Canada and Its Readjustment

ANALYSIS of the Loaning Situation indicates that Nineteenfourteen is to be a sail-trimming year—Basic conditions are sound, but productive power of the country must be increased

THE fact seems to be accepted that the current year really is to be one of adjustment. In 1913, the chief topic was the financial stringency. Considering the usually buoyant nature of the Canadian, there was much pessimism throughout that year. Even the Western Canadian, whom we consider the prize optimist of the world, commenced to have doubts. The situation has changed. The financial stringency is discussed less frequently and only as a matter of the past. The bubbling hopes that strenuous business times will return this spring have ceased to bubble. Pessimism has disappeared. Business sentiment is good. Better than all, the fact is recognized that the present year is destined to be a fairly quiet one while attention is being given to the readjustment of matters generally.

The loaning companies of Canada are scanning their particular field with interest. Sir George Paish, who visited Canada last year, has reminded us that we are ina stage of transition, from a period of construction to a period of production, and that this cannot take place without a certain amount of disturbance both of labor and capital. In the construction stage, a large percentage of the persons entering the country have settled in the towns. In the productive stage, the number of persons who can obtain work and a livelihood in the town will for a time diminish, while practically everyone will be able to obtain work and a livelihood in developing the natural riches of the country. In recent years, farmers and mine-owners have complained of their inability to obtain hired labor, and the expansion in production has been largely restricted because of the labor difficulty.

British capital, which has subscribed funds freely for Canadian governments, municipalities and railways, has been advised by Sir George Paish to consider the question of forming trusts and loan companies for the purpose of assisting settlers on to the land, "especially as farm lands in Canada are not at inflated prices." By so doing, they would render powerful help to the Canadian people to produce the natural wealth for which so much municipal, railway, banking and trading machinery has been provided. "It is evident," added Sir George, "that the machinery created to take care of the production of the country is sufficient to deal with at least twice, if not three times, the existing output, and it is obvious that the burden of interest upon the immense amount of

capital supplied will be a heavy one until the productive power of the country is greatly increased."

An inquiry of The Monetary Times regarding the present loaning situation in the Dominion has elicited some interesting replies. The question has been raised particularly as to what the lending companies in Western Canada are going to do with new money which there is reason to think will be offered to them during the coming summer and fall. So much has been heard of the money stringency that an erroneous idea has arisen here and there that the country can absorb millions of funds and that as soon as the inflow begins, speculation will revive, construction will become active again, business improve, and the momentum which the country attained two years ago, will be reached once more. This is contrary to the facts.

The speculation about which so many economic sermons have been preached, probably will not revive for some time to come, no matter how plentiful money may be. There is a disposition to give greater attention to the matter of security and the security of some speculators is not of the approved type. There is not a great deal of encouragement to builders to undertake any new and large work in the cities. Buildings which have remained for some time half completed in various cities are part proof of that. Space is still available in office buildings in most of the large cities. Immigration is likely to be less this year than last and a considerable number of. mechanics and trades people have returned temporarily to Great Britain and the continent. These factors will have their effect on the degree of necessity for new dwelling houses. These appear to be the facts but they are not in reality unpleasant ones. Periods of readjustment in conditions come to every individual, corporation and

A Winnipeg loaning authority, for whose opinion The Monetary Times has the highest regard, says:—

"The lending companies here are in doubt as to what they will do with any further funds. The demand for loans on approved securities is at the lowest point for some years. My own impression is that we will have to refuse to undertake the investment of English funds to any considerable extent during the next few months, and inevitably I believe there must be a reduction in the rates of interest.

"Fortunately the agricultural situation is excellent. Underlying conditions are, therefore, sound. Farmers, however, are affected by the process of re-adjustment and are not disposed to incur further obligations by purchasing further land and, I am glad to say, are even discouraged from buying more implements.'

Similar opinions are held by another expert in an entirely different part of the country. He thinks there can be no doubt that some readjustment of values is taking place in our western provinces, as elsewhere.

Back to the Land.

Too large a proportion of the incoming population had found its way to the towns and cities, instead of upon the land, with the result that the growth of the towns was too rapid and the demand for homes for the increasing population which was legitimate while it lasted-combined with the speculation which at all times accompanies such a condition, created a somewhat feverish and unhealthy basis of valuation in some of these centres. In the process of re-adjustment it is to be hoped-and we think may reasonably be expectedthat the increase of population in the future will be, for a time at all events, rather in the rural than in the urban districts. "Any lending institution, however, which has exercised reasonable foresight, we think, will be quite prepared for such re-adjustment as is likely to take

place," adds this writer, who continues:—
"We think there is considerable misapprehension as to the amount of new money which is likely to be available from Great Britain, and also as to the lessened de-mand from borrowers, therefor. There will be, no doubt, not so much money borrowed for building purposes in the cities and towns in the near future, but this is far from being undesirable, and, taking into consideration the many demands from all parts of the world upon the resources of capital, we think there is not likely to be a plethoric supply. On the other hand, the immigration appears to be continuing at a fair rate, and what is better, the reports are that the newcomers we are receiving are largely going upon the land, and will become producers, rather than flocking to the towns and becoming merely consumers. This should not cause any reduction, but rather an increase in the demand for loans on farm properties, the class of business the conservative lending institutions prefer, and should have a tendency to sustain the legitimate values of farm lands."

The view is supported again by another loan company manager, who says it is palpable that if a farmer cannot produce, net, enough to allow for interest on his investment in the land and buildings in addition to a living wage for himself, the land is overvalued.

Farm Loans Normal.

Mr. T. L. Hartley; of the Northern Canadian Mortgage Company, a Winnipeg loan company, believes that farm loans will be normal this year, having due regard to the fact that each year, owing to the increase of farms for which patents have been issued or farms brought under cultivation, there is more or less of an

With regard to Winnipeg city loans, this authority does not think there will be anywhere near the amount of business, such as was done in 1912, as the building of 1913 was ample to meet the requirements for that year.

"We cannot say definitely," says Mr. Hartley, what amount of building will be done this year in Winnipeg, but the permits so far have exceeded \$3,000,000, and we would say that a good deal will depend upon the views of the various contractors or builders, as the chances are unless they meet with success in selling the buildings put up early in the season, they will not be likely to build to any great extent later on in the season. If the building should be extensive here then there will be the equivalent demand for loans. If, however, such building should not be extensive, we imagine that the loan companies will not be able to place all their money.

"We are given to understand that conditions in Winnipeg are better than in most points in the west, so that if such is the case there will not be the same demand for money as in the past, that is, for new loans.

"With regard to readjustment of values, we can only speak definitely as to Winnipeg and, with a few exceptions where people have sold at an apparent sacrifice, owing to their not being able to hold the property, there has been no decrease in values. In fact, we know of several sales which have gone through recently at the highest point touched by such class of property and with the exception of some of the outlying subdivisions we would doubt from the present outlook if there would be very much decrease in values."

Must Be Readjustment.

It is noticeable in all the reports received by The Monetary Times that a satisfied view is taken of conditions generally and that the chief point emphasized is that there must be a readjustment this year. For instance, Mr. Campbell, the Regina commissioner of the Trust and Loan Company of Canada, says:-

"Conditions in the west are fairly normal and much better than one would expect after the collapse of excessive speculation, and it seems to me that it would be quite out of place for us to prophesy as to the future. The demand for loans is quite sufficient to absorb all of our surplus funds, and I must say that we are conducting our business with much more confidence now than we did two years ago, for the reason that we are able to get loans practically on our terms and the absurd competition in amounts has vanished altogether.

Will Have Beneficial Effect.

"There is a considerable amount of indebtedness still to be liquidated, but this province (Saskatchewan) as a whole is in a very much better position to-day than it was twelve months ago. Its recuperative powers are very great and the enforced economy will have a beneficial effect on all of us."

These opinions are those of men who have studied intimately the conditions prevailing in the loaning field. They state very clearly what we believe the country generally has been thinking. Basic conditions are good, but a little necessary trimming is being done. Canada will feel all the better for it at the end of this year. Next year-well, it is too far away to prophesy, but the distant vision looks good.

Mr. R. A. Robinson, who has been in the service of the Bank of British North America for several years, has decided to commence business as an exchange broker, with offices at 53 Yonge Street, Toronto.

Mr. Ernest McGaffey has been appointed as secretary of the British Columbia bureau of provincial information, to succeed the late Mr. Frank I. Clarke. Mr. McGaffey has been secretary of the Vancouver Island Development League

for five years. Mr. A. G. Bradley, sometime superintendent of agen-cies of the Union Life of Toronto, but who resigned to enter the home office of the Metropolitan Life in New York, has recently been appointed a supervisor of that company in the Great Northern Territory.

OUTLOOK IN WESTERN CANADA IS GOOD

Special Inquiry by The Monetary Times Shows That Prospects Are Bright for Successful Year

FROM WHEAT TO MIXED FARMING

Transition Period in Western Canada is Important Sermons of Sclanders, of Saskatoon

(Special correspondence.)

Contemplating the whole Western situation from every possible standpoint, writes Mr. F. Maclure Sclanders, the well-known commissioner of Saskatoon, my conclusion is that it is all most encouraging. We are now passing through a remarkable transition which is effacing all traces of the pioneering period, and replacing those with conditions sounder, saner and more solid than in my opinion could ordinarily have been anticipated in the case of a country so young.

This transition is of the most vital economic significance, seeing that it involves agriculture—and what else have we in this West?

Let me illustrate the point.

Let me illustrate the point: The day of merely wheat is passing with phenomenal swiftness. All farmers in a position to do so are buying stock. The whole country realizes that dairy products, pork, meat, mutton, poultry—should far more than pay the entire expenses of operating the farm, and that wheat ought to constitute an added net profit.

Must Work Twelve Months

It is gratifying to be able to state that farmers are now reconciled to the necessity of working twelve months a year, just as other men must, so that their land may be made to yield them a return reasonably commensurate with its virgin fertility.

The transition from merely wheat to diversified agriculture will vastly reduce the cost of farm operations, which are at present far too high. For instance, the mixed farmer will be able to engage his help by the year at considerably less money than he now has to pay for the season of merely five or six months. This, because it stands to reason that if the farm laborer can only secure work during the open months, and thereafter be turned out on the threshold of winter to seek a precarious living in some other line, he naturally demands a wage which will protect him against enforced winter idleness. Another important point is that six months' work per annum is not at all attractive to the most desirable class of Old Country agricultural labor.

Further, the diversified farmer will grow almost all his own food at but a trifling fraction of its present corner store cost. And again, he will have money coming in all the time. His cheque from the creamery will arrive fortnightly; and should he ever require some extra money for special purposes, he has only to dispose of a beast or two. This will mean a great saving in interest charges; and stock in this country is as good as bank notes, and likely to remain so for long to come.

Now in the case of wheat growing the farmer receives

Now, in the case of wheat growing, the farmer receives his money merely once per annum. Then, if unpropitious weather conditions have rendered the wheat unmarketable, he has no recourse but to pile up another twelve months' credit and interest. He cannot sell his damaged wheat and he has no stock to feed it to—although if fed to pork it would easily be worth more than the highest grade wheat on the Winnipeg market.

May be Produce Exporter

I have merely outlined the splendid transition through which this West is at present passing with such rapidity; and it has only taken us a year or so to reach the stage which absorbed some twenty years in the case of the Western United States. Remember, I do not intend to convey that acreage under wheat will not continue to display a marked annual increase, or that wheat will not remain our preponderant crop for years to come. What I desire to impress is that in addition to wheat we shall have beef, pork, mutton, dairy and other produce. Instead of continuing a great produce importer, we are destined to become a great produce exporter—and this within a much briefer period than is now anticipated.

Every line of legitimate commerce in this city appears to

Every line of legitimate commerce in this city appears to be satisfactorily active, and a distinct improvement is reported during the past month. The whole atmosphere is decidedly hopeful. Naturally, real estate is quiet, although several im-

portant deals have been recently consummated. Any "snaps" that have been offered find ready buyers; but such "snaps" are few and far between. Land business is quite active. A large number of settlers are arriving here from the United States. Most of these are well equipped financially. To my mind the outlook for the land business is very good.

As to financial conditions, the banks are still reluctant lenders even for legitimate purposes.

It is conservatively estimated that our building statistics for the present year will, at least, touch the \$5,000,000 mark. A large amount of Dominion and provincial government work will be undertaken.

be undertaken.

In conclusion, it would seem to me that commerce, like most other things, is subject to the law of action and reaction, and that these two conditions must inevitably alternate. Further, that reaction is necessary, because a period of excessive prosperity is an exceedingly disorganizing circumstance which must be corrected through the medium of a subsequent quieter period, such as the present. Reaction is essential to the restoration of economic equilibrium—and after all, this little lull is really the step backward for the great, big bound forward.

John Milton and the West

One thing is certain—we have now got right down to business. We no longer avoid our problems, but are grappling with them—and with all the forceful energy and intelligence characteristic of this West, we are solving them successfully. We have truly lifted the errors of our youth from the fuller, wiser strength of our early manhood; and it is even as the great John Milton wrote of a similar transition in the history of the English people: "Formerly," he said, "we were like one who had set out upon his way by night, and travelled on through a region of idle dreams; but by this time our history arrives on the confines where daylight and truth meet us with a clear dawn representing to our view true colors and true shapes."

MEDICINE HAT NOT COMPLAINING

Building Operations in Sight-Factory Developments Are Making Things Hum

(Special Correspondence)

Medicine Hat, April 13th.

Medicine Hat, April 13th.

In Medicine Hat there is every reason to believe that the year 1914 will end satisfactorily, writes Mr. W. B. Willcox, secretary of the board of trade, to The Monetary Times. With the million dollars which will be expended in public improvements by the school board and the municipality, together with the general building activity which now promises to be at least equal to that of 1913, when this city led all western cities in point of increase—including two large flour mills which will start construction in a few weeks, as well as federal, provincial and civic buildings, several more substantial factories and many residences—an active season in building is in sight.

Since the first of the year, there has been an improvement in financial conditions, and funds for legitimate business needs have been more plentiful. In fact, business has been improving, and railway traffic and earnings here, in all departments, have shown a distinct upward tendency. No difficulty is anticipated in securing all the labor required for carrying out the programme of development and building thus far mapped out. A score of Medicine Hat factories are shipping their manufactured products all over the Canadian west, and, as the spring opens, an increased demand is anticipated, with other industries beginning operations later.

With heavier precipitation than usual by about an inch, an increase of 25 per cent. in acreage, meaning a crop of 100,000,000 bushels for Southern Alberta as against 80,000,000 in 1913; with the industrial development in a healthy state, and with practically no empty business blocks or residences, the prospects for Medicine Hat and district, now that the country is on a sane and safe basis, are undoubtedly bright and encouraging.

FIRST CLASS CITY LOANS

Companies are Beginning to Accept Them Again at Red Deer-Much Fall Ploughing Done

(Special Correspondence)

Red Deer, Alberta, April 13th.

Conditions in this district, generally speaking, show a distinct improvement over 1913, and prospects are bright for a good year, writes Mr. James Mann, secretary of the Red Deer Board of Trade to The Monetary Times. Farmers, owing to the splendid fall, were able to get considerable more fall ploughing done than usual, and while they have not been able to get on the land as yet this spring, they anticipate doing so within the next week.

Collections have been fair. Building operations are opening, two additions to business blocks are under way, in addition to some dwellings. The merchants generally report increased trade. There is not much demand for laborers, although there are few out of work at present. There is a small demand for farm help wages \$25 to \$40 per month. The city is not contemplating any great amount of improvements this year. By-laws to extent of about \$18,000 are being submitted to the people for some necessary work and repairs. people for some necessary work and repairs.

While Red Deer has nothing particularly to boast about as to general conditions, things are considered in pretty fair shape, considering the recent financial stringency. Loan companies are loaning freely on farm lands at 8 per cent. and are beginning to accept first class city loans again.

EDMONTON AND DISTRICT

Increase in Crop Acreage—Development of Mixed Farming-Labor Conditions

(Special Correspondence)

Edmonton, April 13th.

It is somewhat difficult at this early stage to make any decided prediction as to agricultural conditions, writes Mr. F. T. Fisher, secretary of the board of trade, to The Monetary Times. The season is unusually late and no seeding has yet times. The season is unusually late and no seeding has yet been done. There is not the slightest reason to worry on this account, however, as our experience in the past has been that the most favorable seasons were those which opened somewhat later, the subsequent growth being more rapid and generally more satisfactory than in the seasons which opened unusually early. Owing to the amount of ploughing done last fall being noticeably greater than usual, the matter of time will not be of so much importance as it has been in other seasons when less fall ploughing had been done. less fall ploughing had been done.

It is difficult to make any estimate as to the acreage that will be seeded, but parties closely in touch with agricultural-matters, whom I have consulted, estimate the increase over last year's acreage at from ten to twenty per cent.

Progress in Mixed Farming

Agricultural conditions generally are fairly favorable, the farmers in the territory tributary to Edmonton having been making great progress in the direction of mixed farming, and the production of live stock and dairy products has increased very rapidly and in consequence the crop situation is not so important a factor here as in many other portions of the west.

. It is probably owing to this fact that our wholesale houses and manufacturing concerns report business conditions as very fair. Almost without exception they report volume of business as better than for last year at this time. They also report credit conditions as fair and seem quite satisfied as to the prospects for the future, both as to volume of business and collections.

Building and Labor Conditions

The building season has scarcely opened as yet, although there is considerable activity in sight. Both architects and leading contractors advise me that they anticipate a fairly active season and are now doing a good deal of figuring on projects which are likely to be closed. The aggregate of building operations will, of course, be very largely affected by financial conditions. A slight further improvement in the supply of money to meet the demand for building purposes will mean an exceedingly active building season in Edmonton. Even without any further improvement in conditions, a season of fair

activity appears to be assured.

At the present time there is a surplus of most classes of labor in the city. This is caused by the fact that men have gathered in here in thousands from apparently all parts of the country. The prospects are that so much of this labor as is employable will be absorbed within the next few weeks as the employable will be absorbed within the next rew weeks as the usual spring activities open. While there have been a few hundred unemployed men in the city most of the winter, or men working only part time, the situation has not been acute and the number of unemployed has not been greater than might be expected to be found in any city of 75,000 population under normal conditions.

WEYBURN-WORKING AHEAD

Sown Acreage May Show Increase—Business Conditions-Money Movements

(Special Correspondence)

Weyburn, April 13th.

Owing to the backward spring, little seeding as yet has been done in Weyburn, Saskatchewan, vicinity. The acreage to go under crop will be about as last year, with possibly a slight increase in the flax crop.

General business conditions throughout the winter have General business conditions throughout the winter have been satisfactory, though for some few weeks immediately after the opening of the year, they were quieter than normal. Generally speaking, the merchants in Weyburn are well satisfied with the volume of business done.

Collections for the past two months have been difficult, and wholesalers report that business is slower than at this time last year. There appears to be money available for lean pure

last year. There appears to be money available for loan purposes, but at a high rate of interest, and under more stringent inspection than in the past.

Preparations have been made by local interests for the erection of a number of artisans' dwellings. A number of these houses will be erected this year, there being at the present time a decided shortage of accommodation.

The city has disposed of \$240,500 debentures. The issue has been approved by the local government board, and the proceeds will be spent in improvements during the year. Con-

has been approved by the local government board, and the proceeds will be spent in improvements during the year. Considerable building is about to be entered upon, including a new school, with possibilities of a second being built before the end of the year, a large apartment block, terminals for the Grand Trunk Pacific, and considerable building for the Canadian Pacific Railway. The assurance of the entry of the Canadian Northern Railway this year will give a decided fillip to development in all directions.

Newcomers are arriving, so that there is not likely to be any shortage of labor for the work in view.

