FATHER AND SON DROWNED A Parent Perishes with his Bey in an Attempt to Save Him.

KINGSTON, June 27.—This evening Christian Becker, of the firm of G. M. Weber & Co., piano makers in this city, was drowned at Kingston mill while trying to save his little son. It appears Mr. Becker's son was out bathing, a line being put out of the boat for him to keep hold of. He lost his hold and was in danger of drowning when the father jumped out of the boat to rescue him, causing it to capsize. They both struggled in the water trying to make for the shore, but the unequal weight of the boy was too much, and both were drowned.

VIOLENT STORMS IN ENGLAND. Several districts have been visited by severe thunderstorms in the midland counties, and much damaged by a violent down pour. At Sutton, near Birming-ham, a violent storm broke over a volunteer's encampment during a sham-fight. The whole sky was overcast, and rain descended in torrents. A storm of thunder and lightning followed WEDNESDAY, JULY 7TH. 1880.
For particulars apply, enclosing 8 cent stamp, to commencement the lightning struck a centre-pole in the officers' mess tent, and thence passed into the tent from an anterom where the band was practising and a group of ladies had sought shelter from the storm. The band had just finished playing a selection of music when the flash came and the tent seemed to be filled with sulphur. The bandsmen had soarcely time to remark this before a second flash came. The bandsmen had soarcely time to remark this before a second flash came. The bandstands were thrown to the ground, and the man who played the big norn was rendered insensible, being struck in the face. Two gentlemen and one lady were seriously injured. Another lady was struck on the neck. Eight or nine others received injuries. It is thought that the firing of artillary during the than nine others received injuries. It is thought that the firing of artillery during the sham fight had some effect in attracting the storm. At Dowerhampton the rain fall in torrents from 6 till 9. At Guildford, near Rye, two men and a boy who had sought shelter in a hut were killed. Two other men were injured, one having a piece cut from his ear. Whole streets were flooded at Derby and Nottingham. A fearful storm raged at Selkstone. At the post office a lightning conductor belonging to the telegraph was struck by the fluid and exploded with a report like a cannon. The apparatus was completely destroyed. The metropolis was visited by several heavy showers of rain during to-day. The spire of Alton church, Hampshire, was struck by lightning, the shingles which covered the spire being removed in a zigzag line from the top to the bottom.

The CLAIMANT'S CASE.

The case of Arthur Orton, who failed in his attempt to personate Sir Roger Tichborne and was convicted on two indictments and sentenced to seven years' imprisonment on each, came up on a writ of error. Plaintiff's counsel argued that the sentences should have been concurrent,

A ROTTEN BUT COSTLY STRUCTURE, A ROTTEN BUT COSTLY STRUCTURE.

The Houses of Parliament are in a crumbling condition of decay, and although only comparatively a few years cid, and erected at a cost of six million pounds, they are found inadequate to the present requirements. The result is that a new habitation with sufficient accommodation he agitated for. It is not likely, however, the present Premier will suggest the expenditure of a cother six millions of money.

ANOTHER TEMPERANCE TRIUMPH, In the House of Commons the motion of Stevenson, Liberal, for closing public houses on Sunday in England and Wales, was adopted by 153 to 117. The Govern-ment opposed the measure.

At Bandon, the election of a member of Parliament resulted in the return of Mr. Allman, a Liberal, who polled 216 votes, Mr. Payne, Conservative, polling 172. This is a Liberal gain. An election was also held at Dungannon, Mr. Dickson, Liberal, receiving 132 votes, and Mr. Knox, Conservative, 128. The new member is a son of the member unstated.

THE CLAIMANT'S CLAIM DISALLOWED. In the Court of Appeal Lord Justice James denied the application of the Richborne claimant to have his two sentences made concurrent. Lord Justice Bramwell said he thought the American Tweed case cited justified the Attorney-General in Issuing his fiat for a writ of error in this case, but it was plain there was no error in the sentence. was no error in the sentence.

Another despatch says several Jesuits have left for England and Christians. Four numeries have asked the Government for equal anthorization as the Government for equal authorization as religious bodies.

BAST ROUMELIAN ATROCITIES. A commission composed of four Bulgarians, three Turks, and three foreigners, have investigated the recent at cotties upon Mussulmans committed by the East Roumelian militia at Kirdjali, on the East Roumelian frontier. The commission say 16 Mussulmans were killed, 12 without colourable protects and also record the cocelourable pretext, and also report the co-currence of 60 cases of rape and much rob-bery. OUR LATE COMMANDER.

