Centuries before the general appearance of the Scythian Tribes in the East of Europe, small ilies of their blood had penetrated among the dark-haired nations; in every instance, by reason of their vast energy of mind, herce valor, and great personal strength, obtaining political supre-macy. They became in fact the chieftains, the aristocracy, or privileged class. These Scythian precursing were the Giants of the Mythologists; Tremon and ANTEUS; Gog and Magog; HER curas and Thusaus; the Cyclore and the

The great characteristics of this race would ble genius for material activity, and a fixed determination never to be beaten back in any undertaken enterprise; it has not the profound thought, language, he must have either misunderstood, or the spirit of deep research, that distinguishes the congenerate German, or the mercurial activity and thirst for military glory, for its own sake, that animate the semi-Celtic French; but it has enough of these, and it adds to them the more valuable qualities of sound, practical, common sense, and an intensity of purpose, such as no nation on earth ever possessed before. The proof of it: Fourteen hundred years ago, three hundred Saxons landed in England—they never receded they have made it in arms, and in arts, in literature, in manufactures, and in pure religion, undefiled before God and man, the greatest nation in the world; and they have carried their race, their language, and their religion, into many lands. The Indian Question. --- (Continued.) Thus it has been sufficiently proved that Mr. Papineau has erred, either wilfully, or from ignoals and fuel, and the inventive genius of the rance, in his Report, with reference to the origin people, have made it the world's market for of the small portion of the Algonquins settled at the Lake of the Two Mountains. With reference mabled it, a small country, with a small popula-ation, to maintain its independence and integrity they now occupied belonged originally to the Algonquins, who had ceased to exist as a nation," this portion of the Report is freely admitted; but firm, as the period is not remote when they will seem to be a strong spirit of nationality; a terri- Mr. Papineau, with his usual stapidity, has confrom authors, who, though writing in his own translated into English, to suit his own game when giving to the world the brilliant Report

We shall now proceed to prove that the Algonquins, reported by Mr. Papineau as being the original possessors of the "disputed territory," were Odjibways, and that Mr. Papineau, though right as regards the Algonquins, is totally incorrect in his account of the " Odjibways," whom he pretends are a distinct race.

As early as 1642, Charlevois, in his Histoire General de la Nouvelle France, Tome, 1, liv. 6, p. nentions the following facts:-

" A peu pres dans le meme tems quelques Jesuites recurent une deputation de la part des Saulteurs, qui les invitoient à se transporter chez eux. Ces Sauvages occupoient alors les environs d'un rapide que se trouve au milieu du Canal par ou le Lac occasion qui se presentoit de connoitre les Pays situés au de la du Lac Huron qu' aucune d'eux n'avoit encore traverse. Les P. P. Isaac Jogues et Charles Raimbaut furent detaches pour accompagner les Deputes des Saulteurs."

The Jesuits were the then pioneers of these wild regions, and thus it will be seen that the first Whites who visited, as early as 1642, the Lake Superior, were the Jesuits, Isaac Jogues and Charles Raimbaut, who had been invited by a nation of the Algonquins to visit them, and who occu-pied the neighborhood of the Straits and Rapids connecting the Lakes Huron and Superior : that i was afterwards styled Sault Sainte Marie, and the

The present Odjibways are to this day called "Saulteurs;" they speak "Algonquin" tongue, and they are the descendants of the race described

It will, from these references, be apparent tha Mr. Papineau's statement, or "Report," is not in conformity with the historian, Charleyois, whose reracity is unquestioned. And it has been ex-plained, that the present "Odjibways" are the Saulteurs" of the French; and being a branch of the " Algonquins," they are one and the same people, and are to this day styled by the French Canadiane, Sculteurs.

Mr. Papiness has labored hard to make them a distinct people, and, perverting history and facts, pertends that the Odjibways were driven from their settlements on the River Mindissippl, by the

If Mr. Papineau had consulted the proper authors, he would have ascertained that the Siou were little known to either the Algonquish or ber int from their lands by the Iroqueis, who, being name you, and having acquired the possession of fire arms, had become the terror of their neighbors.