The past few weeks have been marked by some activity in legitimate real estate business, inquiries being mainly for property for building purposes.

Though money is not likely to become easy before next year, there should be much activity in all lines during the coming summer.

WINNIPEG BACKED BY THE WEST

Only One-Eighth of Western Farm Land Yet Occupied -From Fur Trading Post to Western Metropolis

(Special correspondence.)

Winnipeg, April 13th.

In the economic condition of Winnipeg is reflected every current of depression, and every wave of prosperity, which influences any portion of that vast territory which lies west of it. Commercially, its business increases as the newer country is brought under development, and increases proportionately as the development extends, writes Mr. Charles F. Roland, industrial commissioner to The Monetary Times.

This city comes by this correction of byginess by virtue of

This city comes by this accretion of business by virtue of its inheritance of commanding geographical position, by the right of being first in the field, and through the progressive spirit which animates its citizens.

As to geographical position, and the advantage she gains by it, it is only necessary to outline the railway situation, and

Winnipeg has an unrivalled system of distribution by rail, in which all the railroads of Western Canada take a part.

The strategic position of Winnipeg was realized by the early fur traders as the logical supply depot at the entrance to the prairies, a position which it has held for forty years, a term of existence which has seen an advance from fur trading to village, from village to town, from town to commercial

term of existence which has seen an advance from fur trading post to village, from village to town, from town to commercial city doing the wholesale business for the whole of the country west, and from distributing point to a manufacturing city of the first rank among the factory communities of Canada.

From a financial point of view, also, the importance of Winnipeg is being recognized in increasing degree. Banks, loan companies, insurance and trust companies, and other financial institutions, realizing the growing importance of their transactions in the West, are making Winnipeg their headquarters and in some cases, not only for the West, but for the whole of Canada. Canada.

Economic conditions in Winnipeg have made enormous strides during the past decade.

Some Figures of Growth

In 1903 the population was 56,741; in 1913 the population (according to a directory census) including the suburbs, was 276,000, a gain of over 200,000 in ten years, an average of over

276,000, a gain of over 200,000 in ten years, an average of over 20,000 a year.

The building permits in 1903 were \$5,689,400, and in 1913 \$18,357,150. The total for the ten years is \$136,464,790, an average of over \$13,500,000 a year.

The assessment in 1903 was \$38,596,608, and in 1913 was \$259,419,520, an increase of over \$220,000,000.

The Winnipeg customs returns in 1903 were \$1,936,811, and in 1913 were \$9,909,918, an increase of \$8,000,000.

Winnipeg's postal revenue in 1903 was \$201,906, and in 1912 was \$1,167,266, an increase of over \$965,360.

Winnipeg's bank clearings in 1903 were \$240,108,000, and in 1913 were \$1,634,977,237, an increase of over \$1,300,000,000, a business record no other city anywhere of like population can show.

Winnipeg's industrial growth is also large. According to government statistics in 1903 the output in manufactured goods was \$8,606,248; in 1911 it was \$39,400,608. and in 1913 the output is estimated at \$50,000,000, an increase in ten years of over

\$40,000,000. Winnipeg has now over four hundred factories producing this output, with some \$48,000,000 capital invested, employing over 18,000 hands, with a monthly payroll of \$750,000. Winnipeg took her place in 1912 as the greatest grain centre in the world, there being some 143,000,000 bushels of wheat passed through the city in addition to the tremendous volume of oats, barley and flax. In 1913, during the shipping season, 150,749,800 bushels of wheat were inspected at Winnipeg, an increase in two years of 50,000,000 bushels.

Greater Winnipeg has also the distinction of having the largest flour mills in the British Empire, operated by the Western Canada Flour Mills and Ogilvie Flour Mills, each with a capacity of 5,000 barrels per day.

Winnipeg has spent \$6,000,000 in a hydro-electric plant on the Winnipeg river, capable of producing 60,000 horse power, which in addition to the Winnipeg Electric Railway plant of 39,000 horse power capacity, enables Winnipeg to sell light to the citizens at 3c per kilo hour and power to our manufacturers at less than Ic per kilo.

at less than 1c per kilo.

Winnipeg is now engaged in securing a soft water supply for her citizens from a natural lake, which will also assist in the further development of her manufacturing industries.

further development of her manufacturing industries.

In every line of commercial endeavor progress has been commensurate with the ratio of development indicated above. And the development of Winnipeg and the business of Winnipeg has marched shoulder to shoulder with the opening up for cultivation of the agricultural belt which forms the three prairie provinces. The speed and thoroughness with which this development is taking place can only be thoroughly understood by comparison with the great movement of immigration during the latter half of the nineteenth century into the Western United States; and the progress made during the past ten years in Western Canada is declared by students of that movement to be fully equal to that which, under less favorable conditions in every way, took fifty years for accomplishment in the western and middle states.

As yet, however, less than one-eighth of this vast area of available farming land has been occupied. It is on the proceeds of the business of this one-eighth that the city of Winnipeg has grown to its present size and importance. What, then, may be asked, is the future of Winnipeg when that other seveneighths of potential farm land is brought into bearing by the spread of railway communication and the resulting settlement?

CROUP INSURANCE

(Special Correspondence.)

Ottawa, April 11th.

Vigorous protests have been made to the Minister of Finance by the fraternalists against the adoption of the provision in the Government Insurance Amendment Bill permitting group insurance by employers of labor. The deputation, which was accompanied by Dr. Edwards, M.P., W. F. Nickle, M.P., and Mr. Gauthier, M.P., included representatives of the Canadian Order of Foresters, Les Artisans, Sons of England, Royal Arcanum, Catholic Mutual Benefit Association, Ancient Order United Workmen, and many other organizations. It was stated, amongst other things, that group insurance had been tried in over thirty States of the American Union and had only been adopted by four. Fears were expressed that if the provision in the Canadian Bill became law it would have a disastrous effect upon the fraternal organizations. The Minister of Finance gave the delegation a very sympathetic hearing and asked them to put their objections in writing. A committee, consisting of Messrs. Lyman Lee, Toronto; W. C. Mikel, K.C., Belleville, and Mr. Gauthier, M.P., were appointed for this purpose. The fraternal organizations will be represented before the commons committee on banking and commerce when the bill is under consideration. is under consideration.

CAMROSE NEEDS FARMERS

The progress of Camrose, Alta., is depicted in an excellent booklet just issued by the Camrose Publishing Company. The town is situated in a mixed farming territory, and from the surrounding coalfields there is a present daily output estimated at 1,000 tons. Good rail facilities are provided and a special town tariff is in force. Municipal ownership and the single tax system are features of civic government. Fine educational institutions assist and all public utilities. The population of Camrose is 2,100. The total net assessment is \$2,375.971 and the debenture debt \$177,832. A need of the district is more producing farmers.

POSITION OF UNION LIFE CASE

Though unable to speak definitely, Mr. Du Vernet, K.C., counsel for the Crown, stated that Mr. H. Pollman Evans, formerly president of the defunct Union Life Assurance Company, had sailed from France for Toronto, and would arrive in Canada next week. This statement was made at the open-ing of the Assizes at Toronto. Counsel stated that Evans would stand his trial on the charge of conspiracy to defraud in connection with the affairs of the company. This inforwould stand his trial on the charge of conspiracy to defraud in connection with the affairs of the company. This information was vouchsafed to nullify the effect of the application made by Mr. Armour, K.C., that the charges against Harry Symons, K.C., and George E. Millichamp should be taken up at once. Mr. Du Vernet said he would not like the case against Symons, Hughes and Millichamp to proceed without

Evans' presence.

Mr. Justice Middleton would not let Hughes out on his own bail, and the present bail stands antil the end of the sitting. The matter will come up again on Monday, until when the \$15,000 bail for Mr. Symons also stands.

According to a Canadian Associated Press dispatch, the According to a Canadian Associated Press dispatch, the Right Hon. John Burns in reply to further questions in the Imperial House of Commons, regarding the position of the English shareholders in the Union Life Assurance Company, promised to make enquiries as to the exact nature of the proceedings taken against the directors in Canada. Meanwhile if there was sufficient evidence procurable that the criminal offence had been committed on that side, it should be laid before the Public Prosecutor.

Mr. Burns added that he had now seen a copy of the prospectus advertised by the company in 1910, and as that contained names of bankers in England, the company, no doubt, had a banking account there at one time. He had no power to assist the shareholders in enforcing any claims for the recovery of money subscribed.

Messrs. Fenwick and Ryan have opened stock brokerage offices in the Lewis Building, Montreal

CANADA IS STATES' SECOND BEST CUSTOMER

Analysis of Dominion's Trade Position by Finance Minister White-The Trade Balance was Improved during the Past Year

THE trade of Canada, as measured by the aggregate of the total imports and total exports, reached in 1913 the record figure of over one thousand million dollars. In the budget of last year, said Hon. W. T. White, finance minister, in his budget speech, I called attention to the fact that during the last three years the total imports had increased at a very much greater ratio than the exports, and that the marked difference between the amount of the imports and the amount of the exports in 1913 had evoked criticism on the part of some who put forward the view that we might expect to be drained of our gold if the condition continued. I pointed out at the time that Canada was a large borrower of capital required for the construction of our transcontinental railways, of great public works, for industrial and commercial enterprise, and for the municipal services of our rapidly growing communities. Expenditure of this kind is of a capital nature, and money borrowed for the purpose of making it is loaned, not upon terms of immediate repayment, but for investment. As a great part of our imports represented our borrowings, and found their way into works and undertakings of the character mentioned, it is obvious that the situation was very different from what it would have been had all our imports been for immediate consumption, in which case the adverse balance of trade would have been fraught with serious consequences, if indeed it would have been possible for it to exist at all. The greation that was whether Canada would be in a position to question then was whether Canada would be in a position to pay with her exports not for all her imports, but such only as did not represent capital borrowed abroad for productive undertakings and interest upon her borrowings, past and present. Keeping this distinction in view, and the further fact of the vast amount of capital and effects reaching the Dominion by immigration, it became apparent that the adverse balance of trade gave rise to no cause for alarm. while this was so, it is a gratifying feature of the trade of 1913-14 that the exports have increased in a marked ratio, and that the excess of imports over exports, which characterized the previous year, has been materially cut down. While in 1912-13 the percentage of the value of imports to the aggregate trade was nearly 64 per cent. up to the end of February, 1913, the percentage of imports to the aggregate trade for the 11 months ended February 28 last was over 57½ per cent., or about the same proportion as in the year 1908. The increase in exports (as shown in Table I), while chiefly in agricultural products, will be found to apply to the products of mines, fisheries, forests, animals and their products and manufactures.

Table I. Value of Goods Exported (by classes) from the Dominion-Merchandise only (Canadian produce).

Fiscal Year.		The Fisheries.	The Forest.	Animals and their Produce.
1908 \$	39,177,133	\$13,867,368	\$44,170,470	\$55,101,260

ded Feb. 28,				
1914	191,707,48	3 51,204,16	108,617	404,887,448

Notwithstanding the fact that during the current fiscal year Canada has been experiencing with the rest of the world a severe strain upon commercial credits, owing to the

financial stringency, the trade statistics for the year will exceed those of last year, when they reached the record figure of over one billion dollars. For the eleven months ended ceed those of last year, when they reached the record figure of over one billion dollars. For the eleven months ended February 28th, 1914, the total imports amounted to \$597,420,545, and the total exports to \$440,631,104, or a total of \$1,038,051,649. With the figures for March added, the record of last year will be substantially exceeded. The comparative figures since 1908 are given in Table II.

Table II. Total trade of Canada with all countries (including coin and bullion).

Fisc	al Year	Total imports	Total exports Canadian and foreign Produce,	Aggregate trade-	Percentage of value of imports with aggregate trade
	nths en	309,756,608 391,952,692 472,247,540 559,320,544 692,032,392	261,512,159 301,358,529 297,196,365 315,317,250	\$ 650,793,131 571,268,767 693,211,221 769,443,905 874,637,794 1,085,264,449	54.22 56.52 61.37 63.94 63.76

597,420,545 440,631,104 1,038,051,649 57.55 The figures show the percentage of value of imports with aggregate trade. The question of balance of trade has been so much discussed in Canada and Great Britain. In 1908 the percentage of value of imports with aggregate trade was 56.97 per cent.; in 1909, 54.32 per cent.; in 1910, 56.52 per cent.; in 1911, 61.37 per cent.; in 1912, 63.94 per cent. This year the percentage has fallen to 57 per cent., which was about the rate in 1908.

The following table shows the aggregate of our imports and exports from and to the United Kingdom:—

Trade with the United Kingdom—Merchandise only.

Fiscal Year.	Imports for consumption from the United Kingdom.	Exports to the United Kingdom, Canadian and foreign Produce.	Aggregate trade.
1908 1909 1910 1911 1912	\$ 94,417,314 . 70,682,101 . 95,336,427 . 109,934,665 . 116,906,212 . 138,652,198	\$134,477,124 133,745,123 149,630,488 136,962,971 151,833,379 177,982,002	\$228,894,438 204,427,224 244,966,915 246,897,636 268,739,591 316,634,200
ded Feb. 28	3,	214,632,520	335,451,678

This indicates that there will be a falling off in the imports of Canada from the United Kingdom.

There has been a very large increase of exports to the

United Kingdom from Canada during the past fiscal year.

As to trade between Canada and the United States, Canada is the second customer of the United States to-day. The largest part of the export trade of the United States is with Great Britain and the second is with Canada. On the other hand Canada is fith in her called to the United States comhand, Canada is fifth in her sales to the United States, coming even after Cuba as far as the figures of the United States indicate. The following table shows the imports from and exports to the United States:-

le with the United States—Merchandise only.

There was a falling off in our imports from the United States in the past year, as there was in our imports from Great Britain. On the other hand, as in the case of Great Britain, our exports to the United States substantially increased. The increase is due, in large measure, to the Underwood tariff, which has placed live stock, dairy and certain other farm products, fish, manufactures of lumber, and other natural and manufactured products of Canada, upon the free

The aggregate trade with the United States in the year 1912 was \$443,384,797, in 1913 it was \$586,745,018, and for the 11 months ended February 28, 1914, it was \$523,151,977. In 1913 the exports to Great Britain were \$177,982,002, and, for the 11 months ended February 28, 1914, our exports were \$214,632,520. A large contributing cause to the result was the export of our wheat. The western harvest was ex-ceptionally early last year, and it was moved to market with great celerity and despatch.

LIQUIDATOR FOR CANADA PROVIDENT

On May 4th, a permanent liquidator for the Canada Provident Assurance and Investment Corporation will be appointed at the Judges Chambers, Winnipeg. The judge has appointed a solicitor, Mr. R. D. Stratton, to act on behalf of the shareholders. This company has been in trouble for some time, and had close relations with the defunct Union Life Assurance Company.

CANADIAN NORTHERN STOCK AND BOND CUARANTEE

The latest rumor in connection with the Canadian Northern request for a bond guarantee states that the road is willing to offer 51 per cent. of its common stock as security. It is understood that the sub-committee of the Cabinet which has been dealing with the matter has reached certain conclusions, which will be reported to the Cabinet Council and dealt with by them, but only after the return of the Prime Minister.

INTERNATIONAL LOAN COMPANY

Since the International Loan Company, with head office Since the International Loan Company, with head office in Winnipeg, was organized nine months ago, \$190,000 worth of their stock has been sold. The company recently held its annual meeting, when its president, Mr. G. W. Argue, commented upon the success that has attended operations. "Although business had only commenced seven months ago," he stated, "the company had accumulated a surplus of \$10,881.96. From the accounts, certified by the auditors, it was ascertained that the capital employed during the period had been earning at the rate of over 16 per cent. per annum. The directors felt justified in recommending that a dividend of 12 per cent, per annum be paid to each shareholder upon

The directors felt justified in recommending that a dividend of 12 per cent, per annum be paid to each shareholder upon his paid-up capital for the time it had been in the hands of the company. This would require \$2,146.42, which, deducted from the surplus, would leave the substantial figure of \$8,735.54 at the credit of reserve, and these would remain to be carried in to the accounts of the current year. Taking into consideration the short period during which the company transacted business, this, result is somewhat unique and an exceedingly gratifying one to the shareholders."

The officers and directors of the company are as follow: President, George W. Argue, director of Argue Brothers, Linited; first vice-president, M. E. Shantz, manager of Menzies and Shantz, director of the King's Park Land Company, Limited; second vice-president, F. A Argue, president of the Bank of Hamilton, Hamilton, N.D.; secretary-treasurer and manager, M. Willis Argue, president Argue Brothers, Limited, president Western Investments, Limited, secretary-treasurer Seven Oaks Land Company, Limited, secretary-treasurer Seven Oaks Land Company, Limited, secretary-treasurer A. B. C. Investments, Limited. Directors—J. Halpenny, M.D., of Simpson, Halpenny and Gorrell; W. H. Geddes, D.D.S., director, Woodlands, Limited; R. H. Hamlin, manager Empire Sash and Door Company, director Northern Canada Securities Company. Auditors—Pender, Cooper, Slasor and Company.

The company is offering its shares to the public.

PUBLIC TOOK \$0 PER CENT. GRAND TRUNK LOAN-CABLES

(The following cable messages of the Canadian Associated Press and the Montreal Star are trinted by special arrangement.)

LONDON VIEWS OF RATE REDUCTION

Decision is Not Well Timed-How It Affects Security Holder

*Montreal, April 9.-Canadian railways occupy much

*Montreal, April 9.—Canadian railways occupy much space in the morning papers to-day, says a London cable to the Daily Mail. The articles are especially directed at the decision of the Dominion Railway Commission in regard to the reduction of freight rates in Western Canada.

The Financial Times says that the highest authorities are of the opinion that the effect of the freight reduction upon the Canadian Pacific will be altogether negligible. Apprehensions of a reduced dividend as the result thereof are unworthy of serious consideration. It hopes that the farmers of Western Canada will be satisfied with the modest step of the Government, doubtless taken with a view to appearing a section of the electorate.

Make Superlative Difficulties.

The Daily Telegraph finds a difficulty in appreciating the ultimate effect of the decision, and point out that the increased demands for advances in wages and reductions of rates make superlative difficulties for the uncompleted

The Financial News opens an editorial devoted to Canadian finance and railways with the sentence: "If Canada had no transcontinental railways to spend money upon her finan-cial prosperity might become embarrassing."

It continues that the decision of the Railway Commis-sioners has seriously disturbed British capital interes ed in Canadian railways.

"Too little is known to enable a judgment of the precise effect of the decision, which is not well timed, considering the large amount of money still required for railway construction in Canada," the Financial News concludes.

Cerman Selling of Stock.

†London, April 9.—The heavy slump in Canadian rails on the stock exchange yesterday was naturally attributed to on the stock exchange yesterday was naturally attributed to the lowered freight rates. One or two observers note, however, that Canadian railways themselves were not greatly alarmed, like the operators on this side, and assign a good portion of these stocks' weakness to heavy Berlin selling consequent upon the failure of the big German trust. Touching on the probable effect on the Grand Trunk the Manchester Guardian says that should the decision become operative that that company may suffer considerably. It can hardly be said at the moment to be in a strong position to meet adversity of this kind, and before long will have to face the burden of its heavy guarantees upon Grand Trunk Pacific bonds. That line may be profitable, but some people assert that the opening of the Panama Canal will injure Canadian railway companies, because then more freight will be sea-borne.

MONTREAL ISSUE IN LONDON

London, April 14.—Subscriptions are being invited by the Bank of Montreal for £1,500,000 4½ per cent. sterling registered stock of the city of Montreal, which will be redeemable at par in 1953. A full six months' interest will be payable on November 1st, 1914.

