THE WAGON ROAD. Certificate of Improvements.

The matter of the construction of

wagon road from Rossland into Cascade City has been discussed in this paper, and will come up for consideration at the board of trade meeting tomorrow evening. THE MINER has endeavored to point out to the citizens of the camp a project which, if taken up and carried out, would redound to their commercial advantage. What is true of this proposed road is equally true of roads built in other directions than Boundary from

this camp. Each and every one that is constructed will add its portion of trade to the camp. In fact, without means of intercommunication it will be impossible to have any great measure of development. The savage Indian, who used to be monarch of all he surveyed in this

vicinity, was satisfied with trails, and crown grant of the above claim the natural highways that were offered by the rivers, when he traveled, but the Caucasian wants roads over which to transport his goods and as a means of traffic. That is one of the marked differences between the two races. There

There is no denying the fact that the is, however, a class of white men who are not much higher than their red brothers.

FEATURES OF THE WEEK.

The most noteworthy events of the past week have been an important strike on the Deer Park and the reported sale of the No.1 on Red mountain to an English syndicate for the sum of \$200,000. The fact that there is in the camp today a considerable number of experts and agents for responsible syndicates evidences the interest that is taken in the Rossland mining center by English and The board of school directors have ad-vertised for new tenders for the con-struction of the \$8,000 school house. It has been found necessary to amend the plans so that the building can be con-structed at a price within the limits of the appropriation. There has been the interest that is taken in the Rossland mining center by English and foreign capitalists, many developed properties of merit being now under consider-ation by prospective purchasers. With reference to local stocks Poorman has been the most ready seller and the greatest favorite, but there has also been an active market in Josie, Monte Cristo, Great Western and Evening Star, as this latter has now joined the list of shippers and expects to ship from eight to 10 tens daily, this stock should come even more into demand yet. ized, and they are anxious to come to Rossland to play the club here. At the very earliest possible moment it is the intention of the local club to begin practice, and as soon as the players have acquired a little confidence in their ability a challenge will be issued to play

The skating rink in course of construction on the corner of First avenue and Washington street is a private enterprise, of which L. L. Lockwood is the projector. The ground dimensions of this structure are 60x116 feet. Mr. Lockwood is thinking seriously of putting in a truss roof, but will use the present one for a while, and if he finds that its supports interfere too much with the skaters he will put in the truss roof, so as to do away with the poles. It is thought that the rink will be ready for the public on Saturday evening, provided there is enough cold weather between now and then to freeze the water that is to be placed on the floor.
