Fortant humbers has had deal by the erms. Moreover, the positions held by the Turks below Kut-el-Amara, entrench-ed and strongly fortified, were most formidable. The original expedition was composed in part of Indian troops, but the relief forces for the most par-were made up of men from Engle and the colonies.

MUCH MONEY HANDLED

Economic Seriousness of Necessity for Preparing for Prohibition Obvious.

BY HEW TRILL.

or indirectly from the hotel. They must be amused, and they must be trans-ported from place to place. Their spir-itual welfare must be aftended to. In fine account of the spir-NE good-sized hotel is an industry large enough to support a village of fair proportions. The Walker House, as an instance, has paid fine, every activity of a community would be required to provide for the needs of the employes of one hotel out in salaries to staff alone \$660,000 since the present management topk over the plant eleven years ago-over half a million dollars. The pay-roll alone. This every good-sized hotel means to Toronto, but the effect is lost sight of in a large population. There is another aspect to the ques-tion of what a good hotel means in half a million dollars. The pay-roll of the Walker Heuse is \$60,000 a year. Nor is this all. The amount nam-ed includes only cash paid out. It does not include board, which forms an economic way to a city. There are the industries dependent wholly or in a very large percentage of hotel repart upon it: packing houses, linen fac-tories, whoelsale provision merchants and a hundred others whose ramificamuneration, almost 50 per cent. Then, a number of employes get part of ir remuneration in lodging. But their remuneration in lode take cash and food alone:

tions run thruout the whole of the community's life, Actual food eaten by employes of he Walker House costs the management \$29,000 a year. This takes no account of the cost of cooking and PLEASING RECITAL. A large audience of music lovers of

serving; nor does it take account of any proportion of the overhead ex-penses. It means simply that the Hamilton recently was afforded the pleasure of listening to two talented Hamilton artistes in the persons of Miss Margaret B. Hill, planiste, a pupil of W. O. Forsyth, and Miss Urith Cammeat an dthe bread and the butter, and so on, costs a little over 17 cents a meal for 145 people at least, who eat three meals a day for 365 days in the eron Taylor, dramatic reader, who gave a recital in the assembly hall of the Conservatory of Music under the aus-pices of the Forsyth Academy of Mu-sic. In spite of the inclemency of the weather it was found necessary to seyear at the expense of the hotel. The employes could not feed themselves so well, or even at all, unles sthey lived at home, under double or treble that cost. In other words, the hotel manage

ment pays out in cash for remuneraon approximately \$90,000 a year. But this is not all that the hotel

represents as a means of livelihood, as a supply of wealth, to residents of Torber, the Sposolizio (Wedding Bells) of Liszt. Two selections of Chopin were As has been stated, meals cost more than unprepared food-stuffs. Then there are tips, the value of which charmingly with the brilliant value that followed. In her rendition of the magic first scene (Wagner-Brassin), Miss Hill played an exceedingly animeted with would be hard to determine, but which would amount up to thousands of dolplayed an exceedingly animated comlars to bell-boys and porters and waittresses during the year. They would bring the total earnings of employes position in an admirable manner. Lesscherzo valse by Moskowski were also pleasingly rendered. Miss Taylor is a talented dramatic of this one hotel to well over \$100,000 a year. This is a moderate estimate, for it will be remembered that many hotel employes regard tips as the most reader, and her art last evening found itself at home in all forms of literapart of their remuneration.

itsen at nome in all forms of litera-ture. In a touching manner she re-cited Robert Service's masterpiece. "Good-bye, Little Cabin." while Van-Dyke's pathetic poem. "Hide and Seek." was superbly rendered. Miss Taylor save a thoughtful interpretation of the bedchamber scene of "Hamlet." which displayed her powers to the fullest of Economic Situation. One Toronto hotel alone, then, provides 145 citizens with a means of livelihood. They divide between them \$90,000 in cash and food-and there When the number of hotels are tips. in Toronto alone is consideerd, the bedchamber scene of 'Hamlet,' which displayed her powers to the fullest ad-vantage. In "The Real Thing," by John Kendrick Bangs, she gave an amusing sketch of New York life, economic seriousness of the necessity of preparing for prohibition becomes obvious. The magnitude of the problem is only to be recognized by conpleasantly flavored with Irish brogue ideration of the pay-rolls of hotels in Her attainments in dialect were also Hamilton, London, Guelph, Brantford, shown advantageously in her rendition and from one end of Ontario to an- of "When Albani Sang," by Dr. Drum-The manufacture of accomo- mond. mond. & Sons, 60 Victoria street, phone Main 726, or Wm. Taxton, head gardener,

Suppose only 60 of them are the heads of families; suppose there is an aver-age of only four in their families. Sup-buted about the building, the high pose, further, that they and the 85 non-family supporting botel employee arched roof, with its many ventilas tors, make it much superior to the family suppotring hotel employes formed the nucleus of a village. They must have shelter; therefore, there must be people to build and repair their homes. They must be clothed, and the clothiers and all the other tradespeople who supplied their needs must be provided with homes and food and all the necessities of life. All would draw their livelihood directly or indirectly from the hotel They must smaller assembly halls. A more per-fect dancing floor cannot be obtained, and that, combined with the music, electric and flag decorations, makes Pavlowa a favorite of Toronto's smart set

The large space in the rear of the academy for keeping motor cars, where as many as one hundred are often times seen, is another advan-tage, an attendant being present at all times to look after the cars. The Pavlowa School of Dancing is exceptionally busy just now, many are learning the modern dances in preparation for their vacation, knowing the summer hotels will be dancing only New York's latest dances.

Figures published by British life insurance corporations show that since August, 1914, nearly \$35,000,000 has been paid in war claims. The indus-trial companies alone have disbursed \$7,100,000 on \$0,000 policies.

#### ANNUAL SOMERS SCHOOL FESTIVAL AT THE ARENA

Spectacular Physical Training Exhibition Takes Place Friday

Evening. The fifth annual May Festival of the

Somers School of Physical Training, to be held in the Arena on Friday ev-ening next, May 5th, will, this season, be of special interest. Hundreds of well drilled pupils will demonstrate the wonderful effects of systematic physical training. The messed demonstrate cure extra accominodation for those who wished to attend. Miss Hill is possessed of a beautiful physical training. The massed classes touch and a finished style, which was shown to advantage in the first numin Swedish exercises will present a magnificent spectacle. Beautiful and

Festal Day." Most impressive and timely are the numbers "Woman's Share in the War" and "Following the Flag." The band of the 48th High-Flag," The band of the 48th High-landers will assist. Froceeds of Souv-enir Programs for Patriotic Fund. Plan at Mason & Risch's on Monday, chetiszky's Playing Waves and the May 1.

ENGAGEMENTS.

THE MARRIAGE of Miss Jean Wilkle to Mr. Howard Underhill will take place at her mother's residence, 6216 Ellis avenue, Chicago, on April 29th, at 7.30 p.m. Owing to a recent bereavement, only the immediate family and a few near friends will attend the ceremony. MRS. J. W. FORD announces the engagement of her daughter, Eleanor, to Mr. Basil Breen. Wedding to take place carly in May.

BIRTHS. CROSS-On April 27, at Grace Hospital, to Mr. and Mrs. H. W. Crozs, a son.

DEATHS. DI.DFIELD-Died at the Canadian Hospital, England, March 13, 1916, of gunshot wounds received while in active service, Frank J. Oldfield, 8th C. M. R., in his 33rd year. Late of 5 Whitby avenue.

IN MEMORIAM. HARTER-In loving memory of John Harter, died April 20, 1914. Gone, but not forgotten

Wife and Daughter.

given in a poilshed style, and also the sublime sepilogue to "Asolando" of Browning. The concluding number was Tennyson's Crossing the Bar," and most enjoyable evening closed with he singing of the national anthem.

ORDHEIMER'S conservatories at "Casa Loma," sether with potted plants from the same source, made a most artistic environment. Mrs. John F. Ross, re-Want Home to His Own Piano gent of the chapter, assisted by Mrs. H. C. Hockon and Mrs. J. O. 167-Carthy, received the guests. Dainty refreshments were served and the terpsichorean numbers much enjoyed Exchange by the younger members present. The affair was under the patronage of Lady Pollatt, Mrs. Logie and Mrs. R. S. Wilson. The proceeds go to-wards the patriotic work of the

chapter.

EAD this list of Piano R Bargains-you will be sure to find the one you want. Every instrument is put in thorough order before leaving our warerooms, and a liberal allowance made in the event

of exchange for a more costly piano at any future time.

held the Pirates scoreless in the next six innings. Dale pitched the eighth without rendering a hit. Mammaux held the Reds safe until the seventh in-ning, when singles by Groh, Mollwitz and Herzog scored their only run. In the eighth, after Mammaux had passed the first two men, he was taken out. Mil-ler took his place and retired the side scoreless. Wagner saved the game with a marvelous bare hand stop and throw to the plate in the seventh inning. civilians had the upper hand until half-time. Second Half. The second period found the soldiers pressing the Baraca defence hard, but spolling most of their hard-earned chances by bad shooting. Baracas came strongly again, but suffered from the same defect as the R.C.D.'s--bad shoot-ing. The Dragoons evened up matters with a lucky goal, when Saunders' low shot took a bad bound and went over Stewart's arm into the net. Both teams tried hard to take the lead, but had failed to do so when time was called. The line-up: Baracas (1)-Stewart, goal: McKay, Shaw, backs; Hunter, Peden, Buchanan, halves: Colline, Gray, Walker, Sturgess, Riddell, forwards. R.C.D. (1)-McAlpine, goal: Harding, Williams, backs; W. Marshall, A. Allen, Russell, halves; A. Marshall, Wilson, Saunders, R. Allen, Nichol, forwards. Referee Bratt.

GREAT WALTER IN FORM.

WASHINGTON, April 29 .- The Hed Sox, in their first appearance here today. Sox, in their first appearance here today, found Waiter Johnston in magnificnet form, and as a result were able to gar-ner but four scattered hits in the line innings they faced him. The Kanass cyclone had a world of speed and in ad-dition his contral was of the very best. This combination has always proved a winner for Johnson, and of course it won today by a score of 4 to 0. Fostes pitched a good game for the Red Sox for six innings, but the locals got him in the seventh and eighth and made tive of the seven hits credited by them.

PHILADELPHIA, April 29.—the Yanks battered thru to a 4 to 2 victory in to-day's game at Shibe Park after toy Hartzell had saved them by a hair from defeat in the nines when he swung for Pitcher Fischer. Hartzell's beit scored Peckingpaush, who had singled and stole. Joe Gedeon was the other mote in the Mack eye. It was his single in the sixth that chalked the initial Yank count. Lee Magee treading the rubber at that time. ANOTHER FOR PHILLIES.

ANOTHER FOR PHILLIES. BRAYES FIELD. BOSTON. April 29.— The champion Fhiladelphias hung it on to the Braves this afternoon by a score of 5-2. Alexander was the pitcher chosen by Manager Moran, and but one run should have been scored off him. He was hit for eight safeties, but they were scattered thru the game doing little dam-age, and after the score had been tied at 2-2 the miraclemen never again threat-ened. LOYAL IRISHMEN ARE

ened. Alexander kept the hitting in the air, twelve put outs being on fly Balls. The Braves fielding was not any too good, the outfield being particularly weak, with the exception of Collus, who made the star play of the day, complet-ing a double play by a splendid throw from deep left field to the plate, nipping Burns. PRIVATES' BREECHES, made to measure, from regulation ma-terial.

DEIGHT. April 29.—The Tigers came from behind again today and de-feated the Cleveland Indians 5-4 in 11 in-nings. Detroit went into the ninth in-ning two ruzz behind and tied the count on a wild pitch and singles by Young Cawfor and Cobb. In the eleventh Vitt singled. Kavanagh and Cobb doubled,

derstood that I should not receive any commission in connection with pur-chases made by Canada?" Witness stated that he had, spent some time about, and his epenses, probably, amounted to about what he had receiv-ed from the Colt Co. No Further Commission. He had other contracts, however, in-cluding one for the Canada Car Foun-dry Co. Allison asserted that his busi-ness to date with the Colt Co. had been closed up and there was no pos-sibility of him setting any additional commission from that company unless he made further contracts. Sir Charles Davidson suggested that Allison's bank books, etc., should be brought from New York in order to trace the commissions received by Al-lison. Mr. Henderson said Col. Allison was willing that they should be pro-

to Canada and asked him to see to Canada and asked him to see the trace the commissions received by Al-lison. Mr. Henderson said Col. Allison was willing that they should be pro-duced. The enquiry was adjourned un-til Saturday next.

ment was amply verified by the stock's action. On Saturday the shares sold up to \$1.25 on the Boston and New York curb, and the firm estimate that their clients have easily made \$300,000 on the deal.

FAMOUS BAND FOR SCARBORO BEACH.

Creatore's world famous band has been secured for the opening of Scarboro Beach. It will be the greatest attrac-tion ever seen in the east end park.

Wear clothes that are made to your order. Remember. you choose your cloth and we carry out your exact wants, giving you a"try-on" in making sure that the garof dance ments fit you astheyshould. Why not be society dancers, Mr. Evans offers an exhibition of grace and a spectacle of scenic and costume grandeur that is distinctive rather than just far ahead of anything of its kind that

"one of the

crowd?"

Now, however, a new condition has cropped up, a condition that we did not anticipate, viz., an alarming scarcity of tailors, cutters, etc., necessitating higher wages and consequently greatly increased cost of making. With this condition before us we have no choice but to ask you a slight advance --- not much, just a dollar, but an advance that represents to us the difference between profit and loss.

When you consider the present state of affairs-how others have advanced prices months ago, when you consider that the same woollens we offer you at \$15 are selling at \$25 and \$30 elsewhere, we believe you will agree that our modest advance of \$1.00 is extremely reasonable. At the same time we wish to assure you that could we possibly continue business without asking this dollar more, we would do so because our motto has always been: "Many orders at extremely close profits." During this season of abnormal labor conditions and market upheavals, we believe in being frank with our patrons. We believe it will mean something to them to know that all the materials we offer them are of honest, trustworthy quality and that in the making of our clothes the workmanship will be our best and that their wants will be courteously and painstakingly served in every particular. Just now a dollar more in price enables us to maintain our standard of quality, hence we do not hesitate to ask it. The new price \$15.00 instead of \$14.00, goes into effect at all our 12 branches when the stores open on Monday Morning, May 1st.

PRINCESS ALEXANDER N RED CROSS WORK

Work Too Small for Her Do as Long as it Helps.

DEVOTED TO HER HOME

Keen Student of Modern Literature, Linguist, Artiste and Fine Horsewoman.

By W. B. THOMPSON.

LONDON, April 29-It is character-Alexander of Teck istic of Princ be content to act in that she y of kitchenmaid at Red Cross Hos. Green, near Wind. to cook the meals shes afterwards, and one of the drudgery Like her husband, der, who accepted the of Middlesex Hospital hat he might continue the work of his late brother, ancis, the princess devotes al of her time to practical thropy; a few charitable es are launched in which she ot take a personal interest. daughter of the late Duke of the personal interest. The daughter of the late Duke of Albany, the princess married Prince Alexander in 1904, when she was twenty-one years of age. Exactly how much truth there may be in the romantic stories that are told of the foreign aspirants to the hand of the princess "Alice in Wonderland," as the was called in her younger days because of her fervent devotion to the works of Lewis Carroll, it is difficult to say. That she early determined, however, like her cousin, the Princess Royal that she would not marry a foreign prince, is certain, and her mar-riage with Prince Alexander gave gen-eral satisfaction in this country. tisfaction in this country. Devoted to Her Home.

A woman possessing her full share of that personal charm and cleverness of that personal charm and cleverness which distinguish all the members of the royal family, Princes Alexander is devoted to home and her two child-ran. She has often confessed that the spends the best hours in the se-clusion of her own family. At the same time she has many studies, hob-bies and outdoor recreations. Unlike most members of the royal family, she does not make music one of her pursuits, but she is a very keen student of modern literature, a firstrate linguist, and an artist of no mean merit. Riding, however, is the princess' favorite recreation, and, like is a splendid harsewoman. (By the House of Hobberlin, Limited)

Parliament this week has almost faded from public view. Since Tues-day the Meredith-Duff Commission has engrossed the stage. The house of commons has spent nearly all the week in committee of supply, but few estimates have passed. A small sroup of Liberals prevent much pro-gress being made. They are only a corporal's guard, for Messrs, Carvel and Kyte are in constant attendance upon the royal commission, and the Liberal members from Quebec are busy with the provincial elections.

The real event of the week from a parliamentary standpoint was the caucus on the railway situation. As to the result of that caucus of course there is no announcement forthcoming. There was considerable anxiety among the members to know what Hon. Frank Cochrane thought of the government proposals. In this connection someone has suggested that Mr. Cochrane's ru-mored retirement from the railway de-partment keeps a good many Conser-vatives quiet, who would otherwise be-come insurgent. More than one M. H has an idea in the back of his head that he may be Mr. Cochrane's succes-sor and is therefore quite cautious about antagonizing the government.

Nor is the government inclined to hurry over much. They have yet to announce their railway legislation, and on both sides of the house there is a disposition to mark time. Nothing ban be quite sure yet what will come out of the Kyte charges and the judicial machinery they have set in motion

One point seems to be already set-tied. It is now pretty generally ad-mitted that the members of the shell mittee were not officials of the committee were not officials of the British Government. The correspon-dence already in evidence shows that General Sam Hughes was the sole representative of the British minister of munitions. The war office treated the members of the shell committee as contractors, and that committee was never regarded by the war office as having any legal existence. The statement made to the royal

The statement made to the royal commission on Friday by Mr. Hell-muth was not seriously challenged. He said that the shell committee came to regard itself as an arm of the British Government, but that the war office steadfastly refused them such recognition. The contracts munitions in Canada were placed with the shell committee rather than by the shell committee. This being true, there is no reason why any and every transaction of the

That is as it may be. Mr. Hellmuth, it is said, declined to stampede or to be stampeded, but thought that all the facts should be brought to the atten-tion of the royal commission in a de-corous and orderly manner. He is, therefore, drilling like a man with a derrick so many feet a day. Later on, if Mr. Johnston or somebody else, wants to shoot the well, they may have all they find, whether it be oil, na-tural gas or salt water. Mr. Hellmuth marantees nothing but the honest drilling of so many feet a day. He is paid by the foot and has no other umbilion but to carn his money by conscientious work. conscientious work.

