed a period of four years' study; but in the case of Graduates in Arts, or those who have spent a year's pupilage in the office of a Medical Practitioner, a period of three years' only will be required.

Every Candidate must have given regular attendance in Full Courses of Instruction in the following Departments for the periods stated, during at least three Sessions.

- |   |  |

The above course of study may have been pursued either wholly in this College, or partly here and partly in some other

recognized Medical School. In the latter case, at least one full session must have been spent in this College, with attendance on at least four of the above six months' courses.

Certificates of attendance on Lectures are received from incorporated Medical Schools in the British Dominions, and others recognized by the British Universities and licensing Colleges. Other certificates of attendance on Lectures may be admitted at the discretion of the Faculty.

All students shall present evidence of their having compounded medicine for a period of six months, in the office of a regularly qualified Medical Practitioner; and they shall present evidence of having attended not fewer than six cases of Midwifery.

### EXAMINATIONS AND GRADUATION.

Every candidate, before the 1st day of March in the year in which he proposes to graduate, must furnish the Registrar of the College with a declaration under his own hand that he is twenty-one years of age, or that he will be so before the day of graduation, accompanied by a certificate of good moral character, a statement of his medical studies, with proper certificates thereto, and a Thesis, composed by himself and in his own handwriting, to be approved of by the Faculty.

There are two examinations—a Primary and a Final—in each of which candidates are examined both in writing and orally.

The PRIMARY EXAMINATION includes Theoretical Chemistry, Anatomy, Institutes of Medicine, Materia Medica and Therapeutics, and Botany. Materia Medica can either be taken at the Primary or Final Examination at the option of the Student.

The FINAL EXAMINATION includes the Principles and Practice of Surgery, Theory and Practice of Medicine, Medical Jurisprudence, Obstetrics, Clinical Medicine, Clinical Surgery, Practical Chemistry and Toxicology.

With the exceptions already mentioned Students will not be admitted to the Primary Examination before the end of their third session. The Final Examination will not take place until the candidate has completed his fourth or last session. The

All fees are payable to the Registrar of the College, Dr. FOWLER, and are expected to be paid in advance.

## COURSE OF INSTRUCTION.

### I. ANATOMY—(PROF. T. R. DUPUIS.)

Five Lectures a week are given on this subject in the general class-room, and are illustrated by plates, drawings, and preparations, but chiefly and fully by recent dissections on the Cadaver.

Two of the best dissectors among the third year students, are chosen each session as *prosectors* who, under the direction of the Professor, make careful dissections of the parts to be brought before the class, so that the students not only hear a description of them but also see them properly dissected and lying in their natural relations to each other.

### 2. INSTITUTES OF MEDICINE—(PROF. OLIVER.)

This course comprises Physiology, and General Pathology. The lectures will be illustrated by vivisections, plates, drawings, and specimens from the Museum.

### 3. MATERIA MEDICA, THERAPEUTICS AND PHARMACY—(PROF. FOWLER.)

This course will be illustrated by plates, and specimens of the various drugs, chemicals, etc.

### 4. PRINCIPLES AND PRACTICE OF SURGERY—(PROF. SULLIVAN.)

These Lectures embrace the Principles and Practice of Surgery and Surgical Anatomy. The course will be illustrated by plates and models, and pathological specimens. The use of instruments and surgical apparatus and appliances is taught; and all the chief operations will be performed upon the Cadaver in presence of the class.

### 5. THEORY AND PRACTICE OF MEDICINE—(PROF. H. YATES.)

These Lectures are illustrated by plates, morbid specimens, and models of diseased parts.

### 6. OBSTETRICS AND DISEASES OF WOMEN—(PROF. LAVELL.)

These Lectures are illustrated by drawings, models, prepared specimens, by the use of the Artificial Pelvis, etc.

Ample opportunities will be afforded to the students for studying this important branch practically, as they will be arranged in classes to attend the Obstetric practice of the Hospital.

### 7. CHEMISTRY—(PROF. N. F. DUPUIS.)

This course comprises Chemical Physics, Chemical Philosophy, Inorganic and Organic Chemistry.

The Professor possesses abundant apparatus for experimental illustration being completely furnished with all the modern inventions for chemical investigation. All the Lectures are fully illustrated by actual experiments.

### 8. BOTANY

The Lectures at the University of Toronto, directed by Prof. H. S. Gentry, are held in the Botanical Garden, and are held in the afternoon.

### 9. MEDICAL BOTANY

These Lectures are held together with the Botany, and are held in the afternoon.

### 10. PRACTICAL BOTANY

Demography

The Dissections are given to the students; and are given in the afternoon, so that all students see that all specimens are always available.

### 11. PRACTICAL BOTANY

Thorough dissections are made in the College under the direction of the Professor, and are given in the afternoon, so that all students see that all specimens are always available.

### 12. CLINICAL BOTANY

This is taught in the Theatre of the Hospital.

Attention is given to the student being in the Theatre, and are illustrated by the use of the microscope.

### 13. CLINICAL BOTANY

These Lectures are held in the Theatre of the Hospital, and are held in the afternoon, so that all students see that all specimens are always available.

### 14. MICROSCOPY

### 15. SANITARY BOTANY

### BOOKS

ANATOMY.—Gray's Anatomy, and the Institutes of Medicine, Aitken's P.

8. BOTANY—(PROF. N. F. DUPUIS.)

The Lectures will be given every day during the first part of the session at the University Buildings and will be illustrated by drawings, microscopic sections, dried specimens and living plants as far as practicable.

9. MEDICAL JURISPRUDENCE—(PROF. FENWICK.)

These Lectures include Medical Toxicology, *post mortem* appearances, &c., together with Insanity and Medical Police. They are illustrated by plates and specimens when necessary.

10. PRACTICAL ANATOMY—(HENRY H. CHOWN, B.A.,  
Demonstrator.)

The Dissecting Room will be open from 8 a.m. to 6 p.m. for the use of students; and the Demonstrator will attend every day from 2 to 4 p.m., to give instructions in dissecting, and in the details of Practical Anatomy, and to see that all students are furnished with material for dissection, of which there is always an abundant supply in this Institution.