Gen. Sir Selby Smyth, late in command of the troops in Canada is shortly to be awarded a prominent appointment at the Horse Guards. The General, since his return here, has been most energetic in urging his proposed at scheme for the establishment of a permanent military force in the Dominion, and from all accounts it would appear that his proposition is not thought lightly of by the War Office authorities, provided the Coloniai Office can be made to see clearly through the scheme. No less an authority than Lord Dufferin countenances the proposition, and it is also stated in official circles that the present Governor General, the Marquis of Lorne, is in favour of it to ome extent.

After the House of Commons had signified its determination to release Mr. Bradlaugh, Mr. Labouchere visited the latter to inform him of what had occurred. Mr. Bradlaugh's impulse was to rush back to the House again and brand the Speaker. Some cooler friends, however, intervened and advised him to postpone his mock heroise to another time. Address by the Governor-General—The Ranquet in the Evening—The American Delegations. &c. QUEBEC, June 24.—The great national oelebration of St. Jean Baptiste day was in every respect successful. The weather was exceedingly fine, the heat being temin every respect successful. The weather was exceedingly fine, the heat being tempered by breezes blowing up the river. The steamboats and railroads, which ran chap excursions, brought a vast crowd of sightseers into the city yesterday, and it is estimated that not less than 20,000 strangers are domiciled here to night. The early merning boats from the villages on the north and south shores were laden to the water's edge, and the habitants from the suburbs began pouring in at daylight. The official preceedings began at 8 a.m., when pontificial mass was celebrated in a temporary chapel on the Plains of Abraham by his Grace Archbishop Taschereau, M. Gagnon, organist of the Basilics, conducted the musto, which was singularly well rendered by a choir of 750 voices, and Mgr. Racine, the Bishop of Sherbrooke, preached an sloquent sermon, in which he referred to the past glories of the French-Canadian race, their present happy condition, and their bright and promising future. The Plains of Abraham were the rallying point for the national and other societies taking part in the procession, and as each arrived on the gound headed by its band of music and carrying its banners and insignia, it was told off to its position by an official. Fully 15,000 persons had gathered at the Buttes a Neveu on the Plains when Archbishop Taschereau and his attendants arrived. After mass, the societies fell into line, and at 9 c'olock, the procession, consisting of over forty divisions, started on its journey. In the first division, which was headed by mounted members of the Cerole Frontenac, were charlots carrying orat representing the Emerillen and the Grande and the Petite Hermine, the three vessels with which Jacques Cartier salled from St. Malo on his voyage of discovery three centuries ago. is so far superior in general finish and ensemble. Miss Genevieve Ward has secured the right to produce in London Fosssen's great play of "Annie Mie," in which the Dutch company made so great an impression. The French plays appear to be as popular as ever in London, and the experiment will be made of introducing Sarah Bernhardt to provincial audiences at Manchester and Liverpool. NEW YORK HERALD BUREAU, } Paris, June 26. It may be taken for granted that the Government was in earnest when it issued the decrees of the 29th of March, at least in so far as they affect Jesuits, Unless then a miracle comes to their assistance all Jesuit establishments in France not having Jesuit establishments in France not having a special educational character will on Tuesday next be closed, and members inhabiting them dispersed. Whether the other religious communities will be treated with equal rigour remains to be seen. It is evident from a speech delivered by M. de Freycinet on Friday that the Government has all along been anxious to deal generously with them. Having, however, ostentatiously joined hands with the followers of Loyola, they must take the consequences. Great efforts have been made by the clericals within the last week or two to stir up publicopinion in their favour, but with small success. The public advocates of the congregations are so thoroughly unpopular with the mass of the nation that they do the clerical cause more harm than good.

Ottawa, June 26.—News has reached the city of an attempted murder at Buckingham. From what can be secretained it appears a man named Heney committed a breach of the peace in that village, and when Constable Morrison attempted to arrest bim Heney resisted, and finding that the officer was too much for him drew a revolver and shot him. He then ecaped, and has not been captured. The wound, it is thought, will not prove fatal. The Buckingham authorities immediately telegraphed the Chief of Police here to be on the look out for Heney, who was travelling in the direction of the city, but up to the present writing he had not been arrested.

