The Old Garret.  
A charming old place was that great dusty attic,  
With its dim nooks enlivened with spider and mouse,  
The store-room of rubbish, the joy of the children,  
That precious old garret in grandmother's house!

There were bunches of odoriferous herbs on the shelves,  
And such much smaller that went spinning with a treadle,  
A pair of wool-cards and a queer little reel.  
There were bunches of odoriferous herbs on the shelves,

**The Old Doctors**  
Drew blood, modern doctors clean it; hence the increased demand for Alteratives. It is now well known that most diseases are due, not to over-abundance, but to impurity of the Blood; and it is equally well attested that no blood medicine is so efficacious as Ayer's Sarsaparilla.

**Recommended**  
above all others, we need it with marvelous results. The sore healed, and health and strength rapidly returned."  
—T. W. Richmond, Bear Lake, Mich.

**Ayer's Sarsaparilla,**  
PREPARED BY  
Dr. J. C. Ayer & Co., Lowell, Mass.,  
Price \$1; six bottles, \$5. Worth \$1 a bottle.

**How the Bakers Went Early to Meeting.**  
The new minister who was called here to a resemblance to the former incumbent, unless it might be in a similar impression that he made of honest purpose and purity of thought.

The Weekly Monitor.

WEDNESDAY, OCTOBER 30th, '89.

National Patriotic Sentiment.

By patriotism we mean that love of the country of our birth which becomes associated in our minds over personal welfare and success in life. It is not a sentiment of innate origin in the soul of man, but has its origin in the institution of citizenship...

This Dominion of ours, though not yet a quarter of a century in age, having made rapid advances in all that make a nation great and an object of pride, ought to inspire its citizens with a love and regard strong enough to enable the higher sentiment of true patriotism...

With such influences daily and hourly exerted, we can expect that the people of Canada shall soon become an intensely patriotic people!

Local and Other Matter.

Yarmouth is going in for a street railway, and we know no reason why she should not have it.

The N. Y. World is published from the highest building in America. It is of thirteen stories or two hundred feet in height.

The Methodists of Weymouth have torn down the old church in which they formerly worshipped, with a view to building a new one in more modern style.

James H. Beckwith has just received a new stock of Cheap Roman Paper for fall trade. Very good quality.

Gordon Memorial Church (Presbyterian), Sunday, Nov. 3rd, no services. Sunday school at 2 p. m. Social service Tuesday, at 2 p. m.

The Ladies of the W. C. T. U. will meet next further notice in the room of Murdoch and Nelly's store. Mothers come and help us save your boys from the curse of strong drink.

New Silver Mine.—A mine of this mineral is reported to have been recently discovered near Woodstock, N. B. The discoverers, Britain & Shaw, have several mines engaged in large development with fair prospects of success.

A first-class line of Reefers and Overcoats has just been opened at T. A. Foster's.

Our esteemed collector of customs and Mr. Miles Clark, of St. John, thought it prudent to leave the Liverpool road last week on a sporting tour. They returned via Springfield and St. Louis and report getting and other game very scarce and difficult of approach.

The Port Lorne people were highly entertained at the school examination which took place on the 26th inst. Miss Estlin Bowley has done good work both as a day and Sabbath school teacher. She has also been a good Christian worker. She has gained many friends, and will be sadly missed when she leaves.

The last S. S. line it appears will become a fixed fact on the settlement of some details. Hon. Mr. Abbott has just returned from England, says the idea that the fast steamship scheme was abandoned for lack of capital is a mistake one, and soon as terms and conditions are arranged, the enterprise will go on.

Says the New Star.—Aplias are being shipped at Kingsport for London, via the steamer Ulanda to London. This steamer calls at Halifax, but the freight via St. John is twenty cents per barrel, less than via Halifax. Will soon explain this.

Sheriff Morse, of Annapolis, arrested in the city yesterday en route to Dorchester with a prisoner named Bennett, recently sentenced by the supreme court of that County to four years in the penitentiary for rape. Bennett, whose head is somewhat affected, is about 17 years old, and his victim was a 19 year old girl, residing in the county poor asylum.—H. Chronicle.

Judge Graham has already abolished the star chamber method of taking evidence in divorce cases, and ordered heretofore that all testimony shall be given in open court. It was the abuse of the secret testimony practice that resulted in the recent highfalutin scandal in New York.—New Glasgow Enterprise.

