WANT AD HOROSCOPE

Persons born on this date do not care much for the details of work. They are sometimes inclined to be very lazy and are fond of luxury when it is provided by others. When necessary to take action and they see their own advantage they will be up and doing and make everything stand aside in order to succeed. Exceedingly fond of all the comforts of home and of good things to eat and drink, they make excellent providers and are always well acquainted with places to buy things. For this reason and others these people make good salesmen and agents and can present an important sales proposition in an attractive manner. They have a genius in catering for the table and the women of this birthdate are extra good cooks. Now is the time when the Want Ads can be used to good advantage in securing good clerical positions; in renting new apartments and filling occupations in stores and factories.

Removal Notice

TENDERS FOR DREDGING

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Dredging Rainy River, Ontario" will be received until 1:00 P.M. on Tuesday, August 12, 1913, for dredging required at Rainy River, Ontario.

Tenders will not be considered unless made on the forms supplied, and signed with the actual signatures of the tenders. Combined specification and form of tender can be obtained on application to the Secretary, Department of Public Works, Ottawa. Tenders must include the towing of the plant to and from the work. Dredges and tugs not owned and registered in Canada will not be accepted. Contractors must be ready to begin work within thirty days after the date they have been notified of the acceptance of their tender. Each tender must be accompanied by an accepted cheque on a chartered bank, payable in the order of the Honourable the Minister of Public Works, for five per cent. (5 per cent.) of the contract price (no cheque to be for less than \$100.00), which will be forfeited if the person tendering declines to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tenderer does not accept the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order, R. C. DESROCHERS, Secretary, Department of Public Works, Ottawa, July 26, 1913.

New Method of Knife Cleaning Norah, the new cook, poked her head round the dining room door. "Place ma'm," she inquired, "an 'ow will 'O the knowin' when the puddin' is cooked?" "Stick a knife into it," answered the skilled housewife, "and if it comes out clean the pudding is ready to serve."

"Yes, ma'am." "And, oh, Norah," continued her mistress, "if the knife does not come out clean you might stick all the rest of the knives in as well."

HELPLESS CRIPPLE FROM RHEUMATISM

Toronto Lady Took "Fruit-a-lives" And Cured Herself. 4 HONOR PLACE, TORONTO, Dec. 15th, 1909. "I was a helpless cripple from Rheumatism for nearly a year. All down the right side, the pain was dreadful and I could not move for the agony. I was treated by two physicians without benefit. I saw 'Fruit-a-lives' advertised and decided to try them. After taking one box, I was much better. When I had taken three boxes, I could use my arm and the pain was almost gone. After taking five boxes, I was entirely well again. The cure of my case by 'Fruit-a-lives' was indeed splendid because all the doctors failed to even relieve me. 'Fruit-a-lives' cured me." Mrs. LIZZIE BAXTER. See a box, 6 for \$2.50—trial size, 25c. At dealers or from Fruit-a-lives Limited.

British News

Great Damage has been done by the heavy floods in the Douglas district of Lanarkshire, the result of a severe thunderstorm. Owing to the torrential rain that fell for hours the bridge at Stableton, near Glespin, a wooden structure, which has a span of 60 feet across the Douglas water, was swept off its piers, and carried down the river for a quarter of a mile. About three-quarters of a mile farther down the river, Janefield Bridge—built of stone—which carries the main road from Edinburgh to Ayr across the river, also collapsed later in the evening through the foundations being undermined, and the arch now lies in the bed of the river. Three landslides also took place on the same road. One of them was of a serious nature, and completely cut off the road. Considerable damage was done at the farm of Debag, a large hay shed, in addition to several head of live stock, being carried away.

The body of Mr. Peter Donaldson, one of the leading partners in the firm of Messrs. James Watson and Co., Glasgow iron merchants, was recovered from the Firth of Clyde. The announcement caused a sensation at the meeting of creditors. It was stated at the meeting that the liabilities amounted to £238,300 and the assets to £200,000, an apparent deficiency of £38,300. The assets represented a dividend of about 6s. in the pound. A further 3s. are expected if certain contracts are well realized, while the half sovereign may be reached in certain contingencies.

The most audacious argument ever brought forward against Home Rule, said Mr. John Redmond at a meeting in Glasgow, was that by Sir Edward Carson, when he contended that the Union between Great Britain and Ireland ought not to be disturbed because that Union had been a success. The mere fact that at the end of 113 years the overwhelming majority of the people of Ireland were dissatisfied with that Union and demanded its readjustment would be sufficient proof of the failure of that Union. But the Union, judged from every point of view, had been a failure.

CANADA THE PROSPEROUS

Says the Ottawa Free Press (Liberal):

The change from an exporting to an importing country in the matter of butter tells the tale of Canadian development. Last year, it appears, for the first time for over half a century, not a single pound of butter was sent from Canada to Great Britain, but we made importations of the same article from New Zealand to the extent of seven million pounds per month.

The primary cause for this state of things are two-fold: the rapid growth of our urban population and the influx of immigrants. However many of these new-comers we may persuade to go on the land, they must be non-producers for a time, and materially increase the demand for dairy products. The growth of the cities generally throughout the length of the Dominion is responsible also for causing the demands of the home market to go beyond the supply and causing the deficiency to be made up by imports.

Starting as these statements are, they do not seem to receive as much attention from the authorities as they deserve. In Canada we might at least supply our own wants in most agricultural products. It is easy to understand how, at certain points and at certain seasons of the year, such products will flow across the border between Canada and the States, despite obstructions, but to bring butter from New Zealand is an altogether different matter. It is the strongest evidence possible that while new land is being broken up every year, we need a very great extension of diversified farming to keep pace with our increasing demands.

PUBLIC DEBT GREATLY REDUCED.

The fact has already been recorded that the public debt of Canada has been reduced by \$20,000,000.

The final figures for the last Canadian fiscal year, prepared by the Finance Department, shows that as predicted by Hon. Mr. White in the House there is a record surplus. The total is no less than \$56,530,000 on current account, which is easily the largest in the history of the Dominion.

On consolidated fund the revenue totalled \$168,600,000, compared with \$136,108,217 the previous year. Expenditure was \$112,000,000 as against 198,161,446.

The total of capital and special expenditure was \$32,300,000, including five millions in railway subsidies. Outlay on the N. T. R. amounted to \$13,500,000. On public works \$6,000,000 was spent, and on railways and canals \$7,250,000.

FIGURES REGARDING ILLITERACY.

The educational status of the people five years of age and over is presented in a census bulletin. The number of persons under five years of age was 883,508, leaving 6,323,155 persons whose educational acquirements were recorded in the census of June, 1911. The increase in the population five years of age and over from 1901 to 1911 was 33.72 per cent.; during the same period the number of those who can read and write increased by 43.48 per cent., while the number of those able to read only decreased by 74.64 per cent. In 1901 there were 680,132 persons in Canada who could neither read nor write, in 1911 the number was 667,340, a decrease of nearly two per cent. in ten years.

Ontario still leads among the provinces as having the greatest percentage of persons five years of age and over capable of reading and writing. Of the eastern provinces Quebec has made the greatest proportionate increase from 1901 to 1911 in the number who can read and write.

Of the Canadian-born nearly 10 people in every hundred are unable to read the ballot paper; of the foreign born nearly 17 persons in every 100 show a similar deficiency; of the British immigrants, including born in United Kingdom and possessions, only three in every 100 are so situated.

OVER EDUCATION.

A little knowledge is said to be a dangerous thing, but even more prejudicial many people are commencing to think, is the modern practice of attempting to cram too much knowledge into youthful minds. The mass is so great that far too frequently no one thing becomes properly digested.

