## CITY WILL FIGHT LEVEL CROSSING ORDER

### Mayor and Controllers Will Order Immediate Appeal From Railway Board's Order If There is Any Possible Chance—Board is a Gold Brick, Says Cont. Church.

The decision is entirely in favor of the railway company, and I feel that the city's efforts to abolish level crossings within the city limits have entirely been disregarded," said Mayor Geary last night in discussing the Ontario Railway Board's order of yesterday granting the Metropolitan Railway Company permission to deviate its line from Yonge-st. to a private right of way west of Yonge-st. from Farnham-ave. to a new terminal 800 feet west of the street north of the C. P. R. tracks. "We have been trying for years to abolish the level crossings," continued the mayor, "and now it just seems that all our efforts have been in vain. The matter will be taken up at once by myself and the board of control, and if we have any possible chance of appealing the decision Mr. Drayton, the corporation counsel, will be instructed to take immediate action."

Mr. Drayton would not say anything in regard to the matter, but did not seem at all satisfied with the decision.

Indignant Controllers. The real firebrands will come from the controllers. They all feel highly indignant that the city's plans should have been so entirely disregarded by the board, and state that they will leave nothing undone in an effort to have the order set aside.

"The decision is an outrage," stated Controller McCarthy, "and I feel that the city's side of the question has been left out altogether, and that the Ontario Railway Board has played entirely into the hands of the railway."

A Gold Brick. "The Ontario Railway Board is a gold brick for the people of North Toronto," said Controller Church, "and after reading the judgment I am of the opinion that the board should be thoroughly reorganized. The order, coming out at this time, will no doubt prejudice the vote on annexation in North Toronto, and I certainly will do every effort to have the order set aside."

Controller Foster felt that the city was being left out of the question altogether by the railway board, and that the railway company was being considered because of its alleged poverty. "One of the city's finest residential sections is in great danger as a direct result of this order," said the controller, "and anything along the line of a level crossing will be vigorously opposed by the members of the city council."

A Serious Thing. "This decision is a very serious thing for the people of North Toronto," said Ald. Maguire. "What chance does it give them when the Metropolitan Railway Co. is allowed to cross four fine residential streets on level crossings? It will be highly dangerous to children attending school, and I am very much opposed to it."

## NEW HOTEL FOR SOU. PORCUPINE

SOUTH PORCUPINE, June 17.—(Special.)—The business men and ladies of the Porcupine mining camp were last night tendered a banquet by the management of the New Connaught Hotel. The occasion was the opening of the hotel for business. Barrister Cook, Reeve of Tisdale Township, presided, and among those present were: J. L. Enghart, chairman of the T. & N. O. Railway Commission; W. H. Wilson, mayor of Timmins; John McDonald, Jas. Todd of Schumacher, C. Moore, J. J. McKinney, Toronto; Major Bickford, Toronto; S. Alder, Jones, W. G. Whiteside, Fuller Morrison, and A. T. Short.

The new hotel is beautifully situated on an eminence overlooking Lake Porcupine, has 85 rooms, single and double, and is equipped with all the modern improvements, including telephones in each room. It is finished throughout in white maple and the furniture is of the best.

It will be under the management of Donald Hood, formerly of Halesbury, and was designed by Major Bickford, and was associated in the enterprise with J. J. McKinney.

## Globe and North Toronto and Annexation

The Telegram found its voice at last and has made a deliverance against another franchise on upper Yonge-street in an editorial on Saturday night as follows:

Metropolitan Agreement is a Foe to North Toronto. Whether annexation is or is not a friend to North Toronto is a question that is open for debate. There is no room for debate on the point that the whole Metropolitan Railway combination is the enemy of North Toronto.

The public can now see where The Telegram is. It is in doubt about annexation, but it is against the franchise. But where is The Toronto Globe? We will try and let the public know by quoting a portion of a special article which appeared June 14 last. Here it is:

What It Would Cost City to Annex 2000 Acres. Toronto Globe, June 14. To annex to the City of Toronto the block territory south of Eglinton-avenue, bounded on the east by Yonge-street, and on the west by the Belt Line, would mean a vast expenditure, based upon official figures furnished to the Globe by the various city departments concerned of approximately \$1,251,000. This expenditure would be for equipping the district with necessary public works and services.

Now this is in the usual style of The Globe and is practically side-stepping the question now before the people of North Toronto. The article deals with territory, a portion of which is in North Toronto and part of which is in the Township of York west of Yonge-street. But that is not the issue. The issue is, Shall the people of North Toronto vote in favor of annexation with the city, the city having already voted through its council to take in North Toronto, provided it does not encumber itself with more territory or more street railway franchises? And The Globe raises the question of the cost of taking in a country that is not included in the franchise in this fashion. In broad terms, The Globe is against the annexation of North Toronto. The reason for all this side-stepping is a series of editorials in The Globe more than eighteen months ago. We ask the people of North Toronto to read what The Globe has said there and try to harmonize the two views. But there was no immediate franchise in sight in 1910; hence the outspoken view! But now a franchise is in sight; hence, the side-stepping.

And when The Globe answers where it is, and we take it to be against annexation and in favor of another franchise—we will be able to quote some more from its columns. But in the meantime let the people read its article of eighteen months ago:

TORONTO AND NORTH TORONTO. Globe editorial, Dec. 25, 1910. There is some likelihood of the people of the town of North Toronto voting to change its name to that of the coming municipal election, whether or not they want to be annexed to the City of Toronto. There is also some likelihood that the time of popular opinion being decidedly in favor of annexation if the opportunity is afforded at the next step would be a favorable application for an order of the Metropolitan Railway Board to deviate its line from Yonge-street to a private right of way west of Yonge-street, from Farnham-avenue to a new terminal 800 feet west of the street, north of the C. P. R. tracks. The contention of the city that the company, by getting on its own right-of-way, was endeavoring to turn a terminable franchise into a perpetual right, could not be seen by the board. The members of the board, in any event, such a suspicion would be no reason why the board, by the indirect method of imposing impossible or unreasonable conditions, should prevent the company from exercising its clear statutory right to deviate its own right-of-way.

The line will cross several streets on the level, and for the protection of the public the company will be required to run its cars not faster than six miles an hour, and will be required to stop at some of the streets.

The Judgment. The judgment of the board, signed by James Leitch, K.C., the chairman, follows:

The board decided at the sitting held on Oct. 16 last, that the company had the right to deviate their line and leave Yonge-street and get on their own right-of-way. The board's reasons for this finding appear in the written opinion of the board, dated Oct. 23 last. There has been no appeal from the granting of the desired order.

