CANADIANS STORM DOMINATING FORT OF LENS DEFENCES

Hill 70, Famous Enemy Stronghold, Falls To Dominion Troops In Early-Morning Rush -Now Control Lens and Loos Salient.

London, Aug. 15.—Capturing first line German trenches on the out-skirts of Lens, British-Canadian troops were again closing in tighter on

the famous coal city today. An assault, which extended from the northwestern outskirts of the town to Bols Hugo, northeast of Loos, was launched early this morning. The Canadians swept into first line trenches of the enemy, and were still progressing satisfactorily, when Field Marshal Haig filed his report.

The same time British and French forces resumed their attack on the German lines in Flanders. British troops made gains northwest of Bixschoote, while the French made considerable advance west of Dixmude. East of Cite Stemilie a strong German counter-attack was thrown against the British, but was completely crushed.

Add Halmar Braining, Plonters of the conference, accepting a consultative status for the conference. They said they would work to get this asis accepted, but they still considered it important that the Entente powers should be represented at the conference.

The British also pushed their lines into the northwestern environs of Lens, in a semi-circle around the eastern side of Mechanic Killed In Hill 70. The British attack was made on a 4,000-yard front, which had an extreme depth of 1,500 yards.

Beginning at a point just above Hugo Wood, the new British positions now run southeast and beyond Hill 70 towards Lens. The line then bends southwest and encircles R. E. Crane of Royal Flying the suburbs of St. Laurent and St. Emelie.

The British guns had been pounding for days Hill 70, which the Germans considered impregnable. The infantry attack began at 4:25 o'clock this morning. "I will probably be criticized for what I am saying," said Mrs. Hughes, "nevertheless I believe it is an absolute fact that the high price of milk and butter is in a substantial measure due to the wholesale manufacture of ice cream. There is no reason why butter should be selling at up to 50 cents a pound when the cows are on the grass in August, or why milk should be 9 cents a quart. For many families this is a real hardship. A kindergarten teacher stated recently that she had noted the effects on the children of the advance in prices. The children were not looking so well nourished as formerly, and she attributed this to the fact that they were not getting enough milk and butter. The workingman on an ordinary they were not getting enough mik and butter. The workingman on an ordinary wage simply cannot afford to supply a family of say, five or six, with sufficient milk and butter at present prices. Some families have not been buying milk at all; others, perhaps, a pint a day.

We can't afford to have the children suffer for lack of proper nourishment. I believe that the housewives have the solution of this high cost of living in a large measure in their own hards. So far as ice cream is concerned, it is a luxmeasure in their own hards, so har as ice cream is concerned, it is a lux-ury, excepting for invalids and infants, and, as a luxury, it is one of the things people can do without in order to bring the necessities within reach for those in such circumstances they cannot meet the present high prices."

ations Already Received.

The check came through yesterday from the Government to put the Western Fair buildings and grounds in shape after occupancy for several months by the soldiers, and preparations are well under way to make the fiftieth anniversary exhibition a success.

A month or so ago Major R. W. Bishop, C.R.C.E., with Secretary A. M. Hunt of the Western Fair board, went over the grounds and buildings to estimate the amount that would be required for repairs and alterations owing to their use for military purposes. The estimate was forwarded to the department of militia and defence, and the check promptly forthcoming without demur, circumlocution or postponement.

The statement was made today at the Western Fair office that the check had come through this year with less trouble than at any time since the bemilitary events will be the chief feature of the 1917 Western Fair, and a big military program will be put on each day with a musical ride by the 63rd Battery.

Help Canada Maintain Her Financial Freedom!

Do Your Share towards Financing the War with Canadian Savings Rather than with Outside Capital.

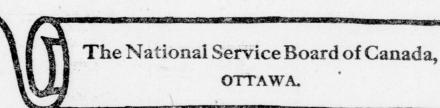

> THE problem of meeting the enormous cost of this war is two-fold. Not only must Canada get the money-most of it, of course, as loans-but she must get as much of it as possible here in Canada.

We can carry the war-debt if the bulk of the interest goes to Canadians, and so is used again in the country's development. But it will be a serious matter for us if a large proportion of the interest has to be sent outside the Dominion.

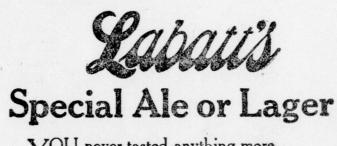

For the sake of our own and our children's future this drain on our resources must be avoided! Canada's financial freedom can and must be maintained! An average saving of 15 cents a day, invested by each man, woman and child in Canada in War Savings Certificates, would enable us to carry the whole cost of the war. To approach this average, hard work, thrift, self-denial and sacrifice are required of every citizen.

For each \$21.50 you lend the Government now, you will receive \$25.00 in three years-or you can get your money back at any time. Certificates are issued in denominations of \$25, \$50 and \$100, and may be purchased at any Bank or Money Order Post Office.

Cross Dividend," and varying from ½ to 1 per cent.

This branch has already gratefully received one of these checks, sent on by a London lady, with a kind note hoping that we may receive "a substantial sum from this source."

The London branch heartily echoes her sentiment, and trusts that anybody receiving this special dividend, will look upon it as a trust fund for Red Cross purposes.

There is the prisoners' fund.

Day by day the number of prisoners' of war in Germany mounts up. Not by thousands, it is true—but it mounts. Do you know what a prisoner of war in Germany gets for his dally meals?

Breakfast, 4:30 a.m.—Thin soup and porridge, slightly sweetened. Dinner, 12 noon—Soup of coarse beans, potato peelings and Indian corn (often rancid). Supper, 5 p.m.—Raw herring (generally high), and three potatoes, only partially eatable.

Added to this there is a daily ration of three slices of black bread, and one day a week there is an eatable dish of rice and prunes. Rev. Mr. Martin was a visitor in Rod-

ice and prunes.

The criminals in our jails live like princes in comparison.

Or you might like some of it to be spent on the "jolly sailor boys" who work for us in cold and storm, in danger from the winds and waves, as well as from the enemy, and for whom a special appeal has been made lately asking for socks, wristlets, and other things, all of which must be added to our general work and expenses.

Or you might want your money spent right here, on the men on the spot: the men who are already suffering for what they have done for their King and country, the men at the Byron Sanatorium.

There are so many things they need.

factor at the opening of today's market,
steels and equipments, as well as
motors and allied specialties recording
further reaction of 1 to 2 points. These

but automobile shares showed further
depression, General Motors yielding almost 5 points, and Maxwell, common

the suspended dividends. General