Conscientious work. The royal commission is sitting in a room on the fourth floor of the Cen-iral Station, where the Dominion Board of Railway Commissioners sometimes hold court. The bench was constructed to accommodate six judges. Fir William Meredith and Mr. Justice Duff. therefore, have plenty of room, but the same cannot be said of anyone else. The 6 lawyers are packed in a pon just below and in front of the bench. I use the word "pen" advised-ly. The space is square and entiroly enclosed on one side by the bench and on the other three sides by a low fence. The barristers have scarcely room enough to move about and when one of them addresses the court it is dir. Mr. Hellmuth in examining the wit-ness stands a long way off and his voice carries well. As for Col. Curnegie, he never has to be told to speak up. The difficulty with the colonel is to get him to stop. No one ever so enjoyed thy mere thrill of talking. He bubbles like a spring and if he does not babble liko

a spring and if he does not pabble like a brook, he might very well say in the words of Tennyson's

For men may come and men may go, But I go on forever.

There is nothing offensive in the colonel's loquacity. One might as well complain of the sun because it gives light or of the waves because they are light or of the waves because they are always in motion. He reminds one of radium, which exudes energy for mil-lions of years without decreasing in weight or activity. We used to think that Gen. Hughes was inclined to talk, but the general is a Grant, a Yon Molike, a North American Indian, a tongue-tied boy, a deaf muta, com-pared with Col. Carnegie. All the wo-men in the world gathers together at one sewing circle to discuss the latest reandal would not be able to get in a word edgewise if the coloned dropped in for a dish of tea. People who have been fed up on the Killiecrankie school of fiction and think of the "silent Scot" have another think coming since the advent of Col. Carnegie. What Hydro Costs

shell committee cannot be investi-gated by the Canadian Government. Indeed, the point now is so plain that one is amazed that Solicitor-General one is amazed that Solicitor-General Meighen should have seriously ar-gued the contrary. The prime minis-ter and Mr. R. B .Bennett may have been briefed by Mr. Meighen and the conclusions they drew may have followed quite logically from the pre-mises he presented. But these pre-mises are now proved to be without foundation.

Tet thore is no dout ting his nativity. His r's roll like battledrums. One shud-ders to think what would happen if he had to ask a clerk in a drug store for lindway's Ready Rollef. It would take him a week to say:

The cable correspondence respect-ing munitions, carried on in cipher since the outbreak of the war, has

"Round the rugged rock The ragged rascal ran." beeen a correspondence between the militia department at Ottawa and

the ordnance munitions department in England. If I understand Col. He has a way of pronouncing the word Morgan which cannot be repro-duced and it was a long time the other diverse and it was a long time the other diverse someone discovered that the Mr. "Claerke" he was falking about was no other than Mr. Clergne. Yet at times the burr is scarcely noticeable and now and then he affects the ac-cent which we associate with the Lon-don clubs. Thus once when Mr. Hell-muth asked him what should have been an easy question to answer, he replied in Londonese: Carngie correctly the shell com-mittee was never entrusted with the cipher, but sent and received all mes-sages thru the Dominion department of militia and defence. Contracts were generally made in the name of the minister and not in the name of the shell committee.

The shell committee, like Topsy, was never born. It "simply growed." It was an extra-legal body, which developed in the British way like the

"You tax me, really." cabinet system. As the colonial sec-retary says what he has to say to

"You tax me, really." He is as keen as a briar in many re-spects. There is no doubt, I think, that he is a highly competent mechan-ical engineer. He was employed for years at the Woolwich arsenal His millitary title, however, was conferred upon him by Geh. Sam Hughes, and he likes to te addressed as "colone!." He claims to have been and nc doubt was the dominating figure in the shell committee. He says he dictated near-ly all the letters which Gen. Bertram Canada thru the governor-general, so the British war office dealt with the minister of militia, but General Sam did not permit the shell committee to seize the substance of power and leave him merely its shadow. He in-tervened at times, and their despatches to the home government were, to quote Col. Carnegle, "strengthened. by ebullitions from the general." He gave them directions and kept an

oversight upon the activities. When he spoke from the throne he spoke his own sentiments and not the word put into his mouth by the shell committee

The technical or constitutional objection therefore to a wide open investigation has completely disap-If therefore any general demand should arise for a wider open investigation than the one now under way it cannot be denied upon the legal grounds that seemed quite convincing a month or two ago.

That is at least one definite point already established. It may or may not be of importance, but there it is. If anything like a serious scandal is unearthed in connection with the fuse contracts in New York we may expect to hear a demand for an investigation into certain contracts made in Canada.

The royal commission has started out well. Mr. I. F. Hellmuth, K. C., is clearing away the underbrush and blaizng a trail for counsel and commissioners to follow. During the three days scarcely an interruption has come from the 15 lawyers about him and scarcely a suggestion from the bench. He is doing his work well, neither as a prosecutor nor as an apologist, but as the ideal advocate appearing in the public interest. Some friends of the government think that Mr. Hellmuth should have proceeded in a different manner. They say he should have put Mr. Kyte, M.P. in the box, shown that the al-leged agreements between Allison end others with which he startleged led the bouse a few weeks ago in fact no existence, that Mr. Hellmuth should and discredited Kyte and his have charges by a vigorous onset in the first shock of battle. They say that a long-drawn out enquiry may give

Naught. Col. W. K. Mc-

e:"	A CONTRACT OF A CONTRACT.			
hettele	signed and practically all the cables which went to the British war office signed "Militia." He apparently takes the entire responsibility for the fusal contracts. To do him justice, he sel- dom beats about the bush and the story of the shell committee as he de- tailed it upon the stand is highly in- teresting. Up to date Col. J. Wesley Allison has scarcely been mentioned, but it was undoubtedly he who brought Col. Carnegie into touch with Bassick, Cad- well and Yoakum. He is following the hearing before the royal commis- sion with keen interest and of course is conspicuous among those present. His appearance is peculiar, because the shock of white hair one associ- ates with blue eyes and a forid face in his case is accompanied by pierc- ing black eyes and a sallow complex-	ingratiating. If he really be a wolf and, far be it from me to say that he is, he must be an insinuating and plausible wolf like the one that de- voured little Red Riding Hood. But, leaving Allison out of the ques- tion, did not General Bertram and Col. Carnegie take long chances when they went down to New York with \$22,- 000,000 to spend? They must have seemed to the wolves of Wall streets like the babes in the wood. No won- der the British Consul General tried to shoo them back. They were going to New York on a secret mission, but the redcaps bawled them out as soon as they arrived at the New York Cen- tral Station!	upon the evidence presented. Un- doubtedly Col. Carnegie, who takes the entire responsibility, made up his mind to give the fuse contracts to firms in the United States, no matter what of- fers he might get from manufacturers in Canada. A stranger to this coun- try he may have honestly believed that Canadians were not able to deliver the goods. The one thing, however, that requires explanation and which Col. Carnegie certainly has not explain- ed up to this time is the change in the contracts at the last moment that ap- parenly gave the Bassick; Cadwell and Yoakum combination clear velvet above the ordinary profits to the ex- tent of \$333,332. Let us remember that, roughly speaking, there are two kinds of fuses. There is the detonating fuse, which goes off when it hits something hard enough, and there is the time fuse, which goes off in the air or anywhere else after so mony seconds. The de- tonating fuse is a simple proposition,	Making Money Making Money Source Figh Help Fiel Fiel Source Figh Help Fiel Source Figh Help Fiel Source Fiel Help
			while the time fuse is very complex. The graze fuse is a detonating fuse, but it does not explode at the instant of impact. The shell loaded with a graze fuse pierces the wall of a house let us say, and explodes inside. If the shell is fired so as to ricochet the ex- plosion occurs on the rebound, with the "curtain of fire," of which we have heard so much at Verdun. If the fuse merely "grazes" the ground the ex- plosion occurs a moment later and that may be the derivation of the name. But the graze fuse is a cheap fuse	GROW THESE IN Asparagus Beans Beets Brussels Sprouts Cabbage Carrots Cauliflower Citron Carbans Carson Cars

From the Soil

City Architect Pearse issued the following building permits on Saturday morning:

The shells committee was appointed by the minister of militia, and could have been dismissed at any time by him. Therefore, he is constitutionally responsible for any blunders made by that committee, and it may be argued that so is the government of which he is a member. But that question I leave for faw-yers and statemen to deal with. Toronto Housing Company, to crect

Now these two facts are beyond dis-pute: 1. The fuse company in which Alli-son's friends, to wit, Bassick, Cadwell and Yoakum, are interested got all the graze fuses. 2. The price for the graze fuse was fixed at \$4.00, when \$2,00 would have been about right.

accepts the full responsibility, but up-on the 650,000 graze fuses already de-livered nearly \$1,000,000 too much has been paid. The colonel may accept the responsibility, but can he make the responsibilitions 'good?

name. But the graze fuse is a cheap fuse compared with the British time fuse number \$0 mark five.

When the shells committee came to make the contracts for fuses they fixed the price for the time fuse at \$4.50 and the price for the graze fuse at \$4.00. The price for the time fuse was not out of the way, but the price for the graze fuse was 100 per cent: too high.

Now these two facts are beyond dis-

Col. Carnegie says he takes the en-tire responsibility for fixing the price at \$4.00, which he now admits is too high. But if he had applied to the British war office or to J. P. Morgan & Co. at the time he would have learn-ed that the graze fuse was worth, not \$4.00 but \$2.05. After the Imperial Munitions Board came into power they compelled the American Ammunition Co. to reduce the price for graze fuses so as to effect a saving of more than \$1,000,000. The shells committee was appointed

Carnegie says in manly fashion is a member. But that question I leave for law-yers and statemen to deal with. that he

three times without being withdrawn from the fighting lines. Opera- that the atrocities in the Congo were three times without being withdrawn from the fighting lines. Opera-tions in this region have been quite desultory; the few attacks ven-tured upon by the enemy have been half hearted. The artillery en-gagement has been kept up with varying degrees of intensity. The only other places where there has been infantry fighting were Lor-raine where a German attack on a French salient was repulsed with a loss of about 1000 men and near Soissons where the French carried by surprise attacks some woods from the Germans. The French carried by surprise attacks some woods from the Germans. The French also Germans Lively

made some successful local attacks north of Verdun. In the Caucasian theatre the chief event of the week has been the success won by the Russians in the region south of Bitlis. They have driven the Turks from all their strongly fortified mountain po-sitions and have begun a rapid advance upon Diabekr and the Bag-dad Railway. West of Trebizond the Russians are continuing their progress. In the Pontine range, west of Erzerum, they have beaten off a number of Turkish attacks and they have carried several im-the months, and the Germans no rest night or day to months, and the Germans no rest night or day to months, and the Germans no rest night or day to months, and the Germans are being the months, and the Germans no rest night or day to months, and the Germans are being to months are the set of the set of the the set of the the set of the the off a number of Turkish attacks and they have carried several important sectors of the hostile positions.

In East Africa, General Jan Christian Smuts has reported uninterrupted progress. He has carried several important fortified points and is marching on the railway which runs west from the coast. Native chiefs are making submission to him as he advances. Mounted troops are scouring the country and rounding up stray parties of the enemy.

\* \* \* \* \* \*

In Mesopotamia, a British attempt to carry the Turkish posi-tions at Sannaiyat and go to the relief of Kut-el-Amara broke down, owing to floods preventing the arrival of supports for a British batthe German generals can. So in a contalion, which had burst thru the first and second lines of the Turks and penetrated into the third line. Near the end of this week a supply steamer which tried to sail up the Tigris with provisions for Give Foe No Rest test of endurance the side which has and penetrated into the third line. Near the end of this week a supply steamer, which tried to sail up the Tigris with provisions for It is patent from a perusal of the official reports of Sir Max Aitkin that deal with the Canadian activities, and the garrison, stranded four miles from Kut-el-Amara. The people of England are becoming quite downhearted over the fate of General Townshend's garrison. that are therefore necessarily concern

kept constantly on edge waiting for a supposed offensive which has been frequently asserted as going to come in the spring. As Flanders is an open country and does not give so much cover to troops as other sections of France, the constant exposure of France, irroops to the risks of being cut off by snipers grows on their nerves. The British army has been largely rein-forced, so that it now has twice as many men per mile of front as the German army across the way from it. The result is that the British generals can give their men a great deal more time off from their arduous vigils than

fight with diminished numbers. That implies that a battalion which, now fights with a thousand men will have to fights with a thousand men will have to fight with, first, 900, then \$60, then 700, and so on. So the German and Austrian establishment will be so worn down that its present lines will be too thin, and of his own accoud the enemy wil have to retreat to shorter lines, so as fo be able to hold then. On that theory a minimum of \$500 men a mile is required to hold a given front. The question now remains to be solved of where the Germans will choose to contract their lines first, in The battle corresponding to Gettys-burg was the battle of the Marne Gettysburg was the highwater mark of the southern advance against Washington. The Marne was the high water advance of the German army against Paris. The Southerners were turned back at Gettysburg; the Ger-mans were turned back at the Marne. The fighting since has been similar to solved of where the Germans will choose to contract their lines first, in the west, or in the east. Some people believe that it will be in the east, but the prospects are greatly against this. the prospects are greatly against this. If the Germans decided to retreat from their present lines in Russia and Galicia, they will not shorten them by so doing, for in that case the Kussian lines will be stretched across Hungary, and the German lines would in reality be lengthened. Therefore it is said that the retreat must come in Flan-ders. They must first probably evacuate the Lille salient. Verdun Battle Over The fighting since has been similar to the fighting that followed Gettysburg

The Egnting that followed Gettysburg until near the end. Gettysburg usher-ed in the clinch period of the civil war. It has previously been in the onset stage from the viewpoint of the north, and the north did not succeed in stop-ping the Southerners till Gettysburg was reached. was reached

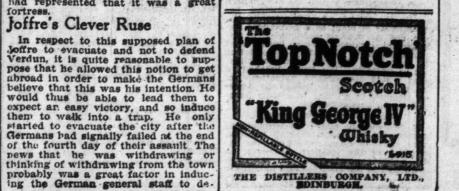

It is probable that by this time the Signification of Verdun battle of Verdun may be truly said to be over. It was decided in the first four days of the contest, but owing to the obstinacy of the Germans, and to their fear of admitting defeat to their The battle of Verdun is on a dif-ferent plane altogether. It signified that the Germans confessed the failure of their original campaign against France by dashing thru Belgium. It signified that the Germans had revert-ed to the original plan of campaign that was carried out so successfully by Von Moltke in the war of 1870-71. own people, it was prolonged to about seventy days. The position of Verdun is in technical terms, a salient, a big bulge or curve into the German lines. This that was carried out so successfully by Von Moltke in the war of 1870-71 carve into the therman lines. This sullent is about 14 miles deep and con-trary to most salients, it has no neck, properly speaking, for the distance across the base is thirty miles at pre-sent. Before the German offensive began this salient was 18 miles deep.

by Von Moltke in the war of 1870-71, and were attempting to invade Franco from the east, in order to carry out their design of disarming a large sec-tion of the French army, and putting France out of action, if not for good, at least for many months, and perhaps, finish up the war. In shape it resembles a big, prostrate pyramid, with its backbone a strong

mism up the war. Mr. Simonds suggests that the Ger-mans believed that they could obtain an easy success at Verdun, and that is why they tackled it. He also says that if they had entered the town they would have been unable to proceed any further. The defensive positions says ridge well adapted for defence for part of its distance. But east of the Meuse, that salient is not considered well adapted for de-ience till Verdun is passed on the south. On the western bank of the Meuse, the terrain is more defensible. Plans of Joffre further. The defensive positions south of Verdun would be too strong for them. In the light of the present de-velopments the defences on the north of the town are also too strong for

Frank Simonds, one of the ablest war critics in the United States, and, perhaps, next to Colonel Feyler, the most important of the neutral military of the town are also too strong for them. But to suppose that when the Germans started their offensive they believed that they could only win a cheap success over the French who were going to evacuate the town any-how, and did not intend to push for-ward any further, would indicate that the Germans are further advanced in exhaustion than any person has yet supposed, altho they are known to be pretty far exhausted. Still, Mr. Simonds nfay be correct in his belief that Verdun was the furthest point south that the Germans originally in-tended to reach. periaps, next to Colonel Feyler, the most important of the neutral military writers, was sent to France after the fighting had lasted some time, to com-pile a narrative of the engagement. Hy is authority for the statement that General Joffre, who disliked losing the extra men that the defense of the mere Town of Verdun would involve, had decided to let the Germans have the town. He planned to withdraw the French armies to the more de-fensible heights across the river. His judgment was justified on purely military grounds, but the politicians here stepped in and they induced Joffre to make a stand after his roops had withdrawn to their present lines. They argued that the mere political effect of the entry into Verdun by the Ger-mans would be depressing to the French, and that it would have a bad offect on neutrals, because, not under-standing the military importance of withdrawing from the city, which ex-isted still in the minds of the world as a great fortress, althe since the war Turned Tables on Foe

But the French neatly turned the tables on the Germans by inducing them by their supposed easy success to announce that the kaiser was lock-ing on after they had stormed tha ridge of Douaumont fort. Then came the French counter-attick which turn-ed all their plans awry and apprised ther that France had elected to make her stand on the ridge of Louvemont, on the first of the main defensive posi-tions constructed by General Serrail, The kaiser was discredited thruout a great fortress, althe since the war began, it had been declassed. The Germans, however, for their own ends, had represented that it was a great

# You Must Place Your Order Now If You Want "Immediate Delivery"

Once again, we must urge you to act quickly in placing your order for a Paige Fairfield seven passenger "Six-46."

Don't delay. Don't put the matter off one day longer than is absolutely necessary if you would avoid disappointment later on.

Already the factory is flooded with orders for this wonderfully popular model.

Despite the fact that our manufacturing facilities have been tripled, we are facing an immediate shortage of Fairfields, and the spring retail season is only a few weeks off.

- Just stop for a minute and consider the significance of the statement when we tell you that, so far in 1916, we have marketed more seven passenger cars than any other manufacturer in our price class.
- Also, ponder over the fact that this month we shall ship approximately 25 solid train loads of the Fairfield model exclusively.
- Last year, you will remember, there was a long Paige "waiting list."
- Hundreds of people delayed their purchases until

When you buy a Paige "Six-46" today, you are buying a car that has passed the experimental stage. You are buying a car of known quality-known ability.

APRIL 30 1910

11 13

In a word, the "Six-46" is an eminently safe automobile investment.

