THE EXHIBITION.

It is Superior to That of Last Year.

A Glance at the Exhibits in the Various Departments.

Members of the Government Highly Pleased—A Busy Week.

FIRST DAY.

Showers on September 22nd and 23rd that night seriously interfered with the opening day's attendance at the exhibition...

The attendance at the opening proceedings has been very large and the various departments have shown more paid admissions up to noon than on the opening day last year.

A general tour of the buildings and grounds justifies the prediction that in general appearance, as well as in variety of exhibits, the show will be considerably in advance of that made at preceding exhibitions.

The scene in the main building is a delightful one, rich in color and brilliant effects. On the floor of this building to the north of the passageway from the entrance to the yards are the displays of the McKay Milling Co. of Ottawa...

On the southern floor are exhibits of Surprise soap; souvenir exhibition medals; a monster showing of the New Brunswick cotton mills; Belpre soap...

The gallery of this building is well filled. On the east side is an electric light tinsmithy, J. & J. D. Howe's splendid collection of wool mantles and furniture; the Singer Sewing Machine Co.; Carriage and Harness Co.; Estey & Co., agents of the Enterprise Rubber Co., and W. J. Parks, knitting goods...

THE ANNEX.

Entering the annex from the main building, on the left, is the display of the Jas. Robertson Co., Ltd.; opposite this Emerson & Fisher's mantle exhibit is placed. W. H. Thorne & Co. have the first space on the north side with belts, saws and scales, followed by F. A. Jones, Colpitts Bros., W. J. Davidson, Lilly Sons & Aldous. The west end is occupied by Murphy's patent washer, Walter Wilson & Co. saw machinery, the Bradley Bros. ship blocks; J. B. Whitaker & Co. mantels; A. Ingraham, furs; J. R. Hamilton, snow plows; Fowler & Rutkin, edge tools; Eastern Oil Co.; Northrup & Co., canned goods, and Cloverdale apary are all on the south side. At the east end Turner's peanut show and Sussex mineral water have stands.

The central space is occupied by the exhibits of Philip Granman and C. B. Allan, stoves; the Toronto Radiator Manufacturing Co.; Hutchings & Co., mattresses and brass beds; A. J. Lord & Sons, furniture; Dearborn & Co., pipes; the A. B. McLean Co. oils and the Lunenburg Iron Co. The galleries present a fine appearance. At the east end Manchester, Robertson & Allison have a large showing of carpets and rugs; next is C. & E. Everett with furs. On the south side are D. F. Brown & Co. paper bags; T. S. Pettillo & Co., fancy goods; Wm. Peters, leather goods; Nancy needle work; J. A. Whelpley, skates; the G. & G. Flewelling Manufacturing Co., matches. Then follow the horticultural displays made by H. Pederson, P. E. Campbell and H. E. Gould; metal stamps by J. Hamblet Woods; Chas. S. Everett, patent sham holder; Mrs. W. R. Porter, flowers. At the east end C. Flood & Sons, pianos. The north gallery contains the exhibits of Columbia and Hartford bicycles made by W. H. Thorne & Co.; Doyle & Lambert, plumbers; the Forester camp; A. O. Skinner, carpet house;

Kumfort home remedies; Boys' Industrial home articles, Wilnot Spa waters, J. W. Stratton, celebrated washing paste; Sharp's balsam, ending with Thorne Bros. furs and hats, and the Imperial Oil Co. exhibit. The gallery leading to the main building on the upper floor is devoted to photo exhibits by J. S. Cilmo and the Camera club.

Machinery hall is one of the most attractive places in the whole show. Lordy & Son have a miniature toy factory at work; Myers, a number of dynamo and motors; Alex. Dunbar & Son, a patent claspboard machine; the Londonderry Iron Co., pipes; McFarlane, Thompson & Anderson, a portable engine; Small & Fisher, farm implements and shingle mill; the Portland rolling mills, tack and nail factory; Massey Harris Co., Frost & Woods and P. S. MacNutt large exhibits of agricultural machinery; Jas. Pender & Co., wire nails; the Robt. Engineering Co.; E. Leonard & Son, and the Burrill & Johnson company, large engines. At the east end Fowler & Rankine have an axe forge in position.

AGRICULTURAL HALL.

All the entries for space in the Agricultural hall have not yet appeared, and so there is still some space vacant there. The following is however a list of the present exhibits and exhibitors: Apples, pears and preserved small fruits—John Chesley, Clarence N. S.; A. A. Parker, Berwick, N. S.; L. B. Jordan, Simons; G. T. Crawford, Long Beach; Randall Bros., Lakeville; Eben Scribner, White's Cove; W. A. Colpitts, Edgmont; F. J. Purdy, Upper Vermorel.

The Oxford Wollen Mills have a splendid display of their products on the main floor. Hon. L. J. Tweedle and Hon. H. R. Emmons expressed themselves delighted with the extent and variety of the exhibits in every department. Henry O'Leary of Richibucto was present at the opening ceremonies.

names are running, one feeding lamps, 110 volts, the other running motors, 230 volts. They have also a 500 volt motor, a hoisting gear for an elevator, a Russell ship's pump and an improved steering gear.

The exhibitors are Messrs. Cooper, Armstrong, MacNutt, Nash, Kelly, Murphy, Price & Shaw, The Thousand Isle Carriage Co., represented by Massey, Harris Co., The McLoughlin Carriage Co., Healey & Co., Mason, and J. Edgcomb & Sons.

THE A. B. MACLEAN CO.

Oils and lubricants are not materials out of which the ordinary man can make an attractive exhibit, but the A. B. Maclean Co. of 44 Water street have solved the problem, and their display in the centre of the floor of the annex has a charm for more than mere admirers of these articles. It is a practical exhibit, showing the oil in barrels, with samples of the same in glass, lubricants of all kinds, and specimens of the Boston Belting Co.'s mill hose, with square flax and other packings, packing waste and belting. The oil includes electric machine oil in cans, lard oil, cylinder oil, mineral castor oil, spindle oil, etc. The high reputation attained by the standard articles handled by the A. B. Maclean Co., together with their honorable record in the past, has resulted in a large and growing trade. The company cordially invite millmen and others interested in such things to examine their display minutely.

NOTES.

The second day of the exhibition was, in point of attendance as well as in weather, a vast improvement on Monday, and the management are well pleased with the result. The grounds were pretty well early in the morning, but they were dried up quickly by the wind, and the judging of horses and cattle was begun after rain under pretty good conditions. The other day, however, the cold wind, which made overcasts a luxury. But it was not alone in the open that the wind was felt. It penetrated the buildings and made people generally uncomfortable, as the afternoon progressed, however, the temperature improved, and the thousand and odd paid admissions who were present had no cause for complaint. In the evening the strong breeze from the west, which had been blowing all day, subsided, and the buildings presented a brilliant scene of moving humanity. From a spectacular point of view the exhibits as a whole show up better under artificial light than in the day time, and those who want to see the exhibition buildings at their best should come after tea. To the great mass of visitors, however, there is no time like day time. Then they are free to roam through the cattle yards, to inspect their beauty, inspect the long array of carriages in the drill sheds, snack their lips over the luscious fruit in agricultural hall, and dive down into the depths of the machinery section. And by the way, the machinery hall is now one of the best working parts of the entire exhibition.