It is only necessary to pick up some examination papers to realize the arrant foolishness of many tricky,

confusing and utterly irrelevant questions, or to glance at the curriculum in connection with almost every branch of teaching outside of the kindergarten, to realize that it would be better—far better—to have a few basic subjects properly mastered instead of a long and confusing string of subjects many of them abstruse, which by their number and matter tend to clog and not clear the brain.

It was a small boy who once pathetically remarked with regard to Latin and Greek that it was overstudy of them which caused them to become dead languages, and Spencer one of the world's greatest thinkers, never learned either, for the outspoken reason, which he freely expressed, that he thought the acquisition of both of them, especially Greek, was a sheer waste of time.

This, of course, was a too sweeping arraignment but it is true with regard to a very large number.

It is almost appalling to note for instance, notwithstanding the general diffusion of education in this country the slovenly spelling of boys and girls, and of men and women. As for punctuation, that seems to be almost a lost art. Someone might exclaim: "Make them learn Latin and that will help a lot." Well, it doesn't of necessity do so. There are people who cannot construe a line of Horace, who spell most correctly, and others who can reel off passages from Virgil and Xenocrates, who can't spell at all, in the best sense of that term.

The average bunch of us can get along quite well in life with a working knowledge of the three R's, and many of the present educational frills could be very profitably torn off.

NOTES AND COMMENTS.

A German bequeathed his entire fortune of £750,000 to the Kaiser and now the widow is seeking to get a piece of the sum. If the Emperor did the square thing she wouldn't need to take any action.

These Grit papers which continually refer to the Australian fleet unit, conveniently keep from their readers the fact that for years our cousins contributed cash towards the British navy before reaching the present move.

Lord Rosebery during an address declared that "manners are decaying." To which it may be remarked, that in the case of some people they never became ripened enough to do even that.

In New Liskeard during a ball game, a magistrate got out to sentence a prisoner on the grounds, and then climbed into his seat again. He probably figured it up that during all time diamonds have been associated with courts.

With the City Police

There was the usual docket at the police court this morning, the case of most interest being against a farmer for driving his traction engine on the paved roads.

The case of Hayward Malcolm for damaging the local pavements with his traction engine, again came before the court. Mr. McEwen appeared for the defendant, and claimed that Mr. Malcolm was entirely ignorant of any by-laws forbidding him to drive his engine over the pavements. The defendant was let off with costs only, \$2.85.

Mrs. Alice Turner charged Edith Barbour with converting a trunk to her own use. Defendant claimed that the trunk was held in payment of board due her. The case was settled privately.

Harry Tom and A. Denderian were charged with breaking the Lord's Day Act, and with gambling, but they did not appear.

Louis Widowitz with the theft of coal from J. M. Bond. It was proven that Widowitz had taken unlawful possession of the coal, and was fined \$6.85 and costs. The magistrate gave the defendant a warning also.

Jas. Currie was charged with being drunk on Jubilee Terrace. He was allowed to go.

Two men, J. Rozell and Jas. Weatherston, who neglected to pay their poll tax, did not appear. They are to come before the magistrate next Monday.

Jno. Brown, charged with not working, has now got a job and his case was dismissed.

Geo. Hawkins was charged with not having the lamps of his auto lighted. The chief spoke of the many motorists who do not keep their lights clean, making it impossible for the numbers on the cars to be distinguished. Mr. Hawkins was allowed off with costs.

Australians in Age. PROVIDENCE, July 29.—The Australian Cricket team, met the all-Rhode Island eleven, captained by Alexander Meiklejohn of Amherst College in the first of two games to-day. Play began at 11 o'clock and the wickets were pitched at the same hour to-morrow.

What the Other Fellow Thinks.

Rural Routes. Guelph Herald.

There are now 1500 rural routes in operation in Canada—a proof that the Borden Government is alive to the necessities of the age.

Dangerous Law.

St. Thomas Times. Queen Maad of Norway is going to leave the country because she is afraid somebody will assassinate her child, Prince Olaf. A new law provides that if the heir die the country becomes a republic, and one can hardly blame the queen for thinking it a dangerous law.

Ocean Freight Rates.

London Free Press. The investigation of ocean freight rates, which Hon. Mr. Meighen is to undertake, will show how much truth is in the charge that the shipping companies have practically nullified the British preference by their charges and given the advantage to the United States.

The War in China.

Peterboro Examiner. The so-called "rebellion" in the south of China against the Government is really a civil war between the people of the South and the officials of the North. The uprising that drove the Manchu dynasty from the throne was the result of a quiet, but skillful propaganda, carried on by Sun-Yat-Sen, a well-known Anglicized and Americanized educated Chinese. When the rebellion proved successful his associates offered him the Presidency of the new Republic, but he persistently and successfully declined it, and advised the election of Yuan-Shi-Kai, who still fills the office.

It is difficult at this distance to discern clearly the causes of this rebellion or war, but public opinion in both America and Great Britain will be apt to hold Sun-Yat-Sen justifiable until he is proved to have gone wrong. The world is prepared to hold him guiltless of ambition after his act of renunciation, and yet he has openly joined the insurgents.

The Human Comet.

From the Victoria Daily Times. General Sir Ian Hamilton likened his tour across Canada to travelling with a comet, and added that he had seen ten times more of the country and the people in his trip with the Minister of Defence than he would have seen had he travelled along the General French did. If this is so, General French must have been afflicted with temporary blindness during his visit to Canada, because Sir Ian Hamilton saw very little of the country. The unfortunate man never had a chance. Attached to the human comet, Col. Sam. Hughes, he dashed across twelve thousand miles of railway at top speed and his real impression of Canada gained through the windows of his palace car, must be that the country consists very largely of a string of telegraph poles punctuated by the cities he visited. Those blurs on the landscape where the train did not stop were towns also, but of this the general could not be sure owing to the speed with which they were passed.

World News OVER THE WIRE To-Day

GUESTS at the Colonial Annex Hotel, Pittsburg, were aroused at daybreak to-day by the sound of crashing glass, and when employees hastened to the banquet room they found the dead body of William Edwards, aged 40, on the floor. He had fallen from a window of his room, 75 feet, down a light shaft and crashed through a skylight. Edwards registered at the hotel soon after last midnight. He was a Pittsburg business man.

ONE hundred and fifty employees of a coffee firm, with offices at Montreal, Boston and Chicago, will receive \$250,000 under the will of Charles D. Sias, Chicago, senior member of the firm, which was probated yesterday. Bequests range from \$300 to \$2000. Every employee who has been with the company for a year receiving at least the smaller sum. Widows of travelling salesmen will receive \$2500 each.

DR. W. T. LINN, aged 108 years, the oldest man in Illinois, died at his home near Carle's night. His death came suddenly. He celebrated his 108th anniversary on May 28 last. Dr. Linn was born in Ohio and had practiced medicine for more than 75 years. He leaves 62 grandchildren and 53 great-grandchildren.

Married His Clerk.

ALBANY, N. Y., July 29.—Attorney General Thomas Carmody and Miss Agnes E. Flynn were married this morning in St. Joseph's Church by Right Rev. Mgr. O'Connor. The wedding was a quiet affair, there being no attendants. Mr. and Mrs. Carmody left after the ceremony for the Adirondacks. Miss Flynn was financial clerk in the attorney-general's office until yesterday, when she resigned.

Steamers Collide.