As the franchises of North Toronto are in good condition there will probably be no difficulty about as to which there should be a complete and final vote before annexation takes place. The Metropolitan Railway wants the privilege of deviating its line from Yonge-street to a private right of way west of Yonge-street. It is unnecessary and it would be unwise for the municipality to make any arrangement with those who control that line; it would be better to let the matter be decided by the city council after the vote is taken and then the city corporation will have a chance to make its own terms. It is not desirable for North Toronto to enter into any arrangement to make an amicable agreement between the City of Toronto and the proprietors of the Metropolitan Railway more difficult of attainment. If there is a vote taken at all it will be taken without prejudice.

## DOUBLE TRACKING SCHEME IS OPPOSED

### North Toronto Ratepayers Plan Campaign to Try to Defeat Proposal to Lay Two Lines on Yonge Street, Wanting Civic Cars or Buses—Favor Annexation.

A representative body of prominent North Toronto ratepayers held a meeting last night in North Toronto, the primary cause of which was to make dates and formulate plans by campaign to be used in defeating the proposed double-tracking of Yonge-street thru North Toronto. The men present represented the other citizens of North Toronto and but one among them displayed the least nonconformity to the mooted plan of annexation with Great Toronto when that subject was discussed. All with the one exception seemed in perfect accord for annexation, but the double tracking of Yonge-street does not, apparently, meet with their approval.

They think it will be injurious to the town. What they want is annexation, a bus operation on Yonge-street, or street car service by civic cars or buses.

## ST. HILDA'S CURATE REMAINED ON SUFFERANCE

### Rev. W. S. Hart, His Rector, Issues Statement Giving Full Facts of Dispute in Fairbank Church, in Which He Says Rev. Geo. Scott Was Not a Success.

Rev. W. S. Hart, rector of the Church of St. Mary the Virgin, Bloor-street and Delaware-avenue, and St. Hilda's, Fairbank, issued a statement last night as a result of newspaper criticism with respect to his action in discharging the Rev. Mr. Scott, former curate of St. Hilda's. From present indications the merry war over who shall be curate of this suburban church—the old or the new—will not be discontinued for some time yet. The church was closed on June 1, and is yet unopened, and services are being held outdoors.

Reports of a few weeks ago were to the effect that the discharge of Rev. Mr. Scott was unjustifiable, and that 90 per cent of the church population retained. It was also stated that Mr. Scott was doing excellent work in Fairbank, having increased the congregation considerably. These statements are refuted by Rev. Mr. Hart. His side of the case is as follows:

"The real facts of the case concerning the present trouble between the rector and the curate and wardens of St. Hilda's Church, Fairbank, have so far been kept from the public. The reason for silence on the part of those in authority has been to avoid publicity, and a desire to avoid doing injury to those in opposition. The time has come, however, when the Rev. Mr. Hart feels that he must present his side of the case, correcting the one-sided statements which have appeared in the public press."

The Facts. The facts are as follows: In the autumn of 1908 the Rev. Mr. Scott came to Mr. Hart begging for permission to work in the parish of St. Mary the Virgin. Consent was given to secure subscriptions for the reconstruction and reopening of St. Hilda's Church, Fairbank, the same being in the parish of St. Mary the Virgin. The amount raised by subscriptions, augmented by a liberal grant, made by the church extension fund, enabled the church to be opened in February, 1909, without debt.

In July, 1909, the rector secured a license from the bishop for the Rev. Mr. Scott as assistant curate in the parish of St. Mary the Virgin, in charge of St. Hilda's Church, for a period of six months. The fact of its being a limited license speaks for itself.

## ROOSEVELT WILL LEAD BOLT IF "STEAM-ROLLER" DELEGATES RULE CHICAGO CONVENTION

### The Roosevelt Sweep—What It Means

The tide upon which Theodore Roosevelt is being carried to the presidency did not have its origin yesterday, nor the day before yesterday. It seized rather than created the opportunity. The New York papers have been blind to what has been going on in the country. Their vision is limited as a rule to Manhattan Island, and their views take color from Wall-street, which, above everything else, wishes the old conditions to remain indefinitely. The Toronto World ventured to predict many weeks ago that the ebullient and flow of gigantic forces and movements plainly visible in the United States would bring about the nomination of Theodore Roosevelt and his election, whether he were nominated by the Republican party or not.

There has been nothing more significant or in any way more portentous since the French Revolution than the insistent demand of the people of the United States for a new deal, and a square deal, in the distribution of the wealth and the political power of their nation. They have known for years that their great sacrifice of blood and treasure during the Civil War and their culturing of productive power since the close of the war have not exploited to their benefit as a commonwealth, but have been rapaciously exploited by a small oligarchy who seized upon the natural resources of the country and the lines of communication for selfish and mercenary ends. For a time they attributed their political helplessness to the carnival of corruption which followed, not unnaturally, in the wake of a great war. Now they know that the system of government under which they live is inherently defective.

People are now openly saying that the constitution is, after all, the work of men; that it is a hundred and fifty years old and guards against many evils, such as quartering soldiers on the people, the passing of bills without their consent, and ex post facto laws and dead evils of a dead past, while its elaborate system of checks and balances, its insistent defence of individualism and its sweeping restraints upon legislative power render it impossible for the people thru their representatives to correct the real evils of the present or to guard against the menacing evils of the future.

They are determined there shall be drastic and sweeping reforms, that government by irresponsible judges shall be abolished, that the people, thru themselves, and make their own laws, which shall be supreme.

Mr. Roosevelt may be criticized for extraordinary methods. The circumstances and situation are extraordinary, and extraordinary will be his success. The occasion calls for a man of action to take the field, and Mr. Roosevelt is now on the firing line at Chicago.

And what is going to happen to-day? It looks to us as if the revolution was about to break. What happens if Roosevelt goes into the convention and challenges its composition or its procedure? Pandemonium must reign; and if he wins and Taff falls down and allows a new steam roller driven by the colonel to flatten out him and all his friends, his organization and all his enormous backing? And whatever happens in the convention to-day or to-morrow will be repeated, only in a less degree, but in a thousand other places, in fact, over the whole Union. And what will be the result there?

The World must still stick to its original observation that a revolution is breaking over the United States, and no man can tell where it will end. There is a lesson in it all for Canada, and it is this, that political and economic grievances must be grappled with by remedies applied, or else worse things must come thereafter. Laws must be passed, not refused, and a law-making machine equal to the emergency must be allowed, not denied, by courts or judges.

## Colonel Nailed Colors Squarely to Mast in Addressing Big Gathering, Which Cheered Vociferously When He Declared "No Action Based on the Votes of Those Fraudulently Seated is Binding on the Republican Party."