No citizen who wants to absorb all possible from the present show should be content with one visit. There is enough and more than can be properly taken in a whole day, morning, noon and night. The judging of flowers, cattle and horses was begun yesterday afternoon and will be continued this morning. The horses will be shown by far the greatest number of friends, and the ring in the parade ground was surrounded by an interested company. Some people watched the process of examining the cattle, but the flower judging was the most interesting almost alone. A diversion was created, while the horses were being judged, by the appearance of Prof. Sherman's caprine paradox (in plain English, herd of trained goats), who mounted the main building, struck the ring and gave a brief but interesting display of their intelligence. They will repeat this exhibition today at 10.30 a. m. and 2.30 p. m., and the request of a number of citizens was granted to have the goats in the ring with the musical, acrobatic and comedy combination, in amusement hall.

THE STOCK YARDS.

Entries for the stock yards are still coming in. The exhibit of horses is good. The following is a partial list: Clydesdale stallion Woodburn, 1162; John Richards, Blodford, P. E. I.; Clydesdale mare, Woodburn, 2101; John Richards, Blodford, P. E. I.; Jersey dairy stallion, Cosack, 1153; John Richards, P. E. I. Standard bred stallion, Judge Wilkes, 1879; John McCoy, Fredericton. Draught mare, H. C. Haskins, mare and foal and several other horses. A. L. Berryman; Morgan stallion, Puddington. Ponies are shown by N. C. Scott and a pony by R. C. Elykin.

The cattle exhibit is large and some very fine stock are shown, including Ayreshires and Jerseys by Wm. Donovan, Ayreshires and Jerseys by Mr. O'Leigh, Ayreshires by Jeremiah Donovan, Jerseys by Mr. Shaw, Ayreshires by Wm. Barfoot, Jerseys by Mr. Weatherall and Mr. Robinson, Ayreshires by John Drummond and Fred Black; Polled Angus by Mr. Pope, Durhams by W. C. Easton. The Ayreshire bull Matheles, a son of the famous Silver King, and claimed by his owners to be the superior of his class, is here. His mother never was beaten in competition. He is a fine looking white animal, owned by Mr. Robertson of Compton, Quebec. The three year old Ayreshire bull Scott, who has taken six first prizes, is also here.

There are a considerable number of good looking sheep, Shropshires, Leicesters, Cotswold and Merinos. Rabbits are shown by Fred Diggs and Stanley Wells; turkeys by Wm. Thurott, A. Hicks and D. V. Troop, hens by A. C. Paleweather, Walsh Bros., D. McLachlan, W. M. Thurott, J. Dixon, Wm. Thompson, John Chipman, H. Lord, F. Wiggins, W. Evans, J. J. Walsh, Wm. Sargent, J. Craigie, C. Thornton, Wm. Multin. The principal breeds shown are Black Minorcas, Blue Anadulians, Black Poland, Speckled Hamburgs, White Poland, Cochins, Leghorns, Bantams, Game, Ruff Red Caps, Plymouth Rock and Brahmas. Several breeds of pigs are here and more are expected. Berkshires, Suffolks and Yorkshires make up the bulk. John D. McQuaid's exhibit is attracting, as usual, a good deal of interest. He intends opening near the main building. Mr. McQuaid has eighteen dogs, three different breeds, 300 canaries, robins, cedar birds and finches, one pair of quail and a parrot. Mr. McQuaid is one of the features of P. E. Island in the show line.

CARRIAGE EXHIBIT.

The Drill Shed is pretty well filled with carriages and sleighs and more are coming in. There are 108 there now, comprising Meadow Brook Sport-

ing, Beach Kensington, Express, Bangor, Gladstone, Tourist, Phaeton, Physiolian's Buggy, Surrey, Cutdown, English Dog Cart, Road Wagon, Road Sulky, Gladstone Sleigh, Trotting Sleighs, Physician's Sleighs, Pumps, etc.

The exhibitors are Messrs. Cooper, Armstrong, MacNutt, Nash, Kelly, Murphy, Price & Shaw, The Thousand Isle Carriage Co., represented by Massey, Harris Co., The McLoughlin Carriage Co., Healey & Co., Mason, and J. Edgcomb & Sons.

Emerson & Fisher have a large space on the main floor that attracts the instant attention of every housekeeper. On it are tastefully displayed a goodly assortment of standard ranges, stoves, furnaces, etc. Prominent among the ranges is their own Royal Art, which is in use in hundreds of St. John households, and for which they hold certificates of merit from a host of their customers. They also show McClary's "Famous" ranges, a number of new gas water heaters, the products of the "Poverty" factory of Sackville, for which they are also agents.

W. Frank Hatheway has a booth on the northeast corner of the main floor. He has a large collection of lanterns, etc. in the "Poverty" factory of Sackville, for which they are also agents. A half sovereign is given away with every fourth pound that is sold. A painting machine, which is being imported, is on exhibition hard by the booth.

C. & E. Everett, at the head of the northeastern stairs in the annex, have a display of the fashionable furs for this season's wear, mink, Alaska, sable, Persian lamb, Krimmer lamb, muskrat, racoon, astrachan, etc., made up into scarves, capes, muffs, head-ties, caps and coats. Messrs. Everett have also a number of new gas water heaters, all the work to be seen in this booth is home made and reflects much credit upon the firm.

J. & J. D. Howe, in the eastern gallery, have an assortment of medium and heavy priced mantels, over mantels, etc. Two beautiful pieces of workmanship, a clock and a hair rack, occupy positions in this booth. The firm have also about 50 photographs of some of their best mantels and cabinets which have been placed in the houses of prominent families in the city. Pretty and serviceable photo brackets receive considerable attention from spectators.

Hutchings & Co. in the annex, have a large display of bedsteads, mattresses, pillows, etc. They have hair, hair-spring, wool, moss, flock and rubber mattresses; Dodges patent chair, adjustable iron and invalid chairs. J. A. Humphrey of the Moncton Wollen Mills has his exhibit on the floor of the main building. It consists of cloths of their own manufacture, which are claimed to be for quality and value the equal of any imported or domestic. Mr. Humphrey's sign is of a dark red and fawn with a black cloth background. It has a novel and pleasing effect. C. Flood & Son, in the western end of the annex, are showing a very handsome line of pianos, pictures, table stands, etc. They have hair, hair-spring, wool, moss, flock and rubber mattresses; Dodges patent chair, adjustable iron and invalid chairs. J. A. Humphrey of the Moncton Wollen Mills has his exhibit on the floor of the main building. It consists of cloths of their own manufacture, which are claimed to be for quality and value the equal of any imported or domestic. Mr. Humphrey's sign is of a dark red and fawn with a black cloth background. It has a novel and pleasing effect.

W. H. Thorne & Co. (Ltd.) have two fine exhibits, one in the gallery and the other on the floor of the annex. In the last named space they have powder, both blasting and sporting, from the Hazard Powder Co., scales on which the public are weighed free of charge from the Howe Scale Co.; nails from the Gordon Wire Nail Co.; saws of all kinds, tastefully arranged on the walls, from the Lawton Saw Co.; wire fencing from the St. John Wire Fence Co.; belting, hose, steam packing and the famous Monarch red strip belting, from the Gutta Percha and Rubber Manufacturing Co.—all of which firms are represented by Messrs. Thorne & Co. In the gallery they have the only exhibit of bicycles here this year. It consists of nine wheels, Hartford and Columbus, "standard of the world," made by the famous Pope Manufacturing Co. of Hartford.