THREE RIVERS, Que., July 29.—The steamship Crown of Cordova, of the West India line, collided with the steamer Lady of Gaspe about ten o'clock last night opposite the Cape Magdalen. The Lady of Gaspe was struck in the middle and is very badly damaged and was immediately sent aground. The passengers, about 450, and all the crew were safely landed at Cape Magdalen.

Killed by Lightning.

OGDENSBURG, N. Y., July 29.—The electrical storm which swept this section during the night caught Patrick McCarty and George O'Connor of this city in a skiff on the St. Lawrence, homeward bound from a day's fishing trip. They beached the tiny craft to seek shelter from the rain, and as they stepped ashore a thunder bolt struck O'Connor, killing him instantly and mortally injuring McCarty.

Three bombs found in the boiler-room of the Bathing Station, Aberdeen. The extraordinary discovery was made early in the forenoon, by one of the firemen at the beach, on the day on which the annual gala of the Aberdeen school children took place at the establishment. The bombs had been secreted in the compartment adjoining the public pond, in which during the evening, 1500 children and adults were assembled, and it is believed that the explosives were timed to go off during the progress of the swimming gala. The police took possession of them, and investigation of the circumstances is being prosecuted, but so far the whole affair remains a complete mystery.

For twenty-five years, had Dr. Cameron Lees, who died recently, been minister in charge of St. Giles Cathedral. Dr. Cameron Lees, who was in his seventy-ninth year, was Chaplain-in-Ordinary to the Queen Victoria for thirty years, and enjoyed her friendship. He had also been Chaplain-in-Ordinary to the King since 1901. He had lived in retirement at Kingussie for the last four years.

Not Buying.

At the Haymarket, one afternoon recently a couple of farmers stopped to talk crops and horses.

"Are you in the market for a good horse?" asked one of the farmers.

"Always ready to dicker," the other answered.

"Ever see that little bay mare of mine?"

"I think I know the critter."

"How'd you like to own her? She's yours at rock bottom price."

"Setting up his fines preparatory to leaving the spot, the other farmer replied.

"Well, John, I'd buy her this morning, but I hate to bust a dollar."

Medical Science Advancing Fast

Formerly doctors prescribed stomach-treatment for Catarrh and Bronchitis. They seldom cured and Catarrh has become a national disease. To-day the advanced physician fights Catarrh by medicated air. He fills the lungs, nose and throat with the antiseptic vapor of Catarrhoxone. Cure then is certain. Easy for Catarrhoxone to cure. It contains the essences of pure pine balsam, reaches all the germs and destroys the disease. Every case of Catarrh, Bronchitis and Sore Throat can be cured by Catarrhoxone. 25c and \$1.00 sizes. ## Situation on Intercolonial

OTTAWA, July 29.—The government has so far received no official intimation of the attitude on the I. C. R. but the Labor Department is awaiting the men's request for a Board of Conciliation, which, according to despatches is on the way. For the present the difficulty is in the hands of General Manager Gutelius, but in the event of the threatened trouble coming to a head, he will confer with the Minister of Railways.

### Statement from Halifax

HALIFAX, N.S., July 29.—The sole development in threatening strike situation of the Intercolonial Railway to-day was the announcement that the management of the road proposes to arbitrate the present schedule of wages and the working conditions.

### Official notification to this effect

was received at the brotherhood headquarters here this morning in a communication from the general manager, Gutelius, giving the "required six months notification" of the railway's determination to end this schedule.

### Whether this forces a reduction in

the present wage schedule or an attempt on the part of the road to inaugurate a system independent of the brotherhood is not known yet, but it is generally felt that the latter course is probably in contemplation. Apart from this action of the railway, nothing had developed yet in regard to the request for a conciliation board sent to Ottawa yesterday. Mr. Gutelius received notification of this request this morning and something may possibly be heard from him to-morrow, but it is unlikely anything will transpire for Ottawa for a week or so.

### They Escaped

KINGSTON.—A spy prying open an old trap door in the police station at Kingston, Ontario, and his clamorous escape. Atwood knew the trap door was there as he lived in the basement of the city hall. He led to his home, and after the two got down into the basement they had little trouble getting out into the streets.

## PROSPERITY

Advertisements Are the Guideposts Showing Way  
By HOLLAND.  
**WOULD** you travel the road that leads to Prosperity? Then read the advertisements. They are the guideposts pointing the way. Disregard the advertisements and you are likely to go wrong, and even if you finally reach your destination you do so only after needless delays and unnecessary traveling.  
The traveler who would disregard guideposts, who would not examine them at every opportunity, would be called foolish. He would get little sympathy when he complained of time lost going the wrong direction.  
The man who neglects to read the advertisements is disregarding guideposts and is delaying his own progress.  
**ADVERTISEMENTS OFFER WAYS TO SAVE DOLLARS.**  
If you fail to read and profit by the advertisements you are giving your neighbor who does read them an advantage.

The children were requested to wear frocks of paper, and the choice supply of crepe paper was completely sold out at the different shops. Little Louise Weeks represented Canada in her paper dress of red, white and blue, while Louise C. Ullman of Buffalo, represented our neighbor as the "American Flag." There were clowns, little bo-peep, little boy blue, red riding hood, dolly varden a Spanish maid, etc.  
After the grand march, there were games, recitations, singing and dancing by the wee wee ones. Prizes were awarded for the most original and artistic and ridiculous costumes. Later they all marched to the dining room, where the children were seated at small tables, surrounding a central table which was brilliantly illuminated by the birthday cake, on which were reflected the many gay colors of the dresses. The party broke up with deep regret by the children, who all voted it the best time they ever had at Orchard Beach.  
Saturday afternoon a delightful time was spent by the local foreign children, members of the Sunday school, which has been conducted during the past three months. A special car conveyed the happy 45 little folks and their guardians to Mohawk Park. A good list of sports were run off and the little folks enjoyed themselves greatly. After the sports a dainty lunch prepared by the superintendent, Mr. Thomas Fissette and the teachers Misses Simon, Darling, Miss Jean Keir and Mrs. (Dr.) Norris, was served.  
The several amusements at the park were greatly enjoyed, those in charge being very kind in taking the widdies on. Mr. Rheuben Ryerson sent down a large sack of peanuts and a scramble was in order. He was enthusiastically cheered.  
The children behaved themselves admirably and greatly pleased their teachers by their good behavior. Mr. Louis Stander was there, as was also Mrs. Fissette. Mr. Stander was right here with his sunny smile. The picnicers returned to the city at 7 o'clock.  
Although the work has been under way only three months, so gratifying have the results been that it is the intention of those in charge to broaden out the work.  
**Interment at Hespeler.**  
The body of late Mrs. Rose Mitchell, whose death occurred so suddenly on Sunday night, was sent to Hespeler this morning, the funeral taking place there to-morrow afternoon.

## Golf Notes

Matters have been arranged with Hamilton so that the golfers who were to have played a friendly game over the local links on Thursday of this week, have postponed their coming until early in September, by which time the new course will have been laid out, and the links in good condition once more.

