ALTERS and Finishes
05 Windsor Bldg.

This design gives an idea of the appearance which will be presented by the high-level bridge when it spans the Saskatchewan from bank to bank and joins the cities of Edmonton and Strathcona. The contract for the substructure has been let to John Gunn & Sons, Winnipeg. The bridge will be proceeded with at once and should be ready for traffic before the close of next year. The total cost of the structure has been estimated by the engineers of the Canadian Pacific Railway to be \$1,428,793. Of this amount probably half a million dollars will be paid out in wages in Edmonton and Strathcona during the progress of construction work.

An accurate representation of the bridge is given in the accompanying sketch, which is the first to be prepared from the original plans. The entrance into the two cities is also shown, as well as the approximate position of the Parliament Buildings and the University buildings, when completed, has been indicated by the artist. Looking up the river, on the right stretches out the City of Edmonton with the legislative pipe in the foreground. On the bank of the river in front of this building is the historic Hudson's Bay Fort. On the left bank, the Arts Building of the University looms up prominently, the tower of the new Alberta College showing up to the right. The lumber yard and mills of the John Walker Company, on the flats, lend a touch of industry to the scene.

The bridge will be supported by thirty-two piers and pedestals. Four large central piers of concrete will be built, one at each side of the river at the commencement of the water, and two in the stream. These piers will be 133 feet high, the distance from the low water level taken in July, 1906, to the top of the substructure. The top of the rails will be 192.3 feet, or practically two hundred feet, above the low water level. The central piers will be twenty feet square at the base. Its length will be 2,800 feet.

The C. P. R. rails will occupy the centre of the bridge, and on either side will run the street railway tracks. Forty feet below the level of the tracks will be the traffic deck of the bridge, with a roadway 23 feet in width and an eight-foot sidewalk on each side.

On the Edmonton side the roadway will approach the bridge at about the present level. On the Strathcona side it will turn out and rise twenty-five or thirty feet by a five per cent grade. At no place on either side of the bridge will there be a level crossing, the roads passing in every case either over or under the railway line.

The tracks will be bridged at Saskatchewan avenue and will pass over a bridge at Hardy street, running north along the lane between Ninth and Tenth streets. From Saskatchewan avenue to the west abutment of the bridge there will be a ten per cent grade. The C. P. R. have provided the city with a right-of-way from Saskatchewan avenue to the north end of the bridge for sidewalks and roadways. A right-of-way has also been provided on the Strathcona side to a point where the road joins one of the main streets of the city.

By the present street car route over the low-level bridge, the distance from the corner of First street, Edmonton, to the C. P. R. station in Strathcona is four miles. The distance between the same two points by way of the high level bridge will be 2 7/8 miles, a reduction of 1 1/8 miles. On the basis of a five minute car service this would mean a saving of 408 minutes per day. Of the total cost of the traffic section of the bridge, Edmonton will bear \$238,000, Strathcona \$50,000, the provincial government \$175,000 and the Dominion government \$125,000.

BAD WIND STORM

VISITED TWIN CITIES SUNDAY.
 Almost Created Panic in Strathcona Church—Minor Damage Done in Both Cities.

As a result of the tornado-like wind storm yesterday afternoon, the large chimney on Knox Presbyterian Church in Strathcona toppled over and came crashing down on the roof of the church, making a terrific noise. At the time of the accident a union Sunday School rally was being held in the church, and the building was crowded with children and their parents.

Thought It Was Lightning.
 At first it was thought the edifice had been struck by lightning, and a serious panic was averted only by the presence of mind of some of those who were near the door and who rushed out when the crash came, and having ascertained what had happened, came back shouting that there was no danger. As it was the women and children present were badly scared and a small stampede towards the door was started.

Panic is Averted.
 Professor Henry, one of the speakers of the afternoon, shaking out of his hair the plaster which had been dislodged from the ceiling, dispelled the fears of the frightened audience by stating that there was no danger and that he himself had probably sustained the worst of injuries and was still alive.

The roof of the church was damaged to a considerable extent and some of the plaster inside the building was dislodged.

Many Windows Broken.
 In Edmonton the violent wind storm wrought considerable havoc in different parts of the city. A large plate glass window in Shaw's jewelry store on, stamayo avenue was blown completely out of its frame, smashing into a thousand pieces. A sign on The Blue Store, Jasper avenue east, was blown away, as was also a large awning on the Hudson's Bay Store.

Other Damage Done.
 On Kinslton avenue an electric wire was blown down and a window in Bradburn's stationery store on First street was also smashed.

The electric sign in the Douglas Printing Co.'s building on Howard street was blown over.

Many poplar trees in different parts of the city were laid low by the terrific wind. The storm lasted half an hour.

Presender for Spanish Throne.
 Vienna, August 2.—Don Jaime, pretender to the Spanish throne, today held a conference with the lieutenants who are said to have advised immediate action. Jaime is loath to step into the arena.

DELEGATES FROM NEW YORK

To Eccharistic Congress in Montreal in September.
 New York, August 1.—The Roman Catholics in this city are already preparing to send delegates to the Eccharistic Congress to be held at Montreal early in September. Word was received here that the Congress will be the largest gathering of Roman Catholics ever held on the North American continent. The principal speakers will be Cardinal Gibbons, Mr. Heylan, Archbishop Bruchel, of Montreal; Archbishop O'Connor, of Boston; Archbishop Sheen, of St. Louis; Father Vaughan, of London.

HON. FRANK OLIVER TO REACH HERE FRIDAY

The Minister of the Interior Reaches Vancouver in Good Health After His Long Trip—Denies Rumor of His Reported Retirement.

Vancouver, August 2.—Hon. Frank Oliver has arrived here from Dawson and left today for the east. He denies the story published in the eastern papers a few weeks ago that he intended resigning the portfolio of the Interior and accepting a position on the Board of Railway Commissioners. The minister is in excellent health after his long trip of almost 8,000 miles over land to Dawson by way of the Athabasca and Mackenzie rivers and back down the coast. The journey was made on the schedule that had been arranged before Mr. Oliver left Ottawa, and good connections were made all along the line.

The Minister of the Interior will reach Edmonton on Friday, in order to be in his home city to meet Sir Wilfrid Laurier there upon his arrival next week.

LID ON MOOREHEAD, MINN.

Saloons to be Closed Because of Sale of Liquor to Indians.
 Moorehead, Minn., Aug. 2.—It looks like the "lid" for Moorehead, former representative S. G. Conroy, and Mayor Davy have returned from Washington, where they attempted to convince the department of Indian Affairs that Moorehead's finances could not stand the loss of the saloon license fees. Mr. Conroy says the department is strongly prejudiced against Moorehead because of the undue proportion of saloons and also because of the sale of liquor to Indians. They hope that Moorehead will escape the closing order.

Gets \$5,000,000 Contract.
 London, August 2.—Libby, McNell & Libby have closed a five million dollar contract with the British army for canned mutton. British officers will superintend the packing in Chicago.

CONTRACT LET

FOR HIGH-LEVEL BRIDGE.
 To be Completed in Twelve Months—John Gunn & Co. the Successful Tenderers.

Winnipeg, Aug. 1.—The contract for the high level bridge at Edmonton was awarded to John Gunn and Sons, Winnipeg, notification being issued this afternoon by Assistant Chief Engineer Schmitzer, of the C.P.R. While no figures were given out, it is understood it will cost in the vicinity of a million and a half dollars. The bridge will be completed in about twelve months.

The bridge will be 192 feet high, 2,800 feet long and will connect the tracks on the upper level, while nineteen feet lower will be an ample roadway for vehicular traffic and pedestrians.

While the Lathbridge bridge is bigger, the Edmonton structure with its varied traffic accommodation is unique in the West.

CHINA OPPOSES POLICY.

Agitation Centres Upon China-Chan-Aigian Contract.
 London, Aug. 2.—There is increasing agitation, the Standard says, over the question of railway development in Mongolia and Manchuria and objection by Russia and Japan to the construction by China of the China-Chan-Aigian Railway, on contract with Faulling and Company of Westminister, which would mean an expenditure of \$650,000 by China.

The China Association hopes, by continuing to take strong action in the matter, to change the attitude of the British government, which is now supporting the contention of Russia and Japan.

The Association argues that should the proposed line be prevented by Russia and Japan they will exclude British contractors and railway builders from any railway work of any kind which China may intend in future to carry out in Manchuria and Mongolia.

Negroes Beaten By Bathers.

New York, August 2.—Beaten by an angry crowd of white bathers because they ventured in the surf at Coney Island, Frank Davis and Bryant Peall, negroes, are being treated today at a hospital for injuries they received the moment they entered the water. A score of men and boys armed themselves with clubs and the negroes were severely beaten. Police reserves were called and the crowd dispersed after several of its members had been beaten into submission.

RUSH STOCK TO MARKET.

Breeders in Northwest U.S. Selling Their Cattle Fast.
 Minneapolis, Minn., Aug. 2.—Stock breeders in the Northwest are rushing their stock to market at a rate unprecedented in the annals of the South St. Paul stockyards. The figures for July show 86 per cent increase over even the receipts for the corresponding period one year ago, when great shipments from the Northwest went to Chicago. The cause is shortage of the hay crop and the lack of winter feed.

GERMAN SETTLERS DECLARE LOYALTY

Hope Time Will Come When Their Sons Will Man a Canadian Navy and Take Part in the Defence of This Country.
 Regina, Sask., Aug. 1.—An almost unparalleled demonstration of loyalty occurred here today when the Germans of the city declared to Sir Wilfrid Laurier that they would be prepared to do anything to defend their new homes and country. In a loyal address they said: "We hope the time will come when the young men of our race will be able to man the Canadian navy and take part in the defence of this country."

In reply to this remarkable demonstration, Sir Wilfrid made the most stirring speech of his tour, declaring Canada to be the bright jewel in the crown of Britain. He prophesied it would become the largest and wealthiest portion of the empire. Declaring that the empire rests on liberty, equality and justice, he declared that freedom and local autonomy would prevent the empire sinking into oblivion which engulfed the Roman and Napoleonic empires. After a reference to the late war and the present federation of South Africa, the premier said Canada has independence in language and while independent as a nation we do not seek separation. We are all subjects of the King and we will have no other sovereign. He expressed his incredulity as regards a possible conflict between Britain and Germany, but should it come, he would ask the German citizens here to act as mediators.

BLACK AND WHITE WAR.

Twenty Negroes Killed and Five White Men Dead.
 Palestine, Tex., August 2.—Twenty negroes and five white men are reported dead and scores of whites and negroes injured in rioting throughout the night near here.

A desperate fight between armed negroes and white men is still raging near Palestine today, according to reports from there. Governor Campbell has ordered that the rangers and militia shall disarm all citizens at all hazards.

Palatine authorities report that many have been alarmed, but that the rioting still continues.

There have been left San Antonio, Fort Worth, Tyler and Marshall for the scene of the rioting.

Saloons at Palestine have been closed and storekeepers ordered not to sell firearms. The adjutant-general announced this afternoon that a small detachment of rangers has reached Palestine and that the situation probably will be under control by nightfall.

TARIFF REDUCTION

MUST BE MADE GRADUALLY.
 Premier Meets Delegation of Grain Growers at Regina—Direct Taxation Impossible in Canada.

Regina, Sask., Aug. 1.—The Premier met a delegation of grain growers here who emphasized their views on the tariff question.

The grain growers' spokesmen admitted that they were not all free traders in the West, but declared their great and growing feeling favoring an all-round reduction in tariff.

"We want our tariff to be more for revenue and less for protection. And if all the representatives of the people had done their duty, the Premier would have been aware of this before," was the substance of the grain growers' arguments.

Laurier's Reply.
 Laurier said: "I am glad you recognize that it is impossible at one fell swoop to dispose of the tariff. Changes must be gradual."