The attention of the reader is respectfully called to our correspondent "Townsmen's" letter. Why the moral institutions of the community should be so constantly offended by the lack of official investigation into recent violations of law and decorum in our midst, is a matter that requires explanation. Shall crime continue to be condoned to the public injury or not?

F. E. Marshall, son of Mr. N. F. Marshall, of Middleton, who has been attending the St. John Business College, we are glad to be assured, has successfully passed the examinations required for graduation in this college, and has been awarded a first class diploma. His success was obtained in less time than is usually taken by students, which is a fact that speaks well for the industry and application to study of our young friend.

Dixon's New Quarters.—About dawn on Monday morning, Dixon and staff commenced removing his large stock of grocery goods into his new shop on the east corner of Grandville and Queen Street, and during the day they succeeded in "arranging an arrangement" of them in such a way as to be quite pleasing to the eye. Many customers visited the store during the day, and all seemed pleased with the change. On lighting up the premises in the evening for the first time, a member of the B. B. Band, who happened along just then, called his brethren together, and in a body, armed with the implements they know so well how to handle, they took temporary possession of the room, and flooded the town with harmonious sounds for more than an hour. On, one and all, make a business visit to Dixon in his new quarters—it will repay you to do so.

—Snow fell in Hants County last week. —A Mr. McNamara is building a large three storied hotel in Parrsboro. It is spoken of as an architectural success.

The schooner warior discharged her cargo of Sidney coal here last week, and sailed to return on Monday last.

For all kinds of latest styles of Neckties, Collars, etc., go to T. A. Foster's. —The S. S. Rockhampton, with her cargo of fruit, arrived in London last Friday, after a good run.

THE COUNTY COURT.—A session of this court will be held in the Court House on Tuesday next. We are told the docket will not be a large one.

The Allen S. S. Company are building three new freestone houses in the town of St. Lawrence. They are to be ready on the 1st of next month.

—Canada immigration for 1889 has not been so great as that for 1888, but the class of immigrants this year is a great improvement on that of last year.

—J. W. Beckwith has made another advance on Eggs this week.

—Messrs. Clarke & Sons, of Berwick, have been awarded the contract for building the new freight house, and also the new passenger station on the N. S. Central railway.

COAL OF THE PACIFIC COAST.—During the month of September thirty-two vessels cleared from Victoria, with 54,308 tons of coal from the following colliers: Vancouver Coal Co., 7,744; Dunsmuir's, 19,400; Allington, 4,774; Union Coal Co., 2,450.

—The Motion Pictures, which will hold its majority in December, announces the issue of a special number to celebrate the centenary of the invention of the motion picture. It will appear in an entirely new form, and will be pleased to have it sent to our readers.

GRAPHER.—We were shown a very fine sample of this mineral a few days ago by one of our townsmen. It was found in Kings County, where he believes there is a large deposit. A sample has been sent to an analyst, and if his report should prove favorable, steps will be taken to develop the mine.

—The Sabbath School Concert held in the Baptist Church, Lawrenceton, last Sunday evening, was a complete success. The proceeds of the concert were \$400.00, and were placed in the hands of the church for the benefit of the school amounting to eight dollars.

—The North West Territories of Canada have already established 164 schools which are attended by 24,744 pupils who are taught by a well qualified staff of 183 teachers. The increase in the number of schools in 1889 is 33, and the number of pupils is 12,000. Besides these, high schools have been established at Regina and Calgary.

PERSONALS.

C. S. Harrington, Q. C., of Halifax, was in town last week.

Mr. William Tupper, of the Nantucket Hotel, R. I., a native of this town, and who has been a few days here on a visit to his mother and sisters, has gone to Florida where he and his wife intend to spend the winter.

James H. Hall, son of the late David Hall, was in town on Friday last, and it gave us great pleasure to meet him. He has been for many years past a resident in the vicinity of Boston, and we are glad to know that he has been so successful in business as to render it possible in his advanced age, to take time comparatively easy. May his shadow never grow less.

James Primrose, D. D. S., has returned from Boston, and we understand he intends pursuing his professional studies at Annapolis as a student in the law.