CHICAGO, June 17.—(Can. Press.)—On the eve of the Republican National Convention, Col. Roosevelt to-night disclosed the line of attack which he will make. He laid down two principles. He said that the delegates whose selection he contests must not vote in the organization of the convention or upon the settlement of the contests, and made it clear that he would resist it. He declared that no action of the convention based upon the votes of these "fraudulently seated delegates" would be binding upon the Republican party.

It was at the Roosevelt rally in the Auditorium that the ex-president made his challenge. He was facing a cheering throng which jammed the hall building as tightly as the fire marshal would permit. Reaching far to the top of the last line of seats, and to the top of the topmost balcony were solid rows of men and women, delegates from every part of the country. Roosevelt leaders stood at a host of private in the Roosevelt army. They

## No Uniform Marriage Law But Ne Temere Is Silenced

### Supreme Court of Canada, While Deciding That Lancaster Bill Cannot Be Enacted, Is Almost Unanimous in Finding That Decree Has No Civil Effect in Quebec.

OTTAWA, June 17.—(Special.)—The Canadian Parliament has not authority to enact a uniform federal marriage law, as proposed in the famous Lancaster bill.

The law of the Province of Quebec does not nullify a mixed marriage, or a marriage between two Roman Catholics, otherwise legally binding, when performed by other than a Roman Catholic priest.

These are the two outstanding features in the eagerly awaited judgment of the supreme court of Canada, delivered at noon to-day on the reference submitted by the Dominion Government. To-day's proceedings were brief. No final judgment will be reached until the judicial committee of the privy council has made its pronouncement, as the Dominion Government will now proceed to appeal and a judgment may be reached by the coming autumn.

The court answers the questions as follows:

QUESTION ONE—(A) Has the parliament of Canada authority to enact, in its whole or in part, bill No. 3 of the first session of the 12th parliament of Canada, intituled, "An act to amend the Marriage Act?" (B) If the provisions of the said bill are not all within the authority of the parliament of Canada to enact, which, if any, of the provisions are within such authority?

ANSWER ONE—(both branches)—Chief Justice Sir Charles Fitzpatrick, Justices Duff, Anglin and Davies answer "No."

Justice Idington answers: "It is an impossible bill as it stands. If I must answer categorically, then I say so."

## Ald. Chisholm Nominated As Property Commissioner

### Chairman of Works Committee Is Favored for Important Position—New High Level Sewer Can Now Be Used—More Land for Hydro Works.

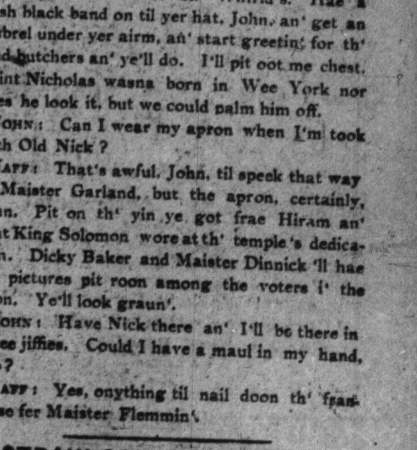

Ald. Chisholm was unanimously recommended to the vacant position of property commissioner by the property committee yesterday afternoon. The resolution to this effect was moved by Ald. Austin, and was sent on to the board of control with the recommendation that he be lost in making the appointment.

When the motion was made, Ald. Maguire questioned the wisdom of the committee in sending on a name, owing to the disposition which had previously been evinced by the board of control to disregard such recommendations. The chairman, Ald. O'Neill, suggested that it would be better to wait for a full turnout of the members of the department necessitated the appointment being made at once.

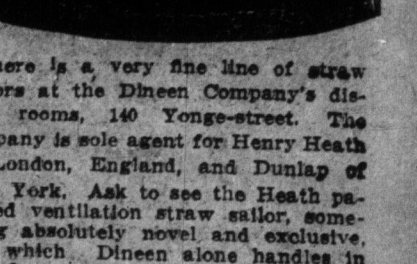

Ald. Chisholm has represented ward one in the city council continuously since 1907, and hence can boast of a longer consecutive service than any other member sitting at the present

NATURE ON A NEW LAY. No change in the discouraging weather: the first garden party out in the country has been a flop. There is fragrance and only that. And July is but a fortnight away. The spring of the calendar is about over, but there has been no spring. Will there be any summer? Hardly.

# ONTARIO GETS \$175,750 OF GRANT

### Cheque for Half That Amount Was Received From Federal Government Yesterday, and Money Has Been Apportioned for Different Work in the Province.

The Ontario Government has received its share of the \$500,000 grant for agriculture, which the Dominion Government decided to divide among the nine provinces at its last session. It was announced at the parliament buildings yesterday that this province would benefit to the amount of \$175,750 of the federal grant. A cheque for one-half of this sum has been received and the balance will be payable when Hon. J. S. Duff, minister of agriculture, decides that it is necessary to further promote the work of development throughout the province.

Hon. J. S. Duff has been in conference with Hon. Martin Burrell at Ottawa during the past few days mapping out the work that the provincial government wished to accomplish with the financial assistance from the Dominion Government. In all, 17 branches of the department will benefit by the grant.

This grant has no connection whatever with the work of C. C. James, former deputy-minister of agriculture, who was recently appointed to a Dominion post in the department of agriculture. It is explained that this money is merely a preliminary to a permanent scheme that Mr. James is trying to bring about for the government, fixing the amount that each province is to receive each year. The federal grant comes at a very opportune moment to further advance some of the schemes of Hon. Mr. Duff.

The following gives the plan for expenditure of federal grant for agriculture: Field Husbandry Building, Ontario Agricultural College, \$40,000. This will provide for accommodation for the department of field husbandry at the college. It will not only furnish much-needed room for the large and growing classes in long and short courses, but it will also give greatly increased facilities for the work in seed improvement, carried on in conjunction with 5000 farmers throughout the province. It will also give increased class accommodation.

District Representatives, \$21,000. This will be used to pay the expenses of some of the salaried representatives with the work of new representatives, and also to extend the work and usefulness of representatives already appointed.

Poultry Work, \$10,000. The object of this is to further develop the poultry industry throughout the province. To do this it is necessary to extend the equipment at the colleges to carry on breeding work on larger scale in order to supply both birds and eggs of the best breeds. Two extra men will also be employed, one to attend to the time to the work of the plant, and one to do extension work among district representatives. In addition, provision for a 2000 egg incubator, a new poultry house and improvements in the administration and teaching accommodation. It also includes a sum to make a study of handling eggs in Great Britain, Denmark, etc., for which purpose Prof. W. R. Graham is to be sent to England a few days ago. He will also represent Canada at the international poultry conference in London in July.