Taking experience as the test, there can be no question about the superior quality of the "Myrtle Navy" tobacco. From the first year of its manufacture the demand for it has steadily grown. Even in the years which were marked by our business depression, there was no pause in the increase of the sale of it. In the dull years of 1876-77 and 78, the sales of it were vastly greater than in the prosperous year 1873.

A correspondent writing from Tyrconnel states that on Sunday last the special service for the 2Cth of June, the anniversary of the Queen's ascension was read at St. Peter's Episcopal church in that place. At the evening service the rector delivered a very practical and appropriate discourse from Romans xill., I. He spoke of the necessity of the existence of governments and powers, and of the duty of Christians relative to them. He mentioned and explained the patriarchal, the theocratic and the monarchic forms of government, and he expatiated on the origin of the latter at some length and the great benefits which have resulted from that form of government, especially to Great Britain and have resulted from that form of government, especially to Great Britain and Ireland. He spoke with warm enthusiasm of the transcendant excellencies of our Sovereign the Queen and of her late consort, and of the noble qualities and virtues of the Royal Family, and the great blessing accruing to us therefrom. He regarded those excellencies, virtues, &c., for which the Queen and Royal Family are so pre-eminently distinguished among the great ones of the earth, as the results of fervent prayer offered personally, and by Christians of all denominations, but especially by the Church of England, in its daily and weekly services.

The fishing outlook the present season is pronounced by parties engaged in the trade at Carleton, N. B., to be very favourable. Scarcely as many alewives have been taken by local fishermen this season as last, the catch forming 5,000 barrels of pickled fish as compared with 6 000 last year. Of this amount Mr. Frank P. Noble has packed 1,000 barrels, besides 900 barrels of smoked alewives of which the total quantity from harbour fisheries would reach about 2,500 barrels. Mr. N. has sefar received at his establishment 800 salmon—an amount somewhat in excess of

It is a very grave step to take, that of excluding a member deliberately chosen by a constituency. In England, they had warning enough of the danger in the case of John Wilkes, perhaps the most profligate and worthless demagogue since the days of Clodius. Here we have the case of William Lyon Mackenzie who was a politican of a different stamp. If Mr. Bradlaugh had not been imprisoned, but sent back to his constituents, the chances are that he would have been defeated; but as the House chose to make a martyr of him, probabilities are entirely the other way.

Its general conclusions have, however, been to a certain extent discounted by Mr. Read's utterances, in which he laid stress on the difficulties in the way of successful competition with the wheat growers of this continent, and advised the farmers to devote themselves more largely to the production of mutton and barley. Wheat prices bid fair to be low this year if the English crop is good—or in fact whether it is good or not—and there appears to be little encouragement for the agriculturists of the Old Country to persevere in an industry where they are at such a tremendous disadvantage, instead of turning their attention to branches in which no foreign competition is to be feared.

MAGNIFICENT RECEPTION

And the second s by Sir John, and to the cordiality which, in this part of the country, exists between people of the various denominations. The picnic was held in a shady grove on a point of land jutting out on the waters of the Bay. In the out on the waters of the Bay. In the morning, the large numbers who were present engaged in the amusements which belong to such meetings, and the latter part of the afternoon was devoted to the hearing of speeches from the public men present. Among those who were present, present. Among those who were present, besides the guests already mentioned, were Mr. Geo. A. Kirkpatrick, M.P., Col. McRory, M.P., Mr. McCuaig, M. P., Mr. Calvin, M.P.P., Dr. Sullivan, of Kingston, Father Higgins, Father McDenagh, and a host of local celebrities. Lunch was cerved to the visitors by the indefatigible Father McWilliams in a marquee on the grounds, where the speeches commenced. The people assembled around the temporary platform which had been cretted for the occasion. Father McWilliams acted as chairman and introduced the speakers. The rev gentleman in opening sched as charman and introduced the speakers. The rev gentleman in opening the proceedings remarked that to see so many attending his picnic gave him much pleasure. He was especially delighted to welcome to the gathering the Premier of Canada and the Finance Minister. of Canada and the first hearers who of the Bominion. His hearers who were reading people and certainly acquainted with Sir Leonard Tilley, and those who had been brought up on the Bay of Quinte maturally proud of Sir John Macdonhad been brought up on the Bay of Quinte were naturally proud of Sir John Macdonald, Canada's greatest son. Of Sir John, he might say what had been said of Cæ'ar—he came, he saw, he conquered. He came to the Bay of Quinte, and grew up with the people there. He saw Canada and the vast possibilities that were before her, and he conquered, not by the sword, as Cæsar did, but by the power of his genius and the eloquence of his tongue. (Applause.) He would say no more, but would, in concluding his remarks, present to the leader of the Government, on behalf of the people of Frontenac, Lennox, Addington and Prince Edward, the following address:—