The Premier then pointed out that abolishing the tariff at once would probably cause a financial crisis and said that the strongest free trader must recognize that it was not possible to have free trade as in England.

It is impossible for us to raise revenue by direct taxation. If we did, the first goal set before us is the settlement of these enormous praeries."

Sir Wilfrid favored a gradual reduction of the tariff and also favored reciprocity with the States, if fair treatment was offered to Canada.

NO TRACE OF DYNAMITERS.

Men Who Blew Up Superior Coal Dock Get Clean Away.
 Duluth, Minn., Aug. 2.—No trace has been found of the men who destroyed the new machinery in the Philadelphia & Reading coal dock in Superior last night by blowing it up with dynamite. Two explosions occurred, one just before midnight and the second at 12:35. They were distinctly heard even in Duluth, the total damage to the machinery is about \$10,000.

ROBT. WHITELAW IS MISSING FROM HOME

Left His House at the Foot of Twenty-first Street Friday and Has Not Since Been Heard of—Police Have No Trace.
 Since last Friday evening a man named Robert Whitelaw has been missing and although the police have been notified, no trace of him has been found as yet.

Whitelaw, who for the last couple of months has been living with his wife and two small children in a tent at the foot of Twenty-first street, left the tent last Friday evening in order to pay his tent license. He had five dollars with him at the time and told his wife he would be back immediately. He seems to have had no intention of leaving, as it was only at his wife's special request that he changed from his working clothes into a good suit.

From that time till now nobody, as far as can be found out, seems to have heard or seen anything of the missing man, and the officials say that no man by the name Whitelaw paid a tent license on the night on which he is supposed to have gone down town for that purpose.

Mrs. Whitelaw states that she and her husband have always been on the best of terms and she is utterly at a loss to account for his mysterious disappearance.

It is extremely doubtful that Whitelaw ever went into the centre of the city, for if he did somebody would no doubt have seen and recognized him.

The police think that he may have met with foul play, but this is merely a supposition.

The missing man was about five feet five inches in height, weighed about 140 pounds, and was of a rather dark complexion. On the night of his disappearance he was wearing a grey vest, grey pants and a dark coat. He was twenty-six years of age.

CRIPPEN CAUGHT

ON STEAMER MONTROSE.
 Inspector and Police Boarded Steamer Off Father Point and Took Crippen and Companion Into Custody.

Father Point, July 31.—With all the quietness and lack of display so characteristic of Scotland Yard, Inspector Drew, who had been in frequent telegraphic communication with the Montrose, embarked on Pilot Gauvreau's boat, accompanied by Provincial Chief McCarthy and Detective Dennis, and giving the reporters the slip rowed out and met the Montrose, which was still in the heavy tide.

Dr. Crippen rose early this morning after a restless night, pacing the deck restlessly. He took coffee only for breakfast, Miss Leneve not appearing. After visiting her in her cabin, Dr. Crippen walked the deck with Dr. Stewart. Noting the approaching boat he remarked: "There seems to be a good many pilots coming."

"Was Fairly Anxious," "Yes," replied the doctor, "there are four."

Dr. Crippen did not then display any nervousness, although his looks betokened pained anxiety. He was continuing the promenade with the doctor when some five minutes later some one tapped him on the shoulder and turning he faced Inspector Drew in his blue uniform and well-known peaked cap.

"I want to see you alone for a moment," said Inspector Drew, and Dr. Crippen saying nothing turned obediently and went below. As they entered the cabin Inspector Drew said to Chief McCarthy: "This is your man."

"Made No Statement."
 McCarthy then read his warrant to Dr. Crippen, gave the statutory warning that anything he might thereafter say would be used at his trial, and formally took him into custody.

Dr. Crippen made no statement, protest or objection and though not manacled then was carefully guarded and taken to his cabin. He knocked and the Leneve girl opened the door, and as the uniformed inspector entered (whom it is stated, she knows), she screamed and started back, then recovered and said nothing as the warrant was read, after Inspector Drew identified her for Chief McCarthy. After the statutory warning she was then arrested as a suspected party.

Were Handcuffed Together.
 The pair were then handcuffed and remained with Inspector Drew for a long time.

After a half hour's stop at Father Point, where a bundle of newspapers correspondents were taken on, the steamer proceeded to Quebec, where she was due at 22 o'clock.

The arrest was effected without any of the passengers being aware of it, but when later it leaked out

tain they had no idea he suspected them. He knew if he left them alone and tried to ingratiate himself he could get information which might prove invaluable later on. Eventually he consulted the mate and they came to the same conclusion, that the pair were Dr. Crippen and Miss Leneve. The doctor carried a revolver and was growing a beard.

In spite of previous reports to the contrary it is learned authoritatively that Inspector Drew on board the Laurentine was not able to communicate with the Montrose during the voyage. Consequently Inspector Drew was unable to give any instructions to the Montrose regarding the suspected parties on board the latter steamship.

The passengers then recalled many peculiar little features of the couple, especially the father's deep affection for each other, and their unusual reticence. Captain Kendall will receive the \$1,250 reward offered by Scotland Yard for information leading to the arrest of Dr. Crippen and the Leneve girl.

Suspicious on First Day.
Fame Point, July 28.—Additional details regarding Dr. Crippen and the Leneve girl on board the Montrose have reached here by wireless.

Captain Kendall first became suspicious of the "Robinsons" while they were at lunch on the first day out. Miss Leneve's hat was hanging outside the dining saloon with paper stuffed in the band to make it fit properly. Later on the same day he saw young "Robinson" with his coat and waistcoat off. He noticed immediately that his trousers hung in a peculiar manner and were held up with safety pins. Previously he had, while standing on the upper deck, watched the pair closely. The "boy" questioned the "father's" hand affectionately, and with this he did not seem natural to the knowing seagoing.

Expected to Get Information.
Capt. Kendall did not place the pair under arrest because he was certain of their guilt.

Confession Humored.
Quebec, Aug. 2.—The rumor is persistently circulated here this morning that Dr. Crippen has confessed. His confession, it is understood, was laconic, and lacking in any detail, but none the less definite and is widely credited.

Dr. Crippen is reported to have said quietly without an emotion whatsoever, "Yes, I killed the woman." It is further reported that he affects no regret but that he will tell his story when the proper times come with out any attempt to ever extenuate or excuse, simply laying certain facts before the authorities.

Is Shielding Crippen.
Ethel Leneve today sent a cable message to her parents in England stating that she has told all she knew of the tragedy.

The message was sent after Inspector Drew had spent several hours with the young woman in the home of Chief of Police McCarthy. Later, Inspector Dew said:

"She is doing all she can to shield Dr. Crippen. In her discussion of the case she constantly repeated that she believed Dr. Crippen innocent. We know better."

The detectives all deny the report of confession of Dr. Crippen unambiguously and with emphasis; this, however, would probably be done even if it were true.

Crippen—Quack and Fugitive.
The American Medical Association Journal in its current issue publishes the following history of Dr. Crippen's medical career:

The press of two continents is wrought up over the disappearance of a Dr. H. H. Crippen, who is now wanted by the London police on the charge of having murdered his wife, Crippen, who has been quacking it for a few years past in London, appears, according to the medical directories, to be a graduate (1884) of the Homeopathic Hospital College of Cleveland, Ohio. In 1886 his address was given in the directory as 5 Madison avenue, Detroit. In the 1890 edition of the directory we find him at 955 Fifth street, San Diego, Cal., while in 1893 Crippen had crossed the continent and was living at 78 Madison lane, New York city. In 1896 we find his address 1691 Arch street, Philadelphia; while subsequent editions of medical directories of the United States do not contain his name. It was at that time, apparently, that he went to London, where he became the "physician" for a quack concern known as the Drouet Institute for the Deaf. This "institute" was originally established in Paris by a Britisher named Derry.

Had to Get a Renegade.
To keep within the French law it became necessary to secure the services of a renegade qualified practitioner, whom Derry found in a broken-down physician named Drouet, who died soon thereafter. The concern started in a small way, advertising to cure deafness with a mixture that Derry and his wife concocted and put on the market. Drouet furnished the medical manufacture to catch the things else. In five years Derry was making \$200,000 a year and advertising heavily. His branch office was opened in London and "H. H. Crippen, M.D. (U.S.A. 1884)" was put in charge. The British branch never did as much business as its Parisian prototype, and Truth, which exposed this fake, unkindly suggested that the reason for the lesser success of the London branch was that, possibly, the English people keep their ears cleaner.

Whatever the reason, Crippen's part of the organization did not prove as successful as Derry's. The decline of the action of the bowels regular, there is a natural craving and relish for food. When this is lacking you may know that you need a dose of Chamberlain's Stomach and Liver Tablets. They strengthen the digestive organs, improve the appetite and regulate the bowels. Sold by all dealers.

The Drouet Institute dated from the death of Derry, who passed away by the delirium tremens route, after having dissipated his fortune in gambling and drinking. Under another name he opened what he was pleased to call the Aural Remedies Company in London, with his "special-absorbent treatment" as a leader. His methods, it seems, were practically those of the defunct Drouet Institute, which a noted British judge—Justice Mathew—designated as "a disreputable institution carried on for unworthy objects by disreputable means." Now, it seems, the Aural Remedies Company has gone the way of the Drouet concern, while its originator bids fair to meet an end even more notorious than that of the founder of the French fake.

BETTER PROSPECTS FOR SETTLEMENT

Minister of Labor Gets President Hays to Agree to Arbitration of the Dispute.

Montreal, July 30.—Things are more rosy for the settlement of the strike this morning. After an all-day conference between Mackenzie King and President Hays, the latter agreed to submit the matters of dispute to arbitration, providing the union leaders agreed to amend their demands by eliminating the request for the dismissal of all strike-breakers and other minor employes.

The Minister of Labor immediately wired President Garretson and the vice-president of the Trainmen's Union at Toronto to return to the city immediately. They reached here this morning and are now conferring with Hays and King. Feeling is optimistic about the result of the latest proposition.

PREMIER LAYS CORNER STONE

Of the Saskatchewan University Building at Saskatoon.
Saskatoon, July 29.—This afternoon Premier Laurier laid the foundation stone for the Saskatchewan university building. A large crowd attended. Lt. Gov. Forget presided.

Hon. Walter Scott and Sir Wilfrid Laurier presided at the subject of education. The present erection is a wing of what is to be the teaching building for arts, science and agriculture, providing the union leaders agreed to amend their demands by eliminating the request for the dismissal of all strike-breakers and other minor employes.

The Minister of Labor immediately wired President Garretson and the vice-president of the Trainmen's Union at Toronto to return to the city immediately. They reached here this morning and are now conferring with Hays and King. Feeling is optimistic about the result of the latest proposition.

BROKEN HEALTH BRINGS WRINKLES

How All Women Can Preserve Good Health and Good Looks.

Two many women and girls look old long before they should. In nine cases out of ten it is a matter of health. Work, worry, confinement in the charge of having murdered his wife, Crippen, who has been quacking it for a few years past in London, appears, according to the medical directories, to be a graduate (1884) of the Homeopathic Hospital College of Cleveland, Ohio. In 1886 his address was given in the directory as 5 Madison avenue, Detroit. In the 1890 edition of the directory we find him at 955 Fifth street, San Diego, Cal., while in 1893 Crippen had crossed the continent and was living at 78 Madison lane, New York city. In 1896 we find his address 1691 Arch street, Philadelphia; while subsequent editions of medical directories of the United States do not contain his name. It was at that time, apparently, that he went to London, where he became the "physician" for a quack concern known as the Drouet Institute for the Deaf. This "institute" was originally established in Paris by a Britisher named Derry.