PUBLIC TOOK FIFTY PER CENT.

tLondon, April 8.—Something over 50 per cent. of the Grand Trunk issue of one and a half millions in 4 per cent. debentures at 90 has been left the underwriters. This result is by no means unsatisfactory, considering the crowded state of the market within the last few weeks. The issue is very favorably commented upon and brokers are anticipating it will make an easily saleable commodity directly the holidays

SASKATCHEWAN SHORT TERMS

London, April 15.-Province of Saskatchewan yearly notes of about £500,000, on a basis of about 4 per cent, have just been placed here. Leading English corporations are borrowing on yearlings at about 3½ per cent.

WESTERN CANADA'S LAND COMPANY'S SALES

tLondon, April 7.—Falling off in land sales from 50,000 to 10,000 acres was reported at the Western Canada Land Company meeting to-day. In view of this the directors recommended that the whole profits be carried forward

They intended, they said, to develop the Pembina Coal and Brick property, but otherwise not to embark on any fresh business, outside of land selling.

RUSH OF CANADIAN ISSUES COMINC

*London, April 8.—Arrangements are on foot for a considerable number of Canadian issues after Easter.

The abundance of money awaiting investment is evidenced by the remarkable successes of one English and one American issue, as both the General Electric sixes and Portland Railways Light and Power fives were snapped up in a few hours. few hours.

Despite the increased price of money generally the Glasgow Corporation is paying only 3½ per cent. for its new £1,500,000 stock at par.

CENTRAL RAILWAY'S MISSTATEMENT

*London, April 8.—Regarding advertisements of the Central Railway of Canada issue of £2,600,000 fives at 90, which again occupies much space in the British press to-day, the Canadian Government office here publishes an intimation from Rt. Hon. R. L. Borden, declaring as entirely unauthorized the statement in these advertisements that additional subsidies, covering the whole line and branches, would be voted during the present session of the Dominion Parliament.

Premier Borden says: "The question of subsidies has not been considered by the Dominion Government, and it does not expect to introduce any subsidy bill this session. There has been no decision to grant subsidies to the Central Railway of Canada."

The lists of the issue closed to-day. No part has been

The lists of the issue closed to-day. No part has been

The lists of the issue closed to-day. No part has been underwritten.

*London, April o.—In reply to the Canadian Government's letter re Central Railway of Canada prospectus, it is explained on behalf of the company that the definite statement that subsidies would be voted this session appeared through some misunderstanding, and that the statement in the prospectus that a further grant would in ordinary course be voted this session was perfectly correct, although, as the Daily Mail says, the company has now accepted Premier Borden's announcement that a subsidy this session is not expected. The Mail adds that this is a blow at the company, which it accepts with what dignity it can.

The general view of financial editors is that the rates decision will hit the newer lines hardly, and that their chances of earning their upkeep are seriously endangered.

Underwriters of the Grand Trunk debenture issue received about 53 per cent. of the issue.

London, April 15.—Mr. Reid, the agent-general of Ontario, publishes a cablegram from Hon. Mr. Hearst repudiating the published statement in connection with the recent Central Railway of Canada issue that the company has the right of any subsidy from the Ontario Government.

right of any subsidy from the Ontario Government.

The Bank of Nova Scotia has opened the following branches: Brigus, Newfoundland manager, Mr. J. T. Steeves, Montague, P.E.I.; manager, Mr. G. M. Schurman; and Victoria, P.E.I.; manager, Mr. K. L. Golding. New Carlisle, Que., which has been sub to the Paspebiac branch, has been made a separate branch. Mr. P. C. Le Gallaio, manager at Paspebiac, will sign "pro manager." The branch at Cienfuegos, Cuba, has been closed.

CENTRAL RAILWAY OF CANADA

The Central Railway of Canada the other day offered £1,225,000 5 per cent. bonds in London at 90. This railway seems to be a mighty long time getting up steam. In 1907 The Monetary Times drew attention to the issue of a private prospectus issued in connection with the scheme. Underwriters then apparently did not have any great desire to underwrite the securities. In 1911, £600,000 first mortgage 5 per cent. bonds of the railway were offered to the public. For several years disputes have arisen from time to time in connection with the land grants which the company has claimed. This question still seems to be a matter of discussion, according to cable messages from London printed elsewhere in this issue. Besides which, Canada has sufficient railways for the time being.

STRETCHING ASSESSMENT FIGURES

A Western city, which has often had a good word from The Monetary Times, has issued a chart showing its remarkable development in population, building permits, realty assessment and customs receipts. There is a reasonably constant ratio of development between all of these figures, as obviously there should be, with the single exception of realty assessment. The expansion in realty assessment should be dependent almost absolutely upon the expansion in the others. They are largely the cause and realty assessment should be the effect. The diagram seems to indicate that the city's realty assessment, by arbitrary or artificial means, has been increased to an extent for which there can be no actual justification. Comparing the lines of 1912 with those of 1913, for the various items, there is observed an extraordinary jump in realty assessment as compared with the apparently reasonable increase in the other items. This particular city, by the way, is not the only assessment sinner in western Canada.

NOT ROOM FOR ANOTHER

The railway committee at Ottawa did well to hold over for further consideration the application for a charter for a new transcontinental railroad. Its incorporators had never been heard of by members of the committee. The bill for the All-red Line Railway Company proposes a transcontinental line from Cape St. Charles, Labrador, through to the Pacific coast and north of the National Transcontinental. The estimated cost of construction is, roughly, \$200,000,000. The committee made it clear that such an enterprise would not be chartered unless it was apparent that sufficient money could be raised to complete the undertaking. Even if such an assurance is forthcoming, The Monetary Times thinks that the investor will consider seriously before subscribing to the bonds of a new railroad of such magnitude.

The three transcontinental railroads which Canada will have at the end of the year have already a large task in hand to pay the interest upon their securities and a problem to encourage new freight. A fourth road, even if not completed for some years to come, would stand a mighty poor chance of earning its salt, to say nothing of its daily bread. Mr. W. F. Nickle, the member for Kingston, was correct in his assumption that the entrance of another transcontinental project into the securities market would be unfortunate for Canadian credit. He hinted also that the company might ask for subsidies later. The company should recognize the fact that the country has enough railways to go on with and that the day of land grants and cash assistance to Canadian railroads has passed.

REDUCED RAILROAD RATES

Canada's railway commissioners proved that the quality of their mercy was strained sufficiently to postpone the operation of reduced freight rates in Western Canada until September 1st, 1914. Otherwise, the quality seems to have followed the line of the poet. Business men and financiers generally agree that the time chosen for the announcement of the reductions in freight rates was most inopportune, coming as it did at the tail-end of a severe financial stringency and during a period of business quiet. Mr. Drayton and his colleagues, however, may have thought it better to spring the announcement now rather than when the country had begun to take its second wind next fall.

As noted in The Monetary Times last week, the reductions vary from 5 to 30 per cent. The railway commissioners have ordered that they be put into effect by the Canadian Pacific, the Grand Trunk and the Canadian

Northern railways next September. From the railroads' viewpoint, Sir Thomas Shaughnessy, president of the Canadian Pacific, sums up the matter thus: "Apparently the board, actuated, no doubt, by what they consider to be the ultimate best interests of the country, have put into effect reductions in rates which, while they might have a semblance of justification some years hence are such as, viewed in the light of present commercial and transportation conditions, can not but be regarded as unnecessarily and unjustifiably drastic in character.

"The Canadian Pacific can stand it, and this seems to be about the only excuse that can be urged in support of the commission's findings. How other companiesstill in the process of construction, and which have not

been able to build up supporting traffic and are faced with the necessity of heavy borrowing for the next few years, at least—regard the decision, is for them to say."

The representatives of the other two roads are busy analyzing the railway commissioners' judgment. Later, they doubtless will have something to say. Regarding the Grand Trunk Pacific and the Canadian Northern, the judgment says: "The mere fact that the Grand Trunk Pacific is not now getting adequate returns on its capital, and is not at present making satisfactory profit on that part of its line where it is in full operation" (say, between Edmonton and Winnipeg) is not a conclusive reason why the rates should not now be revised generally so as, if possible, to place them on a just and fair basis." The judgment adds: "The company is operating only in part, and profits earned on a part cannot be expected to carry the whole. The road is still in its constructive stage. During the discussion of the present case it was shown that the losses for the first three years of its operationand while the company has been working up its business under the decisions of commissions of American statesshould fairly be charged to capital account. Whether this is so or not, the fact that such a principle has been adopted in the past to some extent seems to afford a very good reason why the returns of the Grand Trunk Pacific hitherto should not be taken as establishing the reasonableness or unreasonableness of rates at the present time.

"To a less degree the same may be said regarding the Canadian Northern. So far that line has had no through business, although operating much longer than the Grand Trunk Pacific. It is constructing both to the east and the west, and is constructing at such a rapid rate that its returns should not be taken as conclusive

one way or the other in this issue.

"The board is of the opinion that the serious drop in railway earnings that the past few months have shown is not a permanent condition, notwithstanding that the earnings of the Canadian Pacific for 1912 and 1913 probably represent a maximum of return, and that, just as soon as the other lines are in through operation, it will be some time before that maximum will be again reached."

While decreased rates have been ordered in Canada, it is interesting to note that a 5 per cent. increase in rates is being asked by the railroads of the United States. It is generally thought, too, that at least a 3 per cent. increase will be authorized in the neighboring republic.

FIRE IN THE HOME

How to Prevent It—Safe Flues and Stove Pipes Would
Save Two Million Dollars a Year

By J. Crove Smith, B.A., B.Sc.

Supposing your home portion of your loss would insurance cover? All that a man holds most precious is in his home, and therefore the dread scourge is feared most of all in the home. A fire means danger to the family and perhaps homelessness until a new place can be found, but beyond that, inasmuch as the home is the unit of social life, a man owes it to society, as well as his family, to see that no precautions are omitted for its protection. Every man's obligation in the matter is undivided, the responsibility is his alone.

The causes of fires in dwellings are more clearly determined than in other buildings, and the problem of their prevention is simpler. A classified list of fires, stating their origin, was given in a previous article in The Monetary Times, and from that list the reader can draw his own conclusions as to the measure in which carelessness enters into the destruction of Canadian homes. At least 75 per cent. of all dwelling fires occur from such common causes as matches; overheated stoves; defective stove pipes; ashes and cinders; dirt, dust and rubbish; storage in closets, cellars and attics; gasoline, benzine and naphtha; coal oil stoves and lamps; gas stoves; gas jets; candles, and smoking. The safeguards needed for the prevention of outbreaks from any or all of these causes are so inexpensive and unquestionable that there can be no excuse for their being neglected. While the remedy is simple, yet in most cases it is neglected; in fact, we ignore the situation at the place that is weakest and where we could attack Canada's fire waste with the largest percentage of success.

Danger of the Match.

Take matches for instance. Is it not true that not one of us is careful enough with the lighted match? The silent parlor match retains a spark of fire upon the tip, seldom visible, but capable of producing as large a fire, if carelessly thrown away, as a burning match. They are fire brands, and if we would escape our tremendous loss by fire, one of the first lessons learnt must be the exercise of due care with matches.

There is only one safe rule—use safety matches—the kind that strike only on the box. Do not let your family, your

servants, or your employees use anything else. Furnish them with matches if necessary, and pay the bill ungrudgingly; it will be one of your best investments for life and property protection.

All other matches take fire from a hundred insignificant causes. The heads fly off, the sticks break, and flaming embers fall everywhere to start innumerable "cause unknown" fires. The double tip match is a trifle better than the older kind, but is not good enough to be worth using by sensible and intelligent people. Watch the misfortunes of almost 5,000 users of the common match in Canada every year, and then get the safety match habit.

If you will not take this advice, then keep the strike anywhere matches under lock and key. Above all, never leave matches around where children can reach them. Forty-seven children under fifteen years of age lost their lives in Canada last year through playing with matches. If you allow your children to use matches, you ought to be arrested for criminal neglect.

The government of our country is not free from blame in this matter. The match is the only poison allowed to enter our homes without bearing a "Danger" label. Matches endanger human life a thousand times more than any poison for which we have to sign and pass through a purgatorial inquisition. Yet any little child of walking age can toddle into any store in the land and procure a box upon request.

Flues and Smoke Pipes.

Then look at the numerous fires caused by defective flues and smoke pipes! It is surprising to find such an abounding carelessness in this regard amongst those whose homes are no more than tinder boxes. The rules for safeguarding this hazard are simple and if carried out would save the people They are these:-Be of Canada over \$2,000,000 every year. sure that all smoke pipe joints are spark-tight and well fitted. Do not set a pipe into a chimney vertically, it must go in horizontally at right angles. Do not set the pipe in so far Do not run the pipes within one that it stops up the flue. Do not run the pipes within one foot of wood-work on ceilings or walls unless you put up a heat shield of metal. Do not allow pipes to run through wood floors, ceilings, lath and plaster partitions, or into closed rooms, closets, attics and dark corners where they are not always in plain sight. Clean all smoke pipes once a year. Jarring them is not enough, the scale should be removed with moved with a scraper. Inspect every section for rust holes especially in the pipe that enters the flue. New pipe will pay for itself in sightliness and safety. Cover all unused flue openings with metal stoppers. Do not plug them with rags or allow the decorator to cover them when he papers the wall. All these are little things, but their non-observance lies at the root of a large proportion of our fire loss.

It is a common saying that a dirty and disorderly house burns faster than a clean one. The storage and maintenance of useless odds and ends in our homes occasions many a fire. In order to prevent rubbish becoming a fire danger, the best thing to do it to have no rubbish and thoroughly to clean out the places where it is wont to accumulate. This cannot always be done, for the storage of useless trash is a housekeeper's privilege that cannot be interfered with. While its prohibition is an extreme measure there are certain safeguards that should be kept in mind.

Do not use the cellar whatever you do. Most dangerous fires start there and spread through the house. If you must store in the house, use the attic. A fire starting there may burn down the house, but that is better than burning it up. Do not have store closets in the halls or under or near the stairways. Remember the stairway is your fire escape. To sum up the whole matter—have a spring-cleaning every week—get rid of all the rubbish and litter of disused articles that accumulate and contribute in a large measure to the dangers of fire.

Hazards of Casoline.

The hazards connected with gasoline are being continually impressed upon the public but with little sign of the abatement of fire arising from its use. The only safe rule for gasoline is not to have it in the house. Most people use it for dry-cleaning. Far better to send the articles to a cleaner than run the risk of fire and cheaper in the end. In case of its use here are a few directions that may help: Buy as little as possible and keep that little in a safety-can which closes automatically. Keep the can labelled; do not mistake it for coal oil. Use gasoline in the day-time and outdoors if possible. Do not use it near lights, fires, flame or heat. Ventilate the room after using it to let the fumes pass off. Do not empty gasoline into sinks or drains, throw any surplus on the open ground where it will sink in. Do not use it in wash boilers. Do not put clothes cleaned with gasoline near the fire to dry. Do not use it to kill bed-bugs, you can exterminate them without cremating them. Remember! one pint of gasoline makes 200 cubic feet of air explosive.

Coal oil lamps are a fruitful cause of many of our dwelling fires. Coal oil itself is safe enough. It is the vapor given off under heat, collecting in the bowl of the lamp, that causes an explosion. Keeping the lamp clean and well filled will reduce the amount of vapor by preventing the oil becoming over-heated. Be sure and use wicks that fit right. Do not use small wicks; that leaves an opening for the flame to ignite the vapor in the bowl. Do not fill lamps while lighted, or near to other lights or fire. Buy oil with a high flash test, 120° Fahrenheit, if you can get it. Keep it in a coo! place, away from clothes, sawdust or rubbish of any kind. Do not start the fire with coal oil, it is too risky. Coal oil on a hot stove, or half-dying embers in a grate, means an explosion. We have to chronicle 1,600 houses destroyed and 35 deaths in 1913 through carelessness or ignorance in this respect.

The causes of fire mentioned at length in this article are but few of the many. They do not appear of great importance, but they are responsible for a fire loss in Canada alone, approximating nearly \$12,000,000 per annum. If that loss can be prevented by the observance of a few simple rules, it is time that we, as a people, awaken to the fact.

At the risk of reiteration I would again emphasize the fact that clean and careful housekeeping is the solution of the problem of Canada's fire loss. To prove the truth of this, let us agitate for the education of the public along these lines. lines. If this generation is beyond redemption let us begin in the schools upon the next.

Next week's article: Fire Prevention for the Business Man.

The Grand Trunk Railway has had delivered from the Eastern Car Company, New Glasgow, four hundred new box cars for use in moving freight on its lines. Dining and parlor car equipment is also being increased to take care of traffic during the present season. Three new dining cars and one parlor buffet car are shortly due for delivery from the Canadian Car and Foundry Company and the Pullman Company. Company.

BANK BRANCHES OPENED AND CLOSED

During March 25 branches of Canadian chartered banks were opened and five closed. Since January 1st, 1914, there have been 59 branches opened and 17 closed. Houston's Bank Directory gives the following particulars for March:-

DEBENTURES AWARDED

Municipalities have recently disposed of the following issues of debentures :-

McLeod, Alta. -\$13,500, to Messrs. W. L. McKinnon and Company, Regina.

Weyburn, Sask.-\$240,500, to Messrs. Wood, Gundy and Company, Toronto.

Sydney, N.S.—\$106,000 5% 30 years, to Messrs. Macneilland Young, Toronto.

Pincher Creek, Alta. - \$15,000, to Messrs. C. H. Burgess and Company, Toronto.

Sault Ste. Marie, Ont.-\$230,000 5% 15, 20 and 30 years, to Dominion Securities Corporation.

Sault au Recollet, Que.-\$300,000 6% 40 years, to Messrs. B. Stark and Company, Montreal.

Tilbury, North, Ont.—\$12,401.73 5% 10 instalment debentures, to Macneill and Young, Toronto.

Municipality of Shuniah, Ont.—\$3,088 6% 20-year, to Messrs. H. O'Hara and Company, Toronto.

Alberta School Districts.—\$11,400 7% 10 years, to Huron and Erie Loan and Savings Company, London, Ont.

Benito Consolidated School District, Man.—\$15,000 5% 20 instalments, to Messrs. H. O'Hara and Company, Toronto.

Saskatchewan Rural Telephones. \$70,700, 7½% and 8%, 15 instalments, to Messrs. H. O'Hara and Company, Toronto.

Small Manitoba, Saskatchewan and Alberta School Districts.—\$12,500 10 instalments, to Messrs H. O'Hara and Company, Toronto.

DEATH OF SIR WILLIAM WHYTE

Sir William Whyte died in California this week. He was 71 years old. Sir William's career in Canada was another example of what can be accomplished by a plodding individual who chooses a particular avocation and sticks to it. Born in Scotland in 1843, he came to Canada as a young man of twenty years of age. After seven years' service with the Grand Trunk Railway he was made freight agent at Stratford, and later promoted to London. In 1881 he became assistant superintendent of the central division from Kingston to Stratford, but in 1883 he resigned and became general superintendent of the Credit Valley Railway. He then became connected with the Toronto, Grey and Bruce Railway, which later became part of the Canadian Pacific system. In 1886 he became general superintendent of the western division, and in 1897 he was manager of Canadian Pacific lines west of Fort William. He was also a director of the British Columbia Southern Railway.

Somehow Sir William was always regarded as a Western man, although in close touch with the chords that viorate the national commercial system. He liked the West, and

knew its problems intimately.

COBALT MERCER RATIFIED

Special general meetings of the shareholders of Cobalt Townsite Mining Company, Limited, the Cobalt Lake Mining Company, and the City of Cobalt Mining Company, Limited, have been held in Toronto, to consider the merger scheme, and at each meeting the resolutions in favor of the amalgamation were carried unanimously.

At meetings held on March 18th in England the various English (or holding) companies ratified the scheme. The meetings in Toronto were meetings of the Canadian or

operating companies.