Riehr Hox Sir,—Permit us to offer you and

RIGHT HON. SIR,—Permit us to offer you and your distinguished conferere, Sir Leonard Thiley, a most cordial welcome to this rural festival. The condescension and kinduess which induced such illustrious statesmen to grace with their presence this humble gathering affords evidence of the initimate triendship which exists between the Canadian people and their rulers, as also your desire to obtain by your own observation a knowledge of the condition of the people, to whose welfare your labours and talents are devoted.

To you, Sir John, the visit will recall many pleasing events. Here were spent the happy days of your youth. Here you acquired that physical vigour and hardy constitution which have enabled you to controot with success the severe strain and harassing influence of a long and active public life. Looking back through the long visits of sixty years, what a crowd of varied emotions must be excited, and how many events in which you have been the principal actor will come to your memory! But time will not permit of even a rapid survey of these events. You will again have the pleasure of renewing the acquaintance of some of those who knew

you in your youth, who are proud now that triendship, and to congratulate you distinguished honours you have gained at abroad.

To your distinguished colleague, adorned with the laurels of a long and honourable service to his country, high in the estimation of his fellow-country, high in the estimation of his fellow-country, he was the second of the labours of the manufacturing industries, so also he will witness the happinese that the returning tide of prosperity has given to the rural population, and thus learn from the people themselves the success of a policy whose beneficent influence is felt by all. Be assured we estimate fully the significance of the favour conferred on us by your visit to-day, and promise to cultivate that spirit of toleration and liberality, of which it has given so marked an example. example.

Receive our grateful thanks for the honour conferred and the expression of our determination to be always worthy of your favour and protection.

Signed on behalf of the people,

C. A. McWILLIAMS,

Mr. KIRKPATRICK, M.P., who was then called upon to speak, congratulated the zealous and indefatigible gentleman, Father McWilliams, who had succeeded in capturing fer the edification of the people two real live Cabinet Ministers, from whom something would no doubt be expected regarding the policy they were pursuing in the interests of the country. The line further north will run through a fine country, well settled, and able to produce grain enough to increase to a large extent the traffic on the line to Thunder Bay. It will, more over, tap the Saskatch wan country. Settlers in the Korth-West will thus have way facilities. Not only will thus have brought into contact with good markets, but they will be able to procure lumber and fuel at moderate rates, as several of the feeding lines will pierce timber districts.

Here is a sample of the operation of the free trade doctrine as given by the London World:—"It is somewhat humiliating for an Englishman to hear that the girders for the new Tay bridge are to be imported from Herr Krupp's factory at Essen, and that the raw material for these girders will very likely be mined in Sootland, within fifty miles from where the bridge is to be put up. The benzine which forms the basis of our aniline dyes is made in Parisout of raw material sant from home, and basis of our aniline dyes is made in Parisout of raw material sent from home, and many other instances of the like needless traffic could be mentioned. Moreover, whole industries have left our shores, and markets which were once peculiarly our own have been transplanted to the continent and the United States. The silklooms of Spitalfields are roaring now in Lyons, and the Clerkenwell watch has given place to the Yankee timepiece; sewing machines, type-writers, telephones and a thousand ingenious novelties, are sent us from ingenious novelties, are sent us from America as a kind of boon, and we are glad to get them for the money." Yet free traders still argue that countries possessing protective tariffs cannot successfully compete with free trade nations.

The World's Dispensary at Buffalo, N. Y., is a great institution, having its auxiliary Invalid's Hotel, for accommodation of patients, costing its founder nearly half a million of dollars, and its branch in London, England, of similar proportions, where Dr. Pierce's Golden Medical Discovery, Pleasant Purgative Pellets, and other remedies, are manufactured for the foreign trade, which extends to the East Indies, China, and other far distant countries. trade, which extends to the East Indies, China, and other far distant countries. THE HOME OF THE HOMBLESS.

