EAD OFFICE: Gerner Church and Court Streets, Torents,

of the control of the

WESTERN CANNERIES' AFFAIRS.

The Western Canneries still lives, but it appears to be involved in some serio-comic complications. Mr. F. H. Malcolm, who promoted the concern four years ago, and who was ousted from its management after taking a rest, has arisen again with renewed energy and a fairly good stock of conversational gunpowder. This he is using right and left somewhat extravagantly. Mr. Malcolm's primary object at present is to assume the managing directorship of the company and to send the man holding that office on a hunt for a new job. For this purpose he is gathering powers of attorney, which, it is hoped, will prove a doughty weapon in the fight for control.

For consummate cheek, Mr. Malcolm's letter to the manager of a chartered bank at Winnipeg eclipses previous records. Stating that he had received a large number of powers of attorney, representing what was believed to be a majority in value of the company's shareholders, he added: "I beg to notify you that from the date of the receipt of this letter (duly registered) not to pay any cheques or other negotiable documents on account of the company mentioned, unless bearing my signature as the duly appointed legal attorney and representative of the company, until you are advised by me in writing of the new directors authorized to sign the company's cheques."

The astonishment of the bank manager may well be imagined. The bank replied: "We do not know what authority you have in so directing us. In fact, we consider it a piece of presumption on your part to make such a request. We would not presume to act on your orders, or on any other unauthorized instructions.'

This well-deserved answer, scratching as it did a painful wound of the company promoter, he says in a

circular letter to the shareholders that "The sentiments expressed in this reply will be ample confirmation of what I told you about some of the bank managers. If you rely on advice of the officers of some of the banks in this matter you will be led most woefully astray." The fact is that Mr. Malcolm would himself be running a bank in Canada if The Monetary Times and others had not pricked one of his financial bubbles in the shape of a proposed National Bank of Canada, capitalized at \$10,000,ooo, and one of the wildest schemes imaginable. The Western Canneries promoter quickly learned that, although investors were foolish enough to place their money in the stock of a canning company which predicted dividends of two hundred per cent. (without figuring the estimated cost of raw material), the public and the reputable press refused to allow Malcolm to pass out of canning spheres, wherein he has figured for many years. It is not out of place to recall here some of his enterprises.

New Zealand Canneries.— Mr. Malcolm

False Creek Canneries.-Mr. Malcolm says

this "was operated at a loss."

Table Bay Canneries.—Mr. Malcolm says "the profits were never published."

Central Canada Chamber of Mines .- Mr. Malcolm says "the Chamber was not established for profit." To which we add, it ceased operations, for some reason, at a time when such an institution, properly managed, would have been of value to the country.

Medicine Hat Sewer Pipe Company .- This company was advertised in November, 1905. Mr. Malcolm was secretary, and talked of 1,700 per cent, per annum dividends. In a circular he said "it would be unwise" to print the figures for public comment. This company died.

Canadian Distilleries, Limited.-Mr. F. H. Malcolm was one of the organizers.

Colonial Bank of Canada.-Mr. Malcolm was secretary. The bank's charter has expired.

Western Canneries, Limited .- Mr. Malcolm said it would do a business of \$200,000,000 per annum, and that it 'should be clear' to us that "the company can pay without difficulty a modest ten per cent. (10%) dividend, to say nothing of the two hundred per cent (200%) additional."

National Bank of Canada.—This was a \$10,000,000 bank promoted by the optimistic Mr. Malcolm. It expired suddenly.

Canadian Banking Corporation, Limited. This was another promotion which the versatile and optimistic Mr. Malcolm proposed to launch in London; England.

Mr. C. A. Flower is the managing director of the Central Canada Meat Packing Company, Limited, otherwise Malcolm's Western Canneries, Limited. The original promoter says that Flower was recently in Medicine Hat trying to sell the company's factory. In his circular letter, Malcolm asks: "What do you think of this?" To which the natural reply is that the sale of the factory would be a good thing. Indeed, the sale of all the company's assets, the division of the financial result among the shareholders and the winding up of the company appears to be the only sane course left to pursue. Mr. Malcolm charges Mr. Flower with some terrible offences. For instance, he is "devoting most of his time to joy rides in his new automobile in the busy hours of the day, and even charging the company one dollar a trip for taking mail in his automobile to the railroad station." In discussing these matters Malcolm talks of "commercial morality." In this connection The Monetary Times would remind him that an explanation of how \$72,000 was expended by him and his colleagues in organizing the Western Canneries, is long overdue.

Later in the circular letter he waxes indignant at "the whole matter," which is "simply outrageous." Then follows an oratorical bid for a prominent place in a stained glass window. "It is because I am not susceptible to bribery and will not submit to blackmail, or tolerate grafting, and have absolutely clean hands myself, that I am able to tell you these facts without fear or favor." Which leads one to inquire what kind of soap was used. Ironical humor is observable in his remark that he "could say much more, for there are numerous other facts," some of which he "might have some little difficulty in proving legally to the satisfaction of a court of law." The most refreshing suggestion is that he will get the books and vouchers of the company investigated and audited by an absolutely reliable and independent firm. We venture to suggest that such an audit, conducted by chartered accountants of unquestionable integrity, would reveal a most interesting financial history.

The shareholders cannot indulge in strong hopes that they will ever receive a dividend. The company was organized in 1906. Up to date it has not marketed even one can of goods. Seventy-two thousand dollars at least have been expended in organization. Squabbling among directorial factions has wasted time and money. The Western Canneries should be blotted out of existence. Why do the shareholders stand by silently watching the dismemberment of their company's carcase?

NORTH AND SOUTH.

The development of trade between North and South America should be affected beneficially by the conclusions of the Pan-American Conference in session at Buenos Ayres. As one writer points out, a subject of much importance discussed at the Conference is that of the Pan-American Railway. The advantage of such a railway does the coal lands taking several million dollars' worth of

not exist so much in its providing a through system as it does in tying all of the American Republics together with railroad connections. Akin to this subject is that of the establishment of a more rapid mail, express and passenger steamship service between the American Republics. This topic has excited a great deal of discussion at Buenos Ayres, and if the Conference is able to make some thoroughly practical suggestions, they will be welcomed by all persons who wish to bring all Pan-America into close touch with its individual parts, and who hope to see trade exchange in vast volume from the Canadian line south to the Straits of Magellan.

It is just as necessary to have fast mail, express and passenger steamships on the high seas to take care of mails, passengers and freight requiring quick delivery as it is to have fast mail, express and passenger railroad trains upon land. It is not a matter of "subsidy," but simply a question of paying a satisfactory wage for work well done. In this connection it is gratifying to observe that the present steamship service is being vastly improved. The lines running out of New York to Rio de Janeiro and Buenos Ayres are putting on new boats, which are faster and more commodious than those formerly in use, while the companies operating upon the Caribbean, Gulf of Mexico and on the west coast of South America are making similar improvements. The consideration of measures which will lead to uniformity among the American Republics in consular documents and the technical requirements of commerce regulations, and also in census and commercial statistics, ought to result in some practical recommendations which will have a good effect upon Pan-American trade

INDIVIDUALLY AND COLLECTIVELY.

Whether or not Messrs. Mackenzie and Mann are doing all those things which the daily Press chronicles, they appear to be changing the physical and financial geography of the Dominion. One is the shrewd financier, the other is the practical railroad and business man. The two make a keen combination, when the operation of railroads, steamships and their allied industries are concerned. With the Canadian Northern as good groundwork, small and sometimes hitherto unprofitable roads have been coralled into the system. A bond guarantee from British Columbia helped a decision to lay steel in the Pacific coast province and within a few years, we shall have another transcontinental line. Steamships pile freight upon cars, especially when the vessels' captains and the locomotive engineers are being paid from the same purse. This spring the Canadian Northern put two vessels on the Atlantic. They were dubbed "secondhand" by some, having previously done service on the Mediterranean. But it is often useful to make a test upon the old sea dog. Having linked up with Great Britain by water and with the United States by steel, the programme now appears to call for the acquisition of properties that will make industries and give business to the railroad and the steamship.

Mr. Mackenzie recently came back from London, having raised a sum of money sufficient to pay for the construction of the company's new lines. At the same time, foreign capital was got for himself and others, although ultimately all meant business for the Canadian Northern. The Brazeau Collieries, for instance, financed by German money, will probably sell its entire coal output to the railroad. The Mackenzie-Mann fingers are in several pies, some fish and others less palatable, but equally as remunerative, such as coal, iron and land. They are reported to be arranging for the purchase of a fish company which handles practically all the halibut caught on the coast. They may also buy two deep-sea fishing companies, having already obtained a whaling company's interests.

The Dunsmuir Collieries of British Columbia went over to the Mackenzie-Mann combination, the owner of

Canadian Northern bonds in part payment. The other day, a despatch stated that they had closed an option for the purchase of more than 4,000 acres of iron land at Grand Rapids, on Mattagami. The United States Steel Corporation was understood to be interested in this new field on the coastal plain of Hudson Bay, but the Canadians managed to obtain the iron. A large land company, recently incorporated, bore the imprint of Mackenzie-Mann enterprise, while a few financier of few words became a director of the Hudson's Bay Company. The Canadian Power and Paper Company secured a charter with authority to manufacture paper and to develop powers in connection therewith. The capital is \$10,000,000, and the provisional directors are the Mackenzie-Mann legal staff. These notes have been seen before, individually. Collectively, they make an interesting exhibit.

EDITORIAL NOTES.

"Tomatoes excited" is the market report of a contemporary. This must be a case of vegetable animation.

Winnipeg is discussing municipal fire insurance. This comes as a surprise, when it was generally thought that the Western metropolis had passed its elementary business examinations.

If, as reported, the Grand Trunk Railway officials denied the State Railroad Commission admission to the wreck investigation, they probably made an ethical error. The fullest possible publicity is the best asset of a corporation. The fact that an atmosphere of secrecy was created has led to undesirable rumors, insinuations and stories of things which never occurred.

* * * *

New York City, so it is said, is to be treated to another series of police scandal exposures. This leads one to thank the lucky stars that respect for the law in Canada is well defined, and that the legal machinery is clogged by little scandalous sand. A so-called civilized nation or city may easily become one of savages, simply by refusing to recognize the law and by polluting its sources with bribery. Civilization may be judged by the respect shown for life and property. Anything that tends to strengthen the law and its observation is good. The city of Chicago stands prominent as a community which has thrown regard to the four winds. Corrupt police and magistrates find their way into the disreputable districts and centres of crime. It is asserted that the bosses of these sections dictate as to which magistrates shall be appointed to mete justice in particular neighborhoods. In return, several thousand votes are handed into the right quarters. In other words, the franchise is used not only to protect vice, but to poison protection. Politics and the police make a bad mixture. The law must be kept immune from such influences.

Within the next few years it is likely that considerable capital will be employed in the development of our Pacific coast fisheries. Sir George Doughty is about to return to England after an inspection of the sea wealth along the British Columbia's edge. He is an expert in fishing matters, and will convey a favorable report to influential British investors, who will be advised to establish a Canadian fishing industry in British Columbia, backed by British capital. He regrets that at the present time the fisheries, which extend from Vancouver north to Stewart, are exploited almost exclusively by Americans and Japanese. As a large amount of money will be required to develop the scheme proposed by Sir George, an application may be made to the Canadian Government for assistance in the form of a subsidy. Undoubtedly there are great possibilities in Canada's fishing grounds. They await only capital and enterprise.

It is good to be reminded now and again that dollars and cents are not the only ideal and that extensiveness of area and wealth of natural resources do not necessarily make a country great. During the past few weeks, many have given sound advice along these lines. The Bishop of London, for instance, the other day expressed his conviction that Canada would be a nation of one hundred million people, the greatest nation of the world, but it would not be "unless in family life, in business life, in political life and municipal life you have a delicate sense of honor, and your word is as good as your bond." Four things he emphasized as essential secrets of success: (1) Absolute straightness and sense of honor; (2) deep-seated humility—no side, no frills, and no airs; (3) true and genuine sympathy, and (4) quiet, humble, unshaken faith. These applied alike to individuals and the nation, and these he left with Canadians.

A movement is afoot to reduce cable charges generally. This may be done by regulation of rates, although the companies cannot be expected to go much further than they have in this matter, or by the purchase of cable corporations by governments interested. Cheap cable charges, especially for the benefit of the Press, would prove one of the most valuable links ever welded. We cannot learn much of our brothers and cousins in newspaper despatches at ten cents a word. If we wait for a letter, new achievements overshadow. At present, messages over the cable wires are chiefly dictated by politics and economy. As much politics as all wish, but a great deal less of stinginess is desirable. If the various governments were to purchase the world's cable service, ruthlessly cut charges and operate at a substantial loss even, a large gain in other ways would result. The globe would become transformed from the football to the orange size.

The other day, James J. Hill celebrated a birthday. Seventy-two years ago he changed the vital statistics of Rockwood, about six miles from Guelph, Ontario. Later at St. Paul, Minnesota, he penned away as a shipping clerk. Seeing that the railroad would outstrip the inland steamboat and change American geography, he started in business as a railroad and shipping agent. Establishing a steamboat service on the Red River, then the most important trade highway to the Northwest wilderness, he entered into competition with the Hudson Bay Company, which later combined forces with him. Early in 1874, Donald A. Smith, now Lord Strathcona, then living at Montreal as the chief commissioner in America of the Hudson Bay Company, conceived the idea of securing control of the St. Paul and Pacific Railroad, a disconnected system of about five hundred miles. The road was under a receivership. Norman W. Kittson, another Hudson Bay man, and Donald Smith, picked lames I. Hill as the man to secure control of the road. After extraordinary energy, the property was purchased by the St. Paul, Minneapolis and Manitoba Railroad Company, which had been formed by a syndicate of four for the purpose. The profits of the bond transaction amounted to \$3,500,000 for each member of the syndicate. But these were on paper. Hill had to put the road upon a paying basis. In two years, it was not only paying the interest on its bond issue, but commenced paying dividends on its stock. One of his assistants at that period says that he was baggageman, conductor, engineer, trackwalker, fireman, passenger agent, freight agent, traffic manager and everything else on the road at different times. His has been an extraordinary career of success. Canada is proud to have cradled him. Interviewed on his seventy-second birthday last week, he referred to the recent talk of conserving water, conserving land, conserving coal and conserving iron. "It is too bad," added, "that someone did not say a word about con-serving commonsense." Which is a typical Hillism.

AUGUST BANK STATEMENT

Indicates Withdrawal of Funds from Abroad for Home Purposes -- Easy Money Market

1000	July, 1910.	Aug., 1910.	Inc., Dec.	inc., Dec.	
Aug., 1909.	\$251,638,522	\$256,613,172	+ 1.9	+12.3	
Deposits on demand	538,384,371	545,357,452	+ 1.2	+15.3

Current loans in Canada	40,267,390	38,609,568	- 4.1	+25.9	
Current loans elsewhere	60,081,256	60,427,996	+ 0.5	+ 6.6	
Call loans in Canada	102,436,037	100,447,288	- 1.9	-16.7	
Call loans elsewhere	80,929,290	81,321,439	+ 0.4	+13.1	
Circulation /1,847,032	00,020,200				

The above summarize the salient points of the August per cent. An outstanding feature of the current statement is that, generally speaking, it shows practically no change when compared with the previous month's accounts the largest change is one of 4.1 per cent. in current loan; elsewhere than in Canada. In other words, the banking situation in Canada during July and August was undiscurbed by any incidents affecting special accounts. The following table shows the course of the loaning account during the past thirteen months:

	Current	Call
Loans	in Canada.	in Canada.
	\$543,154,663	\$56,680,172
September	560,206,621	56,124,620
October	579,837,956	56,995.065
November	590,291,944	57,875,677
December	592,741,812	63,554,222
1010—January	590,984,344	63,945,539
February	602,454,539	61,855,519
March	624,550,051	59,945,735
April :./	638,247,238	59,621,328
May	643,246,518	58,159,050
June/		61,598,958
July		60,081,256
August	657,813,770	60,427,996

Credit in Canada has been extended during the period under review by 21.1 per cent. Only once during the thirteen months did domestic current loans show a decrease. Call loans increased during the same period by 6 per cent. No great changes occurred in the size of the amount, the lowest figure being \$50,000,000 and the highest \$60,000,000 Taking the figures for the past four years, a good idea is obtained as to how general credit has been extended.

Loans.		CONTRACTOR OF THE PERSON OF TH										Aug., '07
Current in Canada	1			1				*				\$580,075,932
Current elsewhere	5171170	1.6.3	2000	1/1824								25,033,806
Call in Canada	1.	N										47,765,531
Call elsewhere	. 1	ordina								h		62,088,232

In August, 1908, the current loans in Canada amounted to approximately \$518,000,000. Last month they had increased by more than \$100,000,000, the total then being \$657,000,000. Call loans in Canada also gained during the four years, the figures in 1907 being \$47,000,000 and last month \$60,000,000. Current loans out of Canada made a comparatively small increase from \$25,000,000 to \$38,000,000, while call loans elsewhere than in the Dominion almost doubled from 62 millions to 100 millions.

The deposits accounts have shown favorable gains during the last year. Those on demand increased 12 per cent.

A merger of fur houses has been arranged. Messrs. Holt, Renfrew and Company, of Quebec, have acquired the Dunlop Cooke Company, Limited, of Montreal, Boston and Winnipeg. The turnover of the two concerns amounts to and those after notice 15 per cent.

and those after notice 15 per cent.	
On demand	After notice
1909—August \$228,397,679	\$472,591,818

In August, 1909, the demand deposits totalled about \$228,000,000; last month they had reached \$256,000,000. In

August	On demand	After notice	Total
1906	. \$168,285,964	\$385,027,505	\$553,313,409
1007	. 160,459,470	425,727,356	586,186,826
1008	. 175,947,237	407,481,904	583,429,141
1000	. 228,397,679	472,591,818	700,989,497
1910	. 256,613,172	545,357,452	801,970,624

Total deposits were enlarged by 43 per cent., increasing from \$553,000,000 to almost \$802,000,000. after notice, which are usually understood to represent sav-ings, grew from 385 millions to 545 millions, an increase of 42 per cent. Demand deposits in 1906 total 168 millions and this year 256 millions, a gain of 52 per cent.

The most heartsome feature of the August bank statement is the withdrawal of money from abroad for employ-This is seen in the reduction of current and ment at home. call loans elsewhere than in the Dominion and the increase of credit in Canada. Circulation of bank and Dominion notes was also increased by \$2,500,000, while at the same time the reserves and assets were strengthened.

While the comparatively low rate for call loans will probably prove a favorable factor in investment and business spheres, on the other hand, the easiness in the call money market may perhaps be partly attributed to the fact that the Western Canadian crop will not call for such heavy financing by the banks as it has in good harvest years. Nearly all the banks in Montreal this week notified brokers of a reduction of call money rates to 5 per cent. One bank is loaning new money at that figure, but most of the others are quoting a flat rate of 5 per cent. for both old and new money. The view is evidently taken that funds can be more profitably employed than on call at a lower than the existing rate. The August bank statement altogether shows a Few objections would be heard sound banking position.