AN EXTRACEDINARY CURE OF A DES PERATE SKIN DISEASE.

On the Sist July, 1948, the Editor of the "Mofus-silite" Resempeer, published in India, interded the following Editorial stricks in the pear — "We kneet for a fact, that Holloway": Pills and Ontment act in a most wonderful manner upon the constitution, as an eccentric, Caoles, celled Biles, employed in our Establishment, was affected with myriade of Ringworms, which defect all the Meeter Doctors, and promised to devour the poor man before he was under ground; we tried "Editoway" upon him, and in a month he was perfectly restored to this former condition and eleminous of skin. The affect was mirrorulous.

WHIS SALVE, prepared from the original recipe procured from a celebrated Turkish Hakim, (physician) of Smyras, in Asia Minor, and which has obtained an unprecedented celebrity in Grest Britain and the East Indies, from the astonishing Cures performed by it in both these countries, has lately been introduced into Montreal. As might be expected, its popularity has followed it, and its use is becoming general among all classes. The Proprietors, prompted by the very flattering reception it has met with in the Metropolis, have determined on extending its usefulness to all other parts of Canada; and, for that purpose, have detablished agencies in all the principal Cities. They flatter thems-lives that when its wonderful properties shall become move generally known, they will meet with that encouragement which his introduction of such a valuable medicament late a country justly estitles them. Age.

MEDICINES containing Molasses or Liquorice, like the boasted Sarsaparilias, require many large bottles to produce the slightest charge in health. The Forest Wine is altogether a different article. It contains no Syrups to give it consistency, but acquires the excellent favor and powerful medicinal qualities from the vegetable plants of which it is composed. The Forest Wine combines the virtues of the

WILD CHERRY, DANDELION, YEL-LOW DOCK, and SARSAPARILLA. With other valuable Plants whose properties are till more powerful.

Its high concentration renders it one of the most efficient Medicines now in use. Less than a single bottle restores the lingering Patient from weakness, debility, and sickness, to strong and weakness, debility, and sickness, to strong and wigorous health. Every dose shows its good effects on the constitution, and improves the state of the health. the point of death, with Dropsy, Piles, and Astima. My Physicians had given me over as past

Forest Wine and Pills were procured for me, and
before I has finished the first bottle of the Wine,
and box of Pills, I experienced great relief; my
body and limbs, which were greatly swollen, became sensibly reduced. Hopes of my recovery
began now to revive, and after continuing the use
of your medicines for about a month, the Piles and
Ashma were completely cared. The Dropsy,
with which my life was placed in such great denger, was also nearly gone. I have continued the
use of your Medicines until the present time, and
I now enjoy as perfect health as ever 1

GREAT CURE OF LIVER COMPLAINT OF TEN YEARS STANDING!

New York, Jan. 9, 1848.

Da. Halsey—Dear Sir i—Having taken your Forest Wine and Pills to remove a disease of the Liver, from which I have suffered severely for spwards of ten years and, having adhered ck sely to the directions which accompany the Mcdicines. I have recovered my health, hot withstanding all who knew me thought my case incurable. Previous to taking the Wine and Pills, I had recourse to the first medical treatment, but continued to grow worse to an alarming degree. Some of my friends spoke despairingly of my case, and tried to persuade me from making use of any advertised remedies; and, I doubt not, but what there are hundreds who are dissuaded from taking your excellent Medicines, in consequence of the deception and inefficiency of many advertised remedies put forth by unprincipled men, in familing advertisements. But, what a pity it is that the deception used by others should be the means of dissuading many laboring under disease, from making trial and being cured by your excellent remedies. Humanly speaking, they have saved my life; when I beam that there days; and, in eix weeks from the time I purchased the Medicines, to the great surprise of all my friends, I was entirely cured, and had increased fitteen pounds in weight having taken one box of the Pills and two bottles of the Wine. Would be field that avery poor sufferer would avait himself of the same remedies!