Had to Get a Renegade.
To keep within the French law it became necessary to secure the services of a renegade qualified practitioner, whom Derry found in a broken-down physician named Drouet, who died soon thereafter. The concern started in a small way, advertising to cure deafness with a mixture that Derry and his wife concocted and put on the market. Drouet furnished the medical manufacture to catch the things else. In five years Derry was making \$200,000 a year and advertising heavily. His branch office was opened in London and "H. H. Crippen, M.D. (U.S.A. 1884)" was put in charge. The British branch never did as much business as its Parisian prototype, and Truth, which exposed this fake, unkindly suggested that the reason for the lesser success of the London branch was that, possibly, the English people keep their ears cleaner.

Whatever the reason, Crippen's part of the organization did not prove as successful as Derry's. The decline of the action of the bowels regular, there is a natural craving and relish for food. When this is lacking you may know that you need a dose of Chamberlain's Stomach and Liver Tablets. They strengthen the digestive organs, improve the appetite and regulate the bowels. Sold by all dealers.

WITH THE FARMERS

FARMERS' MARKET.
Edmonton, Thursday, August 4.—The price of oats is still rising. Some selling as high as 40c per bushel. Eggs have also had a slight upward tendency. The demand for dairy products on the market is good. Quite a few new potatoes were sold this week, the price remaining about the same as last week.

Grain and Feed.
Oats, 38 to 40c per bushel; timothy hay, \$18 to \$20 per ton; upland hay, \$14 to \$16 per ton; rough hay, \$10 to \$12 per ton; green feed, \$9 per ton.

Dairy Products.
Butter, 22c to 25c per lb.; eggs, 23c to 25c per dozen.

Vegetables.
New potatoes, 2 1/4 to 3 1/2c per lb.; old potatoes, 40c to 50c per bushel.

Live Stock.
Choice quality hogs, 150 to 250 lbs., 8c; rough and heavier, 7c to 7 1/2c; fat steers, 1,200 and up, 3 1/4 to 4 1/4c; good fat steers, 1,000 to 1,200, 3 1/4 to 3 3/4c; extra good fat steers, 1,400 lbs. to 2,000, 3 1/4 to 3 3/4c; extra good fat cows, 1,000 and up, 2 1/4 to 3 1/4c; medium quality fat heifers, 1,050 lbs., 2 3/4 to 3 1/4c; extra good fat cows, 1,000 and up, 2 1/4 to 3 1/4c; medium quality fat heifers, 950 lbs. and up, 2 1/4 to 3 1/4c; bulls and stags, 2 to 3 1/4c; good calves, 125 to 200 lbs., 4 1/2 to 5c; good calves, 100 lbs. and up, 3 1/2 to 4c; choice killing sheep, 5 1/2 to 6c; choice killing lambs, 6 1/2 to 7c.

TUESDAY'S GRAIN MARKETS.
Winnipeg, August 2.—Wheat values opened on the decline today and though the news was in favor of the bears, the bulls worked hard to place the price at higher levels. Favorable threshing reports in the Northwest with better reports of the crops in Western Canada has tended to lowering the price and it is the general opinion that they are likely to go lower till more definite reports of crop conditions are received. The Winnipeg market opened: October 1.02 3/4, closed 1.01 3/4; December opened 99 3/4, closed 99 3/4.

The American market opened weaker than the previous close and after slight fluctuations closed weaker than the previous closing prices. Cash demand was light and prices closed: No. 1 Northern 1.03 3/4; No. 2 Northern 1.00 7/8. Liverpool cables opened 1 1/4 lower and closed 2 5/8 lower.

Winnipeg markets: Wheat—October opened 1.02 3/4, closed 1.01 3/4; December opened 99 3/4, closed 99 3/4. Oats—October opened 46, closed 39 5/8; December opened 39, closed 39 5/8. Flax—October closed 2.05 1/2. Winnipeg cash wheat: No. 1 Northern 1.03 3/4, No. 2 Northern 1.00 7/8. No. 3 Northern 99 1/2. Oats—No. 2 white 37 7/8. Flax—2.15.

American markets: Chicago—September opened 1.02 3/4, closed 1.03 3/4; December opened 1.03 3/4, closed 1.03 3/4; May opened 1.07 3/4, closed 1.07 1/4. Minneapolis—September opened 1.10 5/8, closed 1.10 1/8; December opened 1.10, closed 1.10 1/8; May opened 1.12 5/8, closed 1.12 1/4.

TORONTO LIVE STOCK.
Toronto, August 2.—Trade at local live stock markets today continue to show effects of surtitled condition of market early last week. At city market this morning, the highest run of the year was recorded, there being 24 carloads of stock which comprised 223 head of cattle, 465 sheep and lambs, 123 calves and 170 hogs. There was only about one hour's trading and everything was cleaned up at steady prices. The best grade of butcher cattle did not bring over 6.00 per cwt. and the average range would run from 5.50 to 5.90; export medium heavy bulls 5.75 to 6.00; export bulls 5.00 to 5.75; heavy calves—Steers 5.25 to 5.50; heavy bulls 5.50 to 4.25.

CHICAGO GRAIN MARKETS.
Chicago, August 2.—Surprising indications that the Illinois wheat crop is withstanding supposed heavy losses by Heesley say it will be 45,000,000 bushels as against 31,000,000 bushels a year ago, smashed the market today. The close was weak at nearly lowest point of the session and showing a fall of 7/8 to 1 cent to 1 7/8, as compared with 24 hours previous information as to Illinois wheat yield and through the state grain dealers' association and was regarded as sensational from trade standpoint. The result was the selling of many holdings and notably that of prominent local operators. Primary receipts today were of great bulk and world's available supply showed a big increase. Local and eastern mills bought quite a little wheat but most of the day's arrivals went to the elevators and mean the selling of futures. The general Arkansas and Nebraska made a weak market for corn. Crop reports were better but the rich Futurity commission buying on the decline. A huge cash business was done mainly on resting orders. The cash market was weak. No. 2 Yellow closed at 64 1/4 to 3/4. Traders in provisions gave a bullish interpretation to the official report on ribs and meats. Except for October period prices were up generally higher as a result the best gain being in September ribs, 32 1/2 cents.

LONDON STOCK MARKET.
London, August 2.—Money was plentiful and discount rates were steady today with Wall Street weak

VIKING BOARD PROTEST AGAINST CROP REPORTS

Secretary Sends in Samples of Excellent Grain That is Grown in the District—Claim That a Great Increase Has Been Done.

The Viking board of trade has protested a strong protest to some of the crop reports which have been sent out regarding their district. The reports to which the board takes exception do not appear in the Bulletin but the secretary, W. B. Kelcey, has asked that the following letter be reproduced in order that the conditions be placed correctly before the public:—
Editor Bulletin.

Sir,—A series of reports has been published dealing with the crop situation in Central Alberta tributary to Edmonton.

In dealing with the G.T.P. territory from Tofield, east to Viking, the published reports were to the effect that the crop throughout that district would amount to "little or nothing." The crop reporters made a very hasty visit to Tofield, Bruce and Viking. So far as Viking is concerned they came in by auto from the west and went off over the north-trail direct to Vegreville, touching very little of our territory and entirely overlooking the country south, east and north-east.

The report published is misleading and damaging to the district and has caused considerable indignation amongst the farmers. Samples of grain have been taken at haphazard from various points round and these have been forwarded to the Edmonton Board of Trade for inspection.

It is completely untrue that there is acreage from which samples were taken as are under:—
G. S. Loades, 34-47-13-4, wheat 25 acres.
F. A. Gosman, 4-48-13-4, wheat 20 acres.

D. Hennessy, 12-49-13-4, wheat 60 acres.
J. McKill, 34-47-13-4, oats 40 acres.
J. & C. Councilman, 22-47-12-4, wheat 35 acres, oats 200 acres.

J. & C. Councilman, 22-47-12-4, wheat 35 acres, oats 200 acres.
J. Newby, 23-48-12-4, wheat 115 acres, oats 80 acres.

A. A. Burnham, 23-47-12-4, wheat 120 acres, oats 60 acres.
J. Pickering, 30-47-12-4, wheat 45 acres.

J. Lukken, 47-48-13-4, wheat 25 acres.
J. Krings, 24-48-12-4, wheat 60 acres, oats 40 acres.
G. Breen, 26-48-12-4, wheat 45 acres.
J. McMillan, 31-48-12-4, oats 105 acres.

Roddick Brothers, 27-46-13-4, oats 140 acres.
J. Thomson, 25-47-12-4, oats 20 acres.

These samples are representative of the crop generally throughout the district and we think that anyone taking the trouble to visit the district will agree that the report does a real injustice.

The average height of the wheat sent in is about 4 feet and some of the stalks are about 4 ft. 8 inches. We trust that you will give this letter publicity.—Yours faithfully,
W. B. F. KELCEY, sec.-treas.
Viking Board of Trade, 1st August, 1910.

COMPROMISE IN THE G.T.R. STRIKE

Strike Which Has Cost Hundreds of Thousands of Dollars is Ended

G.T.R. STRIKE ENDED BY THE GOVERNMENT
Ottawa, Aug. 2.—Hon. W. L. Mackenzie King, Minister of the Interior, announced today that the Grand Trunk Railway strike had been settled as a result of government intervention.

He stated that the successful issue of the negotiations was due mainly to Sir Frederick Borden.

"Indeed," he remarked, "had it not been for the services of the Minister of Militia, I do not believe that the strike would have been ended today."

Ottawa, Ont., August 2.—The Grand Trunk strike, which has lasted two weeks and one day, and which has cost the company, the striking trainmen, and the conductors hundreds of thousands of dollars and has meant immense industrial loss and inconvenience to the general public, is ended.

The men, other than those who have been guilty of violence or disorderly conduct, go back to work at once on the increased schedule of rates offered by President Hays on July 19, after agreeing, according to the latter's statement, a general increase of 18 per cent, with the promise that the rates now in force on the G.T.P. line of Fort William, which are practically the standard rates demanded by the men, shall come into force on January 1, 1911, instead of a year later.

Strikers Act as Soldiers.
Niagara Falls, Ont., Aug. 2.—The Grand Trunk officials at Fort Erie were surprised to learn that more than half the men who composed the detachment from the Forty-ninth Regiment were former conscripts of the road, now strikers.

It is a peculiar position for the strikers to be in, protecting the property of the company they are warring on while wearing the government's scarlet uniforms. The men are behaving admirably, both officers and privates, being well pleased with their actions. All was quiet here last night.

McBRIDE AND MANN CONFER.

C.N.R. May Increase Its Construction Program.

Victoria, Aug. 2.—Interviewed this morning, Premier McBride stated that he spent yesterday and last evening in conference with D. D. Mann regarding the C.N.R. construction program in Vancouver. Although a final agreement has not been reached, the government and the company are getting very close and a more comprehensive program than had been suggested for inland development may shortly be announced and one with which the people of the island have reason to be more than delighted.

TO END RACING IN N.Y.

New York Jockey Club Will Transfer Events to Saratoga.

New York, Aug. 2.—While the official confirmation is lacking, it is said on good authority tonight that the Jockey Club stewards had practically decided to end racing in the state by September 1st. To carry out the program, the latest dates in the Coney Island Jockey Club at Sheepshead Bay, including the rich Futurity, would be transferred to Saratoga.

FOREIGN STOCKS CEASED.

Chicago Millionaires Have Overlaid the Assessor.

Chicago, Aug. 2.—Chicago millionaires were taken by surprise when Frank W. Jones, president of the Illinois Tax Reform League, filed with the Board of Review a statement alleging that \$100,000,000 of stocks in the hands of Chicago millionaires owned by Cook county have been concealed from the assessor and reviewers and have not been assessed.

ASKED BURIAL IN \$30 COFFIN.

Chicago Man Left Instructions Before Attempting Suicide.

