Sin:—I heard last week that your noble Governor Gineral war expected to leave the city of eavages, and that it war mor'n likely he would arrive where white men reside on Friday. And on the mornin of that day I found out for sartin that he would be along about 2 o'clock. So puttin' on my Sunday-go to meetin' ringin, I war soon in the disputin' terror-tory agn. And goin along quite careless like, not appearin to be lookin at anything in particerlar, I did'nt stop till I got appears to the big court house. I soon eaw that somethin' more'n common war on hand. Everybody was all dressed up to the nines, and runnin' round like all creation. Now and then one of the big bugs would hass along, with three or four small frys folterin' him askin questions and goin' on as though everything depended on bein' wide awake. Then a crowd of chaps would hold a caucus on the corner, and long confined elerquence would find vent and a great many wise things would be said I tell yon. It is well known that the great majority of the Government employs are not only hostile in sentiment but active in their opposition. To their employers they play the part of traitors, spice, enemies. Seventy-five per cent of all the office helders through the country are of the same kidney. So bitterly hostile are they to the administration, and so all pervading is the influence of this army of traitors, that if the government do not take them in hand and disarm them of their weapons, it will stand a fair chance of being undermined and eventually upaet by them. To nourish this omnipre-sent enmity, to feed them while they was against you, to arm them with weapons against you, to arm them with weapons which they turn against yourself, is not magnanimity, is not sound peley, is not manly or vigorous Administration: it is immanly or vigorous Administration; it is imbecility and political suicide. To attempt
to concilate political enemies is the way to
offend your friends. You can no more conreliate political enemies who have not one
sentiment in common with you, than you
can change the colour of the Ethiopian's
skin. But the very attempt to do so will
cool the ardour of your friends. Who that

Why should the government suffer itself to be injured in so many ways, by continuing in office persons of the stamp of Mr. Joseph Lee, and others that could be amed !- Examiner

The departure of His Excellency the Governor General from the Lower Canadian metropolis, for Upper Canada, has fallen Canadian subjects, and, in spite of all the opposition of incendiaries, will aid thom, not only in shouting with a voice of them, not only in shouting with a voice of them, and in spite of any man or men, and, especially, to the remnant of a blustering, selfish, tyrannical faction, whose aim and object ever were, and now are the subversion of liberty, peace and order, and the oppression of the many by the frac.

To make a marriage, three things are required; first, that the parties will marry; secondly, that they do; though to us it seems that if they tion of the stock in the Grand River Navigation Company, and one object of His Excellency's visit to this quarter was to insure the work, and therefore they will they choose and if they don't it is because they won't, which brings us to the conclusion, that if they do, it is absurd to speculate upon whether they will or can marry.

It is notorious that its paper has begun to circulate very freely, and that the arecula tions of Americans in wheat are likely to extend its circulation still more; and we therefore deem it a duty we owe to the public to ask what guarantee have the people of Canada, that the notes of this bank will be redeemed? We are aware that a par liamentary investigation into the affurs of the concern, took place last year, but we have never seen the information published upon which the circulation of this foreign paper may satisfactorily be countenant This we do know that the community suf the Niagara, and that this experience should lead us to employ every precaution to prevent the recurrence of a similar disaster.— It is notorious that the parties who were formerly the responsible proprietors of the Farmers' Joint Stock Bank, residing within the Province, published some time they had now no connection with ago that were therefore in no way responsible for it 'ransactions: and it is equally notorious that the chartered banks do not receive its notes. GOVERNOR GENERAL'S TOUR.-His Ex-GOVERNOR GREERAL'S TOUR.—HIS Ex-cellency arrived at the residence of David Thompson, Eq., M. P. P., at Indiana, at six o'clock, p. m. on Thereday, where he was received most enthusiastically, by a large concourse of the people of the village and neighborhood, as well as by a number of gentlemen from a greater distance. His arrival was announced to the neighborhood of gentlemen from a greater distance. His arrival was announced to the neighborhood by a royal salute of 21 guns, which had been specially prepared for the occasion. For the first time since creation this portion of the valley of the Grand River reverberated with the sound of cannon, and for the first time did a Governor General visit it. We have no wish to be unne in our strictures on other men's writings, but we certainly regret to see the Editor of a public journal, with a respectable circulation, allowing his chagrine and hostility to his opponents, to destroy entirely his perceptions of truth and false-hood. The Colonist, for some time past, seems altogether regardless of the distinction between right and wrong in his political writings, and is apparently goaded on in the gratification of his slpeen, with a blind recklessness that frequently renders him ridiculous. For instance, in the Colonist of the 7th instant, there is an attempt o convince the Globs that the Huron Signal had recommended party demonstrations in favor other words that we were desirons that the Reformers should make political displays on the occasion; and to prove that we had expressed this desire, the Colonist gave the following sentiments from the Signal of the 23d August.