11. PRACTICAL CHEMISTRY—(PROF. N. F. DUPUIS.)

Thorough instruction is given in the splendid new Laboratory of the College under the personal supervision of the Professor. The course includes blow-pipe manipulations, the use of apparatus, qualitative and quantitative analysis, toxicological investigations, etc.

12. CLINICAL MEDICINE—(PROF. H. YATES.)

This is taught by instruction at the bed-side, and by lectures in the new Theatre of the Hospital.

Attention is given to Physical Diagnosis, which is taught practically, each student being required to take part in it. Examinations of urine, sputa, etc., are illustrated and explained.

13. CLINICAL SURGERY—(PROF. T. R. DUPUIS.)

These Lectures are in illustration of the various surgical cases in the wards of the General Hospital. They are given at the bed-side or in the Theatre of the Hospital, and when requiring it, are elucidated by plates, surgical apparatus, morbid specimens, models, etc. All operations are performed in presence of the class.

14. MICROSCOPIC ANATOMY—(PROF. SULLIVAN.)

15. SANITARY SCIENCE—(PROF. FENWICK.)

BOOKS RECOMMENDED TO STUDENTS.

ANATOMY.—Gray, Wilson (latest edition), Quain, Ellis and Heath.

INSTITUTES OF MEDICINE.—Dalton's and Kirke's Physiology and Bennett's and Aitken's Pathology, and Parke's Hygiene.

MATERIA MEDICA.—Pereira's Meteria Medica (abridged).  
PRINCIPLES AND PRACTICE OF SURGERY.—Erichsen, Holmes, Bryant, Pirrie,  
Gross, Smith, Druitt.  
THEORY AND PRACTICE OF MEDICINE.—Tanner's and Flint's Practice and Rey-  
nold's System of Medicine.  
OBSTETRICS.—Ramsbotham's, Churchill's or Tyler Smith's Midwifery, and Thomas  
or Churchill on Diseases of Women ; Tanner on Diseases of Children.  
CHEMISTRY.—Fownes, Miller, Roscoe, McAdam, Bowman, Fresenius, Attfield.  
BOTANY.—Gray's Structural and Systematic Botany ; First Lessons in Botany.  
MEDICAL JURISPRUDENCE.—Taylor's Medical Jurisprudence.  
SANITARY SCIENCE.—  
MICROSCOPIC ANATOMY.—Carpenter, Hogg, Beale.

### PRIZES.

Four valuable Prizes are offered by the Medical Faculty every year, viz : Two House-Surgeoncies of the Kingston Hospital—six months each—and two Demonstratorships of Anatomy. These Prizes are awarded to the four students making the highest number of marks in the Primary Classes.

Also, two prizes : a first and second, of the respective values of \$15 and \$10, will be given next session for the two best Anatomical preparations. Subjects to be announced at the opening of the session, and preparations to be approved of by the Faculty.

For University Prizes, Medals, etc., see page 34.

Quæ quum ita sint, Catilina, dubitas, si emori æquo animo non potes, abire in aliquas terras, et vitam istam, multis suppliciis justis debitisque ereptam, fugæ solitudinique mandare ? "Refer," inquis, "ad senatum : " id enim postulas ; et, si hic ordo placere sibi decreverit, te ire in exsilium, obtemperatum te esse dicis. Non referam, id quod abhorret a meis moribus ; et tamen faciam, ut intelligas, quid hi de te sentiant. Egrederere ex urbe, Catilina : libera rempublicam metu : in exsilium, si hanc vocem expectas, proficiscere. Quid est, Catilina ? ecquid attendis, ecquid animadvertis horum silentium ? Patiuntur ; tacent. Quid expectas auctoritatem loquentium, quorum voluntatem tacitorum perspicias ?

But—I may be told—no commoner has been consul since the expulsion of the kings. What then? Is no novelty to be introduced? In the reign of Romulus, there were no pontiffs, no augurs; they were created by Numa Pompilius. There was no census in the state, nor any arrangement of centuries and classes: it was instituted by Servius Tullius. There had never been consuls; they were appointed on the expulsion of the kings. Neither the office nor the name of a dictator existed: it originated among the senators. Within the last ten years we have both created and abolished decemvirs for compiling laws. Who doubts that, in a city built to last forever, increasing to an immense size, new offices, priesthoods, rights of families and of individuals, may be established? Did not the decemvirs introduce in the last few years, to the great prejudice of the commons, on a principle very pernicious to the state, this very measure, that there should be no intermarriage between patricians and commoners?

JUNIOR MATHEMATICS.

FIRST PAPER.

1. The opposite angles of any quadrilateral figure inscribed in a circle are together equal to two right angles.

Why is a rectangle the only parallelogram which can be inscribed in a circle ?

2. Divide a right angle into five equal angles.

3. If two triangles have one angle of the one equal to one angle of the other, and the sides about the equal angles proportional, the triangles shall be equiangular.

4. If a triangle be right angled, the rectilinear figure described on the side opposite the right angle is equal to the similar and similarly described figures on the sides containing the right angle.

Construct a rectilinear figure similar to each of three similar figures and equal to their sum.

5. Define the *inclination of a plane to a plane*; *similar solids*; a *parallelepiped*.
6. Every solid angle is contained by plane angles which are together less than four right angles.
7. Give the sin, cos, and tan of  $60^\circ$ .
8. In a right angled triangle ABC, C being the right angle R : sin A : : AB : BC.

A ladder AB 30 feet long just reaches the top of a wall BC, and the angle at A is  $60^\circ$ , what is the height of the wall?

SECOND PAPER.

1. Simplify the expressions  $\sqrt{128} - 2\sqrt{50} + \sqrt{72} - \sqrt{18}$ .

Find the product of  $1 - a^{\frac{4}{3}}x^{-\frac{3}{4}} + a^{\frac{1}{3}}x^{\frac{1}{4}} - a^{-\frac{2}{3}}x^{\frac{5}{4}} + a^{\frac{3}{4}}x^{-\frac{1}{2}} \times a^{\frac{3}{4}}$ .