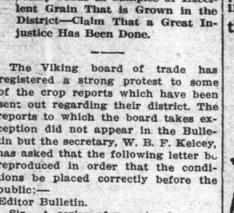

Chicago, Aug. 1.—Suffering from financial worry, Carver Remington, 59 years old, of the family of Remington and Sons, manufacturers of firearms and typewriters, shot himself in the left side yesterday, the bullet passing through his heart.

He is still living, but his chances of recovery are slight. Remington, before committing the act, wrote a number of letters, one giving instructions to be buried in a \$30 coffin.

Tug Sunk in Lake Erie.
Windsor, Ont., August 1.—As the result of a storm on Lake Erie last night the tug Bens, owned at Feno, Mich., by Edwards Bros., sank off Point Pelee this morning at 2 a.m. All the crew are safe at Point Pelee.

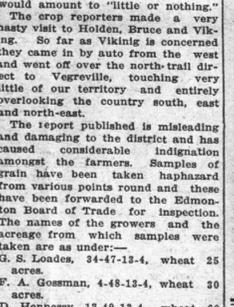

Dr. Gordon C. Hewitt, Dominion Entomologist, says, referring to the infantile death rate from intestinal diseases and diarrhoea spread by the house fly, he believes that the so-called harmless fly is yearly causing the death of thousands of infants, as well as spreading the germs of typhoid fever.

NEW YORK IS SAVING VANISHING BUFFALO

Herd in American Metropolis Has Helped to Preserve the Species Ever After Canadian Government Has Taken Great Montana Herd—But Insured on Private Reserve.

New York, Aug. 1.—That to New York is due in large measure the saving of the American buffalo from extinction seems almost absurd, but it is a fact nevertheless.

The herd, of domesticated buffaloes that has had the greatest prosperity, that has remained the healthiest and that sent the finest batch of recruits to the new reservation in the Wichita forest is the New York Zoological Park herd. It was in this city that the work of saving the buffalo was stamped out by the Zoological Society. Now it appears that the devastation of the remaining animals has been stopped and that the creature will be saved for future generations. The growth of private preserves throughout the country is a decided step toward the ultimate saving of the buffalo, since no one who has a great game preserve nowadays seems to think his collection of semi-wild animals is complete unless he has a few buffaloes.

J. P. McGraw, in establishing his new Western ranch, has decided that he will have a large herd of buffaloes, and has made arrangements to care for them in the most scientific manner.

The herd in the New York Zoological Park continues to multiply from year to year and it becomes necessary every now and then to thin it out by exchanging a few for other animals. Even Central Park has done this. It is believed that the ultimate fate of the buffalo will be to become property of a few private individuals, having a ready money value for food and for its hide and hair. But the chief reason why zoologists hope it will ultimately be domesticated is that the buffalo is a creature that has few enemies.

It has been proved that where there is plenty of grazing ground, the buffalo will bustle for himself, growing fat where ordinary cattle would starve or freeze. He has a warm coat and a digestion which enables him to pick up a living where cattle could not. Briefly stated it costs \$70 to rear a buffalo. At maturity he is worth \$300.

Extirmination of the English sparrow, desired by naturalists for the reason that these birds have in large measure driven out the native songbirds, may soon be accomplished, if having been discovered that "sparrow poppie" equals some of the game food served at fashionable cafes, one giving instructions in the coat of living is responsible for the adoption of the English sparrow as a food. When the price of fresh meats reached a point prohibitive to the poorer classes, the suggestion was made that the sparrow as an edible bird possessed merit worthy of consideration.

Experiments in serving the sparrow were made with the result that sparrows became popular, and attracted attention of restaurant and cafe proprietors who discovered that the bird could be served not only in the poppie form, but on toast and in other ways, not under the name of sparrow on the menu, but with a high sounding French title. The dish pleased patrons and once established its popularity and success.

As a result of the popularity of the new dish, it is said that the great droves of English sparrows that have for years been a public nuisance in all of the large cities are being killed in great numbers, the flesh of the birds having a market value which will contribute to their extermination.

Those who have partaken of the sparrow poppie and sparrow on toast say it is equal to the roed bird, the difference in the flavor of the meat of the two birds being unimpressive even by epicurians.

The chiefs of the local hotels and cafes, while not admitting that the sparrow is being served at their tables, say they can see no reason why an English sparrow should not be as good eating as many of the standard game birds popular with diners. It was said that while the birds are a little larger than the roed bird, they are tender, and possess a good flavor.

Pain in Heart

"For two years I had pain in my heart, back and left side. Could not draw a deep breath or lie on left side, and any little exertion would cause palpitation. Under advice I took Dr. Miles' Heart Remedy and Nervine. I took about thirteen bottles, am in better health than I ever was, and have gained 14 pounds."

MRS. LILLIE THOMAS, Upper Sandusky, Ohio.

For many years Dr. Miles' Heart Remedy has been very successful in the treatment of heart troubles, because of its tonic effect upon the heart nerves and muscles. Even in severe cases of long standing it has frequently prolonged life for many years after doctors had given up all hope, as proven by thousands of letters we have received from grateful people.

Price \$1.00 at your druggist. He should supply you. If he does not, send price to us, we forward prepaid.

Bulletin News Serv

NEWS OF THE DISTRICT

KEEPHILLS. Bulletin News Service. After much agitation on the part of the taxpayers, the local road committee at last combined and ordered the work on the range line north, as far as the township road, this work was commenced on July 29th and the township has finished on Friday.

LLOYDMINSTER. Bulletin News Service. A very heavy thunderstorm broke over the town last night and was succeeded by hours of drenching rain. This was a fitting termination to the continual rain of the week and every grain grower in the district is expressing his satisfaction at the certainty of a good yield provided the crop escapes early frosts.

SIEN. Bulletin News Service. Many friends gathered with regret at the death of Gladys, the infant daughter of Mr. and Mrs. H. R. Dixon, which took place on Tuesday last, the 26th inst., after only a few days' illness. The burial took place at Siem on Thursday and was attended by sympathizing friends who brought wreaths and various designs of floral tributes, which were placed upon the grave after the ceremony was over.

ARDROSSAN. Bulletin News Service. Brookdale picnic is announced for Friday afternoon, August 5th. Haying is now in full swing. The cut is light but available wild lands will be mowed. Some early birds have been out. The cool days of last week were welcomed, as they helped to all the oats, which promised to be light in the head.

ONOWAY. Bulletin News Service. The Onoway annual picnic took place on the picnic grounds at the post office on the 20th inst. The weather was beautiful. About two hundred people were present at the picnic.

REXBORO. Bulletin News Service. E. C. Cross has returned from the West where he has been spending the summer. Harry Smith, president of the Rexboro Agricultural Association, received over \$300 in one day's mail for the fair in September.

Some assistance to put up with a good price is expected. The crop is rather short here but of good quality. Mrs. Merryweather is spending the week in Edmonton. B. McClelland will discontinue work of the government road till after haying.

BOYACCORD. Bulletin News Service. A football match was played here last Saturday afternoon between Boy Accord and Namaso for the Boyle Cup, and resulted in a win for the home team by six goals to nil. In the first half of the game the home team crowded in on the Namaso goal after fifteen minutes' play.

BATTENBURG. Bulletin News Service. The Women's Auxiliary of Emmanuel Church, Battenburg, held their first annual picnic at Sunnyside on Thursday, July 21. There were over 400 present. The weather was everything that could be desired.

MARKED UNREST IN TIBET. Due to Activity of Chinese Troops in Readiness. Simla, British India, July 20.—The unrest in Tibet, due to the continued activity of the Chinese, has assumed so threatening a form that the Indian government has ordered a sufficient number of Indian troops to be held in readiness on the Tibetan border.

ARRESTED AFTER THREE YEARS. Belgian, Who Escaped From Native Land, Caught in St. Boniface. Winnipeg, August 1.—After living three years in apparent security, a Belgian, who escaped from his native land in 1897, was arrested by the provincial police on Saturday and agreed to return without extradition proceedings.

THE WELCOME TO SIR WILFRID

Reports indicate that Sir Wilfrid Laurier has been meeting splendid receptions in Manitoba and Saskatchewan. Crowds have flocked to hear him at every point at which he has spoken.

Free beer was a factor at a Conservative picnic at Hamilton, Ontario. Manitoba election methods seem to be contagious.

Because he told a western audience his ideal was a Canadian nation within the British Empire the Toronto Mail and Empire accuses Sir Wilfrid Laurier of preaching separatism from Great Britain.

The Winnipeg Telegram takes this way of explaining that the Russell constituency was stolen to enable Conservative bettors to rake in the bets.

The story that the government dam and boom at Goose Island had been destroyed is declared by the engineer in charge to be a false rumor.

car-marked and set aside as railway reserves; which stopped the alienation of coal lands from the crown and made the deposits that underlie the western prairies the perpetual possession of the people; which sent men into every country in the world where desirable settlers could be found and persuaded them to come in thousands to make homes and farms in this unpopulated empire; which brought railways where before there were none, and railway competition where before there was monopoly; which by tariff reduction, by the British Preference and by trade treaties, reduced the cost of manufactured goods in Canada and opened markets abroad for the produce of the Canadian farms.

These patent and undeniable facts, and the confidence that what his Government has done indicates what it will do, are the reasons the practical western people hail Sir Wilfrid not only as a great man, and not only as Premier of Canada, but as the champion of those principles of public policy which have made, are making, and will make the western country great.

Free beer was a factor at a Conservative picnic at Hamilton, Ontario. Manitoba election methods seem to be contagious.

The story that the government dam and boom at Goose Island had been destroyed is declared by the engineer in charge to be a false rumor.

The city council did the right thing in making a grant of \$100 to the sufferers from the fire at Campbellton, N.B. Campbellton is a long way from Edmonton, but it is a Canadian town, or was before the fire wiped it out of existence.

Hoop and mouth disease has broken out in the herds of Yorkshire. The United States have temporarily barred the importation of cattle from that district and there is a possibility of Canada having to do the same.

It was the policy of the Laurier Government which stimulated the building by colonization companies which did not set out to build railways, which released for settlement 22 million acres of land in the old prairie provinces which had been abandoned.

them to a recognition of the injustice the British embargo does to the Canadian cattle producer.

The importance of the Brazeau coal fields is indicated by the activity of the railway companies in building lines into the district. The G. T. P. have a line projected easterly from Wolf Creek into the fields; the general manager of the C. N. R. announced in Calgary that that company would proceed with their line from Stettler to Rocky Mountain House; from Red Deer comes news that the plans of the Alberta Central have been approved at Ottawa and that construction work on that line has begun. It is possible the C. N. R. line west from Stettler is designed as a link in a new main line, being continued east to tap the present main line somewhere in Saskatchewan and connecting with the Edmonton-Vancouver line in the mountains. The other two lines are being built apparently for the express purpose of hauling out coal from the Brazeau country. This, with the present reports on the extent and character of the deposits, and the activity of mining companies owning claims there, warrants the belief that before many years have passed the basin between the head waters of the Brazeau and North Saskatchewan will be one of the largest coal producing areas on the continent.

Dr. Crippen's arrest was timely. He was a decidedly "undesirable" immigrant. The capture scores another triumph for wireless telegraphy. The credit for the detection of the disguised pair belongs to the sharp-eyed skipper who spotted them shortly after leaving Antwerp. But had it not been for the wireless instrument aboard and the corresponding instructions from the wireless telegraph, the pair would not have been able to report his suspiciously to the police authorities of the Old Land and to have them verified by details as to the appearance of the missing couple. The most he could have done in such circumstances would have been to turn them over to the authorities on arrival under suspicion, the chances are that he would not even have done this, for people traveling incognito are not so unusual as to convince the skipper of a line that whoever does so is a criminal fleeing from justice. But with the aid of the wireless telegraph, the British authorities of his suspicious and they, not only to give him a description of the pair, but to despatch an officer by a faster boat who went aboard the Montrose at Father Point and identified them. The wireless telegraph has done this, and has done so smoothly and certainly. The wireless could have done the wireless not been in existence. The ability to telegraph where there are no wires has made the world smaller for the fleeing criminal—and thus added another deterrent to crime.