Mr. Albert Atkins, of Winnipeg, Man., who is a daughter of our respected Lieutenant Governor, is at present visiting her friends and relatives in Truro.

Mr. Howard Bath, of Bath Brother's Brewery, has returned from Boston, and we are glad to see him. He is a very successful brewer, and we are sure his trip has done him good.

Mrs. Wilson, of Halifax, the wife of a grandson of the late Rev. William Wilson, Methodist clergyman formerly well known here, has been on a visit to relatives in this place. She has been the guest of our respected postmaster.

Mr. John Walker, of Kingston, formerly of this town, was a visitor here during the past week.

Mr. Wellington Daniels, of the vicinity of Lawrenceton, who has been very, very dangerously ill of typhoid fever, we are glad to learn is slowly recovering, and it is hoped that good nursing may result in full convalescence.

Lewis W. Hoyt, night manager of the W. U. Telegraph Company, was in Halifax on Saturday, on his way to Sidney, C. B. He left here on Thursday last after a visit to his mother and other relatives.

Captain J. G. Charlton, of Port Lorne, master of the schooner Alma, is at present in the city of Annapolis, on his way to his home in Truro.

Mr. H. E. Baker, of Yarmouth, has been honored with an invitation to be present at the official opening of the new municipal buildings in Glasgow, Scotland, on the 1st inst. Mr. Baker was present on the grand occasion.

Gibson Anderson, late of the firm of C. & W. Anderson, of Halifax, grocers, is dead.

General Green B. Raum, of Illinois, has received the appointment of Commissioner of Patents by the President of the United States.

James Z. Hall, son of Z. S. Hall, of New Westminster has been elected to the directorship of the Vancouver Building Society.

Messrs. Hendry & Bertain—both old Nova Scotia names—of British Columbia, recently bought a considerable tract of land lying south of the Hants County site, on Vancouver Island, and not remote from Victoria. My purchase proves a bonanza.

Mrs. L. C. Wheelock, of Lawrenceton, and Miss Brenda Lockett, of this town, went to St. John last week to purchase their winter supplies of millinery and kindred goods.

Mr. Gooschen, son of the chancellor of the exchequer, was in Vancouver, B. C., on Saturday last.

Miss Frances Everett, of Fredericton, has been awarded the York county scholarship by the university faculty. Let our girls have courage.

Mrs. M. P. Longley's Country Girl has won the \$5000 prize race on the Mystic Park course, Mr. C. F. Parson, who is said to be present, domiciled in Lynn, Mass. where he is the owner of several fine and fast trotting horses.

Mr. M. P. Freeman arrived in town last week on a visit to her father and mother—Doctor and Mrs. DeBlois.

Miss Edith Crosskill, we regret to learn, is still suffering from a neuralgic affection.

—Prof. Thomas Hall, of the firm of Chute, Hall & Co., Yarmouth, a native of this town, paid a visit to this place last week. He spent last Sunday among his many relatives and friends at Port Lorne. No particulars yet known.

—Hon. Alexander Morris, ex-Governor of Manitoba, died in Toronto, on the morning of the 29th inst.

—The best beef of the season we saw yesterday in the meat shop of The Eagle. It was really fat and fine.

—Pansies have been successfully raised by H. C. Baker, of New Truro, Yarmouth County.

—It has been estimated that there are no less than 60,000 boys tramps in the United States.

—The telegraphic cable between Halifax and Bermuda will be laid before Xmas. There is a probability that this cable will be extended to Jamaica and the Bahamas.

INTERNATIONAL S. S. LINE.—The direct steamer from Annapolis to Boston will make her last trip in the season, leaving Annapolis on Thursday, the 7th of Nov.

—Annie Killam, who is figuring before the supreme court, Halifax, in a perjury case, left by the steamer on Monday last. It is said she is bound for Boston.—Star.

BAIRDS CHALLENGE.—The cod fisheries in the Bay has been the best noted for many years, and it is reported that a rich mine of asbestos has been discovered in the township of Maria on the north shore of the Bay.

—Leo XIII, the present pope, is rapidly losing the last vestige of health. It is believed that he cannot much longer bear the infirmities of old age, and the arduous duties of his distinguished position. His successor is already being named in Italy as being certain to be an Italian.