Crow's Nest had become the place of refuge of Gentleman Joe, the Lefthander, Harry, and Mouse in a very simple and natural manner. When the Lefthander left the home of Mr Grantham before daylight, carrying Mouse in his arms, he went out of the town toward the mountain, the place of rendezvous which he had agreed upon with his two friends. This was a secluded spot about half-way up the slope of the Blue Ridge, on a little plateau, and not far from the stageroad, where a small stone chapel, as it was

called, stood,
Just without the enclosure was a very fine spring, which gushed up from beneath the gnarled roots of an oak; and here, be-side a cheerful fire, stood Gentleman Joe and Harry, the latter holding in his hand a rifle, which he had always carried about ch he had always carried about with him to hunt when the circus stoppe in the rural districts to recuperate, as it

"Here you are, Lefthander !" Harry ex-"And Mouse, too—but about break-fast?" said the Lefthander.
"You see, we thought of that," said Gentleman Joe, pointing to the fire, where a coffee pot was boiling, and some beef

a conce-pot was boiling, and some beer frying in a pan.

"We came here last night, and made a fire and camped out; Harry had bought the pot and frying-pan and tin cups, with some office and sugar and beef and bread, so that you, and Mouse especially, should not go without your breakfast."

The Lefthander had deposited Mouse on the roll of blankets near the fire, on which have and his father had alent. Harry and his father had slept.
"Well, that's like you, Gentleman Joe,"

he said; "you're a man of more sense than all of us. But what is she doing! What are you after, Mouse?"

"I am after my business," said Mouse, who was limping around and carefully superintending the cooking. "I'm the house-keeper—which you will please understand, and not interfere with me." The Lefthander sat down and looked at the child, as she bustled about, with a

pleased smile on his lips. She seemed to have quite forgotten her accident, and with one hand deftly raised the coffee pot from the coals, took off the fried beef, and arranged them, with a large loaf of bread at d some tin cups and brown sugar which were near by, on the greensward.
"Well, whoever saw the like!" the Lefthander said, with admiration; "here's

your little mother and house keeperess for "And we're a troupe at last, by ourselves!" said Mouse. "We'll have the hand-organ, and the monkey with the feather in his cap, after all-and I'll see the flowers and the sunshine, and carry the hat around, as I told you I would, Harry!"
"It really looks like it," said Harry, laughing; " and I see one thing plainly,

What is that, sir?" "That you're going to be manager and commander-in-chief of this troupe!" They sat down and breakfasted, enlivening their repast with jests and laughter. The air of the fresh morning seemed to fill their pulses with life and enjoyment. The sunrise bathed them in its golden beams, the birds were singing, the bivouac fire crackling; the wanderers, without a shelter, had found something like a home in this secluded nook, and enjoyed the present moment, without thinking what might be-

fall them in the future. Breakfast finished, that future demanded after Breakfast finished, that future demanded consideration. Where should they go, and what means of support could they have recourse to? Mouse's plan of organizing themselves into a troupe, with a hand-organ, a monkey, a tent, and waggon, was excellent; but, unfortunately, at the moment it was quite impracticable. With the exception of the Lefthander, who had next the control of his later week's salary was an account question how they were to live in future. a portion of his last week's salary yet unspent in bar-rooms, the little party were without money. It was, therefore, necessary to defer the troupe scheme, and cast about them for some means of immediate support. First of all, they must look out for shelter somewhere; then they would have time to think. So, having finished breakfast, they made a package of the blankets cooking utensils, and the rest of the pro visions—Harry took them on his back— the Lefthander lifted Mouse in his arms though she declared that she could walk, and they set out up the mountain road leading through the Gap.

All at once the Lefthander stopped, and

Where is you travelling-bag, Mignen?"
"My travelling bag, poppa! Haven't you got it?"
"I have it behind, fool that I am! exclaimed the Lefthander.
"It must be at the fire."

" No, it was not left at the fire," Harry said; "neither you nor Mouse had the bag when you joined us, Lefthander." "Then I've left it at the priest's —I mean the parson's," the Lefthander said, knitting his brows; " and I must go back

"The parson was not at home. A sick person had sent for him, but I saw his old servant, who attends to the rooms and beds, and she was in the room you slept in after we went, and saw nothing. It is lost. I looked all along the road, but could see nothing of it. It will be un-fortunate. I will make another search when we have found a place of shelter."