Manchester, Robertson & Allison have, as usual, a handsome exhibit in the gallery of the annex. It is a matter of surprise to many that so fine a display could be made by carpets alone. The stock shown is all of Canadian manufacture, consisting of Axminster, wool, rug and matting made by the Toronto Carpet Co. Quality, value and pattern make this exhibit of interest to many.

Lilly Lake, Rothersey, etc. J. Fraser Gregory shows views of several Quebec buildings and street scenes.

On the western side of the gallery, A. E. Clarke exhibits some remarkable instantaneous work, pictures of athletes at pole vaulting, wrestling, etc. The picture of four bicyclists racing is one of the very best things in the entire collection. Gilbert Davidson has views of Howe's Lake, a lumber camp, etc. J. W. Rodgers contributes nine camp scenes and interiors. Fred Dolg, the only member who exhibits his own face, shows pictures of the St. John custom house, the ferry boat, etc. J. E. Dinmore has two frames of good landscapes, one of which is good. S. G. Beeson shows a picture of four bicyclists racing in the entire collection. Gilbert Davidson has views of Howe's Lake, a lumber camp, etc. J. W. Rodgers contributes nine camp scenes and interiors. Fred Dolg, the only member who exhibits his own face, shows pictures of the St. John custom house, the ferry boat, etc. J. E. Dinmore has two frames of good landscapes, one of which is good. S. G. Beeson shows a picture of four bicyclists racing in the entire collection.

Miss Winifred Johnson of Fredericton has six views, which are marked "For Sale." They attract much attention.

DAIRY AND SILO.

Messrs. Tilley and Mitchell, who have charge of the provincial dairy give a practical exhibition of churning every morning in the northeastern corner of Agricultural hall. Yesterday's churning, for example, was in glass jars in granules, just as it came from the churn. The butter of the previous day was exhibited in pound rolls. This enables the spectator to see what the butter looks like in its various stages. Both gentlemen will be happy to answer any questions and to supply all possible information to enquirers. So far the attendance has not been large, but they expect to have lots of heavers when the country folk begin to crowd into the exhibition.

Close by their dairy stand, they have an object lesson in silos that should attract much attention. On the wall are shown the constituent parts of the Robertson mixture, now admitted to be the most perfect known. At the base of this display, the model of a silo, containing some of the mixture, to show into what size it should be cut. The model of the silo is of wood, and is so arranged as to show how it will be filled. According to Mr. Robertson, the material required in a silo are strength to resist the outward pressure of its sides, and a fair depth of holding capacity, in order to permit the ensilage to settle into a compact mass. Sufficient strength of sides can be obtained by most silos by the use of 2x10 inch or 2x12 inch studs, placed from 18 inches to 2 feet apart. A clay or earthen floor is most economical and as good as any other. The inside of the walls of the silo may be lined with a single lining of lumber nailed to the studs horizontally. The lumber should be tongued and grooved and dressed on the inside. If each corner is rounded, the silo will be a joint-lock, it will give additional strength to the structure. The corners of the silo on the inside should be filled by the use of board or plank 10 inches wide, set on end. The triangular space behind it should be filled with sand or sawdust. A silo constructed in this manner is strong enough for all ordinary purposes. If a portion of the ensilage around the sides becomes frozen that is may be inconvenient, than a loss. It should be mixed with the warm ensilage from the middle of the silo before it is offered to the cattle.

ECLIPSE SOAP.

A meritorious exhibit is made by a beautiful lady. It is most attractively tastefully arranged. And that it is why the display of Eclipse Soap at the right-hand corner of the lobby of the main entrance is one of the features of the exhibition. W. J. Forrestall is in charge of the exhibit. The corner lot on which it is situated is enclosed by a rail fence done in white and gold, the floor is tastefully carpeted and the dull rear wall is concealed by colors that by contrast serve to heighten the effect of the display of Eclipse. Boxes of Eclipse form the base of the structure, while the sloping sides that support a canopy above are composed of oaks of the soap in their catchy wrappers, so that he who runs may read in this canopy reads a heavier message than is beyond doubt the best example of carving in the building. It took a skilled carver to cut this animal out of a solid block of soap, at a cost to John Taylor & Co. of Toronto of over \$100. The soap is in weight fully 600 lbs. The whole structure is surrounded by two light-colored banners. To the artistic taste of Mrs. Forrestall, who draped the display, is due much of its merit. "Eclipse" is not most of the attractions of the display.

"Eclipse" is not new thing. John Taylor & Co. of Toronto, its manufacturers, have the largest soap factory in Canada. As a general purpose soap it fears no rival. Housekeepers who send Taylor & Co. 25 wrappers will receive a silver-plated moon mirror, a handsome plate photo holder, or knife and fork, or one of the firm's celebrated pictures. But if preferred, they will forward any one of the Parkhurst series of popular novels, 25 in number. Twenty thousand samples of Eclipse soap will be given away to ladies during the exhibition.

THE JUDGES.

Following is a list of the judges in the several departments: Fruits—D. H. Knowlton, Farmington, Me.; Horses—J. H. Reed, V. S., Guelph, Ont.; Cattle—Prof. G. W. Day, Guelph, Ont.; Swine and sheep—John J. Hobson, Mossborough, Ont.; Poultry—W. B. Atherton, Boston, Mass.; Dairy products—H. A. Hodgson, Montreal, and D. M. McPherson, M. P. P., Lancaster, Ont.; Flowers—Jas. Goldie, Guelph, Ont., and C. J. Knott, St. John, N. B.; Agricultural products—Z. A. Gilbert, North Green, Me.; Milkling test—Harry Mitchell, Fredericton. Ladies' department—Mrs. J. R. Murray.

ray, Miss E. Peters, Mrs. Boyle Travers, Mrs. Ira Cornwall and Mrs. J. N. Thornton.

LAST NIGHT'S FIREWORKS.

Hand & Co. of Hamilton gave the finest display of fireworks last night probably ever seen on the grounds. They promised half an hour's programme, but extended the time considerably and were not at all negligent with regard to the quantity. The proceedings opened with a discharge of bombs, followed by a flight of balloons, the first of which was in the shape of a pig. The aerial display throughout was fine, and was particularly remarkable for the novelty of its designs and the brilliancy of its colors. The set pieces were all good and several of them far above the average. They comprised the following: A magic chain star, novel and very pretty; Brilliant Victoria Star; Terrace of Fire; Monster Revolving Wheels; A Battery Device; "Pearls of Light" in glorious colors; Performing Acrobat, a comic device; a special piece designed for the St. John exhibition, representing a bull's head, surrounded by a wreath of native flowers, fruits and grains, with the motto, "Welcome to Our Exhibition"; grand finale; fireworks jewelry, played through a ground in all sorts of fantastic shapes.

Thos. W. Hain directed the display. Another exhibition will be given to-night. During the display the 62nd band appeared on the square and played a number of selections.

PRIZE CARRIAGE HORSES.