Holt, Renfrew and Company, of Quebec, have acquired the Dunlop Cooke Company, Limited, of Montreal, Boston and Winnipeg. The turnover of the two concerns amounts to approximately \$2,000,000 a year. The new company will be known as the Holt, Renfrew Company, Limited. The arrows are the company of the Dunlop rangements practically mean the absorption of the Dunlop Cooke Company by the Toronto and Quebec concerns although the former company will enter the management.

The merger will have warehouses in Montreal, Quebec, onto, Winnipeg, Halifax, St. John and Boston. In Win-Toronto, Winnipeg, Halifax, St. John and Boston. In Winnipeg the merger takes over the business of W. J. Hammond. the largest fur house in the west, and in Montreal the new warehouse of the Dunlop Cooke Company is now the property of the merger company.

The negotiations have been conducted by officers of the two companies, and it is understood that there will be no public issue of stock.

WESTERN CANADA CONDITIONS.

Good Threshing Weather - Grain Exchange Elects Officers-In the Wheat Markets,

Monetary Times Office,
Winnipeg, September 20.
The crop actually threshed is better than anticipated. Trade has resumed some of the buoyancy characteristic of last June, under the stimulation of an ideal seeding season, and the prospect of more expenditure of money in the West upon permanent improvements, such as railroads. This expenditure is proceeding, but it is unlikely that it will out-

strip the increasing productive resources.

A feature of the Canadian Pacific Railroad statement is the record of land sales for the year ended June 30th last. A few weeks ago, the Wall Street Journal estimated the probable return for the year from land sales at \$6,650,000, whereas the actual sales amount to over \$14,000,000 sum includes the amounts realized by the sale of the irrigated land of Southern Alberta, but aside from this, the sale of ordinary prairie land has been of more than ordinary

volume. The average price obtained for this prairie land, was over \$12 per acre, which shows that an advance in price does not materially contract the sales.

An interesting visitor in Winnipeg last week was Lord Clinton, who has been in the west for several weeks, having travelled as far as Stewart, the new mining town in northern Lord Clinton is a heavy investor in many British Columbia. parts of the world, and it was for the purpose of examining the western field that he came to Canada. He stated that he had made investments at several points in western Can-ada and British Columbia, and that what Canada needed, was not more money, but more men. He said, "You are inclined to overestimate the value to your country of the investments of men like myself, most of whom buy only for speculative increase. I am inclined to think also that you are getting over-particular about the class of men who come from the Old Country. You are still a young land and there is room for all. I believe that the second generation in Canada would be of such, that you would be much the gainers in allowing the greatest freedom in immigration from the mother land at the present time. The West has exceeded my expectations, as one keenly interested in the welfare of Canada,

"What struck me most was the optimism of the people, said Lord Clinton. "Every man I met believed that his town and his part of the country was not only the best, but that it would remain the best. Every man has a complete confidence in his own future. That is the spirit that is

making Western Canada what it is, a spirit that makes the town of to-day, the city of to-morrow."

Real Estate Activity.

The real estate situation in Winnipeg, at the present time, is good and a marked activity is noticeable. Last week the Provincial Government purchased 500 acres, just outside the city limits, in the parish of St. Vital, for \$175,000, which is spoken of as a new site for the Agricultural College. On account of this sale, it is estimated, that fully 2,500 acres in the vicinity have been purchased or is held under option.

Mr. I. S. Evans, secretary of the Real Estate Exchange.

Mr. J. S. Evans, secretary of the Real Estate Exchange, states that "A feature of the present real estate situation in Winnipeg is the absence of the speculator. The people who hold property in the city are people who are prepared to continue to hold it. Values are not being impaired, owing to the fact that properties are being thrown on the market. It matters little to the holders of Winnipeg realty at the present time, whether the market is active or quiet, since they are not anxious to sell. There are few people who are looking for quick turnovers and for rapid increases in value. Everything is firmly held with no disposition to do anything else."

Mr. Gustav P. Eisenschimi was in Winnipeg, last week, as a representative of the Austrian Government and associated boards of trade of Austria. He will make an official report to his government on the immigration possibilities for Austrians settling in the Canadian West, and on the openings for Austrian imports, and the export of Canadian made goods to Austria. Mr. Eisenschimi had letters of introduction to all the provincial premiers of Canada and to the leading bankers, and has been commissioned by the banking interests of Vienna, of which he is a prominent figure, to investigate and report upon investments of large sums of Austrian capital in Canadian securities. He has a In the early part of the week, markets were dull and erratic with no export enquiry, and light local demand, while cial?—Vancouver World.

the bears were active and aggressive. The general bearishness of the situation, which has been apparent for several weeks past, asserted itself, and prices had a sharp break, October wheat dropping 2½c. and selling under the dollar mark, while cash wheat declined 2½c. for No. 1 Northern and 2½c. for Nos. 2 and 3. Later on in the week our market reacted on higher cables and strength in American markets, together with reported shortages in France and Russia. Demand for cash wheat improved, especially for Nos. 1 and 2 Northern, to fill boat space. Export bids were in line, and much trading took place in October wheat around ooc.

The weather has been favorable for threshing, and receipts show an increased volume. In some sections, threshing returns are better than expected, but there are some complaints of damage to quality as the result of fains.

World's Situation Still Bearish.

The world's situation generally, continues bearish, the outstanding feature of the week being the world's shipments, which were the largest in the history of the trade. Of the total of 17,656,000 bushels shipped, no less than 12,000,000 bushels were contributed by Russia and the Danubian countries. These shipments went largely to the continent, this accounting for the steadiness of the British market, and our own, in face of so large a movement. The European visible supply increased by 12 million bushels, totalling 85,on passage showed an increase of 8,000,000 bushels, and the visible supply for Canada and the United States increased 1,369,000 for the week, and 23,044,000 bushels over the corresponding week of last year. The chief bullish factors in the situation were the estimate of total Russian production of wheat as 150,000,000 bushels short of last year, and confirmation of French shortage as 90.000,000 bushels. European markets are disposed to take the shortage as serand in the end it is expected to have its effect on supplies.

Foreign Crop News Favorable.

Foreign Crop News Favorable.

Foreign crop news is generally favorable. In the United Kingdom and Germany, conditions have improved, but France shows no improvement. In Russia conditions are unchanged, supplies are large and stocks increasing. In Australia and India the situation is favorable. In the Argentine, wheat is weak with a poor demand. Arrivals from the large are large and stocks increasing. In interior are smaller, with quality unsatisfactory, but the crop outlook is favorable. While grain is beginning to move more freely in our western land, it is probable that the wheat producer of the west this year, will be a reluctant seller if prices are below the dollar mark. In the meantime offerings are fairly liberal, and with continued good weather and moderate export inquiry, there does not seem to be anything in the situation or possibilities to warrant any permanent improvement.

Winnipeg Crain Exchange.

The second annual meeting of the Winnipeg Grain Ex-change was held last week, when Mr. A. D. Chisholm, of change was held last week, when Mr. A. D. Chisholm, of the Union Grain Company, was appointed president for the ensuing year, and Mr. Donald Morrison, of Messrs. Donald Morrison & Company, vice-president. The financial state-ment submitted by Mr. C. N. Bell, secretary, indicated a prosperous year, and showed a gratifying balance on the right side. The retiring president, Mr. George Fisher, in a brief review of the more important matters dealt with during the year referred to the fact that the exchange handduring the year, referred to the fact that the exchange handled the largest crop last year that has ever been grown in the West, and that for the first time in their history, they were now the largest actual wheat market on this continent. Of wheat, they had handled 88,269,330 bushels, Minneapolis following with 81 111 (10 bushels: while in tagard to act.) following with 81,111,410 bushels; while in fegard to oats, Winnipeg with 30,000,000 bushels was a good second to Chicago. The retiring president also referred to the satisfactory working of the new commission rule, and the system of registration of warehouse receipts.

registration of warehouse receipts.

The following is the list of officers for the year: President, Mr. A. D. Chisholm; vice-president, Mr. Donald Morrison; secretary-treasurer, Mr. C. N. Bell; council, Messrs. Capel Tilt, H. N. Baird, A. Kelly, J. Fleming, G. V. Hastings, W. A. Black, G. R. Crowe, Geo. Fisher, F. N. McLaren, W. L. Leistikow, H. T. Swart; committee of arbitration; Messrs. S. Spink, Donald Morrison, A. R. Hargraft, Jno. Fleming, C. Tilt, H. N. Baird, F. N. McLaren; committee of appeals: Messrs. S. P. Clark, W. A. Black, S. A. McGaw, E. W. Kneeland, Thos, Thompson, W. L. Parrish, W. W. McMillan.

CANADIAN MANUFACTURERS' PARLIAMENT.

Annual Convention Held in Vancouver—Association is Solid for British Preference.

For the first time in thirty-nine years, the Canadian Manufacturers' Association are holding their annual convention west of Winnipeg. Vancouver this week welcomed nearly three hundred captains of industry interested in the development of all parts of the Dominion. In his address, Mr. John Hendry, the president, stated, "As an association of Canadian manufacturers it is our proud boast that we stand first, last, and all the time for the inviolability of the British preference."

"They maintained," he continued, "that the minimum tariff should be so framed as to afford adequate protection to legitimate native industry, in order that there might be more effectively transferred to Canadian workshops much of the manufactures that they now procured abroad, but they recognized that for some of their requirements they must always be dependent on outside sources of supply, and it was with a view to directing this business as largely as possible into Imperial channels that they declared themselves in favor of a substantial preference to the Mother Country, and to the sister colonies."

Right to Make Treaties Direct.

"There was no true Canadian but would heartily endorse the stand taken by the Government in declaring the right of the Dominion to negotiate its own treaties of trade, but in such negotiations they should always see carefully that the value of the preference was not impaired. However desirous they were to improve the opportunities of foreign trade, they had no desire to advantage themselves in that direction if it was going to involve any sacrifice of the trade now enjoyed by Canada with the Mother Country."

He emphasized the contrast in trade relations between Canada and the United States as seen to-day and as seen forty years ago. At that time Canada came forward as the suppliant; to-day the United States was the suppliant, anxious to secure a market in Canada for her manufactured products.

Politely But Firmly Declined.

There were reasons which compelled him to express the hope that the present offer of the United States would be politely but firmly declined. Canada to-day stood in no need of reciprocity. Last year Canada's exports of merchandise to the United States amounted to \$110,000,000, while to the United Kingdom they were 140,000,000 despite its much more unfavorable geographical position. Canada could not afford reciprocity with the United States unless it be confined to a limited number of national products.

Of Canada and the United States.

The report of the Tariff Committee reviewing the trade negotiations with France, Italy, Holland, Belgium, and other countries was presented. Regarding the recent tariff negotiations between the Canadian Government and the United States, it says:—

"As the importations into the United States from Canada are principally raw materials which that country requires, the business community and the press in the United States, regardless of politics, at once protested against the maximum tariff being applied to Canadian products. Meanwhile Canada remained silent, yet interested, convinced if the maximum tariff should be applied the United States would have more to lose than Canada. The President, after expressing a desire to have a conference with the Premier, met by appointment Hon. Mr. Fielding at Abany, and later held a conference with him and the Honorable Minister of Railways at Washington, D.C., which resulted in the Government of Canada graciously agreeing to lower the rates of duty to all countries on thirteen items in the Canadian tariff in return for the minimum tariff of the United States.

Asks a Pointed Question.

"As Congress was then in session the question may fairly be asked: Why was a message not sent to Congress by the President showing the necessity for a change in the tariff Act of August 5th, 1900, instead of requesting a modification of the Canadian tariff? If discrimination against the United States existed owing to the terms of the French treaty it still exists practically as much as ever. In the opinion of your committee a tariff war with the United States was not desired. It was perhaps well a compromise was arrived at, but it would have been more satisfactory had it not affected any Canadian industry, or if the tariff rates payable in the United States on the articles in question had been made reciprocal It is expected further negotiations, with a view to effecting a

reciprocity treaty, will take place before the end of this year. On the suggestion of your committee, the Executive Council appointed a special committee to draft a memorial embodying the views of the association for submission to the Government."

CANADIAN PACIFIC RAILROAD

Has Now More than Four Thousand Miles of Steel in the United States—Little Opposition Has Been Advanced to this Development.

One of the most significant features of the Canadian Pacific Railway's annual report which has now been published in pamphlet form is the fact that during its recent period of rapid expansion it has materially increased its hold on railroads in the United States. Over 4,000 miles of railway in the United States are now controlled by the Canadian Pacific, its latest important acquisition of an American railroad, the Wisconsin Central, having added over 1,000 miles to the railways in this country previously controlled by the Canadian Pacific. The capitalization of these lines, including stock and bonds, approximates \$200,000,000 and their annual gross earnings are in the neighborhood of \$28,000,000.

Foothold in the Railway World

The control of lines of this importance by the Canadian Pacific gives it a strong footbold in the American railway world, a much greater footbold than American railroads have obtained anywhere in Canada. If any jeasousy of the Canadian Pacific's entrance further into the United States has been felt by American railroad managements it has not crystallized into any effective opposition to the advance of the Canadian Pacific into the United States.

The following figures, which outline only the more important of the lines controlled by the Canadian Pacific, afford an interesting record of the extent to which railroads in the United States have come under the control of the

chief railroad enterprise of the Dominion.

Canadian Pacific System. Gross Earnings Mileage Capitalization \$94,989,000 Canadian Pacific 10,543 \$353,000,000 Minn., St. Paul & Sault Ste. M. ... Duluth, S. S. & A. ... Mineral Range. ... Wisconsin Central . . . 15,000,000 84.584,573 2,394 593 3,300,000 45,000,000 800,000 3,013,000 120 66,283,921 8,800,000 1,020 Total in U. S. ... 198,881,494 27,900,000 4,145 ... Total in all Canadian 551,881,494 122,880,000 Pacific lines 14,688

In the Central Northern States

These figures do not include the railroad mileage controlled by the Canadian Pacific in Maine nor the 140 miles of the Spokane International in Washington which are under option to the Canadian Pacific. The acquisition by the Canadian Pacific last year of the Wisconsin Central, operating over 1,000 miles of line, brought the Canadian Pacific from Duluth into Chicago and gave it a still stronger foothold in the railroad situation in the Central Northern States. That the Canadian Pacific is regarded as likely to push its way still further into the United States is indicated in the reports which gained circulation at one time that the Canadian Pacific would acquire control of the Chicago Great Western and by the purchase of still another road would get a line all the way down to the Gulf. That was rumored before the purchase of control of the Wisconsin Central. Although apparently unfounded, the reported intention of the Canadian Pacific to get a line running through the country from north to south afforded evidence of the fact that the Canadian road is looked upon as willing and able to add still other lines to those which it already control in the United States.

American Roads in Canada

The railroads in the Northwest, particularly the Great Northern, have from time to time extended their lines into Canada, but the mileage so far built is small compared to that controlled in this country by the Canadian Pacific, and directors of the Canadian Pacific have been disposed to accept with an air of amusement the reports from time to time circulated that the Great Northern or some other American road was about to retaliate against the Canadian Pacific by building into the Canadian Pacific's territory and actively competing with it there.

AGAINST THE MUNICIPAL BONUS

A surprising and gratifying response has attended the efforts of The Monetary Times to check the progress of the municipal bonus system. The best evidence that the prinmunicipal bonus system. The best evidence that the principle is wrong is found in the fact that a large number of municipalities are announcing their intention of opposing the granting of unreasonable bonuses.

The town of Berlin, Ontario, has issued a circular letter, asking for assistance in stamping out the abuse. The town authorities have passed the following resolution:

"That whereas a fixed assessment or a partial or total exemption from taxation is declared by law to be a bonus.

And whereas a bonus may not be given except by vote of the ratepayers. And whereas a large number of municipalities in the Province are systematically violating the law by giving to manufacturers and others fixed or reduced assessments without such vote of the ratepayers. And whereas such violations of the law result in placing at a disadvantage those municipalities which do observe the law, so that it becomes difficult for such municipalities to obtain new industries under such unequal and unjust conditions.

Ask the Legislature toAct.

"Therefore, it is resolved that the Ontario Legislature be and is hereby petitioned to provide for such Government inspection of assessments as will insure the due observance of the assessment law in this respect, and that a copy of this resolution be forwarded to the Attorney-General, and further, that other municipal councils of the Province be requested to endorse this resolution and to send a copy of such endorsation to the Attorney-General.

At the convention of the Union of Alberta Municipalities held recently at Wetaskiwin, Mayor Jamieson, of Calgary, advocated a policy of no bonuses and no exemptions. He thought that all municipal buildings and utilities, churches, government buildings, etc., should be taxed the same as private property, and bear a share of the burden of government improvement and development of the city. He strongly condemned the practice of giving bonuses to any commercial condemned the practice of giving bonuses to any commercial

Regina Does Not Like Principle.

Mr. T. W. Sheffield, industrial commissione, Regina, writes The Monetary Times as fo'lows: "The system of bonusing industrial concerns is neither legit mate nor consistent with sound commercial principles. The location for industries in any particular centre should be governed by its geographical position, transportation facilities, power, water, labor supply and living conditions, together with general manufacturing opportunities. Such a availables in themselves should be the main factors governing the question of investors and manufacturers locating in certain centres in Canada, which is the only real foundation of their and the city's or town's prosperity."

The city council of Halifax, N.S., is at present considerate the city council of Halifax, N.S., is at present considerate the contract of the Halifax Country Dock Company

ering the application of the Halifax Graving Dock Company, for a subsidy of \$5,000 per year for 20 years, and entire tax exemption for same period. The dry dock company purpose enlarging the present dock to such an extent as to obtain the subsidy offered by the Dominion Government, as Per the Act relating to Dry Docks passed last session. company has already obtained \$200,000 from the citizens of Halifax. There is some feeling against further municipal assistance.

Cities and Towns Which Lead the Way.

The following cities and towns are opposed to the unreasonable bonus system:

> Berlin, Ontario, Calgary, Alberta. Edmonton, Alberta. Lethbridge, Alberta. Peterborough, Ontario. Regina, Sask. Toronto, Ontario. Welland, Ontario. Winnipeg, Manit ba.

The list is growing and the municipalities deserve support.

The city council of Fredericton, N.B., recently decided free water and exemption from taxation. A citizens' petition was presented to the authorities, asking that not only should these concessions be given, but also a loan of \$10,000 granted to the company. Can Eredericton (Scale) granted to the company. Can Fredericton afford to do this?

Durham, Ontario, has passed a by-law granting a loan of \$20,000 and tax exemption to a furniture company. Woodstock, Ontario, has passed by-laws granting concessions to two companies

What Brandon Thinks.

A delegation of the Commercial Bureauc of Brandon, recently waited on the city council in order to learn to what extent the city would go in the matter of free or cheap sites, exemption from taxation, water, price of power, transfer facilities, etc. In the subsequent discussion it was thought that total exemption from taxation and water at cost should be offered, and that a by-law be placed before the ratepayers, authorizing this in cases where such inducement seemed warranted. Power at a minimum cost of \$35 per horse power could be guaranteed in the near future, but nothing could

could be guaranteed in the near future, but nothing could be definitely promised as yet in the matter of free sites or transfer facilities. Total tax exemption is an unwise policy.