Milking Short-horns, \$12,500. This provides for the purchase in England of a small herd of high-class milking short-horns in order to test the possibilities of the development of a class of cattle in Ontario which will be profitable both for beef and milk production. They will be handled almost entirely at the Ontario Agricultural College, Port Hope, Ont., under the supervision of the department of animal husbandry, which will leave shortly for England to make the purchase.

Fruit Works, \$9000. This includes \$3000 for the Ontario Horticultural Exhibition in addition to the \$2000 they are now receiving, \$3000 for orchard competition, and \$3000 for a market commissioner to develop markets for the sale of Ontario fruit in the west.

Short Courses, \$7000. This makes provision for a largely-increased number of short courses in stock-raising and seed improvement, which have proven so effective and popular. It also includes salary for a temporary seed specialist to be attached to the institutes branch and to be engaged largely in this line of work.

Eastern Ontario Live Stock Building \$10,000. This is a contribution toward more accommodation for the Winter Fair held at Ottawa to encourage the live stock industry.

Special Grants for Agricultural Exhibition Buildings, \$10,000. This includes \$5000 for Port William and Port Arthur, \$2500 for London, and \$2500 for Windsor.

Agricultural Work in Connection With Public Schools, Including School Gardens, Seed Displays, Etc. \$10,000. To interest the children of the province in the work of the department.

# THE WORLD'S FREE BIBLE CERTIFICATES

printed on another page, clipped on consecutive days, together with the stated amount that covers the necessary EXPENSE items of this wonderful distribution, including clerk hire, cost of packing, checking, express from factory, etc., entitles you to your choice of the beautiful books described below. This is not a Bible with meaningless pictures. The illustrations serve a distinct purpose. They enrich the text, but they do more—they intelligently explain it so that many a hitherto obscure passage assumes to thousands a new meaning through these eye-teaching pictures.

## The Grand Triumph of Artistic Perfection is This Magnificent \$5 BIBLE

More than one hundred of the world's greatest artists, working under the advice of archaeologists and historians of wide renown, have contributed the choicest products of their skill and genius to produce this grand triumph of artistic beauty in historical detail. These pictures are not mere reproductions of mediaeval frescoes and more or less familiar modern photographs, inserted at random; they have been specially made, in the light of Twentieth-Century Knowledge, to illustrate selected texts in accordance with the matured beliefs of the greatest living theologians.

# GREAT EDUCATIONAL CAMPAIGN

As an EDUCATIONAL work alone, the Bible demands a place in every home—and this new ILLUSTRATED BIBLE enhances the value 100 per cent. for purposes of LEARNING. It portrays ACTUAL SCENES in a way that permanently impress the reader with the FACTS of HISTORY. There is actual need of a hand Bible (or "handy" Bible) in every home. The old family Bible fulfils its purpose, but is unwieldy even for occasional reference, and where is the man, woman or child that cannot gain KNOWLEDGE from this book?

### Nothing will interest a child so quickly as a picture. Pictures speak a universal language, intelligible to young and old alike, and with no embarrassment of moods and tenses.

Magnificent (like illustration) is bound in full flexible limp leather, with overlapping covers and title stamped in gold, with numerous full-page plates in color and in gold, with numerous Tisot collection, together with six hundred superb pictures graphically illustrating and making plain the verse in the light of modern Biblical knowledge and research. The text conforms to the authorized edition, is self-pronouncing, with copious marginal references, maps and helps; printed on thin Bible paper, flat opening at all pages, beautiful, readable type. Six consecutive free certificates and the amount of \$1.18.

The \$3 Illustrated BIBLE is exactly the same as the \$5 book except in the style of binding, which is in silk cloth, containing many six consecutive free certificates and the amount of 81c EXPENSE items. Also an Edition for Catholics. Through an exclusive arrangement we have been most fortunate in securing the Catholic Bible, Douay Version, authorized by Cardinal Gibbons and Archbishop (now Cardinal) Farley, as well as by the various Archbishops of the country. The illustrations without the Tisot and maps approved by the Church, conform to the Protestant books, and at the same amount Expense Items, with the necessary free Certificates. Any Book by Mail, 25 Cents Extra for Postage.

ary schools in agricultural study and agricultural work is one of the most important lines at the present time. This money is to assist in a propaganda of this nature now being carried out thru the co-operation of the department of education and this department.

Drainage Work, \$5000. This is to enable the drainage staff at the Ontario Agricultural College to meet the demands for assistance in this line being received from all parts of the province. It will also be used to demonstrate the possibilities of drainage in certain sections where it has been maintained drains would not work.

Live Stock in Northern Ontario, \$5000. This is to provide for placing male animals of various classes at different points in northern Ontario in order to establish a live stock industry on proper basis.

Women's Institutes, \$3500. This is to gather information in domestic science in connection with forty or fifty institutes along similar lines to those found successful last year in Haldimand County. These courses will include cooking, sewing, home nursing, home sanitation and decorative nursing.

Dairy Survey, \$2000. This is to gather information as to the actual conditions of the dairy farms in a few counties in eastern Ontario, and a few counties in western Ontario. This information, it is felt, will be most useful in making future dairy work more effective.

Western Ontario Creamery Works, \$1500. This is to employ competent man to

give instruction among those engaged in producing cream for creameries in Western Ontario.

Soil Survey, \$500. This is to provide means for obtaining information as to the making of a soil survey of the province, and testing the advisability of such a plan. The question of maintaining the fertility of the soil is one of the most important demanding consideration at the present time.

Miscellaneous Work, \$3735. This makes provision for incidental items which may be found desirable, such as experiments in vegetable growing, assistance in live stock shipments, encouraging alfalfa growing, etc.

Ontario Veterinary College (Additioral Land), \$25,000. This provides for the purchase of the land necessary to finish out the block of the present L-shaped site on University-avenue, with a view to later extending the college to be a Dominion institution.

"ROOT COTTON" A NEW TROPICAL PRODUCT. An interesting new tropical product is the "root cotton" lately described by S. Kusano, a Japanese botanist. It is a fibrous covering of the roots of Fagaria integrifolia, an abundant plant of the Philippines, and especially of Botol Tobago, an island near Formosa. The substance seems to be a kind of

cork tissue, resembling the ordinary cork developed on the bark of trees. The fibers, of light straw color and silky lustre, are very fine, soft and weak, and are easily pulverized to a waxy powder. They are less hygroscopic than ordinary cotton, having remarkable resistance to wetting by water.

