POWDER STARCH. THE subscribers have been appointed Whole-male Agents in New-Brunswick, for the above celebrated Stakent, to which the Prize Medal was awarded at the late Great Eshibition in London, and noticed for its "general superiority," by the Royal Commissioners and Jucy, from amongst thirty or forty Samples Exhibited. The manufacturers have also received testimo-mials from Her Mojesty's Laundress, the Countes-of r glinton, and many others of the Nobility of the United Kingdom; and, from its superior and pendiar qualities, it has met with an almost universal acknowledgment. In the manufacture of "Glenfield Patent Double Refined Powder Starch," it goes through a process so simple and efficient, that it acquires no proper-ties hurtful to either texture or appearance of the goods, but on the contrary, produces a fine, clear, fexible finish; it requires no boiling, is perfectly free from all impurities, and is warranted not to adhere to the Iron. A consignment has just been received of the above celebrated Strakent, to which the attention of the public is solicipal.

FOR NEW YEAR'S DAY. This day begins another year, Another twelvemonth's round. In praise and prayer, in faith and fear, God grant we may be found.

In praise, for blessings numberless Throughout the life that's past; In prayer, that God will keep us safe While this year's life shall last.

In fear, for oft we've strayed and sinned; How oft transgress'd his law ! O, surely, of his heavenly wrath We all should stand in awe.

In faith; for hath not Jesus said, "Repent, and be forgiven; Go, sin no more; believe in me, Aud fi: thy soul for heaven?"

How BEATTIE TAUGHT THE EXISTENCE OF A DERY TO HIS SON.—In the corner of a little garden, without informing any person of the cir-umstance. DISCOVERIES DURING THE LAST HALF CENTURY. There has been no period since the commence-ore of the world in which so many important dis-coveries tending to the benefit of mankind were made, as in the last half-centry. Some of the most wonderful results of human intellect have been witnessed in the last fitty years. Some of the grandest conceptions of genius have been per-tected. It is remarkable how the mind of the world has run into scientific investigation, and what achievements it has effected in that short period. Before the year 1860 there was no a single st amboat in existence, and the application of steam to machinery was unknown. Fulton launched the first steamboat in 1867. The News Boy's Address respectfully presented to the Patrons of THE OBSERVER.

Last New Year's day I overheard, This short confabulation ; " I'll give him six-pence," said a beard-"'Tis ample compensation"-"For so much running?" said his wife, I loved the Women well before, As kind and tender nurses-But now, I love them more and more-Much money to their purses !!!

With table loads of choicest cheer, I wish my friends a good New Year, With bounding, heart-felt pleasure ; I court again your wonted sm n home-spun verse, in simple style; In old, familiar measure.

Farewell old-year-adien, adieu. Peace to thy shade, friend fifty-two-Some drop a tear at parting— But fifty-three's young, childish mirth, The gossip of his recent birth, Has check'd the tear when starting.

With willing hearts and tuneful tongues, Let us unite in grateful songs, To laud the power supernal; Who gives us plenty, health and peace ; Whose care and bounty never cease; Whose mercies are diarnal.

While cholera and yellow pest Are ravaging the south and west, And filling death's dark caverns, Our atmosphere, most pure and good, Gives nerves full strength and feeds the blood; Except the air of taverns.

And, this will soon be purified, When once the liquor law's applied-The first of June ! the glorious, Will break the (ardent spirits') line. And having sunk the brandy-wine, Make Dow (a Howe) victorious.

Turn, turn ye to your proper trade, Or if you have none, seize a spade, Or it you have none, serve a space, Or axe, ex-tavern keepers— You'll not find much romst-beef in sle, No go and dig, ne'er mind who rail, Or hew the rail-way sleepers.

New Brunswick lift thy beaver high, The dawn of brighter days is nigh, No longer sleeping, dreaming, Thy children all on tiptoe stand, To see a rail-way cross the land, The iron race-horse steaming.

The war of words, maintain'd so long, Twixt pen and pen, 'tween tongue and tongue, Each man against his neighbor Which kept the project well afloat, Still adding nerve, and point, and note, Has prov'd no mountain's labour.

Push on the survey-clear the way-Speed, speed the time, the joyous day, So long in expectation; When Canada and Western States, With us shall meet, as marriage mates, Should Nova Sections still hang back, Our line will run to Shediac, Then, Epicures, for oysters!!

Baint John has sons (by happy luck) Too much akin to Friar Tuck, To choose the fare of cloisters !!!

Lift up thy head with honest pride--New Brunswick, thou may'st stand beside In just, fair competition, Far older States, in all their marts, For agriculture and the arts--Witness the Exhibition.

With thy good soil and air and health, Thy boundless stores of min'ral wealth, Thy useful arts and science, When once thy promis'd rails are laid, Thou need'st not be the least afraid, To bid the world defiance.

Forsaking blessings such as these, Thy sons will yet cross stormy seas, To earth's remotest regions; With golden hopes and swelling sails, Transport themselves to New South Wales-To serve in Mammon's legions.

How strong the Magnetism of gold !! Home, kindred, health, no ties can hold Against its great attract Only by this some move and live ; And yet it ever fails to give Content and satisfaction.

What hosts forsake (like one of yore) The living God for one of ore; O! madness beyond measure! A god, for which the bandit's knife Full often takes the owner's life, What sorry, dear-bought treasure.

With pleasure turn we to Saint John ; Here go-a-head-men still push on, In right-direction movements; With Bell-tower, bridge, and steamers' pier, A new Cathedral soon will rear Its head among improvements.

The next will be a home for Tars, Aloof from Crimps and Tavern-bars, And other vile temptations; Where they may live like prop Safe from the fell destroyers den, With all its degradations.
