

CARLETON COUNTY YOUNG MEN WHO STAYED HOME

George S. Ingraham, of Southampton, Has His Seven Sons as Lumber Crew This Winter—Other News of Interest.

Southampton, N. B., Jan. 29—At 7 o'clock Saturday morning the thermometer showed forty degrees below zero—the coldest yet. One man reports that at 3 o'clock that morning it was forty-five below.

Mrs. George Christie is critically ill, and the hope is entertained of her recovery. Friends and relatives of Mrs. Christie are very sorry to learn that she has another bad spell. She is at her father's—William Munroe, of Lower Southampton.

Mr. and Mrs. George Martin, of Hartfield, who have been boarding this winter with Mr. and Mrs. Darius Dickinson, of Campbell Settlement, have gone to St. John.

A reception and donation was tendered Mr. and Mrs. Leonard Sabine last Thursday evening. About half a hundred ladies and gentlemen sat down to a very tempting midnight supper, and they left behind them about the same number of dollars in cash and goods as taken of their good will. Mr. Sabine is the pastor of the Reformed Baptist, and he has already won his way to many hearts.

The missionary society, organized more than a year ago by Miss Rebecca Bennett, of Hopewell Cape (N. B.), is in a very flourishing condition. It met last Saturday with Mr. and Mrs. Woodford Wright.

An upset and runaway occurred after the church service here Sunday. As Mr. Arley was turning his team up, throwing his wife and mother out. They were thrown in a deep snow drift. The horse ran away, but no damage was done.

J. F. Grant will start his steam mill at Woodville the middle of February. His engineer, W. H. Clark, of Boston, is on his way here and, with his wife and family, will remain during the winter months.

Rev. Mr. Hazel preached his last sermon in the Orange hall Sunday. He has been on this field three years. Everybody is very sorry to lose him. He moves at once to Woodstock, where he assumes the rectorship of the Episcopal church.

Joseph Oldham, his wife and their daughter, Miss Pearl, have moved to Woodstock. On the eve of their departure Mrs. Oldham, who is very popular here, was presented with a very fine coffee pot and scallop dish. John Fox bought Mr. Oldham's large farm here.

George S. Ingraham, who has been lumbering home this winter in all snow yarding, and has commenced hauling on his own mill. His crew is a most unique one, being composed of his seven sons. Can this be paralleled elsewhere?

George Farnham has returned from the Woodstock hospital, where he had an operation performed for an abscess on his head. He is now at home.

Arthur Dore has returned to the wood after a serious experience with typhoid pneumonia.

The lumber spruce is completed in his mill, a distance of six miles from Millville.

ENW YORK POLICE SUSPECT LOVER IN DYNAMITE CASE

Believe Internal Machine Was Sent Woman as Result of Her Discarding "Man in the Case"

Forgetting all about the sixty-two-zero number of the west prairie, and disregarding altogether all household articles that reach Eastern households every week from the much-advertised West, a few frank admissions contained in a letter from a former St. John man here in Vancouver will make interesting reading.

This business man says the snow is all gone again and when the sun shines, which is not very often, it appears as if it were. However, he declares, the rain and drab sky has been constant, except for a few brief intermissions, since the 1st, and will continue until May. This, he says, is Vancouver's substitute for snow.

The unemployed heads, are parading the streets 700 to 1,000 strong frequently. Optimists out there call this "socialism." The letter writer won't commit himself to a personal opinion.

Barrooms, theatres and places of amusement generally are doing good business, but commercial, real estate and financial lines are extremely slow. Prices for land and building property continue high and almost unapproachable nevertheless, and the most tenacious hopes are held for satisfactory sales "when the slump is over."

Numerous storekeepers have vacated premises upon which the rents have been screwed to the money-losing point.

