**Manufacture of Turpentine.**  
The great advance in the price of Turpentine—some six hundred per cent—arising through the war in the neighboring States from the needed portion of which the main supply has heretofore been obtained has led to many enquiries as to its production and best mode of manufacture.

In answer to some queries on this subject a respected correspondent writes:—"I am not aware that turpentine is made in Canada, but, if it is, it must be either from our Larch (*Larix Americana*), called the Tamarack, or from the Red pine (*Pinus resinosa*), often called improperly Norway pine, or from the Pitch pine (*Pinus rigida*). I believe our common name, *Scotch turpentine*, is

which the Balsam is so valuable, has little resin or turpentine in it. \* \* \* The Balsam is of which the well-known Canadian Balsam is the product corresponding to turpentine—is common in the Newmarket district, and in various parts of Canada, but where the Canada Balsam is usually made I have no information. *Pinus rigida* is found about here, and is very abundant in some parts of the country. *Pinus resinosa* yields the timber known as red pine, and abounds in the north-west, I believe." Gray—an American author—in his *Man*

ual of Botany, also speaks of *pitch pine* as being saturated with resin—another variety sometimes called *Yellow Pine* furnishing much less resinous timber; that the *resin pine* is usually much less resinous than the *Pitch Pine*, and that the *white pine* is nearly free from resin.

Canada Balsam is occasionally sold in the shops as Strasbourg turpentine, and is used in medicines; also by opticians for mounting microscopic objects and for other purposes. It is largely imported into the United Kingdom, the quantity in 1856 reaching 17,177 lbs.

The most important use made of spirit of turpentine, as described by Chevreuil, is as an ingredient in house-painters' colours—facilitating their application, diminishing the viscosity of the oily mixture, and allowing the painter greedily to modify the appearance of his work, by varying the degrees of gloss or of dullness, and preventing the

appearance of cracks which would otherwise be visible when the work is varnished; but for all common purposes the painters generally now use petroleum naphtha instead, on account of its extreme cheapness as compared with the turpentine.

So as to encourage parties to attempt the manufacture of turpentine, tar and resin in Canada, two prizes for each of these articles

have been added to the prize list for the next Provincial Exhibition.—*U. C. Journal of Arts and Manufactures.*

**MELANCHOLY DEATH OF THE SEA SERPENT.**—The sea serpent, that for so many years has deprived superstitious sailors of their wits, has been captured in our harbor. Laing's ship-yard, where he was left high and dry, and whence he was borne in triumph to the city. His length is twenty-three feet; his head five inches in circum-

ference; his body, at the largest part, seven inches round. Altogether he is a wonderful-looking creature, with a great gaping mouth, wide-spread nostrils, and orifices where the eyes ought to be, but are not. His snakeship was first seen at an early hour, apparently basking on the rocks, and his appearance, as may well be imagined, caused a commotion in the neighborhood. After having viewed it for some time at a safe distance, one of the spectators gathered courage enough to approach nearer and nearer until he at last discovered that the tail of

the monster had made its last wiggle, and that he was as "dead as herrings that are red." The intelligence of his finding was brought to town, and when half a hundred persons had visited the spot and pronounced the body to be that of the veritable sea serpent, some inquisitive fellow out with his knife and cut a few inches from the monster's tail, when it was discovered that the cause of all the alarm and excitement was a great piece of kelp!—as like a serpent as it could be. The illusion was perfect, and nearly every one who saw the kelp was deceived by its appearance.—*Vancouver Herald.*

**ADVICE TO YOUNG WIVES.**—If any thing occurs in your domestic concerns to vex or ruffle your temper, do not annoy your guests by relating your grievances; it is unkind to them, and tends to mar their pleasure, without being of advantage to yourself. Some people possess the enviable talent of rendering every one happy with whom they come in contact; they are endowed, also, with considerable discernment of character and know how to call forth the peculiar talents and perfection

of others, while they encourage the timidity of others, and gently repress the encroaching. However, may not be your privilege; but at least, earnest wish to promote the happiness of your guests in within your power, and cannot fail to add a halo of cheerfulness around you.

**PILGRIMAGE-SUCKING AT SOME PROFIT.**  
—A Saratoga letter-writer reports the following novel mode of paying hotel bills:—  
Among the numerous of a disappointed paper currency, the following is noteworthy. There are at present at the Springs quite a number of Cuban ~~money~~ <sup>notes</sup> taken on many of the hotels. They all come laden with gold, and on the home, they have paid no money. On the liquidation of these loans, the owners are allowed the premium, ~~course~~ <sup>course</sup>. The practice is so common, that a Cuban has been

A certain man says that one of his boys knows nothing, and the other does. The question is, which knows the most?