The judges awarded the following prizes yesterday and will complete their award today: 1. Stallion, 4 years old and upwards, not more than 1,250 lbs. or under 1,000 lbs., not less than 15.2 high. P. H. Nugent, St. Martins, stallion, Charles N., 1st; Robert Melvin, St. John, stallion; Memorial Wilkes, 2nd; W. A. Henderson, Sussex, Blon, 3rd. Stallion, 3 years old—P. H. Nugent, St. Martins, 2nd; no 1st awarded. Pilly, 3 years—Jas. McCavour, St. John, 2nd; John Chipman, St. John, 3rd. No 1st awarded. Pilly, 2 years—W. A. McFate, Golden Grove, 1st; Thos. Clarke, St. John, 2nd; J. Berryman, blood filly, 3rd. Yearling filly—A. S. Berryman, Oliver Wilkes, 1st.

AGRICULTURAL HALL.

The following entries have arrived at Agricultural Hall since yesterday: Pease—David Curry, Donald Innes, Tobique. Buckwheat—D. McBrien, J. H. McAlpine. Potatoes—James Braydon, William Law. The Stockbridge Fertilizer Co. have a booth fixed up with samples of their well-known fertilizers.

The poultry show has been increased by pigeons shown by John Oldham, consisting of the following breeds: Turbit, Jacobin, Belgian Nun, Frouze Tumbler, White Nun, Fantail, Black and White Russian Trumpeter. Ducks, Fakin and Muscovy, are shown by S. Creighton, John Oldham and J. M. Denovan, and geese are shown by Messrs. Thurott, Creighton and Multin.

NOTES.

Long testers, weighing machines and photographs abound in the building. A negro booth near the main entrance offers either a black or tan shirt, according to the taste of customers. The art gallery will be a great feature of this year's exhibition. What would an exhibition be without a horse with an enormously long mane? The police protection service in the buildings is better now than ever before. The shrill yoke of the small boy who yells "yarn" is heard above all other sounds today. Turner's system of care on the grounds is a clean and tidy place and deserves a liberal patronage. Pretty waitresses are one of the great attractions of the dining room. The man who opens a stand at the exhibition for the sale of umbrellas should, as a rule, be able to lay by much money for a rainy day. What a pity it is that the electric cars do not run down to the exhibition gates. Fred Dorman is at his old post in charge of the exhibitors' entrance. A Queens Co. farmer who had carefully prepared the exhibits in agricultural hall, left the Sun this morning, but that guess this year are away behind those of last season, but that the potatoes were of a much better quality.

The Jas. Robertson Co. (Ltd.) make a fine display of their goods, saws, paint, lead wire, barb wire, etc. This company's Toronto show won the gold medal for the best exhibit at the late Toronto show. The dining room, under D. A. Fugler's management, fills a long and want and is receiving the unqualified approval of every patron. Ladies can get a good meal or lunch here now at a reasonable price. Of one thing the public may rest assured, the exhibition of cattle and horses is far in advance of that of last year, in quality as well as in numbers. The New Brunswick, Nova Scotia, and Prince Edward Island exhibits being supplemented by large and valuable additions from the upper provinces. The management has done everything in its power to retrieve the mistake of last year and to make this section of the exhibition one of its most prominent departments. No farmer or cattle feeder within easy reach of St. John can afford to miss this great cattle and horse show.

For the purpose of comparison the following statement of the attendance at last year's exhibition will be useful:

Table with 2 columns: Day and Attendance. 1st day 1326, 2nd day 2328, 3rd day 5200, 4th day 5284, 5th day 4589, 6th day 13488, 7th day 13489, 8th day 8790, 9th day 4288, 10th day 1792. Total 52,813.

Carrots, white (3 entries)—S. C. Creighton, Silver Falls, 1st; W. A. Shaw, St. John, 2nd; Samuel Armstrong, Silver Falls, 3rd.

The flavor in some instances showed distinct defect and want of care and practice in airing the milk previous to sending to the factory.

We therefore strongly recommend the advisability of all patrons of cheese factories and creameries to air their milk immediately after being milked.

This can be done by repeated dipping up and down with a dipper or by a good ailerator attached to the milk can or otherwise.

We would also strongly draw the attention of makers of cheese and butter factories to the great necessity of having a good supply of pure sweet water, and its plentiful use in keeping all utensils perfectly clean and sweet—also good drainage from the factories, so as to prevent bad odors from being incorporated into the milk when being taken into the factory and while in process of manufacture.

Pure sweet flavor in butter and cheese is a great requisite for obtaining high reputation and thereby increased price. Therefore we desire to emphasize the necessity of taking precaution to prevent such at the right time and in the right way to preserve the great requisite of good demand and large consumption.

WM. PARKS & SON. The exhibit of this firm is one of the most complete in the buildings, and reflects credit on the efforts of F. Fales, who designed and arranged it. A prominent feature of the display is their celebrated Planettes, which were so mounted that they can be readily handled by an interested, and the firm invite all such to call and examine for themselves.

The display consists of grey cottons, sheetings, shirtings, flannels, wearing yarns, wools, ball knitting cotton, fancy colored twin beam warps, blankets, all arranged with a good eye effect. There are also displayed a model of the firm's engine, the handwork of John Patterson, the engineer, and a case containing rolls prepared by H. O. Smart, both of which are attracting much attention.

TO FRUIT GROWERS. Prof. W. H. Knowlton, the judge of the fruit, being interviewed today, said that the exhibition of fruit was very creditable indeed, having looked up a collection, the professor had never seen better Alexanders than those exhibited here this year.

The whole display shows the possibilities the farmers in fruit growing have in this line of work. Apples can be grown as good as those of Maine, and in our exports to England we can easily compete with Ontario, on account of our position. Mr. Knowlton said that there were two things he would like to say to exhibitors. The first is that they should see that their exhibits are correctly named. For example, there is a variety of apples, properly called Parkers, exhibited here as Bellefleurs.

The farmer in that selection of fruit more careful in their selection of fruit for a show, or in fact whenever they come before the public. The fruit should be blooming, unspotted and not scratched.

Asked what was the best remedy for plum rot, he said that scientific spraying with Bordeaux mixture, with perhaps a little Paris Green added for worms, proved beneficial. The mixture is very simple. Take 4 lbs. unslacked lime and 5 lbs. blue vitriol, dissolve separately and add water.

In many of the best orchards hogs and sheep are put, given plenty of water and a little grain. Sometimes pumpkins are grown to break up the ground.

The professor expressed himself as pleased with the buildings and the entire exhibit.

Z. A. Gilbert, editor of the Maine Farmer and judge of the agricultural products, being interviewed, said that he was much pleased with the exhibition, and said that he had the best buildings he had ever seen in the east and even in Toronto. The exhibitors needed to take a little more care, not in the growing, but in the selection of products for fairs.

NOTES. Hon. A. S. White says the cattle are fully up to the average of recent years.

Geo. Fowler, M. P. P., was delighted with the horses, which he considers a superior lot.

Geo. A. Treadwell of Sheffield, Sunbury Co., is here. He is much taken with the general effect of the display in the main buildings.

Geo. A. Perley of Maugerville brought down by steamer yesterday a high head of cattle for the exhibition, also pigs and turkeys.

Saturday is children's day, when the little folk can see the whole show for a dime.