Regarding the action of the Union of Canadian Municipalities in this matter, referred to in The Monetary Times last week, the Toronto Globe says: "That it is always possible to be right and sound in the abstract is shown by the declaration of the Union of Canadian Municipalities against declaration of the Union of Canadian Municipalities against the bonusing of industries. All can see that the favor given to one industry, whether by direct payment or exemption, is at the expense of other industries, and must shrink them if it expands or establishes the favored one. Every industry adds to the cost of lighting, road maintenance, police protection, water supply, sewer construction, and all the services which create the necessity for municipal faxation. If one industry is exempted or allowed to draw from the treasury, the others must bear a larger burden. As with protection's creations, the industry established is in evidence, while those discouraged by the resultant tax rate cannot be tabulated. The cost of municipal services increases with municipal growth. If a newly-established industry shirks its share of the burden its addition to that burden must be its share of the burden its addition to that burden must be borne by those who pay.

Question of Abstract and Concrete.

"Although the Union of Municipalities takes this : afe ground on the abstract question, its concrete form is seldom dealt with as wisely. When the promoter comes along and tells what large buildings he will erect and how many men he will employ, what material he will consume, and what large increase he will cause in the volume of general businthe municipal representatives generally depart from the sound principles they declare in the abstract. They do not give weight to the fact that all the things the promoter prom-They do not ises make proportionate increases in the needed municipal revenue. An argument or idea which causes municipal councils to comply with the promoter's request for exemption is that which was brought out clearly in Lloyd-George's land tax campaign—the folly of penalizing the man who benefits the general community. The man who builds, manufactures, and employs is unquestionably a public benefactor, and it seems unwise to tax him according to his enterprise when equal revenues can be raised by taxation that does not discourage but stimulates and promotes. When the promoter asks if he should be taxed for benefiting the public at large and increasing the value of property in the municipality he makes an argument difficult to meet.

"When he says that if exempt he will confer many benefits on the municipality, and if taxed he will not do so, he puts the case in a still more persuasive form. Yet his argu-

puts the case in a still more persuasive form. ment merely proves that the system of municipal 'axation can be improved. To prove that it is unwise to tax enterprise and industry and their products does not prove that it is wise to exempt one man's industry while taxing all the

Enforce It Impartially.

"The best way to get rid of a bad system is to enforce it impartially. While municipalities have a system of taxation that tends to discourage improvement it should be enforced against all alike. The Union of Municipalities has taken a sound position. Arguments that attack the system which taxes industry and enterprise must not be allowed to justify the exemption of the enterprise of some by unfairly burdening the enterprise of others."

The Maryland Casualty Company has been licensed to transact in Canada guarantee, burglary and plate glass in-surance in addition to accident and sickness insurance, for which it is already licensed. Mr. J. W. Mackenzie, Toronto,

which it is already licensed. Mr. J. W. Mackenzie, Toronto, is the company's chief agent.

The August fire loss of Victoria, B.C., was small, totalling \$225. According to the report of Fire Chief Davis the number of alarms during the month was 20. The loss on buildings amounted to \$180, and on contents but \$45. The insurance carried on the buildings in which the fires took place was \$12,930, and on contents \$1,500

POWER, SHAWINIGAN AND STREET RAILWAY

Only Argument to Carry Weight is that of Votes-How the Capitalization Would Figure in Alternative Mergers — Objections Raised to the Deal — Review of the Whole Situation.

Monetary Times Office,
Montreal, September 21st.

Financial circles are interested in the rise of Montreal Power and Shawingan stocks. What this may mean, whether it is specially significant in connection with the recent effort of the Canadian Light and Power Company to close a deal with Montreal Street Railway, or whether it is just one of those attempts to inflate a stock on mystery, has been the central point of discussion.

Early last week it became evident that the Montreal Light, Heat and Power Company, either directly or indirectly, through a subsidiary company, made two bids for the lighting of Montreal streets for the next ten years. These tenders were the two lowest of those submitted. That one of these bids would be accepted was certain.

With this troublesome topic all but removed, the general attitude towards the stock of the company would naturally show some improvement, so that the more active purchasing, and the advance of a few points which took place almost immediately, was anticipated. The general supposition was that the better tone was due to that cause.

Some Heavy Trading.

On Thursday the real trading commenced, and the market jumped practically ten points during the day, on trading of many thousand shares. It opened at 136 and struck 145% before the close of the afternoon. Since that time, there has been no decline in the activity and strength of the market. On Monday this week the sales were more than 10,000 shares and prices practically reached 152, while Tuesday's trading sent it up to 150 the turnover during the day being nearly sent it up to 159, the turn-over during the day being nearly 12,000 shares. On Wednesday the buying in the early ses-12,000 shares.

12,000 shares. On Wednesday the buying in the early session sent the price to 16:34, there being later a reaction of a few points. Sales for the day were 13,000, the total for one week thus being over 55,000 shares of Power.

The whole market for some time felt the influence of the Power market, and sales were greatly increased. Strength was evident in almost all stocks. Soon Power commenced to take the lead, the rest of the market stopping. Shawinigan, because of its association with Power, was the one exception. Even here, the market only advanced a matter of 10 or 12 points, beginning at par. This is an unusually high price for a 5 per cent stock, and an explanation would be in order. points, beginning at par. This is an unusually high price for a 5 per cent. stock, and an explanation would be in order. Sales of Shawinigan were unusually large also.

Amalgamation Has Been Predicted.

For several years the "Street" has been predicting union between Montreal Light, Heat and Power and Shawinigan, or between Power and Street Railway, or between Shawinigan and Street Railway, or between Shawinigan and Street Railway, or between all three. In fact, there is already great similarity in the personnel of the directorates of the three concerns, and it is thought that the work of bringing together Power and Shawinigan not be arduous. As for the excuse for bringing Street Railway into the deal, this is furnished by the fact that the Railway already uses some 30,000 horse-power, and will become a larger user as time goes on. It has no water power of its own.

While rumors of an amalgamation have been prevalent when particular activity or strength developed in any of the three stocks, there was more than the usual excuse for the rumors on the present occasion.

Last spring, exceptional activity developed one day in Montreal Street Railway. The first familiar explanation was amalgamation, strength being lent this rumor by a movement in Shawinigan about the same time, and also by many statements which had been made concerning a subway project providing for faster traffic and large uses for electricity. But the directors evidently knew nothing of the buying.

Canadian Light and Power Take a Hand.

After this it became known that interests close to the Canadian Light and Power Company were the buyers. This report was not credited at first, Street Railway being regarded as a proposition of which only the most powerful capitalists would attempt to obtain control. It is now known that the Canadian Power Company had attracted to its ranks a number of wealthy men. The names of some of these are number of wealthy men. The names of some of these are now known, but the most powerful are still behind the scenes waiting developments. Suffice it to say that the Canadian Power interests were recently credited with holding 30,000 shares or so of Montreal Street in their own right (out of a total of 100,000), besides which, friends had purchased 5,000 and turned them over. In addition, 10 per cent. of the old

shareholders of Montreal Street had given the Canadian Power people their proxies. Altogether they had from 40,-000 to 45,000 shares, it was claimed, and many credited them with having a clear majority.

Proposal Made to Montreal Street Railway.

It then became known that the deal they proposed to lay before the annual meeting of the Montreal Street Railway, on November 2nd, was that each shareholder of Montreal Street Railway should accept bonds to the value of his stock (\$250) and in addition thereto a bonus of half a share in the new concern. Meantime, they had bid up the price of Street Railway from around \$225 per share to \$250, and the higher figure was to be made the basis of the bonds. The bonds were to carry 4½ per cent., whereas the stock was on a 10 per cent. basis. Thus, \$100, par, of 10 per cent. stock would be exchanged for \$250 of 4½ per cent. bonds, bonused with half a share of common stock in the new concern. Shareholders who now get \$10 per share dividend on one share stock would get \$11.25 interest on bonds instead, and for their speculative interest, would have the possibilities contained in half a share of stock.

In consideration of this, the Canadian Power shareholders would also receive a bonus of half a share of new stock, exchanging each share of stock now held by them for one and one-half in the new concern. This will be found figured

Some of the Railway's Objections.

The directors of Street Railway objected to the proposal. In the first place, they protested against being out-voted in a company which they had considered peculiarly their own. Hence they would be more than usually critical of the deal proposed. They pointed out that the Canadian Power proposition was as yet unformed, not a wheel having been turned, and they argued that no one knew what would be the result. Also, they did not like the idea that the Railway shareholders would hold less stock than those of the Can-

The friends of Canadian Power argued that it was a simple matter to see what they had in the way of prospects. They were making contracts to deliver in the city in April, and their first 20,000 horse-power or so would be ready early in 1911, an assertion which might be checked by a competent engineer. They had a capacity of 75,000 horse-power, and would add this, as quickly as possible, at the same point in the Beauharnois Canal as the initial development. After this, they had the rights to the St. Lawrence River, where the development could be doubled; and they owned the necessary

Shareholders Receive Notice.

Without going into the question of arguments offered, unofficially, on both sides, it is sufficient to say that the Railway directors a short time since issued notices to their share-holders apprising them of the attempt being made to secure control of the Railway and asking them to hold their proxies, as the directors would have an alternative plan to place before them. Owing to this notice, the "Street" readily connected the excitement in Power and Shawinigan with the plan

It became known that there were strong probabilities of Montreal Power being placed on an 8 per cent. dividend during the coming year, so that, even though the proposition to couple it up with Street Railway failed, the purchasers would not be in such a bad plight. In fact, it was doubted in many quarters whether any serious intention existed to bring about a deal, there being a suspicion that the whole thing was due to manipulation. If the public came in and relieved the manipulators, all right, and if they refused, no great harm was done so long as the dividend could be raised.

Rumors of Manipulation.

These rumors of manipulation were, to some extent, discredited by the announcement that a committee had been appointed by the directors of Montreal Street Railway to confer with a committee of directors of Montreal Light, Heat & Power Company with a view to formulating a scheme to take the place of the deal to be submitted to the Railway meeting on November 2nd, by the Canadian Power people. At the same time the rumored terms of the probable deal, being 250 for Montreal Street Railway and 100 for Montreal Power, were reiterated. It was stated that these valuations had been placed upon the tree stocks by Montreal Power, were reiterated It was stated that these valuations had been placed upon the two stocks by Mr. Ogden, of the Canadian Pacific Railway. Nothing was said about Shawinigan, although in the previous reports it was stated that Shawinigan might join the deal at 125 or 150. There were also rumors that Canadian Light and Power Company would be admitted at 100, but the fallacy of this is evident from the fact that the lease of the Canadian Power's waterpower privileges precludes any amalgamation or agreement of any kind on pain of cancellation

NORTHERN MORTCACE COMPANY.

At a time when Western Canada is showing such rapid growth, it is not surprising to note a number of new financial companies. This is a necessary development. Money is required by the immigrant for the development of his land, and what better security could one have than a mortgage on good Western lands.

The Northern Mortgage Company of Canada, with head office at Winnipeg is preparing to enter the field with authorized capital of \$10,000,000. One quarter of this amount is now being raised by subscription, and as more than \$1,500,000 has already been subscribed for and allotted to, less than \$1,000,000 remains to be taken up by the public on the following terms: Ten per cent, on allotment, and ten per cent, yearly thereafter. The shares are value for \$100 each, and are being offered at par. The company has a strong and conservative directorate and bright prospects.

CANADA'S DRY DOCKS.

Many Proposals Are Under Discussion-Two in the St. Lawrence Will be Completed Next Year-Other Projects Are Progressing.

An important step was taken this week in the proposed construction of dry docks in Canada when shipping men, construction of dry docks in Canada when shipping men, contractors, engineers, and financial men met at Montreal and formed the Dominion Dry Dock Company, with Mr. Andrew A. Allan as president of the new concern, which secured a Dominion charter in April last. It is proposed to erect several dry docks in the Dominion beginning with one at Levis. This first undertaking will be started early next year by Sir Robert Perks, the English engineer who has had under contemplation the work of the Georgian Bay Canal. He is to be the connecting link between the men in Canada who are endeavoring to get from the Canadian in Canada who are endeavoring to get from the Canadian Government the support which such a scheme deserves and the British public, who are ready to stand behind the project with several million collars.

Officers of Dominion Dry Dock Company

A permanent board of directors of the company was elected as follows: Sir H. Montagu Allan, Mr. Andrew A. Allan, Mr. G. M. Besworth, Mr. W. M. McPherson and Captain D. C. Newton.

Mr. C. C. Ballantyne of the Montreal Harbor Commission

sion, speaking of the good which would result to St. Law-rence shipping said that the Quebec dock would be kept busy, for, by the time it would be completed there would be more ships and larger ships than at present on the river. It is expected that the dock will be ready in August, 1911, and, when opened it will be capable of taking care of any ship in the St. Lawrence trade.

It will be the property of a firm with vast experience and plenty of money and the plant which will be attached to the dock will be more extensive than that at present planned to accompany the dock at Quebec.

Property Will be Leased on Completion

Just what the new property at Quebec will cost, Mr. Allan, president of the Dry Dock Company, would not say. He stated that next year the work would be undertaken and that the dock would be situated on the Island of Orleans opposite the light on the westerly end. Mr. Allan stated that when completed it was probable that the property would be leased to Mr. George T. Davie or his firm who so far have repaired all damaged ships on the St. Lawrence or in the Gulf. the Gulf.

Plans for the proposed Levis dock have been filed this week with the Department of Public Works for approval by the Government, so that the statutory subsidy may be obtained. Sir Robert Perks stated that the organization meeting of the Dominion Dry Dock Company was held and the capital subscribed to take up the \$4,000,000 bonds and \$1,ooo,oco common stock.

Same Company May Construct Dock at St. John

Mr. W. M. McPherson is to represent the White Star Line, and Harland and Wolff. Capt. Newton to represent certain financial interests; and Mr. G. E. Davies to represent Quebec interests. The company is ready to proceed with construction as soon as the subsidy is granted. The same company is planning to put a dock and ship plant in at St. John, N.B., but the plans for that place have not yet been completed, the location and the association not having yet been determined.

The following is a list of charters granted during the past week. The head office of each company is situate in the town, city or province mentioned at the beginning of each paragraph, the persons named are provisional directors:

Quebec, Que.—La Compagnie Bouchard, \$19,000, II. Simard, P. Joubert, A. Darveau.

Cuelph, Ont.—Rowen and Ogg Co., \$40,000, O. E. Rowen, W. A. Mahoney.

The company, so far as can be learned, will not enter into competition with Messrs. Vickers, Sons and Maxim for the building of a floating dry dock at Montreal.

As to the Montreal Proposition

While no formal announcement can yet be made con-cerning the Mon real project it is officially stated that negotiations are still in progress between the president of the Vickers Company and the Dominion Government, for the laying down of a first-class dock in the port of Montreal

Sault Ste. Marie has secured a subsidy for its dock; Collingwood has one aiready; Vancouver has been subsidized, and one is assured for the Grand Trunk Pacific at Prince Rupert, while one has practically been promised to St. John. These would be of the first-class carrying an annual subsidy on outlay up to \$4,000,000. The Halifax dock, subsidized under the old arrangement, are a renewal of the subsidy under the new conditions. are seeking

In many cases the docks would be operated in connection with shipbuilding, and the industry, it would seem, would either be stimulated or else considerable capital will be sunk in the undertakings.

The proposed construction of these large dry docks in Canada auguts well for the future shipping facilities and industry of the Dominion. Coupled with the proposed extension of Monreal's harbor, and the docks under discussion at Toronto and the docks under discussion at the d sion at Toronto, large possibilities for Canada's future in the maritime world loom ahead.

BRITISH COLUMBIA IS HEADQUARTERS

For Four Large Companies-Forty-seven Charters Granted-Detailed List of Concerns.

While no very large companies were incorporated dar-ing the week ended September 17, the total capitalization and the number of companies to receive charters show no sign of decrease. During the week there were 47 companies to receive charters, while the total capitalization of hest concerns amounted to \$8,533,000. Four companies with individual capitals amounting to \$1,000,000 or over were incorporated, all of them having head office in British Columbia. Two of these companies are in the speculative class, one being a gold mining company, capitalized at \$1,000,000, and the Canadian Coaling and Oil Company with a capital of \$1,500,000.

Pembroke, Ont.—Canada Box & Barrel Co., \$100,000, J. Coxford, F. W. Cockburn, J. J. Fraser.

London, Ont.—Dorchester Peat Co., \$75,000, J Mc-William, J. M. McEvoy, Miss A. E. Dufton.

Perch, N.B.—Porter, Manzer, Ltd., \$49,000, G. G. Porter, J. C. Manzer, J. E. Porter, Andover.

Elmwood, N.B.—Elmwood Produce Co., \$5,000, S. A Billings, W. E. Flemming, H. K. Kirkpatrick, Richmond.

Wontreal.—Michaud, Houle & Co., \$20,000, T. Michaud, V. E. Baril, H. A. Demers; Compagnie d'Importation, \$100,000, E. Caillaud, R. Fournier, P. L. A. Lefebvre.

Toronto.—Canadian Patent Scaffolding Co., \$40,000, J. E. Day, J. M. Ferguson, E. V. O'Sullivan; Glencoe Land Co., \$250,000, H. A. Clark, H. E. Reman, J. J. Hoidge, F. J. Hughes; Rupert G. Bruce Company, \$40,000, R. G. Bruce, C. S. Murray, H. A. Bruce; Saskatoon-Saskatchewaa Land Corporation, \$60,000, T. J. W. O'Connor, E. E. Wallace, I. M. Seager.

Smith; Dyson Yeast and Extract Co., \$40,000, F. Thorpe, D. J. Dyson, A. E. Johnston; H. P. Naylor & Co., \$20,000, W. A. Campbell, H. P. Naylor, J. Munro; Elm Park Co., \$250,000, E. H. Neville, W. S. King, Winnipeg, B. L. Tucker, Parrsboro, N.S.; Speirs-Parnell Baking Co., \$150,000, J. T. Speirs, E. Parnell, J. M. Speirs; Maclennan Brothers \$50,000, G. A. Maclennan, T. H. Butt, W. Butt; Western Steel and Iron Co., \$300,000, C. A. Baskerville, J. L. Coupe C. N. Simpson; Winnipeg Bellastone Co., \$200,000 G. M. Annable, F. H. Martin, Moose Jaw, G. E. Might, Winnipeg.

British Columbia.—British Columbia Co., \$100,000; British Columbia General Development Syndicate, \$250,000; Cocos Island Hydraulic & Treasure Co., \$300,000; Dollenmayer Advertising Agency, \$10,000; Dominion Stock Exchange, \$10,000; Imperial British Columbia Co., \$100,000; Investors' Trust & Mortgage Corporation, \$100,000; Irwin, Carver & Co., \$25,000; Lewis Printing & Publishing Co., \$10,000; Monarch Stationery & Printing Co., \$100,000; North Vancouver Club, \$10,000; Surf Inlet Gold Mines, \$1,000,000; Victoria-Sonora Mining Co., \$250,000; Alliance Trust & Investment Co., \$100,000; B. C. Gold Mines Co., \$10,000; B. C. Milk Condensing Co., \$100,000; Canadian Mills and Timber, \$1,000,000; Canadian Home Builders, \$1,000,000; Canadian Coaling & Oil Co., \$1,500,000; Evans & Hastings, \$200,000; French's Complex Ore Reduction Co., \$20,000; Lincoln Sawmills Co., \$50,000; Phoenix Riverside Mining Co., \$150,000; Province Assurance Society.