OF SCIENTIFIC VALUE.—Princeton College has received from the John Day Lake region, a rare collection of strange remains, including skeletons of three toothed horses, hardly larger than donkeys, rhinoceri, camels, peacocks, and large fierce cat-like, and hyena-like animals.

—A new extradition treaty, it is said, has been negotiated between the United States government and that of Great Britain, which will be sent to the United States Senate, on the 1st of next month. What part the action of the Canadian Parliament, in passing the Weldon Act, has had in bringing this happy result about does not as yet appear, but we do not doubt it avoke our neighbors to the fact that extradition does not mean legislation which they refused to assist in doing by treaty.

HALIFAX MARKETS.—The following quotations for Oct. 29th: Butter, in tubs choice dairy, per lb., 19 to 20; Butter, in rolls, in tubs, 18 to 19; Eggs, per doz., 18 to 19; Hams, dressed, per lb., 7 to 8; Bacon, per lb., 6 to 7; Pork, per lb., 6 to 7; Veal, per lb., 6 to 7; Mutton, per lb., 6 to 7; Chicken, per lb., 6 to 7; Turkey, per lb., 6 to 7; Poultry, per lb., 6 to 7; Fish, per lb., 6 to 7; Hay, per ton, \$12 to \$13; Turpentine, per lb., \$1 to \$1.25; Pitch, per lb.,

Local and Other Matter.

Our local correspondents will please not forget to keep us posted on matters of interest in their respective localities.

We regret to be informed that no change for the better marks the condition of our young townman Willis Gleason.

I beg to announce to my friends and customers that I am now prepared to take good dried apples at the highest market price. A. W. Beckwith.

The weather continues to be unusually mild and inclined to be wet. No snow has yet fallen in this part of the valley.

AT SHERIFF'S SALE.—The Cape Sable Printing Co.'s premises, situate on the 24th inst. by the Sheriff of Shelburne County, under a chattel mortgage made by said Co. to Mr. Judah N. Smith.

New Two Boat.—Messrs. Moir & Co. of Halifax, is it stated, have the contract to build the engines for Captain Geo. E. Corbett's new tugboat, the work on the steamer is being pushed rapidly forward, and she is expected to be launched by the last of December.

LADY GRADUATE IN PHARMACY.—The Annapolis Spectator reports the first case in Nova Scotia of a lady studying pharmacy with the hope of becoming a pharmacist. The student is Miss Carrie Coleman, a full-fledged druggist. Miss Coleman is the plucky young lady and is studying with Dr. A. B. Cunningham. If successful, having completed her first and second years time being necessary, she will be the first provincial young lady to go up for examination.—Spec.

REBULDERING A POLICEMAN.—Attempted burglary of the house of the chief of police sounds odd, but such is the circumstance reported by Chief Macgregor, of the town. He says that on Monday night after retiring from duty at 10.30, he was in bed ten minutes after reaching his home. He was just dozing off when his wife aroused him with the statement that someone had smashed the parlor windows. At once slipping on his dressing gown and rushing to the street, but the miscreants had made off and he was afraid of firing at them for fear of breaking some windows. He chased them as far as St. George's church, where, being on his bare feet, the road very hard and the night cold, he gave up the pursuit, but a woman whom he met said that she saw the two men and recognized one of them.—Island Reporter.

Transfusion of Blood.

New York, Oct. 22.—Morris A. Redding, an artist, and his room-mate, a pocket-book maker named Pfeiffer, went to bed at the boarding-house on East Thirty-fourth street, Sunday morning, and turned on the gas, fall head. They intended to commit suicide. The administration is willing to take the tariff of raw wool, then the Argentine Republic, for instance, which grows wool in quantity, will be glad to furnish the raw material. As long as we make raw material dead, the finished product will cost so much that European manufacturers can out-let us and keep us from the market. And if it is not proposed to lower the ruinous tariff, and of what use will be the eloquent speech of Mr. Harrison, and the resolutions engaged in debate? We have tried to find some purpose which this congress would have, but we have failed. The tariff is a property of expiring with as little delay as possible.