The result is that the Townsite Mining Company, City of Cobalt Mining Company, Cobalt Lake Mining Company, and Townsite Extension Mines properties will be transferred to the new operating company. This company has already been incorporated under the name of the Mining Corporation of Canada, Limited.

LONDON VIEW OF CANADIAN MORTCACE LOANS

Writing from London, the special correspondent of the York Annalist says; "Attracted, no doubt, by the signs New York Annalist says: "Attracted, no doubt, by the signs of increasing abundance of unemployed capital over here, efforts are being made on behalf of a good many trust and mortgage companies in the States and in Canada to induce the British investor, big and little, to give his money to those the British investor, big and little, to give his money to those companies to invest for him on mortgages of real estate. Insurance companies and others have had much business of the sort set before them. As far as farm mortgages in the settled Central and Middle West are concerned, the security seems good enough; and the principal obstacle in the way of those who seek to advance the business is the overwhelming conservatism of our investors. Mortgages on new cities, attract us not at all, and rightly. No margin of safety, not 50 per cent., nor 75 per cent., below the alleged market value, we feel, is enough to secure protection in many such cases, in view of the grotesque inflation of values in some mushroom towns, especially in Western Canada.

"For well-arranged schemes of mortgage investment of

"For well-arranged schemes of mortgage investment of the sort it is quite possible that there might be a future here. The essential element of security is that the lender should get a first charge with the right of foreclosure on assets adequate to cover his loan, with a margin of at the very least 33 per cent. over. No insurance company or sensible investor here would look at anything less, whether it be called mortgage certificates or what not. Our investors will have to be educated up to such business; and this is not a very good opportunity to begin. Their thoughts just at present are turning

homeward.'

Speaking of the herring industry, Mr. B. G. Tavlor, inspector of fisheries, said that the season just closed in the waters adjacent to Nanaimo had, on the whole, been most successful. Unfortunately, he said, the Orient is at present the chief market for the herring, but he looks forward to the time when there will be a change in this respect, when herring will become a greater article of diet among the people in British Columbia. in British Columbia.

CANADA'S DEBT

The public accounts for 1913 show the following figures relating to the debt of Canada:-

	Total debt.	Total assets.	Net debt.
1911	 \$474,941,487	\$134,899,435	\$430,042,052
1912	 508,338,591	168,419,131	339,919,460
1913	 483,232,555	168,930,929	314,301,625

The year 1911-12 showed, therefore, a reduction in the net debt of \$122,591.32, and last year a reduction of \$25,617,-This year we shall show an increase of \$19,000,000, but notwithstanding this, the net debt of the Dominion will be over six million less than it was two years ago.

Since confederation there are shown in the public accounts only eight reductions in the net debt of Canada, of

which two belong to the present regimé.

Of the total debt the amount of the funded debt payable in London on March 31st of last year was \$258,679,819. This amount has since been increased by about \$58,000,000, for special outlays upon subsidies and other special accounts. The balance of the total debt is represented by small funded currency debts payable in Canada amounting to \$2,190,767; Dominion notes to the amount of \$112,101,885 for which, save as to the amount of \$22,500,000, the Dominion holds dollar for dollar in gold; savings banks deposits of \$57,140,-483 for which ten per cent. in gold is held; provincial notes, \$39,22%; compensation to seigniors, \$38,091; trust funds, \$15,767,803; province accounts, \$11,920,481 and miscellaneous accounts \$25,954,002. The assets of the Dominion which are deducted from the gross to ascertain the net debt, were at the end of last fiscal year as follows:—Sinking funds, \$13,-737,567; investments, \$43,885,324; province accounts, \$2,296,-327; and miscellaneous accounts, \$109,011,709. In the last named account is included specie amounting to \$98,725,822.

TORONTO'S REAL ESTATE SHOW

A novelty in exhibitions was held at Toronto this week in the shape of a real estate show, its aristocratic name being the Toronto City Development Show. The Harbor Commission, the Builders Exchange, the Civic Guild, and several other public bodies had general exhibits. Many of the real estate firms exhibited models of the estates being offered by them. The Dovercourt Land, Building and Savings Company, Limited, who are among the largest owners and developers of real estate in Canada, had an interesting exhibit and gave some figures showing that Toronto is one of According to this comthe fastest growing cities in Canada. pany, every 3½ minutes of a working day a real estate transaction is completed in the Queen City.

The Title and Trust Company had a special exhibit and offered farm lands in the Columbia Valley Orchards, Limited, British Columbia. This orchard company owns about 15,000 acres on the east side of the valley fifty miles south of

The selling specialty of Messrs. Gundy and Gundy were lots near Ojibway and Windsor. The former town is where the United States Steel Corporation proposes to build its Canadian plant.

Good residential lots were offered by Messrs. R. B. Haley and Company in their St. Clair-Spadina Park, in which the company advertise that they have "added usefulness and commercial value to what nature made so beautiful and con-

venient."

A novelty was introduced by Wright's Limited, who are selling lots in Kingsdale, a "model suburban centre with im-provements." With every lot, this company issues a free provements." accident and sickness insurance policy of the General

Accident Assurance Company.

The delights of North Toronto as a suburb were well advertised by Messrs, Grundy and Company, successors to the late firm of Waddington and Grundy, the oldest real estate firm in North Toronto. Messrs. W. M. McEachren & Sons, Limited and an attractive burgelow exhibit, and Sons, Limited, had an attractive bungalow exhibit, and Messrs. M. S. Boehm & Company also had a striking model A number of large real estate paintings were displayed, the Realty Map Company being responsible for many of them, as it was also for the model of the city of Toronto. Frank McLaughlin was selling lots in Silverthorn Grove north of St. Clair Avenue.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

National Brick Company.—Sales of the National Brick Company during March, the first month of the company's new fiscal year, showed an increase of 1,000,000 bricks as compared with March sales last year.

Dominion Coal Company.—The total output from the collieries of the Dominion Coal Company for the past month was 358,349 tons, an increase of 40,000 over the output for February. Numerous daily output records were broken last month.

Canadian Car and Foundry Company.—The Canadian Car and Foundry Company reports orders for 100 tank cars from the Standard Oil Company, one of 50 freight cars from the Canadian Pacific Railway and also for 10 freight cars from the Montreal harbor commission.

Brazilian Traction Company.—Gross earnings of Brazilian Traction for the four weeks of March compare as follows:

Weel	۲.		Earnings.	Increase.
March	28		 \$464,606	\$ 8,390
"	21		 472,417	22,718
"	14		 . 467,312	16,620
"	7		 461,515	11,816

Nipissing Mines Company.—The suit brought by the United States government against Nipissing Mines Company for collection of the 1 per cent. tax on production has been abandoned. The suit was tried in the United States district court before J. G. Lacombe, who rendered a decision in favor of the company. This decision was confirmed on appeal. The case was to have been argued before the United States supreme court.

Anglo-Canadian Finance Company.—The profit made by the Anglo-Canadian Finance Company for 1913 amounts to £11,911, to which has to be added £4,426 brought forward, making a total of £16,337. The directors recommend a dividend at the rate of 8 per cent. per annum, and that £2,000 be added to reserve, making it £10,000; after providing for the percentage due to the directors there will remain £5,865 to be carried forward.

Mexican Northern Power Company.—The Mexican Northern Power Company, Limited, propose to make an issue of 6 per cent. 30-year prior lien gold bonds. The amount will not exceed \$3,000,000, and it is not intended to dispose of more than \$400,000 of the bonds in the near future.

At the meeting of the bondholders called for May 12, the directors will ask consent to the creation of the proposed prior lien issue, to cancel two-and-a-half years' interest on the present bonds, to postpone the sinking fund payments, and to reduce the amount thereof.

Chicoutimi Lumber and Pulp Company.—Financial arrangements have been completed in London by Mr. J. E. A. Dubuc for the Chicoutimi Lumber and Pulp Company, and the concern will shortly undertake extensions to its plant in the Lake St. John district, involving an expenditure

of approximately \$4,000,000.

To provide for this financing the company some time ago ratified a scheme for the conversion of its 5 per cent, bonds into 6 per cent, bonds. Later the company took out supplementary letters patent at Ottawa increasing its capital stock from \$1,000,000 to \$7,500,000 and provision was made for issuing preference shares in a £1 denomination.

International Milling Company.—The shareholders of the Investment Trust Company are being offered 701 shares of the preference stock of the International Milling Company. The ratio is three International Milling to each 20 shares of Investment Trust and the price is \$80 a share, payable in two instalments of \$40 each.

The offering follows the publication of the recent annual report of the International Milling, showing that the company made phenomenal profits during the past year and predicting large profits during the coming year.

It was explained that the object of the offering was for the purpose of liquidating the banking debt of the Investment Trust, the amount of which is \$56,000.

Hedley Gold Mining Company.—The annual report of the Hedley Gold Mining Company for 1913 shows the profitable operations at the company's group of gold mines and 40 stamp mill in Camp Hedley, Similkameen district, British Columbia. Totals for the calendar year are:—Ore milled, 70,796 tons; assay value, \$12.03 a ton; value of recovery at mill, \$802,330; expenditures, \$397,075; profits (including \$7,403 interest earned on company's invested funds), \$405,254.

\$405,254.

The undivided profits, after all dividends totalling \$360,000 had been paid, were on January 1, 1914, \$272,096. The balance of profit brought forward from 1912 was \$226,841; to this was added the balance of net profit for 1913 remaining after payment of dividends—\$45,254.

Santiago Electric Light and Traction Company.—The Santiago Electric Light and Traction Company, after paying all fixed charges, etc., earned 4¼ per cent. on the common stock for the year ended December 31st, 1913.

The company owns and operates all the electric lighting,

The company owns and operates all the electric lighting, power and street railway systems in the city of Santiago, Cuba.

For the year ended December 31st, 1913, gross income amounted to \$457,693, as compared with \$405,728 for 1912, while net earnings show a corresponding increase, being \$216,303 for 1913, as compared with \$193,707 for the previous year. Bond interest in each year, amounted to \$120,000. The capitalization of the company consists of \$2,000,000 common stock and \$2,000,000 first mortgage bonds.

International Engineering Company.—The annual meeting of the International Engineering Works has been held. This was the company which was formerly known as the Robb Engineering Company, one of the oldest engineering companies in Canada, and which, becoming financially embarrassed, was reorganized by the Corporation Agency. The volume of sales for the year was \$830,000; profits, after selling and management expenses, \$12,590. The low proportion of profits to gross was largely due to the contracts taken over from the old company and to general falling off in business during the last quarter of the year. Business has now increased and volume of orders on hand amounts to \$100,000. Fixed assets are appraised at \$802,000 and excess of current assets over current liabilities, \$339,000. There has been a considerable change in management and Mr. G. W. Cole was elected a director in place of Mr. R. Garratt, resigned.

COMPANIES INCREASING CAPITAL

The following companies with Dominion charters have increased their capital stock: Pratt and Whitney Company of Canada (Limited), from \$100,000 to \$250,000; Advertising Service Company, Limited, from \$50,000 to \$100,000.

The following companies in Alberta have increased their capital stock: The Manning Sutherland Lumber Company, Limited, from \$50,000 to \$100,000; Peerless Oil Works, Limited, from \$50,000 to \$200,000; Allen Theatre Company, Limited, from \$125,000 to \$225,000; Royal Fruit Company, Limited, from \$25,000 to \$50,000; the International Insurance Company, Limited, from \$250,000 to \$1,000,000.

And this company in Saskatchewan has increased its capital stock: The Lake Centre Rural Telephone Company, Limited, from \$4,000 to \$6,000.

The Royal Bank has opened branches at Tyne Valley, P.E.I., and St. Catherine and Bleury Streets, Montreal.

Messrs. G. A. Touche and Company, the well-known chartered accountants, have opened an office in the new Herald Building, Calgary, in charge of Mr. A. Cameron.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Carleton County, Ont .- A by-law has been passed to issue \$40,000 debentures for roads.

Trenton, Ont.—Up to April 15th for \$35,000 5 per cent.
30-year debentures. J. W. Delany, treasurer.

Galgary, Alta.—The taxpayers will vote on by-laws to-talling \$867,000 on May 7th. The by-laws are as follows: Ogden sewer, \$100,000; publicity and receptions, \$17,000; fire department, \$30,000; electric light extensions, \$300,000; parks, \$50,000; waterworks extensions, \$60,000; Hillhurst Park purchase, \$60,000.

Saskatoon, Sask .- The Saskatchewan local government board has authorized Saskatoon to borrow the following amounts and by-laws respecting them will be submitted to the taxpayers early in May:—Sewer mains, \$7,374; water mains, \$6,916; storm sewers, \$19,463; street railway extensions, \$25,000; electric light and power plant extensions, \$200,000; pumping plant extensions, \$10,000; sidewalks, \$3,-590; pavements, \$19,912; paving approach to traffic bridge, \$3,600; additional expenditure on new power house, land and buildings, \$15,000; additional expenditure on police patrol and fire alarm system, \$10,000; additional expenditure on exhibition building; \$10,000; additional expenditure on power house machinery, \$85,000; waterworks motors, \$25,000; water mains, \$950; additional expenditure on force water main, \$27,000; additional expenditure on sedimentation basin, \$8,000; additional expenditure on intercepting sewer, \$12,500.

Moose Jaw, Sask.—The provincial local government board has authorized the following borrowings:-Completion Sandy Creek waterworks scheme, \$25,000; construction of storm sewers, \$115,000; completion of waterworks, \$41,650; city's share of cost of overhead bridge, \$30,000; completion of high pressure system, \$30,000; extension sewerage disposal Works, \$30,000; construction of sanitary sewers, \$43,-350; completion of subway, \$28,000; exhibition buildings and grounds, \$50,000; completion of street paving, \$12,000; extension to electric light and power systems, \$155,000; construction of sanitary sewers, \$106,761; extension of waterworks system, \$73,238; construction of cement sidewalks curb gutters and crossings, \$35,000; additional cost of installing high pressure water main, \$18,500; additional cost of constructing concrete sidewalks, \$7,800; additional cost of cement sidewalks, \$7,000; additional cost of constructing cement sidewalks, \$18,700.

STEEL CORPORATION SHOULD BENEFIT

Monetary Times Office, Montreal, April 15th.

That the Dominion Steel Corporation should benefit to the extent of perhaps a quarter million dollars per year from the increased tariff on wire rods, is the opinior expressed in Montreal. Although the output of wire rods from the plant of the company was only 32,000 tons last year, the company's capacity is about three times this amount-that is, the output in the last year of the bounties was close to 80,000 tons. The United States has been the principal competitor in the wire rod business, supplying almost the entire amount of imports. The output of the Steel Corporation is given in gross tons, while the tariff, it is understood, is on net tons. The duty on the general tariff is applicable, namely, \$3.50 a ton. Converted into gross tons, it is calculated that this would mean practically \$4 a ton on the output of the corporation. Applied to an output of 75,000 tons, the advantage would be \$300,000 per year. As a matter of actual results, however, it is likely that this amount would be considerably reduced, inasmuch as it is generally understood that an agreement was reached by which the independent consumers of wire rods were to obtain some measure of the benefits given the steel companies. The announcement of the tariff changes came late in the afternoon, after the stock markets had closed. The market had been showing firmness for some time, however, and previous to the closing on Mon-The following day was selling generally between 32 and 33. morning, the first sales took place at 33½, after which the price went to 34. Dealing was heavy all day, but by Wednesday afternoon the stock was once more selling down at 31. The tariff changes will not, it is supposed, greatly affect the value of the stock for some time, although it will assist in any efforts made to manipulate the price.

LISTING CARRIAGE FACTORIES STOCK

Monetary Times Office, Montreal, April 15th.

The application to list \$1,200,000 of Carriage Factories, Limited, common stock, and an equal amount of the preferred stock on the unlisted department of the Montreal Stock Exchange has been accepted. The company is a consolidation of several of the principal carriage factories of Canada, effected by the offices of Messrs. J. A. Mackay and Company in 1910. The intervening four years have been devoted to strengthening the position of the company, both from an industrial and financial standpoint, and the fact that the stock has now been listed and will in due course be placed upon the regular list, indicates that the management of the company satisfied with the position. Dividends on the preferred stock were paid from the start, but none have yet been paid on the common, although the earnings would have permitted during the last two years. Instead, the surplus was employ-ed against bank loans. The company's outlook is said to be satisfactory, and 1915 is likely to see the company enter a new stage.

ST. JOHN VALLEY RAILWAY

The St. John Valley Railway bill, introduced in the New Brunswick legislature, provides for the completion of the construction of the railway by the route as originally planned and contracted for so that the road will enter St. John by the eastern route, crossing the St. John and Kennebecasis rivers. To make this possible the Dominion Government has agreed to provide for the entire cost of the big bridges, which will cost \$3,000,000, and pay the interest thereon for a period of 15 years.

The additional bond guarantee which is to be provided is \$10,000 per mile for the entire length of the railway, but this is to be so divided as to make the amount of additional guarantee on the section from Centreville to Gagetown \$8,ooo per mile, as this is the easiest part of the road to construct, while the balance will be added to the present guarantees on the sections below Gagetown and above Centreville, which will be of more difficult and expensive construction efit to from sed in

REAL ESTATE WEST AND EAST

What is a Farm Mortgage? Big Deals in Montreal-Old Toronto Site

Building permits issued by Medicine Hat during March totalled \$158,640, as compared with \$148,565 for the corresponding month of last year. The total for the first three months of this year amounted to \$256,305, while for the same

months of this year amounted to \$256,305, while for the same period of 1913 the figures were \$254,770.

Building permits issued by Swift Current, Sask., during March total \$109,340, as against \$71,764 for the corresponding month last year, showing an increase of \$37,576. Permits issued for the first three months of this year total \$471,222, as against \$466,818 for the corresponding three months of last year, showing an increase of \$4,404.

A new students' residence and a science building will be added to the University of Saskatchewan, at Saskatoon, during the present year. These will cost about \$150,000 each; and \$300,000 has been set aside by the provincial government for the purpose. The buildings will take at least two years to complete. The University is located on 1,333 acres. The campus absorbs 500 acres, and the Agricultural College and College Farm, the remainder.

Medicine Hat school board has decided, in addition to beginning the construction of a technical high school, to cost \$300,000, to build two new eight-room brick schools and another primary school, the three to cost about \$100,000.

What is a Farm Mortgage?

A farm mortgage, says Harry Lee Taft, is not a go-day piece of paper, where conditions may be prejudged with reasonable certainty during the period that it may be carried. Farm mortgages are rarely made for terms of less than five years, and the average life of a farm loan is nine and a half years, and it is the conditions that shall govern throughout that period and the production that can be depended upon as an average during this entire term, that will determine the safety and desirability of the investment. The chain can-not be made stronger than its weakest link. If all the necessary fundamentals are present when a farm loan is originally made, it may be stated without fear of successful contradiction that no form of investment possible will prove more dependable in its return of interest and principal.

Built in 1818 and first utilized as a bank in 1822 the two-story building at the south-east corner of King and Frederick Streets. Toronto, is to be pulled down and replaced by a

Streets, Toronto, is to be pulled down and replaced by a modern warehouse. The small building was on the site of the first bank in Upper Canada. Since then it has served in turn as a brewery, a residence, foundry, fruit store, wholesale warehouse, boot and shoe shop, and at present it houses

a misfit clothing establishment.

"If I had had 200 medium-sized houses which rent from \$15 to \$25 a month I could easily have disposed of them during the past six weeks," said an Ottawa real estate dealer.

Some Montreal Deals.

The property next to the Guardian Assurance Building on St. James Street, Montreal, has been sold by Mr. John Withell to the Gordon Realty Company, Limited, who were represented by Mr. G. Cartwright, for \$142,000. The property is known as lot 152a, West ward, and the building is at 156 St. James Street. 156 St. James Street.