After saying this, the Lefthander relapsed into silence, and, taking Mouse in his arms, carried her up the mountain and through the Gap. Having reached the western embouchure, they saw a country road leading to the left, struck into it at hap-hazard, and followed it for a mile or two along Walling Water mail they two along Falling Water, until they reached a spot where the stream fell over a ledge of rocks, from which it derived its name. Just beyond this was a ford, and,

The Lefthander looked at his companion. Gentleman Joe was falling into one of his strange moods.

"I have been here before," murmured Gentleman Joe, putting his hand to his forehead; "when was it? But it was a

forehead; "when was it? But it was a dream only, I suppose."

A piteous expression came to his face, but he said nothing more, and his companions, apparently accustomed to his vagaries, paid no attention to his words. The Lefthander led the way through the ford, which only came to his knees, carrying Mouse in his arms, and, following a path on the other side of the stream, they ascended the hill and reached the deserted house. It was the dreariest of the dreary, and the rotting porch gave way under the

Lefthander's tread; but in the bare room within there was a broad fire-place, and Harry had soon collected some dry limbs lying around, and kindled a cheerful fire. Then, as their long tramp had made them hungry, Mouse set about preparing dinner, which consisted of coffee and fried beef and bread—after which they made an examination of their new domicile.

tion of their new domicile.

It had probably been a very comfortable establishment once on a time, but now everything was going to decay. The creaking door had flown open under the Lefthander's ponderous pressure—it was only secured by a rusty latch—and the staircase leading to the rooms above trembled under their feet. The lower trans accomplished in the staircase completely have best in the completely had been a second to the rooms. trembled under their feet. The lower story was completely bare, but in an upper room they found a small pine table, and two or three old chairs without backs, which they brought down and arranged in front of the fire. Then Harry and the Lefthander went out and collected another supply of wood, and by that time the sun began to decline. When night came they made a bed for Meuse of the blankets, and stretching themselves upon the floor fell asleep. Such was the first day spent by the wanderers at Crow's Next.

the wanderers at Crow's Nest.

On the next morning a courcil of war was held, and they unanimously resolved to remain where they were for the present. They had provisions for some days, and another supply could be purchased and brought from Piedmont: there was an excellent spring fifty yards from the house, which they had made the coffee from on the preceding evening; and, if Mouse could only be made comfortable, it really was a very good place to live in, this deserted house. What they wanted was another supply of food and beds, and Harry said that he would go and buy them.

"Just buy some cotton, Harry, and I'll stitch up the beds," said Mouse; "that is, if you'll buy me some needles and a spool of thread—all was lost with that travelling-bag." the wanderers at Crcw's Nest.

The Lefthander produced all his money and gave it to Harry.

"And don't fail to go to the parson's, and ask if they are certain about that bag —that it was not left."

Harry nodded, set out at a long, springy gait, and disappeared. He did not return until late in the day, but he had thought of everything He brought a supply of sugar, coffee, flour, bread, salt, some beef, a ham, and the cotton, with the needles and thread.

If so it will be safe, and I'll get it Clare de Lune will see to that." As he uttered the name of Clare de Lune the Lefthander fell into a fit of musing. His thoughts had evidently gone back to

the scenes at the circus. Some day I'll see her again, perhars," he said : " she is a good girl. Mouse had meanwhile set about stitching up the beds, which she did with a business was extremely expert with her needle. On the next day she had finished them all, and then they were filled with the pine tage rom the thicket in rear of the house; and that night, after an excellent supp r, the whole little troupe slept in perfect comfort. Thus their life at Crow's Nest began in

earnest; and finding themselves unmolested, they remained. Nearly a month passed in this manner. Mouse had completely recovered from her sprain, and the wanderers passed their time in rambling through the beautiful September woods, in talking to each other, and in resolving that they would in some manner organize the troupe with the mankey and the hard organ without delay. But no-thing was really done toward it, and day after day passed by, and their supplies dwindled. Then came the irruption of

On the night succeeding Mr. Cary's visit, after Mouse had gone to sleep in her warm corner, the Lefthander and Harry, seated before the fire, held a consultation on the subject of their ways and means It was a chill night, and the muffled sigh of the wind in the pines, waving to and fro in the moonlight without, gave notice that

The Lefthander was smoking his short pipe, and leaning one ponderous arm upon nis knee. They had been discussing the melancholy fact that they had almost no-thing left to eat, and Harry's powder was exhausted, and they had no money to buy

Gentleman Joe entered upon the subject of constructing traps for game in a manner which showed that he was matter of the art. Harry and the Left-hander I stened with admiration, and did interrupt him.