John B. Moses has a small cupidity shop and managerie outside of the main building. He has on exhibition many of the wonders of sea and land, including sea lion and cub, marine birds, ostrich and emu eggs, a 42 inch lobster, crabs and star fish. Mr. Moses' exhibit is well worth the trouble of visiting.

"What I want," said the theatrical manager, "is a genuine novelty." "Something real!" asked the playwright. "Yes, but I don't want any real puppets or any real disasters, or any real live stock, or any real battles in it."

The playwright looked wearily thoughtful, and after a pause inquired: "What I want," said the theatrical manager, "is a genuine novelty."

"Something real!" asked the playwright. "Yes, but I don't want any real puppets or any real disasters, or any real live stock, or any real battles in it."

CASTORIA

for Infants and Children.

THIRTY years' observation of Castoria with the patronage of millions of persons, permit us to speak of it without hesitating. It is unquestionably the best remedy for Infants and Children the world has ever known.

It is not only a powerful purgative, but it is also a powerful tonic, giving health, it will cure Colic, Hives, Jaundice, Worms, something which is absolutely safe and perfectly suited as a child's medicine.

Castoria destroys Worms. Castoria allays Feverishness. Castoria prevents vomiting, Spasms, Castoria cures Diarrhoea and Wind Colic. Castoria relieves Teething Troubles. Castoria cures Constipation and Flatulency.

Castoria neutralizes the effects of cholera, and is the best remedy for cholera. Castoria does not irritate the bowels, and is perfectly safe for infants and children. Castoria assimilates the food, and is the best remedy for indigestion, giving healthy and natural sleep.

Castoria is put up in one-ounce bottles only. It is not sold in bulk. Don't allow any one to sell you anything else in the place or quantity that it is "just as good" and "will save your money."

See that you get C-A-S-T-O-R-I-A. The fac-simile signature of J. C. Watson, M.D., is on every wrapper.

Children Cry for Pitcher's Castoria.

PROVINCIAL.

ALBERT CO. Hopewell Hill, Sept. 16.—Atwell Steeves of Hillsboro was fined \$50 and costs before Justices Pipes and Peck at Albert on Monday for violation of the act.

James Carnworth of Riverside left for Montreal this week to enter upon the study of medicine at McGill university. Misses Mary and Ina Robinson, who have been spending the summer with relatives here, left this morning for their home in Lynn, Mass.

Russell Bros. have purchased a new threshing machine and tread. Ship Marlborough has arrived at the Cape to load deals, having towed up on Monday. Barkentine Enterprises is ready for sea. Mrs. Calhoun, wife of the captain, who has been visiting her mother here, left this morning for Hillsboro to join the vessel.

The harvest season has been a very favorable one, and about all the grain except buckwheat is in. A greater amount of grain will be threshed this fall than for many years.

Captain James Brewster is home for a short rest on account of ill health. Captain Luther Martin commands the schooner Waterside for the trip. She sailed on Monday for Sydney to load coal for Moncton.

Word has just been received of the death of James Duffy, a prominent farmer and lumberman of New Ireland. He sailed on Monday for Sydney to load coal for Moncton.

James Duffy, an old and respected resident of New Ireland, died at his residence at that place this week, the funeral taking place today. Rev. Fr. Carson officiating. The deceased was a prominent and prosperous lumberman.

An interesting matrimonial event, in which a gentleman of Acadia extraction, of some 75 winters, and a widow of similar age will figure in on the bills for the near future at Chemical Falls.

Albert, Sept. 18.—The adjourned hearing of the Scott act case against Sarah Steeves came up before Justices Pipes and Peck at Albert on Wednesday, 9th inst., and resulted in her conviction. The fine and costs were paid on Thursday, 10th.

The adjourned hearing in the cause of her husband, Atwell Steeves, for keeping for sale was up before the same justices on Monday, 14th. A conviction was made, and a fine of fifty dollars and costs of seven dollars and sixty cents imposed.

The cause against Stephen Garland of Elgin was called on the same day, but Inspector Steedman found that the witness who volunteered the information a few days before had suffered suddenly from loss of memory surrounding this case, and before the witness had been on the stand five minutes the inspector moved for the dismissal of the information, which was promptly done.

The cause against Michael Power, jr., of New Ireland was also set down for the same day, but as the witness in the other case was to be the witness in the Power case, also, Inspector Steedman asked the court to dismiss the information on the ground that he had no confidence in the evidence at hand. Important developments are promised in connection with this matter. The inspector is firm in his determination to punish those who seek to

being continued.

OUR BOSTON LETTER.

Review of the Political Situation Over the Border.

Horrible Tale Told by the Crew of the Pictou Ship Warrior.

Cape Breton Coal Trade—Items About Provincialists—The Lumber and Fish Markets.

Boston, Sept. 19.—There is a seemingly well founded rumor in railroad circles here that the Canadian Pacific railroad has secured control of the Seaboard and Moosehead railroad in Maine. This road is a new one and is not yet quite complete. The project is being pushed with a view of completing it as soon as possible. It is understood the C. P. R. will use Wisconsin harbor for shipping purposes.

Two members of the Portland city government, who were here a few days ago, say that the prospects are very bright for that city. The big Grand Trunk elevator has been started, and its terminal facilities will be greatly improved. The opinion in Portland is that the Canadian government will take no action just now which would effect the Canadian winter trade there. The only thing the people in the Forest City are afraid of is the proposed big Canadian fast line to Great Britain.

The Dominion Coal Company officials say that business at the Cape Breton mines is steadily improving. Last week the output was 10,000 tons greater than in the corresponding week last year. Considerable of the output is being disposed of in New England, although of course the bulk of the trade is confined to Canada.

The telegraph wires and the columns of the newspapers are overburdened just now with immense quantities of political matter. The campaign is proving to be the most hotly contested of any since the war campaigns of the sixties. Next week Bryan talks in Boston, and a visit is expected from Palmer, the gold standard democratic candidate for president. The presence of a second democratic ticket in the field might be expected to injure the chances of the regular ticket, but the politicians do not seem to think the Palmer ticket will "cut much ice," as they express it. The campaign report of the president and the administration, but while it will draw democratic votes from Bryan it will also draw "gold" votes from McKinley.

The situation as far as both parties are concerned is not changed much during the past few weeks. Vermont and Maine rolled up an immense republican plurality in the recent elections for state officers and congressmen, while Arkansas increased the democratic plurality. The campaign in New England state by overwhelming majorities, New York, New Jersey, Ohio, Delaware, Pennsylvania and several scattering states like Maryland. Bryan is consequently expected to carry the east and southwest, with his prospects good for sweeping the far western states. The doubtful states upon which the contest hinges, are Indiana, Illinois, Iowa, and one or two small states. The contest in the latter Illinois are said to be good, owing to the personal popularity of Gov. Altgeld, who is charged by his enemies with being an anarchist because of his opposition to the corporations and his patronage of the anarchists in directly concerned in the Haymarket riot in Chicago. Indiana will probably go to McKinley, leaving the fight a very close and uncertain one. Of course the situation is liable to change any time, but at present notwithstanding the claims of the gold standard press of Boston and the east, it is anybody's fight.

Mrs. Annie McNeill, formerly of New Glasgow, N. S., has petitioned the Suffolk county superior court for a divorce from her husband, John McNeill, now living in New Glasgow. The grounds on which the petition is presented are neglect to provide maintenance, and intoxication. The case will be heard the first Monday in October.