- It is a good car-not merely because we say sobut because its owners have conclusively, established this goodness in the gruelling tests of more than a year's actual road work,
- Here, then, is one substantial reason for the overwhelming demand which the "Six-46" enjoys. And there is another-a basic reason which has made this record possible.
- Time and time again, we have stated our policy of scrupulously avoiding any expression in Paige advertising which might savor of exaggeration or misrepresentation. We make an honest product and we propose to sell it in an honest way.
- But, facts are facts, and we boldly and fearlessly claim that the Paige Fairfield "Six-46" represents more actual dollar-for-dollar value than any other motor car on the market.

# We Were Right Then, We Are Right Now!

WHEN we made the announcement several months ago that we found it necessary to increase the price of Suit or Overcoat to measure from \$15 to \$18, in order to furnish you with garments that we could positively guarantee to give satisfaction, there was a "howl" from jealous im tators that a good Suit or Overcoat could still be furnished at less than the price we had set.

In our "ads" we have endeavored to state the true condition of the woolen market, the absolute necessity of a slight increase in price if we are to continue to render a service as reliable as in the past. This we have done honestly and fairly. There has been no "humbug," no "bluff."

If any firm in Canada could sell you better garments at less than our price- we found no fault with them. That was their business. But later events have demonstrated that those who boldly asserted to the contraryhave suddenly realized that it cannot be done. Now we stand exactly where

## We Were Right Then-We Are Right Now. You Can Always Depend Upon Us Giving You the

We are not unduly boastful when we say we are confident that the Spring Suit or Overcoat we tailor to measure at \$18 is a marvel of tailoring skill, style, and quality, that cannot be duplicated at \$25, or even \$30.

Our "Direct from the Mills" Connection is a Potent Power in These Critical Times.

wearer yearns occasionally to come up for fresh air. At any rate, the sum-mer may see us all attired from chin up, according to the modes of the Turkish dame. For motoring, sailing, rolfing, tramping and pursuing other out-of-door recreations which expose the complexion to the hot applications of old Doc Sunshine the harem won't larm us.

The monotone gray is a model which prides itself on the narrow fringe of ostrich introduced at the edge of the under brim. The brim is mushroom in its tendency, and the top of the hat is void of other trimming than a shoe string ribbon girdling the top of the crown, finishing in the smallest pos-sible bow.

the garment different from the general fashion trend. Oddities are always cropping up if you watch. Maybe it will be a set of the button-on pockets which you can attach at will to a loudly checked topcoat of wool velour. The pockets are of plain material, and hang by two loops to two large galilith buttons which match those used on the coat for fastening. Sort of a saddle-bag arrangement this, for much can be carried in these pockets, and they can be detached if the wearer does not wish to be heavily burdened. A tiny pocket in the sleeve of a plain

A tiny pocket in the sleeve of a plain handkerchief linen blouse appears just above the cuff. It is large enough to hold the small glove handkerchief which so many women prefer to the larger variety. A patent leather belt

shows two small pockets, one for the handkerchief and the other for change. Two layers of thin material rather Two layers of thin material rather than one layer of heavier material is a feature to be noted in new lingerie. It gives opaqueness without bulk. Some-times the layers contrast in color, especially in the chiffon and Georgette

repe varieties. The mitten sleeve is another odd note

vision for the thumb; other wash, it fingeriess. A removeable hat brim which can turn the hat into a small close-fitting model from the crown, or by the addi-tion of a brim into a large dressier afthe shawl collar this season.

fair, is worth remembering. Buckles distinguish many of the

the complexion to the hot applications of old Doc Sunshine the harem won't harm us. Tea veile-smart, new, saucy and chereal-are nearly all of the filet weave. The hexagon and diamond patierns are the best. All have pointed or scalloped edges, so that the inverted V which is worn at the front is not too pronounced a dent in the outline. Tiny black velvet polka dots, arranged in bands or in group effects, from the border, while ramage dosign imparts decorations in all-over effect. The most dolicious vines, small flowers and foliage appear in fragile outline. There is nothing of weight, heaviness or fulness in the new veis, They are properly called "fly away; as their occessive lightness gives flut-its and undulation. Quite as popular as the new tea veil is the square of filet (bordered with small velvet dots, with chenille outlines or the most deficate of embroidered effects), which has a circle cut from the contre, permitting the veil to be drawn over the trimmings of the hat points back, front at the slock of the neck, the it is occasionally tucked thru a ribbon throatlet. Extremely smart trotteur costume of shepherd's plaid-Braid and butto used for trimming. DAINTY BATHING CAPS **FASHION FANCIES** AGLOW WITH COLOR FOR THE MOMENT Exquisite Models in Every Shade A Column Devoted to Last Minute Novelties of La of Silk Rubber for Modern Mode as Seen in the Shops and Elsewhere. THE NEW HALO

Wool hosiery is being given pre-forence by the golfer, and the tennis enthusiast. Colors run riot, and such combinations as purple and green, orange and gray, or blue and yellow may be had in plain or ribbed hand-knit hose. These must be worn, of course, with one-toned or white cos-tumes, while for wear with awning-striped costumes, plain white hosiery is shown. Quaint frocks to match are much in

. . . Strong is the tendancy to trim even. The puffed sash has been recognized by Paris couturiers, who have ex-ploited it in a variety of clever ar-rangements. The sash made of softest taffeta or brocade droops gracefully in the back to take the place of the pannier. ing frocks of net and tulle, with graduating encircling bands of silk, satin, or broche ribbon. The newest, ribbons are extravagantly beautiful, and show a variety of fancy finished edges, as well as unusual floral trac-ings in gold and colors on soft back-grounds. pannier.

A new sporting coat made especi-ally for very warm weather, is fash-ioned of a material closely resembling pongee. It is heavier of course, and quite durable and comes in natural shades as well as white. White buck-skin is sometimes combined with it. The new straw for sports hats -The new straw for sports nats-bangkok—is already making a tre-mendous hit, and promises to appear in a host of splendid models. The straw is deemed sufficiently decorative

skin is sometimes combined with it. Beads are again decidedly "a la mode." Every dainty summer costunio will have its own necklet of beads--pearl beads, gold beads glass beads, jet beads--in fact any beads at all, provided they are new beads, and small beads will be quite correct and add considerable character to the frock with which they are worn. The longest ropes are for formal wear, and shorter ones for daytime.

The Lace Bedspread

An unusually pretty way of draping a lace bedspread over the mahogany bed was worked out by the interior decorator who set the bedroom scene in one of the most successful plays of the New York season. The bed was first covered with a pink satin spread, tucked in all around. Over this the lace spread was placed; it was wide enough to reach to the bot-tom of the mahogany sides. The spread was wide enough to reach to the bot-tom of the mahogany sides. The spread it has the darped in deep scallop fash-ion, the point that divided each scallop pink satin rosebuds. The sound. Empfre canopy, suspended over the head of the bed, from which hung the bed curtains, was made to match the other draperies of the room, which were of old blue faced with delicate pink. Mermaid.

Many Styles and Equally Many

MODEL

W HO said rubber bathing caps? Rubber, perhpas, but dis-suised so completely that first fance would call forth such exclama-tions as "Satin finished rubberized oloth," or "shot taffeta rubberine." The new bathing caps that will be worn by Miss 1916 are worthy of a place in the famous French salons for "thic" or "charming" are the only truthful descriptionary terms worthy of the concoctions fashioned for the modern mermaid, who will sport among the frolickers on gleaming sands rath-er than in surf-laden waves. For the truly fashionable bathing costume is not intended to be touched by water—it is in truth a beach costume fashioned on the smartest of lines and augumented by the newest of ultra-fashionable ac-cessories. Chief among these is the bathing cap made of a water-proof fabric or gorgeously made silk rubber that may be had in all the newest ap-proved fashion time of the season. proved fashion tints of the season. Styles Without Number.

The styles of the caps are apparentiy without number. Close turban shapes, demure bonnet shapes and caps with brims! There is a style for every type of summer girl—and the becom-ing one at that. Extremely new is the brimmed model. This is made in green, navy, rose, yellow, chartreuse or lavendar satin rubber and trimmed with rubber flowers of realistic outline. The crown or foundation part of the The crown or foundation part of the cap is made to fit closely, but shapely, about the head, being arranged in soft-folds. A halo brim, stiffened by genu-ine whalebone reeds that cannot rust or destroy the rubber, is pulled down over the foundation, thus forming a pretty shade for the face, and spread-ing a fascinating hue over the features of the charming wearer. There are many other equally attractive styles in poke design, "motor bonnet" modes, and bandanna types almost too num-erous to mention, as are the modes of erous to mention, us are the modes of, trimming with pretty rubber ruchings, sun frills, rosettes, flowers, fruits and

Erby. One of the floral clusters tucked under the crown apparently lifted it to a considerable height. A gem of a hat is of purple straw. The crown is high and square with as narrow straight brim. Tucked in the rown is a huge bow of purple velvot with two loops looking backward and two towards the front. Nestling be. Transparent horsehair braid ac-Transparent horsehair braid ac-

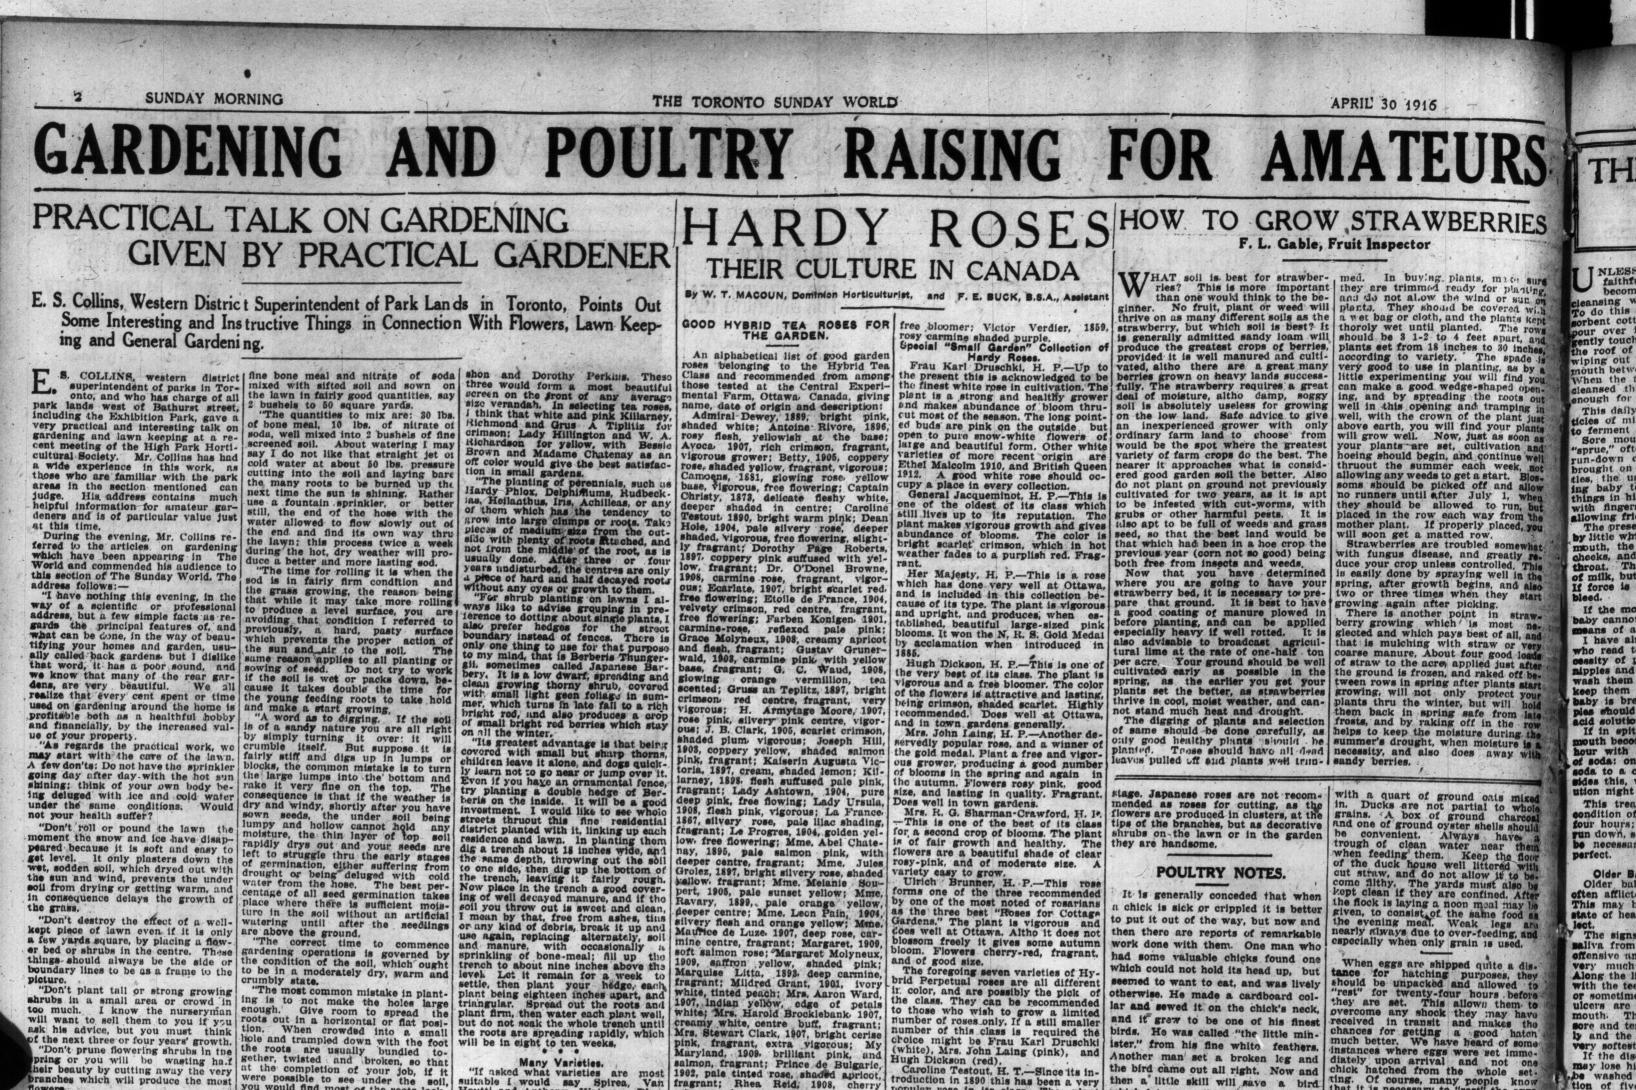

# Many of the original French after-Many of the original French after-noon models exploit the new neck-line, the decollet cut shallow, and wide on the shoulders. White organdie ruching is sometimes used as a finish, or perhaps pleated chiffon frilling. A straight double thickness band of white organdie loudly proclaims the Chinese influence.

straw is deemed sufficiently decorative without added trimming, the a simple band of ribbon drawn tightly around the crown and tied into a flat bow is effective, and quite permissable. Bangkok comes in an excellent rango of colors as well as modes. of colors as well as modes. Feather fans assume rather large proportions, especially the black os-trich ones destined to be carried by fashionable matrons. These are tied with scintilating bows of sequin-encrusted chiffon ribbon. The long ends are tied into a graceful loop that may be slipped over the arm when the fan is not in use.

Many Varieties. "If asked what varieties are most suitable I would say Spirea, Van Houtti and Anthony Waterer, Rhus Typhina Laciniata, Rosea Rugosa, Lonicera, Morrowi, Deuzia, Gracillis Aurea and Kerria Japonica. Any of these will de well in most positions these will do well in most positions, and instead of trying to grow grass under them, plant Crocus, Snowdrops, Sillias and Narcissus Poetecus bulbs. These will rapidly increase, coming up each spring with a perfect mass of bloom, in succession.

"Before closing, I would like to say a word in favor of small fruits and vegetables for the city garden. Once planted they are so little trouble, and yet the results are gratifying. Three Black Chempion count buck, and ick Champion currant bushes planted along the sunny side of your garden fence will produce 20 to 25 quarts of fruit, sufficient to make preserves for one family. Ten square yards of a strawberry bed will provide berries for the table, three meals a day for six

"While a row of raspberry canes, planted and trained as a screen across the garden would supply you with raspberries for two or three weeks. Pruning and manuring is all that is necessary to have success, and that entails only very little labor.

"Vegetables, profitable for the small garden, are first, salads then pickling onions. A plot six by ten fect will-produce six pecks of onions if sown dwarf beans, if your soil is light and sandy; if the soil is stiff and coid, leave beans out and try dwarf peas. sandy; if the soft is still and cord, leave beans out and try dwarf peas. "Beets and carrots are very profit-able, as the surplus can be stored in the cellar for use during the winter. "I feel that I must recommend the gardening notes to be read by every one which have lately been published

one, which have lately been published in our daily newspapers, I have read them myself, and altho I am not equainted with the writers, I am surbat if you follow the directions given, our efforts will be successful."

**Crooked Breasts in Turkeys** 

Many turkeys when dressed for narket are found to be disfigured by crooked breasts. In some, this deformity is merely a dent. In others, scription: besides a deep indentation, the ridge of the breastbone departs from the straight line intended by nature. Otherwise handsome birds are unsightly; thin ones are almost unsalatle. Commission men complain of this defect more than formerly. What is the explanation of this deformity? Some lean toward the theory that early roosting of young turkeys is responsible. If this is true, why is not every individual of a flock thus disfigured, for all begin roosting at the same time and age? Others believe that a lack of lime to harden the bones is responsible. In some cases this may be true. Lately, after some experiments, growers are concluding that the tendency is hereditary. Doubtless early roosting may emphasize a tendency in this direction. Young birds should be kept in coops at night as long as possible to dis-courage early roosting. Their rations should be reinforced with lime in At night as long as positive rations courage early roosting. Their rations should be reinforced with lime in some form. Ground cyster shell should be mixed with their grit. If should be mixed with the should be should be mixed with the should be sho However, the most effective safe, guard lies in maintaining a flock of straight-breasted breeders.

CHILD'S EARLY SOCIAL CONTACTS FORM BASIS FOR BREADTH

APRIL 30 1916

ner time, then cooked themselves some dried vegetables, and just as Foxy was about to take his last bite, and just as Fatty was clearing away all the last stray crumbs, Foxey gave a jump, and putting his finger against his temple, exclaimed: "Fatty, my boy. I have an idea!" "What is it? What is it?" cried Fatty in great trepedation, because, as I have saying: "Let us

#### THE SMILING FACE CLUB DIRECTED BY C. A. MACPHIE

But too much freedom of intercourse with elders is as undesirable as too little-Beware of the always-orlaw, a convenient and too popular device for dodging decisions. I PROMISE TO DO MY VERY BEST TO MAKE THIS SAD WORLD BRIGHTER. Signed .....