## BOUQUET FOR BRANTFORD BOYS

There was not a more interesting spot on the old camp ground at Grimsby Beach during the last ten days than the far southeast corner, among the poplars, where served as shelter from the sun by day and the rain by night, for Mr. Schultz of Brantford, and his eleven Sunday school boys. Bright, active, well-bred lads the latter were, ranging from twelve to fourteen years of age. Many joyous hours they spent at the lake, fishing, boating, bathing; but perhaps even more joyous hours they spent around the hospitable board of the hostess of Gynsry, the summer cottage of Miss Helen Teeter, where thirty-six meals per day were enjoyed by the party. A very warm friendship sprang up during these eventful days between the hostess and her guests, indeed, and it was with a feeling of regret that many, even less interested, saw the little Brantford party fold their tents and steal away.—Hamilton Spectator

## STOLE ALDERMAN'S BREAKFAST

During last night some hungry mortal, whose identity has so far not been ascertained, broke into the residence of Alderman John H. Spence, Park Ave., who at present is keeping bachelor's quarters and stole the worthy Alderman's breakfast.  
When the chairman of Finance arose this morning he found a pane of glass in one of his kitchen windows broken and his breakfast gone. "J.H." left some nice tomatoes and brook trout on a plate surrounded by ice and during the night no doubt had dreams of how he should appease his appetite in the morning.  
A friend happened to meet the big guardian of the civic exchequer just when he was growling about the missing trout, and so the Mother Hubbard story leaked out.

KANE CAME ACROSS WITH A HEALTHY SMASH IN PINCH

After Trailing Along for Eight Innings on the Short End of a 3-1 Score, Amby Stepped to the Rubber With Two Gone in the Ninth and the Bases Loaded and Hit the First Ball Pitched Over the Dyke, Clearing the Sacks and Winning Out by a 4-3 Score.

Can you imagine a melodrama about a villain? Can you imagine a melodrama with a hero? You can, try and dope out in your quiet hour what yesterday's ball game would have been without Kane. For that matter, who could it have been without the Sewash Coose in the fracas. Polar as heroes or villains this pair named themselves like real tragedians.

Hero No. 1 was probably Ambrosia Kane. He appeared as last man before the footlights. Assistant hero in the last hour of the act was Chubboso. He started the screaming, which drove the deep dyed villain, the Reuben Schuyler to cover. In fact there never was a melodrama about the villain who was plastered like Schuyler was yesterday. J. Moore Davis acted as undertaker, was present at yesterday's ball game had been forming the conclusion at moment intervals that Mr. Schuyler had been escaping the clutches of Red Sox bats with a lot of luck. It appeared just a question of time when the villain would get his. He deferred maketh the heart sick, some one has said, when the fans woke up in the ninth with a sickening thud that villain Rube Schuyler had only two more men to accompany his miserable plot. He looked across at the Red Sox bats would get because he smiled as all they do in a pinch. Thereupon Chubby Coose proceeded to show him that was all he had—a smile. Kane's diverted the relaxed jaw of Mr. Schuyler considerably by laying out a single out. It was this crack which affected the mental pose of Schuyler. Villains have mentality in some degree and it is presumed that Rube has his share. Then something more remarkable happened. Pitcher Lill hoisted a fly to right. The ball in its course downward fell in the catcher's mitt. Two sinners came out and the Rube's mental pose unhinged several more degrees.

In this stage, a demonstration of the villain at his own game called off. Wagner scratched a run to Needham at third. The pitched Needham before Coose reached third, but Old George on the line and tagged Coose. Coose then with the leather with which he dropped it to get hold. Slats' Davis discarded Coose and called Coose safe. The roan went up that Coose knocked the ball out of Needham's hands. It was a mighty roar of a dozen Hamilton throats. Wagner was implacable. He was on his feet. He looked as happy as an undertaker who hadn't had a case for months. This row was pie for pie and he eat it up. Play was over.

SPORTING COMMENT

BY FREE LANCE

The Red Sox are playing good ball in the field. Brantford has won for two consecutive days. More cheers and then some.

Fans actually cheered the melodramatic finish yesterday, and they had a right to. Rather remarkable the way Coose is catching. He threw five men out yesterday.

Did you ever see a lot of grown-up children go crazy? They did yesterday at the ball park. If Brantford had been playing with Hamilton all season we would be at the top of the league.

Rube Schuyler knows to-day that a pitcher with a glove, a prayer and a smile can't get by always. Knotty Lee was not on the bench yesterday. It is to be hoped he had a profitable day with the bangtalls.

Ambrose Kane made a hero out of himself yesterday, but wait until he strikes out next time and hear the gang roar. We wish to announce just when the Red Sox will win another game, but believe, honestly, the present club will win several before the season is over.

We wish to congratulate J. Ira Davis, umpire, on his good behavior. "Slats" is irrepresable at all times, and perhaps the heat had a depressing effect on his temperament yesterday. The man has marvellous luck in calling close decisions, and it is marvellous how he counters any argument from a player. "If you don't want my friendship, have the other stuff," said Davis to Red Fisher yesterday. "Well," replied the big backstop, "I hate worst of all being robbed by my friends." At another period some one suggested that Davis hurry up. "There ain't nothing in the rule book which says J. Ira Davis has got to hurry." And there you are. This is Davis, the umpirical undertaker, whose repertoire is a mixture of good, bad and indifferent.

COCKNEYS TAKE PETES INTO CAMP

Heavy Hitting and Bad Fielding by Opponents Gave London the Game.

OTTAWA BEAT BERLIN

LONDON, July 29.—London won the first game of the series from Peterboro yesterday, heavy hitting by the Indians coupled with bad fielding by the visitors, being responsible for the result. The battle was witnessed by a large crowd, and the team is now being given excellent support here. In order to make the directors still better satisfied, Mayor Graham has declared a public half holiday for Wednesday afternoon and a big booster's day is promised. The score:— Peterboro . . . . . 100000031—5 London . . . . . 002002228—8

OTTAWA DOWNED BERLIN

Shanahessy's Triple, in the Third, Was the Dutchmen's Undoing. BERLIN, July 29.—When Frank Shanahessy leaped onto one of Pitcher Schaeffer's offerings in the third inning he clouted the ball for three bases and drove in three runs ahead of him in the first of the Ottawa series yesterday, which the Senators copied by 5 to 3. Dolan then scored Slag with a single. It was Schaeffer's only weak period, the four counters being called on as they came in a pass. The other Ottawa run came in the sixth, when Smukly reached first on an error and registered on Renfer's two-base drive. Past fielding by White's Hopps in the fifth and eighth cut off at the plate what looked like runs for the visitors. Berlin was badly outbid by the ors. Berlin was badly outbid by the ors. SAINTS DEFEAT GUELPH

ST. THOMAS, July 29.—The Saints pulled some inside baseball off in the seventh and eighth innings of yesterday's game, and won the opening game of the series from Guelph. In the seventh, with one man down, Fryer let Baker's long drive get away. Kopp and Ort singled, and Baker scored. Kopp going to third. Kustus bunted and Kopp was squeezed in. Wright also worked the squeeze play, bunting towards first, and Ort crossed the plate. In the eighth, Forgue got a hit, and was worked around to third. With only one out, Ort laid down a pretty bunt, and Forgue scored. Dopbeck and Baker were the opposing twirlers, the visiting twirler having the best of the argument up to the seventh. Baker settled down after the fifth and pitched great ball. Scout Hickman of the Cleveland Americans, sat in the stand. He stated that he was impressed with the playing of both teams. He liked the work of Outfielder Kopp and Third-baseman Eddie Wright. Hughey, formerly of the Kalamazoo Club, will likely pitch for the Saints to-day. Score:— Guelph . . . . . 00111000—3 St. Thomas . . . . . 00010031—5 13 0

PHILLIES BEAT PIRATES

PITTSBURGH, July 29.—In the third inning, with Simon on first base, Carey hit for a home run, and thereby saved the Pirates from a shut-out. The final score was 6 to 2 in favor of the Phillies. After that only one Pirate reached second base and he was Wagner, who was allowed to get to second in the ninth inning, all attention being devoted to the batter. By innings:— Philadelphia . . . . . 202001100—6 Pitts . . . . . 002000000—2

ST. LOUIS WON FROM WASHINGTON

Browns Broke Southpaw Boehling's Long String of Victories. WASHINGTON, July 28.—St. Louis broke Boehling's string of victories here, yesterday, handing the Washingtons a 4 to 1 defeat. Up to yesterday afternoon the young southpaw had won eleven games without a defeat. The Browns scored three runs in the first innings from Boehling, walked Shooter, Pratt singled and Williams hit over Milan's head for a home run. Mitchell the St. Louis pitcher, was a puzzle throughout, and came through with aid-right pitching in the pinches. By innings:— Philadelphia . . . . . 202001100—6 Pitts . . . . . 002000000—2

Bowling

At the Bowling Tournament in Buffalo the Brantford rinks were up and down.

