what belongs to another and for which we have given no value then we encourage the instinct to become a habit, the habit a sin, and sooner or later the curse of gambling with all its train of sins and excesses fastens its hold upon us. It is, then, the small beginnings we want to avoid. To risk a few nickels or dimes to gain a few more seems so trivial and harmless an amusement that to call it a sin appears absurd, but it is the small beginnings that lead eventually to tremendous restanding. sults and therefore we assert that 'Halifax has done well in closing one of the avenues which lead to the throne of one of the most gigantic evils of

the times. -The theory sustained through the official investigation into the late accident on the I. C. R. at Windsor Junction by which the lives of four men

were lost, i. e. that drunkenness was the se, sends a thrill of horror through the travelling public. What is a man better than a murderer, or what penalty is too severe for him to suffer, who recklessly takes into his keeping the lives of human beings, when he has deliberately paralyzed his senses with strong drink? How a man with any sensibility of the value of a human life can become so criminally reckless,

or how railway authorities can be so utterly indifferent to the public welfare as to employ any but strictly temperate men in the position of engineer passes the comprehension of ordinary mortals. An exchange well says: nary mortals. An exchange well says: Life is of too great importance to tol-erate for one moment the employment of an intemperate man in a position where lives are entrusted to his care. do them at all, and you are apt to do them wrongly. It is doing these them valuable to us. What do we spray for-- have asked that question often and often. Do you do it for fun? It is one of the most disagreeable parts of fruit growing. What did you do it for? Somebody told me that he did it because he thought it was the right thing to do 1 asked him what time he sprayed. He said be sprayed when he had time. Now for what do we spray? The spring of the year comes round. We remark that our crop of apples last year was so spotted that we practi-cally lost our crop, and we lost our prices-the crop was a failure finan-cially. We come to the next Spring what do we spray for, and when? We was the Bordeaux Mixture and Paris Green every time for a series of spray many hours; it is always about the zhow kows what time that will be not know what time that will be tow know what time that will be tow know what time that will be appecial sprays for the special troubles. Your know better than I do when your buds burst. Just at that time Your buds burst. Just at t

ily kept under control with strong to-bacco and soap. I have had no ex-crience with the Black Aphis. I have often controlled the Green Aphis with tobacco water and soap. I use ten pounds of tobacco leaf to the barrel. Kerosene emulsion is very hard on your rubber hose. Where tobacco wa-ter and soap will do, use that in preference to the kerosene emulsion for the purpose of saving the wear and tear of your punip hose.