A delightful diversion just now in the British Columbia metropolis, the writer pens in peculiar vein, is the "W. W. W." Westminister bank sweep of some hundreds of thousands of dollars in values, followed by the street car hold-up to the tune of \$3,000 off the principal, and the street then the Royal Bank "touch," for a large bundle of green goods, has made the sport popular, he thinks. A laundry team driver, he says, and several lone politicians have been made disgorge since these larger affairs under the very noses of the police. One small offender has been sent to New Westminster for fifteen years, to be pardoned with thirty lashes. Twenty-five new officers have been sworn in.

In a general way this newsy letter discloses some of the risks that it is reported, exist in a city which transportation literature and talk would make the unthinking believe was one charming Utopia.

CARD OF THANKS
As Mr. and Mrs. Edgington McLean, of Cumberland Point, are settled in their new home, they wish to extend to their many friends far and near their sincere thanks for the kindness and help shown to them in their loss of losing their home last May. E. M.

"AISLES" OF SAFETY.
"To avoid odds, keep out of crowds," says the health officer.

And should the day be Sunday, To dodge a crowd is easy, Get up early, go to church. Chicago Tribune.

Many charming theatre caps of gold, net or lace and known as "bonnets de soirée" are notable in the rage.

The St. John Telegraph and The News

VOL. LI. ST. JOHN, N. B. WEDNESDAY, FEBRUARY 7, 1912. NO. 37

FERRY RATES FOR TEAMS INCREASED

Council Amends the By-law

Cent Tickets to Be Accepted at Certain Hours

Members Stand 10 to 7, and New Rates Will Be Put Into Force This Morning—Important Business Dealt With at Busy Session.

The final decision of the common council as to the ferry rates came almost at the close of the second session of yesterday's meeting last evening and resulted in the immediate increase of two cents in the fare for single teams. Thirty cents for double teams, one cent in the straight ferry fare for passengers and the adoption of the forty book plan for fifty cents, except between certain hours when the cent ticket will be accepted. The hours in which the workmen's tickets will be honored will be between 6 and 8:30 o'clock in the morning, 9 to 1:30 o'clock at noon and 5 and 7 o'clock in the evening. The motion carried 10 to 7 and the new rate will be in force this morning.

There was a crush of business for the council yesterday and the aldermen did not have any time so that it was necessary to adjourn at 6 o'clock and hold an evening session. Many lively brushes occurred during the session and the different questions were warmly debated.

Reports of the chamberlain, comptroller, city engineer and building inspector were accepted.

Arthur Frank presided and the full board was present at both sessions.

ENW YORK POLICE SUSPECT LOVER IN DYNAMITE CASE

Believe Internal Machine Was Sent Woman as Result of Her Discarding "Man in the Case"

New York, Feb. 5—The investigations of the police into the mysterious murder of Mrs. Helen Taylor, killed by the explosion of a bomb in her apartment in West 74th street last Saturday night, today brought out some alleged facts in connection with the recent movements of Charles M. Dickinson, who was with the woman when the explosion occurred.

HAMPTON BUILDING DAMAGED BY FIRE

Knitting Factory and Machine Shop Practically Destroyed—Loss Partly Insured.

Hampton, N. B., Feb. 5—(Special.)—The local firemen had an hour and a half's strenuous fight this evening with a fire which broke out about 6:30 o'clock in a building near the railway station owned by J. M. Logan and occupied by him on the ground floor as a machine shop and upstairs by R. Alfred Stronach as a knitting factory.

TO SPEND \$30,000,000 ON NEW WELAND CANAL

Announcement is Likely Soon

Government Plans 22-Foot Waterway to Great Lakes—Means Side-Tracking of Georgian Bay Scheme for Some Years at Least.

Ottawa, Feb. 5—The largest item in the supplementary estimates, which will be probably brought down in the House of Commons in a week or so, will, it is understood, be for the beginning of construction on the new Welland ship canal. No official intimation has yet been made that the government has decided to go ahead with the enlargement of the present canal in part, and the construction of a large new section for the remainder of the distance giving a depth of 22 feet in accordance with the request of a large deputation which interviewed the government last December. It is understood, however, that this has been definitely decided upon, and work will be begun this spring. Surveys were under way all last summer with a view to locating a new route and getting accurate estimates as to cost.