Entries for the fair, which opens August 22nd, continue to come in by the score and the prospect is that they will far exceed all previous records. Entries of stock are exceptionally large and in the case of sheep and swine shows the fair promises something remarkable. In part this is no doubt due to the better accommodation assured exhibitors at the new grounds. There, about 200 acres are being finished touches for the stock buildings, the grand stand and getting the grounds in order. The cattle, sheep and swine buildings are practically finished. Three racing stables have been built, and ten stables for horse and dog training. Work has commenced on the poultry and pet stock buildings. The show ring has been finished. A half-mile racing track has been graded and is being worked daily with drag and roller. Already it is in good condition and by fair time should be about as perfect as possible. The layout of the grounds is good. Separate entrances have been provided for pedestrians and vehicles, and the latter will not be allowed on the main street leading to the grand stand. A driveway has been made around the entire grounds with cross roads at convenient points. Clumps of trees have been left here and there and seats and bandstands placed in the shade of them. A pond in the middle of the grounds is to be cleaned out and converted into a lake. Flower beds have been laid out and some of them are already bright with bloom. With three weeks left before the fair opens the promise is that the grounds will be in excellent condition to receive the thousands who are expected to attend the exhibition.

The Provincial Department of Agriculture has issued a circular advising farmers to cut out the wild hay available, as feed is likely to be scarce during the coming winter and high. Even in this section of the country where the grain crops are good, the absence of early rainfall has resulted in the tame hay crop being lighter than usual. In those sections which have suffered severely from drought the hay crop has suffered to the extent of the grain. The present season has been a very successful one for the hay crop. The hay crop has been unusually heavy and of high quality. The hay crop has been unusually heavy and of high quality. The hay crop has been unusually heavy and of high quality.

COVERED THE ASSIGNMENT. Calgary Albertan—Hon. Frank Oliver, minister of the interior, as a farmer newspaperman, this summer set down for himself an assignment to visit the Yukon territory and find out for himself and for the hand of the country the state of the Yukon overland from Edmonton to Dawson by stage, steam, and pack horse. He was a happy jaunt. Mr. Oliver, like all true newspapermen, covered his self-imposed assignment and is now on his way back from Dawson City with his story.

AWAKENING OF SCIENCE TO THE VALUE OF FRUIT

What is "FRUIT-A-TIVES"?

Medical men are just beginning to realize the possibilities of fruit in curing disease. Its action on the liver, kidneys and skin is wonderful. Yes, fruit in its raw state is impracticable in treating disease because of the minute quantity of the active or curative principle contained in fruit juice.

A physician in Ottawa, after years of patient research, has discovered a process whereby the medicinal or bitter principle of fruit juice is increased in quantity and thus a more active and more valuable substance is obtained. "Fruit-a-tives" is the only medicine in the world made of fruit.

Hundreds of prominent people in every section of the Dominion owe their good health to "Fruit-a-tives." Hundreds more are daily becoming stronger and better by taking them. "Fruit-a-tives" is daily proving its inestimable value as a natural cure in all cases of Constipation, Indigestion, Liver, Bile, Backache and Headache, Neuralgia, Rheumatism, Kidney and Skin Troubles.

Spec. a box, 6 for \$2.50, or trial box, 25c. Sold by all dealers, or sent, postpaid, on receipt of price by Fruit-a-tives Limited, Ottawa.

were filled with water. These are now standing thick with splendid wild hay, the moisture in the bottom land having induced an earlier and more vigorous growth than elsewhere. The farmer in Central and Northern Alberta will therefore be able this year to cut a paying crop on land which ordinarily produces nothing. The farmer in the outlying settlements is enabled to profit more largely than others from the shortage of the hay crop. Being isolated, he will have fewer competitors for the hay growing on the unoccupied land and around him. Ordinarily the man on the frontier farms has a disadvantage through being far from market. This year he will derive an advantage rather than a disadvantage from this circumstance. He will have more wild land to cut over than if he were located nearer market and therefore in a more desirable position. The prospect is that the price will be high enough to make it profitable for him, even despite the long haul to market.

The Globe, of London, in the issue of July 15th, publishes a "Reuter's" cable from Winnipeg to the effect that "Reports from the western provinces with regard to the crop outlook indicate that the long continued drought will reduce the anticipated yield probably by one-half." It would have been difficult to compile a message more like that to spread an absolutely erroneous impression of conditions in the Prairie Provinces. Whether the fault arose through the Winnipeg correspondent mistaking conditions in certain parts of Manitoba to be those pertaining generally, or whether from an unwillingness to admit that things elsewhere were better than in those parts, the result is the same. The despatch is unreliable in its summary of the crop prospects, for no competent authority has estimated the reduction due to drought as likely to reach one-half the expected yield. It is even more injurious in that it falls absolutely to suggest in any way that there are parts of the country in which the crops are good or parts even in which they are other than what the despatch states. It gives the reader unfamiliar with the territory and without other and better sources of information, is that from Manitoba to the Mountains the whole country is parched; that the best that can be hoped in most if not all parts of it is a half crop. This is not said, of course, but neither is the contrary stated, and because the facts are not stated the wrong impression is pretty certain to be created. There is not any general crop failure—to the extent of one-half or any other fraction—in the prairie country. In Central and Northern Alberta crops are uniformly good, in some places excellent, and on the whole likely to return quite an average yield. And this area comprises from one-quarter to one-fifth of the whole settled portion of the prairie country. If there is any considerable reduction in the total crop from drought it is not because the crop throughout the whole country has suffered, but because in certain sections it has suffered pretty badly, so that the good crops elsewhere cannot make up for the shortage.

WHERE BRITAIN BEATS THE WORLD. Toronto World.—The new edition of Lloyd's Register Book contains statistical tables showing the total ocean tonnage of the world has risen from 21,608,000 in 1886 to 41,916,000 in the current year. Of the 1886 tonnage 10,291,000 was steam and 11,317,000 was sail. The present tonnage is: Steam, 37,291,000, and sail, 4,624,000. The following table shows the gross steam tonnage owned in the principal maritime countries of the world in the years 1900 and 1910:

Table with 3 columns: Country, 1900, 1910. Includes Great Britain, Germany, American (U.S.), France, Japan, Italy, Dutch, Sweden, Austria, Hungary, Spain, and Denmark.

THE APE QUARTERLY

Toronto Star—A terrible shock to humanity is the announcement of a German biologist that man is descended not from one particular breed of apes, but from four. Man, just nicely becoming reconciled to being a thoroughbred ape, finds to his horror that he is a mongrel ape instead. So, at least, says Dr. Meichers, whose discovery of the race by ape-doms is as follows:

The gorilla is the ancestor of the West Congo-Guinea-Soudan negro, of the Bantu and the Zulus, and also of the fair-haired and red-haired northern races, the Scandinavians, the Saxons, the North Germans, and the Finns. From the chimpanzee descend the Bushmen, Lapps, Berbers, and southern African races, Iberians and southern Europeans. The South Germans, at least the black-haired and short-headed ones, are brothers of the scarcely human Australians and Papuans, while all alike are children of the orang-outang. The Mongolians, Malays, Polynesians and the rest trace their common ancestry to the gibbon.

What a comfort it must be to the bird hunter to know that his fiery pool is just an outbreak of the primitive instinct of the human race. The bird hunter should be that they should be their leaders, the descendants of the gorilla and the chimpanzee. How the bird hunter is to be a human being, the bird hunter should be that they should be their leaders, the descendants of the gorilla and the chimpanzee.

IN LIGHTER VEIN. Washington Star—F. H. Elliott, secretary of the American Automobile association, was discussing at a dinner in New York the automobilist's well-known enthusiasm.

"A friend of mine," he said, "visited recently the automobile ward of a lunatic asylum. They have, you know, automobile wards now, but I was a large, airy room, and along the wall were arranged some two dozen cots, but of the inmates not a trace was to be seen."

"But where are the inmates?" my friend asked the physician. "The inmates" was the reply. "Oh, they're all here. They're under the beds tinkering with the springs."

Detroit News-Tribune—A trained ostrich recently disconcerted its exhibitor at a music hall by continually endeavoring to break away from all restraint and to climb over the footlights into the orchestra. The widely-advertised act came to a sudden end and the professor emerged from behind the curtain and apologized for the actions of his pet in about these words:—"Ladies and gentlemen,—I'm very sorry to disappoint you this evening. We are compelled to cease our engagement until the management hereabouts has a horse-shoe leader. The one at present employed here has no air on top of his head, and my bird takes it for a hegg."

MAKES CHARGES AGAINST ARMY

W. R. Trotter Calls Salvation Army a Commercial Organization Out for Profit

W. R. Trotter, organizer for the Trades and Labor Congress, in an address delivered to a mass meeting of the wage earners of the city in the Mechanics' Hall on Saturday, made a vigorous appeal to the local trade organizations to identify themselves with the work of the congress and to secure the representation of the province at the forthcoming convention to be held in Fort William on Sept. 12th.

The audience was small, numbering less than forty persons, but else attention and a hearty reception was accorded to Mr. Trotter, who set before his hearers in a well-delivered address an account of the work and aims of the congress, which is an affiliation of all the trade organizations of the continent, endeavoring thus by united effort to realize such objects as are common to all.

The Canadian Manufacturers' Association and the Salvation Army were in temporary association as the objects together of a vigorous attack on the part of Mr. Trotter.

The twofold purpose of the Canadian Manufacturers' Association," said Mr. Trotter, "is, on the one hand, to raise the tariff walls, and on the other, to flood the country with labor, the one qualification of which shall be that it is cheap."

The Salvation Army was described by Mr. Trotter as "a commercial corporation, adopting the worst features of commercialism in order to get money."

The ground of Mr. Trotter's attack upon the Salvation Army was the work of the army in inducing immigrants to come to Canada without regard to the condition of the labor market.

"Col. Lamb admitted," said Mr. Trotter, "at a meeting of the congress in Halifax, at which he was present for the purpose of answering these charges against the organization which he represents, that the army was out for margins and were making money by this work."

Mr. Trotter claimed for the Trades and Labor Congress that it was instrumental in securing the recent legislation imposing restrictions upon immigration.

"At the present time we are on tip in regard to immigration regulations," said Mr. Trotter, "The East End Emigration Society, which is only one of forty-four societies existing in London at the present time, sent to Canada in 1909 four thousand people, and six thousand one hundred in 1907. In 1908 they were only able to send one hundred in consequence of the restrictions on the statute book."

The Central Emigration Society of London came in for strong condemnation from Mr. Trotter. He read an appeal from the board of the society for funds to carry out the work of the organization in sending assisted emigrants to Canada.

"Now look at the composition of this board, which is supposed to be running a charitable emigration society," said Mr. Trotter, and proceeded to read a list of the members, which included the Duke of Sutherland, Lord Brassey and others having large property and commercial interests in this country. Having quoted from one of the local papers a statement that the Duke of Sutherland had large interests in coal lands in the West, Mr. Trotter remarked significantly: "There is a close connection between cheap labor and big profits."

"Land and loan companies are interested in running these emigration societies and appeal for funds in England to aid their good work. It is one of the greatest hoaxes that was ever got up in the name of religion or anything else. They are little better than hyenas, feeding upon the poverty of the workers."

Mr. Trotter then read from the report of the Central Emigration Board the statement that the new regulations governing emigration were hampering their good work.

"As an illustration of the effect of the new regulations Mr. Trotter stated that the Salvation Army had collected in the past one year alone no less than \$5,394 in bonuses from the Dominion government. "Under the new regulations," he said, "no bonus is given for assisted passages, and there were 300 assisted passages this year for which the army will receive no bonus."