mist. Q. What is the best kind of nozzle? A. The Vermorel. Q. What kind of pump is consider-ed the best? A. There are several large pumps that are good. In Canada I consider the Spramotor of London and the Aylmer the best. I am using the Spramotor. You know better than I do when your buds burst. Just at that time you put on your first spraying. Why? You have most of the insects here that are troublesome with us. Just as the huds are hursting in the Switz ear of your pump hose. Q. What length of hose do you use? as the buds are bursting in the Sprin the forest tree caterpillar, the ten caterpillar, the bud moth and the ci Q. Did you ever use any other so 25 feet. Q. Did you ever use any other so-ution for spraying besides the Bor-leaux mixture and Paris Green? A. I have used the carbonate of copper solution of which I intend to peak. I have heard favorable reports d. Thus heath?' Smaling of carbo Q. Can you get a pressure of catcipiliar, the bud moth and the c. gar case bearer are coming to life and are moving to the bud to commence feeding. When you spray the first time it must be done carfully. When you spray when the buds are bursting ounds on your force pump? A. I have not got a guage on min. peak. I have heard favorable reports of "Bug Death." Speaking of carbo-nate of copper solution, if you find a year that the spot is going to be bad and the Bordeaux mixture is going to stain the fruit, you can make a mix-ture this way. Take four pounds of sulphate of copper and dissolve it in hot water. Then dissolve five lbs of arbonate of soda in another pail. Then add the carbonate of soda to the copper solution. Do not add it Q. Does the effectiveness of the pray depend upon its fineness. A. Yes. you are placing the poison where th bests will get at it and at a time when they will die from it. There is no time in their history when they are so The Farmer's Workbench. easily killed. And the Bordeaux pre beginning to float in the air from lighting on these buds and starting The farmer of to-day needs to b The farmer of to day needs to comething of a carpenter as well as a tiller of the soil. A workbench is es-sential, and also a set of good tools which need not be costly. The follow Ighting on these buds and starting work. The second spraying is just before the blossom opens. That is about fourteen days afterwards, but it de-pends on the weather. In the par-ticular spraying we pay more aften-tion to the fungus troubles, to the fungi more than to the insects, be-cause if the spores of the fungi light on the young, tender foliage and take root they are crippling the vitality of that tree for the whole season—and that stem is eventually to become the the copper solution. Do not add it all at once or it will boil over. But udd it slowly and stir it. Put them together while they are hot. There is little difference combining them hot or cold. Put it in a barrel and fill it. ample, and yet contains only those es-sential to good and quick work: Hammer, crosscut saw (8 teeth to the inch rip saw (6 teeth to the inch), stee with water, and you will find that will not stain your foliage. If your uit is large you will not run any rip saw (6 teeth to the inch), steel square, chisels ( $\frac{5}{6}, \frac{1}{2}, \frac{3}{4}$  and 1 incb), brace and bits ( $\frac{5}{6}, \frac{1}{2}, \frac{3}{4}$ ), keyhole saw, try-square, pair of dividers. gauge, jack-plane, fore-plane, smooth-plane, draw-knife, hand-axe, oilstone and bevel-square. The entire outfit can be purchased at a hardware store for 10. A well-equipped workshop means many an hour or trip to town saved when preakaces occur. Once the outfit is se-Q. Do you use any lime? that stem is eventually to become the stem of the apple—if that stem is A. No. Q. What effect have you found on the keeping qualities of the fruit by the Bordeaux mixture adhering to the leaves. Will it keep the leaves on the that stem is eventually to become the stem of the apple—if that stem is struck by a spore, there will be no ap-ple. The Paris Green in the mixture also helps to catch any insects that may have escaped the first spraying. Now I come to the third spraying. You can spray any time just before the blossom bursts. We have a pro-vincial law for the protection of bees. It injures the blossoms when sprayeo in full bloom. You can spray to ad' vantage any time when the foliage is dry, and the spray will have done its-duty faithfully and well if you can get it on a few hours before the rain comes. After the blossom is in flower is spen at the head of the pistil in the flower is the only absolutely nalec-part of the plant—the stiles are ready to receive the pollen. If the blue stone touches the pistil it will not re-ceive the pollen for fertilization. That ree longer? A. Yes. It has a wonderful effect n keeping the foliage on the trees. Q. Have you had any experience with the Bud Moth? A. The Bud Moth in the East is the most difficult insect we have to treat. I am sorry to say we have not any I am sorry to say we have not any

Kills the Bugs-Bug Death Increases the Yield -- Improves the Pays Quality. Kills the Bugs. EXPERIMENTAL FARM, Ottawa, had 61 bus. per acre better yield using BUG DEATH. GOVERNMENT FARM, Nappan, N.S., had increased yield using BUG DEATH. Joker's Corner. The bousehold. A DANGEROUS AMUSEMENT. FOR CLEANING WOOLENS AND And Charlenge and the sense of LINENS. When one seeks amusement ot the

A good story is told by the Buffalo Courier of how a nervous clergyman almost took that fata "one step" which separates the sublime from the

a brush and board and soap and cold or lukewarm water, according to the nature of the stains. When the blank-tes have soaked enough, begin wash-ing in the strong suds, sopping and squeezing and lifting and dropping un-til the dirt is removed. A strong man or woman is required to do this work thoroughly. When the blanket looks clean, put into a second tub contain-ing light suds and borax or ammonia in the service. ceremonial of the Paget-Whitney wed-ding was to read the service. Either he had marked the wrong place in the prayer-book, or the sing-ing disconcerted him; at any rate the wedding party was amazed to hear his rich, full voice utter the words, "I am the Resurrection and the Life." "Heavens and earth!" ejaculated Bishop Potter in a whisper behind him. The rector at once awoke to the fact. ing light suds and borax or ammonia in the same proportions as before, tak-ing special pains to have the water of the same temperature as that in which the blankets have been washed. Re-peat the sousing and pressing in the second suds. Then rinse in clear wa-ter of the same temperature. In wring-ing the blankets fold and press loose-ly through the wringer. On no ac-count twist or wring spirally. Hang on a firm line in the shade, where dust or the direct rays of the sun cannot reach them, using an abun-dance of clothespins to hold them in place.

The rector at once awoke to the fact that he was reading the burial service, and after one breathless second proceeded with the proper ritual.

NOT TOO LIFELIKE.

