FRANCES JESSOME WINS FIRST HONOR IN ORATORICAL CONTEST

Edmundston High School pupils heard Friday night. Prizes presented by local Chapter of I. O. O. E. Jean-M. Gagne and Della McFarlane first second and third prizes.

"EDUCATION" IS WINNER'S SUBJECT

An oratorical contest was held at the high school here Friday evening under the auspices of Barrington Memorial Chapter, I. O. O. E., when prizes donated by the chapter were awarded to Miss Frances Jessome, Jean M. Gagne and Della McFarlane. ... Education is the subject of the contest. ... The committee in charge of this contest, for the I. O. O. E., was composed of the following ladies: Mrs. Clarke Campbell convener; Mrs. D. A. Macdavid, Mrs. D. R. Bishop and Mrs. R. V. Macabe, Regency of Barrington Memorial Chapter, who presented the prizes to the winners. ... The contest was held in the near future, when the pupils will be required to speak in French. ... Text of Miss Jessome's Oratorical Education. (By Frances Jessome) Mr. Chairman, Ladies and gentlemen, Ever since man appeared upon the earth, he has struggled to overcome his environment, and the progress from savagery to the present state of civilization is the result of this struggle. Education, in its broadest meaning of the term, means the development of the powers of man; in the restricted sense in which the term is ordinarily used, it means the training of children, youth and adults in educational institutions. ... Education must begin at a very early age, parents should be the teachers. Children must have good foundations. ... In High Schools some pupils find their work more difficult than in previous years. This information which seems to them dull, and uninteresting might all have been given to them, before this time. They might have acquired, during their younger years, all that is drudgery now. Nature never intended that her children should be put within brick walls, as if they were prisoners, when they go to school. It is all wrong. Work should seem like play, monotony in school kills interest. Games should be introduced, games that develop their minds as well as their bodies. The best toy that any child can have is a typewriter. No better means can be furnished to develop his mind, and to aid the child in reading, spelling, to punctuate and to memorize. If he learns to operate this machine, he will develop his hands so well that he will not have the same difficulty in playing a piano, or a stringed instrument as he would if he came to it with untrained muscles. He will teach himself