LAKE SUPERIOR CORPORATION'S ANNUAL REPORT.

A surplus of \$1,194,735 is shown in the annual report of the Lake Superior Corporation, issued this week. This surplus is of course subject to depreciation and other charges. In reviewing the results of the past year, Mr. T. J. Drummond points out that with the exception of No. 3 open hearth furnace, none of the new plants being installed were in operation during any part of the year. Not only, owing to the large amount of new construction under way, have the operations of the existing plants been carried on under very many disadvantages, but on account of the demand for labor by the contractors entrusted with the new construction, the companies have suffered from having to increase wages in several departments.

Again, the bounty allowed by the government during the fiscal year on steel manufactured, was equivalent to about \$1 less per ton of steel than in the previous year, causing a loss in net earnings for the present year of about \$200,000; but, notwithstanding this, the directors are glad to be able to report an increase in the net earnings of the subsidiary companies. The directors have felt justified in paying interest on the income bonds for the year at the rate of 2½ per cent. out of surplus earnings.

Towards the end of the financial year the company has brought into service a new steamship, especially built by it for the purpose of carrying steel rails, and the operation of this vessel should add to the company's earnings.

The operations of the Manitoulin and North Shore Railway Company for the year have resulted in a material increase. The extension of the road to Crean Hill was completed on the schedule date, and on July 20th, last, the company commenced carrying ore from that point.

The earnings for the year of the Algoma Central Railway have increased, and show an excess over the previous year. The operation has been conducted under similar conditions to those prevailing during the preceding year.

The assets of the company which stand at \$51,711,433 are composed chiefly of investments and securities, there being over \$48,000,000 disposed of in this manner, while the only other large asset is \$2.812,781, this being the amount due by subsidiary companies. The capital stock of Lake Superior amounts to \$40,000,000, while there are first mortgage bonds held amounting to \$7,000,000, and income bonds amounting to \$3,000,000. Several smaller hiabilities such as reserve fund \$547,525, bank advances \$993,748, etc., being accounted for, there remains a balance at credit of profit and loss amounting to \$522,178. The report shows that good progress has been made during the past year by the Lake Superior Corporation, and the gratifying statement prepared should be acceptable to the shareholders.

GOVERNMENT, MUNICIPAL AND CORPORATION BONDS.

We deal in only the higher grades of Government, Municipal and Corporation Bonds, yielding from 4% to 6%.

Before purchasing a Bond issue or any part of it we make a thorough investigation regarding the properties or assets which are given as a mortgage against the Bonds.

Orders may be telegraphed at our expense.

Limited.

North Vancouver, B.C.—\$100,450, 5 per cent. 50-year schools, parks, and fire hall debentures, to the Dominion Securities Corporation, Toronto.

The \$10,000 new roads by-law has been defeated by the

ratepayers of Muskoka Township, Ont.

The \$125,000 block of Regina debentures recently purchased by a Toronto bond house, were a portion of the \$500 000 issue bought some time ago by the Canadian Agency, Ltd., and returned to the city on the ground that

they were not valid, and that as the remainder of the half million block had been placed on the English market the was too late to incorporate this \$125,000 with them. The Canadian Agency offered two points less than the original purchase price which was 97.675, but as a better price offered by the Toronto house the \$125,000 block was sold to

POWER, SHAWINICAN AND STREET RAILWAY.

(Continued from Page 1316).

As To The Three Interested Companies.

At the present time, interest is mainly in the three com-panies, namely, Montreal Power, Street Railway, and Can-adian Power. The capitalization of these are as follows:—

	Bonds.	Stock.
Montreal Power	\$10,107,000	\$17,000,000
Street Railway	4,426,000	10,000,000
Camadian Power	4,000,000	6,000,000

On the basis mentioned above, the union proposed between Montreal Power and Street Railway, and that proposed between Canadian Power and Street Railway, would, respectively, carry the following capitalization and securities:-

Bonds. Stock. Montreal Power-Railway. \$14,433,000 \$57,300,000 \$71,833,000 Canadian Power-Railway. 33,426,000 14,000,000 47,426,000

One of the objections which a director of the Street Railway offered to the Canadian Power deal was that the Railway shareholders would have a minority of the stock of the new concern, thus being out-voted. It does not seem a con-vincing objection particularly in view of the fact that Railway shareholders would have priority to the assets and earnings of the concern. In fact, we find that in the proposed Montreal Power deal, Montreal Power gets \$32,300,000 stock, and the Street Railway shareholders get only \$25,000,000, so that Railway shareholders, in both deals, are in the minority. Yet, in the Montreal Power deal, though in the minority, the Railway people get the same class of securities as the majority, while in the Canadian Power deal they get bonds for their present holdings and a one-third speculation on the future, being \$5,000,000 stock against the Canadian Power's holdings of \$9,000,000. As for the Canadian Power's holders, they, presumably, are content to take their chances on the future, inasmuch as they get stock only. This, perhaps, is as it should be at the moment.

What Saving Would be Effected.

It is said that the earnings of the combined Montreal Power and Street Railway companies would equal 5 per cent. on the capital. In that case, earnings on the present capital of Montreal would be 91/2 per cent., and that on Street Railway, 121/2 per cent.

Apparently a normal value for Street Railway was around \$240 to \$250, so that no objection can be taken to it being valued at the latter figure. But the normal value for Power has been from \$130 to \$140, and even those figures were not reached till this year. To take it in at \$190 would seem to inflate its value by \$40 or \$50 by associating it with Street Railway, because it is hardly believed that even an 8 per cent. dividend—which it is not yet getting—would justify more than \$150 just now. Before purchasing Power at present prices, investors would do well to remember that values cannot be permanently created by only a majority vote. Reduction in operating expenses would add values, but the argument that expenses will be reduced, coming at the present juncture, will be less convincing than it would have been under other circumstances.

The deal is receiving much criticism among Street Railway shareholders and careful financiers, and the public, too, The suggestion has been is taking a hand in the discussion. heard also that the matter should be brought to the attention of the Public Utilities Commission.

Argument is of Little Avail.

Meantime, it is well to remember that argument little avail in matters of this nature and more especially in the present instance where big opposing financial schemes, with their many ramifications, are concerned. The only argument which is apt to carry weight will be the argument of votes, and no one can say how that will go till November

It has been suggested that before the date of the meeting, the directors of Street Railway may enter into a longterm contract with those of Montreal Power for the power required for the operation of their system, thus depriving the Canadian Light and Power people of practically the only interest they could have in bringing about a union between their concern and the Railway. It is not believed on the "Street" that, in view of all the circumstances, the Street Railway directors would for a moment consider a proposition of such a nature, inasmuch as, were it necessary to give out a power contract around this time, which it is not—they would in the ordinary course of business be sacrificing the interests of their shareholders by neglecting to call for tenders first, or to invite competition from the various power concerns, including the competition from the various power. concerns, including the Canadian Power Company itself .-T. Securities Corporation, Limited

CANADIAN SECURITIES IN LONDON.

No New Flotations Have Been Announced-Indications of Better Times are Evident.

Monetary Times Office, London, September 16th.

Canadian securities are holding their own fairly well.
Rails show an upward tendency, land companies, though
little in demand, show no tendency to drop, and Hudson
Bay still stands at the even 100. Bank rate remains at three
per cent. although in some quarters an advance before the
end of the month is confidently expected. British rails and some industrials are affected by the unsettled tone of the labor market, the shipbuilding lock-out having a disturbing effect upon many branches of trades not immediately interested. While no Canadian flotations are announced, a number of proposals are under consideration, but delay is being strongly urged by Canada's best friends in this market. Should good trade continue, and money remain fairly plentiful, the later autumn will offer a better field

for capital than at present.

The only offer of any magnitude since the holidays was the Argentine Loan, which was successful and had to be withdrawn before the advertised date of closing.

Canadian Copper Mining Is Interesting.

The bond-holders protection committee of the Quebec & Lake St. John Railway announced that some 92 per cent. of the first mortgage and income bonds had been deposited, and in order to give the few remaining outstanding holders every opportunity, they have extended the date of final deposit to the 30th. The Financier devotes a column to Quebec Copper Mining based upon information received through the medium of The Monetary Times. It seems a pity that with the ever increasing product of this great means is not provided for systematical asset to the strength of the service. national asset, some means is not provided for systematically informing the British public as to what is being done. Columns are daily being given to South Africa and much space to other parts of the Empire, while an occasional to line paragraph is all one hears of the Dominion.

The statutory meeting of the Canadian & Empire Investment Trust was held yesterday, when the announcement was made that it says shares had been issued and the amount

was made that 15,233 shares had been issued and the amount of £151,110 received from the same. The company promises to give a good account of itself during the next 12 months.

Bank Amalgamation Blocked,

Public opinion counts for much in England, a fact which banks as well as politicians realize, and it is therefore publicly stated that the amalgamation of Parr's Bank with the Lancashire & Yorkshire Bank has been abandoned owing to the persistent opposition of the Midlands. Both boards of directors deem it wise to yield to the public demand for continuance along the old line.

the recent bank reports published might be Among mentioned the Bank of British North America, which shows a profit of £20,545 for the half-year ending July 1. The directors recommend a dividend of 30/- per share, free of income tax, being at the rate of 6 per cent. per annum. The sum of £639 has been added to the Widows' and Orphans' fund, £2,073 to the Pensioned fund, and £800 to the Officers' life insurance fund. The Ulster Bank has declared a dividend at the rate of 18 per cent. per annum for the past halfyear together with a bonus of two per cent. per annum, making a distribution of 20 per cent. for the past year. The Northern Banking Company has declared a dividend at the rate of 11 per cent. per annum on "A" shares, and 10% upon "B" shares, together with a bonus of 2/- upon the "A" shares and 1/- upon the "B" shares.

The Bank of Australasia during the half year just ended

reports successful trading. It has provided for a dividend at the rate of eight per cent. per annum as against seven per cent. last year; voted a bonus of 10 per cent. to the members of the staff; applied £6,000 to the reduction of the Bank premises, and has carried forward £1,000 as against £700 last year.

Another Indication of Better Times.

In Great Britain, during August, 11 existing companies made new issues amounting to £432,500, while five mining companies came forward with £263,200, five ordinary commercial companies with £656,000, one public loan, £94,600, and one financial, £120,000. While this was the smallest August since 1906, nevertheless, following such a good period, it must be looked upon as satisfactory, particularly when it is remembered that in the month of July, 80 companies offered £23,638,300. As before stated, Canada took practically no part in these transactions.

In spite of the constant demand for gold, and the promised continued call from Egypt and India, particularly the former, money is still plentiful upon the Street, so that it was taken for granted that the directors of the Bank of England would allow the 3 per cent. rate to stand. If present conditions continue, it seems doubtful if the anticipated advance will be made in the near future, and all these conditions tend to increaes confidence and stand for the betterment of conditions later on. The only small cloud at present visible is the condition of the labor market. Disputes and grievances, doubtless more assumed than real, are being ciscussed by labor leaders, and it is hard to say at what point or at what time difficulties may arise which will seriously handicap railroads or industrial enterprises.

Development of Steam Ships.

Sir, W. H. White, K.C.B., deals fully in a contemporary, with the recent development and change in ocean steamship architecture. It is pointed out that only three years have elapsed since the Lusitania and Mauretania began their record. breaking services, and while there is at present no indication of increased speed, there is every indication of a continued increase of tonnage.

For the assumed draught of 34-ft.* the displacement tonnages given in the following table are believed to be approximately correct. They differ from some published statements, but that difference is probably due to an assumption that the ships would be laden to greater draughts. some instances as much as 40-ft. draught has been assumed in estimating displacement, the practical conditions of service and of depths of water at terminal ports having been ignored. It must be added that the figures given for horsepowers are only estimates, but if the speeds said to be contemplated, are attained, the horse-powers named will not be very different from those which will have to be developed

Development in Clyde Construction,

The new vessels of the White Star and Hamburg-America Lines represent a great step in advance of the largest transAtlantic steamers of the "intermediate" type previously built.

Speaking of shipbuilding, it might be interesting to note the development of Clyde construction, which while not quite up to last year, is still in a flourishing condition. During the month of August, the Clyde's ship-yards launched boats totalling 41,000 tons, and for the 8 months ended 39 boats totalling 41,000 tons, and for the company of September 1st, 202 vessels, yielding a total tonnage of 700. It seems a pity that at this juncture there should be rumors of labor disputes. Nevertheless, these occurrences usually are coincident with active business. responsible for the checking of manufacturing enterprise in the old country .- T. R. Sea.

INDUSTRIAL AMALGAMATIONS IN CANADA

Their Objects, Advantages and Dangers - Effects on Market Conditions of Capitalization - Securities Issued to the Public -Question of Legislative Control

By Fred. W. Field.

The number of industrial amalgamations consummated in Canada since January, 1909, is 20.

The aggregate authorized capitalization, including bonds, of 19 of these mergers is \$199,600,000. The 20 amalgamations absorbed 135 individual companies.

The aggregate capitalization of 106 of these companies was approximately \$66,940,503, which

in various ways, was increased upon amalgamation.

The securities issued to the public, as a result of the amalgamation movement totalled at least \$26,350,000.

The largest consolidation was the Steel Company of Canada, Limited, which took over five companies. Its authorized capitalization, including bonds, amounted to \$35,000,000.

The smallest merger was the Siemon Company, Limited, capitalized at \$1,000,000. It absorbed three com-

appearance in Canada. The growth of the country, rapidly increasing population, the changing market conditions, and other developments are partly accountable for the consummation of a comparatively large number of industrial amalga-mations. This tendency in the United States has proved the origin of much legislation, and of innumerable judicial hearings. It has acted as one of the basic points in stock market and general business movements. Strenuous efforts to cope with what had become an evil, gave ex-President Roosevelt some of his world-wide reputation for aggressiveness. Lit-tle doubt exists that certain capital combinations in the United States are now practically beyond Government or legislative control.

In Canada, the industrial merger has at present exercised small influence. It has brought both advantages and abuses. Considering the position of the Dominion as a young nation, it has reached a point at which its value or harm to the country may be considered.

The facts and figures above illustrate the growing extensiveness of the tendency to amalgamate. Operations ot been confined to one or a few classes of commodities. Companies handling soap, cereals, asbestos, flour, cars, leather, lumber, cement, dried fish, carriages, bolts and nuts, steel, coal, ice, felts, have all seen apparent or real gain in a combination of interests. Arrangements have also been made between navigation, light and power, brewery, canning, retail, box trade, and other companies. These instances retail, box trade, and other companies. These instances are sufficient to exemplify the widespread nature of the new feature in our commercial and financial progress.

In addition to important and heavily capitalized companies, several perhaps equally as important but smaller concerns have merged their interests. These include two loan companies in London, Ontario, the absorption by an Eastern house of the biscuit and candy business of a whole-sale Western house, the sale of one company's timber limits in Quebec Province to another firm, and the amalgamation of two silver mining companies. An arrangement, too, has been made by Ontario steamship companies by which the formation of a new concern eliminated two steamship com-panies and reduced by half a third company's fleet. The merger spirit has entered almost every business sphere.

Many More to Come.

f \$2,

ett, 77

The end of the movement is by no means in sight.

Several Ontario wheel manufacturing companies will probably amalgamate, or at least evolve a mutually agreeable understanding. British Columbia despatches speak of the possible establishment on the Pacific Coast of a large deep sea fishery trust with a capital of several million dol-lars. Two well-known financiers were reported to be arranging for the purchase of a fish company which handles practically all the halibut caught on the coast, while they were said to be planning the purchase of two other deep sea fishing companies, having already bought a whaling company's For a considerable time, well defined rumors have been heard respecting an amalgamation of several large cotton companies, while an American cotton combine was re-cently negotiating for several Canadian mills.

Recently it was understood that a merger of the larger mica mines of the Gatineau valley would be consummated. Arrangements were being made to amalgamate several On-

During recent years a new economic factor has made its tario gas companies, but these did not materialize. Other earance in Canada. The growth of the country, rapidly proposed combines were those of four Hamilton stove easing population, the changing market conditions, and foundries, and of several London cigar manufacturers. Stock market movements at Montreal during the past few days have led to the circulation of a rumor that the Montreal Street Railway, the Canadian Power, the Montreal Power and the Shawingan Power Companies may amalgamate. The combined stock capitalization, at market prices, represents about \$75,000,000. Several malleable casting companies of Cartesian Cartesian Companies of Cartesian Cart panies of Ontario may also amalgamate in the near future.

INTERNATIONAL RELATIONS.

A slight inclination to weave international relations, is observable. An amalgamation of five rubber concerns in-volved three companies in the United States and one in The International Cotton Mills Corporation, of New York State, and capitalized at \$20,000,000, is believed to have acquired or proposes to acquire two or more Canadian cotton mills. The occasional visits of prominent officials of the United States Rubber! Company to Montreal has led some to believe that a gigantic international rubber trust may one day be arranged to include the leading rubber companies of Canada and the United States.

Friendly relations are also thought to exist between the largest Canadian and United States asbestos corporations. While it may be long before such international companies are arranged, the trend of interested opinion does not seem to be antagonistic to such consolidations. Growth in this sentiment will have an important effect upon the commercial relations of the Dominion and the neighboring republic. The fact that companies here are interested in the sale of particular goods and are at the same time enjoying reciprocal relations with similar companies across the international boundary, will create or enlarge a market which it will repay those concerned to maintain. Easily might a momentous trade factor thus be constituted, and one which would operate to some extent against the growth of trade with Constituted. ate to some extent against the growth of trade with Great Britain, France, Germany and other countries

OBJECTS AND ADVANTACES.

Having briefly reviewed the growth of what may be termed the merger movement in Canada, one naturally seeks Among the objects and advantages to the reasons therefor: be gained by consolidation, the following are cited by the promoters

The standardization of brands. Elimination of needless competition Obtention of further working capital. Prevention of increase in prices to the publica To keep pace with the growing market demand. Elimination of a large amount of freight charges. Savings from the concentration of the executive

Economies in the purchasing, manufacturing and

selling departments. The obtention of branches of the one company

in various parts of the country. Specialization of various plants, dispensing with unnecessary duplication of output and patterns.

Among the Unstated Reasons.

Although naturally enough, the fact that companies have found themselves in a critical condition, is not stated by promoters as a reason for consolidation, this may have been the real cause in some cases. Keen competition had from the case of the competition had from the case of the competition had from the case of the case o tion, bad financing or disaster on the part of one company might be met by being swallowed by a combine.

The Monetary Times has asked those identified with in-dustrial combinations to state what have proved the chief advantages as the result of the amalgamation. Although the replies received are somewhat similar in nature to the reasons tabulated above, it is interesting to note in the words of the various companies officials the actual advantages

achieved.