2. State and prove the rule for completing the square in the equation  $x^2 + px + q = 0$ .
3. Solve the Equations

$$\frac{6}{x+1} + \frac{5}{x} = 3.$$

$$\frac{21x^3 - 16}{3x^2 - 4} - 7x = 5.$$

$$x + \sqrt{5x + 10} = 8.$$

$$\begin{aligned} x^2 - xy &= 153, \\ x + y &= 1. \end{aligned}$$

4. A and B start to run a race to a certain post and back again. A returning meets B at 90 yards from the post, and arrives at the starting place three minutes before him. If he had returned immediately to meet B, he would have met him one-sixth of the distance between the post

FIRST PAPER.

1. What angles from  $0^\circ$  to  $360^\circ$  have tangents equal in magnitude to  $\tan 60^\circ$ ?
2. Find  $\sin 2A$ ;  $\cos 2A$ ;  $\tan 2A$ .
3. The altitude of the sun is  $36^\circ 30'$ ; what is the length of the shadow of a rod 6 feet high?  $\tan 36^\circ 30' = .75$ .
4. In a plane triangle  $\frac{a}{b} = \frac{\sin A}{\sin B}$ .

A tower is on the opposite side of a river. A base of 1200 feet is measured, and at each end of it the angles between the base and the tower are found to be  $62^\circ 55'$ , and  $66^\circ 10'$  respectively. How is the distance of each end from the tower then found?

5. Given in a plane triangle the sides  $a$ ,  $b$ , and  $c$ ,
$$\cos A = \frac{b^2 + c^2 - a^2}{2bc}.$$
6. Two points A and B on opposite sides of a swamp being taken, and the distance of a third point C from each being found to be 570 and 761 yards respectively, also the angle

ACB  $76^{\circ} 45'$ , how would you find the distance between A and B?

7. Define a *spherical angle*; the *polar triangle*; why is the latter called also *supplemental*?
8. Prove that the lengths of degrees of longitude are as the cosines of the latitude.
9. In a spherical triangle,  $\frac{\sin A}{\sin B} = \frac{\sin a}{\sin b}$ .
10. When the sides  $a$ ,  $b$ , and  $c$  are given
 
$$\sin \frac{1}{2} A = \sqrt{\frac{\sin (s-b) \sin (s-c)}{\sin b \sin c}}$$
11. Define *parallax*; *refraction*; and state how they vary with the altitude of a heavenly body.
12. Explain how the latitude of a place is found. How is its longitude determined by lunar observations?

#### SECOND PAPER.

1. What debt can be discharged in 12 months by paying \$1 the 1st month, \$2 the 2nd, \$4 the 3rd and so on, doubling the amount each month?
2. The number of permutations of  $n$  things 5 together = 20 times the number 3 together; find  $n$ .
3. Prove that the sum of the coefficients in  $(x+a)^n = 2^n$ ; and thence prove that the total number of combinations of  $n$  things is  $2^n - 1$ .
4. Expand by indeterminate coefficients  $\frac{a}{a+x}$ .
5. State the values of the amount, principal, interest, time and discount, each in terms of the others, in simple and compound interest.
6. Define the *parabola*; *ellipse*; *hyperbola*; and prove that in an ellipse  $SP + PH = 2 AC$ .

NATURAL PHILOSOPHY.

FIRST PAPER.

1. Define the *parallelogram*; the *parallelopiped* of forces.
2. Given a force R, find its rectangular components X and Y.  
Given two forces P and Q acting at any angle on a point, state the magnitude of their resultant, and prove your answer.
3. Two parallel forces act on two given points of a rigid body: find their resultant.
4. Define a *couple*. In what way only can equilibrium be produced?
5. Define *coefficient of friction*, *foot-pound*, *potential energy*, *kinetic energy*, *conservation of energy*.
6. A locomotive can draw a certain number of tons. What is that number, supposing its friction on the rails 3730 lbs., and a force of 11 lbs. sufficient to move a ton on the railroad?
7. The weight of a pile driving machine is 500 lbs., and has a velocity the moment it strikes the head of the pile of 40 feet per second; what resistance does it overcome when it drives in the pile one inch?

8. A water supply of 100 gallons a day for each of 4,000 families is to be raised 75 feet high ; what horse power of engine, working for four hours a day, is required ?
9. The weight of the larger piston in a hydraulic press is 150 lbs., and its surface is a square foot ; to what height would the pressure, due to the weight of this piston, raise the water in the small cylinder, whose sectional area is half a square inch, if its piston were removed, and there were no friction ?
10. A mass of 18 lbs., is so distributed at the ends of a cord, passing over a fixed pulley, that the more loaded end descends through 18 yards in as many seconds : required the weights at each end.
11. Prove, that in the pendulum  $t = \pi \sqrt{\frac{l}{g}}$

SECOND PAPER.

1. What is the pressure on the surface of a cone floating vertically with its apex at the surface of the liquid ?
2. Find the centre of pressure on one of the ends of a triangular trough, the vertex being downwards.
3. Describe the construction and action of the centrifugal pump.
4. Give the velocity of water spouting from an orifice 20 feet below the surface of the liquid, and find the amount of discharge in gallons per minute (supposing no contraction of the liquid vein), when the area of the aperture is 3 square inches.
5. Why does water boil, and then freeze in vacuo ?
6. In determining heights by the barometer, why must the temperatures of the attached, and of the detached thermometers be observed carefully at each station ?
7. Define *precession* ; *nutation*. How does precession affect the longitude and latitude of a heavenly body ?
8. When are planets said to be in *conjunction* ; when in *opposition* ; when at their *mean distances* from the sun ?

3. Explain the Socratic notion of the Good.
4. State and criticise the Megarian philosophy.
5. The relation of Plato to his predecessors ?
6. Give a short analysis of the *Theaetetus*.
7. Show how a knowledge of the real world grows up.