Plans for the construction of the new canal which will be the largest artificial undertaking since the National Transcontinental Railway was inaugurated, are now nearly completed.

Will Cost \$30,000,000.
The total cost will, it is estimated, be in the neighborhood of \$30,000,000. The work of construction will be in charge of the present superintendent of the canal, J. L. Weller, one of the most capable engineers in the dominion.

The decision of the government to go ahead with the Welland canal practically means that for the present at least the Georgian Bay canal project will be left in abeyance.

The best advice obtainable by the government from transportation experts and from a general consideration of the relative cost and advantages of the two routes led to the conclusion that the Welland canal project is the more desirable, necessary and more profitable enterprise. Its speedy construction will enable the dominion to meet the competition of the new Erie canal which the United States is spending \$100,000,000. It will retain the export trade from the west in Canadian channels; it will, it is estimated, by changing the present transportation route from the head of the lakes to the westward, add from three to four cents a bushel to the value of the western wheat crop; it will also save time and money in the cost to the western consumer of commodities imported from eastern Canada and from Europe.

The decision to go ahead with the deepening of the Welland involves ultimately, of course, the deepening of the St. Lawrence system to Montreal, a project which will cost another \$100,000,000. But this is not contemplated at the present time. It is a project, however, which must be realized in the not remote future.

PROTESTS GALORE AGAINST CUT IN STEEL DUTIES
United States Senate Committee Begins Hearings of Those Interested Today.

Washington, Feb. 5—The tariff fight will open in the senate tomorrow when the finance committee begins its hearings on the house bill for revision of the steel schedule of the Payne-Aldrich Tariff Law. Scores of protests against the cut in duties made by the house measure are before the committee. No assignment has been made for tomorrow's hearing, but a number of interested concerns will be heard during this and next week.

The mail is still bringing in applications for hearings. Among those in today was a protest from Robert Hoe, president of a New York printing press concern, saying the bill would seriously affect the printing press business. He intimated that unless American wages were cut fifty per cent it would be better for his company to transfer headquarters from New York to England in order to maintain its export business and meet competition in the American trade.

TORONTO POLICE CENSUS GIVES CITY 425,407

Toronto, Feb. 5—The police census of the city, which has been completed, gives the local house to select a candidate for the local house to fill the vacancy caused by the resignation of Thomas A. Hart, who was elected a member of the dominion parliament at the last general election.

SEPARATE SCHOOLS QUESTION UP AGAIN

Boston Has Hope of Reciprocity

Financial Paper Says Coal and Iron Ore Will Go on Free List

OTHERS MAY FOLLOW
Declares Freer Trade in Many Articles Will Be Brought About by Mutual Reduction or Abolition of Tariffs of Both Countries.

Boston, Feb. 5—Reciprocity is looming up, according to the Boston News, the leading financial publication, today. The paper says:

"People who espoused in Canada to defeat the Laurier government have quietly admitted to the Boston News Bureau that as both sides have now had their innings in the preliminary squabble and as America has expressed her desire and Canada has declared for her independence and loyalty to the British government, real reciprocity will now take place, each country being its tariff in taking of certain duties.

"There is no special reason for a duty on coal and iron ore on the Pacific coast of the United States and Canada. Of course, Nova Scotia must for a while protect her infant steel industry, and the Canadian northwest has coal to sell on the Pacific coast in competition with the United States and there may be local squabbles, but Canada, as a whole, is now ready for reciprocity with the United States."

"As far as the United States lets down the tariff for Canada the Borden government will be found letting down the bars to the United States. It is really only a question of how to do it.

"There is an awakening appreciation of the fact that the United States has made it giving free entry to Canadian wool-pulp. Canada is looking around now as to where she can reciprocate without compromising her position.

INCREASED PAY FOR MILITIA
Non-permanent Forces to Get 75 Cents Per Day—Permanent Men to Get Annual Salary.