For the first quarter of the current year the construction of buildings in Montreal practically equals the record of 1912, the difference being but a few thousand dollars in favor of 1913. The estimated cost of the 580 building permits of all kinds for 1914 from January 1 to March 31 was \$1,855,196, as compared with 472 permits last year for the same period and requiring an expenditure of \$1,867,847. In March this year 323 permits were issued by the building inspector, requiring an outlay of \$0.40,406. quiring an outlay of \$949,496.

The sale has been registered of a block of property, on the south-east corner of Notre Dame Street West and that part of St. Lawrence Boulevard, which is to be opened to the river front, from the city of Montreal to the Credit Foncier, Limited. The land is part of that purchased by the city for the opening of the boulevard and subsequently resold. The lots are 61-33 and 34 of Centre Ward, and contain 8.259 square feet, the price being \$164.109 or about \$19.85 per square foot square foot.

CANADA'S LOANS LAST YEAR

Details of Dominion's Borrowing-Higher Interest Rate Was Paid

Canada's borrowings for the year ended March 31st, 1914, have been much greater than the amount by which the net debt has been reduced, said Mr. White in his budget speech.

debt has been reduced, said Mr. White in his budget speech.

An old loan of £1,700,000 issued in 1878 has been paid off on maturity last October, as has also a small currency loan amounting to \$1,446,565. There is still outstanding a loan of £5,487,080, redeemable on July 1st, 1919, with the option of redemption on or after July 1st, 1914, on three months' notice. "With the money market in present condition," said the Minister, "and our borrowings in consequence, being upon a four per cent. basis, it is not our intention to redeem this loan on July 1st next. Unless, indeed, there is a marked change in monetary conditions in the early future, it is probable that this loan will run its full length to July 1st, 1919.". There are no funded loans becoming payable for five years to come.

Reasons for Borrowing.

Total

Special outlays and investments for which it was necessary to borrow during the fiscal year were:—

Railway subsidies and other special charges Investment in Grand Trunk Pacific bonds guaran-	\$20,000,000
teed by the Dominion	12,872,233
Grand Trunk Pacific Loan (one-half paid this fiscal year) Advances to Montreal and Quebec Harbor Com-	8,500,000
missioners	5,312,000

The addition of \$9,719,898 on account of loans matured brings this total up to \$56,404,231.

..... \$46,684,332

Mr. White pointed out that in June, July and August last, owing to the Balkan War, troubles in Mexico, etc., the London money market was most unfavorable to the issue of new permanent loans and resort was had to treasury bills, of which £1,000,000 were discounted on August 25, 1913, £1,000,000 in September and £1,700,000 in November. To meet the maturities of \$10,000,000 and to provide additional funds for the special outlays of the Dominion, £3,000,000 of 4 per cent. stock was issued on September 25th at 99, and £4,000,000 on December 3 at 97, of which last £1,000,000 was used to redeem treasury bills due February 16th last.

A further loan of £5,000,000 was made recently to meet £1,000,000 of treasury bills maturing March 16th, to provide the balance of the Grand Trunk Pacific loan, amounting to \$7,500,000, and to complete the purchases of Grand Trunk Pacific bonds guaranteed by the government to the amount of \$10,000,000. This loan was placed at 99, two points in advance of the previous issue. "The purchase of Grand Trunk Pacific Bonds has not only enabled the Dominion to make a substantial saving upon the amount it would otherwise have been obliged to pay, in implementing to par the price which would be realized for these securities if sold, as they would have been from time to time, but also has served to protect the credit of the country from the consequences of the issue of such low interest-bearing debentures upon the London market." No less a sum than \$24,000,000 had been required to take up these bonds which were of course an asset in the treasury. Mr. White emphasized the fact that the guarantees of securities had been reduced so far as the outside world was concerned by over \$24,000,000.

Had to Pay Higher Rates.

In common with all other dominions, Canada, Mr. White said, had been obliged to go upon a four per cent. basis in the sale of securities, and he thought it would be some considerable time before there was a prospect of a return to lesser rates. The rates of interest which Canada had been obliged to pay were such as the stringent conditions demanded, but were on the whole relatively low and "the Dominion still retains the premier place among the self-governing dominions so far as the price of her securities in the London market is concerned." concerned."

IMPORTANT CHANGES TO INSURANCE ACT

Investments are to be Restricted-Fire Companies Must Remedy Impaired Capital-Full Text of Amendments.

The following is the text of the amendments of the Insurance Act. It contains many important provisions, which were referred to briefly in a previous issue of The Monetary Times. The altera-

tions and additions to the present clauses of the Act are in italics.

1. Subsection 5 of section 8 of The Insurance Act, 1910, chapter 32 of the statutes of 1910, is repealed and the following substituted therefor:-

"5. A license may, on the report and recommendation of the Superintendent, approved by the Treasury Board, be granted to a company to carry on one or more minor branches of insurance, whether mentioned in this section or not, in addition to those hereinbefore enumerated or authorized, or on the like report and recommendation, one or more such minor branches may be substituted for a like number of branches so enumerated or authorized, or such an addition and substitution may be combined."

2. Subsection 1 of section 41 of the said Act is hereby amended by inserting after the words "with it" in the fifth line thereof, the words "or that its further transaction of business would be hazardous to its policyholders, or to its creditors or to the public."

Modified License

2. Subsection 3 of the said section is amended by adding thereto the following:-

"but the issue of such modified or conditional license shall not, in the case of a life insurance company, be deemed to be a renewal of the company's license within the meaning of section 161 of The Winding-up Act."

3. The said section is further amended by adding thereto the following subsections:-

"4. If the Minister deems it advisable, the said modified and conditional license may require that the company shall, if possible, during the continuance of such modified and conditional license, arrange, for the reinsurance of its entire business in some company or companies licensed under this Act, but no agreement for such reinsurance shall be executed until it has been submitted to the Superintendent.

Question of Winding Up

"5. If upon the expiration of the modified or conditional license mentioned in the last preceding subsection, no agreement has been made for the reinsurance of the company's entire busi-ness, and if the company's condition is not then such as to war-rant the restoration of its license, the company shall be deemed to be insolvent, and the Superintendent may request the institution of proceedings for the winding-up of the company as provided in section 94 of this Act. If as a result of such proceedings, the Court shall order the winding-up of the company, it shall also order that such winding-up shall be carried on by and under the direction of the Superintendent, who shall thereupon he vested with all of the powers conferred by the Winding-up Act or by this Act upon a liquidator appointed under the provisions of the said Winding-up Act.'

Provisions of Salary Agreements

3. Section 56 of the said Act is amended by adding thereto the following subsection:-

"2. Every contract or agreement made after the passing of this Act between any such company and any of its directors, officers, agents or trustees to pay for any services rendered or to officers, agents or trustees to pay for any services rendered or to be rendered, any salary, compensation or emolument, shall contain a provision that in the event of the winding-up of the company under the Winding-up Act, or in the event of the transfer or reinsurance of all the company's policies, such contract or agreement shall be terminable at the option of the company, but the holder thereof shall be entitled, on its termination, to rank as an ordinary creditor on the assets of the company for the amount the would have received and a produce such contract or agreement during he would have received under such contract or agreement during the three months succeeding the date of the commencement of the said winding-up or of the date of the said transfer or reinsurance."

4. Paragraph b (ii) of subsection 1 of section 59 of the said Act is hereby repealed and the following substituted therefor:—
"The debentures or other evidences of indebtedness of any company which has paid regular dividends on its preferred or common stocks for a term of at least five years immediately pre-

ceding the date of investment in such debentures or other evidences of indebtedness."

2. Paragraph (a) of subsection 2 of the said section is amended by adding thereto the following:—

"Provided, however, that the amount loaned on the security of such bonds, debentures, stocks or other securities shall not exceed the amount which might be invested therein under the provisions of the next preceding subsection."

Investments Are Restricted

5. Subsection 1 of section 63 of the said Act is amended by adding thereto the following:-

"Provided, however, that no such company shall invest in the shares of any other company transacting, or authorized to transact, any class of insurance business which such company transacts or is authorized to transact."

2. The said section is further amended by adding thereto the following two subsections:-

''3. Any such company having on hand or vested in trustees in trust for the company at the date of the coming into force of this subsection, any securities or investments which but for the provise to subsection 1 of this section would have been valid and competent, but which by reason thereof are not valid and competent, shall absolutely dispose of and realize the same within ten years after the coming into force of this subsection.

"4. Notwithstanding anything contained in this Act, every such company shall at all times retain in Canada and under its own control, assets of a market value at least equal to the amount of its total liabilities to its policyholders in Canada, including of its total habilities to its policyhoiders in Canada, including among such liabilities, in respect of its outstanding unmatured policies in Canada, a reserve of unearned premiums calculated pro rata for the time unexpired, and of such assets an amount at least equal to two-thirds of its total liabilities in Canada shall consist of investments in or loans upon Canadian securities."

Investments in Corporate Name

6. Section 65 of the said Act is repealed and the following substituted therefor:-

"65. All investments and deposits of the funds of any such company shall be made in its corporate name, and no director or other officer thereof, and no member of a committee having any authority in the investment or disposition of its funds shall accept or be the beneficiary of, either directly or remotely, any fee, brokerage, commission, gift or other consideration for or on account of any loan, deposit, purchase, sale, payment or exchange made by or in behalf of such company, or be pecuniarily interested in any such purchase, sale or loan, either as borrower, principal, co-principal, agent or beneficiary, except that if a policyholder he shall be entitled to all the benefits accruing under the terms of his contract."

7. Section 87 of the said Act is amended by adding thereto the following new subsection:-

"4. Nothing in this section shall be held to prohibit the issue by any such company of a policy or group of policies, the form of which has first been approved by the Superintendent, insuring the lives of not less than one hundred of the employees of a single employer at rates of premium differing from the company's usual rates applicable to individual policies on the same plan, provided that each of such policies or groups of policies is issued on the application of, and the premiums paid by or through, the said employer.'

Reinsurance of Contracts of Insolvent Company

8. The said Act is further amended by inserting after section 94 a new section as follows:-

"94 A. Notwithstanding anything contained in the Windingup Act, or in this Act, the liquidator of an insolvent life insurance company may, without the consent of the policyholders,
arrange for the reinsurance of the contracts of Canadian policyholders in some company or companies licensed under this Act to transact life insurance in Canada, and for the purpose of securing such reinsurance the entire assets of the company, in the case of a Canadian company, and the entire assets of the company in Canada in the canad of a Canadian company, and the entire assets of the company in Canada, in the case of a company other than a Canadian company, shall be available, excepting the amount required to pay the claims of preferred creditors specified in section 70 of the Winding-up Act, the amount of the costs of liquidation and the amount required to pay claims accrued under the company's policy contracts of which notice has been received by the company prior to the date such reinsurance is effected, all of which payments shall be a first charge upon the said assets of the company; and creditors be a first charge upon the said assets of the company; and creditors of the company, other than the policyholders and said preferred creditors, shall be entitled to receive a dividend on their claims

THE Bank, having over 310 Branches in Canada, extending from Halifax to Prince Rupert, offers excellent tacilities for the transaction of every description of Banking business. It has Correspondents in all Cities of importance throughout Canada, the United States, the United Kingdom, the Continent of Europe, and the British Colonies.

Collections made in all parts of the Dominion and returns promptly remitted at lowest rates of exchange. Letters of Credit and Travellers Cheques issued available in all parts of the world.

only if the said assets are more than sufficient to provide for the payments aforesaid and for the reinsurance in full of the contracts of Canadian policyholders.

Reinsurance of Percentage

"2. In the event of the said assets of the company being insufficient to provide for the preferred payments specified in the next preceding subsection and for the reinsurance of the contracts of Canadian policyholders in full, the reinsurance may be effected for such a percentage of the full amount of the contracts as the said assets will secure.

"3. No contract of reinsulance made in pursuance of this section shall become effective until approved by the Court in which the liquidator is appointed and by the Treasury Board.

"4. In the event of the reinsurance provided for by this sec-tion being effected, the Court in which the liquidator is appointed may in its discretion declare that any section or sections, or part or parts thereof, of Part III of the Winding-up Act shall not apply, and on such declaration being made the section or sections, or part or parts thereof, so specified, shall cease to apply to any of the parties concerned in the liquidation."

Impairment of Capital

9. The said Act is further amended by inserting after section 135 a new section as follows:-

"135 A. After the first day of January one thousand nine hundred and twenty, if it appears to the Superintendent from any statement made to him or from any examination made by or for him, that the capital stock of any Canadian fire insurance company is impaired to the extent of twenty-five per centum or more thereof, he shall by notice sent by registered mail to the president and secretary call upon the company to make good the amount of such impairment within not more than three months from the date of the mailing of such notice, and upon the failure of the company to make the same good within the time so specified, the Minister may withdraw its license."

Hail Insurance Surplus Fund

18

ndof of

ies.

10. The said Act is further amended by inserting after section 142 the following new section:-

"142 A. Every Canadian company licensed to transact the business of hail insurance in Canada shall, in the year one thousand nine hundred and fourteen, set aside as a hail insurance surplus fund the total profit realized from such business during the said year, not exceeding however fifty per centum of the total net premiums received in respect of such business during the year, and shall in each year thereafter continue so to do, until or so that, the said surplus fund shall in any year be not less than fifty per centum of the said premiums received during the preceding year.

"2. In the case of a company other than a Canadian company licensed to transact the business of hail insurance in Canada, the assets in Canada of such company, required by this Act to be maintained, shall at all times exceed its total lines in Canada in respect of its business other than that of hail insurance, computed in accordance with the provisions of this Act, by an amount at least equal to fifty per centum of the total net premiums received by it in respect of its business of hail insurance in Canada during the preceding year."

Statement of Organization Expenses

11. The said Act is further amended by inserting after section 184 three new sections as follows:-

"184 A. At the time application is made for a license under this Act by a company incorporated by the Parliament of Can-ada after this section comes into force, there shall be submitted to the Minister a sworn statement setting forth the several sums of money paid in connection with the incorporation and organiza-tion of the company, and such statement shall, in addition, in-clude a list of all the unpaid liabilities, if any, in connection with or arising out of such incorporation and organization.

"2. Prior to the time the license is granted, no payments on account of incorporation and organization expenses shall be made out of moneys paid in by shareholders, except reasonable sums for the payment of clerical assistance, legal services, office rental, advertising, stationery, postage and expenses of travel, if any.

"3. The Minister shall not issue the license until he is satisfied that all the requirements of this Act and of the Special Act incorporating the company, as to the subscriptions to the capital stock, the payment of money by shareholders on account of their subscriptions, the election of directors and other pre-liminaries, have been complied with, and unless he is satisfied that the expenses of incorporation and organization, including the com-

mission payable for the sale of the company's stock, are reason-

"184 B. If the company does not obtain a license before the expiry of its Act of incorporation, and if stock books have been

"2. If the amount allowed by such resolution for commission, salaries or charges for services be deemed insufficient by the provisional directors or directors, as the case may be, or if no resolution for such purpose be passed after a meeting has been duly called, then the provisional directors or directors may apply to a judge of any superior or county court having jurisdiction where the head office of the company is situated, to settle and determine all charges and the reasonableness of the amount of the disbursements already made to which such money and interest, if any, shall be subject, before distribution of the balance to the subscribers.

Must Give Notice

"3. Notice of the meeting and notice of the application respectively referred to in the next preceding subsections shall be given by mailing the notice in the post office, registered and post paid, at least twenty-one days prior to the date fixed for such meeting or the hearing of such application, to the several subscribers at their respective post office addresses as shown by the stock books; and each of such notices shall contain a statement, in summary form, of the several amounts for commissions, salartes, charges for services and disbursements which it is proposed shall be provided by resolution for payment, or settled and determined by a judge, as the case may be.

14. Votes of subscribers may be given at such meeting by proxy, but the holder of such proxy must be himself a subscriber, and subscribers may be heard either in person or by counsel on such application.

visions of this section may be equitably borne by the subscribers, the provisional directors or the directors, as the case may be, shall, after the amount of such sums is ascertained as herein provided, fix the proportionate part thereof chargeable to each subscriber in the ratio of the number of shares in respect of which he is a subscriber to the total number of shares bona fide subscribed.

"6. The respective amounts so fixed shall, before return to the subscribers of the sums paid in by them, be deducted therefrom, and if the respective sums paid in are less than the amounts so fixed, then the deficiency in each case shall be payable forthwith by the subscriber to the provisional directors or the directors as the case may be.

Collection of Deficiencies

"7. The total of the amounts of deficiency mentioned in the next preceding subsection which the provisional directors or the directors are unable to get in or collect in what seems to them a reasonable time shall, with any legal costs incurred, be deducted by them from the sums then remaining in their hands to the credit of the several subscribers in the ratio hereinbefore mentioned, the shares in respect of which no such collections have been made being eliminated from the basis of calculation.

"8. The provisional directors or the directors, after payment by them of the sums payable under this section, shall return to the subscribers, with any interest accretions, the respective balances of the moneys paid in by the subscribers."

"184 C. If it appears to the Superintendent from any statement made to him, or from any examination made by or for him, that the capital stock of any Canadian fire insurance company obtaining a license under this Act on or after the first day of January, one thousand nine hundred and fifteen, is impaired to the extent of twenty-five per centum or more thereof, he shall, by notice sent by registered mail to the president and secretary, call upon the company to make good the amount of such impairment within not more than three months from the date of the mailing of such notice, and upon the failure of the company to make the same good within the time so specified, the Minister may withdraw its license."

An Authorized Trustee Investment

The Debentures issued by this Corporation are a security in which Executors and Trustees are authorized to invest Trust Funds.

They are issued in sums of one hundred dollars and upwards, as may be desired by the investor, and for terms of one or more years.

They abear interest at a special rate, varying according to the term for which the debenture is issued.

Interest is computed from the date on which the money is received and is payable half-yearly.

They have long been a favorite investment of Benevolent and Fraternal Institutions, and of British and Canadian Fire and Life Assurance Companies, largely for deposit with the Canadian Government, being held by such institutions to the amount of more than ONE MILLION DOLLARS.

A miniature specimen Debenture, with interest coupons attached, copy of Annual Report and all particulars will be forwarded on application.

LIFE INSURANCE SECURITY FOR MORTGAGES

Policies Are Being Used in This Direction Largely in Germany-Remarkable Growth

The idea of securing mortgage loans on life insurance policies has made rapid progress in Germany. It is based on the consideration that the simple process of extinction according to which a portion of the principal is repaid every year, is suppended when the debtor dies before the date fixed. In this case, the difficulties are greatly increased for heirs deprived of their support, and it often happens that a holding is excessively burdened by the charges imposed on the person in whose portion it is included, on account of the compensation he must give the co-heirs, if it is possible to keep it in the family at all. So the principle has been established that each generation must itself pay off the debts it has contracted. To render the realization of this object independent of the duration of a life, it has been recommended to complete or even to substitute the simple regular repayment of a debt by means of life insurance. In Germany, the East Prussian Landschaft first systematically made use of life insurance for the dismortgaging of agricultural land. The life insurance institute, founded by it for the purpose, has been working since November 15th, 1910. Others of similar type have been founded in other provinces.

For Extinction of Mortgages

In all these institutes, insurance for the extinction of mort-gages is regulated so that the premiums are paid in the first place out of the loan contracted. This insurance, then, is not place out of the loan contracted. This insurance, then, is not treated as supplementary to the payment of sinking fund annuities, but as taking their place, without which many farmers would be frightened by the mass of obligations they had to fulfil. On the other hand, they often willingly undertake to pay premiums the amount of which exceeds that of the sinking fund annuities. The policy holder does not pay his premiums directly to the life insurance institute. The payment is made by the public credit institute granting the loan, which, to secure itself, obtains the transfer of the rights to the amount assured. In addition to the Landschaften, a large number of savings

In addition to the Landschaften, a large number of savings banks and several provincial banks allow the sinking fund instalments to be used to pay the life insurance premiums, in order to dismortgage rural landed estates.