8. What ambiguity is there in Plato's use of the term "sensible"? Show its influence on his theory of knowledge.
9. "To say that Ideas are *patterns* explains nothing." Explain this saying.
10. What are the different senses in which *οὐσία* is used by Aristotle?
11. "The true object of knowledge is *οὐσία ἀνευ ὕλης*." In what sense may this proposition be accepted?
12. "Soul is the first actuality of a natural organised body, having life potentially in it." Analyse this definition.
13. Explain the relation of the sensitive to the conscious life by a reference to the phenomena of madness.
14. Trace briefly the development of self-consciousness.

ETHICS.

1. State the problem of Ethics. What is the imperfection in the Utilitarian and Stoical solutions respectively?
2. Distinguish the Aristotelian from the modern conception of Will.
3. The relation of the negative and positive aspects of Stoicism.
4. Classify the Desires, and explain their character.
5. Criticise Locke's account of moral responsibility as "the power a man has to suspend his desires."
6. State and examine the ethical theory of Hobbes.
7. Criticise Hume's account of the "indirect" Passions.
8. How does Kant attempt to reconcile Necessity and Freedom? Is his solution valid?

CHEMISTRY.

FIRST PAPER.

1. Show the connection between a gram and a meter, and change 1,000 grams to pounds avoirdupois.
2. Explain what is meant by absolute temperature, and apply it to solve the following:—1,000 c.c. of gas is heated from  $60^{\circ}$  to  $250^{\circ}$  cent., find the volume.
3. Water is heated with difficulty from above downwards, but readily from below upwards ; explain this fully.
4. How would you show that solidification of a liquid liberates heat ?
5. What causes affect (a) the rate of evaporation—(b) the total amount of evaporation, and why ?
6. What is meant by radiant energy ; how does it manifest itself ?
7. What is a bright line spectrum, and what does it indicate ?  
What particular spectrum would you get from “ salt ” in a lamp flame ?
8. State the forms in which impurities occur in water, and show how you would purify such water.
9. Obtain ammonia and liquor ammonia, and describe them.

SECOND PAPER.

10. Give practical methods of obtaining :—Sulphur Dioxide—Chlorine—Red Phosphorus—Phosphine—Potassic Nitrate—Cupric Oxide—Potassic Dichromate, and give their prominent uses, if any.

11. Form a bath and electroplate a metallic object with silver.  
How would you prepare a non-metallic substance for electroplating?
12. Give the substances produced when :—
  - (a) Wood is heated in close vessels.
  - (b) Breath from the lungs is passed through lime-water.
  - (c) Iron is burnt in the fire.
  - (d) A solution of sugar is fermented.
  - (e) Tin is acted on by Nitric Acid.
13. State the differences between cast iron, wrought iron and steel, and show how the last two are derived from the first.
14. Describe a Daniell's cell, and explain the chemical changes taking place within it.

FIRST PAPER.

1. Translate into English :

Ils le *font*, mais d'ailleurs les deux camps se mutinent,  
Et leurs cris des deux parts poussés en même temps  
Demandent la bataille, ou d'autres combattants.  
La présence des chefs à peine est respectée,  
Leur pouvoir est douteux, leur voix mal écoutée ;  
Le roi même s'étonne, et pour dernier effort ;  
"Puisque *chacun*, dit-il, s'échauffe en ce discord,  
Consultons des grands dieux la majesté sacrée,  
Et voyons si ce change à leurs bontés agréé.  
Quel impie osera se prendre à leur vouloir,  
Lorsqu'en un sacrifice ils nous l'auront fait voir ?"  
Il se *tait*, et ces mots semblent être des charmes ;  
Même aux six combattants ils *arrachent* les armes,  
Et ce désir d'honneur qui leur ferme les yeux,  
Tout aveugle qu'il est, respecte en cor les dieux.  
Leur plus *bouillante* ardeur cède à l'avis de Tulle ;  
Et soit par déférence, ou par un prompt scrupule,  
Dans l'une et l'autre armée on s'en fait une loi,  
Comme si toutes deux le *connaissaient* pour roi.  
Le reste s'apprendra par la mort des victimes.

2. Parse the words in Italics.
3. Write the 3rd persons singular and plural of the 1st future indicative and the present and imperfect subjunctive of the following verbs : *voir, taire, apprendre, connaître, croire, mettre, valoir, dire, faire, absoudre, lire, pouvoir, craindre, nouvoir, boire.*
4. Name the Romance Languages.

5. State some of the changes which took place in Latin under the Latin Empire, and as marking the beginning of those changes which took place in the growth of the Romance Languages from Latin.
6. From which case of the Latin noun have the majority of Romance nouns been apparently taken? Give reasons for your answer.
7. How is the future of the verb formed in the Romance Languages?
8. Distinguish between demonstrative pronouns and adjectives. Give a list of each in French.
9. Give the rules, with exceptions, for the formation of the feminine of adjectives.
10. When is *ce* to be used<sup>1</sup> instead of *il*, *elle*, &c.?
11. When are the disjunctive personal pronouns *moi*, *toi*, &c., to be used?
12. Translate into French. He of whom you speak is gone. This and that go well together. It is easy to say so, but very difficult to do it.

SECOND PAPER.

1. Conjugate *falloir* and *y'avoir* negatively and interrogatively.
2. Conjugate the past definite and indefinite, and 2nd future of *se rendre* and *s'entrevoir*.
3. Give the rules for the omission of the article.
4. Translate into French :

Frederick II. being one day very busy in his study, rang the bell several times, and nobody came. He opened the door, and found his page asleep in an arm-chair. He advanced towards him, and was going to awake him, when he perceived the corner of a note peeping out of his pocket. Feeling curious to know its contents he took and read it. It was a letter from the young man's mother, who thanked him for sending her part of his salary to relieve her in her poverty. She concluded by telling him that God would bless him for such conduct. The king, after reading the note, returned softly to his room, took a purse full of ducats, and slipped it with the note into the pocket of the page: then going back to his room, he rang so hard that the page awoke, and went in. "You have slept well," said the king to him. The page wished to excuse himself. In his confusion, he put his hand into his pocket, and felt the purse with astonishment. He drew it out, turned pale, and looked at the king, shedding a flood of tears, without being able

I do not know what money this is which I find in my pocket." "My friend," said Frederic, "God often sends us blessings when we are asleep. Send the money to your mother, salute her on my part, and tell her that I will take care both of her and you."