In the first round for the Trophy: McGuire, Buffalo, defeated Husband, Heathers, 20-5. Hallister, Buffalo defeated Turnbull, Brantford Club 13-8. Carnahan, Toronto Granites defeated Tench of the Heathers 16-12.

CINCINNATI BEAT BROOKLYN

Long Drives and Loose Fielding Characterized the Game. CINCINNATI, July 29.—In a game replete with long and loose fielding, Cincinnati overcame a first-inning lead attained by Brooklyn early in the second, and the locals won their first game of the series 7 to 5. Packard, twirling for Tinker's squad, had one bad inning. Yingling was touched lively, giving way to Allen, who shared a like fate, and it was only when Slack was pitted against the Tinkers that the swatting ceased. Score by innings:— Brooklyn . . . . . 04000010—5 Cincinnati . . . . . 00312100x—7

PHILLIES BEAT PIRATES

PITTSBURGH, July 29.—In the third inning, with Simon on first base, Carey hit for a home run, and thereby saved the Pirates from a shut-out. The final score was 6 to 2 in favor of the Phillies. After that only one Pirate reached second base and he was Wagner, who was allowed to get to second in the ninth inning, all attention being devoted to the batter. By innings:— Philadelphia . . . . . 202001100—6 Pitts . . . . . 002000000—2

ST. LOUIS WON FROM WASHINGTON

Browns Broke Southpaw Boehling's Long String of Victories. WASHINGTON, July 28.—St. Louis broke Boehling's string of victories here, yesterday, handing the Washingtons a 4 to 1 defeat. Up to yesterday afternoon the young southpaw had won eleven games without a defeat. The Browns scored three runs in the first innings from Boehling, walked Shooter, Pratt singled and Williams hit over Milan's head for a home run. Mitchell the St. Louis pitcher, was a puzzle throughout, and came through with aid-right pitching in the pinches. By innings:— Philadelphia . . . . . 202001100—6 Pitts . . . . . 002000000—2

NEW YORK WON FROM ST. LOUIS

Mathewson Pitched a Great Game, Holding Cards to Four Hits.

CHICAGO WON 9 TO 4

ST. LEWIS, July 29.—Mathewson pitched unbeatable ball against St. Lewis yesterday, the result being a victory for New York, 4 to 0. New York scored four runs off Harmon in seven innings. Recruit Doak held the champions hitless and runless during the last two rounds. After getting off to a bad start by walking the first two men, Harmon steadied, and was almost as good as "Matty" for six innings, but he weakened in the seventh. Score:— New York . . . . . 100001200—4 St. Louis . . . . . 00000000—0

WORKED THE HIDDEN BALL

CHICAGO, July 29.—Though it is frazzled and yellow with age, that time-worn hidden ball trick was sprung on Connelly, of the Boston Braves, in the ninth inning of yesterday's game with the Cubs just in time to nip in the bud a batting rally that bade fair to spill the beans for the Cubs, who were 9 to 4. In the early stages of the contest the Cubs slammed Tyler to all corners, and he was forced to hike for the tall timbers, during which time they annexed seven hits. Noyes succeeded him and held the Cubs runless, but the Braves had gotten to Humphries, who pitched for the Cubs, for only two runs and six hits. Score:— Chicago . . . . . 31141000—9 Boston . . . . . 010001002—4

REASON WHY PITCHERS CAN CONTROL BASEBALL

The real reason why a baseball can be thrown so that it will describe wonderful curves during its progress through the air is that every such ball has a surface made up of mountains, valleys, craters, canyons, gorges, plains and other irregularities of the surface that, when the difference in size is taken into consideration, makes the surface of the earth seem like plate glass. If it were possible to make a perfect sphere—if it were possible to make a baseball with an absolutely smooth surface and an exact sphere—no pitcher in the world could make it curve. The very best pitchers baseball has ever known or probably ever will know could not make the ball deviate a hair's breadth in its flight. And so while it is partly in the art or knack the professional pitcher has in holding it, it is also due to the fact that a baseball has a wonderfully rough surface, against which the air catches and turns it, that gives it the curve. If you pass your hand over a plate glass it moves smoothly with nothing to retard it. If you pass your hand over an unplated board you can feel the roughness. Splinters, we call them. You can move your hand as easily over the board. This is the same principle with the baseball. There is a roughness to its surface that catches in the air and forces one side about or retards that side. This has but one result, to make the baseball leave its straight course and in doing this it describes a curve. This does not detract in the least from the cleverness of the pitcher who can so accurately judge his muscular control, as to make a baseball curve up or down, right or left, or, in the parlance of the fan, he throws a "drop" or an "in-shoot" or "out-shoot." But the fact remains that it is the roughness of the baseball that makes all his pitching cleverness possible. Take a brand new league ball in your hand. If looks to be a perfect sphere, that is, absolutely even, and

uniformly round, and as "smooth as glass." And it has a rough surface. Put a baseball under the most powerful microscope, enlarge it microscopically 10,000 diameters, and what do you see? The very thing mentioned in the first paragraph of this article. The surface is rough. It looks like the landscape in the Alps or Yellowstone Park, or the Bad Lands, or the Giant Canyon, or the Andes, or any other rough section of the earth. It has peaks, ranges, ridges, valleys, planes and poles, gulches and all parts of uneven faces, and if the earth could be made as small as a baseball it would be practically a perfect sphere and absolutely smooth. This is because the highest mountains of the earth or the deepest valleys would be millions upon millions of times smaller in comparison with the rough, uneven places on a baseball if either the earth were reduced to the size of a baseball or a baseball enlarged to the size of the earth. If this were not true the earth would not revolve so regularly upon its axis. It would perform an "inshoot" or "out-shoot" and curve off through space. In our drawing of a bit of the surface of baseball, magnified 10,000 diameters, it shows rugged mountain peaks and deep valleys and craters, such as has never been duplicated on our earth's surface. The tiniest of germs, a billion of which might easily inhabit a drop of blood, would find it so laborious climbing the surface of a dry baseball that he would succumb of exhaustion. The air strikes the rough edges. This will force it out of its straight course. Of course, every one knows the pitcher controls the ball, giving it the sort of curve he desires by his grip of the ball, his peculiar muscle action in holding, throwing and releasing. Even the billiard ball has a surface much rougher in comparison to its size than the surface of the earth, and we refer to a billiard ball as about the smoothest thing known. "As smooth as a billiard ball" is a well-known simile. For the same reason that a perfectly smooth baseball could not be curved, a perfectly smooth ball could not be made to curve off the table. It would not take "English," as billiard players call it when they make a ball go forward and then roll backward, or in any direction by the manner in which they strike it with a chalked cue. This fact of roughness causing it to spin becomes all too evident when a player forgets to chalk his cue and the leather top of the cue becomes shiny, it will slip on the ball. There is no purchase with which it can take hold. But chalk is sticky stuff, and the granules are large, so that a well chalked cue fits into the rough projections on the ball and thereby a ball can be given a lot of twist. In order to accomplish this successfully, moreover, the billiard cloth nap must be new and therefore rough. During recent experimentation with regard to the kinetic theory of gases, a Belgian scientist desired to find out how a perfect sphere could be made

in order that by the clashing of these together an idea might be secured of the effect of the collisions of the spherical atoms that made up a gas. The project had to be abandoned at last, because no machinery could be constructed that would turn out perfect spheres of large nature in all her many forms of matter. Perfect disks could be made, but a round ball was beyond the limits of human accomplishment.—New York American.