The death of Mrs. Eliza M. Crampsey, formerly of Yarmouth, N. S., at Ipswich some time ago was due to alcoholism, and not to foul play, as was first suspected by the authorities. A girl who was arrested some time ago here for stealing has admitted that her name is Jennie McPhee and that she hails from Pugwash, N. S. A large amount of stolen property was found in her room.

A. D. Peck and A. K. Peck, the wheelmen, well known in the provinces, have left for a tour of Europe on their bicycles.

Sir Andrew Fairbairn, a millionaire owner of London, was in the city this week. He says if Bryan is elected Englishmen will unload their American securities.

W. J. Martin of St. John was in the city this week. S. A. Crowell of Yarmouth is here.

All Americans are not tall twisters, as St. John people must have learned from the delegates to the woman's convention this week. There are any amount of people, many the leading business men of the country who believe the most friendly terms should exist between the United States and Great Britain.

The story told by the crew of the Pictou, N. S., ship Warrior, which arrived here from Rio de Janeiro yesterday, is true, the most revolting tale of cruelty on the high seas known here for years. The British consul has begun a thorough investigation. The captain of the ship is A. J. Kitchen. He, together with Second Mate Howard and Steward James McDonald, are charged with beating the sailors in a terrible manner, and with frequently setting a ferocious Russian wolf dog on them. They exhibited scars to show where the dog had lacerated them at the command's office. To add to the tale of horror, the seamen say that a man sick with the fever was thrown overboard before he was extinct.

Ellen H. Wilson, formerly of Moncton, died in Somerville Wednesday. She was 59 years old.

The spruce trade has improved slowly during the past week, with the demand better. Values have not shown much change, and as a rule the market is still dull. Most of the mills report that prices are unsatisfactory, many owners announcing that they will shut down rather than accept lower prices. There is a prospect of an increase in prices within a week or two for some lines, and the sooner it comes the better all dealers and shippers will take it. Receipts of provincial cargo lumber are comparatively small. Quotations are as follows: Spruce, Cargo Lumber, 2x3 in and up, \$11.50 to 12; random frames, \$11; boards, planed one side, \$12; kiln dried floorings, clear, \$25 to 27; No 1, \$21.50; No 2, \$17; air dried, \$15 to 16; laths, \$1.00 to 1.70; shingles, \$1.35 to 1.45; frames, by car, ten inches and up, \$13; yard orders, cut to lengths, \$13 to 13.50; 12 in frames, \$14; 14 in frames, \$16; matched boards, 6, 7 and 8 in, clipped, \$13 to 13.50; 8 in and up, stock width, \$14; laths, 1-5-8 in, \$2 to 2.10; 1-1-2 in, \$1.85 to 1.95; shingles, \$1.80; 4 ft extra clearboards, \$30; clear, \$28; second clear, \$24 to 25.

Hemlock, etc.—Eastern planed and butted hemlock boards, \$11; random do, \$10 to 10.50; rough cargo boards, \$9 to \$10; planed, \$10 to 10.50; extra cedar shingles, \$2.75; clear, \$2.25 to 2.35; second clear, \$1.75 to 1.85; extra No 1, \$1.50.

Pine—Coarse No 2 eastern pine, \$16 to 17; refuse, \$13; extra, \$2 to 2.50; edge pine, box wood, etc, \$3.50 to 4; matched boards, \$15 to 20; extra sap clearboards, \$40 to 45; clear, \$35 to 40; second clear, \$28 to 30.

There is not much change in the fish market this week. Mackerel are firmer, pickled herring scarce, codfish dull and sardines slightly improved. Mackerel is stronger owing to the gales which have prevailed for the last ten days, preventing the vessels from fishing except part of the time. Better prices are looked for. Old herring are out of the market and the new stock is not arriving freely. Smoked herring are dull, but quite a lot of fish are arriving from down east just now. Dealers say sardines will advance, as prices were so low that the canners were grumbling and threatening to keep the factories at Eastport and Lubec shut down. Lobsters continue scarce and firm. Oysters are in good demand at fair prices. Wholesale prices are: Fresh Fish—Large cod, \$4 to 4.25 per 100 lbs; market cod, \$3 to 3.25; steak, \$5; haddock, \$3 to 3.25; hake, \$2; small, \$2.25; pollock, \$1.50 to 1.75; steak, \$2 to 2.25; white halibut, 10c per lb; gray, \$3; chicken, 10 to 12c; frozen salmon, 10 to 12c; fresh Oregon, 10c; bluefish, 9c; fresh mackerel, 50c for large; small, 7c; live lobsters, 11c; boiled do, 13c.

Shell Fish—Mackerel, extra No 1, \$15.50 per 100 lbs; No 2, \$14.50; No 3, \$13.50; No 4, \$12.50; No 5, \$11.50; large George's cod, new, \$5.75 per 100 lbs; medium, \$3.75; large old dry bank, \$3.75; medium, \$2.75; large pickled, \$3.50; medium, \$2.50; hake, haddock, etc, \$1.50; N S split herring, \$4.50 to 5; Scatter, \$6 to 6.50; round shore, \$2.50 to 3; Newfoundland salmon, No 1, \$16.50; do No 2, \$14.50.

Canned fish—Lobsters, tails, \$2.15 to 2.25; flats, \$2.30 to 2.50; American sardines, quarter oil, \$2.25 to 2.30; three-quarter mustards, \$1.80 to 1.90; mackerel, one lb oval, \$1.40; 3 lb do, \$2.25; 1 lb do, \$2.75; Alaska salmon, \$1.25 to 1.35; Columbia river steak, \$1.35.

THE CZAR AND CZARINA.

A Hearty Welcome at Aberdeen and a Royal Greeting at Balmoral.

Aberdeen, Sept. 22.—The acting lord lieutenant, the sheriffs and other civil officials, the commanding officers of the district and the municipal officers of the city proper, gathered at the Ferry Hill station long before the time set for the arrival here of the Queen's special train with the Czar and Czarina on board and an hour before the train arrived the police cleared all the streets in the vicinity of the station, only privileged persons being allowed close to the place where the train was to stop. The station and everything about it, including the suspension bridge over the river Dee, was gorgeous with decorations in which the Russian and British flags predominated. The special arrived at 5.45 amid cheering from all sides.

The most distinguished of the officials swarming the imperial travellers shook hands with the party and the provost presented him with an address, for which the Czar returned thanks. The imperial train left here at 5.50 over the Dee line. From here to Balmoral the entire length of the road is guarded by uniformed police. Scotland yard detectives and agents of the Russian secret police, etc.

Balmoral, Sept. 22.—The Queen's special train bearing the Czar and Czarina and the servants of the English royal family, who accompanied them, arrived here at 7.05 o'clock this evening. After the formal reception by the municipal authorities, the Czar and Czarina entered an open state carriage, and, escorted by the Scots Greys, drove to Balmoral.

As the imperial personages started on their drive the first bonfire was lighted on the Mountain peak. Arriving at the entrance of the castle grounds of Balmoral, the servants of the castle and the Balmoral and Craigmiles volunteers led the procession of carriages with flaming torches. Three other bonfires on the adjoining peaks illuminated the mountain side with a glare of light.