The parents, the cook, the nurse and the peanut vendor. It is unpleasant indeed to see a child join familiarly in the conversation and the cynicism of srown-up folks. But it is just as unpleasant to see children shy at stranger. It is necessary to use discretion. This is no doubt the reason why so many people adopt the Always-or-Never position—it substitutes a rule for responsibility; it is a device for dodging discretion. There are some homes that you visit which your children do not need to visit; there are others to which it would be well worth while to take the solution and the solution of the well worth while to take the solution of the s

Ther short, and at times they went to be deduce humpry, but just the same more. So, then and there they went the breakfast things.
The so, then and the whale, leaving Finley to wash up the breakfast things.
It would take too long here, to tell you how they tamed it, but the fact remains, they succeeded, and not long after that they collected their few beingings, not forgetting their tame wild cat, and bidding a long good-bye to their lonely hut, walked slowly down to the beach, shoved their boat, or whale off, and soon were out to sea.
For half an hour or so Fatty and Finley to set the table, "and whe middle of holding a fish over the fire, and Finley was in the centre of putting a dish (or round piece of bark) on the table, Foxy came rushing in crying out: "It has come at hand now steering, while WE puil our very backs off propeling a whals. Yes, a WHALE. "Foxy" I would call it any in the store the shore; but, sad to relate, when it got close enough to be seen words, he lifted hie had, looking whale, which stayed hard, and folded them one across the other (a sreat hablt he had), totally forsetting, as a which dropped, swiftly rolid

down. By this time Foxy had joined them, and, tho his knee was swollen from the wrench he had given it, he still smiled brightly. "Look at your fri-gate," said Finley, folding his hands one across the other, "this is the sec-ond time you have fooled us with your "WHALE-ships," and I for one, an sick of it; yas, sick of it," and, with these mean, surcastic words, he turn-ed on his heel, and walked back to-wards the hut muttering, as he went: "Foot! whale-ships; poch! whale-ships; the man makes one tired." Poor Foxy looked at Fatty while tears shood in his eyes. "Never mind, old chap," cried Fatty, siapping him on the shoulder, "come in to breakfast and cheer yourself up," so they, also, walked back to the hut, but were very much irritated; yes, very irritated, indeed, to find Finley just finishing the tail of the last fish. They shoved Finley out the door, where he remained till long after din-

Very sincerely yours, C. A. Macphie.

HOME is a good enough place for my children. I never take them with me when I go calling; they'll have enough of that when they get older." That represents the sin-cere attitude of a certain Mrs. Ran-I have spoken of this irregularity in feeding, elsewhere. It is the most harmful thing the young mother can do. I remember an instance. It was last summer, and it happened in that park at Niagara-on-the-Lake, just be-fore one reaches the little town. During the hour and a half that we allowed dolph, and of several thousand mothers. In marked contrast is the view the hour and a half that we allowed ourselves for supper and catching the boat, I saw a slip of a girl nurse her haby three times. I'm sure that baby cried its head off all the way home; another mother, who also comes from one of our first families: "I always take my children with me. If a family

U NLESS the baby's mouth is very faithfully cared for it is saily become sore. It requires daily teansing with boracic acid solution, to do this wrap a small piece of abortent cotton around the little finger, our over it the boracic acid and the root of the mouth and the sum out between the guns and the sides, when the teeth come they should be anough for a brush. This daily mouth-bath prevents par-ticles of milk remaining in the mouth to ferment and cause trouble.

its life-think what the months must have meant to it. Think what the

to ferment and cause trouble. Sore mouth, known as "thrush" or "sprue," often develops if baby is in a run-down condition: but it may be brought on by dirty nipples and bot-ties, the use of a "comfort," allow-ing baby to put toys and picked-up things in his mouth, rubbing the gums with fingers not scruppiously clean, allowing friends to "feel for teeth." The presence of the disease is shown by little white specks on the roof of the

by little white specks on the root of the mouth, the tongue, the inside of the cheeks, and sometimes far down the throat. These specks look like curds of milk, but they cannot be rubbed off. If force is used to remove them they bleed.

Babies who are bounced about too If the mouth becomes so sore that baby cannot nurse, he must be fed by means of a medicine-dropper. I have already advised the mothers, who read this department of the nemuch will vomit; also those whose bands are too tight; the pressure on the stomach causes the food to come

Constipation will cause vomiting and

Treatment. The first thing to do when a breast-fed baby vomits frequently is to make the period between meals longer and keep to exact regularity in the time of feeding. If baby is asleep when his feeding time comes around wake him up and keep him awake until he house, and every one who comes had his meal. He will soon learn to adjust his eating and sleeping habits. There is nothing so regular as a baby if you give him a chance. If the vomiting does not stop when the time between meals is lengthened, give baby less at a meal. That is, if he has been accustomed to nurse for the time to grow up in complete ignor-twenty minutes, shorten the time to fifteen or even the minutes, and let him rest occasionally. mouth becomes sore, wash it out every hour with a solution of biscarbonate of soda: one teaspoonful of baking soda to a cupful of boiled water. Be-sides this, wash with the boracic sol-This treatment should improve the

Older Babies With Sore Mouth. Older babies who have teeth are often afflicted with ulcerated months. This may be caused by a run down state of health, decayed teeth or neg-lect. This resting is really the simplest remedy for the trouble. In every case except where the milk itself causes the except where the milk itself causes the trouble, this simple trick will help things wonderfully. When baby is half thru his meal, let him sit up for a minute, then lift him very gently to your shoulder and rub or pat his back. This will bring up the gas before the stomach is full and will prevent vom-iting when the meal is completed. Remember-resting and ejecting the gas will cure nearly every case of your maliva from the mouth, the breath is offensive and the gums will be found very much inflamed and swollen. Along the line of contact of the gums with the teeth a yellowish line is seen.

mouth. The whole mouth is very sore and tender, the gums bleed easily and the child refuses all but the

is not good enough for my children to visit, it is not good enough for me." And there you are. Nor will you ever get any further if you are set up-ot being an Always-or-Never sort of person and of course it was accused of sea-sickness. It would have slept quite as peacefully as in its bed at home, if its poor little insides hadn't been so terperson. We have the same extreme positions in the matter of having children see visitors. There are the children who are kept hidden in the nursery, safe from ribly abused. And I only saw an hour and a half of

have meant to it. Think what the monuths and years to come must mean to any baby whose digestive or-gans have no chance to do the work intended for them to do. The baby brought up like this does not cry with hunger; but with dis-comfort and the pain caused by acute indigestion. You would cry too, very loudly, if anyone abused you so,

In other cases where vomiting is ha-bitual, the mother's milk contains too much fat or proteids and baby can-not digest it. In these cases curds are vomited and are also seen in the bowel

who read this department of the ne-cessity of particular care being given mipples and bottles. You know how to wash them thoroly and frequently to keep them safe for baby's use. It baby is breast fed, the mother's nip-ples should be washed with boracic acid solution before every feeding. If in spite of your precaution, the mouth becomes are wash it out every

the possible contamination thru the ungrammatical visitor, or from the evil influence of that other visitor who al-ways says, "My, aren't they cute!" And there are also the children who see and hear everything that goes on in the house, and every one who comes into it—like the little miss who, on see-ing a number of women leaving a

other

sibility; it is a device for dodging dis-cretion. There are some homes that you visit which your children do not need to visit; there are others to which it would be well worth while to take adult may be able to shake a hand or say some words of greeting without embarrassment, but the child needs to have an outlet for his aroused feelings thru some muscular action—and a bow or a curtsey is better than shifting from one leg to the other, or twisting the fingers or an unconscious grimace. Until we have a better muscular forthem. A little girl or boy needs to find out that there are other kinds of homes in the world, that there are other styles of furniture and furnishings, that there are other ways of serving meals. It is too much to say that the parochialism

which considers everything strange as "queer" is developed exclusively among children who never visited the homes of others. But it is safe to say that the of others. But it is safe to say that the restriction of early experiences goes far toward fixing the parochial habit of mind. Of course a child must have a great deal of order and routine in his daily life—but there is a point be-yond which routine and order make for narrowness without adding to sta-bility. an

It is not necessary for the child to see every one who comes into the house. But it is very desirable for the child to see the picture of friendly intercourse among adults, to hear them

ren shy at strangers.

When the Bottle Baby Vomits. There is usually something wrong with the proportion of fat in the food formula; or a patent food is being used that is entirely unsuited to the child.

Not a Healthy Sign. Thore is something wrong with the food or the oaby, if frequent vemiting occurs. It is not a healthy sign as some people would have you believe. That is a superstition handed down for that is entirely unsuited to the child. Irregularity of feeding, too much food and constipation are causes of vomitting in the bottle-fed baby just as in the nursing baby. Many babies cannot stand cream at all. In this case the food should be made up of mixed That is a superstition handed down for several generations and how the idea originated would be interesting to know. The only healthy thing I can think of in this connection, is that baby vomits when given too much food because his stomach is too bealthy to retain what it doesn't need. How-ever, don't let that satisfy you; if this undational contents is your litthe food should be made up of mixed milk instead of top-milk. Too much sugar causes vomiting. Try cutting the sugar amount in half. Feed baby

every three hours. If he cries give him a drink of cool, boiled water Constipated babies may have milk of magnesia added to the food occa-sionally instead of lime water. It is ever, don't let that satisfy you; if this unnatural condition exists in your lit-tie one, find out the cause and en-deavor to stop the trouble as soon as possible. Many nursing bables vomit because they are allowed too much food they are fed every time they cry with absolutely no regard for a regu-lar time table. The stomach kept con-stantly at work, having no time to rest, naturally rebels, and the food is a good thing to add a tablespoonful of one of the malted foods to the regular milk formula and leave out the sugar. These foods are rich in malt sugar and act as a laxative. They are valuable additions to the milk

according to habit, without any defin-ite plan. It may mean doing the family washing on Monday, year in, year out, not because it is the most convenient day, but because it's a habit--it's a tradition that "Monday is wash day," just as the old rhyme has it, and wash we will, regardless of wind, weather or personal conveni-ence. Now, the object of household "sched-ule" is to get all the work of the home done in good time, and with the con-venience of the home-maker in con-sideration. If it's a hardship to wash on Monday (because of the extra clean-ing that must be done after Sunday, owing to all the family being at home by allowing them to be surrounded by a false and artificial domestic atmos-phere, and allowing them to listen to

ing that must be done after Sunday, owing to all the family being at home, entertaining guests, etc.), why then the schedule is planned to fit the housekeeper instead of the housekeep-er inconveniencing herself to fit a custom! Here is a typical "schedule" for a week, which made housework very much easier for one young mother:

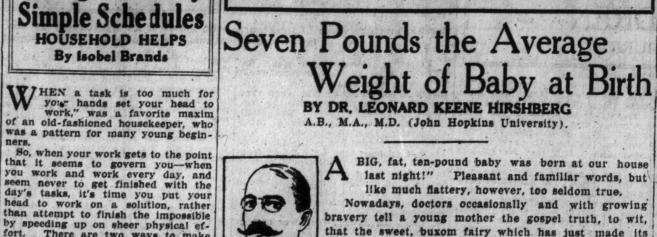

Monday-Light cleaning of house. Marketing for two days. Meals pre-pared, including food for Tuesday. Clothes sorted, mended and soaked. Tuesday-Wash day. Kitchen scrub-bed.

Wednesday-Ironing. Marketing for

two days. Thursday—Sewing for self and child-ren. Bedrooms cleaned. Friday-Weekly baking. Saturday-Thorough cleaning of 117

ing rooms. In the actual work of the day the

ing rooms. In the actual work of the day the schedule is important, for it is a con-stant guide in that great problem of the ougrly-busy housewife—"I've so much to do, what shall I do next?" If you sit down and quietly think out the work for the day you will be astonished how much easier and quicker the tasks are finished. Lump some tasks together, as a time-saver.

bravery tell a young mother the gospel truth, to wit, that the sweet, buxom fairy which has just made its debut into this vale of roses and dewdrops weighs exactly six and a half pounds—a goodly share of heavenly avoir-dupois. Not so some dignified, jovial, pompous, popular doctors, however. As they officiate in the usher-like capacity of introducing the stork's hospitality to its new mother, they hem and haw and beam with complacent

**DR. HIREHBERG** self-satisfaction and say: "Fine, fine! A lovely ten-pound"—or perhaps stretch the elastic and say twelve-pound—"boy or girl." Tradition and repetition is a fearful thing, with forelocks in front and

Secrets of Health and Happiness

Tradition and repetition is a fear baldhead behind. Almost each time the truth catches up to and seizes the ro-bust age-old lie, the greasy, slippery pate of the latter permits it to escape, and again gives truth the slip. For-sooth, then, it is small wonder that the well established scientific fact that new-born babies average in weight from six and a half to seven and a half pounds will scarcely be believed by the glowing pride that insists its baby "weighed ten pounds when born." Moreover, the wriggly, restless youngs-ter bobs around so much on the nurse's scales that Solomon himself could not often testify against any particularly insistent mother or father.

often testify against any particularly insistent mother or father. Weight Losses and Gains. Curious to tell, the baby destined to ive best, to escape most maladies—the breast-fed infant—is most apt to lose a quarter of a pound in weight the first three or four days on earth. The origin of this rests in the inability of the breast milk to flow forth properly until about the fourth day after baby ar-rives. Then the initial loss is quickly, at the beginning of its second week, recovered. On the 10th day the child weighs as much as it did at birth. During the first three months the haby's weight should increase steadily from five to seven ounces a week. For the next three months the normal child's gain will be slightly less, vary-ing in different children from three and one-half ounces to five ounces a Ten years ..... 65 Children may weigh less than the amounts shown in the above able and be in good health. When, table and be in good health. When, however, a child is very much below the average in both weight and height there is good reason to believe that something is wrong, particularly if it cries a great deal, is very thin and pale, or is constantly sucking its fist. Never blame a child's abnormal Never blame a child's abnormal or irritable state upon "cutting teeth," "a slight cold" or "indigestion." Look fur-ther and search more deeply for its underweight, small size, or lack of gain In strength. Soon or late it will be found that there is a deficiency of fat

found that there is a deficiency of fat or oils, or an excess of sugar as hap-pens when condensed milk is used, but overweight more often follows from this latter condition than from the and one-half ounces to five ounces a week. From the sixth to the 12th month the gain in weight should be about three and one-half ounces a week.

Most of the alleged instances of "in-digestion" are to be found in artificial foods or faulty combinations of fresh milk. It is, therefore, always necessary to remind the ever-forgetful folk that nursing at the breast is the most cer-tain way to ward off deformities, ill-nesses and death. At five months the healthy baby will

My complexion seems perfectly clear some days, and the folowing day there is some-times a rash under the skin, and little spots form here and there like red pim-ples. Kindly advise me what to de for this?

this? A.—Apply a little of the following to the affected parts each night, and twice a day: Calamine. 2% dr.; time water and rose water enough to make three ounces. 2. Avoid all oily, aot, greasy, rich and highly seasoned foods, sweets, pastrics and thick gravies. Apply white precipitate ointment to the pim-ples and be outdoors, more in the sun-light and fresh air.

G. W. M. Hamilton, Ont.-Q.-Twe years ago, I had a head of hair so thick I could scarcely comb it. Now it is fail-ing. Will you kindly advise me what to do for it? A.-Apply with friction to the scalp each night and morning a little of the following: Fluid extract of pilocarpine. I dt.: tincture of cantharides, ½ dr.; tinc-ture of capsicum. I dr.; mes water 1 co.

ture of capsicum, 1 dr.; rose water, 1 oz.; distilled water, 3 oz. Brush the hair and imassage the scalp each night for ten er fifteen minutes.

Household Helps Six Ways to Make a Rarebit CHILDREN By Isobel Brands

## WELSE rarebit is by no means a dish confined to late supper con-vivialities. Indeed, from the

vivialities. Indeed, from the standpoint of wholesomeness and digesti-bility, all the comic paper jests at the rarebit as a midnight viand are justified. Rarebit is a much better luncheon than iste supper dish, and, indeed, in one fam-ily, whenever father puts in a request for a rarebit, he gets it for breakfast! Here are some rarebit recipes that can be made very easily, and are an excellent luncheon dish : 1 tablespoonful of meited butter. 3 teaspoonfuls of cornstarch. 4 cupful of diced cheese. 5 teaspoonful of sait. 4 teaspoonful of mustard. 5 test.

teaspoonful of mustard. Dash of eavenne pepper. The cornstarch is added to the melted butter and stirred until mixed thoroly. when the cream is stirred in and the whole is allowed to cook for about two minutes. Then the cheese is stirred in until melted, the seasoning and the egg yolk are added and heated more slowly, and then the stiffly-beaten white of egg is folded in, and finally the mixture is poured over a triscuit or toast.

in the amount of sleep that they get. But this is a religion which, because it has no name, seems foreign to the minds of many parents.

her have it.

expected.

**CONCERNING OUR** phere, and allowing them to listen to exaggerated accounts of money affairs. Henry Drummond, when asked how a man should begin to be a Christian, said: "Begin with the paper on the walls of your rooms; make that beau-tiful; with the air, keep it fresh; with the furniture, see that it be honest. Abolish whatsoever worketh abomina-tion in your home—in food, in drink, in luxury, in books, in art; whatso-ever maketh a lie—in conversation, in social intercourse. By ELINOR MURBAY. Potatoes and Corn!

In domestic life." To teach a child simplicity and truth it is necessary to surround him with a world where simplicity and truth-fulness are counted great. The reli-gion that a child finds in such a home will last much longer and go much farther than that which one hears talked about in church and Sunday school.

THAT is how a teacher described her class. Her children had eyes and they saw not; ears, and they did not hear. If this is true of chil-dren, and my experience tells me it is, in the home-training. As soon as a baby can fix his eyes on any point, as soon as he can grasp any object in his hands, he begins to receive impressions of the world about him. His senses: feeling, seeing; tast-ing, hearing and smelling, are exer-cised first, and upon the clearness of the impressions he receives depends his intellectual power. Most adults lose half the beauty of living because they do not see and have a soon any parents.