In Tobago the natives use the root-cotton for caulking boats and in the Philippines it is employed for such purposes as stuffing pillows. Not least of the advantages of this material as a possible article of commerce, is the fact that it can be removed without injury to the roots, thus making cultivation simple.

Germania Hotel, John and Main-streets. First-class table and rooming accommodation.

Recent investigations by Dr. W. Weichard, professor at Erlangen University, have at last elucidated the nature of fatigue (physical or mental). The muscles of small animals (mice, guinea pigs, etc.), subjected to excessive exertion were, in fact, found to contain a poisonous (toxic) albuminous product called kenoctoxine, which could be as well obtained by artificial means. This product then forms spontaneously an antidote (called anti-kenoctoxine), which counteracts its prejudicial ef-

fects. There is a rock profile to be seen on Mount Wilson, California, which is more striking than the famous formation in the White Mountains, also the former is said by some to be the most perfect.

## THE PRICE OF HOMAGE

ONCE when King Edward VII. paid a visit to Sheffield, all the fires in factories and plants were allowed to die out. Not a wheel in Sheffield turned for twenty-four hours. The primary object of this was to lift the pall of smoke that hovers over that wonderful steel-producing city, and to ensure, as far as man was able, a bright day and a blue sky for an auspicious occasion. It was Sheffield's expression of respect.

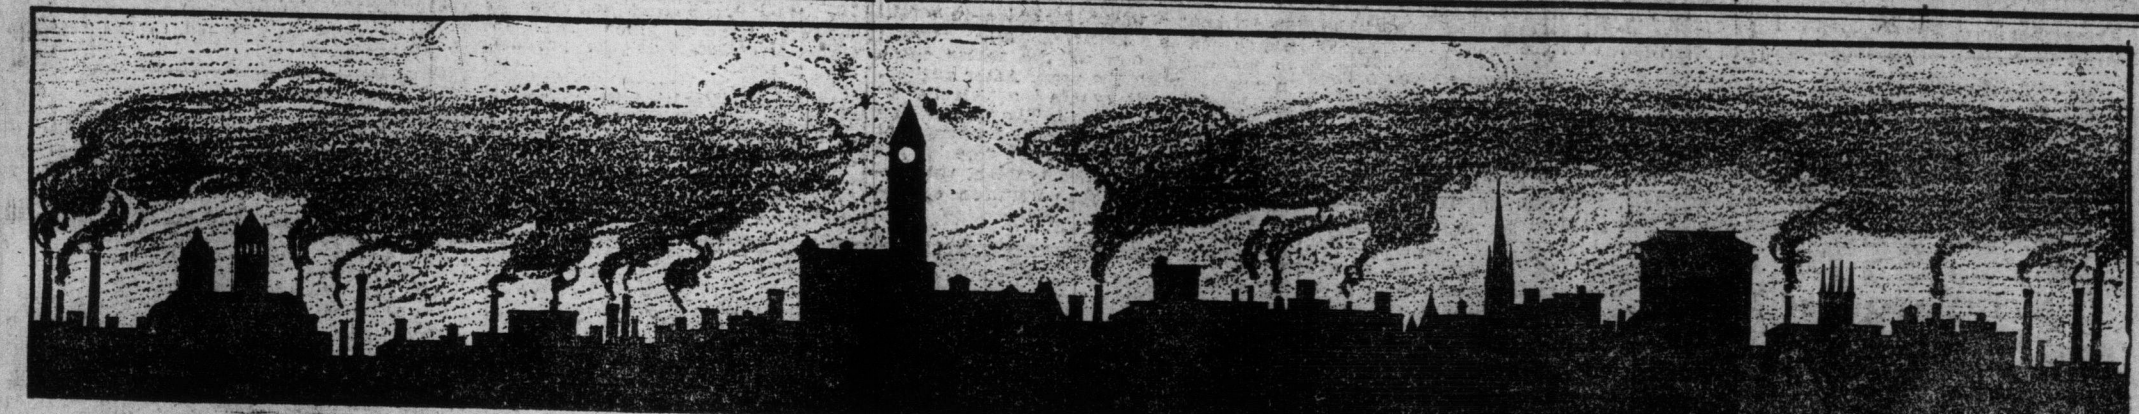

BUT the action was unique—it was unprecedented—it was unthought of that those hundreds of mighty furnaces, raging night and day, and those scorching boilers, with quivering valves, should ever be allowed to cool. This extinguishing of fires cost Sheffield hundreds of thousands of dollars—the price of the effort to get back again to high-power efficiency.

SOME business men in Canada pay an unwitting homage, not to a king, but to a superstition—the superstition that hot weather justifies letting the fires of business energy go out. They stop advertising in the Summer months. By paying homage to tradition, custom, superstition, they have allowed Summer to become their "dull" season. You know how dull it can be when you don't advertise. Do you know how brisk it can be made by advertising? Do you realize how much momentum you now lose in the Summer that must be regained in the Fall?

DON'T LET YOUR ADVERTISING FIRES DIE OUT THIS SUMMER.

Advice regarding your advertising problems is available through any recognized Canadian advertising agency, or the Secretary of the Canadian Press Association, Room 503 Lansden Building, Toronto. Enquiry involves no obligation on your part—so write, if interested.

**SHERIFFS UNDERPAID**  
Inspector James W. Mallon, in his report to the government on legal offices, says that sheriffs are underpaid, "considering the importance of the office and the responsibilities they are obliged to assume in the discharge of their duties." He states that the sheriffs' duties of 1911 were "generally well performed and their books accurately kept" but, in some cases, he handed out a "little criticism. Law stamps to the amount of \$659.95, due to the government, were missing in twelve offices of surrogate court registrars.

## There's a "silver lining" of dollars to every cloud of smoke--

THERE'S a real silver lining to the cloud that hangs always above your factory's smokestack. A lining of your silver dollars—hard-earned, sweat-won dollars, that go billowing up the flue every time the stoker opens the furnace door.

EVERY hundred dollars' worth of coal burned under your boilers represents eighty-five dollars' worth of "silver lining" to the smoke cloud of steam-plant waste. For as you burn coal now, less than 15 per cent. really helps to make steam, turn wheels and produce goods. The rest is loss—waste—money "gone up in smoke."

# Toronto Hydro Electric Power

Hydro-Electric Power costs less per delivered unit of energy than power developed in your own steam plant. You pay only for the energy you use, and you use less with electric motor equipment than with line shafting, long belts and other "power-eating" transmission.

This is a civil-owned public utility, operated for the benefit of the citizens and the commercial power users. Our experts are at your command. Without obligating yourself in any way to take Hydro Power, send for one of our men to make you a free detailed report of how we would recommend Hydro Power to be used in your plant.