Balmoral castle was reached thus without any incident. The Queen and Princess Beatrice received their imperial guests at the door of the castle, and the warmest greetings were exchanged. The bag-pipes meantime sounded and the servants in the forenoon carried by the servants being thrust high in the air, accompanied with loud cheering by all the attendants. Before the Russian party disappeared within doors the torch bearers marched past them in single file.

RULED CENTURIES AGO. Shell Mound Explorers Unearth the Remains of an Indian Chief—Has a Noble and Kingly Braid.

The King of the Shell Mound Indians has been found, says an Oakland, Cal., despatch. This was the first men at the race track made new excavations in the very centre of the old mound from which they have been exhuming so many prehistoric skeletons during the past week, and they found a well formed and well preserved specimen incased in a rich mantle of red pigment, which had been preserved the remains from disintegration than in the case of the other aborigines.

A great curiosity to the explorers was the "King of the Shell Mound," on account of his many peculiar characteristics. He lies on a slab of shell formation in the centre of a large double-width trench, dug in the covering of earth. His knees doubled up to his chin, and his face toward the Golden Gate. All the specimens thus far found have faced the setting sun.

The King is the best specimen of the prehistoric race yet found in the state of shore yet found, and the fact that he was laid carefully away in his carmine garments shows that he must have held the highest rank in the tribe, for no other skeleton thus far has been found in robes of fiery pigments. Besides this, the skeleton is of a superior frame. His bones are longer and stouter, and his skull has a much higher forehead than the other aborigines. He died in his prime, for he still possesses a full set of finely formed teeth, and his physique and physical characteristics made him the leader of his people. This is what those in charge of the investigation say, though they admit that the whole tribe must have been a long time dead, may be 4000 years. This latest specimen will be carefully removed and placed on exhibition at the race-track pavilion in a few days.

Supt. M. A. Allen of the race track, under whose direction the excavations have been made, says he is sure they have found one of the chiefs of the old Shell Mound tribe.

"Only the heads of tribes are buried in this manner, I am told," said the superintendent today. "We shall take him out very carefully, as he will prove a great curiosity to the people. He died in every part. The red paint that they buried this skeleton in was very thick all around the outside. He must have been a very intelligent fellow from the size of his head. Prof. Merriam of the State University tells me that the mound must be over a thousand years old. We have become very much interested in the excavations, and will push them through the whole mound. Several implements were also found alongside the body of this latest discovery. We shall keep them all together with the skeleton."

NO YANKES NEED APPLY. Toronto, Ont., Sept. 22.—"No Yankees need apply," was the decision of the Toronto city council when the question of asking for tenders for the plumbing and steam heating of the new two million dollar court house came up for discussion at a meeting of the council; by an almost unanimous vote it was resolved that American tradesmen should be debarred from sending in tenders.

Recently a unique military parade took place at Aldershot, Eng., in response to the invitation of the Duke of Connaught, which was held in his command who had bicycled to assembly. The duke himself, two generals, and several other officials were present, mounted on bicycles, and some 800 of the command, attended with their wheels. The spectators included the Duchess of Connaught and Albany and their daughters, all riding wheels.

THE QUEEN'S "HEN-COOP."

Beautiful Specimens Stock the Finely Appointed Royal Aviary.

There are plenty of proofs that the tastes of Queen Victoria are decidedly domestic, but none seems more convincing than that she is an enthusiastic chicken raiser. The royal aviary, or as a Glasgow housewife would call it, the Queen's Hen-coop, as described in the London Feathered World, by Artist Ernest M. Jessop, is a very elaborate affair.

The Queen has her head "chicken man," who is aided by a large corps of experienced assistants. For forty years the royal poultry pens were under female supervision. Mrs. D'Almeida, now in charge of the Queen's room at the kennels, being supervised by a man named Hammond has succeeded here. He knows all about chickens, their value and their artful ways. Many breeds are kept in the royal aviary.

Recently a unique military parade took place at Aldershot, Eng., in response to the invitation of the Duke of Connaught, which was held in his command who had bicycled to assembly. The duke himself, two generals, and several other officials were present, mounted on bicycles, and some 800 of the command, attended with their wheels. The spectators included the Duchess of Connaught and Albany and their daughters, all riding wheels.

PRIVATE BUTTERMAKING.

Advantages and Disadvantages as Compared With the Creamery System.

The question is often asked whether it is more profitable for the individual dairyman to make butter at home or to supply his milk to a creamery, and have it made up on the co-operative plan. As to whether this is the better one to adopt will depend nearly altogether upon the individual himself. Some of our most successful dairymen have been those who have made a specialty of buttermaking, and have had their milk made into a first-class article at home.

There are some advantages that the private buttermaker has over the co-operative buttermaker. He has control of the buttering, and produces the milk, and also control of the milk from the time it is taken from the cows till it is ready to be manufactured into butter. In fact, he has control of all the processes, and is able to give particular attention to the little details connected with the process throughout, he is likely to carry on a more remunerative business than the person who supplies milk to his co-operative concern.

Then, again, the private buttermaker is usually in a position to sell directly to the consumer, which is a decided advantage. If he is able to secure a private customer in some of the large towns and cities who is willing to pay a high price for a good article (and these are not hard to secure in the larger centres), and he can retain that customer year in and year out, the success of his enterprise is assured.

Many of our most successful dairymen have managed in this way and have made a large profit out of their cows. In 1894 a private buttermaker in Ontario received for his butter at \$70 per cow clear profit, after paying for the cost of feed, etc., for the year. He had a herd of over fifteen cows, and, of course, milked them for twelve months. This is a very large return, and considerably higher than many others have made. During the last year or two the prices have not been so large. However, to the man who understands his business, and will devote his time and attention to it there is still profit for the private dairyman at present prices.

It must not be taken for granted that everyone who goes into private buttermaking is going to succeed. Where success will be attained, and just because they are not cut out for such work. For this latter class the co-operative institution, whether it be a butter or a cheese concern, will be the more profitable one.—Farming.

THE QUEEN'S CHICKEN MAN. Hammond, keeper of Queen Victoria's poultry, and his pet rooster, Toby.

The Queen's special train bearing the Czar and Czarina and the servants of the English royal family, who accompanied them, arrived here at 7.05 o'clock this evening. After the formal reception by the municipal authorities, the Czar and Czarina entered an open state carriage, and, escorted by the Scots Greys, drove to Balmoral.

As the imperial personages started on their drive the first bonfire was lighted on the Mountain peak. Arriving at the entrance of the castle grounds of Balmoral, the servants of the castle and the Balmoral and Craigmiles volunteers led the procession of carriages with flaming torches. Three other bonfires on the adjoining peaks illuminated the mountain side with a glare of light.

Balmoral castle was reached thus without any incident. The Queen and Princess Beatrice received their imperial guests at the door of the castle, and the warmest greetings were exchanged. The bag-pipes meantime sounded and the servants in the forenoon carried by the servants being thrust high in the air, accompanied with loud cheering by all the attendants. The duke himself, two generals, and several other officials were present, mounted on bicycles, and some 800 of the command, attended with their wheels. The spectators included the Duchess of Connaught and Albany and their daughters, all riding wheels.

A LEVEL FOR TILE DRAINING.

A Low-Priced and Effective Instrument for This Specific Purpose.