<text><text><text><text><text><text><text><text><text><text><text><text><text><text><text><text> ners, So, when your work gets to the point So, when your work gets to the point that it seems to govern you-when you work and work every day, and seem never to get finished with the day's tasks, it's time you put your head to work on a solution, rather than attempt to finish the impossible by speeding up on shear physical efby speeding up on sheer physical ef-fort. There are two ways to make

fort. There are two ways to make work easier and more quickly done--one is the better planning of work, the making of a "schedule," and the other is the use of machinery. Let us consider first the "schedule" as a labor-saver, for every home-maker, no matter how tiny her income, can have a little schedule in her home. What is the difference between working on schedule and working under the ordinary conditions? Or-dinary conditions mean the working according to habit, without any defin-ite plan. It may mean doing the

Cream Cheese Rarebit. 1 tablespoonful of butter. 1 cupful of cream cheese, crumbed. Beasoning of salt, cayenne, mus-tard, ale. These ingredients are stirred in the blazer over hot water, and, if desired, al can be added until the mixture is smooth It may then be poured over toast points wafers or crackers. Rice and Rarebit. 1 tablespoonful of butter. 1 tablespoonful of flour. 1 tablespoonful of flour. 1 tablespoonful of flour. 1 tablespoonful of flour. 1 cupful of milk. 2 cupful of boiled cheese. 3 cupful of boiled the flour and spices are added, and then the milk is cooked slowly with the mixture until thick, when the cheese is added. When cheese is finally melted the rice is mixed in.

has become depraved, and is used to gratify pleasant sensation. Nine-tenths of intemperate drinking begins in gluttony and unregulated feeding. Probably, it has not occurred to many of my readers that just in train-ing their children to cat certain foods at regular intervals they are building up future moral as well as physical strength. Just in directing the little Meat once a day, at noon dinner should be quite enough for your little girl. She might have an egg, poached or boiled, at supper, or fish, or soup.

Toast and Rarebit: Cupful of milk. Cupfuls of grated cheese egg yolks. Salt and red pepper to taste

Milk is placed in a double boiler, and when it boils cheese is added and mixed thoroly, then eggs and seasonings are added and the mixture poured on toast. Simple Rarebit. 34 cupful of Cheddar cheese 2 tablespoons of butter (well rounded) 2 tablespoonfuls of milk Salt, pepper, cayenne

The thinly shaved cheese is added to the milk and butter, and stirred in a saucepan on the fire, stirring until it be-comes rich and creamy, when it is pour-ed on toast, only one-side of which has been toasted, the rarebit being poured on the untoasted side. Rarebit (with Worcestershire Sauce). 2 cupfuls of fresh American cheese 1 tablespoonful of butter 2-3 cupful of ale 1 egg

1 egg Salt, pepper, paprika 1 teaspoonful Worcestershire

The butter is melted in the blazer of the chafing dish, then one teaspoonful of paprika and half the ale are added

up future moral as well as physical strength. Just in directing the little activities of everyday life, mothers are preparing the children for their life work. The result will not appear for years, maybe—but eventually the re-ward for patience and hard work is found in the fully-developed, grown-up boys and girls. up boys and girls.

up boys and girls. Religious Training. True religion expresses itself in our surroundings, and if we would be solicitous about the religious training of our children we should see to it that the home atmosphere assists in the children, we send them to Sunday school, and in these ways we endeav-religion is a simple and beautiful And then a method and beautiful And the a method assists of the set of the s

# ATHENS, THE CITY OF SPIES WHERE GERMAN AGENTS WORK

#### Baron Von Schenk Is the Leader, and Teaches Students in a University - Here the Crook Is Cared for and Taught.

By J. M. N. JEFFRIES.Mataskopopolis is not the name of<br/>to the gentlemen recently returned<br/>to the Greek chamber by a thumping<br/>minority; it means "Cit'y of Spies."<br/>and is the latest and not the proudest<br/>utle of Athens.trusty baron answers, "Don't let's look<br/>tat the past; think of the future,<br/>You've talent; you shall write letters<br/>for me." Eiven to the confirmed mur-<br/>derer he says. Patience, friend,<br/>by all the rest of the world says of<br/>you'let have made myself clear.ledge on these and kindred points al-<br/>ready, but Schenk's establishment rea-<br/>lize one of the true functions of a<br/>university; it confirms and adorns all<br/>preview.<br/>No Ordinary Spy.But as a title it is only too well<br/>deserved. There is, I suppose, here<br/>in Athens today more furtiveness to<br/>whispering, more sleuthery than any-<br/>where in Europe.I hope I have made myself clear.<br/>Von Schenk was the chief of the<br/>German Corruption Scrvice in Greece<br/>and had in his very good pay all the<br/>criminals and crooks of the country.<br/>Woom he considered able enough.It is he who turned Athens intoIt is he who turned Athens intoledge on these and kindred points al-<br/>ready, but Schenk's establishment rea-<br/>lize one of the true functions of a<br/>university; it confirms and adorns all<br/>previous knowledge.<br/>No Ordinary Spy.It is he who turned Athens into

and had in his very good pay all the criminals and crooks of the country whom he considered able enough. It is he who turned Athens into Kataskopopolis, and he and his co-workers have done as much harm to the Allied cause in Greece as droves of fighting men. Tho among these co-workers must be counted Baron von Grancy. the (as he is called here) German submarine attache, and other legitimate offspring of the German and Austrian legations, Schenk obtained most of his effects thru the sons of the Levant. where in Europe. The whole of the city is given over to evil propaganda; four hundred individuals have within a month taken on some sort of connection with the secret police, promising lads are al-ready being brought up to the infor-mation business, and in any casual gathering of ten score persons in, for Schering of ten score persons in, for example any of the larger cafes, when they are full at the report hour, there is probably present the following per-centage of craft: Sixteen professional spies, five spy-destroyers, four dealers in contrabrand, three or four agents-provocateurs, six diggers, miscellane-ous watchers and loiterers, a mysteri-ous woman or two, and half a dozen masculine oddments whose fortunes the Levant. These parish helpers of his are not left to their own devices. Far from it. At the corner of Hodos Pheiudiou and Hodos Charilaou Tricoupi, almost at the junction of the last street and that broad Leophoros Panepistemiou (or University avenue), in whose pillared frontages Athens tries to re-cover something of the spirit of its past, stands another of the war-tri-umphs of our enemies. This is the Spy University, founded by Baron von Schenk. for the higher education of Germanophuse

Ous woman or two, and half a dozen masculine oddments whose fortunes have been told by Baron von Schenk. the German spy chief, who recently suddenly left the city. Who is Baron von Schenk? Baron won Schenk is a little bald dissolute man who began life somewhere in Germany; endured the vicissitudes of noble familiee; was professor of moral economy in a short-handed university; felt the Drang nach Essen: Krupped up in Athens not long before the war; when the war began was officially when the war began was officially made local director of Wolff's agency, but became, in point of fact, a philan-

thropist.
Great Philanthropist.
In the space of eighteen months he has established himself as the greatest philanthropist Greece has ever seen, for he had none of those hesi-tations about deservingness, about the worthiness to receive aims or not of protages which have assailed at one time or another the most seriously minded of men.
To von Schenk there is no one sor-did, no one outcast, no one vile. If a man comes to him and says, "I've been in prison most of my life and I've never earned an honest sou" won Schenk says to him, "Poor soul! How I feel drawn to you!" If a wo-man approaches him, her vice-worn features mended with paint, and says: "They've sent me to you; I've no money. How-wer, I may as well tell you I'm a darned with paint, and says: "They've sent me to you; I've no money. How-ever I may as well tell you I'm a bad lot and keeping on with it," Schenk repkes, "Well, well. is that a reason why I shouldn't help you?" Eprese come to him and state the

The two gentlemen saw. Schenk regularly and Baron von Grancy now and then, and in their free

time are understood to be working on an "Abridged Life of Monsieur Veni-

CAN MOVE SPRINKLER WITHOUT GETTING WET

An ingenious professor in a western university has combined a lawn sprinkler with a dismantled lawn mower in such a way that one can move the sprinkler about the lawn without get-ting wet. The long crossbar of the sprinkler was clamped to the bottom of the mover after the blades had been removed. In place of the ordinary handle a long pole was attached to the transformed mower, which reached well cutside the range of the running water. This permits one to move the device about the lawn without the inconvenience of turning off the water.-Popular Mechanics.

NOBODY has particular envy for the man who jumps from a balloon by means of a parachute at a country circus. Therefore

Not Care for Adventure Again.

TELLS HOW HE ESCAPED DEATH

The young officer in describing his experience said: — "The first intimation that something had gone wrong was when I felt a slight shock. I thought the telephone cable had parted. All at once I became aware that the other balloons were growing smaller, and I grasped the fact that I was adrift. A glance at my barometer told I was al-ready 5000 feet up. one must feel a thrill at the thought of such a jump made over the battlefield of Verdun, where the parachute and its human freight present a target for the enemy fire. Such a jump was made by a young French lieutenant, accord-ing to The Daily News, when a cap-tive ballocn broke away and threaten-ied to fall inside the German lines, bringing either capture or death to its ready 5000 feet up. "I tried to pull the cord working the

bringing either capture or death to its ommander. At the time of his adventure

"I tried to pull the cord working the hydrogen automatic control, but it be-came tangled and refused to work. I tried to climb up to it, but failed. Then I fcared I was lost. My first thought was to destroy my papers; then I thought of blowing my brains out to avoid failing into the hands, of the Boches. Then, however, came an in-spiration. Why not try the brachute? modish designs. Variations of the Italian and Spanish styles, which are no-At the time of his adventure the lieutenant was engaged in making ob-servations from the "sausage," as such balloons are called. He had not been up long when the steel hawser that connected him with the earth was cut by a German shell. At once the balloon started toward the German trenches, fanned along by a south wind. The word of the accident spread thru the French lines and the soldiers watched the balloon growing smaller in the distance, ticeable on blouses, dresses and suits, are duplicated in the neckwear lines-with slight modifications, of course. For wear with dresses, soft clinging spiration. Why not try the parachute? I had to be quick, for I was now 11,000 silk crepes, plain nets and dark silk and velvet novelties are favored. feet up.

Drops Into Space.

"The cord which was tied around my body was sixty-five feet long, so I had to jump that distance into the void Be-Exaggerated forms of the Robespierre collar are again in evidence. The Medici idea is also being revived fore the box containing the parachute would open and set it free. For a few seconds I held onto the car with my hands. Then I let go. I must have dropped more than one hundred fect The Medici idea is also being revived to a certain degree. However, it is doubtful whether these styles will live thru the war weather. The tendency for extremely flat styles is usually very prominent when the mercury soars. It looks as the fashion designers are

not partial to any one source so far as setting their inspiration is concerned. For instance, on one white serge gown displayed at a recent opening, the use displayed at a recent opening, the use Very often the of white linen fluting was made. A fon of anothe

the balloon growing smaller in the distance. Aeroplanes Pursue "Sausage." Altho four aeroplanes started in pur-suit of the "sausage." there appeared to be little hope of their being able to aid the unfortunate lieutenant. Just as the balloon got so far away that it was no longer possible to see the bas-ket, a speck was seen to part from the balloon, which shot up a thousand feet thru their glasses could see that it was a man with a parachute. A cheer went up as the men realized what had hap-pense lasted as the man became the target for the fire from the German lines until he was safe on the ground not far from the French front.

THE NEW BOOKS **Reviewed by CHESTER FIELD** 

THE VINDICATION. Vindication of a man's theory that there is good in every nature is the key-note of this latest novel by Harriet T. Comstock. In beauty of language, strength of argument and primitiveness of setting it surpasses two of her best known preceding books, "The Place Be-yond the Winds" and "Joyce of the North Woods." Huddled on a heap ot rags in a dark corner of a half-breed's hut lay the shrunken and shrivelled fugure of a small boy. It was in the "Reservation" among the Climbing Hills where the Lost Trail road leading to it zig-zags here and there among the pines, hemlock, manual and strivelied to successful issue, is what we all be-treast in the strike and there among the pines, hemlock, manual and strivelied tig-rags here and there among the pines, hemlock, manual and strivelied tig-rags here and there among the pines, hemlock, manual and strivelied tig-rags here and there among the pines, hemlock, manual and strivelied tig-rage and there among the pines, hemlock, manual and the strike the strike

Since each of us tends toward certain centres of association. Money cannot buy us friends. It aften purchases apparent iriendship, but when the wealth goes that which posed as friendship vanishes also. Friendship must be distinguished from that sentimental feeling which is

Friendship springs up and grows naturally; it cannot be planted at will. Foolish friendships are often formed in youth. It is useless to talk against. in vouth. It is useless to talk against, them, since young people always re-sent criticism of their friends. We must simply tolerate them and trust to the awakenings of common sense to prove all frivolous friendships false and unworthy.—Philadelphia Enquirer.

"HE failure of the arteries is one of the tragedies of modern life. Men in the very prime of life, and in the midst of business activities, are suddenly cut off. In many cases the blow comes before they realize their condition.

And what is the cause ? Most usually overeating and drinking, combined with too little bodily exercise. The blood becomes overloaded with poisons. The kidneys break down in an effort to filter the blood, degeneration of the arteries takes place, an artery in the brain bursts, a clot is formed and paralysis results. Or it may be an artery in the heart that gives way and causes heart failure.

And how is this condition to be avoided ? By moderation in eating and drinking, and by keeping the liver, kidneys and bowels regular and active. If you do not get sufficient exercise to accomplish this, it is necessary to use such treatment as Dr. Chase's Kidney-Liver Pills. It is only by the action of these organs that the blood can be purified and the poisons removed from the system. In using

#### Dr. Chase's **Kidney-Liver Pills**

you are not making any experiment, for they have no equal as a means of awakening the liver, kidneys and bowels to healthful activity. They prevent such serious troubles as hardening of the arteries, and thereby promote comfort and health and prolong life.

One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a sub-Imitations disappoint.

As everything looks dull and dank and drizzly to a young, ambitious, but briefless lawyer, so this particular March morning looked to Arthur Lisle. Then, it was Monday morning, too. What could be worse? So thought this young aspirant as he sat in his office waiting for a brief. So restless had ho become that he actually cursed his means of subsistence, which had led him to choose the bar as a profession. His experience with his first brief is the ex-perience of every young lawyer. How he feared the tudges; he did not recognize his own voice, and Lance and Prettyman. J.J., became a monstrous, two-hcaded giant. Then, just when he had braeed himself for the supreme effort of his life, he was suavely informed that he need not argue, as the case was dismissed. His adventure with Marie Sarradet, with Bernadette Lisle, his investment in a theatrical company; Judith, and a trip to Switzerland, hold the interest of the reader not less than does the elopement and the reconciliation of two other pro-minent characters in the book. Arthur took his tumbles bravely, and he took them every day, all of which goes to show that he is a most human and like-able young man. McClelland, Goodchild & Stewart are the publishers. too. What could be worse? So thought

There were other young men and women in the vil-lage but Chet and Lorraine. in their later lives, proved the doctor's theory of environment as opposed to heredity. Mussons are the publishers.

#### CANADA IN FLANDERS.

In the summer of 1914 Canada sprang to the aid of the motherland when her bugies called to duty. Within three weeks 35,000 men had enlisted, and the peaceful meadow land of Valcartier Plain resounded with the tramp and bustle of a great military camp. Within six weeks from the outbreak of the war a Canadian division, fully equipped, consisting of 10,-000 men, was ready to proceed ove, seas, and on Oct. 3 the Armada which lett the shores of Gaspe carried the largest army that ever crossed the Atlantic at one Mr. Powell has illustrated his book with photographs taken by himself at the front. His opportunities were such that

a nest in the old apple tree, and who greet the new arrival as an old ac-quaintance, are probably correct in their assumption that it is the same robin, year after year. "There is not the slightest doubt but what migratory birds return to the im-mediate region year after year for the purpose of nesting," said T. Gilbert Pear-son. secretary of the National Associa-tion of Audubon Societies, regarding this point. "But the ordinary, common farm-land birds, or the birds about our villages and towns, do not use last year's nests," he asserts. "Eagles, ospreys and only a very few other birds make use of last year's nests. "The nest is not the home of the birds. It is only the cradie for the young, and after the young have once left it, it is exceedingly rare that either they or their parents ever return to the old nest." clude a rest period in your little schedtree, and who ule

When selecting a hat, arrange your hair carefully in the manner in which you intend to wear it, and after the hat is yours don't hurry, but take a few extra moments to adjust it at the right angle. At the final touch re-arange your hat in front and at the sides and catch up the loose ends of hair in the back.

Don't buy a hat because it looks good on some other woman. There certainly is no law against your wear-ing a becoming hat, and no excuse, either, especially this season, when there is such a multitude of shapes to choose from to choose from.