Efficiency engineers find the greatest wastes in individual steam plant power production and old-fashioned line drive and long belt transmission. Hydro-Electric Power will transform the silver lining in your power cloud to real dividends—lower costs and raise the standard of efficiency in your factory.

### Winner at Latonia Pays Over 900 to 1

J. B. Respass' Wishing Ring Makes New Record for Pari Mutuel Betting.

CINCINNATI, June 17.—Wishing Ring, a four-year-old colt, owned by J. B. Respass, the Cincinnati turfman, won the sixth race at Latonia to-day at odds of over 900 to 1, which is believed to be the largest price ever paid on a winning horse thru the pari-mutuel system of betting, such as is used on Kentucky tracks, tho under the old system of bookmakers, Poytonia, at 1900 to 1, won at Washington Park, Chicago, in 1894. The exact odds, figured on the \$1 mutuels used on the Kentucky tracks, were 5 to 1, \$1885.50 for \$2; for place, \$744.00, and to show, \$122.00. There were but four two-dollar tickets sold on the horse. Summary:

Always ready—Get in and Go

The Electric is the Best Ladies' Car

Few women care to undertake the management of a gasoline car, no matter how small or simple it may be.

The mechanism of a gas car is invariably dirty and requires engineering skill to keep it in order, which few women care to acquire.

An "electric" is smooth-running and easily controlled. It is started by a slight pressure on the control lever. Its engine does not have to be "turned over" by a superhuman effort that is hard enough work for a man, and much too hard for a woman.

The "electric" is ideal for shopping or calling. It is clean, stylish, smooth-running and always ready for service.

We will be glad to give our enquirers expert and reliable information about "electrics" and their use. Our Service Department is always at the disposal of "electric" owners.

THE NEW TRAINS FOR SUMMER TRAFFIC

Grand Trunk Railway Will Improve Its Service, Starting Saturday, by Putting on Trains to Buffalo, Muskoka, Penetang and Other Points, Also Early Morning Express.

The Grand Trunk Railway will vastly improve its service between Toronto and the north and between this city and the United States by putting on five additional trains, beginning Saturday, June 22.

ONE LONE AND LONESOME VIRTUE CAN NEVER MAKE A WELL-ROUNDED MAN

It's not special features that make the Ford a great car—but the perfection of all its parts. Not one virtue, but the happy combination of an endless list of virtues, makes the Ford "the universal car."

Seventy-five thousand new Ford Model T's will go into service this season—a proof of their wonderful superiority. The price is \$775 for the roadster and \$850 for the five-passenger touring car—complete with all equipment, f.o.b. Walkerville, Ontario. Catalogue from Ford Motor Company of Canada, Limited, 106-110 Richmond Street West, Toronto, or direct from Walkerville.

## The Nursery

Most mothers dread the summer on the baby's account, because of diarrhoea. It is true that many babies suffer from this disease, but if the mother is forewarned, and understands how to care for the baby intelligently at this time, the illness may be made much less serious, and perhaps prevented entirely. Diarrhoea is a poisoning of the system, and the frequent bowel-movements show nature's effort to rid the system of the poison. To assist the natural treatment then, give a dose of castor oil to do away with the irritation, that is causing the trouble. Never give medicines to check the diarrhoea until the oil has first been given and had time to act. Another way to get rid of the poison is to wash out the bowels with salt water. One teaspoonful of salt to one quart of boiled water will do. Put one quart of this solution into a waterbag, and by means of a soft rubber catheter flush out the bowels. This will be done once a day, if the baby has much mucus or any blood in the bowel passages. Then, stop all milk feeding. Milk makes the poisoning worse by causing the bacteria to multiply. Only boiled water or barley water or rice water should be given for at least twenty-four hours, and during that time if the baby is being nursed, it is best to substitute water or gruel for a time. If the baby is not much improved in twenty-four hours, call a doctor.

Sponge baths help to reduce the fever and make the baby more comfortable. Use a teaspoonful of bicarbonate of soda in a basin of water. Keep the child in as cool a room as possible, during the hottest part of the day, and give him his airing-early in the morning or late in the afternoon.

Never darn knitted underwear with wool, as it will shrink and make a hole larger than the original one. Use loosely twisted knitting yarn.

To prevent hard-baked eggs from turning dark, place them in cold water for a few minutes as soon as they are taken from the boiling water.

Never scrape cooking utensils of any kind. Clean them out with soap and possible fill with water and washable soda, cover and allow them to steam.

When washing silk stockings, soak in borax water then wash gently in cold water. Don't wring; but squeeze out and after rinsing in several waters hang out to dry.

To clean gilt, try touching it up with a little dilute ammonia which is tested by brush wet in alcohol. Don't let it dry, but rub off with a flannel, which should be changed frequently.

When carpets are not to be taken up they can be greatly freshened by washing with water to which a little ammonia has been added—not over a tablespoonful per half water.

After washing woolen socks, dry them on frames to prevent them from shrinking. They should be washed in warm suds of white soap with a little borax added, but should not be rubbed on a board.

To keep an iron sink in good condition, scrub it once or twice a week with soap and kerosene. Every night mop it with kerosene, cover with a strainer, and pour thru it a kettle of boiling water.

## IF THIS IS YOUR BIRTHDAY.

You will gather the harvest of your endeavors and will find much satisfaction in the results. You will have a successful year, but must guard against overwork and take care of your health.

Those born to-day will be ambitious and persevering and have sensitive, emotional natures. When once interested in the practical things of life, they are capable of accomplishing much.

## Try Skin Absorption Instead of Cosmetics

(From The Woman Militant.)  
The constant use of rouge and powder irritates, coarsens, roughens and dries the skin, eruptions, enlarged pores and wrinkles. If you've learned this from experience, suppose you quit cosmetics and try what is recommended.

Ask your druggist for an ounce of ordinary mercurized wax and begin using it to-day. Apply it like cold cream, washing it off in the morning. Keep this up for a week or two. The wax will literally absorb the coarse, scaly, scurfy surface, and the result will be a soft, smooth skin.

For those wrinkles and lines, pores enlarged or blocked with dirt, pimples which will not disappear, dryness, or a disagreeable tan, this has remarkable astringent and tonic properties, and beneficial results come quickly.

DECREASE IN MEMBERSHIP OF METHODIST CHURCH; PAY OF MINISTERS IS TOO LOW

Religious Decline is Due to Inflated Commercialism, Say Conference Delegates—Senior Members to Appeal for Higher Salaries for Ministers—Presence of Royalty at Races is Deplored.