Mr. Trotter condemned in the strongest terms statements concerning Canada published in England and misrepresenting labor conditions here.

not be without good results for the cause of labor everywhere. Do not imagine that you can afford to be interested only in the man who wears your trades union button. What affects other trades organizations to their disadvantage must affect you in like manner. The cause of labor is one."

Mr. Trotter was introduced to the meeting by Joseph Adair, vice-president for the congress for the province of Alberta.

NORTH BATTLEFORD IS READY TO RECEIVE HIM

Premier Laurier Will Be Accorded Enthusiastic Reception—Special Train To Be Run From Vermilion—Splendid Program of Sports Has Been Arranged for Afternoon.

North Battleford, July 31.—Canada's Premier will receive a right royal welcome when he steps from his train at North Battleford. The citizens are making extensive preparations to entertain the crowds that are coming from the vast stretch of territory extending northward from town.

Word has been received from a hundred miles north that the people are coming to hear and see Canada's foremost statesman. From away out on the frontier line of settlement and beyond, the posters have gone and word received that the people are coming. The Grand Groves from the south are sending a large delegation, while many of the settlers from that part have stated their intentions of coming.

From the west, North Battleford has made arrangements for running a special train from Vermilion. A large sum of money has been subscribed for sports and decorations. A half holiday has been proclaimed, and the afternoon will be spent on the exhibition grounds where the sports committee will run off a program of baseball, lacrosse, and horse racing.

Several outside crack teams have accepted the invitation to be present, and the games will be well worth watching. At 7 p.m. the Premier arrives and the procession will be formed at the station and proceed through the gaily decorated streets to the High School, where an outside platform has been erected. The meeting will be held in the open air.

M. S. Comerford has established a cement block factory here, which has a capacity of 200 blocks per day. A gasoline engine is used to run the concrete mixer. The factory employs quite a force of men and they will turn out a large quantity of blocks this fall.

W. McManis and son has brought in a force of 58 men to augment their large working force in the water-works and sewers. The work is progressing rapidly and connection with the residences will start at once.

BRADSTREET'S TRADE REPORT

Grand Trunk Strike Has Adversely Affected Business in Canada. New York, July 30.—Wheat shipments from the U. S. and Canada for the week ending July 28, as reported by the Bradstreet's, aggregated 1,246,742 bushels against 1,047,247 bushels last week and 1,574,852 bushels this week last year. Trade in many parts of Canada's still adversely affected by the strike on the Grand Trunk railway. Incidentally mid-summer conditions also tend to make things quiet. However, the northwest appears to be doing well. Montreal reports that the strike is proving a serious drawback to trade, freight service being defective with the result that receipts and shipments are hampered. Talk of over-speculation is heard and the fall in prices of securities and the greater scarcity of money are also regarded as factors.

Grain crop reports from the Northwest indicate an improvement and the dairy industry promises to do very well. Good hay is scarce and prices show a further advance. Hides remain easy. Collections are slow. Toronto advices indicate that while the retail trade is steady, wholesale business reflects the influences of mid-summer weather.

Business failures for the week ending with Thursday number 41, which compares with 32 for last week and 34 for the like week in 1909. Bank clearings at thirteen cities for the week terminating with Thursday aggregate \$118,831,000, a decrease of 2.3 per cent from last week but an increase of 3.9 per cent over the corresponding week in 1909.

BANK CASHIER ARRESTED.

Russo-Chinese Bank Official Arrested For Stealing \$800,000. New York, July 31.—Erwin Wider, the former cashier of the Russo-Chinese bank, who used over \$800,000 of the bank's securities to back up his disastrous operations, was caught by the police this afternoon. He is now in the Tombs under \$25,000 bail and, if the present programme arranged by Acting District Attorney Nott and Judge Foster goes through, he will be on his way to Sing Sing on Monday. Wider has agreed to make the county as little trouble as possible by pleading guilty to an indictment which was found against him today just before his arrest. If he keeps his promise Foster will sentence him at once. Just after he was arrested today, Wider broke down completely.

UNIONISM DEAD IN SWEDEN.

As Result of Failure of Great Strike Stockholm, Sweden, July 31.—Utter disorganization seems to have overtaken the labor unions of Sweden as a result of the failure of the big strike last year. The rank and file are in revolt and refuse to pay in any more money declaring that the funds used by the leaders in 1909 were wantonly wasted. According to figures just published the membership of the unions has been reduced by nearly 150,000, and labor newspapers admit that the cause of unionism is in a critical state throughout the kingdom.

THE HOUSE OF QUALITY EDMONTON'S GREATEST BARGAIN SALE

Starts Monday August 22nd 7 Days Only Ends Monday August 29th

Our large shipments of FALL AND WINTER GOODS arriving daily are compelling us to clear every foot of shelf space in our store. Therefore, for 7 days we are going to give the wise buyers of the surrounding country the chance of a lifetime through FairWeek of buying BEST MERCHANDISE at SLAUGHTER PRICE consisting of BEST QUALITY GOODS in DRY GOODS, LADIES' READY-TO-WEARS, GENTS' FURNISHINGS, BOOTS AND SHOES, GRANITWARE AND CHOICE FRESH GROCERIES.

A Whirlwind of Bargains for Fair Week Whether it Rains or Not

1.00 DRESS GOODS, 45c
1,000 yards Dress Goods in voils, crepe de chenes, Scotch plaids and many others, in shades of cream, black, grey, brown, pink, navy, tan. These are worth 65c to \$1.00. FAIR WEEK, 45c

22c NURSE CLOTH, 15c
500 yards nurse cloth, blue ground with white stripe, different width stripes; these are worth 22c per yard. FAIR WEEK, 15c

15c SHAKER FLANNEL, 12 1-2c
1 case 3-4 inch Shaker flannel. Now a good many would advertise these at 35 inches wide, but that is not our style; these come in all kinds of stripes and plain cream. FAIR WEEK, 12 1-2c

OVERSKIRTS
100 sample skirts, these are made in the latest fall and winter styles. We were the lucky ones to get all the travellers' samples from the best and biggest manufacturers in the east. These are worth from \$7.00 to \$12.00 each. FAIR WEEK, \$3.95

WHITE WAISTS
The balance of our ladies' white shirtwaists in muslins, lawns, all-over embroidery, made in the latest style. These are worth up to \$2.75. FAIR WEEK, \$1.25

SILK WAISTS
Ladies' cream silk waists covered with an extra fine all-over lace. This is a beauty, and regular \$7.00. FAIR WEEK, \$3.75

FALL UNDERWEAR
Ladies' heavy cotton underwear for fall wear. These come in vests and drawers. We bought 2 cases of these to sell at 50c each, but are going to let them slide through the door. FAIR WEEK AT 35c EACH

CORSETS
Ladies' corsets in the latest style, all shapes at from FAIR WEEK, 65c UP

BLACK SATEEN DRAWERS
Ladies' black sateen drawers, made full size, and of the best sateen; regular 85c. FAIR WEEK, 60c

NOTICE
Leave your order with us when you arrive in the city we will have it packed carefully and in good shape when you are ready to leave for home.

BOOTS AND SHOES
Now here is the department where we still shine brighter. We buy these direct from the manufacturers and they are guaranteed to wear like the soil of Alberta. Boys' solid leather shoes. FAIR WEEK, \$1.50 to \$2.50

The nursery shoe for children, these do not cramp the feet; see these before buying. FAIR WEEK, \$1.50

Infants' black kid shoes, both buttoned and laced; patent tip; regular \$1.00. FAIR WEEK, 65c

Misses' Dongola kid blucher, patent tip; regular \$2.00. FAIR WEEK, \$1.65

Ladies' slippers, in laced, panel, strapped, black and tan, in kid or patent leather; regular up to \$2.75. FAIR WEEK, \$1.95

Ladies' Dongola kid bal and blucher high cut; regular up to \$3.50. FAIR WEEK, \$2.50

Ladies' high class patent and kid bluchers; these are made of the very best material and good fitters; regular \$4.50. FAIR WEEK, \$3.50

Men's Dongola kid blucher, also a line of box calf bluchers; these are regular \$3.50. FAIR WEEK, \$2.50

Men's heavy work shoes, solid leather goods at FAIR WEEK, \$1.50 UP

EXTRA SPECIALS
Three cases men's shoes in blucher cut, in box calf, velour calf, patent calf, etc., some of these goods are leather lined and are regular as high as \$5.50. FAIR WEEK, \$3.50

All kinds of Graniteware, Knives, Forks, Spoons, Curtain Rods, Pots, Pans, Glasses and many other lines at FAIR WEEK PRICES

NOTICE
First-class feed barns on Fraser avenue. This Edmonton Fair will be the best fair west of Winnipeg. Come and have a good time.

FREEMAN & CO. 442 and 444 NAMAYO AVE. EDMONTON

TOFIELD-EDMONTON'S NEIGHBORING G.T.P. TOWN

Thriving community in the Heart of the Far-famed Beaver Lake District. Point on the Transcontinental from which branch line runs to Calgary

Tofield, the new town east of Edmonton on the line of the Grand Trunk Pacific Railway, lies just beyond the Beaver Hills in the heart of the Beaver Lake district. On the first of July last, Tofieldians celebrated the sixteenth anniversary of the settlement of which the town is now the centre. The name "Tofield" was first applied to a homestead near the present site of the town by Geo. Cookson, Sr., an early settler. The name came from the settlement doctor, J. H. Tofield, M.D., who lived on a homestead and cared for the sick for many miles around.

The town is three years old and has been moved twice in that time. It was located at first near the old country post office. After waiting two years for the railway to survey the townsite it was moved to the Crafts and Lee property, where it was purchased and picturesquely on a hill overlooking the Beaver Lake, for a short time. Then it descended from the hill and moved to its present site a half a mile away.

Branch Line to Calgary. In October, 1919, Tofield was incorporated as a town, the first on the G.T.P. in Alberta. Since that time its growth has been steady and substantial, and now it takes its place in the front rank of the towns of the province.

The town was selected by the Grand Trunk Pacific as the point from which the branch line south to Calgary should be run. The station on this line is now laid beyond Camrose and within a year trains will be running from Tofield to Calgary. From Edmonton, Tofield is forty miles distant by rail.

Assessment of Town \$275,000. The limits of the corporation enclose an area of 1,280 acres, and extend to a point a mile distant from the margin of the Beaver Lake, which is growing in popularity as a summer resort.

The assessment of the town on a single tax basis is approximately \$275,000. There is but a small debt. A few weeks ago, by-laws were passed for the raising by debentures of \$4,000 for a water-works system, \$1,500 for sidewalks, \$750 for exhibition grounds, \$465 for a market site, and \$565 for a nuisance ground. The work of drilling with

which have visited the community, every all the buildings are equipped with fire extinguishers and the town has two portable engines of 50 gallon capacity each.

A rural phone system has been established in Tofield connecting the town with farmers for miles around and giving the farmers communication with one another. The government phone system has been in operation in Tofield for some time.

A Fine Brick School. Tofield boasts a fine brick school building erected last year at a cost of \$11,000. The building is two stories high and contains four rooms. It was opened last fall and occupied by classes at New Year's. The school work is in charge of three capable teachers, who teach besides the regular public school course that of the first two years of the High School. There are 110 pupils on the roll and the average daily attendance was 85.

Three Resident Ministers. The Anglican, Methodist and Pres-

byterian Churches have resident ministers at Tofield. All the older fraternal societies have branches in the town. The Agricultural Society holds an annual exhibit which will this year take place on September 27-28.