"An all-round business is the result, with reduced cost of management." Maritime Fish Corporation.
"The only saving is in manufacturing. We have increased our travelling staff."—Asepto Soaps, Limited.

"Reduction of costs to company, harmonious working, and a steady source of supply of asbestos to manufacturers."—Amalgamated Asbestos Corpora-

to manufacturers."—Amalgamated Asbestos Corporation, Limited.

"The chief advantage so far is a reduction in the expense of delivering and distributing our products."—National Breweries, Limited.

"Our plants being located in several parts of the Province, a large saving in freight, which is a heavy item in our goods, will be the result together with a consequent cheapening of the product to the consumer."—The Siemon Company, Limited, (Lumber).

"It is too early yet to have realized the chief advantages of the amalgamation. Reduced cost of production, reduced administration charges, by means

production, reduced administration charges, by means of centralization, standardization and distribution of work over various factories, better terms for purchasing larger supplies by contracting, etc., are the objects which the directors have in view."—Carriage Factories, Limited.

To Protect Against Combine.

The question of the objects and advantages of amalga-mations is a pivotal one, and may be more closely examined. In dealing with the matter, the word "combine" or "trust" is used in a general sense. The National Breweries, Limited, for instance, objects to being termed either, as several breweries in Quebec Province are not connected with the amalgamation which has active competition both in Quebec and Ontario. Another company tells The Monetary Times that the purpose of their amalgamation was not to form a combine, but more to protect themselves against one. "Un-fortunately," it is added, "the price of raw materials has steadily advanced, although it is impossible to obtain more than a standard price for the article manufactured. Therefore, there is very little possibility of a manufacturer getting a legitimate profit, unless the business is controlled by one

REASONS ADVANCED BY PARTICULAR COMPANIES.

The reasons and arguments of particular companies, for a combination of interests, may now be quoted. In the case of the Canada Cement Company, it was stated that the cement industry in the Dominion had grown within a comparatively few years and shows signs of great expansion, with the result that several plants were recently installed, but owing to financial difficulties consequent on the panic of 1907, a cut-throat competition in the sale of their product was started amongst the weaker companies. Cement is a product which owing to its weight will not stand much expenditure in the of freight, and consequently it was realized that if reasonable control could be ensured along a chain of plants extending from the Atlantic to the Rocky Mountains, and a more efficient organization instituted to regulate the distribution of the manufactured product to the centres of consump-tion, more economical selling conditions could be ensured, and the operating cost could thus be reduced.

According to the returns made to the Dominion Government by the cement manufacturers, the average price at their works obtained by them in 1908 was \$1.39 per barrel. This was the lowest price ever reported by the Canadian In 1906 the average price was from \$1.65 to \$1.70 At the beginning of 1909 it was and in 1907 about \$1.60 realized by a number of the manufacturers that, even without any increase in prices, the business could be rendered much more profitable by a merger of several of the large com-peting companies on a conservative basis. The Canada

Cement Company, Limited, was the outcome. The new company owns or controls cement producing plants at the central points of distribution from the St. Lawrence River west to the Rocky Mountains, and by securing a more efficient organization which will be able to regulate the distribution of the manufactured product from these central points to the centres of consumption, large economies in the present cost of freight, which represents a large percentage of the ultimate cost, to the consumer, are to be effected. The establishment of one executive office in Montreal, and the elimination of competitive salesmen, middle-men, and brokers is also expected to effect a considerable saving in the costs of the sales department. department.

Additional Cash and Extensions.

The amalgamation of certain concerns in the Maple Leaf Milling Company helped to place in the new company's treasury \$1,000,000 of additional cash, which, besides permitting of the completion of a 6,000 barrel mill and a million mitting of the completion of a 6,000 barrel mill and a million bushel elevator, and shortage warehouse at Port Colborne, and of fifteen additional elevators in the West, provided the company with further working capital. "When this new concompany is completed," said the promoters, "the company struction is completed," said the promoters, will have a total of 50 elevators, situated throughout the Western wheat belt, and a total milling capacity of 12,800 barrels of flour per day, and the advantageous points at which the various mills are located will enable it to lay down its flour in Canada and at all sea ports on the British and foreign markets cheaper than any other Canadian milling concern."

It is estimated by those associated with the proposed Can-ada Leather Company, that the savings effected by means of the consolidation, in the greater specializing of the various plants, purchase of raw materials, distribution of finished product, and centralization of management, will amount to a large sum without any increase in the price of consumers These economies should increase the net earnings to a sufficiently large amount as to permit early distribution of a substantial dividend on the common stock of the company. Seven of the tanners in the consolidation have branches in

Montreal and five branches in Quebec City.

Home Demand and Export.

Five years ago about forty per cent, of the leather manufactured in Canada was exported, owing to the limited con-sumption in the home demand. To-day the home demand sumption in the home demand. has left less than 13 per cent. for export for which trade, however, Canada is admirably situated by reason of the ample supplies of bark and hides. The capacity of the preof the sent plants will accommodate an increase of more than fifty per cent. and to look after a further expansion in the general trade securities have been reserved to be issued under proper restrictions.

Several of the leading tanners who are in the consolidation are of the opinion that as there is a strong and growing demand for calf, that one at least of the tanneries now running on kid could be profitably turned to calf skin. are now but two calf skin tanneries in the country.

The tanneries which may form the merger manufacture almost exclusively leather used in the boot and shoe and bag and trunk trades, and the economies therefore to be effected by the consolidation in the selling, as well as in the purchasing departments, should be very considerable. In Montreal alone seven of the tanneries have establishments, some of which cost many thousands of dollars a year to maintain, while the same thing is true both in the cities of Toronto and Quebec, these three being the principal centres manufacturing boots and shoes. The specializing of the various tanneries is another feature which will tend to economy in the future. Even our largest tanneries find that a certain percentage of the hides they buy are unsuitable for their trade and in the manufacture of these into leather they cometimes do not realize the cost. The hide organization in the consolidation will seek to overcome this, as it will supply only the hides suitable to each tannery, and this specialization may enable Canada to do a considerable export business on satisfactory terms. To-day we are not in a position to do this owing to the lack of proper grading of our leather in sufficiently large quantities. in sufficiently large quantities.

Saving in Freight.

The factories of the Dominion Canners, Ltd., are distributed over the fertile strip of Southern Ontario, commen-cing at Napanee in the east and continuing to Sandwich, a distance of more than four hundred miles. It is pointed out distance of more than four hundred miles. It is pointed out that on account of this, large saving in freight will be secured by shipping from the nearest factories to the consuming centres, and that crop failures through unfavorable climatic conditions will be practically eliminated. The company

makes its own cans and lithographs its own labels. This plant, at the same time, does work for the trade in other

The various concerns new absorbed by the Steel Company of Canada were formerly competitors. Under the consolida-tion this competition will be eliminated. That the new company claims will not necessarily work to the disadvantage of consumers, inasmuch as the consolidation will be able to effect economies which will permit it to sell its products at an even lower price, if necessary, than in the past, and yet make a larger profit. Each mill will, in future, supply its own district instead of shipping long distances into that of its competitors, as previously. The saving, it is explained, does not stop here, but extends to specialization in manufacture, as, for instance, in the case of twenty or thirty dif-ferent kinds of screws being manufactured, one line will be turned out in large quantities at one plan instead of several lines in smaller quantities. Large savings may be made in the Hamilton Steel company. When rolls have to be changed frequently in order to produce small quantities of different shapes, a great loss is experienced as against the production of large quantities without the changing of rolls. Again, a saving will be effected in administration in the selling force, whereby one salesman may cover the ground formerly covered by two or more, also in purchasing and in rents.

Change in Local Conditions.

Local reasons are advanced for the consolidation of ice companies in Montreal. The extension of the city made it imperative to devise a radical change in the delivery system. Amalgamation was thought to be the key to the situation. "The conditions of Montreal's ice trade," says those interested, "are changing materially, the bulk of the ice now being brought in from outside distant points. The city is spreading in all directions, and the customers are getting further distant all the time. This meant one of two things either a considerable increase in the price of ice to the public in the near future, which would be a hardship to many in view of the already high cost of living, or some method of lessening expense of conducting ice business."

The proposed combination of wheel manufacturers has in view principally the specializing of each factory in a certain line. Heretofore, each factory has carried heavy stocks in all sizes and grades. Losses resulted, as hickory and oak became defective when carried in stock too long.

CONTROL OF MARKET.

At present, no single consolidation absolutely controls the market in its particular line. Unnecessary competition has been eliminated, and competition generally has been considerably reduced. The proposed organization of the Canada Leather Company, for instance, controls at least 75 per cent. of the total output of the leather used, in the Canadian boot, shoe, bag and trunk trades. The Canadian Car & Foundry Company's present capacity is seventy cars per day, the combined capacity of all other car companies in Canada, probably being not over ten freight cars per day. Of the total capacity of car building companies in Canada, the combine's plants comprise more than 85 per cent. In another field the percentage of market control is equally as great. The Dominion Canners, Limited, controls more than 90 per cent. of the output of canned fruits and vegetables in Ontario. This fact is significant when it is remembered that of the total quantity consumed in Canada, Ontario produces

The canners' combine was viewed with some alarm by the wholesale grocers, who met the amalgamation's repre-sentatives at Montreal a few months ago. The grocers in-timated that the conditions in the canned goods trade last year were not profitable, and that they desired better terms this year regarding prices paid and charged, conditions of delivery, discounts and other trade details.

Want it Mutually Profitable.

The canning interests told the grocers that they were endeavoring to arrange the business in order that it should be mutually profitable without overtaxing the public. Several amendments to the proposed form of agreement were made. They explained that they controlled practically all the important canneries in the Dominion, and that they had formed the merger with the idea, after seven years' experience, of so reorganizing the business so that there would be a reorganizing the business so that there would be a profit in it for the producers, manufacturers and dealers, without unduly enhancing prices to the consumers. It is interesting to note that in the address of the President of the Canada Wholesale Grocers' exchange at the

dent of the Canada Wholesale Grocers' exchange at the

Montreal convention, it was stated that the only way to make a profit in the canned goods trade, was for the grocers to work in harmony with the Dominion Canners, Limited.

It seems unlikely that any single industrial amalgamation will be able to obtain complete control of the market and to dictate prices. To prevent competition in a new and growing country is almost impossible. Immediately it is seen that one company is following its business course without let of hindrance, capital and enterprise will quickly change the situation. In the event of a despetic trust using its power unduly to enhance prices of commodities, the Government may regulate the matter by tariff changes. At present then, there is apparently little danger that the combine in Canada can for long successfully operate as an undisturbed monopoly.

BASIS OF CONSOLIDATION.

The basis of consolidation is one of the important considerations for the companies absorbed. The promoters of amalgamations have seldom given information lic on this point. Generally speaking, the companies forming the merger have taken bonds, preferred or common stock in the combine. Supposedly, the individual companies have usually desired a fairly large holding of the amalgamation's bonds. Preferred stock has sometimes been accepted with, in some cases, a bonus of common stock. In the formation of these new companies during the past two years, it would seem that comparatively little cash has been paid by the consolidation for the properties of individual companies. This exchange of securities might possibly lead to undue inflation of capitalization including the bond issue, but there are two counteracting influences. Firstly, the companies entering the trust would naturally wish to obtain a fairly large share of the bond issue, which ranks first in the matter of dividend payments. Secondly, if the bond issue were made unreasonably large, it might prove a difficult task to make the earnings of the amalgamation sufficient to pay the interest on the bonds. The average merger bond should prove a safe investment.

Took Bonds of the New Company.

In the case of the Steel Company of Canada, the various concerns included, agreed to accept the bonds of the amalga-mation for two-thirds of the appraised value of the properties. They also agreed to accept preferred stock for the re-maining one-third of the appraised value plus the liquid assets of the properties, and common stock against the earning capacity as demonstrated by the history of the company.

An important provision was that by which the companyis prevented from paying dividends on its common stock un-til such time as, from earnings of the company, there has been placed in the treasury a sufficient amount to pay divi-dends on the preferred stock for one year in advance:

When the sale of the Brantford Screw Company to the Canada Bolt & Nut Company was confirmed by the share-holders of the former concern, the following division of stock was agreed upon: Holders of Brantford Screw Company preferred are to receive 7 per cent. cumulative preferred stock in the Canada Bolt Company, at the rate of \$145 for every share and in addition a bonus of 30 per cent. in the common. stock of the new company. Holders of the Brantford Screw Company common stock, will receive \$120 in new preferred and 30 per cent, in new common.

Security of the Bonds.

A part of the twenty years six per cent. Sinking rand mortgage gold bond issue of the Canada Cement Company was issued in payment for the properties absorbed, and part-A part of the twenty years six per cent. sinking fund first stitute a first charge on all the companies' properties, whether now owned or hereafter acquired. In considering the nature of the security underlying these bonds, it is to be noted that there has been invested in the properties, upon which they are constituted, a first charge, not only the proceeds to the company of the bonds themselves, but also the proceeds of the 7 per cent. cumulative preference stock of the company of the par value of \$10,500,000, or, in all, approximately three times the amount of the bonds of the recent public issue.

CAPITALIZATION.

The capitalization, and in that connection the issue of securities to the public, is perhaps most liable to abuse by self-interested promoters. The accompanying tables show the capitalization including bond issues of the mergers and

Some of the Financiers Associated with the Consummation of Recent Industrial Mergers in Canada

J. W. McCONNELL, MONTREAL.

CAWTHRA MULOCK, TORONTO.

McConnell, J. W., Montreal.— Associated in the formation of the Quebec Railway, Light, Heat and Power Company; Director, Canadian Cereal and Milling Company, and Director of several other corporations.

King, Hon. W. L. MacKenzie.

-Minister of Labor, Ottawa.

Mr. King introduced, at the last session of Parliament, the Act to provide for the investigation of combines, monopolies, trusts, and mergers.

E. R. WOOD, TORONTO.

Mulock, Cawthra, Toronto.— Vice-President of the Maple Leaf Milling Company, which amalgamated two companies.

wood, E. R., Toronto,—Prominent in the Dominion Steel-Coal transaction, and in the formation of the Canada Cement Company.

Has been associated with several amalgamations, including the Canada Cement Company, and the Steel Company of Canada.

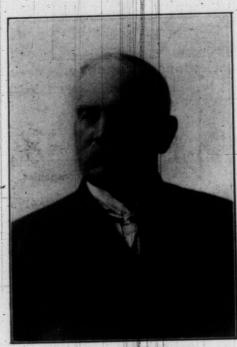

HON. W. L. MACKENZIE KING.

W. M. AITKEN, MONTREAL.

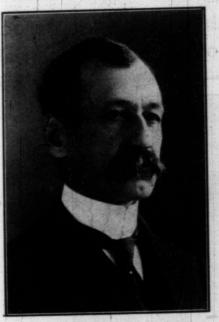

E. B. CREENSHIELDS, MONTREAL.

N. CURRY, MONTREAL.

J. S. IRVIN, OTTAWA.

C. J. McCUAIC, MONTREAL.

Curry, N., Montreal.—President, Canadian Car & Foundry Company, which absorbed three important car companies.

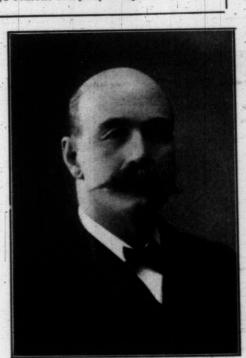

Flavelle, J. D., Lindsay.—President Canadian Cereal and Milling Company, one of two recent milling amalgamations.

Crant, Garnet P., Montreal.—President,
Dominion Bond Company, Limited.
President of the Dominion Canners,
Limited, Vice-President of the Canada
Bolt & Nut Company, Director of the
Canada Machinery Corporation.

dent, Amalgamated Asbestos Corporation, a large amalgamation controlling more than 8,000 acres of property in Quebec Province.

Harris, Lloyd, M.P.—Associated in the formation of the Canada Bolt & Nut Company merger, which later was absorbed by the Steel Company of Canada, another amalgamation of which Mr. Harris became a director.

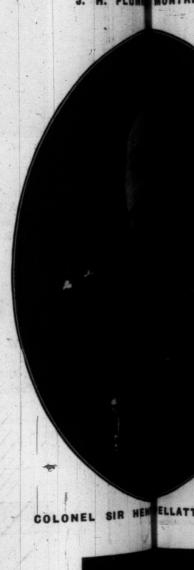

Irvin, J. S., Ottawa.—An active factor in the organization of the Canada Cement Company, Limited; managing-director of the International Cement Company, later absorbed. Mr. Irvin is now promoting a large cement company in Spokane, U.S.A.

J. B. TUDHOPE, ORILLIA.

J. H. PLUNT MONTRE

C. S. WILCOX MILTON

F. P. JONES, MONTREAL.

Forget, Rodolphe, Montreal.—Identified with the Dominion Steel & Coal transaction, and the Quebec Railway, Light, Heat & Power merger.

Jones, F. P., Montreal.—Formerly general manager of the Dominion Iron & Steel Company, and now general manager of the Canada Cement Company.

McGuaig, C. J., Montreal.—Has been associated with several industrial amalgamations.

An important factor in the Dominion Steel-Coal transaction, and holds one of the largest blocks of Coal shares.

Plummer, J. H., Montreal.—President, Dominion Iron & Steel Company, and of the Dominion Steel Corporation, which holds practically all the common stock of the Dominion Iron and Steel and the Dominion Coal Companies.

Tudhope, J. B., Orillia.—President of the Carriage Factories, Limited, which took over four carriage companies.

Wilcox, C. S., Hamilton.—President, Steel Company of Canada, the large steel merger consummated at Hamilton.

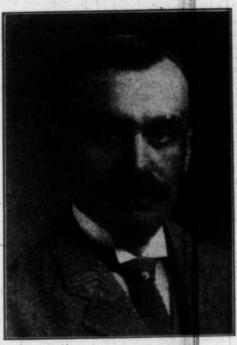

CARNET P. CRANT, MONTREAL.

J. D. FLAVELLE, LINDSAY.

LLOYD HARRIS, M.P., BRANTFORD.

RODOLPHE FORCET, MONTREAL.

44

SIR HEN ELLATT, TORONTO.

ILTON.

gr ne of C:

to account for that fact, but this is a phase of the amalgamation movement concerning which by no means sufficient information has been given by the average merger promoter. The aggregate capitalization of 19 mergers, including bonds, is \$199,600,000. The aggregate capitalization of 104 of the 135 companies absorbed was approximately \$65,340,500. That amount is increased in various ways, although few companies have been willing to give details though few companies have been willing to give thereof. Making allowance for these various consid Making allowance for these various considerations, the capitalization of the mergers still appears to be larger than that of the contributing corporations.

Was Some "Watered" Stock.