GOT SPEED ON THE FARM

Walter Johnson Says Work Kept Him Rugged WASHINGTON, July 29.—Walter Johnson, who does not make it a rule to talk about himself, offers the following explanation of the wonderful form he has shown this year. "I was born on a farm, and I love the life. A good many ball players don't, but I do. When the baseball season is over I go back to our farm out in Kansas and work on the place right through the winter, just like any of the men. I get enough of the big towns and the bright lights during the summer, and I am glad to get back to the farm and do farm work just as soon as I can. And I always hate to come back east every spring to begin playing baseball again. "The result is that in the spring I am just as hard as I was in the fall. Instead of hanging around hotels and poolrooms in some big city, like so many players do, I am out on the farm getting up every morning before daylight and going out to help feed the stock. Then I come back into the house for breakfast, have a good, healthy appetite, and eat accordingly. After that there is a lot more work to be done around the place. I put in a good hard day every day in the week, and by the time night comes I am ready to turn in early, for I know that the next morning I must get up just as early and start out again. I am in a habit, sometimes with the thermometer way below zero, for we have it cold out that way lots of the time during the winter. I don't do so much because I have to as because I like to, and I haven't yet run across any ball players with whom I would swap places during the off-season."

LEAFS BUNCH HITS OFF HOODOO LEE

Scored Five Runs in the Eighth Inning Off the Newark Southpaw.

THE SCORE WAS 7 TO 1

TORONTO, Ont., July 29.—The veterans of 1812 turned out yesterday in goodly numbers in hopes that their former comrade, Wyatt Lee would twirl for the Indians in the closing game of the series, and they were not disappointed, as the ancient hoodoo of the Leafs took the night with fire in his eye and whiskey on his chin. Baseball averages were against Wyatt repeating, owing to Newark having won three straight and the figures failed to lie, as the said Wyatt was lambasted to thirteen different directions, and just to make the job complete the locals in their last turn with the willow gave Mr. Lee a five-run drubbing, thus bringing the Leafs' total up to seven, while the visitors could only secure one, and that one on an error. The score: Newark.....001000000-1 Toronto.....01001005X-7

JERSEY CITY BEAT ROCHESTER

Skeeters Made Five Runs in the Sixth Innings. ROCHESTER, July 29.—Jersey City turned on the Hustlers yesterday and won by 7 to 2. In the sixth inning on five hits, two errors and two sacrifices, they scored six runs. They hit the ball snuffly and knocked Quinn from the mound. McHale pitched grand ball all the way. Tom Fogarty, president of the Skeeters and Larry Schaffly, their manager, left the club this morning on a scouting expedition. Bill Purcell is now in charge. Score: Rochester.....200010000-2 Jersey City.....000106000-7

BUFFALO WON FROM PROVIDENCE

BUFFALO, July 29.—The Bisons put the rollers under the Grays in the last game of the series here yesterday, and with George Matteson, a former Buffalo semi-professional pitcher, in the box, trounced the Donovan clan by 5 to 2. Cricket

Grace church met with their second defeat by Paris this season, on a Saturday afternoon at Paris.

It was again clearly demonstrated that Brantford cricketers are weak with the bat, as the Grace Church bowling was in every way as good as that of Paris, but when then it was their turn to make runs then it was easily discernable where they were outclassed. Until Brantford cricketers show a little more enthusiasm for the old game by turning out oftener to practice they cannot hope to make a better showing.

The bowling of Bee for Paris and that of Chamberlain for Grace Church was on a par and among those who showed up well with the bat were: Drake, England and Thurman for the at home team and the one and only worthy of mention for the visitors was Napier, which was the more remarkable as it was his first appearance at the game this season. Scores: Paris: England.....24 Thompson.....26 Drake.....26 Oldham.....15 Thurman.....15 Hambleton.....4 Davey.....2 Bee.....2 Eccles.....0 Verity.....10 Febery.....11 Extras.....1

NO DRINKING MAN NEED DESPAIR

The Neal Cure—Greatest of All Modern Discoveries—Offers a Means of Escape from the Curse of Drink. A cure of the Drink Habit is Guaranteed in Three Days no Matter Whether the Patient is a Hard and Constant Drinker, Social Tippler or Goes on Occasional Sprees.

There was wandering in the streets of Toronto lately a homeless man, who at one time held a splendid position, but drink was his downfall. To-day his wife, a cultured woman, works out by the day, endeavoring to support herself and little family. Think of it, you wives and mothers, who have homes of comfort and all that makes life worth living, what it would be to you to be deprived of these and forced to face the wash tub for an existence, as this poor wife has to do to-day? But this home which was made a hell on earth through strong drink—as every drunkard's is—may be made into a heaven upon earth, as many have been made, as a result of the Neal Treatment. Three days only—the wonder of it—effect a cure and make the victim of strong drink a new man, physically, morally and mentally. We undertake to guarantee to effect a cure of the Drink Habit in Three Days, no matter whether the patient is a hard and constant drinker, social tippler, or goes on occasional sprees. Are you interested in a poor fellow going down, down, through the curse of drink? Then bring your influence to bear on him and bring him to the Neal Institute for treatment, drunk or sober, and we will undertake to remove the awful appetite for strong drink and deliver him to you a new man. Here is an opportunity for REFORMATION SOCIETIES for INEBRIATES or any institution for the reformation of the drunkard, to test our ability to change the hard drinker into a new man, physically and mentally, in THREE DAYS' treatment. We invite these Societies or any institution interested in the poor drunkard and the problem of dealing with him, to send us for treatment any victim of the drink habit; it makes no difference how much enslaved, and we guarantee to effect a cure in each and every case. Can you spend your money to better advantage or in a way that will bring in greater returns than in redeeming these victims of strong drink and giving back to their families kind fathers, brothers, husbands, and to the country most desirable citizens?

Dry August Forecasted By Foster

But Storms are Predicted Early in the Month.

WASHINGTON, D.C., July 29.—Last bulletin gave forecasts of disturbances to cross continent July 29 to August 2, warm wave July 28 during that week, rains will fall in many places and the storm forces will be more than usually intense.

The next disturbance will reach the Pacific coast about Aug. 2, cross Pacific slope by close of 3rd, great central valley 4th to 6th, eastern sections 7th. Warm wave will cross Pacific slope about August 2, great central valleys 4th, eastern sections, 6th. Cool wave will cross Pacific slope about August 5, great central valleys 7th, eastern sections 9th.

As storm of July, but this storm will be of greater than usual force, particularly August 3, 4 and 5 about and before the storm wave reaches meridian 90. Rainfall will be generally short, particularly in the southern states. Our predictions of July rains proved good and greatly benefited corn and spring wheat. We expect a dry August to damage corn and cotton. Indications are that most of the August precipitation in great central valleys will occur during the weeks centering on August 1 and 13 and in eastern sections during the weeks centering on August 1 and 19. Very warm weather is expected during the weeks centering on August 8 and 25.