Housework necessitating some labor until late in the evening-dishwashing after dinner, cleaning up dining-room and kitchen-makes it important that the "schedule" should include a rest

## Happiest Man is Honest

W E HAVE noticed the happiest man many a time. He works for his living and he gets a ly, that makes him prosperous and

for his living and he gets a good one. One thing we notice is he is a man of fine habits: doesn't squander a cent on liquor, tobacco or betting. He saves his money and is getting ready to buy some property. He loves his home, plays with the children, reads good books and keeps company with his wife. Because of his good habits he saves a little which will give him a chance to make an investment. And then there is another thing—he is a reliable man. He does good work. He will not smooth over bad work. He

N A RECENT issue The Paris Figaro presents the following sketch of General Augustin Yvon sketch of General Augustin Yvon that whose amountment as "Edmond Dubail, whose appointment as imilitary governor of Paris was gazetin geography and military, service at St. Cyr, as chief aid to Generals Thi-baudin and the famous Boulanger, and as cabinet chief of the minister of war in 1905 and 1911. Besides, General Duball was commandant of the St. Cyr. Academy in 1905 "General Dubail, who succeds Gener "General Dubail, who succeds Gener-al Manoury as military governor of Paris, was born at Belfort, April 15, 1151. He entered the army October 17, 11868, and was enrolled at the St. Cyr Military Academy three days later. In 1870 Dubail was commissioned sub-ileutenant in a chasseur regiment and was immediately ordered to the front in the campaign against Prussia. Un-fortunately his regiment was one of

Dubail was commandant of the St. Cyr Academy in 1906. "In January, 1912, he was in com-mand of the Ninth Army Corps. After mand of the Ninth Army Corps. After the outbreak of the great war General Dubail assumed command of the first army, and later, in January, 1915, of the provisional army group in the east. Nominated Chevalier of the Legion of Honor in 1886, he became an officer of this order in 1900, a commander in 1905 and a grand officer in 1911. On September 18, 1914, General Dubail was decorated with the Grand Cross of the Legion in recognition for having

in the campaign against Prussia. On-fortunately his regiment was one of those included in the capitulation at Metz, and the young lieutenant was in-terned in Schleswig from October 25, 2870, until April, 1871. "In 1876 Dubail was promoted to the "In 1876 Dubail was promoted to the "trank of first lieutenant; he was made a captain in 1878, and in 1888 he was made a major. On October 12, 1901, he was raised to the rank of colonel and "siven command of the First Zonavo regiment; made brigadier-general in December, 1904, and division-general

term a meeting was neld and 'Miss pices or broken bridges.' The alertness and determination required are shown er general interest in their welfare, as well as for the fine work she does for them as their teacher, was invited to the platform. Then Mary Williamson, as mistress of ceremonics, an-nounced that they would salute the colors. Hereupon a big pail draped in the colors of the school was brought to the platform and the girls in procession advanced everyone with "sock box" in hand and proceeded to place it in the beribboned pail. Soon the recepwork confronting the liquor traffic board was considered a good omen from the start. He is one of the best snown trade and financial experts of the empire. He is also now chairman of the Dominions Royal Trade Com-mission, and has been governor of the Imperial Ottoman Bank at Constanti-nonle and financial adviser of the tacle overflowed and it was emptied and refilled several times before the ceremony was completed. The contents when counted, proved to amount to

\$85, which goes to augment the "Sock Fund" of the school, organized some months ago by Miss Spence. The knit-ting brigade of the school have knitted several hundred pairs of socks besides many other articles. Miss Sealey, also of the staff is an ardent supporter of nople and financial adviser of the Egyptian government, as well as the holder of other appointments of disnotaer of other appointments of dis-tinction. Curious as it may seem, one of his slogans is that much may be done for the cause of temperance by placing the liquor traffic on a better financial basis. The true inwardness of this idea is that by consolidation of brewof the staff, is an ardent supporter of Miss Spence in the work. A box of the cosy footwear, which represents no small amount of self-abnegation on the part of the workers, went as a idea is that by consolidation of brew-ing interests and the reduction in the number of public houses or saloons, the temptation to drink will be cor-respondingly reduced. "No one who has closely studied the present method of administration can fail to realize how ineffective and extraverant the present mode of represent to the Irish Fusiliers on St. Patrick's Day and a special pair, all tied up with the bright emerald green that means so much to the lover of the Little Green Isle, went to the boy who walked all the way from Ottawa to "join." The girls of the Parkdale Collegiate are certainly doing their

"bit," and doing it well. During the past week Miss Kathleen

that the same argument holds good in a sense also in the United States and good in Eurke, organizing secretary of the now noted Scottish Women's Hospital, has Canada, I mean the corresponding been an honored guest in Toronto. Several social functions were held at excess of temptation resulting. "Licensed houses are not only too which she was the chief attraction, one numerous from the standpoint of pub of which was the luncheon given by Mrs A. E. Gooderham, to which the executive of the National I. O. D. E. lic order and the police-we all seem to lic order and the police—we all seem to realize that—but they somehow fail to realize that they are too numerous from the point of trade efficiency. They should be made to see that the same net profit could be realized from licensed houses reduced in number by 30 to 40 per cent. Reformers have tolked so much the set to see that the same to the set of the National I. O. D. E. were invited to meet the attractive visitor. Miss Burke is a Celtic lassie with an Irish name and traces her des-cent from Edmund Burke, of whom she is a great grand niece, and from whom

. . .

placent drivers acquiesced, and themselves sat round the inevitable wood fires, not sleeping--they never seemed to sleep or eating—one seldom saw them cating—but just gazing into the red ashes. I therefore called one of my soldiers and, dismounting, walked with him up the line of the columns ahead of us and, kicking the oxen out of their slumbers, made them give us passageway, and we proceeded. We passageway, and we proceeded. We reached our camping ground, half-way thru the defile, at 6 a. m., after a twenty-five hours' ride." These short paragraphs from Mrs. Stobart's story five an insight into the before un-dreamed of situations in which woman dreamed of situations in which woman have found themselves since the wan began and speak loudly of the forti-tude and common sense methods by which they are doing their part in overcoming the overwhelming difficul ties of the present situation.

The Home and School Clubs, which are a comparatively new feature in the activities of Toronto, owe their origin in a great measure to the thought of the serious-minded women of the community, who are looking not alone to ent. In this the promoters are in line of both units is hampered, the influ-ence of the home being weakened or perhaps nulified by that of the school or the reverse, when there is not the complimentary action which co-operation would ensure. Those interested in the matter point out that now is the time to prepare for the reaction which is sure to come. War exigencies have awakened many mothers to a sense of their responsibilities, who before taken things pretty much in a drifting fashion. Besides attending to their homes they have realized that they have had time to assist with Red Cross and along other lines, and the muscles and other forces which have been brought into play have gone ou to an even increased interest to the home and to its little ones. How is this awakened interest to be maintained and directed into permanent chanprehension of what some women are capable. Mrs. Stobart's hospital unit that went from Fingland to Serbia has how women are nels? By co-operation of the home with the school, is the answer of the Home and School Club. Five branchnow been heard of in every quarter of es are already formed the English-speaking world and in Courtice convenor of the sub-com-every country of the allies. A photo of mittee of education for the Women's this undaunted woman shows a thin Council as the general president, and the probability is for a general de-velopment which will include and cover all the districts of the city with parents, teachers and children working in a trinity and unity which must undoubtedly spell for betterment.

"You may attribute this truly re-markable attitude, I believe, to the public's belief that the restrictions are in reality war necessities and their willingness in a great crisis to sub-0.05 serve personal convenience to national

nine months.

about 66 per cent.

Consumption Had Gained,

that in the years immediately preced-ing the outbreak of war both the con-

sumption of alcohol and the number of "convictions for public drunkenness were steadily increasing.

"Also, in the past good trade has al-ways coincided with an increase in consumption of alcohol. It is disap-

pointing, therefore, to realize that in 1910-14 increased taxation of alcohol

the temperance propaganda, and the licensing regulations in force, which heretofore had resulted in an average

annual diminution of about 1000 licen-ses, had not been sufficient to counter-

act the influence of good trade and

high wages. "In attempting to present a fair re-

fection of the situation, however, I must give you a brighter side of the pleture. This concerns the highly gratifying readiness with which the public has shown itself willing to as-

sist in seeing that all should conform to the drastic regulations of the past

"One of the first points to bear in ind in grasping the situation here is

General Approval.

"Among the public at farge it is re-markable also that there is wide-"spread and practically general ap-proval of such provisions as that pro-hibiting treating. When a law inter-fering with a right as sacred to the Englishman's sense of personal liberty sis that of treating is not only accepted as that of treating is not only accepted but welcomed by a large portion of the populace, you may see how the nation is welded to win the war? Likewise the law that prchibits the extension of credit in alcohol sale and that perlitting the dilution of spirits, have not only teen approved, but elicited little

hol to hours conflicting least with the working day, and coinciding best with ordinary meal hours. "One of the best outward results of

the board's work is the reduction in the number of convictions for drunkenness with aggravations, aggravations usually representing dis-order and assault. The reduction in the number of these cases has been even greater than in the number of simple drunkenness. While not explained this feature is proving of vast interest to all students of the problem.

"We are not only pleased to note "We are not only pleased to note the reduction in public intemperance and of convictions referred to, but to cherve that they have been steadily maintained in areas in which our orders are in force, there having been

Conserve that they have been steadily maintained in arcas in which our may be arranged with four dark mahog- orders are in force, there having been no falling back from the best level reached."

The knitting committee, Mrs. Mc Cleland, convenor, reports some splendidly knitted socks for sale, knitted by women, who cannot do other work be cause of having small children whom they are unable to leave. The league Heavy pay these women for the knitting and offer the socks for sale for comforts or Red Cross. . . .

The following interesting account of the fashion parade in Atlantic City has come to this column from Mrs. C. J. Campbell one of Toronto's most enthusiastic club women, who is taking

worn

a rest down by the sea: The parade started in wheel chairs from Young's million dollar pier to the street pier, a distance of about a mile. The weather was perfect for the occasion. The sun shone brightly, the ocean displaying one of its prettiest moods, by rolling in one whitecrested wave after another in rythmic motion, this all adding to the picturesque scene of this display

Ropes were stretched on each side of the middle of the forty-foot walk about twenty feet apart and Boy

Scouts and police lined the way to keep the public outside the ropes. A motorcycle with three police kept the rack clear. Moving picture men and amateur

Complexion photographers were also busy. Rolling chairs, some two thousand in num ber, lined each side of the ropes.

Eager crowds of men and women the former taking as much interest and discussing the fashions as freely as the women), viewed the parade from the balconies, windows and the

boardwalk. The bugle corp of the Boy Scouts came first heralding the way for the models displaying the latest wearing apparel in spring fashions. Girls beautifully costumed as pages carrying standards with the maker's name headed each section of each different maker's costumes. The models for children did their

its enemies, and it is not unlikely that the sedulous agents of the kaiser have done what they could in sowing the seeds of distrust and suspicion wherever they found an opportunity. The creation of an atmosphere where such seeds spring up spontaneously is also the aim of Germany, whose agents are trained in all kinds of nefarious methods, and are wise enough to know that mental weakness is quite as effective an ally if it can be engendered as weakness, physical and material. The attack of Mr. Gardiner, editor of The Daily News, the leading Liberal organ, upon Mr. Lloyd George, is in some respects one of the most astounding results of the war in England. The minister of munitions has been the idol of the Liberal party, its driving force, its genius, its prophet and pioneer. To hear that he is a traitor to his leader, that he is false to his party and untrue to his principles is not so marvelous as to hear that it is Mr. Gardiner who says these things. Mr. Gardiner has been noted for his books on the celebrated men of the day, "Prophets, Priests and Kings," and a later volume on similar lines. But he was altogether wrong about the German emergency which he pooh-poohed and discredited, and he may have lost his way among the suspicions that centre about Mr. Lloyd George.

With the completion of the Kiel Canal came Germany's defiance of the world and His Canal Power her declaration of war. The kaiser evidently expected that when he could move his navy from the Baltic to the North Sea at will, he

would be able to rule the world. He had miscalculated, and had he waited three years instead of three weeks before taking his belligerent step he might have found good reasons for keeping the peace for the rest of his life. But canal power is no more to be despised than any other facility which gives a nation control over her resources or renders them mobile either for commerce or for conflict. It is not too much to say that had the St. Lawrence Canal been completed when war broke out, and a way to the great lakes been opened for vessels of 28 feet draught, the war might have been brought to a speedier close than can now be expected. One of the embarrassments of the Allies is lack of shipping tonnage. There is practically no limit to the demand for bottoms. Any old tub that will float and carry a cargo is good for a charter and at fabulous rates. A ship canal to the great lakes from the Atlantic up the St. Lawrence, placing Toronto, Hamilton, and all the northern lake ports and ship-building yards on the sea-board, would have made such a difference in the war as can scarcely be undertstood. When the present greater Welland Canal is completed it will be inadequate for the demand upon it. When it was proposed it was declared that it would be impossible for the nation to build any more extensively, and the depth was limited to 22 feet. Since then we have been spending money like water in enterprises which will bring us no returns but only burdens. A few millions more or less in building a 32-foot canal would have been a drop in the bucket of the expenses of the war. This war should teach the present generation at least that no necessary expenditure is ever too great for a nation to undertake. If it be wise it will be profitable.

#### . . .

One of the funny features of the Chicago decision that William Shakspere did not write the plays that go by his name is the intense indignation of the man who never read a Shakspere play in his life. He is as much apset about it as the profoundest

Avails Little

in War

Shakspere Still Shakspere, Bacon Notwithstanding

literary expert in the empire. It is an interesting study in psychology to discover just why a man is so moved over a matter of which he knows practically nothing. What is Shakspere to him, or he to Shakspere? He would probably admit that there was nothing between them, and therein is probably the solution of his indignation. He has all his life been under the impression that he has been a properly instructed and therefore an intelligent and educated man. To be told at his time of life that he has been laboring under a delusion all these years, and that he was not smart enough to find it out for himself, is directly to insult his intelligence, and it is no wonder he is irritated over such treatment. He resents it as he would resent being told that he was on the wrong side of politics, or that he belonged to the wrong church, or that he read the wrong newspaper, or wore the wrong sort of clothes. It touches him personally to be interfered with in his long-standing and cherished beliefs, and he will not suffer it. Hence the indignation. Very few people argue these things out in the cool way of the scholar. The scholar has his evidence, and all the judges of Chicago would not The scholar has his evidence, and all the judges of Chicago would not change the material of his knowledge. Hence he is not disturbed, and may be amused. The people who first heard that King David did not write all the Psalms that go by his name, or that there were two Isalahs concerned in writing the book of that name were greatly exor-cised, but they are accustomed to it now. Even if somebody else wrote the plays it would make no difference in them. So, hurrah for Shakspere! the

clay belt practically untouched. The vast Peace River district is a soundless plain."]

The Prince of Peace when war is o'er Shall don His diadem; The homeless folk whose hearts are sore-The People-what of them? Tears no more shall stain their faces. The scalding tears of pain; These People shall people God's peopleless places, Shall people God's peopleless plain!

Whene'er the Lord doth shut the door Another opens wide:

He'll find them homes when war is o'er, This side the rolling tide. Of tears He'll wipe away the traces And make them smile again; His People shall people His peopleless places, Shall people that peopleless plain!

Their fields are scourged with iron hoofs, Their garden walls are low; and everywhere the broken roofs Do welcome rain and snow!

But there's a peopleless plain that graces

A world across the main; These People shall people those peopleless places, Shall people that peopless plain!

Oh! why rebuild the ruined shrine?

'Tis fall'n, so let it stay! ome build a shrine in lands divine.

In new worlds far away;

land where warfare ne'er debases,

The fields of grass and grain. Ye People! come people these peopleiess places, Come people this peopleless plain!

Across the sea!-let no one grieve-

A pathway ye shall find, And safe from dangers ye shall leave

Great Pharoah's hosts behind.

Your prophet I'll be-uplift your faces-And this shall be my strain:

God's People shall people His peopleless places, Shall people His peopleless plain!

#### Looking Backward

W<sup>E</sup> are told that Easter is the adaptation of an old pagan festival, and so is Christmas, Ascension, Trinity and so on.

Now we can understand the marvelous rise of Christendom-the astounding spread of the gospel in the far-off days.

The Missioners were great men in the full sense of the term. Each had the full equipment of a successful evangelist. He had tact-he had horse sense. He didn't go to the heathen and say:

"Listen to me, ye miserable barbarians. If you don't quit worshipping that bum basswood god in yonder temple, you'll go to hell, sure thing! You've got to split up that pine idol for kindling wood and you've got to call off that bull and suffer in honor of your six headed joss and attend our prayer meeting

That's the way too many missionaries talk nowadays, but they are not in the same class with the men who first invaded heathendom with the story of

They quietly and wisely and in all cases ingenious-They quietly and wisely and in all cases ingenious-ly adopted the heathen festivals and the pagan sym-bols and oracles to the Christian cause. For the first few centuries the church was half pagan. Some of her ritual was all pagan and many of her chants and human were only clichtly altered from what they. The anacondan coll." and hymns were only slightly altered from what they

Christian by degrees. The old-time missionaries worked on the people on the principle adopted by Old Twilight. When he bought the Spulpin fifty acres there was a big, five-acre orchard on it, a sad place. The trees were mostly all seedlings, distorted, deformed, brushy and forbidding. The fruit where it was not tasteless was bitter—all of it was inedible. The plgs ate it under protest. Old Twilight did not tear out that orchard root and branch, and cast it into the fire. He cultiroot and branch, and cast it into the fire. He culti-vated and fertilized the ground, he pruned the trees, he let in the light of heaven, and then he top-grafted the whole business with choice fruit, and in a few years, lo, and behold you! there was a great orchard the whole business with there was a great orchard years, lo, and behold you! there was a great orchard loaded with prime Spies, Baldwins, Kings, Russets, Pippins, Rhode Island Greenings, Astrakhans, etc., a thing of beauty and a joy forever, besides being an thing of beauty and a joy forever, besides being an the facsimiles given by Sh Sha ney Lee, the only five autographs of Stratford William in existence, he spells his name as it is spelled in these columns, but Sir Sidney and many who support him insist that

new movement. The act was intro-duced, and carried thru the house by By a Toronto Man. An interesting fact, and one highly the Attorney-General, Hon. I. B. Lucas, and the administration of the creditable to this country, is that suvenile courts were first advocated N. 2 Toronto man, J. J. Kelso, in addresses delivered at Chicago during the world's fair in 1893, and some

his hearers on that occasion THE BIG BROTHER MOVEMENT brought the matter to the attention of the legislature of Illinois, with the result that Chicago and the State of linois gained world-wide credit as having first taken up this work on a large scale. Judge Ben Lindsay a little later became intensely interest-ed in the subject and organized a Commenced in Toronto as a children's court in Denver before any Colorado law was drafted and by his

himself to the consumption of liquids concocted by the higher prescription-ists, on the contrary, he is democratic enough to drink beer with any man, still he has a weakness for the mellow

martini. The wind was making sails of the

I slanced at him—the gleam of his bright neckwear and the faint aroma of Saturday Specials reassured me. Pikey was still a power in the land whereon pool-rooms had been erected, he was still an active participent in the grand old game of craps. What, then was the meaning of his projected, visit to the realms of finance? He said little to enlighton me; for the mast part his wandering eye con-cerned itself with the female of the species, and he confined his remarks to there criticisms of Queen street queens. Outside the bank we halted. Per-haps it was the wind, perhaps it was the fact that a little of the atmosphere from the dental suite on the first floor had oscaped and was wafted towards me, at any rate I shivered as we enter-ed the place. I am not in the habit of entering banks, and so I stared about me with some curiosity. After a little reflection I decided that the in-terior resembled a menagerie on a small scale. Or, perhaps, to give a more correct comparison, it was like a third-grade dim2 museum—lf they hat the fine atmosphere of the place on the first floor had oscaped and was wafted towards about me with some curiosity. After a little reflection I decided that the in-terior resembled a menagerie on a small scale. Or, perhaps, to give a more correct comparison, it was like a third-grade dim2 museum—lf they hat the front. The marching reace on the firing line at small scale. Or, perhaps, to give a more correct comparison, it was like a third-grade dim2 museum—lf they hat the front. There Highland Units. There Highland Units. There Highland Units. The set with the Highland the starts the fort.