In bleaching linen wring out of clean In bleaching linen wring out of clear water and spread on the clean grass where the sun can strike it. As soon as the article is dry dampen again, us-ing for this purpose an ordinary flow-er sprinkler. If there is no danger from thieves, leave out over night for the dew. A good, brisk shower is al-so an advantage if the grass is thick enough to prevent the mud coming through or spattering. "You just let me have that photorou just let me have that photo-graph for two weeks, and I'll send you a life-size portrait of Mrs. Herlihy that'll be a really speaking likeness, said the agent for a new 'crayon pro-cess' in his most persuasive tone. An expression strongly akin to ap-prehension appeared in Mr. Herlihy's dim blue eyes, and he nessed his hand lim blue eves, and he passed his hand twice across his mouth with a ner

'Well, now, Oi don't know as that'd TO REMOVE STAINS. e annyways nicessary," he whispered. 'She was wid me in this life thirrty. If there are stains on linen remov oive years, and that gives toime for a good dale of talkin'. Oi'll jist have a picture that shows her looks, widbefore bleaching. For fruit stains rub with butter, then scald, holding the linen over a bowl and pouring the ut anny mechanical controivance to eprojuce her vice."-Youth's Com-

APPRECIATED HIMSELF.

A little boy while playing near the berpentine fell into the water. An Ir-sh laborer who was passing at the ime courageously jumped the vater, clothes and all, and rescued the-

oy, says Spare Moments. A lady who had observed the brave deed went up to Pat, and, shaking his hand, said: "I feel it an honor, my brave man, to shake hands with you. Many a

With butter, then scald, holding the linen over a bowl and pouring the boiling water through it. For wine stains, spread salt over them while damp, then rinse with boiling water in which a tablespoonful of ammonia has been dissolved and lay in the sun. Tea stains, cold water and soap; cof-ice stains boiling water poured through; blood stains, dip in kerosene, then wash in lukewarm suds; machine oil or vaseline, soap and cold water; grass stains, alcohol or molasses; red iron rust, a thick paste made of lemon or pie plant juice, salt and starch, then expose to the sun. If extremely obsti-nate moisten with cold water, spread "salts of lemon," which is another name for powdered oxalic acid, over it in a thin layer, taking care that none spreads elsewhere on the cloth. As soon as dissolved, and it must be carefully watched, rimse thoroughly in boiling water and spread in the hot sun. As oxalic acid is very poisonous, it should be plainly labelled and kept out of the reach of children. It will remove fruit stains leather or ink orse man than you has been pre ed at court. "Faith, your roight, mum," replied Pat as he proceeded to wring the wa-ter out of his coat. "Th' last toime Oi was presinted at court Oi only got one month, while me mate got two, egorra! out of the reach of children. It will nove fruit stains, leather or ink stains, but should only be used in ob-durate cases, and then thoroughly rinsed out, as it eats the fabric. "GRANDMA STOWE." At Hartford, Conn., where the aged Larviet Boscher Stowe lives, they tell Harriet Beecher Stowe lives, they tell a good story, which the Boston Com-IMPORTANCE OF GOOD TABLE MANNERS. ealth reports, of her proa neighbor found him swinging rath-If I were asked the most important of all social rules, I would answer, "the teaching of good table manners," says a writer in the Chicago Record Herald. We find ourselves ready to ex-cuse a multitude of sins in a man or woman who knows how to eat well, and nothing more quickly stamps the well bred man or woman. The thought comes to me forcibly at this time be-cause I happened to sit at a table in one of the cafes one day last week, and at the table were seated two other women. The one little woman was quiet, modesi, attired well, but so plainly that no thought of style clung to her. The other wore the latest, tailor-made, a new Easter hat, and diamonds were on her hands and in her ears. Her face was refined. The former ate an inexpensive luncheon so If I were asked the most importan vigorously on another er too vigorously on another neigh-bor's front gate, and warned him that Mr. Smith might not like it. Where-upon the independent young gentle-man remarked: "I don't care for Mr. Smith, or his ox, or his ass, or any-, thing that is his." "Do you know who, wrote those words?" asked the friend, deeply, shocked. "Oh," was the nonchalant reply, "I d'no-Grandma Stowe, I sup-pose!" SHE DREW THE LINE. "By the way," said the doctor, turnsuddenly from a small patient's lide to the child's father and abher ears. Her face was refined. The former ate an inexpensive luncheon so daintily that the food she had order-ed looked appetizing to me, but the other killed my appetite by eating a more expensive luncheon as fast as she could possibly chew it, by smacking her lips every time her deeth were brought together and by drinking loud-ly from her spoon. She was dressed more like the well bred woman than the other, but not carrying out the scheme inaugurated by her tailor, miluptly changing the subject of conver-tation, "do you happen to have a city lirectory in the house?" "No," was the reply, "but I have a ate's gazetteer that might answer the ame purpose." "I won't take it!-I won't take it!" shrieked the little patient unexpected-y. "I've had turpentine and quinine and a lot of horrid capsules, but you don't get any state's gazetteer down scheme inaugurated by her tailor, mil-iner and jeweller.