Farmer and planter should not sell the new crops of grain and cotton till later. We hold that prices will go higher. Many combinations have operated against good prices and those who have interests in the new crops should not part with them while the crops are growing.

The Balkan war disturbed European finances and sent American securities back to this country causing financial weakness here. The tariff revision causes some financial uneasiness. In the nature of governmental affairs the change of administration is always a disturbing element. Above all other influences is the undoubted fact that in all governments, the people are reasserting their lost rights, a change of base is being affected, and such changes always affect the finances.

These financial furries have kept prices of grain and cotton down, but those influences have spent their force. Have failed to cause a panic. The effects of these financial furries will soon pass, and a very large demand for all products of the soil and of manufacturing will prevail through 1914.

While the crops of grain and cotton will be sufficient they will not be large as compared with population and demand. Mexico is not producing and must be fed and clothed. The Panama canal will open up new territory for our products. Many other facts tell us that prices of farm products must go up, and therefore every farmer and planter should hold his products for better prices.

LOVES SWEET DREAM. It was indeed a beautiful night. The gentle zephyrs played musically amid the delicate fronds of the turnip-tops and waited from the far distant fields the subtle perfume of luscious onion and the fragrance of decaying cabbages.

"Betsy," he whispered, as they sat together on the ferns surrounding Mr. Filigan's pigsty, "Ow betsy, betsy, bet just think of it, Betsy. When we are married we will have a pig of our own! Think of that Betsy!"

"Jan," she whispered, a note of resentment in her voice, "what do I care for pigs? I shan't want a pig when I've got you!"

Then all was silent once more, save for the musical frolics of the zephyrs already mentioned.

SECRET LETTERS FORMENT SRIE FOR MILITANCY How Suffragettes Plan to Simulate Public Indignation LONDON, July 29.—Secret letters from the headquarters of the Women's Social and Political Union have come into the possession of the Daily Mail. They outline a new plan of campaign, and show how suffragette enthusiasm, and public indignation may be simulated.

The letter which is printed below, is a revelation of how the agitation is fomented. The letter had been sent to a few organizers throughout the country, and is dated from Lincoln's Inn in Kingsway, on June 26, 1913. It is as follows: "Dear Friend,—We have already written to you telling you that all energies must now be concentrated on the Cat and Mouse bill. All who down the Cat and Mouse bill are using the greatest weapon that they have at their disposal at the present time to bring about the political enfranchisement of women.

"We hope that you will do all in your power to carry out the following schemes: (1) Get many letters of protest written to members of Parliament in your district on this question. (2) Deputations ought to go to members (Suffragist or anti-Suffragist) of Parliament on the question. (3) All political organizations and all women's organizations ought to be approached. (4) Meetings of protest ought to be held in every town and city with some prominent person in the chair, even though he does not approve of our methods. (5) Perhaps you could get one or two people from your circle to come up to London to lobby, as there is now only a little over a month before the House will be rising. (6) All progressive groups, such as the Fabian Society and Socialist groups should be approached. (7) The press should be flooded with letters and articles and all editors should be called on. (8) Special work should be done among the clergy, doctors, and all prominent people, who should be urged to write letters to the local press, but to use all their influence with members of parliament, also with Mr. McKenna and the Prime Minister.

"This matter is urgent, and therefore we feel sure that you will present your attention to it at once. We shall be glad to hear from you on the subject. Yours sincerely, "GRACE ROE." Another letter, written to follow up the first, contains these among other suggestions: "Letters should be got into the local papers. It is very desirous to interview editors and impress upon them that whatever they think about militancy this recurrent torture of Suffragist prisoners is a disgrace to our country."

Here Sweetwater sat and commended with his great monitor. "I'm not sure all I can ever make or can ever hope to have. If it succeeds, we save Frederick Sutherland; if it fails, I have only to meet another of Knapp's scornful looks. But it won't fail. The inspiration came from the sea, and the sea, you know, is my second mother."

What this inspiration was he did not say, but it carried him presently into town and landed him in the telegraph office.

The scene later in the day, when Frederick entered the village under the guardianship of the police, was indescribable. Mr. Sutherland had insisted upon accompanying him, and when that well-loved figure and white head was recognized the throng which had rapidly collected in the thoroughfare leading to the depot succumbed to the feelings occasioned by this devotion and fell into a wondering silence. Frederick had never looked better. There is something in the extremity of fear which brings out a man's best characteristics, and this man, having much that was good in him, showed it at that moment as never before in his short but overeventful life. As the carriage stopped before the courthouse on its way to the train a glimpse was given of his handsome head to those who had followed him closest, and as there became visible for the first time in his face, so altered under his troubles, a likeness to their beautiful and commanding Agatha a murmur broke out around him that was half a wail and half a groan and which affected him so that he turned from his father, whose hand he was secretly holding, and taking the whole scene in with one flash of his eye, was about to speak, when a sudden hubbub broke out in the direction of the telegraph office, and a man was seen rushing down the street holding a paper high over his head. It was Sweetwater.

"News!" he cried. "News! A cablegram from the Azores! A Swedish sailor!"

But here a man with more authority than the amateur detective pushed his way to the carriage and took off his hat to Mr. Sutherland. "I beg your pardon," said he, "but the prisoner will not leave town today. Important evidence has just reached us." Mr. Sutherland saw that it was in Frederick's favor and fainted on his son's neck. As the people beheld his head fall forward and observed the look with which Frederick received him in his arms they broke into a great shout.

"News!" they shrieked. "News! Frederick Sutherland is innocent! See, the old man has fainted from joy!" And caps went up and tears fell before a mother's son of them knew what grounds they had for their enthusiasm.

Later they found they were good and substantial ones. Sweetwater had remembered the group of sailors who had passed by the corner of Agatha's house just as Betsy fell forward on the window sill and sobbing to the captain of the vessel at the first part at which they were likely to put in was fortunate enough to receive in reply a communication from one of the men who remembered the words she shouted. They were in Swedish, and none of his mates had understood them, but he recalled them well. They were: "Hjelp! Hjelp! Frun haller pa alb dodra sig. Hon har en knif. Hjelp! Hjelp!"

In English: "Help! Help! My mistress kills herself! She has a knife! Help! Help!"

The impossible had occurred. Betsy was not dead, or at least her testimony still remained and had come at Sweetwater's beck from the other side of the sea to save her mistress' son.

Sweetwater was a made man. And Frederick? In a week he was the idol of the town. In a year—but let Agnes' contented face and happy smile show what he was then. Sweet Agnes, who first desisted, then encouraged, then loved him, and who next to Agatha commanded the open worship of his heart.

Agatha is first, must be first, as any one can see who beholds him on a certain anniversary of each year bury his face in the long grass which covers the saddest and most passionate heart that ever yielded to the pressure of life's deepest tragedy.

# "YOUR HEALTH IS— —YOUR WEALTH"

DO NOT TRIFLE WITH THE HEALTH OF YOUR FAMILY

THE BROOM NO LONGER IS GOOD FOR ANYTHING BUT FUEL. INSTEAD OF CLEANING, IT JUST STIRS DIRT UP INTO THE AIR. THE DIRT NATURALLY SETTLES BACK ON THE FLOOR OR FURNITURE, THEN YOU MUST "DUST"—A TERRIBLE, STRAINING PROCESS.