COLCHESTER COAL MINING CO., (LTD.).—Work of development is going on slowly but surely at the Mine and matters are commencing to assume a practical shape. The company have constructed a commodious and well arranged boarding house, with a long and pleasant walk to the shaft, fitted with a gear and wire rope, trolley, etc., for sinking the slope to the required depth of 100 feet. Considerable prospecting has been done on other seams and all show favourable results. It is the intention of Mr. Jewkes, the foreman, to utilize the shaft for other purposes, and to open up other seams. The mine was visited on Thursday last by Dr. J. C. McDougall of Oxford, and George Ross, the active Secretary of the company, and both express their views highly pleased with the situation of affairs. With a few more works taken up about a thousand dollars and he concluded that would be sufficient to keep him the rest of his life.

THE PRINCE AND PRINCESS OF WALES WARMLY GREETED ON THEIR ARRIVAL AT ATHENS.

ATHENS, October 24.—The entry of the royal yacht Osborne bearing the Prince and Princess of Wales, Prince Albert Edward, Prince George and Princess Maud and Victoria into the harbor yesterday was a picturesque display. The British ship, the Admiral Perkins met the Osborne in port of the island of Hydra. A national procession was formed with the flagstaff flying the Osborne in the center of the column. Just outside the harbor the British vessels were met by the Greek fleet under Admiral Miaoulis. At this point the British fleet hoisted the Greek colors. As the royal procession passed into the harbor salutes were fired from all the warships, yards were manned and sailors cheered. Upon the arrival of the royal yacht in port, the King and Queen of Greece and the Duke of Sparta, accompanied by Lady Monson and attaches of the British legation, went on board and gave the visiting party a warm welcome. The entire party was driven directly from the dock to a special train which conveyed them to Athens. The British guests were met at the station by Mr. Trioupiotis and the Metropolitan. The Prince of Wales wore the full dress and uniform of a general in the Greek army. Princes Albert Edward and George also wore Greek uniforms. The mayor presented each of the princesses with large bouquets at the station. It was remarked that the Caracoth was not present to meet the British royal party. From the station to the palace the reception of the visitors was most enthusiastic. Flags waved from all windows along the route. The streets were crowded and people gathered in large numbers even on the house tops. In the first carriage were seated the king of Greece, the Prince of Wales, the Duke of Sparta and Prince Albert Edward. In the second carriage were the queen of Greece and the Princess of Wales. Ten followed carriages bringing Prince George and the Greek and British princesses.

Life Was a Burden.

Until lately I suffered from headaches always preceded by constipation making my life a burden. A friend advised Burdock Blood Bitters. I took three bottles, and now feel myself a new man and my headaches are things of the past. A. R. Julian, Ottawa, Ont.

News, Notes and Telegrams.

The town of Windsor, New Hampshire, has only increased its population by four and its buildings by two in the last eleven years.

TRAE AS GOSPEL.—One-third of the foot in the country think that they can beat the lawyer in expounding the law. One-half think that they can beat the doctor in healing the sick. Two-thirds of them think they can beat the minister preaching the gospel, and three-fourths think they can beat the editor in running the news paper.

Hull's Hair Renewer is free from alcohol and dyes that injure the skin. It is scientifically prepared, and will restore gray hair to its original color and vigor.

METAMORPHOSIS.—A Miss Chaunoy, of Columbus, O., had a fright that would less than her lesson. She used for her complexion a mixture of arsenic and nitrate of silver. Then she went to the White Sulphur Springs and took the baths. The sulphur dissolved the silver salts in her skin and turned her so black that she has gone into retirement, and will not be seen again for a year.

MONS OCEAN NAVIGATORS.—It is stated that the Canadian company will build two ocean liners next year. The success of the City of Paris, of the Inman line, in breaking the record previously held by the Cunarder Rurik has, in the minds of the managers of the Canadian line, made such a step necessary. The two new vessels will be twin screw steamers, and constructed with a view to making a five-day round.

"A BIG WHISKEY SELL."—Winnipeg, Oct. 21.—Details of the big whiskey spill at Calgary show that a hotel man from that place came to Winnipeg and gave an order to a liquor merchant for \$2,500 worth of liquor. After receiving the order, a traveler for a grocery firm, this order was canceled and given to his firm. The liquor merchant watched the shipment and notified the police, who seized the liquor on arrival at Calgary and destroyed it. It was unpaid for.

Correspondence.

We do not hold ourselves responsible for the opinions of our correspondents.