"Let the Reformers—the lovers of civil liberty—the intelligent of all classes and parties turn out in thousands and welcome this Excellency with demonstrations of joy. A great principle is at stake, and the man who will refuse to walk or ride twenty or who will refuse to wait or fine twenty or thirty miles to units in these demonstra-tions, has not a just appreciation of the value of liberty. Let the friends of free-dom—the friends of law and order muster in thousands and tens of thousand—let them carefully avoid giving personal insults or intentional offence to any man or any party, and then, if violence or assult is offered to their demonstration, it will be speed by discovered on whose head will rest the responsibility!"

The brains of the Colonist have surely been conglom rated when he made this extract ! for we appeal to any sober man if the two sentences here in italics do not prove exactly the very oposite of what the Colonist is endeavoring prove? Had the Colonist acted honestly when he tried to condemn us for desiring party demonstrations, and party processions, he and law is really enough to be the death of any one. A husband or a wife cannot be a witness for or against one another, though a wife sometimes gives evidence of the bad taste of the husband in selecting her.

Goderich, Sept. 13, 1849. 12-n32-tf

There are three preachers, ever preaching,
Each with eloquence and power;
One is old with locks of white
Skinny as an anchorite;
And he preaches every hour.
With a shrill fanatic voice;
And a bigot's very acro :—
Backward ye presemptuous nations:
Man to misery is born!
Born to drudge, and aweat, and suffer—
Born to labor and to pray;
Priests and Kings are God's vicegerents
Man must worship and obey.
Backward, ye presymptuous nations—
Back !—ber hun ble, and obey!
The second is a wilder research.

The second is a milder preacher;

Soft he salke, as if he sung;

Sleek and slothful is his look,
And his words, as from a book,
Issue gibly from his tongue,
With as air of self-content,
High he lifts his fair white hands;

"Stand ye still, ye restless nations;
And be happy all ye lands!
Earth was made by One Almighty,
And to meddle is to mar;
Change is rash, and ever was so;
We are happy as we are;
Stand ye still, ye restless nations,
And be happy as ye are!"

And be happy as ye are !"

Mightier is the younger preacher;
Genius flashes from his eyes:
And the crowds who hear his voice,
Give him, while their souls rejoice,
Throbbing bosoms for replice.
A wed they listen, yet elated,
While his stirring accents fall
"Feward ye deluded nations,
Fronces is the rule of all:
Ana was made for healthful effort:
Tyrunny has crushed him long:
He shall march from good to better,
Nor be patjent under wrong:
Forward! ye awakened nations,
And de battle with the wrong!"

ally strong, was to view a great number of fields of flax in full bloom, a crop which we have cultivated largely for many vears past. The soil in the neighborhood of Delaware, is well adapted for the cultivation of flax, but to appearance, the farmers are totally ignorant of the proper method of preparing land for this crop. Flax ground should be brought to the finest possible state of tilth, and the seed should be sown at the rate of two bushels per acre, about the first week in April, or when the plum blossoms make their first appearance. We have frequently grown as high as 25 bushels of flax seed and 500 pounds of clean scutched flax to the acre, extending over an area of from fifteen to forty acres. The flax ground near Delaware, could not have been ploughed more than once; three pecks per acre must have been the utmost quantity of seed sown, and the period of sowing must have been delayed at least three weeks later than it should

MPROVED METHOD OF PRESERVING MILK.