To be able to recognize an object as a person, and to be able to recognize a person as a person, is a property to know and for a real stroke of one's logic and personal real power.

I really don't think it is a fact that men generally are much more difficult to know than women are of men; and that men "break the ice" is a trivial case of this bookishness.

that his representations were truthful, he thought it prudent to acquaint those outside the room with what had occurred, which he did, and afterwards leaving the door open, returned to the prisoner, who repeated a portion of the statement, which those outside heard, among others, the two police constables who had in the meantime been sent for. The prisoner was then given into custody.

Mr. Ellison—Prisoner, do you wish to ask any question of this witness?

Prisoner—I thank you, Sir, I will—One. (Addressing witnesses.) Before you took me into the tap-room did you give me several glasses of brandy and water?

Witness—No, I don't know that you had one.

Prisoner—Was I sober?

Witness—No, I have said that you were not quite sober.

Prisoner—Was I not thoroughly drunk?

Witness—No, you were not, because you were sitting on the top rail of a chair, with your feet on the seat, which, if much intoxicated, you could not have done.

Prisoner—You made me drunk.

Witness—Most certainly not, for at the bar I believe you only had a glass of ale.

Mr. Abbott was called to call other witnesses, but on the magistrate learning, in answer to his question, that their evidence was to the same effect as the foregoing, he remarked that as late an hour it was scarcely necessary, and they were not heard.

Mr. Inspector Honey said that, since the prisoner had been apprehended he had made inquiries at the Mifflin and learned that the prisoner was there two hours previous to the time of the assault.

Mr. Stafford—Is the Mifflin Castle near the scene where the body of Mr. Briggs was discovered?

Mr. Buckley—It is.

Mr. Stafford—It is scarcely evidence, you not being present at the time; but for the sake of information say if the body was carried into that house.

Mr. Buckley—Yes. Permit me to say that on hearing such an extraordinary statement from the prisoner, I considered it my duty to give him in charge that the police might investigate the matter.

Mr. Ellison—Prisoner, at this stage of the proceedings will you call upon you to say anything? I think the matter of such grave importance that opportunity for further and searching investigation should be given. If you have made this statement simply through a drunken freak you cannot complain at the position in which you are placed.

I remain you until this day week.

Prisoner—Then removed to the cells, when he complained to Bendall, the gaoler, of being kept in prison on such a charge, asserting that he should not have made the statement unless he was drunk.

This being the district in which the alleged murder was committed, a concourse of persons assembled opposite the door of the court upon the news of Muller's recovery having been apprehended, and as he left he was greeted with shouts and cries of "Muller."

OTTAWA AND THE SEAT OF GOVERNMENT.

The tender-hearted man who has to communicate atrocious tidings to a friend, usually adopts the course of breaking the matter to the sufferer in a slow and graduated manner. Where there be any real advantage in this method may be doubted. At any rate the novelist—those deep searchers into human mysteries—always make the paroxysm come at last with about the same force of violence which might have been expected had the process of preparation not been previously gone through with. We are afraid in like manner that we are apprehending an explosion of grief from our good friends in Ottawa, notwithstanding all the measures taken with which they have recently been treated with respect to the "Seat of Government."

There was a time, not very far remote, when these potentates seemed to hold in their hand the destinies of this great and enlightened Province. How are the Ottawa men—was equivalent to an enquiry as to what Ministry should rule us. Of course every body was ready then to promise them every thing, and if they had contrived their course more judiciously, there can be little doubt that the same motives which prompted the promises would have enforced their performance. Unfortunately for this great, though we have always thought somewhat overweening interest, gentlemen who were the trustees of Ottawa power and influence, did not distinguish so well as it was desirable that they should, the side upon which their bread was buttered—in other words did not know when they were well off. They consequently brought about a state of affairs, which, unexpectedly no doubt to them, as well as to most other people, speedily developed itself into another state, where Ottawa interest became of very little importance to anybody.