MATHEMATICS.

FIRST PAPER.

- 175
1. Find the value of  $X = x^n + px^{n-1} + qx^{n-2} \&c., + c = 0$  in terms of its derived polynomials, and the powers of  $h$ , when  $x+h$  is substituted for  $x$ .
2. Prove that if  $X$  and  $X'$  have a common measure they have at least two roots equal.
3. Any equation which has all its signs positive can have no real positive root; and any equation with its signs alter-
- ξυνασ-  
πτήξας,  
κίνυγμα,

nately + and — can have no negative root, whether  $n$  be odd or even.

4. Every equation  $x^n + px^{n-1}$  &c.,  $+c=0$  is divisible by  $x-a$  if  $a$  be a root.
5. Find all the roots of  $x^3 - 14x^2 + 56x - 64$ , the roots being in geometrical progression.
6. Transform into an equation having integral coefficients,  $x^4 - \frac{4}{3}x^2 - \frac{3}{8}x + \frac{5}{72} = 0$ .
7. Solve the equation  $x^5 - 6x^4 - 2x^3 + 2x^2 + 6x - 1 = 0$ .
8. Investigate the rules for the solution of a cubic equation, 1st, by Cardan's method, and 2nd, in the *irreducible* case, by Trigonometry.
9. In the equation  $x^3 + x^2 + x - 100 = 0$  find  $x$  by double position.
10. Solve by Newton's method of approximation  $x^3 - 7x + 7 = 0$ .
11. The equations  $x^3 - 9x^2 + 22x - 24$ , and  $x^4 + 9x^3 + 23x^2 + 20x + 15 = 0$  have each one integer root. Find these roots.

SECOND PAPER.

1. What is the Geometrical representation of the equation  $(2y+x)(3y-x) = 0$ ?
2. Find the length of the perpendicular from the point  $x=3$ ,  $y=5$  upon the line  $7x-3y=0$ .
3. Find the intersection of the circle  $y^2+x^2=25$ , and the straight line  $4y+3x=25$ .
4. Find the position and dimensions of the curve  $x^2+y^2+12x-8y+48=0$ .
5. Prove the equations to the hyperbola referred to the major axis.
6. Find the equations to the subtangent and subnormal in the ellipse, and the length of the normal.
7. The tangent to the ellipse at any point, and the tangent to its circular projection meet in the same point in the axis produced.

8. The normal bisects the angle contained by the lines drawn from any point in the ellipse to the foci.
9. Find the polar equation to the ellipse, the centre being the pole.
10. Transform the equation to the ellipse referred to its centre and principal diameter into the equation belonging to conjugate diameters and having the same origin.
11. The chord of curvature in an ellipse through the focus is  $\frac{2CD^2}{AC}$ .

---

MATHEMATICS AND NATURAL PHILOSOPHY.

THIRD PAPER.

1. Differentiate  $\frac{\sqrt{1+x} + \sqrt{1-x}}{\sqrt{1+x} - \sqrt{1-x}}$ ,  $\sec z$ ,  $\sin(\log z)$ .

Integrate  $\operatorname{cosec} z \cot z dz$ ,  $\frac{1}{a^2} \sec^2 z dz$ ,  $(1-x^2)^{\frac{1}{2}} dz$ .

2. The differential of the arc of a circle whose radius is  $r = \frac{dt}{1+t^2}$ : thence find the circumference of a circle.
3. Find the surface of a segment of a sphere.
4. Prove that the maximum rectangle which can be inscribed in a semicircle is equal to half the square inscribed in the circle.
5. Investigate McLaurin's theorem, and apply it to find the series for  $\log(1+x)$ .
6. What curve has its subtangent constant for every point in the curve? Prove your answer, and find the area of the curve between any two of its ordinates.
7. What remarkable properties distinguish the cycloid. State its equation, and find the length of the curve, its radius of curvature and area.

FOURTH PAPER.

1. If the periodic times of bodies revolving in different circles with uniform velocity be equal, the centripetal forces are as the radii.

If the periodic times are in the sesquuplicate ratio of the radii, the centripetal forces are reciprocally as the squares of the radii.

2. The force at any point in a curve in a non-resisting medium being  $\frac{2QR}{T^2}$ , deduce other expressions for the force.
3. If a body revolves in an equiangular spiral required the law of centripetal force tending to the pole of the spiral.
4. If a body is revolving in a hyperbola, find the law of force tending to the focus.
5. If any number of bodies revolve about a common centre, and the centripetal force varies inversely as the square of the other, the *latera recta* of the orbits described are in the duplicate ratio of the areas, which the bodies describe in the same time by radii drawn to the centre of force.
6. Find the velocity at any point of a conic section described under the action of a force tending to the focus, and compare it with the velocity in a circle with the radius SP, and described about the same centre of force.
7. The velocity in an ellipse at the greatest distance is half that in a parabola at the same distance; required the eccentricity of the ellipse.

GOLD MEDAL IN POLITICAL ECONOMY.

FIRST PAPER.

1. Mention the different commodities that have been used as money, and give reasons for preferring gold and silver.
2. Give a short statement of Smith's views on Kant, and compare his general theory with the Kincardian theory.
3. Distinguish capital according to its functions, and show

the relative amount of labour called into exercise in each case.

4. Explain the mercantile system, and point out the fallacy underlying it.
5. What are the natural results of granting bounties?
6. What is the natural limit to the circulation of paper money, and why is it injurious to attempt to increase the circulation beyond that limit?
7. What economical advantages has Europe derived from the discovery of America?

SECOND PAPER.