We learn from the Chemical Gazette, that F. H. S. Louis has patented an improved method of preserving milk. The milk is to be mixed with well clarified raw sugar, 4 oz. to the gallon. It is then to be evapo-

becomes cold, to curdle it by rennet or a weak acid. The curd is separated from the whey, and by strong pressure after washing in cold water, it is obtained free from adhering water. The whey is to be evaporated to dryness. The curd placed over a slow fire is continually stirred, and the dried whey added very gradually, with a small portion of bicarbonate of soda. After a while the ingredients melt and unite. A small quantity of finely pulverized gumdragon, hastens the solidification.

Creau may be preserved by the same methods.

PEACE AND WAR .- Peace is that beauti-Pract and War.—Peace is that boath full essence which flows undisturbedly from a pure and generous heart, and which says, "Though my brother offend me seventy times seven, yet still will I freely forgive him." But war is a barbarous game or merchandise, which says, "My neighbour has slightly offended me, therefore must I visit upon him the punishment of Cain."

A gentleman sat down to write a deed, and began with "know all women by these presents."

"You are wrong." said a bystander, "it ought to be know all men."

"Very well," unswered the other, "if all women know at, all men will of course."

Kurcetor in 1849.—The Agricultural Show of Canada West, our readers must remember is to be held in this City in September next commencing on the 18th and contiouing four consecutive days. The preparations being made are such as the means at the disposal of the Committee will afford, and considering the depressed state of business of every kind, and the prevailing sickness of the setson, the collection realized in this vicinity, has proved very encouraging.

There are several Districts and localities yet to be heard from, and as the time is fast approaching when we expect to see the Ag-

approaching when we expect to see the Agriculturalist of Canada muster here in force the Committee hope and expect that all communications intended for them may be forwarded for thwith. This is no local or party affair, but as is intended for the benefit of all, whether Merchants, Farmers, Manufacturers, Artists of Mechanics' so at it furnishes a common field for homeable competition, as well as amusement, on which all persons, without distinction, may

meet.
The order of the day will be as follows:
The first day will be passed by the Judges in examining the stock and articles exhibited. On the second day at 2 o'clock P. M. the public are to be admitted. The Research as a congramme of which will be found gatts, a programme of which will be found advertised in our columns to-day, will af-ford those who may not have privilege of entry to the show grounds on the first day, ample recreation. Our harbor is a noble one, and as the Steamers in port usually give a sail gratis to all who wish to witness the Regatta, visitors are usually much delighted with the sailing and rowing

matches.
On the day following the Show, viz:
Saturday the 22nd day of Scotember, the
Races, likewise advertised in our columns,
will come off. The list of Stewards will be will come off. The list of Stewards will be found a sufficient guarantee for the respectability of management, and sufficient precautions will be adopted to preserve order and the public peace. have been.—The result of this wretched system of management is perfectly obvious—ten bushels of seed will be the outside average, and the fibre is worthless for manufacturing purposes. Worse than all this, the ground by being only partially covered with plants, and they of a stunted growth, becomes covered with weeds, and is in a worse state of cultivation, than previous to its being sown with flax. FLAX CULTURE IN OHIO.—In the immediate vicinity of Delaware, on rising a point of land, from which we could see the waving fields of grain some miles distant, the effect produced on our minds, having been assed in a district of country noted for its beautifully modulating lands and superior cultivation, was of the most pleasing nature; and what made this feeling additionally strong, was to view a great number of fields of flax in full bloom, a crop which we have cultivated largely for many vears past. The soil in the neighborhood of Delaware, is well adapted for the cultivation of flax, but to appearance, the farmers are totally ignorant of the proper method of preparing the age of twenty-one years; and the bills.