The members of the Tofield town council are: J. O. Latorneau, mayor; A. Lamoureux, M. W. Ferguson, A. B. Harper, A. S. Maxwell and R. E. Emery. The officers of the Board of Trade are: N. C. Lege, president; James A. Young, vice-president; Dr. J. L. Hammond, secretary, and W. C. Smith, treasurer. Tofield has a weekly paper widely known as the Tofield Standard. N. Williams, formerly of Edmonton, is editor.

The Beaver Lake District. The Beaver Lake District proper comprises an area lying within a twenty-five mile radius of the town of Tofield. The soil of this district is two-ROTBOLD. The soil is rich and black loam with a clay subsoil. This soil grows a natural grass, which provides fattening fodder for cattle when cut and cured as hay.

But few homestead lands are available now in the district. Unimproved lands can be purchased from \$10 to \$15 per acre and in the spring of 1918-19 to \$30 per acre according to location and the extent of the improvements.

For dairy produce Tofield offers a good market. Most of the live stock is marketed in Edmonton, the J. Y. Griffin Co. being the chief buyers.

Tofield's Splendid Crops. There have been splendid crops in the Tofield district, although grain growing has not been gone into extensively before. The difficulty of marketing the grain. Elevators have now been built and the G.T.P. has brought the world's market to Tofield's door. A large number of farmers have over 100 acres in crop with wheat, oats and barley. One farmer, twelve miles southeast of Tofield, has 200 acres in crop, mostly with oats and barley. His fields promise a good yield. Many others have equally promising stands of grain. It is quite common to find acres in crop far from where last year there were but thirty or forty acres broken.

A number of letters received recently by the board of trade of Tofield are given below as throwing an interesting light on the experience of settlers in the Beaver Lake district.

I was requested to write an article on my experiences in Alberta. I lived in a thriving town of 6,000 in South Dakota, and in the spring of 1902 finding I had not been able to live within my income, and concluding it was time to make a change, I resolved to move to Alberta. We started on the 13th of May, and soon after arrived at Tofield. Not being a scientific farmer I am unable to give you all the tabulated returns of a scientific farm, but by experience I have thrashed out some results that satisfy me. Cattle was my first thought with the unlimited range and abundance of hay. In the meanwhile I got a few hogs to dispose of from time to time. Four cents is the minimum price and five cents the maximum.

I have also raised considerable grain, with yields of from 50 bushels up of oats, 30 and up of barley and 20 and up of wheat, prices averaging probably 25c, 30c, 60c respectively. Some money can be made raising grain for market.

Several years ago my attention was drawn to the possibilities of the dairy business, which I have taken up of late as the best paying business on a farm, with a result that now the income derived from fifteen cows keeps my family comfortably with many of the luxuries of life. This income, supporting the family, then leaves an absolute profit of all grain raised for the market, of all hogs or other stock disposed of and of any other products that we may have to sell.

This is the experience of one that came to Alberta without a cent except a capacity for hard work. I am only stating my firm conviction when I say there is not a country on God's green earth where I could

have done better and enjoyed myself so well. While I am proud of having been born under the folds of "Old Glory," I am doubly thankful for the reputation that led me to the green fertile fields of the Beaver Lake district.

C. C. HARRIMAN. Tofield, P.O.

Successful in Gardening. I came to the Beaver Lake district from St. Louis, Mo., eight years ago. Since then I have been farming and raising garden truck for sale. In this district one can raise good crops of small grain. Oats do particularly well. As soon as the farmers "catch on" to raising alfalfa, it will be grown for hogs to eat green, and for hay. Some of the best hay is green today, April 28th.

All kinds of farm roots and given half a chance. We have asparagus big enough to eat now. Timothy does well here, but is not much used as the prairie hay isn't so bad. He haven't tried raising apples yet, but red, black and white currants grow to perfection.

JOHN L. GRAY. Better Than Minnesota. I left the State of Washington four years ago for Alberta. I landed in Tofield the 11th day of May, 1916, and have been engaged in farming in Beaver Lake district ever since. I have farmed in Minnesota, Dakota and Washington, but the Beaver Lake district is better than any of them for mixed farming. All kinds of grain do well here, including fall wheat, which is a success. I have raised it three years and it has done well. Horses, cattle and hog raising is also a paying business. One can raise them cheaper here than any other place I know of.

My friends, if you intend to come to Alberta, don't forget the Beaver Lake district. J. H. OLSEN. Royce, Alta.

How to Grow Strawberries. It is a surprise to the writer of this article that so many of the people of Alberta seem to think strawberries can not be raised in this province. However, I have been very successful in raising them for two years on our farm, 1.2 miles from Tofield. The method followed is this: The ground in which they are to be planted must be free from all weeds. The ground should be laid out in rows four feet apart. Then set good thrifty plants two feet apart in the rows. Keep them free from weeds and grass, and pick off all the blossoms, the first year. Then in the fall cover them with hay that is free from weeds and grass, and in the following year an abundance of large strawberries. Care should be taken in not uncovering them too early in the spring, and also in keeping the runners out close.

THRESHING FROM THE STACK. for the first six months of the year. B. O. Bard is chairman of the Tofield school board.

Coal at \$1.75 a Ton. Coal of excellent quality may be purchased at \$1.75 at the mine, a short distance south of the town. Two mines were in operation last winter and a third company has bought coal lands and will commence operations in a few months.

The whole of the western part of the Beaver Lake District is underlaid with lignite coal. At some places the

ing in Alberta in those days. Things looked very dull and discouraging, and our early settlers of Bardo got their share of the hardships of pioneer life. Their chief occupation was stock raising and dairying. What little grain they raised was threshed out with a home-made machine turned by hand power. Their hearts yearned for the past—for the friends and home they had left; the present

Raised 40 Bushels Wheat. I have been requested to give a few remarks about our district. I landed here ten years ago and must say that I like it fine. I came from Iowa, where the price of land ranged from \$50 to \$100 per acre, and here at that time it was \$5 per acre. It is now from \$15 up, and take it one year with another we can make as much off each acre of cultivated land here as we could in Iowa. We have splendid crops of wheat, oats and barley. The wheat has been touched by frost a few times, but I think the final result is that we have been using a late wheat. I have raised 40 bushels to the acre of good "Red Fire" wheat. Potatoes and all kinds of roots do well. We raise quite a number of cattle as we have lots of hay and good water. Horses do well on the prairie the year round. Wild small berries grow in abundance. I live at the south end of Beaver Lake. P. O. MOLINE. Tofield, P.O.

Experience in Sheep Raising. In answer to the question, how I am satisfied with the brush cutting machine, I would state that I think it is the proper solution of the brush question.

I had 100 acres cleared by the machine last year when the machine first started. The 100 acres were cleared in six days at a cost of \$1.15 per acre for board and all expenses. Some of the growth was heavy stuff. This spring I set trees to it and burned it off. Now the ground is clear and ready for the plow.

JOHN MCCONNELL. Settled 17 Years Ago. I came to the Beaver Lake district seventeen years ago, from Nebraska. It is my opinion that this district affords the very best conditions for mixed farming. In the early years, being so far from markets, money came slowly, but with the coming of the railroad and the market near at hand things are going right along.

J. W. COOKSON. 36-50-19 W 4th.

S. A. HALLBURG. 12-23-19, Ross Creek P.O. Prospered in Canada. I arrived in the Beaver Lake district the 20th of May, 1907, with my

family. I came from Iowa, having "settled" here for twenty years, never accumulating more than a scanty living. Since coming to Canada I have prospered better than ever before. I settled here on a piece of new land without a stick of improvement. My son and I have worked very faithfully, doing time. I have now all the tools necessary for farming: fifteen head of horses, 20 head of cattle, good house, barn and out-buildings, one hundred and twenty-five acres under cultivation and all fenced. Every year's plow with the exception of a small loan, which can be met at any time when I sell my last year's crop.

Bardo P.O. Bardo Church. I am requested to state briefly what the productions of our favored district are. We have raised crops of wheat of from 40 to 50 bushels per acre, oats 75 to 140 bushels, barley 25 to 45. Peas, rye and flax have also been grown. I have had corn every year for fifteen years, and always had

any one can come to this district with money enough to make the first payment on a quarter section and in four years have the land clear, if he only gets into the harness himself and leaves liquor alone. But bear in mind the dollars do not lie on top; you must dig them out. They are here to find if you want them. For a poor man such as I was there are many advantages in this country which I have not mentioned.

T. A. ROHEM. Bardo P.O. Have Raised Apples. I am requested to state briefly what the productions of our favored district are. We have raised crops of wheat of from 40 to 50 bushels per acre, oats 75 to 140 bushels, barley 25 to 45. Peas, rye and flax have also been grown. I have had corn every year for fifteen years, and always had

Two years ago I visited my old home. It was a decided change to go back to the winds. The climate in the Beaver Lake district is an agreeable one and an absence of the frequent high wind is a very acceptable feature.

A. W. HUNT. Tofield, P.O. Took Up Mixed Farming. I came to the Beaver Lake district eight years ago from Oklahoma. I had a large family of small children and \$1,000.00. First thing I bought some land and built a house on it. Then I went into mixed farming. Now I have a 480 acre farm with house and barn, 12 horses, 25 cattle, 150 sheep and a steam threshing outfit. A man can make a living, and then some, easier in this district than anywhere I know. HENRY WOOD. 2-52-19, Tofield P.O.

Experience of Old-Timer. Secretary Board of Trade, Tofield, Alta. Dear Sir: In reply to yours of recent date inquiring if I could, as an "old timer," recommend the Beaver Lake district to homeseekers coming west, I would answer emphatically, YES. I consider Beaver Lake district one of the best parts of Alberta.

With its rich agricultural lands underlaid with vast beds of coal of good quality, it is second to none in the whole of Alberta.

My brother-in-law came here together in the year 1872 from England and made it a point to see the country north-east, east and south-west of Edmonton, also around Wetaskiwin, east along Battle River and south of that river, but when we came to Beaver Lake we soon decided on a country—a lake 18 miles long and 10 miles wide, teaming with good fish and thousands of wild geese, ducks and other fowl. When we examined the soil and found it rich, it was an easy matter to make up our minds what to do even though it were 75 miles from Edmonton by wagon road. We have farmed and ranched here

for the first six months of the year. B. O. Bard is chairman of the Tofield school board.

Coal at \$1.75 a Ton. Coal of excellent quality may be purchased at \$1.75 at the mine, a short distance south of the town. Two mines were in operation last winter and a third company has bought coal lands and will commence operations in a few months.

Dear Sir: In reply to yours of recent date inquiring if I could, as an "old timer," recommend the Beaver Lake district to homeseekers coming west, I would answer emphatically, YES. I consider Beaver Lake district one of the best parts of Alberta.

With its rich agricultural lands underlaid with vast beds of coal of good quality, it is second to none in the whole of Alberta.

My brother-in-law came here together in the year 1872 from England and made it a point to see the country north-east, east and south-west of Edmonton, also around Wetaskiwin, east along Battle River and south of that river, but when we came to Beaver Lake we soon decided on a country—a lake 18 miles long and 10 miles wide, teaming with good fish and thousands of wild geese, ducks and other fowl. When we examined the soil and found it rich, it was an easy matter to make up our minds what to do even though it were 75 miles from Edmonton by wagon road. We have farmed and ranched here

for the first six months of the year. B. O. Bard is chairman of the Tofield school board.

Coal at \$1.75 a Ton. Coal of excellent quality may be purchased at \$1.75 at the mine, a short distance south of the town. Two mines were in operation last winter and a third company has bought coal lands and will commence operations in a few months.

The whole of the western part of the Beaver Lake District is underlaid with lignite coal. At some places the

MR. DELLAR WON FROM THE BRANDON ANGELS

Edmonton's Star Pitcher Holds Morrow's Bunch Safe—Victory in Evidence, as Also Their Timely Hitting.

(Wednesday's Daily.) Brandon, Aug. 2.—The Eskimos claimed the game tonight by superior and harder hitting, both pitchers working well.