"We are compelled to confess that the additions to the membership of our churches are painfully out of proportion to the investment of men, money and effort which has been made in and by the church."

Who is doing such unchristian work in their midst? Royalty at Races. At the morning session, the report of the committee on temperance, prohibition and moral reform was adopted almost in toto and with very little discussion.

Use of Tobacco. Other things the report referred to were the use of tobacco, the white slave traffic, the fact that the presentation of plays, shows or entertainments calculated to corrupt public morals had been made a criminal offence, and that persons of the highest character and broadest culture should be appointed to the boards of all plays.

WAR AGAINST TUBERCULOSIS. The war against the "white plague" is making progress and its results are encouraging, also tuberculosis at the head of the list of fatal diseases.

Imperative Call. The situation which confronts us is an imperative call for readjustment to meet the new conditions surrounding the church of to-day. Life everywhere means conformity to environment, and unless the church is willing and able to adapt itself to new conditions, it must lose its leadership, and ultimately its life.

Sentiment Favorably Affected by Sharp Recovery in Hollinger, and Underline to Market Brightens Considerably - Revival in Cobalts Anticipated

Monday Evening, June 17. Continued strength in Hollinger, which was in strong demand around \$10.50, five points up from last week's close, was the feature of the mining exchanges in the first session of the week. Trading was on the same restricted plan as has been in evidence since the start of the year, but was more cheerful than usual, and sentiment consequently adopted a more optimistic character. The sharp recovery in Hollinger and the manner in which the shares maintained their advance have been accepted as clear proof that the general depression in market circles had not removed the feeling of confidence regarding the situation. Many of the brokers have followed the Porcupine camp thru its many vicissitudes and have demonstrated to their own satisfaction, at least, that the fact that there is there, and that given a fair chance from now on, market conditions will improve to an extent that seems warranted by reason of the fact that the production period has been attained.

Another Corner in Tin Market?

Another attempt in London to corner tin is reported, and the price is again on the upward move. PLANT, Toronto, Ceramic Expert, Managing Director.

TRUSTEES - Imperial Trust Co. of Canada, Toronto.

This company is organized to engage in the making of building brick, terra cotta, fireproofing, etc. The demand for brick is greater than the supply, and there is need of another factory to make really high-class brick. The demand for building brick is such that the buildings so constructed, to use inferior brick, probably endangering the safety, and assuredly endangering the durability of the buildings.

THE LOW CAPITALIZATION. This company could easily have been incorporated for \$1,000,000.00, but to enhance the actual value of the shares, and to make the returns on the shares of practical consequence for all future time, the capitalization was made small in comparison with other localities, but large enough to give ample capital, pay all charges and put up a three-unit plant, fully equipped with the most up-to-date, latest and best brick-making machinery, and to supply plenty of working capital. We recommend this stock to all seeking safe, reliable and profitable investment.

PROFIT-SHARING ARRANGEMENT. Preferred Stock will share all dividends in excess of 8 per cent in the following proportions: For every 5 per cent extra paid on the Preferred, 3 per cent is to be paid on the Common. For example: When the Common stock receives 1 per cent, Preferred stock will receive 1 per cent. When the Common stock receives 2 per cent, Preferred stock will receive 2 per cent. After this point of dividend-sharing has been reached, Preferred stock will receive 8 per cent. The Preferred is also "Preferred" as to return of capital.

PROPERTY. The property consists of 150 acres of land in the Township of Esqueving, in the County of Halton, containing valuable deposits for the purposes of the Company. This land was selected after careful investigation of the works of the Company and for working capital, and is located about five miles north of the Town of Georgetown, upon which it is proposed that the works of the Canada Brick & Fireproofing Company, Limited, be incorporated.

TRANSPORTATION AND LABOR. The railway running through the property gives excellent transportation facilities, and as the property is situated in the same shipping zone as the Milton, Terra Cotta, Halton and Port Credit Companies, the same rates will be secured as are paid by those companies. Cheap and efficient labor is available in the surrounding towns. The Company propose to build a road which will connect the plant with the main highway.

MARKET. The rapid growth of the City of Toronto and the extraordinary building activities in the suburbs and the surrounding districts, which will be in a location to supply the city and surrounding country. All the present brick companies in Ontario are taxed to their utmost, and much delay has been caused in building operations owing to the inadequate supply of bricks, and in some cases it has forced owners to abandon building operations entirely.

ESTIMATED EARNINGS. The earnings of the Company are estimated on the basis of a profit of 25 per cent on the cost of the bricks. The average cost per thousand, as estimated by the managing director of the Company, is \$45.00. In this is included selling, operating, and all incidental costs of production, and as factoring bricks, this cost should be materially reduced. In estimating the earnings of the Canada Brick & Fireproofing Company, Limited, the cost per thousand is put at \$7.00 (f.o.b. Toronto and price, which is more than 10 per cent interest on preferred stock).

CAPACITY. 50,000 per day. Gross income, at \$8.50 per thousand bricks per year, would be three times the above \$ 31,250. Cost of manufacturing, operating, etc., at \$7.00 per thousand bricks per year, would be three times the above \$ 21,000. Surplus \$ 10,250.

As the Company will install the most modern and up-to-date plants, both for handling and manufacturing, the cost per thousand bricks per year would be three times the above \$ 31,250. \$ 21,000. \$ 10,250.

Leaving for reserve fund, contingencies, dividends on common and preferred stock, etc. \$ 75,750. It will be seen that the Company should earn over 7 per cent on the Preferred shares and 3 per cent on the Common stock from Unit No. 1, and Units Nos. 2, 3 and 4 should earn 18 per cent on both the Common and Preferred shares.

MANAGEMENT. The Company has secured the services of S. J. Plant, Ceramic Engineer and Clay Specialist. He has been associated with the brick business all his life, in the manufacturing of all classes of brick and high-class clay work, both plain and ornamental, and has a thorough knowledge of the construction and erection of brick plants.

On Application \$1.00 per share. On Acceptance \$3.00 per share. On August 1st, 1912 \$3.00 per share. On November 1st, 1912 \$3.00 per share. On January 1st, 1913 \$3.00 per share. On April 1st, 1913 \$3.00 per share.

ADDRESS All communications for particulars, information, or for shares, to the Standard Bond Company, Standard Bank Building, King and Jordan Streets, Toronto, Canada, and make cheques payable to the Trustee, The Imperial Trust Co. of Canada, Toronto, Canada. Interim receipts will be issued by the Trust Company pending the issue of the regular stock certificates, which will, together with the bonus stock, be delivered on the completion of the manufacturing plant.