All then lay down in front of the fire, wrapped in their blankets, and were soon asleep—all but Gentleman Joe. He had closed his eyes, but in about half an hour

Another sigh fo'lowed these words, and muttering something further to himself he at last fell asleep.

Evrly on the next morning they set to work making the traps. In this work Gentleman Joe was the manager and director. With the assistance of bits of plark, some nails collected here and there, and strong twine string, made by untwisting an old rope discovered in an out-house, they succeeded in constructing the traps; and by evening they were done. It was then agreed that Harry should remain with Mouse, while Gentleman Joe and the Lefthander crossed to the mountain opposite and set the traps; and the Lefthander, taking the whole load upon his back, set out with his companion.

site and set the trape; and the Lerthander, taking the whole load upon his back, set ont with his companion.

They descended the hill, crosted the stream at a narrow spot upon a log, and entered the woeds clothing the slope beyond. The vicinity was wild and uninhabited. Here and there ravines penetrated the mountain, nearly concealed by overhanging trees which threw deep shadows, growing deeper as the sun sunk. Making their way into the silent depths the trappers set their traps, which were already batted, and then attempted to retrace their steps towards the crossing of the stream.

This proved far less easy than they had supposed it would be. Night had fully come now, and scarcely a ray penetrated the shadowy gorge into which they had advanced for a considerable distance. The moon had not risen, and a haze hid the stars—in addition to which they had lost the points of the compass. There were no paths to guide them, the steep sides of the gorge affording no foothold even for the mountain castle; and, after wandering around for some time, the Lefthander and Gentleman Joe came to the depressing You have the names

"Some one is hunting," said the Left-hander; "they can tell us the way."

He advanced in front of Gentleman Joe, and they steadily approached the light, which they now saw was that of a fire burning in a concealed nook between two ledges of rock, and hidden from any one approaching in all directions except from the difficult spot to which the trappers had wandered in the darkness. There was something wild and weird about this l ght and its surroundings. The masses of rock rose above it to the right and left in rugged ledges, with cedar bashes and trailing vines starting from every crevice. On these the red light of the fire threw fantas-tic shadows, and as it soured aloft from of a mountain-ash reaching far over the ledge, and nearly drooping to the ground. What more than than all astonished the Lefthander and his companion was an object only a few feet beyond the fire. Could his eyes deceive him? this something was a door in the side of the mountain; there

was no doubt of that. It was nearly covered by the drooping follage—but there it was.
The Lefthander stopped, and laid his hand on the arm of Gentl: man Joe.
"These people are not hunters," he said,
in a low tone; "look at them"

Shadows were moving to and fro in front of the fire, and dark figures, in rough dresses, were dimly visible as the trappers cautiously drew nearer.

"If I was in the Bohmerwald Mountain, I should say they were the wrong sort of people to go near," said the Left-

hander, in a low voice.

The figures at the fire probably heard his voice, for one of them, with a gon in his hand, left the group and came in the direction of the sound.

"Wro goes there?" said the figure.
The Lefthander continued to advance. whereupon the figure ra'sed his gun to his shoulder, and ordered—

The figure came nearer, and bending down peered into the Lefthander's face; as his back was to the fire, his own was c ncealed.

"Yes," said the Lefthander.
"Who is with you?"
"One of my fr.ends."

You are tramps?" "You may call us that, if you fancy."
"Wait a little." The figure went back to the fire and held

brief colloquy with the men there. He hen returned to the Lefthander, and said, "Come on, friends—both."

The Lefthander and Gentleman Joe approached the fire, around which Barney Jones and two or three others were standing. The person who had held the colloquy with them was Daddy Welles.

As the sun was sinking a party of about a dozen horsemen rode out of Picdmont, and proceeded westward at a round pace through the Gap in the Blue Ridge.

to no improper annoyance.