1. State and illustrate the distinction between productive and unproductive labour.
2. Is money capital which is employed (1) to maintain labourers, and provide tools and materials, (2) to fence and drain an estate, (3) to pay off a mortgage, (4) to buy equipages?
3. What are the causes which determine the degree of productiveness?
4. Name the classes among whom distribution takes place. Are they always distinct?
5. How does Mill explain the fact that, while the amount of capital may apparently remain the same, wages may vary?
6. State the elements of which gross profits are made up. Why does the rate of profit on capital tend to an equality?
7. "The only case in which protecting duties can be defensible, is when they are imposed temporarily (especially in a young and rising nation) in hopes of naturalizing a foreign industry, in itself perfectly suitable to the circumstances of the country." What objections may be made to this admission?

THIRD PAPER.

1. Show the effect of Trades Unions on wages.

2. What influence has credit on the production of wealth, and on prices ?
3. State and illustrate the results of over-production.
4. What did Lassalle mean by the "nationalization of land ?" Examine his view.
5. Explain the way in which the increased production of gold depreciates its value, and raises general prices.
6. "The ratio of exchange of any two commodities will be inversely as the final degrees of utility of the quantities of commodity available for consumption after the exchange is effected." Explain this proposition.
7. What are the main arguments advanced by Protectionists ? Estimate their value.

GOLD MEDAL IN CHEMISTRY.

FIRST PAPER.

1. What constitutions have the compounds known as:—ethers—ketones—amines—anhydrides—quinones ?
2. Give two processes each of obtaining :—marsh gas—benzene—benzoic acid—formic acid—cyanogen—illustrating by symbols.
3. Write graphic formulæ for all the possible modifications of butyl alcohol, and indicate which is isobutyl.
4. What is pyrogallol, how is it formed and what are its uses ?
5. What are meant by the atomicity and basicity of an organic acid ?  
Derive carbonic acid from its unknown alcohol, and show why it is bibasic.
6. Give the natural sources and properties of:—terpene—tannine—salicine—uric acid—lactose.
7. Distinguish between iron, cobalt, and nickel in solution ; also between arsenious, phosphoric, and oxalic acids.
8. Determine the amount of  $H_2SO_4$  in a given sample of a sulphate solution.

9. Distinguish clearly between gravimetric and volumetric methods of analysis.

SECOND PAPER.

1. In what forms are the C and H obtained in ultimate organic analysis, and how is it effected?
2. 1.2 grams of an organic liquid yield by analysis 1.76 grams of  $\text{CO}_2$  and 0.72 grams of  $\text{H}_2\text{O}$ , and its vapor density is 30. Determine the substance.
3. Starting from methane show how to obtain ethane synthetically.
4. Show by graphic formulae the relation to the benzene molecule, of:—phenol—benzoic acid—salicylic acid—hippuric acid.
5. How may the following be obtained:—dutch liquid—iodoform—butyric acid—cyanic acid?
6. Distinguish between a sulphite and thiosulphate in solution.
7. How would you prepare the reagent and detect minute quantities of ammoniacal compounds in water?
8. Prepare  $\frac{N}{10}$  solutions of, sulphuric acid—oxalic acid—potassic hydroxide.
9. You are given a solution of ferric chloride; describe clearly how you would titrate it in order to find the percentage of iron.
10. How would you determine the strength of a hydrocyanic acid solution volumetrically?

---

GOLD MEDAL IN HISTORY.

FIRST PAPER.

1. Describe the Wittenagemot—its composition, its business, and its powers.
2. Distinguish between Thanes and Ceorls. What were the classes of Thanes? Prove that the Ceorls were feemen.

3. Describe the local institutions of the Anglo-Saxons.
4. What was the character of the English Parliament in the beginning of the 14th century? What circumstances led to the division of Parliament into two houses?
5. State the causes of the decadence of Parliament during the wars of the Roses and under the Tudors.
6. Distinguish between direct and indirect election. State the evils of indirect election.
7. Give a short history of the English charters prior to the Great Charter of John (William I, Henry I, Stephen and Henry II).
8. What was the electoral system in England in the 14th century? Who were the electors?

SECOND PAPER.

1. Give a short history of the Court of the Star Chamber. From what Court or Council may it be said to have been developed? In what respect did the Court, erected by the Statute 3, Henry VII., differ from the Court of the Star Chamber under the later Tudors and the Stuarts?
2. Give a sketch of the early application of martial law, in the suspension of civil procedure in England.
3. What were the terms of the Triennial Bill? When, and under what circumstances, was it passed?
3. When was the Act of Uniformity passed, and what were its results?
5. What were the grounds of the impeachment of the Earl of Danby? What questions arose out of this impeachment in regard to the King's right of pardon, and also in regard to the right of the Bishops to vote in the case of capital offences.
6. When, and under what circumstances, was the Habeas Corpus Act passed?
7. On what occasion were the Bishops deprived of their seats in the House of Lords, and when was this privilege restored to them?
8. What were the terms of the "Act of Settlement."

INTRODUCTION TO THEOLOGY.

FIRST PAPER.

1. What is meant by Biblical Introduction? On what principles may the different writers on the subject be classified?
2. State the different views that are held by modern critics with regard to the date of the Levitical legislation as recorded in the Pentateuch.
3. From what standpoint does Ewald and critics of his school interpret early Hebrew history?
4. What is the relation of the Old Testament Canon to the Old Testament Church?
5. State the fundamental spiritual truths revealed by Moses, their influence on Hebrew life, and the consequent characteristics of the Hebrew community.
6. Define the Theocracy, and point out its significance as a form of national life.
7. Give the three great epochs of the Theocracy, and the characteristics and perils of each epoch.
8. Trace the influence that the disruption of the kingdom of Israel had on religious development.

9. What effect on the Messianic hopes of the people had the Assyrian war, the persecution of Manasseh, the defeat of Josiah, the destruction of Jerusalem, and the exile?
10. What are the main positions expressed and implied of the Tubingen School with regard to New Testament Introduction?
11. On what points does the controversy with this school turn and what arguments would you use on each?
12. What is the probable explanation of the present form of the Synoptic Gospels?

SECOND PAPER— CHRISTOLOGY.