EDMONTON NEWS

TUESDAY'S DAILY.

SENTENCED FOR STEALING. Chris Buquist, a Swede employed in Hansen's construction camp, about three miles from St. Albert, was arrested Friday on a charge of theft. Buquist stole a pair of blankets and some bacon and it was his intention to procure a mule and escape with his booty. Unfortunately for him, however, he was caught with the goods on him and held, pending the arrival of a mounted police officer. He was tried Friday night at the R. N. W. M. P. barracks by H. B. Dawson, J. P., and sentenced to six weeks hard labor at Fort Saskatchewan.

MORE CARS SHIPPED. Two more cars for the street railway were shipped last week from the Ottawa car company's works and will reach here in the course of this week. It is likely that all the cars of the present order will be of the double end variety. The decision to change to a single end system was made too late to affect the cars now being manufactured.

SENT UP FOR TRIAL. After several days hearing in the police court of Strathcona, William Parker, who was a prominent figure in the King murder trial, was on Friday sent up for trial on a charge of horse stealing. Parker was charged with disposing of horses purchased jointly with Brown. These men bought a team of horses from Messrs. Mohr and Morlin, in Strathcona, last fall, while in partnership, failing to make payment, were ordered by the court to make restitution in a recent suit brought by the firm. Brown, who now lives in Edmonton, charges Parker with having sold the horses and never allowing Brown his share.

INSPECTING OFFICER PLEASED. Inspection of the stores of the 18th A. M. E. B. was made last week by Capt. E. F. Mackie, D.S.O., of Calgary. The equipment, including rifles, saddlery, etc., was inspected in the armories at Edmonton, Fort Saskatchewan, Strathcona and Morinville. Before leaving for Calgary Capt. Mackie expressed his satisfaction with the condition of the stores. "Things here are in first class condition. I have never seen them better before," he said. The inspection was made on Monday, Tuesday, Wednesday and Thursday of last week.

A LACOMBE WEDDING. A very pretty wedding took place in Lacombe on July 27th when Arthur Belcher, manager of the Merchants' Bank, and Lillian Adelaide Mooney, eldest daughter of Mayor W. S. Mooney, were united in matrimony. The ceremony took place at 2.30 in the afternoon in the Presbyterian Church, Rev. Matthew White, M.A., officiating. The church was beautifully decorated, and in the presence of about three hundred people the solemn vows were taken. Immediately after the ceremony a reception was held at the home of the bride's parents, where a very enjoyable time was spent in exchanging gifts.

RURAL LIFE CLUB. Steps are being taken to form a rifle club in the Clover Bar and East Clover Bar districts. A meeting has been called for Wednesday, August 10th, at 8 p.m., at Horton's store. Everyone interested in the movement is invited to attend.

AT THE LAND OFFICE. The past month has been a very busy one at the Edmonton Land Office, the prospect of excellent crops having brought many land-seekers. During the month the statistics were as follows:

Table with 2 columns: Date (July 1909, July 1910) and various statistics (Homestead entries, Pre-emptions, Purchased homesteads, etc.)

STANDARD VI RESULTS. The results of the Standard VI examination are made public today. In the list of successful candidates only the names of those who wrote on the full examination are given. The Standard VII or university entrance results will be published on Wednesday or Thursday morning and will include those candidates who were also successful in a partial Standard VI examination.

SETTLERS FOR GRAND PRAIRIE. During the two weeks from July 15 to 25, one hundred and eleven settlers have been taken into the Grand Prairie country over the new route being constructed by the provincial government northwest from Entwistle. They have been in charge of Land Guide Hay, who has now a stage route established from Entwistle to Sturgeon lake. The route is made on two ridges, one from Entwistle to Macleod river and the other from Macleod river to Sturgeon lake.

POSTAL CHANGES. During the month of July there were two new post offices established in the Edmonton district. One was at Heatherwood section 15-22-17 W. 5th, with weekly service from Wolf Creek, and the other at Husgett, section 20-24-1 V. 5th, with weekly service from the same place.

vice from Teffordville. Both began on the 1st of August. Progress of the service was increased along the line of the G.T.P. as follows: Erice and G.T.P. Ry. station to 12 per week. Chauvin and G.T.P. Ry. station to 12 per week. Edmonton Station and G.T.P. Ry. station to 12 per week. Edmonton and G.T.P. Ry. station to 12 per week. Holden and G.T.P. Ry. station to 12 per week. Irms and G.T.P. Ry. station to 12 per week. Ribstone and G.T.P. Ry. station to 12 per week. Erice and G.T.P. Ry. station to 12 per week. Wolf Creek and G.T.P. Ry. station to 12 per week. Wainwright and G.T.P. Ry. station to 14 per week. Not Creek and G.T.P. Ry. station to four per week. LaCalmette and Legal to two per week. Erice and Viking to two per week. Money order offices were established at Aniak, Fortinot and Round Hill.

STANDARD VI RESULTS. The following are the successful candidates in Standard VI department examinations in Edmonton: Fern McLean Abbott, John H. Adnell, Marjorie Agnew, Neelbit E. Alexander, A. Alice Allen, Travilla N. Allen, Susie J. Alton, Arthur Brodie, Frank S. Brown, Emma Armstrong, Helen Armstrong, Nora Armstrong, Edna Armstrong, Jessie M. Arthur, Anne S. Ash, Leo E. Brown, Ronald H. Fox, Donald G. Gladys Bateman, Geo. F. Bauer, May M. Becker, David E. Berger, Eliza M. Bertrand, Gladys Bigelow, Pearl L. Bisset, Alice J. Black, Irma Blackett, Lila Boardman, Harriet M. Bowen, Son Bowser, Emma Brown, Harry J. Brown, Catherine Brodie, Frank S. Brown, Leo E. Brown, Hilton Bruce, Gregory Bryson, Cameron A. Buck. Gerald Caboon, Flora Cameron, Aggie Campbell, Jas. C. Chapman, May N. Chittick, Marie A. Christie, Agnes Clark, Edith L. Clark, Flora Clark, Leona E. Clark, Harold Clark, Lillie Coffey, Ethel C. Collier, Irene E. Connolly, Gerald A. Cestigan, Geo. F. Cox, John K. Crozier, Basil L. Callen, Mary E. Cuthbert.

AT THE CITY HALL. The city commissioners have applied to Arch Mitchell, assistant forestry superintendent at Indian Head, Sask., for information as to the best kind of trees to be set out in the nursery of five acres to be established at the east end park. The following transfers in the management of post offices were made: Cardiff—To Wm. Dives, vice Dr. E. H. Knight resigned. Gaet Valley—To R. G. Gunn, vice E. H. Knight resigned. Lac St. Anne—To Miss B. Gunn, vice Dr. T. L. Harrison resigned. Lea Park—To H. Pickles, vice Mrs. M. E. Graham resigned. Morinville—To O. N. Lavallee (re-appointed). River Course—To W. B. Gordon, vice J. H. Abraham resigned. Royville—To Frank McQueen, vice J. V. Maloney resigned.

READY BY AUGUST 20TH. Practically everything will be completed at the new Exhibition Grounds by the 20th of August," said Manager Harrison to the Bulletin on Tuesday. "Already the main building, comprising stock and horse stables, a fire hall, police station, feed store-house, and a superintendent's cottage, has been completed. Work on the grand stand, which is to be completed by the 1st of August, has been held back through lack of timber, but presents a doubtless shift is being run and the stand will be completed shortly. The horticultural and dairy building, one of the finest on the grounds, will be completed by about the 15th of this month, as will also the stock pens, platform and sidewalk."

WESTMINSTER PICNIC. With lots of fun and plenty of provisions, a very enjoyable time was spent Monday evening on Groat's flats at the picnic given by Westminster Young People's society. About 100 young people sat down to the dainty supper about 7.30. Afterwards was a very interesting game of baseball was carried out between the young men and young ladies, the score being 7-4 in favor of the ladies. The young men played with their left hands. This opportunity was taken when the appreciation of the society to M. W. Harlow, who has been identified with the society for the past three years and who will leave shortly for Toronto to enter university. He was presented with an address and a handsome travelling bag which he acknowledged briefly. After further games a most enjoyable evening came to an end and all returned home.

REDUCE TIME FOUR HOURS. There is a well defined rumor on the streets to the effect that the Grand Trunk Pacific intends to reduce the time of its daily train service between Edmonton and Winnipeg from thirty hours to twenty-six. Since the service went into effect a month ago the railway company has found that the time set down has been longer than is necessary by several hours. This is due to the fact that the roadbed is in such splendid condition that the operation of trains at a very high rate of speed is possible. The one complaint passengers have on this line is that the trains are frequently late at the different stations waiting for time. The ultimate object of the Grand Trunk Pacific in its train service between Edmonton and Winnipeg is to put on a twenty-four hour schedule. This will admit of a train leaving here one night and arriving in Winnipeg at the same hour the following night. Even at the present time the Grand Trunk Pacific, with its thirty-hour schedule, has the other two roads beaten by several hours.

SUNDAY SCHOOL CONVENTIONS. The following are the appointments for the District Sunday School Convention closed this evening with a large mass meeting in the Presbyterian church at the Thursday afternoon and evening sessions. Rev. D. A. Gunn and Miss Helen Park were special addresses on different phases of Sunday school work. On Friday morning Professor Henry and H. E. Kenny took charge and the day sessions were occupied by conferences on district Sunday school work, and methods of conducting schools and a round table on Bible school music. At the evening session a large choir, under the direction of Professor Henry, rendered several selections very acceptably, and H. E. Kenny gave his popular address on "The World's Sunday School Convention at Washington." The World's Sunday School Convention, July 20—Tonight, two members of the four party of the Sunday School association held a mass meeting here. They were a large attendance and the meeting was very enthusiastic. Professor Henry conducted the musical part of the service with the help of a large and efficient choir. H. E. Kenny gave a very vivid description of the world's convention in Washington, D.C., and the audience left the impression that permeated that wonderful gathering.

Colin Fraser, the well-known free trader, arrived in the city from the north on Saturday, accompanied by his wife and two children who have been associated with him in his winter's work. The winter has been a good one for the said Mr. Fraser, who was by the Bulletin on his arrival in the city. "The total value of the winter's catch is about \$21,000," he said. "This year we have secured a larger quantity of rat than usual, the skins numbering about 25,500. These we disposed of to the Hudson's Bay Co. at Port Chipewyan for \$10,000. This is the first time we have sold any of our furs to the company in the north. The remainder of the catch, which should represent about \$15,000, will reach the city on Monday. The most valuable of the furs in the consignments are those of eight silver foxes. The value of the skin of a silver fox is about \$500." Mr. Fraser stated that the winter was comparatively mild in the north, and that very little snow fell. The party left Fort Chipewyan on July 6th.

This is the first time we have sold any of our furs to the company in the north. The remainder of the catch, which should represent about \$15,000, will reach the city on Monday. The most valuable of the furs in the consignments are those of eight silver foxes. The value of the skin of a silver fox is about \$500." Mr. Fraser stated that the winter was comparatively mild in the north, and that very little snow fell. The party left Fort Chipewyan on July 6th.

Colin Fraser, the well-known free trader, arrived in the city from the north on Saturday, accompanied by his wife and two children who have been associated with him in his winter's work. The winter has been a good one for the said Mr. Fraser, who was by the Bulletin on his arrival in the city. "The total value of the winter's catch is about \$21,000," he said. "This year we have secured a larger quantity of rat than usual, the skins numbering about 25,500. These we disposed of to the Hudson's Bay Co. at Port Chipewyan for \$10,000. This is the first time we have sold any of our furs to the company in the north. The remainder of the catch, which should represent about \$15,000, will reach the city on Monday. The most valuable of the furs in the consignments are those of eight silver foxes. The value of the skin of a silver fox is about \$500."