When a constituency is nearly divided a "Quintet Club" is formed, and the politics or principles, but determined to get the very utmost farthing which he can extort from either candidate, before the members vote, has a wonderfully powerful hold upon the affections, the interests, and the purse strings of the candidates. But let the break be unanimous, and one thick black veil will be thrown up by the mere force of soundings. For once men of the ordinary standard of morality, not only feel that they can save their money, but also that they can afford to treat the selfish traffickers in freedom and patriotism as they deserve. Fearing like this has happened in the matter of the Seat of Government. Instead of a Parliament so equally divided that a few members indifferent to party or general principles but very resolute to exact terms for their own locality, could turn the tables on either party, the House now seems likely to be sufficiently unanimous, at least for a time, to be able to get on with or without Ottawa support. This position of course excites natural apprehension, and the apprehension is not likely to be allayed by the announcements as to the future which one after another are allowed to appear. At first there were loud and constant assurances that the Seat of Government was to be transferred to Ottawa this Autumn. Then came hints that this could hardly be accomplished; but the next session of Parliament was certainly to be held there. The position, in the due course of events, would take place in January or February. Soon after it was suggested, however, that the two houses could not be called together until May; but still the next session would certainly be held in Ottawa. Now we see a little paragraph in the Kingston News which indicates that the Government will take the only proper and constitutional course open to them in the circumstances in which they find themselves—that is that they will call Parliament together at the very earliest moment, when, however, it is certain that they cannot meet at Ottawa. Are we going after all to have another verification of the old prophecy that there is many a slip, &c.? Was there anything prophetic in the late article in the London Times as to the absurdity of the selection of Ottawa for the Seat of Government by her Gracious Majesty?

The Canadian Bankers for August clearly establish that there has been no diminution of discounts, but on the contrary, increase of banking facilities. There has been a loss of about two and a quarter millions in specie since August, 1864.

## AMERICAN NEWS.

### Great Battle in the Shenandoah Valley.

#### COMPLETE VICTORY BY GEN. SHERIDAN OVER GEN. EARLY.

New York, Sept. 19.

An army correspondent gives the following account of the rebel capture of our camp, picked up by the 1st Division of Columbia Cavalry, there was a large field on which there were about 3,000 head of very fine horses.

As the enemy had been constantly throwing scouts through the country, thereabouts he had probably learned the fact and resolved to possess himself of our treasure. Accordingly, at daylight yesterday morning he was approaching close in front of the 1st Division of Columbia Cavalry, and a strong line of battle, the first comprising the troops of Wm. H. Lee, the second being the Hampton Legion, and the number of men probably 5,000. Quickly breaking in front of our pickets the enemy turned the right and left, moved across the cattle, and drove of the entire herd, likewise many of the horses belonging to the men. All this was done so quickly that it was impossible to get any reinforcements here in time to check the bold movement.

The Herald's correspondent says:—A telegraphic construction corps engaged in putting up the wire between this and Fort Powhatan, some forty men, under Mr. McIntosh, with two wagons, thirty-six mules, and twenty miles of wire, were also captured. In the pursuit we came upon them in force at a small creek near Harkersville, on the Jerusalem plank road, where we found them strongly entrenched beyond the stream, with the bridge torn up and an impassable swamp intervening. A general assault was ordered, which was obeyed with a will, but without success. The enemy's line was found both longer and stronger than ours. The 1st Massachusetts regiment in the charge became intermingled with the enemy, and fought hand to hand, but were obliged to fall back. The enemy had only four. Our chances of recapturing the bridge were very slight, and we will have to own the rebels have outwitted us this time, and make the best of it.

New York, Sept. 20.—The Herald's Harper's Ferry special of the 19th says:—As we expected, the visit of the Lieutenant-General here was to put in motion some important movements of the army.

Friday morning last the enemy disappeared entirely from the left wing of our army on the Berryville and Winchester pike, and only made a faint show on our right. This gives promise that they had either taken up a line of retreat to Strasburg, had massed to the left of our right for a concentrated movement against us.

Gen. Sheridan at once took measures to ascertain the fact, and from information obtained, soon came to the conclusion that this attempted clever movement of Gen. Early was only a feint to get troops on our left to the west side of the Opequan Creek.

The trap was discovered, and the rebel General thwarted in his designs.

The great battle for the possession of the valley of the Shenandoah has either commenced, or cannot be long delayed.

It is said that the rebels have a large reserve concealed in the valley between North Mountain and Third Hill Mountain. The fact of the enemy offering Gen. Sheridan battle, shows that they have a good sized army, and hope to meet with success.

It is said that the rebels have a good sized army, and hope to meet with success.

on about 3 miles beyond the Opequan into a line of earthworks, our infantry attacking them in position, close hand. As the effect was, he could distinctly hear heavy musketry, continuous and heavy artillery firing still continuing to this hour. Every indication is most favorable to us.

(Signed) JOHN D. STEVENSON, Brig-General.

Harper's Ferry, Sept. 20, 7:40 a.m.

To the Hon. E. M. Stanton, Secretary of War.

I have just heard from the front that Sheridan has defeated the enemy and captured 20,000 prisoners, 5 pieces of artillery and 5 battle flags.

The rebel Generals Gordon and Rhodes were killed, and York wounded.