The wind was making sails of the flaps of his none too sober-hued over-coat when I espied him advancing to-wards me. He rolls a little in his walk, does Pikey, but this is a perfectly nn-tural process with him—not the result of a congenially spent hour.

does Pikey, but this is a perfectly na-tural process with him—not the result of a congenially spent hour. "Well. Pikey, where to?" I greeted, "Oh, just goin' to the bank," he said simply. "Now, Pikey," I remonstrated, "abandon this delicate sarcasm. What "association have you with satire. Where to?" "On the level, pal, me for the wad-house." As I knew that on those occasions when the gods of chance had been kind to him, Pikey acted as his own safety deposit vault, or to be more explicit, the south-sastern pocket of his prats was the receptacle for his freasure, I stared at him. "Now what droll travesty is this?" I demanded. "Pikey, if the words of truth are within you, let them have exercise. Proceed!"

tablishment. In addition to cutting off infantry supernumerary officers today, the de-partment of militia has given notice of a drastic weeding out policy by an order covering both infantry and ar-tillery units. The order states that all attached officers who are not qualified will be cut off the overseas units to

Three Highland Units. There are now three Highlander Bat-talions in training in the Toronto Military District for active service over-seas. The 92nd, Lt.- Col. George Chis-

holm, commander, and the 134th, Lt., Col. Duncan Donald, commander, were both raised in Toronto by the 48th Highlanders Regiment. As the "48th" went almost a solid regiment to the front with the first contingent, Toronto has sent about 5000 kilties over-seas. The 5000 include several separate drafts of several hundred each

supplied during the tast year. The other Highlander overseas bat-talion in the Toronto District, the 173rd,

talion in the Toronto District, the 173rd, was organized by the 91st Highlander Regiment of Hamilton. The 173rd has quite recently been recruited up to strength. It is in training at Hamilton under command of Lt.-Col. W. W. Bruce. The 173rd is looked on with a great deal of pride by the people of Hamilton. Toronto and Hamilton may combine in the formation of another Highlander battalion, thus making a

attached officers who are not qualified will be cut off the overseas units to which they are attached after May 21. Stenographer at the Grand, Is No Imitation Stage Typist -She Produces the Real Educated Clicks From the Machine.

Probably thirty per cent. of the feminine part of the audience at each performance of "A Pair of Sixes," which will open for a week's engage ment at the Grand Monday, May 1st are, have been or hope to, be busi-ness women. Maybe a stenographer telephone operator, bookkeeper, file clerk or something in an office. When

the curtain rises they shudder. The scene reveals Miss Jane Moore as "Sally Parker," seated before her typewriter and the business portion of the audience shudder because they know that the stage typist never knows how to type. She invariably taos the keys with the first finger of each hand, alternately and highly staccato. This method never did and never could produce a printed line. It gets on the nerves of the girl who nows-hence, the shudder. But hold, "Miss Sally Parker" be-

gins to hit the keys, and lo, she types. A great sigh of relief and surprise waft upwards past the balcony, where it gathers strength; past the peanut gallery where it reverberates hither and yon with pure enjoyment of the educated clicks from the stage and finally dies away up near the roof with a final yip of appreciation. You hazard the guess that Miss Moore used to be a typist and gradually graduated to the stage,

Wrong egain: she never chewed a slab of gum or used a rubber eraser,

or took a shorthand note or picked out the dirt with a bair-pin, or in-serted a sheet of carbon paper or did the touch system in her life until a few weeks before rehearsals began for "A Pair of Sixes" at the Cort Theatre, in Chicago. The first thing she did in Chicago. The first thing she did with. Those stenographers made me when they cast her for the "stenog's" practice for hours every week. They made me use all my fingers. They as she puts it. "I went straight down to mama's factory on the west side," she said with a triumphant beaming rin "and told the stonement beaming" in it when it got a kink somewhere grin, "and told the stenographers that | and acted funny. Honestly, I never | ing."

knew how much a typist had to know even to draw twelve a week and that's about my calibre in the play, I take it. These stenographers in my mother's brush factory, my mother managed the placed for father for a while, explained to me what torture it was to listen to a stage stenographer mistreat the key-board of a perfectly innocent typing machine. determined to learn to do it right, for I believe in realism, not fanciful act -.

## Solution of Motor Fuel **Problem Will Be Kerosene**

So States Professor Charles E. Lucke, Head of the En-gineering Department of Columbia University - He Claims That the Only Permanent Relief Will Be Found in Use of the Heavier Oil.

PROFESSOR Charles E. Lucks, head of the engineering depart-ment of Columbia University, says that instead of looking for more gasoline for motor fuel the line of de-velopment for the automobile industry elopment for the automobile industry velopment for the automotive should be the and for the oil industry should be the introduction of the kerosene automo-of the engine or the goodness of the device proper, all of which means that the equipment, to give satisfactory re-sults, must be installed with due re-

"The first step in such a developt "The first step in such a develop ment," said Professor Lucke, "would be the adoption of a satisfactory method or type of apparatus, and its lesign in a perfected form by a staff of engineers engaged for that purpose.

"The methods proposed for utilizing kerosene in internal combustion en-gines of all sorts, including stationary as well as automobile and marine, may be divided into two general classes as to the manner of making the working and the acquirement of such patent rights as might be necessary to permit the manufacture and use of the accepted types of equipment for con-

accepted types of equipment for con-verting existing gasoline into kerosene automobiles. "Considering the big gasoline mar-isst, which is the eutomobils field, and assuming that appliances can be made ture is made external to the cylinder, and is distributed from the point where made to the several cylinders and introduced as a gaseous mixture. to use kerosane in the automobile ensine, then the sommercial development of these kervares appliances is the logical thing to to. There are now introduced as a gaseous mixture. All injection systems are unsuitable of the second that the price is introduced as a gaseous mixture. All injection systems are unsuitable for the same development is so small that the price is gasoline. It can be obtained anywhere is gasoline. It can be obtained anywhere is gasoline. It can be obtained anywhere is the begune the same development is speeds at which automobile engines must operate in conjunction with the speeds at which automobile engines is perfect system of distribution still exist to day, and will contifue to exact no matter low far improved distiliation for increased gas line yield may be carried. Ey the introduction of the kerosome burn ag sutomobile an impress on can be made on the situation of measurable magnitude immediately, because the for a product now difficult to sell, and to an equal degree reduces the demand on the now overtaxed gasoline market." sine, then the commercial develop-

sell, and to an equal degree reduces the demand on the now overtaxed gas-oline market." In regard to the mechanical prob-tems involved Professor Lucke said: "The question boils down in the final analysis to what can be done to make an automobile operate on kero-sene, and whether or not the results of such operation can be regarded as satisfactory. This subject is one to which a good deal of attention has been devoted, but in very few cases has this attention been systematic or thoro enough to produce any general-ins it been organized; in most cases it has resulted only in a socalled ker-terned carburget in work of the automobile type. They have the automobile the complete

erous to affect an appreciable percent. Regarding the organizattion needed age of automobiles in use. for the introduction of the keroseng automobile, Professor Lucke said: "It is believed from a study of the situation that not only is the sale of such kerosene carburetors or vaporiz-ers alone unable to make an adequate "While the kerosene car is not at the such kerosene carburetors or vaporiz-ers alone unable to make an adequate impression on the situation by reason of the method involved, independent and it needs only the same sort of

The year past saw strenuous rivalry in the price class of Saxon "Six." "Fours" and "Sixes" filled the field. Long before many of each make were in road service the air was charged with claims and counter claims.

It remained for the test of actual performance to determine the class cars from the marely mediocre. Record after record-in speed, in power, in hill-climbing, in acceleration, in economy-fell before "Saxon" Six. It set a pace too hot for most,

And now-at the end of over a year in owners' handa--it seems clear that Saxon "Six" has fairly carned its place at the top of its price class. This fact should win a moment of your consider-ation, for the verdict of performance carries weight.

And the price of Saxon "Six"-a new price for a quality car-has caused critical buyers to question higher-priced cars. For they see in this "Six" what can be saved to them through modern methods, skilled engineering and big output. Let us show you the Saxon "Six" today.

YONGE & WELLESLEY .

GREAT EUROPEAN DEMAND

War-time Conditions to Blame

for High Cost of Gas, Says

The Exhaustion of Supply Not Yet in Sight-Oil Wells Alleged to Be Plugged.

REACHED PEAK PRICE

CAN'T see the reason for all this excitement about the price of gasoline," says Horace T, Thomas, chief engineer of the Reo Motor Car Company, "nor can I under-stand why some folk who ought to know better, take the matter so seri-ously. Of course if there were the slightest chance of '40 cent' gasoline in the near future, or even a chance that the present prices would con-tinue, it would be different. But any-one with even the most superficial knowledge of conditions knows that

"No one worries about the price of aluminum—though that is now twice its normal price. Nor brass, nor lead. The price of steel is high—but nobody supposes for a moment that those prices will obtain after the European war is over. War conditions and wat prices is the answer to the gasoline situation as to the others.

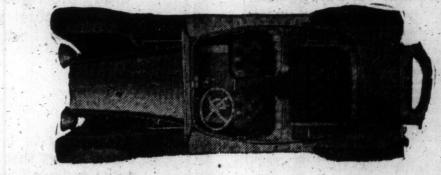

"We are exporting tremendous quan-titles of gasoline to Europe. In fact, since the Galician, Romanian and Russian fields are inactive, we are supplying the world with gasoline as well as all other petroleum products. I no-ticed the other day that twelve big tank steamers had cleared on the same day-the biggest day's shipment ever made. And every available tank ship is in service. The Standard Oil Com-pany is rushing work on 30 of the largest tank steamers ever built. "Surely there's ample reason for the present shortage and for the present prices. They are war-time conditions that is all. And they will end with the war. In fact we are at the peak the war. In fact we are at the peak now-prices will go no higher and may be expected to come down any day. "Incidentally I have it on pretty good authority that oil producers, like men in other lines, have been quick to take advantage of the situation and to temporarily advance prices just be-cause they could. In fact I am told that in order to uphold prices and for that in order to uphold prices and for speculation purposes, a very large pro-portion of the oil wells of this country are actually 'plugged--they are not pumping. Nor are these wells con-trolled by 'Standard Oil.' They are independent for the most part. Right now there are 200,000 barrels of crude petroleum in the big reservoirs on the now there are solve barrels of the petroleum in the big reservoirs on the hill at Oil City, held for '\$3.00 per barrel,' and speculators are paying that and more. There's 'war brides' for you!

"Of course that condition cannot last. In fact there is evidence that it is about over. Producers have been taking the long prices of late at a rate that will surely readjust matters. "But you say, could not the pro-ducers keep prices up by a continua-tion of those tactics? The answer is tion of those tactics? The answer is that in normal peace times, just as soon as gasoline in this country ap-proaches 20 cents per gallon, Russian and Asiatic oils come in in floods. Oil, like water, soon finds its level—scono-mically as well as physically. "Some will recall that just before the war broke out, people on the Pa-cific coast became alarmed at the scar-ing prices and feared they would con-tinue. A company was financed to bring Asiatic gasoline over—and im-mediately thereafter Pacific coast points got the cheupest gasoline they had had for years. In short, just as scon as the price of gasoline reaches a certain level it begins to flow back a certain level it begins to flow back this way—and to stop competition be-

fore it gets serious, our distillers cut prices. That was the real reason for the various price cuttings in the past;

98.4 CHANDLER SIX, FOUR-PASSENGER, \$1895 We Cannot Describe the Beauty of the **Chummy Clover Leaf Chandler Roadster** F you have seen the new Chandler Roadster you under-They have said the Chandler is the most beautiful car of the year. So come in and see. There is an air of smartness and distinction about this stand why we do not attempt to describe it. If you have not seen it come in today and get a new idea of motor roadster that is rare. car beauty. The graceful symmetrical lines remind one of a swift power boat. And that impression is heightened by the view

This new roadster is the most beautiful car of the year. There can hardly be any argument as to that. Someone having reason to be blased might dispute this, but you are un-prejudiced—you will look with open mind for grace of line of the body from the inside. The commodious seats, the unusual depth of the body, the softly moulded curves all suggest the trim, tidy speedcraft. We believe this will prove one of the most popular Chandler and beauty of finish-and you will agree with what countless thousands at the automobile shows have said very positively.

Come see the Chandler. You will be delighted with the style of the car and you know now that you can depend on it mechanically-depend on it for all the power, speed, flexible control and day-in-and-day-out service that you could ask for in a car at any price.

For the Chandler chassis, distinguished by the Marvelous

Chandler Motor, has been proven right through three years of service in the hands of thousands of owners. It is free from any hint of experimentation, free from any hint of untried theory.

In spite of higher prices of all materials entering into it, the Chandler is still noted for high quality construction throughou and the finest equipment.

## LOCATING AND CURING TROUBLES IN ELECTRIC SYSTEM OF A CAR SIMPLIFIED

N a large percentage of instances it will take only a minute's inspec-tion to determine exactly in what unit an electrical trouble is located. For instance, if the trouble is in the starting motor there may be symptoms that render it impossible for one to come to the conclusion that the trouble was anywhere else. The next ster would be generally to have the starting motor removed and brought into the shop,, where the work could be

definite unit. says J. Edward Schipper in the current issue of The Autoor top, that the terminals are not bent over, touching the metal battery box, and that none of the insulation of the wires is soaked with acid. Tight ter-

The matter is simply one of elimina-tion. It is a case of traveling from the known to the unknown, step by step, until finally the bad spot is reached. However, there are short cuts which can be employed on definite units which will greatly lessen the work and prevent the repair man from taking down the entire part in a search for Repairs on the Generator

down the entire part in a search for some little defect which probably can be located by using simple tests. These cannot be classified under general heads, but will be suggested in taking which occur under up the troubles their particular heads. Since all starting and lighting sys-tems are manufactured to perform the same functions it is but natural that

bearings, altho it is true that a number of makes are free from this, due they should be made up of units which do the identical work. All systems are to the specific care taken to avoid provided with a storage battery, all have generators to maintain the cur-rent supply, all have starting motors to grank the engine, regulators to govthis trouble. If trouble has been traced to the generator, as it can be as a rule thru the fact that the ammeter reading in

dicates ern the rate of charging, switches to control the action of the various units and wiring to connect these units and provide a path, the circle, over which and brush mechanism will be exposed giving access to what is generally the the current shall flow.

Certain types of each of these units have certain inherent weaknesses, and these are naturally the points watched more closely by the man familiar with heart of any electrical troubles which might have occurred. With the commutator housing re-moved, or any other housings possible more closely by the man lamiliar with the business. Again, just as in cars it very frequently happens that the first run of a certain series will have cer-tain weak spots which are corrected in the cars bearing a higher serial number, so in electric lighting and itarting systems the earlier develop. on the particular make under consid-eration, the armature shaft is rotated slowly by hand, allowing the repairman to locate binding or worn out bearings. As the armature shaft is rotated the surface of the commutator starting systems the earlier develop-ments may be electrically correct but mechanically weak, or vice versa, caus-ing certain troubles to develop in the earlier models which do not occur in is examined to see if it has become rough or blackened. are constantly in contact with the commutator it is but natural that they should wear away, and they do so in

the later, and it is only fair to state that the latest developments in starting and lighting systems show a re-markable amount of attention given to these little kinks which at first were the form of metallic powder or dust. If this is allowed to accumulate it will sometimes fill the ridges between the the cause of most of the trouble. Logically, the only method by which

a short circut between the brush hold-ers. A rough or blackened commuthe troubles can be taken up in detail is to take up each unit singly and, tator should be cleaned and smoothed with fine sandpaper while the arma-ture is rotated. A rule which must be remembered is that emery should since the battery is the starting point, it is considered first.

> generator would increase rapidly with the speed, but in order to maintain the life of the battery the ampere flow entering it must not rise above a cer-tain point. There are two basic me-

thods of doing this, one by regulating the amperage of a quantity\_of current and the other by regulating the volt-age or the pressure of the current. The voltage or pressure of the current. The minals should also be the rule, altho, of course, this belongs more to the wiring than to the battery. voltage or pressure is what causes the current in amperes to flow. With the realization of the importance of the regulator in mind the ammeter should be carefully watched to check the charging rate.