The level shown in the cut will cost perhaps 35 cents for material and a little more for making, unless you can make it yourself, says a writer in the Farmer. To adjust and graduate it, drive two stakes into the ground solid to receive the ends of the level, and as near level as you can tell by your eye. Put on the level and make a pencil mark at the point of the plumb bob. Reverse the level and mark if the two marks do not come at the same place, one end is too high.

You can easily tell which end is too high, then drive it down until the bob points to the same place, with the end either way. Then whenever the bob points to this place it is level. Mark the place with a fine saw, or in some way you cannot mistake. Raise one end of your level and put under it a piece one-quarter of an inch thick. Mark a bob point. Remove the piece and put it under the other end and mark the same. You can do the same with one-half, three-quarters and one inch pieces. Now the level is graduated and marked ready for use.

To level a short distance, I place the level in the middle and sight both ways along the under side of the level. The difference in height will show the fall. To lay the by this level, I begin at the lower end, place the first tile where I want it, then place a tile where the other end of the level reaches. If the grade is one-quarter inch to the rod, I raise or lower the tile until the plumb bob points to the first mark back of the center or level mark. Then I place a tile half way between these two, just touching the one-quarter inch between these tiles by a straight edge. When you get to the middle tile, move it forward or back to receive full tile. Put your rod and repeat. If your fall is one-half inch to the rod, use a one-inch mark.

I have laid tiles when I did not have one-quarter inch fall to the rod. Then I had the bob point half way between the center and one-quarter inch mark, making a fall of one-eighth inch per rod.

Be sure your plumb bob works freely and do not allow it to be swayed by the wind. I think I could instruct you one how to level more correctly by the way mentioned above and with less expense than going six miles for a surveyor.

Whitewash. The whitewash used by the United States Government for the lighthouses and beacons, chosen for its permanence under the most extreme exposure to the weather, is made as follows: Fresh hydraulic cement of any good standard kind, not of the more costly imported kinds, three parts, and clean fine sand one part, are mixed well with cold water and immediately applied. This gives a light brownish white that is not so glaring as the common lime, and has been found to resist moisture better than any other wash. It adheres to brick or stone or wooden walls and fences very firmly. In application the walls are first wet with water, by which the adhesion of the wash is made stronger than if applied to a dry surface.

Another good wash is made in this way: Half a bushel of good fresh lime is slacked with boiling water and kept covered from the air during slacking to prevent weakening of the lime by the carbonic acid of the air. It is strained through a fine sieve or cloth, and seven pounds of salt are added; three pounds of rice flour boiled to a thin paste, half a pound of Spanish white and one pound of broken glass steeped in cold water and then dissolved in hot water are then added, and when well mixed by stirring five gallons of hot water are mixed in and the whole again stirred. This is kept a few days closely covered, when it is ready for use. It is applied hot, being kept in a kettle over a fire. This may be colored a light brown by burnt nutmeg or a cream yellow by yellow ochre. A light gray is made by adding a small quantity of lampblack previously mixed with water and thoroughly stirred. One pint of this wash covers a square yard.

Training Fruit Trees. A correspondent of the London weekly called Gardening Illustrated, writes as follows: We might learn a lesson from a foreigner in the matter of training fruit trees on wires, as well as in the utilizing of what may be termed waste places by the sides of the railways. The annexed cut shows a combination of espalier and pyramidal training which might with advantage be adopted in English gardens. If planted by the sides of the walks, the pyramids might be trained over, and so forming arches. This would be a most interesting way of growing fruit trees, especially pear and apple—pyramidal trees to train on the wires (espaliers), and the pears to form the pyramids.

A Morning Egg Ration. A good ration for eggs in the morning is corn meal one part, wheat bran one part, ground oats one part, ground beet scrap one part. Mix with boiling water and slightly season with cayenne pepper.—Seattle Poultry Journal.

Freiburg Cattle. A Dairy Breed that is Very Popular in Southern Germany. This is a Swiss breed. The United States consular report says of it: There are several off-shoot breeds derived from the pure Bernese, known as the Freiburg, the Frutiger, the Iller and Ormond breeds, but they are all more or less inferior to the pure original race. As a principle, cross-breeding has failed in Switzerland, and the best results have always been obtained from in-breeding from the pure original stock.

Of these milder spotted breeds the only one that deserves notice here is the Freiburg, which originated in the canton of the same name, and is still bred there in great purity, although even here it is gradually giving way in the best herds to the light-colored Saanen and Simmental varieties. The distinctive mark of the Freiburg cattle is found in the fact that their spots are black. Many examples are seen in which the entire animal is black, except

Shipping notices and other maritime information.

HORN-FLY VS. POTATO BUG. The horn-fly like the potato bug has come to stay. Intelligent farmers do not smear the potato leaves with filthy greasy mixtures to keep off the bugs, no, they use something to kill them, so with the horn-fly, the sensible up-to-date farmer does not cover his cattle with kerosene and grease, because he knows these things will kill a single fly while they taint the milk and injure the health of the animal, but they use Shives' Insect Powder which kills the flies and is harmless to the animals. Be sure you get from your merchant or druggist genuine Shives' Powder, it is cheap and sure. It kills the flies every time. Sold only in cans with druggist attached. Look for the same on the label. Sample can 2c. 5 cans \$1.00. Post Paid. J. W. MANCHESTER & Co., Wholesale Agents, 7 B. Barrens, St. John, N. B.

Victoria's reign, and expressed himself afterwards as well pleased to have the opportunity to pay honor to our Queen, whom he revered very highly. His remains will be sent to Boston tomorrow for interment.

R. G. DUN'S HEAD MAN DEAD. New York, Sept. 28.-Arthur J. King, the actor I put on my things and go out for an airing, said, 'It is all right. I shall never go to all. So I break loose occasionally and let my wife tell me I come back, but not often, for I'm uneasy lest something should go wrong while I'm away.' 'That's just it. Woman's work is never done. It is a river that never dries up. And most women, faithful souls, will not leave it. Hence, we get letters like these: 'In the early part of 1896,' says one, 'I felt that I had reached the end of my life, and I was very pale and my hands and feet were cold. My appetite was poor and after meals I had fullness at the chest and fluttering and palpitation of the heart. Then I became weak and reduced. I was like a walking ghost. I was four years in this way. Two doctors prescribed for me, but I got no better. They said my blood was thin and poor. Finally, I bought a bottle of Mother's Syrup and it cured me. That is nine years ago now, and I have been in good health ever since. (Signed) Mrs. Emma Rickard, Lanjeth St. Stephen's, Cornwall, March 8th, 1895.'

SUDDEN DEATH.

Of Charles Ingersoll, a Cousin of the Famous Robert Ingersoll. Bridgeport, Sept. 28.-Quite a deep gloom has been cast over the town by the sudden death of Charles Ingersoll, of 4,668 Massachusetts place, Boston, who fell dead while standing on the steps of the Grand Central hotel, at about 7 p. m. today. Mr. Ingersoll was about 90 years of age and was married to a daughter of Whetlock Payson of this town, and came down here on a short visit every September during the last few years. The deceased was a cousin of the famous Robert Ingersoll, but was himself a Methodist. He attended the Methodist church last evening at Providence, and joined with considerable fervor in the singing of the national anthem, which the choir rendered in honor of the length of