It is much more certain that a debt will be paid in this way than by means of sinking fund instalments pure and simple. There is already one circumstance favoring the realization of this object, namely, that owing to his insurance the policy holder cedes the amount for the extinction of his debt, for a much longer period than under the system of payment now in much longer period than under the system of payment now in use among the Landschaften, where, as a rule the sinking fund is considered as the property of the borrower, who may withdraw it under certain conditions and who generally does withdraw it when it amounts to a certain proportion of his debt.

Liquidate Previous Debts

The essential advantage of insurance for the extinction of a mortgage consists in this, that, at the death of the policy holder or the expiration of the period stipulated, there remains an amount available, by means of which a previously existing debt may be liquidated or the constitution of a new debt hindered. An example will serve to make the matter clearer. By payment of 250 marks every half year or ½ per cent. per year on an amount of 100,000 marks, a sinking fund is formed which, if we take 4 per cent. as the rate of interest, will amount to on an amount of 100,000 marks, a sinking fund is formed which, if we take 4 per cent. as the rate of interest, will amount to 2,816 marks at the end of five years, and to 6,243 marks at the end of ten years. If, on the other hand, at the age of thirty, one invests the same amount in a life insurance policy, at the moment the insurance is due there will be an available amount of 21,720 marks, according to the tariffs of the life insurance institutes in public law, an amount which, besides, may be increased by dividends. An endowment policy for the period of thirty years always gives right to the amount of 16,287 marks. In this kind of insurance, the advantages of the policy holder naturally decrease in proportion to the duration of his life.

With regard to their legal form the new institutes are institutions of public utility in public law. As we have already mentioned, the East Prussian Institute is a branch of the Landschaft. The other life insurance institutes are founded by the

schaft. The other life insurance institutes are founded by the provinces in which they have their headquarters, but almost everywhere with the participation of the Landschaft and partly also of the public credit institutes and provincial fire insur-

ance societies.

In consequence of the solid support they receive from the autonomous administrative organizations of the provinces, they enjoy the confidence of the population to a greater extent than the private insurance businesses, so that they are marked out as capable of extending life insurance in the country districts,

Why Almost Two Hundred Corporations, Firms or Private Persons Have Invested in our Debentures

Because we have devised a form of debenture secured by deposit of first mortgages to the amount of 150% with a trustee which gives practically absolute security. If interested in a 5% investment wholly devoid of risk, apply to

where it has had little success up to the present. Besides, the assistance of the institutions which participate in their working, also permits of their considerably economizing their working expenses. They have, besides, the valuable assistance of the rural loan and savings banks and other agricultural associations, whose confidential agents accept applications for insurance, and whose accountants collect the premiums. These institutions may therefore also offer their policy holders very advantageous conditions, the rather as they do not aim at realizing profits, but any they make must be exclusively invested. izing profits, but any they make must be exclusively invested in behalf of the insured in due proportion.

When the East Prussian Landschaft had set the example

by founding an insurance institute in that province, institutes of the same character were founded, in 1911, in West Prussia, of the same character were founded, in 1911, in West Prussia, Pomerania and the provinces of Posen and Silesia, and, in 1912, in Brandenburg. This year, it is the turn of a seventh institute, that of the district of Nassau, which has just been founded at Wiesbaden. Each of these institutes has received from the administration taking part in its foundation an amount of 1,000,000 marks, the interest of which it will only pay at the end of five years, and in addition a supplementary amount towards its organization which it will not have to repay.

Made Remarkable Progress

A union of these institutions has been established by the foundation of a federation. The principal duties of this federation are to select the doctors, to do the technical work in connection with insurance as well as to establish the distribution of the risks to be borne.

These public life insurance institutes have only been a short while working, and, yet, they have already attained quite

remarkable results.

A detailed account of their work and methods is given in the article in the original Bulletin of Economic Intelligence for December, 1913.

ECHO OF UNION LIFE DEAL

In the report of state insurance superintendent W. T. Emmett, of New York, the following paragraph occurs: "Possession of the Union Life Insurance Company was taken under an order of liquidation made by the supreme court, pursuant to section 63 of the insurance law, October 26, 1909. Under authority contained in the order of liquidation, the outstanding policies of the company, aggregating the sum of \$2,195,220, were reinsured in the Metropolitan Life Insurance Company and a reinsurance premium amounting to the sum of \$226,522.61 was paid for such reinsurance. The reinsurance premium as so paid was the legal reserve of the policies reinsured, less a commission of 30 per cent. which was allowed for the business reinsured. On November 21, 1910, the superintendent's report and audit was presented to the court for confirmation. On January 9, 1911, the corporation was dissolved and certain objections filed to the corporation was dissolved and certain objections filed to the audit of claims were referred to a referee. On September 6, 1911, the referee's report was approved as modified by the court; and appeals were thereupon taken from this order. These appeals were subsequently disposed of, and the liabilities of the company aggregating the sum of \$49,356.90 were paid; and dividends aggregating \$171,000, being 85½ per cent. of the par value of the outstanding capital stock, were distributed to stockholders. \$4,358.06 remain undistributed, being held pending the determination of a claim for the sum of \$2,829.26, which was deducted from the dividends due upon certain shares of stock." deducted from the dividends due upon certain shares of stock."

TRADE DISPUTES LAST MONTH

A continued decrease in time losses through trade disputes was reported to the department of labor during March, as compared with the previous months of the year. The number of disputes was also considerably smaller than that of the corresponding month of last year. Seven disputes resulting in time losses of 32,618 working days were in existence during March as against fifteen disputes and 68,285 working days lost during the same month last year. The first three months of the present year have been very favorable from the standpoint of industrial disputes. Eight new disputes occurred in this period, resulting in time losses of 4,205 days. During the corresponding period of last year twenty-one strikes were reported, the time losses resulting from these up to the end of March being 29,246 days. Five hundred and thirty-seven employees have struck work or otherwise been involved in trade disputes during the first three months of 1914. This compares favorably with the corresponding period of 1913, when 4,511 workers were affected by strikes and lockouts. by strikes and lockouts.

RAILROAD OPERATION COSTS MORE

Ratio of Expenses and Taxes to Revenue Rose to Nearly Eighty Per Cent.

A bulletin just issued by the bureau of railway news and statistics in Washington, D.C., contains some striking facts about the increasing cost of railway operation on this continent. The bulletin says that despite the fact that 4,000 miles of new lines had been added during the year, the total railway mileage of the United States during the seven months ended January 31, 1914, lost in net income after payment of taxes, almost \$80,000,000 compared with the same months of a year ago. Total business in the same time had fallen off only \$4,800,000. This vivid reflection of the excessive rise in railway operating costs is based by the bureau of railway news and statistics on figures of the Inter-State Commerce Commission just made public.

Favorable Winter Conditions

ravorable Winter Conditions

"What the recent rise in expenses means may be gathered," the bulletin states, "from the fact that in January under operating conditions probably as favorable as ever experienced in winter, the railways were able to make only a slightly better showing than in January, 1912, one of the worst months of what was without exception the hardest winter ever experienced by United States railways. The ratio of expenses and taxes to revenue in January, 1914, touched 82.4 per cent. against 78.3 per cent. a year ago. This January's performance under mild operating conditions therefore was only a shade better than that of January, 1912, when snow blockades and freezing weather were cutting down traffic and piling up expenses and the ratio reached 83.0 per cent.

Big Rise in Taxes

ED

ager

Iny

ronto

VER,

curity.

"Gross business for the seven months was \$4,800,000 under that of a year ago, yet operating expenses rose \$65,000,000 under that of a year ago, yet operating expenses rose \$65,000,000, causing a net loss of \$69,800,000. Outside operations, which last year resulted in \$2,300,000 profit, sustained a deficit this year of more than \$500,000, so that total net revenue was \$72,600,000 below last year.

"At this point enters a rise of more than \$1,000,000 a month in taxes, the accruals for seven months being \$81,600,000 or \$7,200,000 more than a year ago. This deducted from total net leaves a loss of \$79,800,000 in net income for 253,000 miles compared with 4,000 miles less a year ago doing practically the same business."

OCEAN PASSENGER TRAFFIC

Monetary Times Office, Montreal, April 15th.

It has been thought that the trans-Atlantic passenger business would be poor during the coming season, and statements upon the subject have so represented it. It is stated on reliable authority that, whatever may be the case in the aggregate, one company at least has a different story to tell, having already booked over 600 more passengers eastbound than at the end of March a year ago. What may be the case during the rest of the season is, of course, impossible to state, but there are reasons to believe that it will not be at all a bad season and steamship men seem to be fairly hopeful of the situation. ship men seem to be fairly hopeful of the situation

So far as the westbound traffic is concerned, indications up to the present are that there will be a most marked falling off in the immigration of Europeans into Canada this year. Whereas a year ago all lines coming into Canada this year. Whereas a year ago all lines coming into Canada had booked the entire accommodation of 55 steamships up till the end of February, this year not a single steamer has been booked up to capacity. This does not mean that the immigration will only be as 1 in 55 as compared with a year ago. A number of boats may already have considerable bookings, although in no case were they up to capacity at the time mentioned; whereas, a year ago. they up to capacity at the time mentioned; whereas, a year ago, everything was booked up till about the first of July. As a consequence of the reduction in emigration from Scotland the sailings of April 11th have been cancelled by the Allan and Donaldson Lines.

While the Nanaimo mines are working to almost their full capacity with non-union labor, the strike from the union men's standpoint is not settled. Conditions, however, are improving, and as the Western Fuel Company, who are the largest operators, has signed a new agreement with approximately seven hundred dred men, the strike is, at the present time, more in the form of a lock-out.

PRINCE EDWARD ISLAND

Financial Position of Province—Estimated Value of Silver Fox Crop is Five Million Dollars

(Special correspondence.) Charlottetown, P.E.I., April 13th.

The financial statement for Prince Edward Island for the calendar year 1913, which is also the fiscal year of the province, was submitted to the legislature by Premier Mathieson on March 31st, and shews receipts of \$511,327, and expenditures of \$495,762, showing a surplus of \$15,565. There was an expenditure on capital account of \$40,875, which according to the ordinary methods of account in the province, would be added to the surplus, making \$56,441 to the good. This contrasts favorably with 20 years past, in which there was a yearly deficit averaging with 20 years past, in which there was a yearly deficit averaging about \$50,000.

The province is interested in the redistribution bill now pending before the parliament at Ottawa. Under the terms of the British North America Act, 1867, the apportionment of representation for redistribution is made after each decennial representation for redistribution is made after each decennial census, and owing to the rapid growth of the west, the province would now be entitled to only three representatives in the House of Commons, but it is claimed that by the special terms of union, Prince Edward Island ought to have six representatives in this body in perpetuity which it had on entering the Dominion in 1873. The matter is now before a committee of the House of Commons, and the case of Prince Edward Island was presented before this committee by Premier Mathieson and others, who received a very sympathetic hearing some weeks ago.

Litters of Foxes

Litters of young silver foxes are reported from the numerous fox ranches from week to week, and from these reports it is estimated that the fox crop of this spring will be worth at current prices from \$5,000,000 to \$6,000,000, which would yield to the provincial government a revenue of \$50,000 to \$60,000 from this source.

The province received last year \$7,040 from leases of curtes.

The province received last year \$7,049 from leases of oyster bottoms, and will receive this year a much larger sum from this

The expenditure for education in 1913 was \$150,732, which is the largest sum devoted in any one year to that object.

Farmers and the Auto

Prince Edward Island farmers have been in the past much opposed to the use of automobiles on the streets and highways, opposed to the use of automobiles on the streets and highways, and they have so much control of the legislature that some years ago an act was passed entirely prohibiting the use of motor cars in the province. Last year it was amended to permit the running of motor cars on three days of the week in Charlottetown, Summerside, and certain limited rural routes. There is much agitation just now on the part of the farmers to restrict these privileges, and on the other side to extend the number of motor car routes and to permit the cars to run every day.

Effort is being made to form a company to operate a line of motor busses in Charlottetown, and the city council has granted a concession of exclusive rights for this purpose for a term of ten years with exemption from taxation, dependent upon the action of the legislature.

RAILWAYS AND FARMERS

There Must be Co-operation Because it is Good Business for all Concerned

The railroad companies throughout America are recognizing the necessity of co-operating with the farmers. The three principal roads in Canada are taking more interest in the subject because they know that if farming operations are extensive and agricultural production heavy, their carriage of freight will increase. They need more freight, for the transport of construction materials will not be a source of joy for ever, as the Temiskaming and Northern Ontario Reilway and other reasons. the Temiskaming and Northern Ontario Railway and other roads

Will Train Farmers

A plan for promoting British immigration to Canada has been inaugurated by the Grand Trunk Pacific Railway. An appeal is being made to them who have had no farm experience, and the scheme aims to teach them expert farming and a cooperative method of marketing. For the purpose 14,000 acres at Kinsella, near Edmonton, on the main line of the G. T. P., have been obtained. A model farm will be started in the centre, where the new settler will be shown the best methods of raising cattle, sheep, horses, hogs and poultry and of growing grain on a paying basis.

At a meeting of the Lethbridge board of trade Mr. J. S Dennis, of the Canadian Pacific Railway, remarked that while through the rapid increase of land values the country has been through the rapid increase of land values the country has been living largely on unearned increment, the time has come when the development of the country depends on application to intensive agricultural pursuits. If our progressive cities are to attain their commercial possibilities, every means must be used to encourage the agriculturist. It is necessary that the lands of the province should be made as productive as possible. This can be accomplished by placing upon these lands practical and of the province should be made as productive as possible. This can be accomplished by placing upon these lands practical and progressive farmers, and by giving them every encouragement within the power of the business community. As Mr. Dennis said, industries cannot be permanently successful unless they are adapted to the community which will convert the raw product of the farm into manufactured goods. He recalled the fact that western Canada depends to a considerable extent for its supply of meat upon Australia, and also imports a large quantity of butter, eggs and other farm produce from distant lands.

North Battleford's Example

Instead of importing these commodities, western Canada should be exporting them in great quantities, wherever possible in manufactured form, and the trade and industry that will result will form the basis of permanent prosperity for the cities.

In North Battleford the board of trade has set its face toward the encouragement of the farmer, particularly the live stock raiser, in that district. The board of trade there are not concerning themselves at present with the direct encouragement of industries, being convinced that if they fill up the country with prosperous and progressive settlers, the industries will come to the city as a natural matter of course.

Problems of Farm Life

With these thoughts in mind, The Monetary Times can scarcely receive without some question the recent assurance of Hon. J. F. Duff, provincial minister of agriculture, that there is no need in Ontario for alarm regarding agricultural conditions or the movement from farm to city. While farm operations may cover a larger area than before, as Mr. Duff says, and the number of occupiers of farm holdings may have increased considerably, no student of the agricultural problem in Canada will say that conditions are anywhere near ideal. Among some of the questions which need greater attention are the scarcity of efficient farm labor; the unattractiveness of life on the farm; the difference in the price received by the grower and paid by the consumer; the constant flow of population, much of it agricultural, to western Canada to the detriment of northern Ontario; and the general question of stimulating greater agricultural production.

WILL BUILD LOCOMOTIVES AT FORT WILLIAM

Mr. C. P. McLennan of Halifax, is visiting London in connection with the flotation of the Eastern Canada Fur Trading Company, with a capital of \$2,000,000. He is also engaged in the promotion of an English company for the manufacture of railway locomotives at Fort William. The capital of his Anglo-Canadian Locomotive Company will be £1,000,000, of which £400,000 will be issued in England shortly.

NOVA SCOTIA LOANS TO FARMERS

Applications to Government Numbered Forty-five Last Year—Encouraging Settlers

An important phase of the work of the industries and immigration department of the Nova Scotia government last year was the loaning of money to approved farmers and settlers under the act for the encouragement of settlement of farm lands. The secretary of the department has prepared a

farm lands. The secretary of the department has prepared a table with the report giving particulars of the loans applied for or granted for the last fiscal year. There were 107 inquirers during that period and 45 applications.

The total number of acres offered, with the buildings thereon, as security, was 5,833 acres, and the farms were valued by the applicants at \$136,925. Of these 32 were appraised by the farm inspector, and were valued at a total of \$103,785—buildings, \$37,350 and land, \$66,435. The amount of loans applied for totalled \$82,330, of which amount \$36,045 was granted, the government guaranteeing in all \$15,165.

For Granted Loans

For granted loans mortgages have been taken by the East-For granted loans mortgages have been taken by the Eastern Canada Saving and Loan Company on buildings valued at \$28,500 and on 3,645 acres of land valued at \$35,870. Twenty of these applicants have had their applications accepted and the security in every case approved. The applications of five additional persons were accepted by the company, but were not completed, owing to defective title in the lands held by the owners, or for other reasons. There are a few still under consideration sideration.

Of the 45 applicants 22 were natives of Nova Scotia and Of the 45 applicants 22 were natives of Nova Scotia and 23 were newcomers. Of the granted applications, five were natives and 15 newcomers. The locality by counties of the farms on which loans were sought is as follows: Annapolis, 4; Cape Breton, 9; Colchester, 5; Cumberland, 7; Guysboro, 2; Halifax, 1; Hants, 4; Inverness, 1; Kings, 9; Pictou, 2; not given, 1.

The secretary adds that it would be of interest to note that

The secretary adds that it would be of interest to note that at the time of preparing this report 66 applications had been received on farms valued by the owners at \$255,325 and covering 8,972 acres of land. The farm inspector had visited 48 of these farms, which he valued at \$196,320.

Repayment Period Varies

The total amount of loans applied for was \$137,890, of which 31 loans had been accepted and \$68,205 granted or agreed to be given to borrowers on receiving guarantees from the government amounting to \$28,405. These loans have as security a total acreage of 4,953 acres valued, with the buildings thereon, by the farm inspector at \$123,285. Of the 31 persons who had received loans up to that date, 10 are natives and 21 newcomers. newcomers.

The principal and interest on these mortgages is repaid over a period of years varying in many instances.

CANADA'S RAILROAD LOANS

Analysis of Borrowing of the Three Principal Railroads -Interesting Statistics

At a time when the finances of the three Canadian trans-continental railways are attracting so much attention, the fol-lowing particulars, compiled principally from Poor's Manual of 1914, should be of interest. No comparison can be made upon absolutely identical lines, but there is enough in the figures to show in clear outline the general character of the three systems, the amount borrowed by each, and the present phase of their development. Writing in the London Financial Times, a correspondent says that the exceedingly miscellaneous character of the issues which have been made by the Canadian Northern Railway is a dangerous feature, and adds point to recent comments on the reports that \$35,000,000 of additional indebtedness is about to be created under the guarantee of the Canadian is about to be created under the guarantee of the Canadian Government. He continues:—

Comparisons of Mileage

S

ty

ses

From the point of view of mileage also, the three roads stand in strong contrast to each other. The Grand Trunk Pacific Company and National Transcontinental Railways combined stand for 3,799 miles, part of which is still under construction. The system also controls branch lines, the exact extent of which is unknown and represents a capitalization in round figures, in borrowed money, of \$372,500,000, with an annual charge of \$12,000,000 or thereabouts. The Canadian Northern, if we add about \$20,000,000 in respect of issues not included in Poor's Manual, or created since the last issue of the Manual was prepared, stands for an issued borrowed capital of, say, \$300,000,000, with an annual charge of about \$12,000,000. This is apart from the \$35,000,000 of projected borrowing above referred to. from the \$35,000,000 of projected borrowing above referred to. The system stands for 8,694 miles wholly or partly constructed. The Canadian Pacific Company represents 11,986 miles in operation (with ocean, lake and river steamships and an enormous land grant included), the interest bearing debt amounting to \$236,000,000 and carrying an annual charge of, say, \$10,000,000. Weakness of Grand Trunk

The enormous comparative strength of the Canadian Pacific Company is clearly manifest. The weakness of the Grand Trunk Pacific system lies in the heavy estimated cost of the Winnipeg to Moncton line now under construction by the Canadian Government. The scandal in connection with the cost of the construction of this line has yet to become fully manifest, and it remains to be seen how much of the financial burden can legitimately be thrown on the Grand Trunk Pacific

Company.