After allowing for money required for extensions, reorganization, new factories, etc., one must conclude that a proportion of the securities issued by the mergers has been what is popularly known as "water." Although many companies have not issued securities to the limit of authority granted them, their power to place bonds and stocks upon the market in future may extend far into the next decade. If stock and bond issues of the amalgamations are forced into domestic and other markets, with an appetizer in the shape of a bonus, there is likelihood of protest on the part of the public. This is especially so in the London market where the securities of several Canadian mergers have been floated and are likely to be sold in the future. The investor will regard favorably the stocks and bonds of a consolidation conservatively planned and financed without an ill-concealed effort to market practically useless and valueless securities.

It is only fair to cite certain particulars sent to The Monetary Times in connection with specific mergers. the case of the Canada Bolt and Nut Company, the Bellerille Iron and Horseshoe Company had only a nominal capital of \$10,000. The capitalization of the absorbed companies is not indicative of their assets, as each of the companies had large surpluses. This was also so with the companies absorbed by the Carriage Factories, Limited.

Small Capitals and Good Credit.

The Monetary Times is informed that nearly all companies which compose the Canada Cement Company had, comparatively speaking, small capitals and good credit. In other words, in many cases the capital was not sufficient to reproduce their plant and the whole business was conducted on capital borrowed, which they were able to do on account of their good credit. Whereas, when the Canada Cement Company was formed they not only purchased all the land, plant tailways machines are belonging to plant, railways, machinery, etc., belonging to the several companies, but also about two and a half million dollars of liquid assets, and have sufficient capital to carry on the business without using their credit, in other words, without borrowing.

The Owen Sound Portland Cement Company was a private corporation. The Alberta Portland Cement Company, Limited, had paid in about \$328,000 of capital and issued bonds for something over \$400,000. The Lakefield Portland Cement Company's paid up capital was \$1,759,000. The Lakefield Portland Cement Company, Lakefield, had issued capital of \$1,000,000. The Belleville Portland Cement Company, Limited, issued capital of \$2,100,351. The bonds issued were \$98,000. All the stock of the Lehigh Portland Cement Company, Limited, was owned by the Lehigh Portland Cement Company of Allantown, Pa., and no capital was actually issued. The Canadian Portland Cement Company, Limited, issued capital to the extent of \$1,489,100. The original capital of the Vulcan Portland Cement Company was \$2,500,000. In order to avoid taxes, which were paid by the parent company in the United States, the capital was reduced to \$500,000. The bond issue was \$1,500,000. Advances from the parent company are understood to have been in the neighborhood of \$2,760,000. The Canada Cement Company did not purchase the stock of the International Portland Cement Company, Limited, although it is believed stock was issued to the extent of \$1,250,000. In many of the above cases, credit was used to a considerable extent.

Later, Changed Their Plans.

It was originally intended that the Consolidated Ice Company purchase outright the businesses enumerated, but after negotiations had been opened, the conclusion was reached that it would be best for the City Ice Company to increase its capitalization, purchase outright or control the other companies and firms, which was afterwards done, issued to the public:

the capitalization of the individual companies absorbed. In most cases the aggregate capital of the former is in excess of the latter. Good reasons have sometimes been advanced by the City Ice Company, which is the oldest established by the City Ice Company, which is the oldest established business of its kind in Montreal. Therefore, although a consolidation of interests and management, there was no re-capitalization of earning power, and further, although a charter was secured in the name of the Consolidated Ice Company, this company to-day, we are doing any business.

> The Dominion Iron and Steel Company and the Dominion Coal Company still maintain their separate corporate existence, each with preferred stock and bonds as before. Nearly all the holders of the common stock in both companies, however, have exchanged that stock for common in the Dominion Steel Corporation, Limited, which has thus become prac-tically the sole holder of the common stock of the Dominion Coal Company (\$15,000,000), and of the Dominion Steel Company (\$20,000,000), thirty-five millions in all, which represents the total present issue of the corporation's securities.

Assets at an Appraisal Value.

It should be remembered, also, that more than one merger has taken over the assets, at an appraisal value, of the companies absorbed. For example, a company may have a paid-up capital and bonds outstanding of \$500,000. Its working capital may at times exceed \$900,000, being supplied by loans from some of the shareholders. In other words, the real capital employed by the concern would be approximately \$1,200,000, as compared with the capital of only \$500,000. In discussing this point with The Monetary Times, a well known financier added: "If we were simply buying the shares of the company and assuming these loans, we would naturally pay a much smaller amount than where we were buying all the assets at a strictly appraisal value, out of the proceeds of which the vendor has to liquidate all outstanding obligations."

Over-capitalization may easily prove the first pitfall of the Canadian merger movement. This phase is being closely watched by the investing public and the press. In this connection the Financial Times, of London, may be

Caustic Comment from Overseas.

"Such business, fusions often mean nothing more nor less than this: Three or four businesses have been well conducted through a series of years by the persevering efforts and constant personal actention of their respective proprietors. Being small craft, they have been prudent enough never to wander far from shore, and have been re-warded by never encountering a disaster while making their moderate hauls. But a new phase comes over the scene. They amalgamate, or are amalgamated by some financial force majeure, and, instead of working as so many compact and self-sufficing units, they are loosely consorted under the direction of some adventurous commander, whose ambitions are often far from being balanced by his practical seamanship, or who may even be a business nonentity, whose practice has hitherto consisted wholly in big market deals in the wealth produced by the energy of others. When circumstances such as these are verified, is it to be hoped that any measure of success attending the combination will be proportionate to the sum of the successes attained by the in-dividual factors? Most probably not.

"Especially if the union is expected to undertake work on a scale of which the constituent parts have no experience, and that, most probably, with an additional imposed burden of earning a return not only on the sum of their several capitals, but also on a large additional capital raised on the strength of the amalgamation. Further, in a country pro-gressing and developing so rapidly as Canada, it is very difficult to eliminate competition; there is no knowing where it may spring up next. We think that considerations such as these are enough to account for the impassive attitude of the British investor, which has been exercising the Can-adian press so much of late."

In compiling the statistics of capitalization, many difficulties were encountered. The figures are believed to be absolutely accurate, as a proof of them was sent to every merger named, in order that the statistics might be con-

At least thirteen of the amalgamations arranged since January, 1909, have issued to the public securities to the aggregate value of \$26,350,000. In approximately half of the new issues a stock bonus was made a feature. Investment offerings with a common stock bonus have found favor in Canada and the United States. It may be because the American thoroughly enjoys the speculative element. He loses on one, confident that the two succeeding will bring gain. In his own words he is fond of taking a long chance. The British investor eyes with suspicion an ordinary stock bonus tied to a bond issue. He is more conservative and may lose something thereby. In the end he gains most confidence and probably ends life the more rich. One thing assured is better to him than two things doubtful.

London Does Not Want Bonus.

Preferred issues usually meet with a good reception in Great Britain, and it is a poor policy to bait the market with common stock. Most of those interested in finance who have visited London recently have heard that criticism. Not long ago a London paper, speaking of Canadian industrials, said that the allotment of bonus ordinary shares on subscription of preference shares does not appeal to British investors, as it is avowedly based on flagrant over-capitalization—hence it is unsound. "If the preference shares as such were a sound investment they would not need the added attraction of the gift of a bonus ordinary share, and if the ordinary shares had proper inherent value they would not be given away. It is a system of finance with which British investors are not familiar, and with which we may hope they will not become familiar. For it has not identity with sound principles."

Principle is Injurious.

There is much good argument in these words. In Canada that argument does not always apply, although its application could be made in many instances. The important phase is that the British investor does not want a bonus with a bond or preferred stock issue. Therefore, it serves no useful purpose in offering it to him. Appeal after appeal for British capital on the bonus principle is injurious to Canadian credit abroad and may later prove harmful at home. A man may sell sewing machines in one county and find it necessary to offer the economical housewife a pot of jam as an inducement. In another county the preserve jar would arouse the good housewife's suspicion, with the result that the sewing machine would beg for a buyer. America lives in a bonus atmosphere, only it is called by a variety of names. In Great Britain the investor knows what he wants to buy and wha he wants to pay. Those who cannot offer him the right thing should keep out of the market altogether.

The bonus to a large extent seems to be another temptation to over-capitalization, and promoters of new issues may

well consider whether or not a comparatively small capitalization without a stock bonus offering is the best and most conservative financing. After all those who look for dividends on common stock in a company of huge capitalization may become possessed of weary eyes.

EARNINGS PRIOR TO AMALGAMATION

So young is the merger movement in Canada that with one exception it is too early to judge the financial results of the first year's operations. In no case has the public been given figures respecting the earnings of individual companies prior to consolidation. The prospectus has said that the earnings of the combined companies have been so much and that allowing for economies to be effected the earnings of the combine should be so much, enough to pay a dividend on the bonds, preferred and common stock. Statistics as to individual earnings are evidently considered the private information of the promoters and others directly interested. To this attitude many have taken exception.

Estimates of the earnings of consolidations are important. It will be well to quote the prospectuses of several companies in this connection.

The chartered accountants' report, in the case of Murray-Kay, Ltd., stated in part: "Eliminating interest, making a reasonable deduction for depreciation of building, store fixtures and furnishings and allowing the sum of \$25,000 each year for directors' fees and salaries of executive officers, we find the combined net profits for the three years ended January 31, 1910, to have been \$580,375.65. These earnings are at the rate of \$196,458.55 per annum; an amount equal to over 13 per cent. on the preferred stock of the new company, which would leave, after the payment of the dividend on the preferred, earnings equal to over 6 per cent. on the common stock. Considering that in this three-year period occurred the panic year of 1907-08 and consequent curtailment of business, and taking into account the economies to be effected under this consolidation and the impetus that will be given to the business of the new company by reason of the additional cash working capital now being provided, it is confidently expected that the future earnings will be very much in excess of the foregoing figures."

Based Upon Audits,

Based upon audits, the net earnings of the properties now owned by the Canadian Car & Foundry Company, after making adequate provision for depreciation, have been for the last two fiscal years:

Rhodes-Curry Co., Ltd., year ended Dec. 31..(1907) \$230,425.18 (1908) \$302,121.27 Canada Car Co., Ltd.,

30. (1908) 446,366.05 (1909) 278,079.60 vear ended Sept. Dominion Car & Foun-Ltd., year \$962,536.03 \$1,001,037.52

"The average net earnings per year for the above two fiscal years have been over \$1,000,000, or nearly five times the annual interest on these \$3,500,000 6 per cent. bonds. This period has been a very dull one for car builders, and business was obtained under keen competition with plants running at only half capacity."

Three Years' Net Earnings.

The affairs of the Carriage Factories, Limited, were audited for the fiscal years ended 1905-6-7-8 and showed that the average net earnings for the years 1905-6-7, (after providing for cost of management, depreciation, bad debts, etc.), amounted to \$163,280, and the average for the four years ending 1908 (which includes a period of trade depression experienced by all manufacturing industries) amounted to \$120,509. "From the present trade conditions and the increase of business of the several companies since amalgamation, it is conservative to state that the earnings for the present year should be, at least, the same as the average of 1905-6-7, and as our organization is completed by the centralization of our executive, and the economies which are being effected in the purchase of materials and in the manufacturing of parts formerly purchased, etc., there should be a sav-ing of, at least, \$50,000." On this basis a statement of earn-ings would be as follows: Net annual earnings, after providing for cost of management, depreciation and bad debts, \$163,280; deduct fixed charges, interest on \$500,000 first mortgage 6 per cent. bonds, \$30,000; surplus \$133,280. In addition, the estimated economies to be effected in different ways, amount to \$50,000.

Surplus Over Required Amount,

"The net earnings of five of the eight companies included in the Canadian Cereal & Milling Company have always, during the last three years, shown a surplus over the amount required for bond interest, and during the last fiscal year of these companies, their net earnings, after eliminating interest paid on borrowed money, and after charging all expenditures for repairs and renewals, but before allowing for depreciation, amounted to \$96,511.23, equal to over twice the annual interest charge. It is only reasonable to suppose that the net earnings will be largely augmented through the economies and efficiencies which will naturally come through the amalgamation. The president's estimate of earnings for the first complete year of the company's operation shows a surplus available for bond interest of between four and five times the amount required for this purpose.'

The affairs of each of the companies included in the Carriage Factories, Ltd., were audited.

"After making necessary adjustments on account of additional working capital being provided through the bond issue, and the reduction in liabilities already made, and after providing for depreciation and bad debts, the average earnings, as applicable to the merger, are as follows:

Average net earnings, 1905-6-7-8 \$120,500 Average net earnings, 1905-6-7

"The earnings in company with the general experience, suffered by the trade depression in 1908, but from present indications it is estimated that for the year 1909 they will be

equal to the average net earnings for 1905-6-7-8.

"The following may be regarded as a conservative estimate of future earnings of the company:

Net annual earnings, after providing for cost of management, depreciation and bad debts (same as average 1905-6-7).. \$163,280

Minimum economies to be effected \$213,280 Fixed charges-

Interest on \$500,000 of first mortgage honds at 6 per cent. per annum. (This includes \$200,000 additional bonds to be issued in 1910 to cover the cost of factories under con-. \$ 30,000 struction)

Dividend of 7 per cent. on \$1,200,000 preferred stock

84,000 \$114,000

Leaving available for dividends on common stock "Equivalent to over 8 per cent."

\$ 99,280

The financial statements of the companies seven of the eleven mills, owned or to be owned or con-trolled by the Canada Cement Company, Limited, showed net earnings for the year 1908 of \$627,384.20 or more than twice the interest on the bond issue.

Bond Interest Five Times Over.

"It is conservatively estimated that the net earnings of the Canada Machinery Corporation for the ensuing year, based on present output, will be \$120,000, showing the bond interest earned five times over. These earning materially increased during the following years. These earnings will be or's report of the various factories has not as yet been com-pleted, but the audit of one of the principal companies shows average net earnings for the years 1900 to 1910 of far more than the amount required to pay the interest on the entire issue of \$400,000 bonds."

In dealing with the savings to be effected by combination, the promoters have given as a rule only general information. For instance, the Murray-Kay, Limited, "confidently expects that the future earnings will be very much in excess" of the average earnings of the individual com-panies. The Rhodes, Curry Company, Limited, figures that the average net earnings of the three companies absorbed by it is equal to nearly five times the annual interest on the bonds of the consolidation, noting that this result was obbonds of the consolidation, noting that this result was obtained under keen competition and with plants running at half capacity. The Canadian Cereal & M... ng Company thinks that the net earnings "will be largely augmented," the president's estimate for the first complete year showing a large surplus available for bond interest. The Carriage Factories, Limited, makes a definite statement that there solidation solidation.

FIRST FINANCIAL RESULTS.

As yet, only one report by which to judge the financial results of combination is available, the first annual statement of the Amalgamated Asbestos Corporation, Limited.

ferred stock, amounting to \$21,875, and directors' fees, depreciation, etc., amounting to \$21,300) was carried toward after the year's operations. Dividends on the preferred stock had been paid for but one quarter. The profits for the year ended May 31st were \$517,969.80. From this was taken one year's bond interest amounting to \$375,000 and the dividends on the preferred stock for the quarter ending. April 15 The surplus of \$110,157 (less accrued interest on preon the preferred stock for the quarter ending April 1st, amounting to \$32,812.50. The total dividends on the preferred stock for one year amount to \$131,250, so that had the dividends been paid for the entire year, a surplus of but \$11,719 would have remained against the directors' fees, etc., of \$21,300 mentioned above.

Some Disappointment Was Expressed.

Some disappointment was expressed in financial circles over the exhibit for the year. This was chiefly from those who had been looking forward to dividends upon common stock at an early date. From this standpoint, the report is disappointing, inasmuch as it does not indicate that the common stock holders can possibly receive any dividends for some years to come. This is true even when it is remembered that large even when it is remembered that large even when it is remembered. bered that large extensions and improvements were made to the property of the company, during the past year, out of earnings. How much has been put back into capital is not made clear, but the report states that the cost to the company of the various improvements will amount to \$250,000 when they are finished.

Taking all this into consideration, it might be said that the surplus shown in the report is fairly representative et what will be shown after preferred stock dividends have been provided for during the year now entered upon. As near as can be seen, the earnings based on last year's operations without the advantages obtainable from extensions referred to, would be between 1 per cent. and 2 per cent. on the com-mon stock issue of \$8,500,000. It is expected that the new ns allations and greater f cili ies provided for mining will result in an increased output estimated at 20 per cent. This

output will be possible at a reduced cost. The market of the product has been fairly satisfactory, the only lessened demand being for what is known as a paper stock. At the end of the fiscal year, there were contracts on the books amounting to \$3,637,000. At the present time it s understood that these contracts amount to about \$3,000,000. Spread over all the products, the average selling price throughout the past year has been about \$42,00, on which there is a profit of about \$21.00 per ton. As the tonnage produced during the initial year of the corporation was small, less than 30,000, and as the management expected to produce

37,000 tons during the current year, the indications are that parties failed to agree upon a chairman the the profits will be in the neighborhood of \$7,50,000.

Competition May Complicate

This result is dependent upon the stability of the asbestos market. It is not improbable that acute competition may temporarily complicate matters. A disagreement among the manufacturers of asbestos materials during the past year had an adverse effect, and should the producers of asbestos force more of their products upon markets, prices may be depressed. This is a contingency which the Amalgamated Asbestos Corporation management evidently had in view in preparing for an increased output at less cost.

The above results will be found of additional interest, owing to the fact that the Amalgamated Asbestos Corporation was the first on the list of large flotations which have appeared since the recovery of the financial depression of

A departure will be the closing down of the mines for four winter months. It was intended to operate the mines throughout the year, but it has been found extravagant to do so. Operations are now being directed to produce during eight months only, and to this arrangement companies other than the Amalgamated have given their assent. The June output of 4,300 tons will probably be near the average for the current year.

NEW INVESTMENTS AND LABOR EMPLOYMENT.

The Monetary Times has asked those identified with the companies under review, whether any new investments the companies under review, whether any new investments have been made in plant extensions or otherwise as a result of the amalgamation. The Carriage Factories, Limited, has purchased a new and modern building for the E. N. Heney plant and has rebuilt and enlarged the Tudhope plant which was destroyed by fire prior to the amalgamation. Extensions have also been made to the Canada Carriage Company's plant. The new capital expenditure of the Carriage Factories, Limited, up to the end of June was \$350,000. The Amalgamated Asbestos Corporation made new investments during the first year of \$250,000. The National Breweries, Limited, has made additions and extensions to plant to the extent of \$500,000. extent of \$500,000.

In several cases amalgamation has meant increased employment of labor. The Maritime Fish Corporation has increased its staff on account of extended operations. The Amalgamated Asbestos Corporation is employing more labor. The majority of companies, so far as can be learned, have made no changes in the amount of labor employed. have made no changes in the amount of labor employed. A gentleman closely identified with one of the large amalgamations thinks that, from the workman's point of view, in the long run, he will benefit. "At the same time his wages will tend to rise, as unnecessary and ruinous competition, (which is often the result of individual traders endeavoring to get a fair share of business offered), will, to a large extent, be eliminated. The demand for his labors will be steadier and more continuous, as production can be regulated more effectively where there is a number of firms combined, with the same object in view." I will be interesting to see how strong a force the Canadian industrial consolidation will become in the labor situation. industrial consolidation will become in the labor situation.

COMBINES AND TECISLATION.