THEN, TOO, THIS DIRT YOU STIR INTO THE AIR IS VERY DANGEROUS. IT IS LADEN WITH DISEASE GERMS AND YOU AND YOUR TOTS BREATHE THEM. THINK OF THAT!

THINK WHAT IT MEANS to the housewife to have the Cleaner run over her floors once or twice a week instead of sweeping them with a broom or carpet sweeper. Realize how absolutely clean she will keep every inch of her carpets with less effort than the old efforts require, dispensing forever with house-cleaning days, keeping her home clean ALL THE TIME, just the same as it was right after house-cleaning time of yore.

## Men's Work Has Been Lightened and Systematized by Means of Labor-Saving Machinery Why Not a Woman's?

Dr. Kellog, President of the Battle Creek Sanitarium in One of His Lectures, Stated:

"Excessive loss of life of infants, aged from three months to four years, is caused mainly by the mother permitting the child to play on a carpeted floor, filled with street dirt, which contains millions of microbes that are brought in on the feet and ground into the carpet. It is criminal to let a child play on a carpet unless it has been 'vacuum' cleaned."

Prof Rodugres, United States Expert Consulting Engineer, After Thoroughly Examining Our Machine Says:

"It is the first hand-power cleaner that I have examined that pleases me. The principal is mechanically correct; the construction is based on exact scientific principles. It not only removes all dirt and dust, but, on account of the excessive air displacement and continuous suction, removes the dirt and filth from under as well as from the top of the carpet with less effort than any other vacuum cleaner I have ever examined. In fact, it is the most complete dirt eater I have ever seen. The material used and the construction are both so nearly perfect that it is practically indestructible. If you will think for a minute, you will realize that a number of diseases are caused by germs and microbes in the filth brought into the house by dogs, cats, rats, flies, and the filth off your feet. Among the diseases that can be mentioned are diphtheria, typhoid fever, smallpox, scarlet fever, measles, whooping cough, grippe, spinal meningitis, pneumonia, erysipelas, cholera, yellow fever, malarial fever, tuberculosis, tonsillitis, cholera infantum, and a number of others. Were it possible to show you by means of the magnifying glass the filth and germs that are lodged in your carpets and rugs, you should be so frightened that you would immediately order a vacuum cleaner or abandon your carpets and rugs. Do not trifle with the health of your family!"

If you have no vacuum cleaner, in justice to your family's health, have a demonstrator call to-day. It will cost you nothing, and you will have a sanitary home. It is a health saver, labor saver, and money saver. It can be used every day, and does not wear the nap off the carpet, like ordinary sweeping; nothing to get out of order, runs quietly, a child can run it, and will last for years.

J. M. Werzke, A.M., M.D., the world's recognized authority on bacteriology, in a recent lecture, said:

"If all carpets and rugs were kept thoroughly cleaned, and all windows and doors thoroughly screened, our mortality from infectious diseases would be reduced 90 per cent; in fact, all Municipalities should enact laws to compel each householder to adopt and use a vacuum cleaner."

The Brantford Daily Courier has made arrangements to place a number of 1913 WIRELESS VACUUM CLEANERS. These cleaners are equipped with three bellows which are operated from backward and forward motion of the machine. For free demonstration telephone the Courier Office. Both phones 139.

### MOVIE FILMS THAT MAKE FLESH CREEP

Uncensored Pictures in Rural England—Many Scenes of Horror are Depicted.

LONDON, July 28.—"I spoke to a boy about twelve years old who attended a motion picture show in a little country town a week or two ago, and he positively trembled as he reported what he had seen. He said, 'I shall never go there again. It was horrible.' I said, 'What was horrible?' He said, 'I saw a man cut his throat.'"

"This is no exaggeration," says Canon Rawnsley, a well known poet and minister, who is heading a big agitation in England against unwholesome motion pictures. "It was told to me personally, and is really only one of a number of incidents that have come under my notice this month, proving that there is passing over England a real craving for scenes of horror."

Amongst the titles of films which are being, or have recently been exhibited, he instances the following: "Massacre: A Terrible Tragedy," "The Wheel of Destruction," "The Auto Race. The auto when going at a prodigious rate overturns, and buries its living occupants."

"Dogs Killing Rats in a Rat Pit," "A Public Execution in the East." To those picture proprietors who maintain that their exhibitions are for the moral improvement and amusement of the masses, Canon Rawnsley replies: "Look at your posters and the items of horror or fierce excitement or degrading sensationalism which, in spite of the British censorship, are still being exhibited up and down the country to the detriment and discouragement of the nobler feelings of gentleness and compassion."

"The worst of it is," he adds, "that neither the police, nor the agents of the motion picture firms who present out as exhibitors are sufficiently educated to know what is horrible and what is not."

"What the public really need is that in every town where motion picture halls are springing up like mushrooms there should be trained inspectors, men and women, who should know at a glance a down-grade or demoralizing film, and should at once report it to headquarters."

"If," he adds, "the English people wish to commit race suicide they can do it by overtaking the brain energy of the very young; and never has human ingenuity invented a device more efficacious for this sinister end than the motion pictures."

"Further, I have seen it stated by a scientific expert that one of the results we must look forward to is a development of the disease of the eyes, and he incidentally mentions that one of the symptoms of this pleasing complaint is an increased activity of the lacrimal glands."

"If this is true—and it is quite credible—let us contemplate the England of the next generation as peopled by men and women who have had their nervous systems spoiled by their imaginations ruined, their curiosity crushed, in order to learn one thing only, viz, how to weep at nothing at all."

THEY ALWAYS HELP THE OLD FOLKS

Why Mrs. Dionne Praises Dodd's Kidney Pills. Fine Old Quebec Lady Was Wasting Away When She Turned to Dodd's Kidney Pills and Found a New Lease of Life. ST. MATHIEU, Rimouski Co., Que. July 28.—(Special)—"Publish it to all the world that Dodd's Kidney Pills cured me." Those are the words of Mrs. Dionne, an old and respected resident of the place. And sure that cure was a wonderful one. Mrs. Dionne had reached the advanced age of sixty-nine years when all health overtook her. From 184 lbs. she wasted away till she weighed only 120 lbs., and she was a very old woman, indeed. Speaking of her case she says: "My back and head ached, my heart troubled me, my sleep was broken and unrefreshing, and I perspired freely at night. I also had a pressing or sharp pain on the top of my head, and I found it difficult to collect my thoughts."

"It was at this stage that Mr. Dionne concluded that her trouble came from her kidneys, and she turned to Dodd's Kidney Pills. The first box helped her. She took twelve boxes, and is cured."

Dodd's Kidney Pills always help old people, because when the human body starts to wear out, the kidneys are the first to go. Dodd's Kidney Pills always cure the kidneys.

Nine men working below at Glespi-Pit, in Lanarkshire, were rescued during the recent floods. The flooding became rapidly so alarming that rescue parties were at once got together to get the men to the surface. This was accomplished with great difficulty, the last man, who was brought to the surface in a state of collapse, being almost immersed when he was rescued.

OVERALLS THE STYLISH FOR GRAVE

Sextons Throw Upright Rather Than White Glove

PITTSBURG, Pa., July 28.—(Special)—"I am declaring that they would their clothes every time procession entered the cemetery. It was made monkeys of the two sextons of the Mount Pleasant cemetery—George Joseph Sturz—have quit."

John McAdams, secretary of the Cemetery Association, at ruling that graveyard sextons must wear white gloves. Reese and Sturz, excavating graves in overall suits, immediately quit. "I'd rather dig my own grave than wear white gloves," said Secretary McAdams. He is for the next funeral, and, it is said, he will wear white gloves at the service.