Mr. Editor.—Having had occasion to visit the Yarmouth and took passage by the Steamship Yarmouth, and returned by the same vessel on Monday last week. On Wednesday a party of Indians from Antigonish found me killed by a tree, half a mile from my camp. In falling the tree it caught the man, probably killing him instantly.

KILLED BY DYNAMITE.—Montreal, Oct. 25.—A fearful explosion took place yesterday in St. Jean Baptiste village. Workmen engaged in digging a sewer were dry-dynamic cartridges when the fuse took fire and the cartridges exploded. One man was blown 30 feet and killed. A whole block of houses on the opposite side of the street were shattered and will be taken down. Many persons were injured by falling walls. The damage to property amounted to \$100,000.

INJURED BY TRAIN.—On Sunday night while the C. P. R. construction train was at Aulac, one of the workmen in the end of the car in the dark, missed his footing and fell into a culvert, receiving injuries which it is thought will prove fatal. His name is Daniel Crowley, and he belongs to Fredericton, N. B. He was brought to Amherst by the car and Mr. Dobson was called to attend on him. The man is reported and it is not expected that he will recover. He has since been removed to the St. John Hospital.—Press.

SOBER KESTREL WROKED.—Louisburg, C. B., Oct. 25A.—The schooner Kestrel, Capt. McDonald, from Cove Bay, bound for Halifax, laden with coal and pickled fish, struck near the lighthouse at the entrance to the harbor. The vessel was driven ashore and sank in mid-channel. Only about three feet of her topmast is out of water and she is dangerous to navigation.

LIGHTNING HAVOC.—A severe local storm of thunder and lightning passed over our town on Sunday afternoon, causing much damage to property. For six or eight days the rain has been falling, and the ground is very wet. The lightning struck the Central Telephone, burning the apparatus and blowing the wires down. An extent that it had to be taken to Amherst for repairs. On the West Bay line 15 telegraph posts were shattered. It also struck the dwelling house of Mr. Paul Wood, entered through the roof, tore the plaster off the walls and passed through the door into the kitchen. The roof was blown off, and several people received shocks more or less serious.

SCIENCE.—A young man named Duncan McQueen, of Little Harbor, committed suicide by hanging on Saturday last, while laboring under religious mania. The body was found hanging on a tree a few hundred feet from the house.—New Glasgow Enterprise.

Rev. J. A. Cahill, Presbyterian clergyman, of Central Ontario, says:—"Last Monday I was invited to give a lecture, which caused a general give out. My doctor failed to help me. A member of my church recommended and asked me to try Dr. BARKER'S LITTLE HARBOR. I did so with very little faith in it, being prejudiced against patent medicines. However, it cured me. I have not had any pain in my side or other symptoms since, and I am satisfied it is a first-class medicine for the disease it is recommended for."

THE CITY OF MONTREAL.—There is considerable work to be done on the steamship City of Montreal, lying in Rodney slip. Her guards are being taken off, and with the bulwarks, replaced by stronger material. This is needed to enable the vessel to withstand the side seas which prevail during her stormy trips. Much of the wood-work is very old and needs replacing through decay. Some beams will have to be replaced and the paddle boxes refitted. The appearance of the vessel will be greatly overhauled so that when she is returned to the route she will be a first-class winter boat.—St. John Telegraph.

Attacked Three Times.

"Having been attacked for the third time with Inflammatory Rheumatism, which kept me in bed six weeks under medical care, without relief, I resolved to try BARKER'S LITTLE HARBOR, and before I had finished the third bottle I was able to work again." George Robb, Garden Hill, Ontario.

Perchance the most interesting of all the city scenes are the markets. In them is found almost every article that is to be had in the city. The chickens, ducks, geese, turkeys, little pigs and calves are offered for sale alive. These seem to be very effectively, but they are not brought in to look with favor on the male. With its great ears flapping in the air, seemingly without any control, the part of the animal, with its spine legs and little hoofs, and with its generally unappearing appearance, it is a very good piece of machinery. It is a very highly painted, much-belostered, and altogether gaudy car.