Generator troubles can be divided into two heads, mechanical and elec-With rare exceptions electric start. trical. They are often combined. as ing motors are series wound. This means that the current passes from the commutator thru the brush, thru the mechanical trouble will also set up an electrical interruption as a general rule. Probably the most frequent cause of generator trouble in the averseries field then out thru the line and back thru the other brush to the com-mutator. Electrically, therefore, prac. age type of machine is in neglect of the lubrication of the armature shaft tically all starting motors are Mechanically they vary in their shape and construction and in the method by which they are connected to and de-

tached from the gasoline engine. Electrical troubles are very scarce in marting motors, for two reasons: first,

they are simple, and, second, they are only in use a limited ecause either no charge or weak charge, the first place to look is at the commutator. Removing the commu-tator housing, the commutator surface length of time in starting the engine. The mechanical troubles in the major-ity of instances are connected with the chanism for throwing the starting

pinion in and out of mesh. The ar-rangements for doing this are gener-ally different, probably the most com-mon method now being a magnetic scheme, or by the Bendix gear. Koller clutches also are used, and sometimes the starting pinion is engaged posithe starting pinion is engaged posi-tively by pressure on the starting Where motor generators are used constant mesh machines are some-

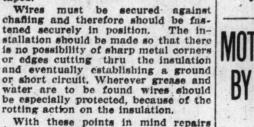

times employed in which the machine acts as a motor below certain speeds and a generator above a given speed. Cases where the meshing mechanism fails to work are easily detected, and generally the case is one which should be treated mechanically, altho in magnetic designs the solenoid should be examined to see if colls are in good condition and are pulling the starting pinion into place.

found by the systematic method Armature, commutator and brush troubles may occur on the motor just as in the generator, and the detailed explanations and descriptions under the generator head may be applied to the motor. A clean com-mutator and proper brushes in correct adjustment are necessary to the proper performance of the starting motor the same as they are to the generator. Wiring and Connections

A large percentage of the minor troubles encountered by the car driver are in the wiring and connections, Small grounds, short circuits and cur-rent leaks are due to some defect in insulation, especially of terminals, con-nectors, switches, etc. Sometimes these troubles may become the cause of more serious difficulties if they are allowed to go without attention. A allowed to go without attention. A lamps do not light. They form one ing the proper functioning of an elec-small ground in the battery circuit of the little detail parts which must

tion of the storage battery. A worn starting switch has been known to caused a stripped flywheel gear, and thus, altho the trouble in itself may be only some little detail it may be serious enough to give a great amount of annoyance if it is not looked after. In a two-wire system in order to ecure a ground, contact has to made with both wires and some part of the frame of the car. In a single wire system any contact with the car frame gives a ground. In either system all wires should be insulated from each other except at points where contact is necessarily made, and there the connections should be soldered and

The Goodyear Tire and Rubber Co .- of Canada-of the United States-of Great Britainof South Africa-of Australasia-of South America-of Mexico-have you ever realized the tremendous ramifications of these world-wide institutions that are supplying better tires for every nation? All of these corporations do not manufacture, but purchase from The Goodyear Tire and Rubber Co. of Canada and The Goodyear Tire and Rubber Co. of Akron-tires being shipped continuously from Bowmanville, Ont., and Akron, Ohio.

search explained. Motor and car vi-brations will often loosen the wiring and cause poor and intermittent con-tacts to be made. The connections to such units as the motor switch, dash instruments and switches. battery, generator, motor, etc., should all be so carefully made that a great factor of safety is given against possible dis-

may be due to other causes, but when two or three of them come together the trouble is practically surely in the battery

two or three of them come together the trouble is practically surely in the battery. The common methods of testing the battery to find if it is in good condition or whether it is giving any current at all is to connect the terminals of a test lamp across the positive and negativo battery terminals. When testing a three cell battery the six-volt lamp can be put across each cell and the light should burn dimly each time. When thc test lamp lights across the terminals be put across each cell and the light should burn dimly each time. When the test lamp lights across the terminals In returning the magnets great care must be taken that they are replaced in the same position as they were beof two of the cells and not across the third it is an immediate indication that fore, Brusnes will sometimes be found to

the trouble is in that definite locality and the battery should be immediately referred to the service station. Brusnes will sometimes be found to be sticking in the brush holders, with the result that imperfect contact is made between the commutator and the brush, or occasionally no contact at all. Grease and dirt will generally be found to be the cause of sticking, and the cure is cleanliness. Should the trouble, however, be due to brushes, which are too large, they can be filed carefully to secure perfect fit in the holders. Sometimes the poor contact is due to bad spring tension which does not press the brush against the commutator. This trouble is over-come by a fresh adjustment of the spring, or a spring replacement. To If the cells are all weak, as is shown If the cells are all weak, as is shown by no glow of the test lamp across any of the cells or only a dim light when put across the positive and negative terminals of the entire battery, it in-dicates that the battery is partly ex-hausted and it should be charged. If the charging does not increase the electrolyte's specific gravity or the voltage up to the standard the trouble should be referred to a battery sorvice station if possible. station if possible.

Lift Brush

One precaution must be observed: Do not run the engine with the generspring, or a spring replacement. Too much pressure, however, between the brushes and the commutator should ator in place and the battery removed without lifting a brush from the combe guarded against as excessive pres-sure would cause the brushes to over-heat and deteriorate. mutator. There are a few systems in which no damage will occur when this which no damage will occur when this precaution is not taken, but unless you are positive the system you are work-ing on is one of the exceptions it is far wiser to follow this rule. With the hydrometer syringe mea-

wiser to follow this rule. With the hydrometer syringe mea-sure the gravity of the electrolyte, and to secure the new brushes from the maker of the generator. Commuta-tors naturally must be clean, free from grease and bright. It is also of great importance to have a clean com-plete contact between the brush and the commutator. sure the gravity of the electrolyte, and when charged the reading should be between 1275 and 1300, and when dis-charged never below 1150. The facili-ties of the ordinary car owner or repair inan will not allow him to do any prac-tical work in batteries, as far as the internal construction is concerned.

internal construction is concerned. Sulphation of the battery lies within the scope of the repairman as it can The automatic cut-out and the reg-ulator may be considered a part of the scope of the repairman as it can be generally cured by giving a long, slow charge, or in other words by mak-ing the charging rate of the battory three times as slow as normal. Tho repairman, however, should go further than merely curing the sulphation; he should take up the inherent trouble or defect which is making the sulphation the generator since they have so much to do with its action, and since as a growing practice they are mounted directly in unit with it. The automatic cut - out prevents the battery from beginning discharged the battery from beginning discharged thru the generator when the ergine is not running. It also connects the gen-frator to the battery when it is time to change the latter or when the car speed reaches a fixed amount. Troubles in the automatic cut-out defect which is making the sulphation porsible.

#### Remove Acid From Tops

rater to the battery when it is time so change the latter or when the car be spring tension or weight which active material due to some exterior active material due to some exterior discharge either of the pattery as a rule and will generally cause the material from the plates or cause them to backle. Insufficient charging also to the solutions of the active material from the plates or cause them to backle. Insufficient charging also to the solutions of the active material from the plates or cause them to backle. Insufficient charging also to the solutions, is that the sediment does the further available surface. Battery re-pair, however, should be undertaken to backer clean, and where acid fas leaked out and collected on the suppily of cur-mate alter a singht short across the top of the battery which makes a ma-terial reduction in the suppily of cur-material reduction in the suppily of cur-material is officer craled, should start from

# Superiority at a LOWER PRICE

Gives You Goodyear

MADE IN CANADA

## **Compare These Prices**

Were Goodyears NOT Made in Canada, They Would Cost You-

SIZE	FLAIN	ALL-WEATHER	
$30 \times 3_{2}^{1}$ -	\$19.02	\$22.23	
$32 \times 3_{2}^{1}$ -	21.87	25.58	
34x4 -	31.92	37.34	
36 x 41 -	44.96	52.65	
37x5 -	52.44	65.55	

Study the figures given here. You can see the actual saving to you in dollars and cents because Goodyear Tires are

made in Canada. Only because Goodyear Tires are made in Canada can we sell them at these low prices.

## **Preferred Above All Others**

A census of 71 principal cities of the United States shows that every fifth car is equipped with Goodyear Tires. This despite the fact that there are some two hundred other brands, most of which sell in the United States at a lower price than Goodyears. Were all tires equal dollar for dollar in the eyes of those motorists, only  $\frac{1}{2}$  of 1% of the tires in use there should be Goodyears, whereas the census showed 21% Goodyears.

This unusual preference extends to Canada also.

Yet many of those two hundred other brands not made in Canada are offered to you here in Canada

You are usually asked to pay prices from 40 to 50 per cent. higher than the prices at which those brands are offered in their home markets.

You may be offered tires not made in Canada at a price, size for size, as low as Goodyear Made-in-Canada prices. But you know that in the markets from whence they are exported, they are offered at prices much lower in comparison to Goodyears, and yet do not acquire leadership.

Buying Goodyear Made - in - Canada products means more than keeping hundreds of workers employed. It means a direct, immediate saving to you on each purchase.

Toronto.

Four different arrangements of the valves are found in motorcycle motors. These are: Side-by-side: inlet-overexhaust; opposite sides and both-in head. In the first arrangement, the inlet and exnaust valves are in separate chambers on one side of the cylinder, and are mechanically operated directly from the cams thru intermediate pieces called tappets or push-rods. These work up and down in guides formed in the distribution casing and contact with the ends of the valve stems at the proper times to operate the valves. In the inlet-over-exhaust arrangement, the inlet valve is in a dome and the exhaust valve is operated dome and the exhaust valve is operated directly as in the side-by-side arrange-ment. The inlet may be either auto-matic or mechanical; in the inter case, there is a rocker formed on the dome which is operated by a roc leading from the inlet tappet, and the lifting of which pushes the valve downward to open it. This form of mechanical valve has a spring within the dome to

to open it. This form of mechanical valve has a appring within the dome to ensure its closing, in addition to the springs fitted to the tappet to keep them from making contact with the ends of the valve stems or push-rods when the valves are to remain closed. In the automatic inlet, the spring is located inside the dome, and in both forms the valve has a cage in which it works, arranged in the dome but read-ly removable therefrom. In the direct, ily removable therefrom. In the direct-thrust valves (side-by-side and the exthrust valves (side-by-side and the ex-haust valve of the inlet-over-exhaust type), the valve seats are formed in the cylinder casting itself. The guides are usually formed in the casting. Opposite Side Valves.

flour or one of the special grinding compounds. Place some rag or cotton waste between the valve chamber and The valves and their functions have been described in Chapter 1, but this times of opening and closing vary from those given, in actual practice, according to the speed of each parti-cular motor. Mechanically-operated inlet valves are given a "lcad" or ad-vance in the instant of opening, so that the suction in the cylinder will act on the carbureter immediately at the start of the suction stroke. This lead varies, but may be taken at 1-20 of the start of the piston stroke before the piston reaches the upper dead centre which marks the start of the suction stroke. This lead on a motor of \$1-2-inch stroke would amount to 0.18 inches, and the inlet would be opened at the instant the piston had traveled upwards 3.32 inches on the exhaust stroke. The exhaust valve also is generally given a lead of about 1-10 of the stroke this valve would start to open after the piston had covered 3.15 inches on the firing stroke. The indet valve will close at or slightly be-fore the piston reaches the dead centry the space of the valve is necessary and the suck of the suction the stroke length, hence on a motor of the stroke this valve would start to open after the piston had covered 3.15 inches on the firing stroke. The indet valve will close at or slightly be-fore the piston reaches the dead centry the end of the stem. There should be the closed valve, and this incremse must he taken up by adjusting the cap on the end of the stem. There should be

ally open.

The cams are driven by gearing from the motor shaft, and as they act only once every other revolution, the ratio of the cam-gear to the motor shaft gear is as 2 to 1. This means that if the gear on the motor shaft has 22 testh, the cam-gear will have 44 teeth, To make timing easier, the gears are mark d with punch-marks so that are mark d with punch-marks so that by setting together the marks on two gears, the valves can be properly timed. Similar marks are used for setting the ignition timing. To time a valve, the cam gear should be with-drawn from mesh with the she't gear and turned on its spindle until the works are together or until the valve marks are together or until the valve is about to be opened by the cam. The gear should then be meshed again and secured from moving axially if any such means are provided.—The Motor-

cycle Manual IMPORTANT C. M. A. MATTERS.

Harold Armstrong has enlisted for verseas service.

The "Battery" model is for sale, in-cluding on speedometer, which will register all speeds above 251-2 miles per hour, also five shares in the "Dillon" sheet metal factory. Apply owner. proposes to bring all the trade into close co-operation with the Canada

Some class to our friend with his

anv

port, and at times undertake, the holding of feature motorcycle events, such as endurance runs, relay rides championships race meets, conventions, picnics and rallies. The idea has appealed to everyone to whom the subject has been broached so far, and it is probable that President Johnston has made a "ten-strike" with his proposal.

The Canada Motorcyclists' Association has undertaken a census of mo-torcycle riders in various cities in Canada. Prospects are that a com-paratively large number of motorcycle race meets will be held this summer and the association has asked many prominent motorcycle officials and dealers to furnish a list of available racing men. The particulars are needed, because it is expected that races will be held in a number of outside centres and the C. M. A. would like to know what riders could arrange to participate in these events and others. Individual racing riders are asked to send their names, addresses details as to make and size of motorcycle used, and classification, amateur or professional. Public announcement of coming meets may not be made and the C. M. A. officials are now extending an invitation to all racers to give particulars so that they will not be overlooked in the future, The details may be sent to the C.M.A. headquarters, 106 Adelaide street

west, Toronto. Several officers of the C. M. A. have received letters recently which contain expressions of appreciation of the work now being accomplished by the organization. An apparently minor feature which is being praised is the fact that all letters to the as-sociation are being answered promptly. In the past one or two important officers have been very negligent in this respect and the work of the association, in some respects, has not been effective on this account. This

year's executive is able to say that every letter, enquiry or otherwise, re-ceives prompt attention and that full information is given to questions in all cases. A prominent motorcycle man, outside of Toronto, wrote this week to say that in the past his let-ters were frequently not answered, but ters were frequently not answered, but that now every letter is followed by a reply. The fact now is that some letters sent out by the association are not answered. This is particularly true of communications to motorcyc-lists in western Canada.

T. M. C. News. A regular meting of the T. M. C. was held in the clubrooms. Wednesday night. It was decided to have a special meeting of all 1916 members on Wed-nesday evening, May 3, when very im-portant business will come up for dis-cussion. A letter from Mr. Johnston, president of C. M. A. was read, and laid over until the special meeting. Two new members were added to the roll.

Significant Superiorities

All wiring in the new Case 40 is housed in waterproof, rustless, flexible conduits. The body and chassis wiring systems meet at a six-way connector plug. These two items illustrate the care used in planning the details of this car, and are strongly indicative of its numerous other superiorities.

Such items as these prove that Case has put into the new Case 40 those qualities which we deem essential in building a car which will be of continuous satisfaction to the purchaser.

year-old principle has given Case cars their splendid reputation-world-wide. Owners throughout the country, yes, even the world, unite in proclaiming it a thoroughbred.

As you go over this car, studying its details, checking over its superiorities. you will find here a substan-" tial sort of car which is bound to please you-good in line,

finished in detail, worthy in construction. This car, we believe, is decidedly your opportunity. Where can you "come anywhere near it" at \$1495.00, for comfort, power, endurance and beauty?

At your convenience we shall be delighted to point out in detail the significant superiorities in this new car. Or, if you wish, we will mail you an illus-

**MOUTH ORGAN SOLOS** FOR STRAP-HOLDERS

Popular Song Rendered on an Avenue Road Car Which Greatly Amused Crowd.

FRENCH MOTOR TRUCKS TRANSPORT THE SOLDIERS IN AND FROM THE LINES

When the period of duty in the trenches has come to an end. the French soldiers are marched a few hundred yards to the rear, where on sheltered road they find motor trucks waiting for them. The men form in groups of half sections at the rear of each truck and wait the order to get aboard. Sufficient space is left at the rear of the trucks for the men to form. On a signal given by whistle, thirty-five mud-stained troopers scramble into each truck, place themselves on the temporary transverse se ats, and a few seconds later, as the results of another call by whistle, the trucks move away to the rest zone miles back of the lines.

## DODGE BROTHERS' CAR Natural Gas Gasoline **Production Is Increased**

The Production of "Case-Head" Gasoline Dates From 1904 -Last Year the Output Nearly Doubled and Now, Owing to the Acute Shortage of the Natural Product the Manufacture of Gasoline by Artificial Means Is Rapidly

#### Increasing.

/ HILE gasoline obtained from M natural gas, or "casing head" gasoline as it is known in the gas fields, has been produced for some time, the present high price of gaso-line is giving much impetus to this in-dustry and the big natural gas companies are busy installing plants to obtain this product.

obtain this product. The extraction of the gasoline does not affect the heating or lighting quality of the natural gas: in fact it is a benefit in some ways, as without the gasoline being taken out there is always in the case of "wet" gas, more or less condensation of gasoline in the mains and as a result joints become leaky from the destruction of the leaky from the destruction of the rubber packing, and there also are other disadvantages in the piping of

"wet" gasoline. weeks, has the sanction and com-mendation of Governor McCall, of Massachusetts, and Brig.-Gen. C. H. Cole, head of the military department for the sanction and com-mendation of the military department the sanction of "casing head" gaso-line goes back to 1904 when 4000 gal-long were produced in a small plant at Titusville, Fa., and sold at 10 cents a colling. It was not until 1900 Titusville, Pa., and sold at 10 cents i gallon. It was not until 1909 that th industry became important. In 1911 The start of the car from Boston there were 176 plants in the United States for the extraction of gasoline was a civic event. The Dodge Broth-ers car, which was selected because from natural gas and their total daily capacity was but 37,100 gallons. At of its well known road ability, at-tracted a big crowd to the Beacon the end of 1914 there were 386 plants with a total daily production of 179.-"53 gallons. In 1914 the total annual street entrance to the state house in Boston and it was accompanied by the Call shook hands with the crew and wished them God-speed on their trip. is estimated that in 1915 there were more than 1,500,000 barrels of "casing head" gasoline produced. As in 1914 The car is fully equipped for a

the average price per gallon received for this gasoline was 7.28 cents, while

at the close of 1915 the natural gas

companies were receiving 161-2 cents

preparing to treat large quantities of gas for gasoline. United Fuel Gas Co., of West Virginia, has two plants in operation now and is erecting three additional plants, the new plants to

The construction of these extraction plants, which are not expensive to build or operate, is being rushed rapid-ly by a number of companies and their operation will mean important addi-tions to their revenues. The natural gas subsidiaries of Citles Service Co. i re installing extraction plants in the

DOING HIS BIT

ON A DUNDAS ST. CAR

#### Every Passenger Treated on the Square and All Are Kept

### Happy.

By NELLIE GRAY.

The conductor in charge of a certain Dundas street car must be Irish. None other than an Irishman is apt to be blessed with so sunny a smile and disposition to match. He scattered seeds of kindness with such a lavish hand from Gladstone avenue to McCaul street that he must have an inexhaus tible store, and distributed his transfers as genially as if he were Santa Claus handing cheques around to the family Christmas morning.

The car stopped at Dovercourt road and a little boy and girl, not more than four and five years of age, came blinking into the lighted crowded car from out of the mysterious night. It seemed but an instant until the conductor was stroiling cown the aisle with the little girl by the hand, chatting away as naturally and unconcernedly as if he were taking his favorite niece out for her Sunday morning walk, the lit-tie chap trudging confidently at his heels. He tucked her away snugly in a seat behind the stove, warning her companion to take care of her.

Again the car stopped and an old voman entered, looking timidly around for a seat. My Irish man didn't say "There's a seat up at the front, ma-dam," he took her by the arm and piloted her there. Two voluble rag and bone men boarded the car a little and bone men boarded the car a little farther on; there was seating capacity for them but the passengers were too much engrossed reading advertise-ments and looking out of windows to bother sitting close for just lkey and Mose.

All Look Alike. My friend, however, being no re specter of persons, administered to their wants and their hand to hand interview was resumed with comfort and gratification. The next intruder was a red nosed man who looked as if he hadn't been in the temperance parade; his difficulty was in chasing an elusive nickel.

"Must 'ave slid down in my sock boss," he said ruefully, after feeling in all his pockets. "I can get it easy "ho," beginning to tug at the long rub-

no, beginning to tug at the long rub-her boot which completely enveloped his trouser leg. "Never mind old man," the conduc-tor replied hurriedly, "I fix you up." The men in khaki are not the only men who are doing "their bit."