This question so rapidly assumed a national and economic importance that in April the Dominion Government introduced a bill which later became law, dealing with the question of combines. The Honorable Mackenzie King, who was responsible for the legislation, gave at the time a lengthy exposition of the complex subject. Where there was a reasonable ground he said for believing that a combinaa reasonable ground, he said, for believing that a combina-tion existed, unduly enhancing prices or unfairly restricting trade, the consumers, represented by a group of their num-ber, might make out a case before a judge of the high court, and if a prima facie case was made, then an investiga-tion might be ordered by the judge, which investigation would be conducted at the expense of the government.

In order that the investigation might be as fair as possible, the bill provided that each of the parties interested in getting at the truth should be represented on the board of investigation. The parties making the complaint would be asked to name their representative, as would also the parties against whom the complaint was made, and these two representatives would be called upon to nominate as chairman of the board of investigation a judge of some court. If the

government

Restraint Upon Capital Aggregations.

Figures prepared by the Department of Labor showing the extent of the increase in the cost of living since 1896 were quoted. During the past twenty years prices had increased from thirty to forty per cent. in most of the commodies in the nature of farm products. While manufactured articles had not increased to the same extent, there had been a perceptible gain. No attempt was being made in the bill to legislate upon mergers and trusts as such. The intention of the bill was to place some form of restraint upon those large aggregations of capital, so that advantages which might come from large combinations of wealth might in some part be conserved to the public, who had he ped to make possible these large combinations.

Prosperity and Cost of Living.

The large number of combinations during the past decade and an increase in the price of commodities were sufficient reasons for the creation of legislative machinery to enable trusts to be examined if necessary, Mr. King did not attribute the higher cost of living to the formation of combines—a popular view. The increase in price of commodities indicated in the case of Canada that the country and its consuming capacity were developing. Improved transportation and cold storage facilities have enabled the surplus of the harvest season to be saved from waste for use remainder of the year, and to be taken also more easily from remainder of the year, and to be taken also more easily from the place of production to the place of demand.

They had increased the prices on commodities. These were for the benefit of the farmer, but against them he had to meet the increase in the cost of labor. There had been a startling movement from the country to the cities, which had not only diminished the productive capacity of the country, but increased the demand by the cities on the country for food

Foreign Capital and Production.

There had been an increase in the standard of living, and many economists, noting that the supply of gold had doubled in the last ten years, and again in the ten years before, had said this increase had reduced the purchasing power of gold and thereby the prices of commodities. Mr. King stated it was estimated that two hundred millions of foreign capital had come into Canada for industrial development. During the process of development the men engaged were not altogether producing, but had to be fed. As shown by The Monetary Times' special investigations, the amount of British and foreign capital invested in this country is larger than \$962,000,000, and the figures, therefore, further strengthen Mr. King's argument. strengthen Mr. King's argument.

He also spoke of the tariff upon prices pointing out that in so far as the tariff limited the field of competition for the sale of goods, it must be regarded as a factor in prices, and also responsible in part for the formation of trusts and combines. Some are inclined to think that the new law is not sufficiently strong. As yet it has not been tested.

SOME POINTS IN BRIEF.

With the eyes of the manufacturing world upon the Canadian import market, it would seem almost impossible for industrial combination in Canada to eliminate competition. In the case of dire necessity, the Government has a remedy for monopoly in the shape of proper regulation of prices by tariffs. If a combine is exerting an altogether unreasonable influence on market prices, a lower tariff on imports would help to remedy the situation. As yet, there appears to be no sign of such an acute position. sign of such an acute position.

The growth of trusts in the United States makes the matter of importance to Canada. We have only touched the edge of the merger arena. It is possible for the Dominion to profit by the experience of the United States in order that industrial consolidations may carry on their legitimate projects without interference, and that the public may be protected from harmful influences. The two chief dangers of the tected from harmful influences. combine or trust are the possibility of the enhancement of combine or trust are the possibility of the enhanced commodity prices and of overcapitalization, with large issues of securities to the investor. In the Fielding tariff, there is a provision for giving complete or partial relief when it is shown that a combination unduly increases prices. This provision has already been applied with satisfactory results, not in the form of increased imports, but in the proportionate

The payment of dividends on unreasonable capitalization must in some way be wrung from the public. Common stock issues often fail to represent an investment, yet dividends are expected to be paid thereupon. Only the consumer can pay them. The position of the individual manufacturer may also suffer unless large aggregations of capital are properly regulated. The small as well as the large capitalist is a useful unit in nation building. Industrial combinations should not be able to crush him in the event of a refusal to be absorbed. On the other hand, the amalgamation has sometimes proved a factor in preventing a general break in prices which would cause widespread ruin. When bad times come, the combine is usually well able to cope therewith. During the period of depression three years ago, the steel industry of the United States made itself an almost new feature in economic history. It steadied the markets which iron on all other such occasions, had demoralized.

An unfavorable feature of the consummation of combines in Canada is the fact that it seems to have created a new business of merger making. In some cases the primary promoters have had little real interest in the companies which it was proposed to amalgamate, or in the industry concerned. The merger makers hunt for an untrodden field in which to exercise their financial prowess. Obtaining the willing ear of the individual manufacturer, they help to arrange amount of capitalization, and draw their remuneration. Then they consult the industrial list for another operation. The professional merger maker may easily become a menace to the country, although his talents properly applied in connection

with combinations, may be of service to clean finance.

So far the industrial merger of Canada has worked little harm. It may be found later that too many securities have been issued to the public, and that in certain cases, difficulty will be experienced in paying dividends. Annual reports during the next few years will throw light upon this phase. Public opinion is rather inclined to condemn the industrial consolidation simply because it has received a "bad name," and has figured largely in the law courts of other countries. The foregoing statistics and facts, for the first time presented in concrete form, may possibly allow the reader to form at least a fair opinion.

EAST AND WEST.

Progress Noted in Business, Commercial, Banking, and Other Spheres Throughout the Dominion.

Prince Rupert has a Progressive Association, of which the following are the officers for the current year: president, Mr. J. F. MacDonald; first vice-president, Mr. H. H. Clark; second vice-president, Mr. W. J. Greer; secretary-treasurer, Mr. F. M. Lanic.

A new company, to be known as the Ikeda Mines, Limited, has been organized in Vancouver to take over the property of Japanese at Ikeda Bay, Queen Charlotte Islands. This mine has been operated for several years, and is considered a good buy. The purchase price was \$200,000.

A year ago, the market. Last winter, there was general activity in the coast cities. Now Port Mann looms up with nearly all the possibilities of Prince Rupert. Situated on the south side of the

bilities of Prince Rupert. Situated on the south side of the Fraser, opposite New Westminster, it is a promising place.

It is stated that Mr. Eugene Coste, of Toronto, is to some extent responsible for the discovery of natural gas

about twenty miles from Montreal. A number of wells have been sunk and indications of gas have been observed. The company which is pushing the project is the Quebec Fuel Company.

Opponents of the tram tranchise in Point Grey municipality, B.C., have taken the first legal steps in an attempt to quash the by-law, which was approved by the ratepayers. This by-law gives the franchise to the British Columbia Electric Railway Company for forty years and in the instance

of two particular streets, 99 years.

An automatic telephone company is making application for a franchise in Vancouver, and discussion is proceeding in the city council and board of trade. A committee of the latter has been appointed to go into the whole question and report. The feeling in that body is that there is room for improvement in the present system, but that a dual system would be unsatisfactory.

Representatives of the United Farmers of Alberta and the Vancouver Board of Trade, conferred in Vancouver, as to the improvement of trade between British Columbia and Alberta. As it is now, the freight rates of the C.P.R. are alleged to be an effectual barrier against free interchange of produce. With grain coming west, and larger demand for beef and other farm products in British Columbia, which

has in its turn lumber and fish to ship east, there is ample

opportunity for trade.

An increase of 10,843,381 tons in the volume of traffic through the Canadian canals is reported for the period since the opening of navigation to the end of July. The Soo Canal particularly, is doing an immense business. The tonnage increases, compared with the corresponding period, are as follows:—Soo Canal, 10,305,583; Welland, 181,821; St. Lawrence, 180,815; Chambly, 87,910; Ottawa, 46,873; Rideau, 20,360; Murray, 19,716. The St. Peter's and Trent Rideau, 20,360; Murray, 19,716. canals show slight decreases.

An interesting communication was read at the last meeting of the Vancouver board of trade. It was from Dr. Eugenio Dahne, commissioner of the Brazilian government It was from Dr. at San Francisco, who stated that his government was at San Francisco, who stated that his government was desirous of promoting better trade relations with the Northern Pacific coast of North America. To that end, invitations have been extended to the leading chambers of commerce of the coast to appoint representative delegates to visit

of the coast to appoint representative delegates to visit Brazil next November as the guests of the government there.

The Maritime Express Company has been absorbed by the Dominion Express Company. The former operates between St. John and Digby, and Yarmouth and Boston by boat, and between Yarmouth, Digby and Halifax by rail. The change, which took place September 1st, gives the The change, which took place September 1st, gives the Dominion Express entry to Boston and will enable Western Canadian shippers to get single through rate to western Nova Scotia, and fish shippers one rate from Nova Scotia west. It is a natural sequence to absorption of Dominion Atlantic railway by the C.P.R.

That the Porcupine gold region is in a healthy condition from a mining point of view, is the statement made to The Monetary Times, by Mr. H. E. T. Haultain, consulting mining engineer, who has recently returned to Toronto from a three week's trip in that district. week's trip in that district. Disappointment seems to be chiefly borne by those who have failed to create a stock market "boom," despite the actual production of gold. The area in which gold has been found has been extended. The area in which gold has been found has been extended. policy at Porcupine, adds Mr. Haultain, is little talking and much good development work. This is what is needed

and much good development work. This is what is needed in our mining industry.

The Census and Statistics branch estimates that on March 31, when the fiscal year closed, Canada had a population of 7,489,781, it being estimated that there was a growth of 305,000 over the year previous. In detail the department estimates the population as follows: Maritime Provincer, 1,060,678; Quebec, 2,124,834; Ontario, 2,687,861; Manitoba, 406,111; Saskatchewan, 277,500; Alberta, 321,862; Manitoba, 496,111; Saskatchewan, 377,590; Alberta, 321,862; British Columbia, 321,33; unorganized territories, 59,050. Immigration not shown by provinces, 10,862. These calculations indicate that the census, which will be taken June next, will show Canada to have a population of between eight and nine million.

The total production of all kinds of pig iron in Canada in the first half of 1910 amounted to 376,271 gross tons, compared with 327,449 tons in the last half of 1909 and 349,641 tons in the first half. This is an increase of 48,822 tons compared with the last half of 1909, and of 26,630 tons compared with the first six months. The production of bessemer night iron in the first balf of the production of bessemer night iron in the first balf of the production of bessemer night iron in the first balf of the production of bessemer night iron in the first balf of the production of bessemer night iron in the first balf of the production of bessemer night iron in the first balf of the production pared with the first six months. The production of besse-mer pig iron in the first half of 1910 amounted to 129,208 cons, against 60,006 yons in the last half of 1909 and 99,639 tons in the first half of that year. The production of basic pig iron in the first half of 1910 amounted to 165,984 tons, against 192,853 tons in the last half of 1909, and 165,112 tons in the first half.

Retaining its position of tenth place in the aggregate of the world's shipping, the Dominion of Canada had on its register books at the end of last year, 7,768 vessels measuring 718,333 tons, an increase of 166 vessels and 16,229 tons as compared with the corresponding year. The number of steamers on the register books on the same date was 3,229, with a gross tonnage of 513,962. Assuming the average value to be \$30 per the aggregate value of not registered tonnage would be \$21,556,590. The number of new vessels, built and registered during the year was 327, measuring 25,306 tons net. Estimating the value of new tonnage at 845 per ton gives a total of \$1,138,770 for new vessels. During the year 246 vessels were removed from the register books.

The sub-branch of the Bank of British North America

The sub-branch of the Bank of British North America at Hamilton Road, London, Ont., has been closed and the business transferred to the London branch.

When the Royal Bank takes over the Union Bank of Halifax next month the Royal will have fifteen branches in the West Indies situated as follows: Caribarien, Cuba; Camaguey, Cuba; Cardenas, Cuba; Cienfuegos, Cuba; Havana, Cuba; Galiano Street, Havana; Matanzas, Cuba; Manzanillo, Cuba; Mayari, Cuba; Nassau, N.P., Bahamas; Ponce, Porto Rico; Port of Spain, Trinidad, B.W.I.; Sagua, Cuba; Santiago, Cuba; San Juan, Porto Rico; San Juan, Porto Rico. Porto Rico.

SASKATCHEWAN LIFE INSURANCE

For Four Years-Companies Have Much Money Invested in Province-Premium Income Doubled.

That the life insurance premiums collected in Saskatchewan during 1909 amounted to \$722,502, is shown by the Government report for that province. Thirty companies were writing life insurance in the province last year, against twenty-seven the previous year, twenty-five in 1907, and twenty-two in 1906. Almost ten million dollars were invested last year in Saskatchewan by life companies doing business In 1908 there were almost eight millions invested, in 1907 between five and one-half and six, and in 1906 about three millions. Thus while the premium income has about doubled in three years, the amount of investments at end of 1909 was more than four times as great as the total of 1906.

Some of the Individual Records.

Although the Great-West Life only collected \$54,299 in premiums during 1906, and had no investments in the province that year, the investments at end of 1900 totalled \$2.-484,394, while the premium income amounted to \$123.761 0ther companies having over one million dollars invested in Saskatchewan at end of last year, were the Canada Life, \$1,094,065: Confederation Life, \$1,830,532, and Manufacturers Life, \$1,658,480; while the Royal had only \$380 invested, and the Metropolitan \$408. The Great-West and Confederation are the only two life companies whose premium income last year exceeded \$100,000. It is worthy of note that while the number of companies doing business innote that while the number of companies doing business increased each year, there was only one company to go out of business, this being the Mutual Reserve, which transacted a little business during 1906, but which had no money invested in the province. in the province.

STETTLER, ALBERTA, IS PROCRESSING.

The present year witnessed the advent of the Canadian Northern Railway into Stettler, by the construction of the Vegreville to Calgary line; and it has just been announced by the company that the new Brazeau line will run to Stettler, where the passenger and traffic business will be handled.

This will mean an increased amount of business, and consequent population. The new line is being graced, and will be completed next year. The trustees of the Stettler school district are erecting a new school at a cost of \$50,000, and it will be one of the best equipped in the West when finished. The town council granted a loan of \$7,000, in aid of the construction of a flour mill, and this is now doing an excellent trade. lent trade.

The Canadian Pacific Railway Company have a several additional subdivisions to their list of town lots. crop of spring wheat, for which the district is famed, will prove to be a record. The town council are now issuing deprove to be a record. The town council are now issuing de-bentures for \$29,000 to provide a system of waterworks, which are in course of construction. Their last issue of \$20,500 realized a bonus of \$31 for 5% per cent. debentures. The present waterworks issue will bear interest at 5% per cent., and are repayable in twenty equal annual instalments of principal and interest. There is every probability of an electric light and power plant being installed this fall by a private concern. The present rate of taxation is 25 mills, but the assessment is upon a low basis. The debentures issued by the school trustees for \$40,000, realized \$40,114, interest being 5 per cent., and term 30 years.

SCHOOL DISTRICTS BORROWING MONEY.

E. Wood, formerly manager of the Home Bank branch at Ilderton, has been appointed to the managership in Walnut.

WORKMEN'S COMPENSATION ACT

Of Manitoba-Definition of Employer and Employee-Responsibilities of Each Party.

The Manitoba Workmen's Compensation Act of 1910, applies to employers having five or more workmen in their employment when the accident occurs.

Unless the context otherwise requires, "employer" includes the Crown, a municipal corporation, and any body of persons, corporate or unincorporate, and the legal personal representatives of a deceased employer, and where the services of a workman are temporarily lent or let on hire to another person by the person with whom the workman has encered into a contract of service or apprenticeship, the latter shall, for the purposes of this Act, be deemed to continue to be the employer of the workman whilst he is working for that other person:

What Constitutes a Workman.

"Workman" includes every person who is engaged in an employment to which this Act applies, whether by way of manual labor or otherwise, but does not include any person employed otherwise than by way of manual labor whose remuneration exceeds twelve hundred dollars a year, or a person whose employment is of a casual nature, or a person who is employed otherwise than for the purposes of the employer's trade or business, or an outworker, but, save as aforesaid, means any such person who has entered into or works under a contract of service or apprenticeship with an employer, in any employment to which this Act extends, whether by way of manual labor, clerical work or otherwise, and whether the contract is express or implied, is oral or in writing; any reference to a workman who has been injured shall, where the workman is dead, include a reference to his legal per-sonal representatives or to his dependants or other person to whom or for whose benefit compensation is payable.

As To The Compensation Clause.

The employer shall not be liable under this Act in respect of any injury which does not disable the workman for a period of at least two weeks, from earning full wages at the work at which he was employed; and shall only be liable to pay compensation from the beginning of the third week after

Workmen injured by the negligence or wilful act of employer, cannot recover compensation under the Act, and also independently of the Act in civil suit.

No compensation where injury is due to drunkenness of workman or to his serious misconduct. But a claim for com-pensation for total disablement or for death shall not be disallowed only because the injuries were sustained by reason of the serious or wilful misconduct of the workman.

Questions arising under the Act as to liability for com pensation, or as to amount or duration of compensation, if not settled by agreement, shall, subject to the provisions of the first schedule of this Act, be settled by arbitration.

Technicalities Not Admissible.

The Act does not affect any proceedings for a fine under the enactments relating to mines, factories or workshops, or

the application of such fine.

The want of or defect in notice shall not be a bar to the maintenance of proceedings under the Act.

If the Attorney-General, after taking steps to ascertain the views of the employer and workman, certifies that any schedule of compensation, benefit or insurance for the work schedule of compensation, benefit of insurance for the work-man of an employer, in any employment, whether or not such scheme includes other employers and their workmen, provides scales of compensation, not less favorable to the workmen and their dependants than the corresponding scales contained in this Act, and that, where the scheme provides for contribu-tions by the workmen, the scheme confers benefits at least equivalent to these contributions, in addition to the benefits to which the workman would have been entitled under this Act, and that a majority to be ascertained by ballot of the workmen to whom the scheme is applicable are in favor of such scheme, the employer may, whilst the certificate is in force, contract with any of his workmen that the provisions of the scheme shall be substituted for the provisions of this Act, and thereupon the employer shall be liable only in ac-cordance with such scheme, but, save as aforesaid, this Act shall apply, notwithstanding any contract made to the con-trary after the commencement of this Act.

Some Powers of the Attorney-Ceneral.

The Attorney-General has power to revoke the certificate for cause.

Where the principal is proceeded against by a workman of the contractor, the contractor, on the application of the principal, may be added a party to the proceedings, and the principal may in those proceedings be given a remedy over

against the contractor for whatever amount of compensa-tion and costs may have been awarded against him.

A workman may recover from the contractor instead of

from the principal.

When an employer becomes insolvent his rights as an insured person shall be transferred from the employer to the workman.

A workman cannot sue for or recover compensation, and also sue for damages.