The marshal was in a very bad humour. He had made more than one foray on the "moonshiners," as the illicit distillers were called, but always without result. Intimations thereupon reached him from head quarters that he was regarded as wanting in efficiency. Hence indignation, and a fixed resolution to break up the illegal establishments if they could be discovered. But this, unfortunately, was the trouble. The stills were known to be in the recesses of the mountain, but it was not probable that they would carily be discavered, unless there was treachery. Of

"I'll make the traps to morrow," sa'd Gentleman Joe. And it was agreed that they should rise early and set about the work at once, in order to have the traps ready by the ensuing evening.

All then by down in fact, of the fact of the law; and the mannfacture of the law; and "moonshine whiskey" was generally laughed at, and regarded as only the harmasleep—all but Gentleman Joe. The marshal grew red in the face as he thus denounce it the moonshiners.

"They are just as bad here, I have not the least doubt," he added; "and I res well enough that they are supported by royular sentiment. The war antagonism has not died out. General Lascelles, but cared little or nothing, apparently, for the result.

"A perfect wild goose chase, sir!" the marshal exclaimed. "How are we to discover these illicit distilleries? No one will inform on the law-breakers. They are all in league together. Not a man, woman, or child will open their lips. Ask them questions, and you have a langh for your pains, Mr. Lascelles! names are all?"
"All, with the exception of a gang of tramps, who are said to have established their head quarters on the farm of a Mr. Cary-who, for that matter, may be in alliance with the moonshiners. Their presence on this land is suspicious."
"I know Colonel Cary, and think it improbable that he has anything to do with

the moorshine people."
"Well, to be frank with you, I suspect everybody, and will form my own opinion from what I see. I am a stranger in this region, and have had the greatest trcuble in obtaining directions where to find the homes of these people. We must be near the first I propose to visit-that of the

I have been using the Pain-Killer for many years with results that justly entitles me to recommend it. As a family medicine, we consider it almost indispensable: being good ont only as a pain-killer, but for colds and sore throat, and many other allments for which it appears specially adapted. I have used it myself, chiefly as a limiment, and find it valuable for rheumatism and pains and stiffness belonging to old age. I pronounce the Pain-Killer a good and cheap medicine, and worthy of all acceptation, and send you this certificate that you may assure the public that it is no humbug. PORTLAND, ONT., March o. 1880.

ESCOTT, ONT , March 4, 1880. We hereby certify that we have used Perry Davis' Pain-Killer n our families for several years. We consider it a very useful and necessary article to be kept in all households as a resort in case of accidents and exposure to attacks occasioned by cold.

Westmeath, June 14th, 1880.
Your colt is affected with rheumatic infammation of the joints. Apply once a
day to the swollen joints a liniment composed of tincture of arnics, six ounces; it
tincture of camphor, eight ounces; and
two ounces of tincture of opium. Apply
about half a wine glassful at a time, and
rub it well into the parts. Give half a
drachm of bicarbonate of potash every day
internally, and continue until eight doses internally, and continue until eight do are given. Keep the colt as comfortable as possible, and the probability is a complete cure will be the result.

SCRATCHES.

SIR,—I have a three-year-old colt that wants to rub as though he itched. He also seems to have the stratches, and by stamping and kloking has caused the lower joint on his left hind legs to swell. He is in goed order and perfectly smooth, except on his hams, it has broke out. He is kept in a clean stable and is kept well and curried. He was kept in a dirty stable last winter. Please inform me what to do for him, and oblige a SUBSCRIBER.

For the itch, take lard one pint; flour of sulphur, two ounces; red precipitate. For the itch, take lard one pint; flour of sulphur, two ounces; red precipitate, one-fourth ounce; rub on the itchy eruption. For scratches, take gum myrrh, gum camphor and spirits of turpentine; mix, and add one ounce of sulphuric acid very slowly and cautiously in teaspoonfuls; keep well stirred; mix in a quinine bottle; mix all in a pint of lard; grease the heel once per day; wash with castile sosp and dry perfectly before using, every time used. If swelling remains, blister the joint, not the heel.

THINNING FRUIT.-Whenever we tell a friend he should thin his fruit, he talks about the curculio, the codling-moth, the birds and the boys, and "guesses there will be thinning enough before the season gets through." This is true in its way. Wherever these troubles exist to any great