THE SILENT MAN.—Says the Toronto News: "It will be remembered that about a year ago there appeared an account of the strange resolution and subsequent action of a man named Lee, who lives in the rear of a house on Shaw street. Some eight years ago he came home one evening from his work, bringing his tools, and declared he was through both working and talking. Ever since he has faithfully kept his pledge, the instances when he has broken it being very rare. No special reason was given for his resolve except that he had saved up about a thousand dollars and he concluded that would be sufficient to keep him the rest of his life.

But instead of lying he is fat and vigorous, his long silent walks being enough exercise to keep him in fair health. And as his stock of said cash is said to be getting near the end, it is alleged he has begun to say a few words, and declared his intention of resuming work in the spring.

Whether this is the case or not, there are very few records of men who have taken a stubborn fight against holding communication with the outside world. The old man was industrious and a good worker before he took his vow of dumbness and abstinence from work.

AUSTRALIAN GOLD.—We want in this Dominion a part of the great Australian gold. We have one link completed in getting it, the C. P. R. over our continent. We now require an international connection perfected by fast steamers to Australia and New Zealand. The Australians demand the very articles that the United States and Canada have in the richest profusion. These great colonies under the southern cross are rich in minerals and gold, and can find no worthwhile work for wealthier customers in the world. Look at this shipment of gold made from Australia to San Francisco only two weeks in payment of products purchased from our fortunate cousins.

The steamer Alameda which arrived yesterday from the Australian continent brought the largest shipment of treasure that has arrived in many years. In the treasure room of the ship was 100,000 English sovereigns consigned to a Hong Kong and Shanghai banking corporation of this city, and the Anglo-Californian bank had a shipment of 33,000 sovereigns in gold worth about \$2,250,000. This sum is consigned to these banks in payment for balance due on American products purchased in Australia, and as how valuable is a trade with the Australian colonies. In a few days the sovereigns will all go to the mint to be coined into Yankee five, ten and twenty pieces.

TRADE WITH JAPAN.—The Morning Chronicle says:—"Japan has appointed a consul to reside at Vancouver and represent in Canada that most progressive of Asiatic countries. Mr. Yamashita is the gentleman named, and he is traveling throughout the western part of the Dominion, in order to make himself acquainted with the productions and requirements of this country, with an enterprising view to the opening up of mutual trade between Japan and Canada. On his late visit to Winnipeg he is reported to have expressed the desire of his government for a larger mutual commerce with Canada, and to have stated that his country requires grain, flour, lumber, cottons and other manufactures, and can supply in return tea, rice, silks, carpets, and other articles not numerous to mention, which we are accustomed to bunch up under the term 'Japanese wares.' This prospective commerce, having an element of mutuality, has the promise of life. Where that element exists, merchants will soon find it out; but where the circumstances of countries exclude that element of mutuality of commerce no permanent and profitable trade can arise, responsive either to governmental mandate or mercantile enterprise."

A Pleasing Discovery.

I suffered with rheumatism and obtained no relief until I used Gray's Compound Yellow Oil. Since then I have found it to be an admirable remedy also for burns, sore throats and rheumatism. Mrs. M. Cameron, 137 Richmond St. W., Toronto, Ontario.

Correspondence.

We do not hold ourselves responsible for the opinions of our correspondents.

Mr. Editor.—Having had occasion to visit the Yarmouth and took passage by the Steamship Yarmouth, and returned by the same vessel on Monday last week. On Wednesday a party of Indians from Antigonish found me killed by a tree, half a mile from my camp. In falling the tree it caught the man, probably killing him instantly.

KILLED BY DYNAMITE.—Montreal, Oct. 25.—A fearful explosion took place yesterday in St. Jean Baptiste village. Workmen engaged in digging a sewer were dry-dynamic cartridges when the fuse took fire and the cartridges exploded. One man was blown 30 feet and killed. A whole block of houses on the opposite side of the street were shattered and will be taken down. Many persons were injured by falling walls. The damage to property amounted to \$100,000.

INJURED BY TRAIN.—On Sunday night while the C. P. R. construction train was at Aulac, one of the workmen in the end of the car in the dark, missed his footing and fell into a culvert, receiving injuries which it is thought will prove fatal. His name is Daniel Crowley, and he belongs to Fredericton, N. B. He was brought to Amherst by the car and Mr. Dobson was called to attend on him. The man is reported and it is not expected that he will recover. He has since been removed to the St. John Hospital.—Press.