BUILDING FOR THE FUTURE.

Some Advice to the Field and Office Staffs-Mr. H. B. Andrews Writes Interesting Paper.

(Winner of Cup presented by Mr. H. C. Cox at the recent Life Underwriters' Convention.)

It would be difficult to exaggerate the scope of the field which lies before us in Canada, and still more difficult to overestimate the greater prospects which lie before the business of life assurance in years to come. I am convinced that it is not necessary to give many arguments to prove the correctness of these statements. We have only to look at the emigration records of this and of the past few years and then look westward to the provinces of Manitoba, Sasand then look westward to the provinces of Manitoba, Sas-katchewan and Alberta, where already wonderful cities and business centres have been firmly and substantially estab-lished, and remember that not one-third of the lands of each of these magnificent provinces are under cultivation or populated, and that thousands and thousands of people are pouring into these great provinces every year; that new districts and new towns are springing into existence in a most marvellous manner—cities doubling their population, new coal and mineral lands being located, many industries being established, and established houses doubling their capacity, and I know every thoughtful man will say the scope of the field is immense, the possibilities almost beyond our comprehension.

Some Prophesies Regarding Canada,

Leading financial prophets of the day tell us that Can-ada in the near future will have a population of twenty millions and will become the industrial storehouse of the world. These are daring prophesies, but their fulfillment will appear neither impossible nor improbable to the person who remembers how richly this country is endowed with arable lands of great producing qualities, with timber, minerals, fisheries, etc., etc. Most of us I believe, have yet to learn of and to fully appreciate our heritage—which is the greatest ever. Life assurance builders should more than most men, appreciate these endowments, for it is people and wealth that give us our opportunity for work, people who need assurance wealth to be protected and perpetuated perpetuated.

No one who is at all familiar with the conditions and business of this country can be blind to the tremendous importance of the life assurance business—it comes home to every one.

Can Have Too Many Architects.

On this account, our building for the future must be On this account, our building for the future must be carefully, substantially, aggressively, and very sincerely carried on, so that our building will not only be looked upon as a thing of strength and beauty, but also a building of great solidity; every stone so firmly laid, every mixture of reserve and surplus cement so honestly and proportionately mixed and placed, making such a solid and impregnable wall that there will be no question as to the ability of the wall, that there will be no question as to the ability of the structure to afford the absolute protection it is designed to afford. While we can scarcely have too many builders assisting in this good work, we can have too many architects or overseers, who get an idea that they can beautify the building by erecting porches according to their own peculiar style of architecture or design. This we all know will add no beauty or strength to any building, but decidedly the reverse in every case. I have no thought of monopoly or restriction of trade when I state that I believe every discretion should be shown by the provinces and the Domin ion in the granting of charters to companies promoted by Mr. Anybody, mostly for the benefit of the promoter him-self, or of some faddist who sets out to revolutionize insurance world, regardless of any actuarian or other insurance experience.

As to the Faddist and Fakir.

These leantos are always a disappointing proposition, and although perhaps not intentional, to deceive and mislead the people and thus do much harm to the business in general—destroy the coveted confidence so needful for the successful upbuilding, power and prestige of the business in the future.

NORTHERN MORTGAGE COMPANY OF CANADA

HEAD OFFICE

WINNIPEG

Authorized Capital - Ten Million Dollars

Proposed and Provisional Directors:

- J. H. ASHDOWN, Wholesale Merchant.
- J. H. BROCK, Managing Director Great-West Life Assurance Company.

GEORGE R. CROWE, Grain Merchant.

- G. F. GALT, Wholesale Merchant.
- J. HANBURY, Lumber Merchant.
- D. K. ELLIOTT, Wholesale Merchant.
- G. V. HASTINGS, Manager Lake of the Woods Milling Company.

- A. MACDONALD, Wholesale Merchant.
- J. A. McDOUGALL, Retired Merchant.
- R. D. McNAUGHTON, Retired Merchant.
- R. T. RILEY, Managing Director The Northern Trusts Company.

JERRY ROBINSON, Merchant.

CAPT. WILLIAM ROBINSON, Steamboat Owner.

F. W. STOBART, Wholesale Merchant.

The Northern Mortgage Company of Canada is incorporated by special Act of the Dominion Parliament; the Head Office at the City of Winnipeg. By its charter it is vested with all the usual powers of a loan company.

Attention is called to the Provisional Directorate, which is an exceptionally strong one, a guarantee that the Company's affairs will be conducted along careful, conservative and energetic lines.

Two and one-half millions of stock is being issued at its par value. Of this amount over one million five hundred thousand has already been subscribed for and allotted to the shareholders of the Northern Trusts Company and their friends upon exactly the same terms as it is now being offered to the public, namely: Ten per cent. on allotment and ten per cent. yearly thereafter every 1st October. Not one dollar has been paid nor will be paid in the way of commission for selling this stock, and the organization expenses of this Company will consist only of the actual disbursements made to secure the Charter, and of the necessary expenses in the issuing of the prospectus, etc.

Further information, together with prospectus and application forms will be furnished upon application to The Northern Trusts Company, Travellers' Building, Winnipeg.

APPLICATION FOR SHARES.

......191

I hereby apply for Shares of One Hundred Dollars each, amounting to Dollars of the Capital Stock of the NORTHERN MORTGAGE COMPANY OF CANADA, Winnipeg, and agree to pay Ten per centum, or Ten Dollars per Share, on the first day of October, 1910, or on allotment, and Ten per centum on the first day of October in each succeeding year, until fully paid up, subject to the provisions of the Company's Charter, but with the privilege to me of paying any greater amount, or in full, at any time previous, it being understood that the Directors of the Company will pay interest on such prepayments at a rate equivalent to the rate of dividend declared from time to time, but not exceeding Eight per centum per annum.

BUILDING FOR THE FUTURE

(Continued from Page 1346.)

Life insurance is, and will be, an instrumentality for the equalization, not only of ill fortune, but good fortune. The blow which would crush the family of one, which might leave his wife in want and his children paupers, will be warded off by being borne by the many and felt by none.

Thereby a home is provided for the widow and the children are fed, educated and equipped for the struggle of life.

CORK-TIP COMFORT

A man who has once smoked a big, luxurious YILDIZ MAG-NUMS Cigarette will never be quite satisfied with any other brand. Try—

BUILDING FOR THE FUTURE.

(Continued from Page 1340).

In the past, very few understood the underlying and essential features of life insurance as a business proposition, but now most men, especially the business men, do; consequently life assurance is becoming more popular and recognized to be more of a necessity every day—greatly helping and making our future building more substantial. Why is this? Because of the foundations first referred to, and because life assurance has made good. The beneficence of the business has been appreciated, loved ones have been comfortably taken care of; man's burden of responsibility has been removed; the boys have been educated and prepared for life's work; the business man carried safely through the financial panic; a peaceful old age free from care, provided by the endowments. On this account there can not be the slightest doubt but that the future will see a greater and more general appreciation by all classes as a greater and more general appreciation by all classes as to the many benefits life assurance bestows.

Some Startling Statistics From Other Countries.

A report of the Local Government Board in England makes the startling declaration that in the year 1908, no less than 125 persons in England and Wales either died of starvation or had their death accelerated by privation. Of these deaths, 52 occurred in London, and 73 in the provinces.

The report gives the details in each case, and they form reading which is sad enough. One man had formerly been a bank manager, but was out of work at the age of 64, and, fainting from exposure and lack of food, he fell and fractured his skull on a stone corridor, and died from the effects of the fall.

Of 1,100 persons in a Philadelphia almshouse, only three

were found to have been beneficiaries of iffe insurance.

In the Montgomery county, Philadelphia almshouse, none of the 133 inmates had ever been beneficiaries of life insurance.

Of 6,000 children passing under the observation of Father Lynch, of Chicago, at one of the large church asylums, the parents carried life insurance in not more than 12 cases.

Creat Need for Life Insurance.

Who are to be the workers who will prevent to some extent this state of affairs? The clever fighters in the ranks of the life insurance salemen, and surely it can be said that there is great need for our work and for our great building. Such facts as these should inspire every builder with his responsibility in the great work, for we know that life assurance is the only system yet established, or is likely to be established, that will prevent this misery and enable most men to provide for their own and at the same time benefit by the many other privileges of the system.

Stock Exchanges and Investments

STOCK EXCHANGES DOMINATED

By Interest in Power Developments at Montreal and Rio's Strength at Toronto.

Toronto, Sept. 23.

Interest in securities listed on the local exchange has been diverted to Montreal, where the power situation is all absorbing. Full details of this week's developments appear elsewhere in this issue. Sales of the stocks concerned have not been frequent on the Toronto board. The chief interests of the four companies are in Montreal where most of the stock is held.

Rio has been a feature locally, large blocks of shares changing hands at nearly every session. Twin City, Mackay and Sao Paulo have also been active. Transactions were made in B. C. Packers, series A at 85 and series B at 9134. Some demand was evident for Nipissing at around \$11.00. Maple Leaf Milling sold at about 97 for the preferred stock ferred stock.

The announcement of an increase in the Nova Scotia dividend to 5 per cent. was not received with surprise nere, it not being expected that the directors would do more than increase the rate by one per cent. Nova Scotia Steel has been quiet since the sensational fight for the control of the been quiet since the sensational fight for the control of the excess of the increase already made by this company for excess of the present year. dividend to 5 per cent. was not received with surprise here,

Of the New York market Mr. Henry Clews says: "The most disturbing feature in the market at present is the political situation. All indications point to liberal Democratic gains in November, and possibly a Democratic Congress after the next session. The present strong drift towards radicalism is not much relished in financial circles, espectable as there is every present of most or less redical learning. ially as there is every prospect of more or less radical legis-lation when members elected next November take their seats. It is to be hoped that the present wave of radicalism will later on be checked; for the political outlook is anything but assuring, and is regarded with some apprehension in high financial circles. General trade continues quiet. Our iron and copper industries are still suffering from overproduction and the textile markets from the abnormal price of cotton. Nevertheless, there is no unsoundness in the business outlook which a period of quiet and moderate liquid-ation will not effectually cure. At the West there is a more confident undertone, and while business is less in volume than a year ago there are distinct indications of revival. Upon all pronounced reactions on the Stock Exchange good stocks are likely to prove a profitable purchase. Perhaps a sharp outlook should be kept upon the political horizon, for squalls are not improbable. Not infrequently the politicians consider it good tactics to create a scare; and there have been operators in the market quite willing to encourage such an opportunity for the purpose of picking up cheap stocks. Some of our difficulties are being taken altogether too seriously.

The following is a summary of the sales on the Vancouver Stock Exchange for the week ended September 15: Alberta Can. Oil, '6 000; International Coal & Coke, 500; Portland Canal, 12,825; Dominion Trust, 11; Great West Permanent, 10; Lasqueti, 6,000; Stewart M. & D., 300; Nugget, 500; Red Cliff, 600; Royal Cols, 550; B. C. Copper, 226; American Can. Oil, 2,000; S. A. Scrip, 3; Nabob, 3000; Alameda 1000. 3,000; Alameda, 1,000.

On the Winnipeg Exchange

Winnipeg, Sept. 20th.

The shares of a number of the local companies have shown considerable strength. Winnipeg Electric is one and shown considerable strength. Winnipeg Electric is one and its shares have been offering around 190. The net earnings for July show an increase of \$19,123, the total being \$132.-260. From January 1st to the end of July, the net earnings amount to \$887,140, an increase over the previous year of \$171,688. This is an admirable showing as compared with other points. At Toronto the increase for the year to the same date was \$103. The British Columbia Electric shows net earnings for twelve months to the end of June 30 amounting to \$1,230,830, an increase of \$212,723. Last year the ing to \$1,239,839, an increase of \$212,723. Last year the

the first seven months of the present year.

Great West Permanent shares have advanced to 127 and eral sales have taken place at this price. The Winnipeg several sales have taken place at this price. Fire Assurance Company last week decided to make a new issue of capital stock, which, in all probability, will be entirely taken up by the present shareholders. The company's stock has been closely held.

Western Canada Lands

Western Canada lands cost, on the average. Only about 20 per cent as much as land of equal intrinsic value south of the International boundary.

United States land values are the standard by which to estimate future Canadian land values.

You can practically count your profits at the beginning, though they may not be immediately available, when you make a judicious investment in Western farm or fruit land.

The thorough manner in which the experts of this company cover Western Canada, keeps us at all times in touch with the best opportunities for investment.

Our experience and knowledge of values supplies of knowledge and experience, and assures his getting steraing value.

We have helped investments. We shall be glad to tell you at a shose whom we have served.

DIVIDENDS

THE ROYAL BANK OF CANADA.

Dividend No. 92.

Notice is hereby given that a dividend of Two and threequarters per cent. (being at the rate of eleven per cent. per annum) upon the paid-up capital stock of this bank, has been declared for the current quarter, and will be payable at the bank and its branches, on and after Saturday, the 1st day of October next, to shareholders of record of 15th September.

By order of the Board.

E. L. PEASE,

General Manager.

Montreal, P.Q., August 18, 1910.

THE CANADIAN PACIFIC RAILWAY COMPANY.

Notice to Shareholders.

The twenty-ninth annual general meeting of the Shareholders of this Company for the election of directors to take, the places of the returns directors, and for the transaction of business generally, will be held on Wednesday, the 5th day of October next, at the principal office of the Company at Montreal, at twelve o'clock noon.

The Common Stock Transfer Books will be closed in Montreal, New York, and London at 3 p.m., on Friday, the second day of Sentember: the Preference Stock Books will be

second day of September; the Preference Stock Books will be closed in London at the same time.

All Books will be re-opened on Thursday, the sixth day October.

By order of the Board,

W. R. BAKER,

Secretary.

Montreal, 8th August, 1910.

LA ROSE CONSOLIDATED MINES COMPANY,

165 Broadway, New York, September 19th, 1910.

The Board of Directors has to-day declared a regular quarterly dividend of TWO PER CENT., payable October 20th, 1910, to shareholders of record as of September 30th, Transfer books will close September 30th, 1910, and reopen October 18th, 1910.

P. C. PFEIFFER,

MAPLE LEAF MILLING COMPANY, LIMITED.

DIVIDEND NOTICE.

Notice is hereby given that a Dividend of 3½ per cent, been declared on the Preferred Stock of Maple Leaf Milling Company, Limited, for the current half year payable October 18th, 1910, to shareholders of record, October 4th, 1910. Transfer Books will be closed from October 4th to October 17th, inclusive.

By order of the Board, J. CARRICK,

Secretary.

There is a tide in the affairs of Canadian investors which taken at the flood leads to CAMROSE, ALBERTA. Camrose is the geographical centre of Alberta and is the junction of the three great transcontinental lines of railroads, in addition to this is the centre and distributing point of 50 miles of territory on all sides, the most productive lands in Alberta. Camrose, has in addition to this, five coal mines in operation and located within three miles of the town. Remember coal mines made Lethbridge, railroads made Saskatoon, Camrose has both; as fortunes have been made in Saskatoon and Lethbridge, prosperity by purchasing in the beginning, history will repeat itself in Camrose—for the time to make money is always at the beginning of things.

Mount Royal Subdivision, Camrose.

This choice subdivision is located within the mile circle from the centre of the city, and in close proximity to the city park. This district is acknowledged to be the coming choice residential district of Camrose. Lots are all level, high and dry, and we use selling them at \$75.00 to \$85.00 each on the unusually easy term, \$10.00 cash and \$5.00 per month. Address all correspondence to

CITY OF LETHBRIDGE

CERTAINTY

The city of Lethbridge is located in a rich agricul-tural and mining district, and is the metropolis of Sunny Southern Alberta.

As a location for manufacturers or wholesale houses it offers, not an opportunity, but a certainty.

The city owns its own electric light and power plant and waterworks, and will supply power and water to manufacturers at very low rates.

Suitable sites for warehouses or manufacturers are controlled by the city, and can be obtained with trackage, at reasonable rates

The city has a population of 11,000, which is an increase over last year of 66 per cent. Building permits for 1909, \$1,268,215; increase over 1908, 246 per cent., and proportionate growth in other lines.

There are five large coal mines within five miles of the city, and the district is the richest agricultural dis-trict in the West, being the home of the celebrated Alberta Red Winter wheat, from which an average of twenty-eight bushels per acre is obtained.

There are five lines of railroad radiating from the city, the C.P.R., the A.R. and I. and the Great Northern, which gives freight competition and right freight rates.

One of the lines runs through the Crow's Nest Pass, for which district, with its large lumber mills and coal mines, this city is the natural distributing point.

Distributed along this line within 250 miles of Lethbridge, there is a pay roll of over \$1,000,000 per month. This in connection with the rich agricultural and mining district, of which the city is the centre, makes one of the best markets in America.

There is nothing that can be worn, nothing for use ornament in the house, nothing for service in town country, that this market does not demand.

Lethbridge to day is not supplying one-third of the demands of its natural market.

Come to Lethbridge and help supply the other twothirds.

Remember, this market is not a prospect, but is an actual existing fact-a certainty to-day.

For further information apply to

TRIP TO THE WEST INDIES

The "P. & B." steamers sailing from Halifax every twelfth day for Bermuda, the British West Indies and Demerara, are all very superior ones. The trip occupies about thirty-eight days, and is a delightful cruise from the start to the finish.

Through tickets from Toronto and all points on the railways are sold by

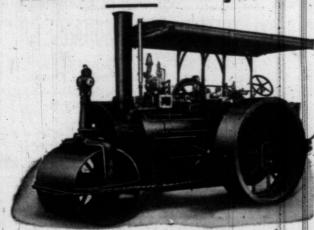

R M. MELVILLE,

WHEN TRUSTED MEN GO WRONG

Every once in a while the daily papers report the shortcomings of an apparently trustworthy and responsible clerk or official. There is no accounting for these unfortunate affairs. They are accidents, and to be provided against as such. Our Guarantee and Fidelity Bonds insure an employer against the and Fidelity Bonds insure an employer against the loss entailed by such accidents. We bond clerks and officials, cashiers and collectors and trusted employees handling money in every department of business. Our bonds are an asset to the employer, and a reliable credential for the employee.

WOOD TRADE IN BRITAIN.

The imports of deals, both Baltic and spruce; especially the latter, were very heavy at Liverpool during September, and stocks of both red and white at Manchester as well as Liverpool are excessive. But small arrivals of pine timber are announced at either Manchester or Liverpool; stocks are moderate, and values rule high, the supply of second-glass is light. Elm is more enquired for, and values firm. Oak

is light. Elm is more enquired for, and values firm. Oak steady, with slow demand. Birch logs in improved request and firm; planks still in heavy supply and more coming in British Columbia pine in adequate stock; values steady.

No Oregon pine came into Liverpool during August, nor any California redwood, but demand is extremely slack for both. Arrivals from the Baltic and Europe for the month have been 54 vessels of 36,918 tons, as compared with 35 vessels, 24,565 tons, during the same month of 1000. Flooring boards of white wood have made fairly well, the supplies being more liberal and values keeping up. The stock of being more liberal and values keeping up. The stock of Galatz whitewood is ample, the consumption continues small.