Our loss was about 2,000 men. Russell of the 6th corps was killed. Gen. McIntosh took a leg. The enemy escaped up the valley under cover of the night. Sheridan is in Winchester.

(Signed) J. D. STEVENSON, Brig-General.

General Upton, McIntosh and Chapman are wounded.

Gen. Sheridan transmits to Gen. Grant the following official report, which has been received by the department.

Winchester, Va., Sept. 19, 7:30 p.m.

To the Hon. E. M. Stanton, Secretary of War.

I have the honor to report that I attacked the forces of Gen. Early over the Berryville Pike at the crossing of Opequan Creek, and after a most stubborn and sanguinary engagement, which lasted from early in the morning until 5 o'clock in the evening, completely defeated the enemy.

Winchester, and capturing about 2,500 prisoners, 5 pieces of artillery, 9 army flags and most of their wounded. The rebel Generals Rhodes and Gordon were killed, and three other general officers wounded.

Most of the enemy's line was captured, and killed fell into our hands. Our losses are severe; among them are Gen. D. A. Russell, commanding a division in the 6th corps, who was killed by a cannon ball. Gen. Upton, McIntosh and Chapman were wounded.

I cannot tell our losses. The conduct of the officers and men was most superb; they charged and carried every position taken up by the rebels from Opequan Creek to Winchester. The rebels were strong in numbers and very obstinate in their fighting. I desire to mention to the Lieut. General commanding the gallant conduct of Generals Wright, Crook, Emory and Torbert, and men under their command. To them the country is indebted for this handsome victory. A more detailed report will be forwarded.

(Signed) P. H. SHERIDAN, Major-General Commanding.

Washington, Sept. 20.—The Alexandria Herald, Sept. 20, says:—The Lieut. General here was to put in motion some important movements of the army.

Friday morning last the enemy disappeared entirely from the left wing of our army on the Berryville and Winchester pike, and only made a faint show on our right. This gives promise that they had either taken up a line of retreat to Strasburg, had massed to the left of our right for a concentrated movement against us.

Gen. Sheridan at once took measures to ascertain the fact, and from information obtained, soon came to the conclusion that this attempted clever movement of Gen. Early was only a feint to get troops on our left to the west side of the Opequan Creek.

the most successful and decisive battles of the war. Victory signs pointed on our banners, and the rebel army which so recently threatened the invasion of the loyal North, has been defeated and utterly routed, with the loss of at least 2,000 killed and wounded, including six generals; namely Rhodes, Wharton, Bradley, E. J. Johnson, Gordon, and Gordon, the two first of whom were killed, and the others badly wounded, and we have captured 25,000 prisoners, 9 battle flags, representing 5 different regimental organizations, 6 pieces of artillery with caissons. In order to more thoroughly understand the nature of the battle and the surrounding influence, it will be necessary briefly to refer to the operations of Sunday.

On Sunday morning early I sent Gordon's division of rebel infantry from Bunker Hill, where it had been stationed for the past few days, to drive Averill out of Martinsburg, and to destroy the bridge across the Opequan, which Ohio railroad across the Opequan, which they consequently had been repaired.

They occupied Martinsburg for a short time without doing any damage to the railroad, and were eventually driven by Averill as far as Dardville. Gen. Sheridan, learning of their movements, ordered the whole command to break camp and prepare to march.

Accordingly, at three o'clock on Sunday the tents were all struck, packed in wagons, &c. The different divisions were all under arms, and prepared to move at a moment's notice, and remained in this state for about an hour, when the order came to go into march. The march was made in the most perfect order, and the army moved in two parallel columns, on both sides of the road, with the artillery, ammunition and supply train on the road; the 19th corps to follow on the same road, and in similar order. The Army of Western Virginia, under Crook, at 5 o'clock following, the order of march was given, and the corps moved out on the Winchester and Berryville pike, and moved in two parallel columns, on both sides of the road, with the artillery, ammunition and supply train on the road; the 19th corps to follow on the same road, and in similar order.

The Army of Western Virginia, under Crook, at 5 o'clock following, the order of march was given, and the corps moved out on the Winchester and Berryville pike, and moved in two parallel columns, on both sides of the road, with the artillery, ammunition and supply train on the road; the 19th corps to follow on the same road, and in similar order.

No church, however perfect, is without a flaw.  
What word will express meeting a physician?  
Necron, the daughter of Noah, was 580 years old when she married. Courage ladies.  
An Amazon on West, in describing a runaway husband, says: "Richard may be known by a scar on the nose, where I scratched him."

### Brookville & Ottawa Railway.

TIME TABLE NO. 7.  
COMMENCING ON MONDAY, SEPT. 19, 1864.