Three per cent will be allowed on all payments made in full.

destines of the Wawatlin plant now reported. Reports from the Hurriehana district, to the east of Cochrane on the Hurriehana River, show that in nearly all cases where quartz leads have been located the pay-streaks are narrow.

The Turnbull Township District appears to be the only new section in the north where recent good finds are evidencing prospects of future gold mining.

Prospector Davidson staked many of the most valuable lots in the gold district of which the Vipond 28s, Crown Chartered five, and the McCluskey-Vipond four are a part. Settlements in full were made with Davidson last week on the Vipond holdings, and he is now ready to depart for the west to invest a portion of his "strike" in the precarious undertaking of zinc mining.

### NEW RECORD IN OUTPUT OF STEEL TRUST

NEW YORK, June 17.—Net earnings of the United States Steel Corporation for the quarter ending June 30 next are likely to be in the neighborhood of \$25,000,000. This would compare with \$23,973 for the quarter ended March last and \$28,108,530 for the corresponding period of last year.

For the last several weeks the corporation has been producing at the rate of 17,500,000 tons of ingots a year and shipping to consumers more than 13,000,000 tons of finished steel. On this scale the production of its earnings has been at the rate of \$100,000,000 a year. If the corporation was receiving normal prices net earnings would be about \$40,000,000 a year.

Steel prices have been tending downward since the Steel Corporation was organized, with the tendency of wages and all products entering into the manufacture of steel upward. Politics are blamed for the present low prices for steel products. Manufacturers as a result of the antagonism toward the community of interest, policy have been blamed for the low prices. It could be construed as a violation of the Sherman anti-trust act. When it is found that the Gary dinners were being construed as a substitute for manipulating steel prices, these gatherings were abandoned. For the last six months the Gary dinners were being held at the United States Steel Corporation, and made no extraordinary efforts to maintain the position of the steel industry. He has allowed it to take its own course with the result that in most cases steel companies have not earned their dividends. In one or two instances the dividends have not been paid. In spite of an increase in production to the highest level ever reached, prices have not responded to any extent, and should there be a decline in output from the present level, the weaker companies will be regarded as without some special regard prices could not be held.

### JUDGE GARY LAYS BLAME ON POLITICS

CHICAGO, June 17.—Judge Gary, chairman of the U. S. Steel Corporation, interviewed here, says: "We need material uplift as well as moral, suppose some country were to discover in its domains gold mines yielding a million dollars a year for a hundred years. We would not be the least bit interested in the wealth that the world. Let here we (the United States) are yielding \$100,000,000 a year to nine billion dollars worth from a single mine. Moreover our business methods are a model for all the world. Every European nation tries to copy our commercial systems. And yet we are constantly in trouble. Why? The blame is obvious to every balanced observer. Too much politics. Politics and political and mental serenity could easily lead the world."

For a decade I have endeavored to make the Steel Corporation a model corporation, a company divested of all non-essential and objectionable phases, but apparently I have not succeeded in the satisfaction of some important people who constantly hear of the great business we get from the railroads. You might point out that we receive \$4,000,000 a year for the Pennsylvania railroads, and \$1,000,000 annually for freight charges.

### JUDGE GARY LAYS BLAME ON POLITICS

marked contrast to the general of railroad stocks, C. P. R. has maintained a remarkably buoyant price of 10 per cent, the investor who purchased Canadian Pacific in December at 218 per share would in addition to the yield on the stock of 4.80 per cent, have realized a profit of \$50.00 or share on May 31, when the stock had advanced 28 1/2.

The remarkable strength in the stock is not surprising when it is noted that the company in the first ten months of the current fiscal year has already exceeded its gross earnings of \$100,647,730, an increase of \$10,171,122, an increase of \$10,171,122, an increase of \$10,171,122, an increase of \$10,171,122.

The Eastern Car Company, all the directors of which are also directors of the Nova Scotia Steel & Coal Co., has been formed to manufacture steel railway cars at or adjoining New Glasgow, N.S. The steady and important railway expansion proceeding from year to year throughout the Dominion, due to the large increase in population and trade, and to the opening up of new territory, has produced a demand for rolling stock which existing companies have been unable to fill. The Nova Scotia Steel & Coal Company, which owns all the Common Stock of the Car Company, has manufactured various parts of steel railway cars for many years.

- ### Important Features of the Issue
- (1) Bonds constitute a first mortgage on the entire property of the Company.
  - (2) Prompt payment when due of both principal and interest unconditionally guaranteed by the Nova Scotia Steel & Coal Company by endorsement on each bond.
  - (3) Net earnings of the guaranteeing Company for the past three years, after deduction of all interest, sinking fund and depreciation charges, \$1,510,977, being an annual average of \$508,659, or over eight times the annual interest on the bonds. In addition, net earnings of the Eastern Car Company are estimated at \$250,000 per year.
  - (4) Surplus assets of guaranteeing Company and of the Eastern Car Company amount to \$9,851,067, or nearly ten times the amount of these bonds.
  - (5) Market value of Preferred Stock (which receives 8% dividend) and of Common Stock (which receives 6% dividend) of guaranteeing Company, both of which securities rank junior to the guaranteed bonds, exceeds \$7,000,000.
  - (6) The Sinking Fund provision is sufficient to retire the entire issue at 105 prior to maturity.
  - (7) Payment for bonds may be made either in one sum or as follows:
 

10% on application,	25% December 1st, 1912,
15% September 1st, 1912,	35% June 1st, 1913,

### HALT IN RISE IN THE COST OF LIVING

The upward march of the high cost of living was checked to a slight extent last month, the index number, i.e., the average cost of 106 commodities, for the United States, as of date June 1, being lower than that of May 1. In other words, the progress of the month, the more favorable crop outlook, and the increased supply of animal provender in the form of pastureage, have superinduced cheaper prices on a multiplicity of articles.

### CHICAGO GOSSIP

Wheat—There was unexpected action in wheat for the day. To begin with, the tone was much improved on the buying side, because it was felt that the liquidation was quite thorough in July, and that in following the break of the early month possibly the other futures were oversold. A false rumor of a purchase of 100,000 bushels near Oklahoma wheat to arrive in Chicago first half of July, helped to make bottom prices for the day before the story was denied. Some of the strongest interests in the trade accumulated, September wheat heavily at the decline. Regarders of what the market may do for an hour or a day, it is well to remember that nothing can possibly occur to drive larger total wheat yield in this country than last year. Any accident to the southwest harvest from wet weather or any one of the many accidents which greatly change the spring wheat status, will come to the surface, and the liquidation left from last year is in the show window of the past week is about completed, then the trade should face good normal conditions, with the accidents for the balance of the season on the side of the buyers.