The general character of the finance of the Canadian Northern has already been referred to. No doubt circumstances have the position shown in the figures. One largely contributed to the position shown in the figures. One thing is evident—that it will be necessary at some time, and probably soon, even if the road is successfully financed to a conclusion, to unify or consolidate or in some manner get rid of the extreme complication of issues presently existing.

FINANCING OF PIRST THREE MONTHS

London Was Deluged With Applications for Capital-Canada's Flotations

Capital and investment have been busy during the first three months of the year. From January 1st to March 31st, Canada's public flotations in London, according to the records of The Monetary Times, have totalled £16,359,855, or approximately \$81,000,000. The sales of municipal bonds in Canada for the same three months were \$12,800,000. According to the London Statist never before have there been so many applications for British capital, and never so great a response as in the first quarter of 1914 when new issues totalled £108,605,000, compared with £75,574,000 in 1913, while the previous high record was the June quarter in 1910, with £83,412,000.

The market shows no signs of being overhardened. One explanation is that there were many short time loans last year, and many of the new issues are for the purpose of liquidating and floating debts.

The new issues of the March quarter are divided chiefly as follows:—Colonies, £47,000,000; foreign countries, £43,-500,000; United Kingdom, £18,000,000; Canada is the chief borrower, with £24,448,000; others are Australia, with £13,-458,000; Argentina, with £12,166,000; and Brazil, with £5,-521,000. Of the total, government issues are £46,000,000; municipalities, £11,000,000, and railroads, £22,000,000.

Corporate financing in the United States during March

and the first three months compares with the previous year as follows :-

1014. 1013. March \$160,000,000 \$150,000,000 Three months . Three months 431,000,000 701,500,000 Notes were used to a much larger extent than in the first months of the year. Division as to the form of security is-

sued was as follows:-

March. February. Bonds \$47,000,000 \$108,500,000 45,000,000 41,500,000 14,500,000 The outlook for cheaper money is fairly good according to London advices of The Monetary Times.

SASKATCHEWAN SCHOOL DISTRICTS EMPOWERED TO BORROW

The following debenture issues have been authorized by

the Saskatchewan local government board:— School districts and names of secretary-treasurer: Hog School District No. 3153, school house, \$1,200, Jos. Tumbach, Gallon; Bady School District No. 2956, school house, \$1,600, E. Richards, Riverstone; Ruthilda School District No. 3119, school house, \$2,500, O. C. Fraser, Ruthilda; Seagram School house, \$2,500, O. C. Fraser, Ruthilda; Seagram School District No. 227, school house, \$1,500, E. B. Barnett, Winter; Briarlea No. 3103, school house, \$1,900, Robt. Taylor, Briarlea; Garvagh No. 3115 school house, \$1,800, Wm. Hall, Stranraer; Carr Hill, No. 3187, school house, \$1,200, L. R. Perkins, Ellisboro; Krasno No. 3058, school house, \$1,500, V. R. Hryvnak, Hafford; Log Valley No. 3158, school house, \$1,500, Peter Potts Log Valley No. \$1,200, Peter Potts, Log Valley; Pathlow Heights School district No. 58, school house, \$1,500, Jas. Drury, Fletts Springs; Leask Village No. 3134, school house, \$3,000, F. A. Smith, Leask; Bedford School District No. 3195, school house, \$2,000, Ed. Higgins, Neville.

Rural telephone companies and secretary-treasurer's name:—Bonnie View, \$5,400, E. K. Potts, Loreburn; Grimes, \$2,300, J. A. Sykes, Lampman; Roxboro, \$3,600, B. A. See, Griffin; Duval and Dunkeld, \$5,000, W. E. Turner, Duval; South Radisson, \$3,000, R. McNaught, Radisson; Heron, \$4,200, A. A. Will, Heron; Prairie, \$3,200, P. Hill Tate; Erie, \$1,800, M. R. VonVelzer, Craik.

The Great West Life Assurance Company wrote the largest business yet secured in any month of the company's existence, applications being received for \$2,686,000 of life This is a new Canadian record: insurance.

VESSELS TO NEW WESTMINSTER

Channel Allows Them to Navigate the Fraser to That Port-Granby Smelter is at Work

(Staff correspondence.)

Vancouver, April 13th.

Chairman Gilley of the navigation committee of the New Westminster board of trade, states that the river channel from that city to the sea is the best there has been in thirty years. There is 27 feet of water at ordinary tide and 32 feet at high tide, which is sufficient to enable the largest vessels plying on the coast to proceed up the Fraser as far as New Westminster.

Dredges have been working on the channel for months, and it is still to be widened. Jetties have been constructed at the mouth of the river, and the current so controlled that it is

cleaning out the channel for itself.

That much development is expected on the Burrard penin-sula by men prominent in business is indicated by the remarks of Mr. F. W. Peters, general superintendent of the Canadian Pacific Railway. The railway has a line from Port Coquitlam to New Westminster, and the electrification of this, as well as that of some branch lines, is being considered. In connection with the electrification of this line a standard suburban service with the electrification of this line a standard suburban service will be maintained. Such a service will be of benefit to New Westminster and the territory round about. It is probable that if this idea materializes that the necessary power will be obtained from the Western Canada Power Company, which is enlarging its plant at Stave River.

Vancouver's Tax System Criticized

Total exemption of improvements from taxation, such as has been the civic policy in Vancouver for some years, is being strongly criticized. Mr. James Scott, a business man of Winnipeg, pointed out the discrimination which ensues from such a system. In Winnipeg he pointed out that it took two-thirds of the total tax revenue for the police, fire and health departments and half discrimination where the total tax revenue for the police, fire and health departments and half departments. the total tax revenue for the police, fire and health departments and buildings benefitted were assessed two-thirds of their value to help provide the amount. Just now, more revenue is needed by the civic administration of Vancouver, and some of the aldermen have suggested that improvements should bear a part of the burden. It is being seen that owners of the bigger blocks do not pay any more taxes than the owner of the small business places, while he gets a vastly larger equivalent in every way. In Winnipeg, Mr. Scott says, the system has so worked out that all blocks are occupied, the tendency being not to build too widely. It tends to keep a city solid and compact and makes vacant buildings less probable.

Granby Smelter Supplies a Need

The smelter of the Granby Company at Goose Bay, on the northern coast beyond Prince Rupert, has been blown in. The company has spent several million dollars developing its property at Hidden Creek, and now that the smelter is ready work will be on a wider scale. An important feature of the opening of the smelter is that it will be possible for other mines in the north to get ores smelted, without having to come south to Tacoma. The need of a smelter in the north has been felt in the past, and mining men anticipate that now a smelter is in operation, it will mean the development of promising pro-

EMPIRE LOAN COMPANY

The Empire Loan Company, of Winnipeg, has gone to considerable trouble and expense in order to have its securityholders amply protected, and in making his report the com-pany's auditor was satisfied to accept the certificate of the Union Trust Company that the Empire Loan Company had certain specified securities on deposit there in excess of the requirements and were complying in every respect with the trust deed. This loan company is making good progress.

Mr. L. C. Fritch, chief engineer of the Chicago Great Western Railroad, has been appointed assistant to Sir W. Mackenzie, president of the Canadian Northern Railway.

Mr. Fritch assumed his new duties on April 1, with headquarters in Toronto. His duties will be to assist the president in all matters pertaining to the operation of the road and will not be confined to any particular department.

"SOLID AS THE CONTINENT

Bvery year shows a marked increase in the number of policies for large amounts placed with the North American Life.

The fact is significant.

It proves that the Company's financial standing and business methods stand the test of expert scrutiny.

CANADIAN CEMENT AND IMPORTS

Builders Used Nine Million Barrels-Extension and Completion of Producing Plants

The financial stringency during 1913 had an immediate effect in the restriction of building operations of all kinds and its results are shown in the statistics of production and consumption of structural materials. In the case of cement, while sumption of structural materials. In the case of cement, while a very substantial increase in production is shown, this has seemed chiefly to displace imported material, the increase in consumption being only 4 per cent. as against an increased production of 24 per cent. Canadian mills supplied over 97 per cent. of the consumption in 1913, as against 83 per cent. in 1912, according to the estimate of Mr. J. McLeish, B.A., of the department of mines. The industry has been marked by the extension of old and the completion of new plants, the latter west of the great lakes. The total capacity of completed plants at the end of the year being about 50,000 barrels per day, as compared with 36,500 barrels at the end of 1912. New plants were placed in operation at Winnipeg, Marlboro west of Edmonton, Princeton, B.C., and at Tod Inlet, Vancouver Island, B.C. The plants of the Imperial Portland Cement Company at Owen Sound, and of the Crown Portland Cement Company were not operated during the year. Cement Company were not operated during the year.

From Four to Eight Millions

The total quantity of Portland cement, including slag cement and natural Portland, made in 1913 was 8,880,983 barrels, an increase of 1,739,979 barrels, or 24 per cent., over 1912. rels, an increase of 1,739,979 barrels, or 24 per cent., over 1912. The quantity of Canadian cement sold or used was 8,658,922 barrels, valued at \$11,227,284, or \$1.29% per barrel, an increase of 1,526,190 barrels, or 22 per cent., and \$2,120,728, or 23 per cent., in total value. The total imports of cement were 889,324 cwt., equivalent to 254,092 barrels of 350 pounds each, and valued at \$409,303, or an average of \$1.61 per barrel, as compared with imports of 1,434,413 barrels, valued at \$1,969,529 or an average of \$1.37, in 1912. The total consumption of Portland cement, therefore, neglecting a small export, was Portland cement, therefore, neglecting a small export, was 8,913,014 barrels, as compared with a consumption of 8,567,145 barrels in 1912, an increase of 345,869 barrels, or only 4 per

Detailed statistics of production in 1910 and 1913 are shown

UNION BANK BUILDING, TORONTO

- NEW STOCK ISSUE

An issue of \$500,000 preferred stock of the Dominion Engineering and Machinery Company will probably be made in the London market this spring by Messrs. Vaughan, Cowell and Company, represented in Canada by Messrs. Thorne, Mulholland and Company. The company is being formed with a Dominion charter to take over the Ontario Wind Engine and Pump Company, Limited, which has been in business in Toronto since 1804. in business in Toronto since 1894.

ONTARIO'S NEW TAXATION

More provincial revenue of about \$600,000 is provided for in a bill to amend the supplementary revenue act of Ontario, which was introduced in the legislature by Hon. I. B. tario, which was introduced in the legislature by Hon. I. B. Lucas. The bill raises the taxes on banks, insurance, loan and trust companies, racing associations, telephone, telegraph and railway companies. The bank tax will be increased to one-fifth of one per cent. on paid-up capital, instead of one-tenth, as at present. The tax for the head office is raised from \$100 to \$500, and from \$25 to \$50 for each branch office or agency in the province.

The life insurance tax on gross premiums is to be raised from 1 to 134 per cent, and other insurance companies two-

from 1 to 134 per cent., and other insurance companies two-

thirds to one per cent.

Loan companies will be levied one-eighth of one per cent. on the paid-up capital, instead of a tax that now works out at about one-twelfth of one per cent. Trust companies, in addition to the present tax, equal to one-fourth of one per cent. on paid-up capital, will pay a tax of one per cent. calculated on the gross annual income.

lated on the gross annual income.

In the case of telegraph companies the tax will be onefifth instead of one-tenth of one per cent. on the capital invested in the province.

With regard to steam railways, Mr. Lucas said he had added one-half of one per cent, of the gross revenues of the railways. That should produce, so far as could be estimated, \$350,000 of increased revenue.

STOCKS FOR LIFE INSURANCE OFFICES

Two Broad Divisions-Double Liability of Their Shares Handicaps Canadian Banks

There are broadly two divisions of stock investments tor life insurance companies, those of financial institutions like banks, loan and trust companies; and those of other enter-prises such as public utilities and industrial. The former class held by Canadian life companies has increased in the class held by Canadian life companies has increased in the 15 years since from \$1,155,819 or 2.65 per cent. of the whole to \$7,204,651 or 3.40 per cent. The latter has increased more substantially—namely, from only \$575,280 or 1.32 per cent. to \$9,093,446 or 4.30 per cent. This large increase in other than financial shares is almost entirely due to the heavy investments in public utility securities of one company. These figures were noted by Mr. T. Bradshaw, F.I.A., in an address to the Toronto Y.M.C.A. Finance Forum.

Points to Consider.

The chief points to be noted in considering toan, invest-ment and trust companies' stocks are, he continued:—

(a) Whether the stock is wholly or partially paid-up. If the latter, some life offices, on account of the unpaid liability, decline to invest in the same.

(b) The amount of the reserve fund and unappropriated

profits compared with the paid-up capital.

(c) Average rates of interest allowed on deposits and debentures compared with that earned by the company on its own investments; the greater the difference the greater is the margin for profits.

(d) The amount of real estate held under foreclosure, compared with total mortgages on real estate.

(e) The dividends paid on capital, and the company's record in this respect. Comparison of net earnings with amount paid out in dividends, and the yield value of stock.

(f) Reputation of management and directorate.

Trust Company Stocks.

The stock of certain trust companies have found favor, and rightly so, with some life offices as investments. These institutions are not numerous in Canada, neither does their establishment date back many years. Some of them, however, on account of the character of their organization, their usefulness, their recognition by courts, their careful and efficient administration, and their strong financial position,

have secured excellent reputations, and are highly regarded.

In several instances the judicious investment in the better class of shares of loan, investment and trust companies has proved most satisfactory. The interest return has improved through the increase from time to time in the dividend rate, while for the same reason the value of the stock has been materially improved.

During the past ten years the expansion in Canadian banking has kept pace with the steady advancement made in trade and commerce, in the development of the country's natural resources and new territories, and with the steady increase in population.

Record of Bank Stock.

The record of practically all of our banks is excellent. The community at large has practically unbounded confidence in the integrity of their management. The important chiestion to a life company helding beat the ant objection to a life company holding bank stock is that it carries a double liability. As, however most of the banks have a rest equal to, or greater than, their capital, this objection in such cases is not seriously regarded, for before shareholders would be called to make good their double lia-

bility the capital and rest would have to be exhausted.

In considering the merits of different bank stocks the following points should be considered:-

(1) The proportion which the rest bears to the capital, it will generally be found that the higher the percentage the rest is of the capital, the more highly esteemed is the stock.

(2) The rate of dividend paid; and how frequently paid during the year; the course of dividends in past years; the proportion of earnings laid aside after dividends have been met; the market quotation of the stock, the extent of fluctuation in market price.

(3) The size of the bank, the character of its business, the reputation of its directors and officials.

(4) The fact that bank stocks can generally be readily sold on the open market, and that they yield a fair interest rate make them sometimes attractive as a temporary invest-

Mr. Bradshaw expressed the opinion that Canadian banking institutions are very greatly handicapped in the securing of new capital through the fear on the part of the investors of the consequences of the double liability feature which is attached to bank shares. In recent times new issues of capital have not been keenly sought after by old shareholders, notwithstanding that in some instances the rights in connection with new capital issues have been relatively valuable, because they did not care to add to their investments further securities which carried this disadvantageous feature. The failure to secure additional capital from time to time prevents the banks from extending legitimate lines of credits and tends to curtail the progress of trade and commerce.

FINANCE AND MIXED FARMING

Discussing the desirability of diversified farming, a bank manager in a town in Saskatoon district, made the following

"I have a customer who purchased two brood sows a year ago for \$50. From these, he raised twenty-four pigs, selling twenty-two of them for a total of \$402.88. His feed bill and all other expenses amounted to \$167. He still has four hogs remaining, and as these are worth \$120, the venture actually nets him a profit of \$305. In raising the hogs, he used up 200 bushels barley, 150 oats and 50 wheat. He keeps a perfect set of books, which show that his feed worked out in pork at about \$1.00 per bushel. The same man also bought eight cows at the same time as he purchased the hogs, and during the year, made 1,513 pounds of butter, 1,126 pounds of which he sold for \$356.70, or an average of 31 cents per pound. From skim milk, he also raised twenty-six calves, worth about \$424, and as his expenses in this direction were \$268, his net profit was \$512."

CANADA'S SHIPBUILDING INDUSTRY

While the Borden Government is ready and desirous to While the Borden Government is ready and desirous to give every reasonable encouragement to the promotion of the shipbuilding industry in Canada and will insist that all vessels for the Canadian service must be built within the confines of the Dominion in future, it has no intention of establishing a precedent by subsidizing wealthy and powerful British concerns to enter the Canadian field and compete with this added advantage against the companies already established. This was the gist of Hon. L. P. Pelletier's reply to a delegation of Quebec and Levis citizens, who interviewed him with regard to the establishment of a branch of the Armstrong firm where the new dry dock is to be built. strong firm where the new dry dock is to be built.

ONTARIO'S ROAD SCHEMES

The Ontario Highways Commission have made recommendations to the provincial government which may be summarized as follows:-

Financial co-operation of cities with country districts for the raising of \$30,000,000 to be expended on a system of market roads, with an expenditure by the province of \$12,000,000.

Horse-power taxes on automobiles to produce annual

revenue of \$400,000.

More equitable basis of township assessments.

Contribution annually of \$250,000 by the province for strictly rural local roads, townships to spend about four times that amount, with further encouragement in form of short-term loans without interest.

Government contribution to county road construction of 40 per cent., with similar amounts for maintenance; 40 per cent. for suburban (city area) roads, and 33½ for maintenance, and 66½ for interurban road construction, and 40 per cent.

Administration in charge of deputy minister with the assistance of an advisory committee. The blocking out of a definite amount of work to be begun in 1915.

A traffic motor survey of chief roads this summer, an investigation of main township road conditions, of the intercity road schemes, and of market road schemes.

city road schemes, and of market road schemes.

The "Four" that Excels the "Six"

Here is a four-cylinder Knight engine car that challenges the world's best sixes.

Russell KNIGHT \$2,975

It is the PROVEN superior of any "cheap" poppet-valve Six. The equal of even the highest-priced Six of that type.

Every advantage claimed for the best poppet-valve Six is found in this RUSSELL-KNIGHT Four. Plus many valued features not found in any poppet-valve Six.

- ¶ It has more power than many Sixes with motors almost twice its size.
- ¶ lt has a flexibility in the motor which auxiliary gearing and extra transmission speeds can never produce.
- ¶ It is economical of oil and gasoline to a degree with which no poppet-valve motor can compare.
- ¶ It has established world's records for reliability and durability, which no poppet-valve Six dare undertake—not even for \$20,000.
- ¶ In dollar-for-dollar value, no car built in a foreign country can match it by 35%.

These are not claims. They're FACTS. Facts that YOU can easily prove. Facts that vitally affect your investment in any car. Facts which every shrewd buyer will thoroughly consider, in order to buy wisely and well.

Call at our Branch to-day. Make us "show you" to your complete satisfaction wherein this RUSSELL Four excels any poppet valve Six.