1. Trace the steps by which the Apostles rose to the full apprehension of the Personality of Jesus Christ.
2. What position, with regard to the past and the future, did Jesus take?
3. Define His character and life as presented to eye-witnesses.
4. From what point of view did He regard nature?
5. Show the revelation of God and man that we have in virtue of the Incarnation.
6. How did Jesus reveal God?
7. What relation does He stand in to the race?
8. Define the supreme law of Christian life.
9. What method or methods did Jesus follow, and what was His aim in dealing with man?
10. Point out the fundamental difference between Christianity and all other religions.

CHRISTIAN APOLOGY.

(DR. JARDINE'S LECTURES.)

1. Why is the historical basis of christianity of so great importance?

2. To what extent and from what stand-point should the historical veracity of the scriptures be defended ?
3. What must be regarded as essential to the historic basis of Christianity ?
4. Criticise the doctrine of evolution from a philosophical point of view.
5. State the most important principles of Positivism.
6. What is the positive doctrine of causation ? Examine it.
7. Does thought legitimately go beyond the sphere of the verifiable ? Justify your answer, discriminating between different modes of verification.
8. What does Positivism substitute for the Christian doctrine of immortality ?
9. " God is the eternal *not-ourselves* which makes for righteousness." Criticise this proposition.
10. " All and every natural law follows as a necessary consequence from the persistence of force and the primary qualities of matter." Examine this doctrine.

ECCLESIASTICAL JURISPRUDENCE.

(REV. DR. KEMP'S LECTURES.)

1. State the three powers generally regarded as belonging to Church officers and what duties they respectively comprise.
2. State the two aspects in which the Church may be viewed ; the three characteristics of Christian liberty and the historical development of its form and order.
3. State the peculiar character of the Scottish Reformation, the liberty it claimed, the development of its Church order, and at what date completed.
4. State the constitution of the General Assembly, the two views of the source of its power, the interpretation of Christ's commission to Peter and the power of the keys.
5. State the three functions of the General Assembly and in what sense legislative power is understood ; the object of

the Overture and the Barrier Act, and the nature and history of the latter.

6. What do the Judicial powers of the Assembly involve? Why called a Court of final resort? Ought it to originate process?
7. Has the Assembly power to constitute Commissions—the history of Commissions—powers entrusted to them—how constituted in Scotland?
8. What does the administrative function of the Assembly embrace? State what you remember about the form of the Overture, and about Motions and Resolutions and Speeches.
9. What necessitates judicial process in the Church? State the use and value of its technical forms—the different treatment of forms or regulations in administrative and in judicial affairs.
10. State the general ground for discipline and the three points regarding it on which all are agreed.
11. Give the structure and form of a libel, and state if it should contain arguments and inferences as well as facts, and, if not, why?
12. What is the first step in the process of a libel? What is meant by the relevancy of a libel? Has the Church the power to admister oaths to witnesses? What was said on the subject?
13. What other cases of discipline of more importance than a libellous offence frequently arise, and what method is recommended for their treatment?

3. Point out some distinctions between the Church as visible and invisible. Show the bearing of this distinction on (1) pure communion, (2) infant baptism, (3) the Popish view of the Church.
4. Define the Church as Local, and as Catholic. Who are the members of the Church received as visible and invisible?
5. What are the Scriptural proofs for a regularly ordained ministry? Show the bearing of this on the position of Quakers, Plymouth Brethren, &c.

SECOND DIVISION : *Ministerial Work and Character.*

1. Show that preaching is the great work of the ministry. What is the pulpit's legitimate range of theme, and what are the chief characteristics of true preaching?
2. How do law and gospel stand related, and what counsel was given regarding preaching doctrine; controversial and sectarian preaching; speculative preaching?
3. What arguments were given in favor of expository preaching, and what is meant by preaching Christ?
4. What are the different kinds of discourses? How are they distinguished? Give rules for selecting proper texts and themes.
5. What were the four conceptions noticed of the pulpit's functions? Give the leading features of each.
6. What was insisted on in regard to personal culture, physical, intellectual, aesthetic and spiritual?
7. What is the importance of ministerial character, and what features of character were chiefly insisted on?
8. What are some of the tendencies of the age—good and bad—and what features of the pulpit and ministry give adaptation to the necessities of our time?

## EXAMINATIONS IN MEDICINE.

### BOTANY.

1. Describe—medullary rays—epidermis—stomata, and give their uses.
2. Define a flower morphologically and prove your definition.
3. Explain the various effects of cohesion on petals and stamens.
4. Define the terms, monœcious—diœcious—polygamous, giving examples.
5. Describe the parts of a seed.
6. Describe the process of fertilization in liverworts and mosses.
7. State the difference between the Linnæan and natural systems of classification.
8. Plant *herbaceous*—leaves *alternate, pinnate*—leaflets *entire*—petals 5 *papilionaceous*—*vexillum* large—stamens 10 *diadelphous*. Anthers *versatile*. Fruit a *legume*.  
Name the order to which it belongs, and give two common plants as examples.

### THEORETICAL CHEMISTRY.

1. State the laws of Avogadro, Boyle and Marriotte, Charles, and apply the first to determine the atomic weight of oxygen from the electrolysis of water.
2. Give and explain the thermotic changes when ;
  - a. a salt is dissolved in water ;
  - b. water is added to sulphuric acid ;
  - c. a gas is relieved from pressure ;
  - d. ammonia gas is passed into water.

3. Explain the natures of specific heat and of latent heat in their relation to energy.
4. State the object and result of Foucault's optical experiment, and show how it affected the theories of radiant energy.
5. Give, and illustrate by symbols, practical methods of obtaining:

nitric acid,	ethyl nitrite,
carbon dioxide,	chloroform,
hydriodic acid,	lactic acid,
arsenic,	glycerine.
potassic chlorate,	

6. Explain the relations and distinctions between :
  - a. a primary, secondary and tertiary alcohol,
  - b. a monatomic primary alcohol and its corresponding aldehyde, acid, amine, and amide.
7. State and formulate the result when :
  - a. sal-ammoniac is heated with lime,
  - b. chlorine is passed into alcohol,
  - c. phenol is treated with nitric acid,
  - d. alcohol is boiled with potassic dichromate and sulphuric acid,
  - e ferrous sulphate is ignited.