VINES.

anywhere.

A. The Bud Moth: A. The Bud Moth: t am sorry to say we have not any specific remedy for that insect. By systematic spraying we are reducing it. The insect in the spring is about one-sixteenth or thirty-second part of an inch in size. It is a small, brown worm and hard to see. It rolls the leaf up and is out of the reach of poison. It runs backward just as fast as it runs ahead. When it is full grown it is three-quarters of an inch in kurth. It goes into the moth sys-tem about the 22nd of June. I have not its life history exactly. About August the young insect is hatched; it goes into hiding in a piece of leaf rolled up in a case and it usually winters attached to the tree by a sin-grow rapidly. stone touches the pistil it will not re-ceive the pollen for fertilization. That is the injury that will be done by the Bordeaux mixture when sprayed in full bloom. That question does not arise in Ontario. The Bee Keepers Associa-tion, foreseeing this, had a clause put in our statute making it illegal to spray in full bloom. All the early sprayings are of im-portance—but the third spraying, if such a thing is possible, is the most important of all. Spray just as soon as the blossoms fall, just as soon as the petals fall. Spray when the calyx of the young apple is wide open, and you get a small portion of the Paris Green in the calyx.

ow rapidly. Q. Are the Bud Moth and Leaf ller the same insect? They are closely allied but differ-

Q. Is it the Eye Spotted Moth you

You get a small portion of the rans Green in the calys. The calyx begins to close after the blossom is a few days old, the codling moth lays its egg on the blossom like a fish scale. It has taken years and

Q. Is it the Eye Spotted Moth you are speaking of? A. Yes. If top grafting is being done and the Bud Moth is around it will be set apart for meeting the neces-sary expenses in keeping the Temple of Peace in repairs. Thave found that the best way to avoid that is to cover up the buds with grafting wax. It gives the buds a hance to live. Q. If Bordeaux mixture was put on the bud would that kill the Bud Moth a fish scale. It has taken years and years for the pomologists to discover this. It is about the color of the white of an egg, transparent and thin like a fish scale. The egg hatches and the young codling moth crawls from the egg to the calyx lobes and in be-tween the leaves. Its first feed should be Paris Green. That is why it is so important to have the third spraying well and faithfully done-because it the spraying is done after the lobes are closed it will have no effect at all. I assume the brood you find in the A. It will get some of them. That s why we are so particular about the

you use the bluestone. Q. If you had no leaves you would not need to use the lime?

Q. How strong would you make the

A. One pound to 25 gallons of wa-

the spraying is done after the lobes are closed it will have no effect at all. I assume the brood you find in the fall of the year is the fall brood not the spring brood. Though you can de stroy the spring brood it is almost im possible to catch the fall broods. In the Niagara district they have one continu-uous brood from spring to fall, and it has beed one of the greatest sources of loss, more than any other one insect with which they have to deal. Two years ago I saw where a man had been persistently spraying, and that he had not 30 per cent. of his fruit touch ed with the codding moth. They are us trying all sorts of devices. Bandaging is the tree and dipping the bandages in boiling water occasionally and put ting them on again. They are also trying to get whole Counties to do the assertion of the codding moth we need not be afraid of the we second. That has been our experience At one point to 25 games of water. Q. Would you recommend a solution in which the tops of the trees could be placed before planting, in a tank of liquid—what would you use? A. A person could viry successfully use a kerosene solution—a kerosene emul-sion—but you should be careful not to let it get on the roots. Your Gravenstein is a German ap-ple, and is free from spot if you give it a chance. The Russian apples are free from spot, but they are all of poor quality. The Duchess of Olden-burgh, known here as the New Bruns-wicker, is one of the best Russian ap-ples.

second. That has been our experience so far. I have been led to believe that your early spravings are done in this coun-try, but here comes the rub. Up to the time that the apple is formed you have kept your trees free of fungi and you have done everything you can to