"MADE UP TO A STANDARD— NOT DOWN TO A PRICE." \$2,975

HOW DOMINIONS' LOANS FARED

Record of Past Two Years Shows That Public Wait Till Lists Close

There has been a good deal of comment of a critical and sometimes of an adverse character upon the fact that the public has subscribed for only a small percentage of Dominion loans offered upon the London money market, said Hon. W. T. White in his budget speech at Ottawa. The first step is to get your loan underwritten through your fiscal agent in London, and when your loan is underwritten it is a success so far as you are concerned, because your money is certain. The only object of underwriting and paying a commission to the underwriters is to ensure that if the public do not respond when the issue is made the underwriters will, to the extent that the public do not respond, take up the instalments as they mature. When the loan is underwritten your money is secured.

Wait Till Lists Close.

There has grown up in London of recent years a nabit on the part of the public, particularly in connection with large government loans, of waiting until the lists are closed in the hope that the underwriters, being saddled with a large proportion of the loan, will be willing to sell at a small discount. As illustrating that custom as growing up in connection with government loans, here is the record of the past two years as to Dominion of Canada issues and issues made by other dominions of the empire:—

other dominions of the emplite.	
Dominion of Canada loans:	Underwriters got %
£5,000,000, Feb., 1912	65

Market Assumed its Old Style.

On the other hand there were several issues made in January of this calendar year which were almost immediately over-subscribed, there being at that time a certain amount of speculation in connection with these gilt-edged securities due to the loosening of money and the expectation that monetary conditions would be materially easier in the comparatively near future. After a sudden outbreak of speculative activity in gilt-edged securities, which resulted in a number of issues being over-subscribed in a day or two, the market has resumed its accustomed manner and we have found the underwriters taking a large percentage of loans recently issued to the public.

Sir Frederick Williams-Taylor's departure for Canada, says the Scottish Bankers' Magazine, makes a distinct blank in London. Few men earn so much love and respect in a brief decade. All who know the magnetic personality of the man will readily agree that the responsible position which he now holds in the Dominion will suffer no loss of dignity at his hands, adds our contemporary.

LAST SPIKE IS DRIVEN

Grand Trunk Pacific Steel is All Laid—List of Branch Lines

At the Nechako River Crossing, British Columbia, the last link in the construction of the Grand Trunk Pacific Railway was undertaken the other day. Construction on this road was started in 1905 and 2,000 miles of track have now been laid, the last spike being driven 371 miles east of Prince Rupert and 1,375 miles from Winnipeg.

The main line of the Grand Trunk Pacific extends from Winnipeg to Prince Rupert, B.C., a distance of 1,746 miles. The line first follows the Assiniboine Valley in Manitoba and runs through a district well settled before the advent of the railway. From Portage la Prairie west the district traversed was practically a new one, and one in which colonization and development have been due to the railway. Saskatoon and tailway facilities prior to the advent of this railway. Now the country is dotted with towns in all stages of development.

The following is a list of branch lines covered by Grand Trunk Pacific Branch Lines Company:—

Manitoba—	ength, Miles.	Total * Miles.
Harte-Brandon branch	25	25
Melville-Canora	55.2

Everybody knows what makes the world go round. What will make it go square? asks the Wall Street Journal.

According to the annual report of the registrar of shipping, which has just been issued, 344 new vessels, which were valued at \$1,807,380, and had a total tonnage of 40,164, were registered in Canada last year. The amount of capital now invested in Canadian shipping is \$26,908,950, and the number of vessels 8,545. The number of men and boys employed in the marine service is 43,968. Steamers number 3,847, with a tonnage of 711,512.

GIBSON & COMPANY

CANADIAN PACIFIC RAILWAY BUILDING

TORONTO

TO RENT IN

3rd floor in building 50 ft. x 120 ft. Good shipping facilities. Freight Elevator in the rear. Railway siding. Rent \$100.00 per month.

2nd floor in building 50 ft. x 120 ft. Shipping facilities the same as 3rd floor. Floor divided into an office 50 x 30 ft., with three private rooms.

We would be willing to divide this, letting the office with two private rooms \$75.00 per month. The Warehouse with one private room \$100.00 per month. The whole flat to one tenant is \$150.00.

This building is in the heart of the wholesale district of Calgary and is an exceptional chance for any Eastern firm that thinks of opening a branch in Calgary. For any further information apply

BARBER-ELLIS, LIMITED

TORONTO

MILLING BUSINESS IS COMPETITIVE

Ogilvie Company's Managing Director Discusses Important Phases of Canada's Flour Business

Monetary Times Office,

Montreal, April 14th.

Mr. W. A. Black, vice-president and managing director of the Ogilvie Flour Mills Company, Limited, who has just returned from the Pacific Coast, when questioned as to the feasibility of shipping wheat and flour to Europe via the Panama Canal, said:—

"It is frequently asserted that the hot and moist atmosphere of the Panama Canal region would be harmful to
wheat shipped by that route. It is my opinion, however, that
Canadian wheat from a crop containing the normal amount
of moisture could be shipped through the Panama Canal
without ill effects. Wheat containing more than normal
moisture would of course be naturally affected by the heat."

Mr. Black says that tonnage is the most important question in considering the possibilities of the Panama Canal route. The cost of shipping wheat from Alberta to Europe by this route will be high unless the vessels are able to bring return cargoes. Vessels leaving Atlantic ports for Europe return with cargoes and this enables them to offer grain shippers better rates. Imports to the Pacific Coast from Europe are, on the other hand, not yet extensive, although they will no doubt increase.

Widening of Oriental Market.

Mr. Black looks for a gradual widening of the Oriental market for Canadian flour, but points out that China and Japan are not likely to become great bread-consuming countries of a sudden. Chinese and Japs who have lived in America and have learned to eat bread, not only want bread themselves when they return to their own country, but also educate their friends to its use.

Being asked whether there was much likelihood of any of the Canadian milling companies establishing branches in the Orient, Mr. Black stated that it would not be profitable to ship wheat from Canada and grind it in Asia, for the reason that there is very little Oriental demand for the higher grades of flour and practically none at all for the offal. Europeans and others who are settled largely in seaport towns demand the higher grades of flour, but the total consumption is small.

Fifteen More Elevators.

Speaking of the Ogilvie Company, Mr. Black stated that a profit of 10 cents a barrel on the output of the Ogilvie Mills would be more than sufficient to pay all dividends and fixed charges on the company's capital. The capacity of the mills is 18,000 barrels per day or 5,400,000 barrels per year. 'Ten cents a barrel would give a profit of \$540,000. The company's interest charges and dividends amount to approximately \$500,000. He points out that in some years milling companies may make big profits from wheat by buying it at a low price and selling it some points higher. This is, however, offset in other years when a loss is sustained on the transactions in wheat. Mr. Black contends that with over 1,100 flour mills doing business in Canada, competition is too severe to permit of any one company making huge profits

The Ogilvie Company will increase its elevator capacity in Alberta this year by the addition of 15 elevators. These elevators will feed the company's new mill at Medicine Hat. It is not the intention of the company to erect any additional elevators in Saskatchewan and Manitoba.

ALCOMA STEEL CORPORATION TO BUILD MILL

As a direct result of the recent tariff changes, the Algoma Steel Corporation will proceed with its plans to install a heavy structural mill of large capacity at Sault Ste. Marie, according to a statement of Mr. J. Frater Taylor. This has been contemplated for some time, and now that protection is afforded in respect of rolled sections over 35 pounds a yard, there is some incentive to the company taking the necessary steps to mature its plans and to arrange finances.

CONSOLIDATED RUBBER COMPANY'S RETURNS

Weather Affected Sales—New Plant in Operation— Changes in Directorate

Monetary Times Office,

Montreal, April 14th.

Owing largely to unfavorable weather conditions, the volume of the trade of the Canadian Consolidated Rubber Company fell off during the year 1913, and sales of tires were only made to maintain connections, awaiting the completion of the new tire factory. President D. Lorne McGibbon reaffirmed the view of the directors that the policy of delivery direct to the retailer was a good one. The company has 28 distributing branches throughout Canada and carries on its books 14,000 active retail accounts. The Dominion Tire plant at Berlin was completed in December and the output is increasing daily. Expenditures for repairs and replacements were met out of earnings. For 1914, a prosperous year is anticipated.

Comparison of Income Account.

Total net sales of 1912 were approximately \$8,000,000, whereas last year they were \$6,788,859. From this is deducted cost of manufacturing, selling, general expenses and taxes of \$5,878,089, leaving an operating profit of \$910,770. Other income is added, making a total of \$1,000,575 of gross income. Selling and general expenses in 1912 amounted to \$1,338,583.

Gross income	1912. \$1,224,638	1913. \$1,000,575

Surplus forward	\$ 233,840	1,989,897
Forward		\$2,129,639

Changes in Officials.

In the asests are accounts receivable, \$1,819,005, against \$1,059,133 a year ago. Cash shows little change, but has decreased; inventory appears at \$3,055,613; total assets, \$14,180,986, against \$11,481,101. In liabilities, bills payable are \$4,141,370 against \$3,367,644 a year ago; accounts payable have, also increased and the reserve for bad debts is \$91,303 against \$28,500 a year ago.

Mr. T. H. Rieder, who was vice-president, now becomes vice-president and general manager. Mr. Rieder will be in active charge of the operations of the company, Mr. D. Lorne McGibbon, president, not having been able to devote as much time as usual. Messrs. W. R. Allan of Toronto and Shirley Ogilvie of Montreal retire from the board and Messrs. Walter Binmore, treasurer, and R. E. Jamieson, general sales manager, take their places. An addition to the board has been made in the person of Mr. R. B. Price of New York, who is connected with the United States Rubber Company.

Important regulations governing the use of preservatives in foods in Canada have been made by order-in-council. They provide that certain preservatives may be used in limited quantities and absolutely prohibit the use of others. It is forbidden to use any preservative whatever in milk. The following preservatives may be used without declaration of their presence: Common salt, sugar, salt-petre, wood smoke, vinegar, acetic acid, spices, alcohol. No other preservatives than these, incidentally, may be used in foods, especially intended for the use of infants or invalids.

BANK OF ALBERTA ORGANIZING

Charter Has Been Obtained and Stock Issue Will Be Made Shortly

The bill in connection with the charter of the Bank of Alberta has been passed by both the house of commons and the senate, and nothing remains except the assent of the governor-general, which will be given toward the end of the

The provisional directors of the bank are Messrs.
Thomas Underwood, of Calgary; William Sugarman, D. R.
Fraser, F. M. Lee, A. Jackson, G. S. Montgomery and E. S. McQuaid, of Edmonton.

Permanent Board of Directors.

These gentlemen are arranging for a permanent board of directors and intend to make the board as representative of the province of Alberta as possible. One or two additional men from Calgary, a representative from Medicine Hat and one from the more southern section of the province, around the Lethbridge or McLeod district will be asked to the board. Due provision will be made for Edmonton join the board. Due provision will be made for Edmonton representation on the board, as, owing to the fact that the head office is in Edmonton, it will be desirable to have at least a quorum of the directors resident in that city or in the immediate vicinity.

Arrangements are being made for issuing a prospectus and placing an issue of the stock in the hands of competent salesmen. These salesmen will make a thorough canvass of Alberta as well as of other fields where money can be obtained. The provisional directors are in communication with Chicago and New York people who appear to be disposed to take a block of the stock. Some of the stock may also be placed with English capitalists.

Have General Manager in Mind.

The promoters have a goodly number of inquiries regarding stock from various parties in Alberta and Saskatchewan, indicating that the people generally are interested in the proposal to establish a bank with head office in

A large number of subscriptions have been promised, which it is hoped will materialize as soon as the stock books are formally opened. The provisional directors believe that, although money is tight, the minimum capital will be gathered together fairly easily.

The bank will have a general manager who, it is stated, is an able man with extensive experience in banking in this country, and who is prepared to take up the work once the necessary capital is obtained. His name will be announced before long

The directors have no intention of using the bank's capital to build the six-story head office building, as reported. They are, however, negotiating with a private party to finance such a building and in this respect are following the example of some of the older banks. As soon as the negotiations are completed, a building will be begun but practically none of the bank's money will be used for the purpose.

COMPANIES CHANCING NAMES

The following companies in Alberta have changed their names: Benjamin Construction Company, Limited, to Cottage Construction Company, Limited; Baxter Reed Ranching Company, Limited, to Baxter Ranching Company, Limited, And this company in Ontario has changed its name: Harley-Kay Knitting Machine Company, Limited, to Harley-Kay Limited

Kay, Limited.

The following companies with Dominion charters have changed their names: Dominion Estate and Mining Investment Company, Limited, to Dominion Estate and Mining Investment, Limited; Mount Royal Securities, Limited, to Amalgamated Investments, Limited.

And this company in Quebec has changed its name: Investment Agencies, Limited, to Credit Canada, Limited.

And this company in Saskatchewan has changed its name: McNab-Chubb Flour Mills Company, Limited, to McNab Flour Mills, Limited.

MACDONALD COMPANY'S POSITION

Dominion Bond Company Liable for Certain Amounts-Results of Year's Operations

In his annual report, words are not minced by President Ryley, of the A. MacDonald Company, Limited, regarding that corporation's dealings with the Dominion Bond Company. "The Dominion Bond Company," he says, "is still indebted to your company to the extent of \$177,601, and in addition thereto they are also liable on their indemnity agreement for the unsold balance of the preferred stock to the extent of \$232,200. the extent of \$333,200.

"Your directors cannot refrain from expressing the opinion that in their judgment it was decidedly wrong to deplete the resources of the company by the payment of \$75,000 cash dividends to the holders of ordinary stock during the past year, more especially during a period of general depression and at a time when your company was still indebted to the old MacDonald Company for approximately \$800,000, upon which extensions had to be arranged."

Failed as Underwriters.

In another part of the report, President Ryley says: "Considerable trouble was expressed in providing the necessary funds to liquidate all the obligations created by the purchase of the business from the former owners, due to the chase of the business from the former owners, due to the fact that the Dominion Bond Company failed to comply with the terms of their underwriting agreement. When the business of the old A. MacDonald Company was purchased an underwriting was accepted by the present A. MacDonald Company from the Bond Company under which the latter agreed to purchase at par \$2,350,000 of the company's capital stock and only part of this sum was paid by the Bond Company.

"Due to financial conditions and the manipulation of the company's stock the Bond Company were unable to carry out their agreement and make the payment due your company in order that they in turn might meet their notes payable to the old MacDonald Company. Arrangements were finally consummated with the old A. MacDonald Company for the full balance due them of \$600,000. Three hundred thousand of balance due them of \$600,000. Three hundred thousand of the \$600,000 was provided through the sale of 6 per cent. first mortgage notes of this company, secured by mortgages on part of the real estate and buildings of the company, and the old A. MacDonald Company accepted for the remaining \$300,000 due them this company's 6 per cent. notes and the \$300,000 first mortgage notes and the \$300,000 extension notes held by the old A. MacDonald Company is payable half-yearly, and these notes mature \$200,000 each on the first days of November, 1914, 1915, and 1916." each on the first days of November, 1914, 1915, and 1916."

The net profits of the A. MacDonald Company, Limited, for the thirteen months ended December 31st, 1913, were \$321,273, which were distributed as follows:—\$64,064 in preferred dividends, \$75,000 in common dividends, \$76,879 in interest paid the former owners in respect to the purchase of the business, leaving a surplus of \$105,331, of which \$40,165 was transferred to the credit of rest account, and a further sum of \$29,561 has since been used in payment of dividends on preferred stock for the quarter ended December 31st, 1913. The balance, \$35,604, has been written off.

NEW BOND HOUSE

A new bond and investment firm, Messrs. J. W. Muir and Company, has been organized in Montreal. Mr. J. W. Muir has been associated with Messrs. Johnston. McConnell and Allison of that city for several years. The offices of the new company are in the Bank of Ottawa Building, Montreal.

The Great-West Life Assurance Company reports good business for the first quarter of 1914. Applications received are approximately 15 per cent, greater than for the first three months of 1913.

INSPECTOR, to travel Ontario for tariff fire company. Give age, experience and salary expected. Applications treated in confidence. Box 329, The Monetary Times, Tor-

Until it becomes possible to consider the new schedule of freight rates announced by the Dominion Railway Commission in detail and their practical application, writes a Calgary correspondent to The Monetary Times, nothing more than a general expression of opinion is obtainable from business men. That the grain-growers will profit by two cents per bushel on wheat and one on oats is agreed, that distribution by wholesale houses will be less expensive, and that consumers should get coal for probably a dollar a ton less, is about as far as interviewed parties will go yet. All are apparently of the same opinion with regard to the general effect, that it cannot help but bring relief to many interests.

DEBENTURES FOR SALE

MUNICIPALITY OF LUMSDEN, SASK.

DEBENTURES FOR SALE.

Tenders will be received by the undersigned up to 1 p.m., April 30th, 1914, for \$5,000, 20-year, 6 per cent. local improvement debentures, and \$1,000, 20-year, 6 per cent. skating rink debentures. The highest or any tender not necessarily accepted.

B. MORTON. Secretary-Treasurer.

Lumsden, Sask.

DEBENTURES FOR SALE.

Sealed tenders will be received by the undersigned up till noon on Monday, the 4th day of May next for \$16,000 Village of Fergus 5½ per cent. Debentures, payable in 30 annual instalments in amounts from \$220.89 to \$1,043.49, with annual interest coupons attached.

JOHN THOMSON, Chairman Finance Committee, Fergus.

Fergus, April 14th, 1914.

CREAT WEST PERMANENT LOAN BUILDING

The Great West Permanent Loan Company's new building at Winnipeg was opened last week. The company and its allied concerns will all have their offices in the new block. The vaults in use in the building are of the double-deck variety, and are complete in all their fittings, etc. They are lined with solid steel throughout, and are absolutely burglar and fireproof. Mr. James Scroggie is the manager of the Imperial Canadian Trust Company, one of the companies housed in the building. He has had an extensive experience in financial matters.

PACIFIC-BURT COMPANY

The balance sheet of the Pacific-Burt Company, Limited, The balance sheet of the Pacific-Burt Company, Limited, which has its head office at Toronto, reflects a satisfactory year's business during 1913. The balance carried forward to 1914 is \$35,973, compared with \$32,405 carried forward at the beginning of 1913. Adding to that sum, the substantial net profits for the twelve months of 1913, amounting to \$73,568, there was a sum of \$105,973 available for distribution. Four dividends on preferred stock and dividends on common stock absorbed \$58,500. To real estate and plant reserved account was transferred \$6,500, while \$5,000 was reserved for other fixed assets. This left a balance of \$35,973 to be carried forward. carried forward.

Out of the profits for the year a transfer was made of \$6,500 to real estate and plant reserve account, and \$5,000 was reserved for other fixed assets. In addition to these transfers, the real estate and plant reserve account was increased by \$3,500, being the value of land (formerly part of a street) which has been deeded to the company by the town of Emeryville, without cost to the company.

The Pacific-Burt Company has liabilities of \$1,543,748, including the profit and loss account of \$35,973. The com-

including the profit and loss account of \$35,973. The company's preference and common stock account for \$1,300,000. The remainder of the liabilities are made up of real estate and plant reserve account reserved for other fixed assets; dividends paid on January and total and debts payable. and plant reserve account reserved for other fixed assets; dividends paid on January 2nd, 1914, and debts payable. Against these are the following assets: real estate, building, plant, patents, investments, and good-will (including cost of establishing new departments), \$1,319,076.07; stock-in-trade, \$90,447.42; accounts and bills receivable, \$111,386.19; cash at banker's and in hand, \$22,838.92; total, \$1,543,748.60.

Messrs. Smith, Mackenzie and Hall, 24 Toronto Street, Toronto, will move to 54 East Adelaide Street about May 1st.

A Western Canada correspondent writes to The Monetary Times: Your paper was the only eastern financial paper whose report of the matter was fair and accurate. 52.