---

PRACTICAL CHEMISTRY.

1. How would you prepare for analytic purposes solutions of ammonium sulphide, hydrochloric acid, chlorine water, iodine ?
2. Distinguish between arsenious and arsenic acid : between nitrates and chlorates ; between acetates, meconates and sulphocyanates.
3. Water becomes milky when lead acetate solution is added to it. Determine whether it be due to carbonates or sulphates or both.
4. Examine an article of food for lead, suspected to be present in small quantities.
5. Examine a specimen of calomel for corrosive sublimate.

ANATOMY.

1. Describe the hip joint with its ligaments ; and name the muscles in contact with it.
2. Give the names and general distribution of the 3rd, 6th, and 8th cranial nerves.
3. Give the origin and insertion of the following muscles, viz. : pterygoideus internus—deltoid—adductor magnus—tibialis anticus—arytenoideus.
4. If a man were to cut his throat transversely at the level of the crico-thyroid membrane, and continue the incision backwards till the edge of the knife came in contact with the vertebral column, what structures would be divided ?
5. Give the names and relative positions of the bones of the tarsus.

---

INSTITUTES OF MEDICINE.

1. (a) Give the sources and uses of the saliva.  
(b) Give the supposed uses of the spleen.  
(c) Give the supposed uses of the bile, mentioning from what blood it is secreted, and the effects of the stoppage of the secretion.  
(d) Describe the formation of sugar in the liver, from what blood it is formed and where it disappears in the circulation.
2. Describe the peristaltic action of the intestines, in what action it is reversed, and what prevents the contents of the large intestines from being ejected from the mouth in vomiting.
3. Describe (briefly) the changes that occur in the blood and air in respiration, and state how the residual air is expelled from the lungs.
4. Mention the chief excrementitious substances eliminated by the kidneys, and give the effects of entire suppression of urine.
5. Describe (briefly) the pulmonary and portal circulations.

6. Give the effects of alcohol on—
  - (a) The excretion of urea.
  - (b) The exhalation from the lungs of carbonic acid.
  - (c) The temperature of the body.
7. (a) What is the seat of spasmodic diseases?
  - (b) What effect on the parts below has section of one lateral half of the spinal chord, 1st,—on the same side as the section; 2nd,—on the opposite side?
  - (c) What are the uses of the sub-arachnoid fluid?
  - (d) What effects on the smaller arteries have division and galvanization of the vasi motor nerves?
  - (e) How do you account for blushing and pallor?
  - (f) Describe the mechanism of the sense of smell.
  - (g) Give (briefly) the Physiology of the seventh pair of cranial nerves.

---

SURGERY.

1. Describe the physical and vital properties of the pus corpuscle.
2. Describe minutely the progress of healing by the second intention.
3. Give in order the pathological changes in tumor albus.
4. What information may be gained from examination of the urine in injuries of the brain?
5. Diagnose the three principal causes of compression of the brain from injury.
6. What are the unequivocal signs of fracture. Treat a simple fracture of the femur.
7. Give the symptoms of vesical calculus, and state the value of each.
8. Treat a case of lachrymal fistula.

MATERIA MEDICA.

1. Give (1) the circumstances which favour the absorption of medicines; (2) the circumstances which tend to hinder the absorption of medicines.
2. Write a prescription (for a case of chronic constipation) containing among other ingredients a preparation of strychnia.
3. State how atropia is prepared, give its dose, its effects on the system, and state how you would prepare and use a solution for dilating the pupil.
4. Give the chief distinguishing marks between aloes, scammony, epsom salts, calomel and colocynth as cathartics.
5. State the conditions of the system in which you would give opium to produce sleep, and in what conditions you would give bromide of potassium to produce sleep.

---

SCIENCE AND PRACTICE OF MEDICINE.

1. Give the *diagnosis* of Peritonitis.
2. Give the *pathology* of Alcoholism.
3. Mention the *duration* of the incubation and subsequent stages of—  
a, Scarlet fever.  
b, Small-pox.  
c, Measles.
4. Give the *diagnosis* of Pneumonia.
5. Give the *diagnosis* of a Hysterical fit.
6. Mention the *causes* of Cirrhosis of the liver.

---

MIDWIFERY.

1. Mention the mechanical disorders of Pregnancy.
2. Describe an ordinary labour, and attention required in 1st and 2nd stages.
3. Enumerate the causes of impeded labour.
4. Give the indications for and against the use of ergot.

5. What is uterine inertia? State the dangers in 2nd and 3rd stages of labour.
6. Describe the mechanism of labour in breech presentation, 1st position.
7. Give treatment of hour-glass contraction, with retention of placenta.
8. Give cause, diagnosis and treatment of unavoidable hemorrhage.
9. What circumstances favour prolapse of cord, and why is interference necessary?
10. What is cyanosis neonatorum? Give the cause and remedy.

---

MEDICAL JURISPRUDENCE.

1. Mention some circumstances which retard putrefaction. Explain how the different manner in which death may take place from Strychnia poisoning affects the rapidity of putrefaction.
2. Explain what is meant by the terms "wound" and "weapon." How does the law look upon any one accelerating the death of a wounded person?
3. What other circumstances besides *force* constitute rape? How does sodomy resemble, and how does it differ from rape?
4. How would you distinguish a case of strangling and subsequent suspension from a case of suicide by hanging?
5. What are the signs of starvation? How would you treat a case of attempted suicide by voluntary starvation? Describe the post mortem appearances of a person who has died from this cause. How, from these appearances, would you distinguish between voluntary and enforced starvation?
6. Define the terms hallucination, illusion and delusion, giving examples. Explain, as far as you are able, what constitutes insanity. Describe general paralysis of the insane.
7. What are the morbid states that resemble death? How would you distinguish between apparent and real death?