SOBER KESTREL WROKED.—Louisburg, C. B., Oct. 25A.—The schooner Kestrel, Capt. McDonald, from Cove Bay, bound for Halifax, laden with coal and pickled fish, struck near the lighthouse at the entrance to the harbor. The vessel was driven ashore and sank in mid-channel. Only about three feet of her topmast is out of water and she is dangerous to navigation.

LIGHTNING HAVOC.—A severe local storm of thunder and lightning passed over our town on Sunday afternoon, causing much damage to property. For six or eight days the rain has been falling, and the ground is very wet. The lightning struck the Central Telephone, burning the apparatus and blowing the wires down. An extent that it had to be taken to Amherst for repairs. On the West Bay line 15 telegraph posts were shattered. It also struck the dwelling house of Mr. Paul Wood, entered through the roof, tore the plaster off the walls and passed through the door into the kitchen. The roof was blown off, and several people received shocks more or less serious.

SCIENCE.—A young man named Duncan McQueen, of Little Harbor, committed suicide by hanging on Saturday last, while laboring under religious mania. The body was found hanging on a tree a few hundred feet from the house.—New Glasgow Enterprise.

Rev. J. A. Cahill, Presbyterian clergyman, of Central Ontario, says:—"Last Monday I was invited to give a lecture, which caused a general give out. My doctor failed to help me. A member of my church recommended and asked me to try Dr. BARKER'S LITTLE HARBOR. I did so with very little faith in it, being prejudiced against patent medicines. However, it cured me. I have not had any pain in my side or other symptoms since, and I am satisfied it is a first-class medicine for the disease it is recommended for."

THE CITY OF MONTREAL.—There is considerable work to be done on the steamship City of Montreal, lying in Rodney slip. Her guards are being taken off, and with the bulwarks, replaced by stronger material. This is needed to enable the vessel to withstand the side seas which prevail during her stormy trips. Much of the wood-work is very old and needs replacing through decay. Some beams will have to be replaced and the paddle boxes refitted. The appearance of the vessel will be greatly overhauled so that when she is returned to the route she will be a first-class winter boat.—St. John Telegraph.

Attacked Three Times.

"Having been attacked for the third time with Inflammatory Rheumatism, which kept me in bed six weeks under medical care, without relief, I resolved to try BARKER'S LITTLE HARBOR, and before I had finished the third bottle I was able to work again." George Robb, Garden Hill, Ontario.

Perchance the most interesting of all the city scenes are the markets. In them is found almost every article that is to be had in the city. The chickens, ducks, geese, turkeys, little pigs and calves are offered for sale alive. These seem to be very effectively, but they are not brought in to look with favor on the male. With its great ears flapping in the air, seemingly without any control, the part of the animal, with its spine legs and little hoofs, and with its generally unappearing appearance, it is a very good piece of machinery. It is a very highly painted, much-belostered, and altogether gaudy car.

THE SILENT MAN.—Says the Toronto News: "It will be remembered that about a year ago there appeared an account of the strange resolution and subsequent action of a man named Lee, who lives in the rear of a house on Shaw street. Some eight years ago he came home one evening from his work, bringing his tools, and declared he was through both working and talking. Ever since he has faithfully kept his pledge, the instances when he has broken it being very rare. No special reason was given for his resolve except that he had saved up about a thousand dollars and he concluded that would be sufficient to keep him the rest of his life.

But instead of lying he is fat and vigorous, his long silent walks being enough exercise to keep him in fair health. And as his stock of said cash is said to be getting near the end, it is alleged he has begun to say a few words, and declared his intention of resuming work in the spring.

Whether this is the case or not, there are very few records of men who have taken a stubborn fight against holding communication with the outside world. The old man was industrious and a good worker before he took his vow of dumbness and abstinence from work.

AUSTRALIAN GOLD.—We want in this Dominion a part of the great Australian gold. We have one link completed in getting it, the C. P. R. over our continent. We now require an international connection perfected by fast steamers to Australia and New Zealand. The Australians demand the very articles that the United States and Canada have in the richest profusion. These great colonies under the southern cross are rich in minerals and gold, and can find no worthwhile work for wealthier customers in the world. Look at this shipment of gold made from Australia to San Francisco only two weeks in payment of products purchased from our fortunate cousins.