Ottawa, Feb. 5—The Canada Gazette announces a general change in the pay and allowances of officers and men in the permanent and non-permanent forces of the country.

The pay of the men of the non-permanent forces has been increased from 30 cents a day to 35 cents a day. The schedule of efficiency pay has been done away with, and the schedule now is a flat rate of 75 cents a day and 85 cents a day for those serving two years in succession, with an efficiency allowance of 15 cents a day.

The old rate was a flat one of 50 cents and an efficiency and service allowance of 20 cents, 40 cents and 50 cents a day. The increase of non-commissioned officers is on the same relative basis.

The pay of the men in the permanent forces has been improved and changed from a daily pay to an annual salary. The pay of non-commissioned officers of the higher rank has been so arranged that now when they receive promotion they will not be reduced in pay. Formerly a non-commissioned officer who was promoted would be actually losing money through his promotion, because the allowance for the lower rank was greater than that for the higher rank.

A slight change has been made in the allowances for officers with the annual salary, but the difference is not appreciable.

U. S. SENATE TO VOTE ON ARBITRATION TREATIES MARCH 5
Washington, Feb. 5—The senate today agreed to vote on the pending arbitration treaties with Great Britain and France on the legislative day of March 5. This time will include action on all amendments to the treaties or to the resolution of ratification.

UNIONISTS AND ORANGEMEN WILL NOT MOLEST CHURCHILL

THE RIGHT HON. WINSTON CHURCHILL WITH HIS ULSTER SMILE

The youthful British cabinet minister whose determination to speak for home rule in Belfast on February 8 has caused threats of tumult and riot in Ulster.

Belfast, Feb. 5—Self-denying resolutions having forced Mr. Churchill to speak in a Nationalist quarter and in a ring fenced by bayonets. The Liberal association proposed to the Unionist council that both should cancel the engagements at Ulster Hall for Feb. 7 and 8. A decision on this matter will be taken tomorrow.

The Unionists profess to be satisfied at having forced Mr. Churchill to speak in a Nationalist quarter and in a ring fenced by bayonets. The Liberal association proposed to the Unionist council that both should cancel the engagements at Ulster Hall for Feb. 7 and 8. A decision on this matter will be taken tomorrow.

DOUBLE TRAGEDY ON C. P. R. TRAIN

Aged Man, Named Stewart, Bound to Campbellton, Runs Amuck

Terrorized Passengers Near Swift Current; Killed a Wealthy American, and Then Himself.

Campbellton, N. B., Feb. 5—(Special.)—John Stewart, left Campbellton twenty-five years ago, but his friends here had no word of his intention to return. The man referred to is thought to be John Stewart, a man about seventy years of age, who originally hailed from Jaquet River or Naik's Creek.

It is not thought to be the Campbellton Stewart, as he is a man about fifty years of age, and it is thought as the other is the older man he is more likely to be the person.

SCOTT D. GUPTILL TORY CANDIDATE IN CHARLOTTE
Unanimous Choice of Convention Yesterday for Vacancy in Local Legislature.

St. Stephen, N. B., Feb. 4—Scott D. Guptill, a young man of Grand Harbor, Grand Manan, was the unanimous choice of the Conservative convention held here this afternoon to select a candidate for the local house to fill the vacancy caused by the resignation of Thomas A. Hart, who was elected a member of the dominion parliament at the last general election.

Borden is Between Two Fires

Archbishop Langevin at Ottawa Pressing His Claims

Will Have Backing of Catholic Hierarchy and Nationalist Members of the House, and a Lively Time is Expected When the Boundaries Bill Comes Up.

Ottawa, Feb. 5—The presence of Archbishop Langevin, of Manitoba, here today, and the fact that Armand Lavergne is coming here tomorrow in connection with the terms for the Manitoba boundaries, in so far as they affect separate schools, is indicative of the fact that the fight of the Nationalists and the hierarchy for a change in the boundary extension bill, preserving the rights of the Roman Catholic church to separate schools in the territory to be annexed, is waxing warmer.

Archbishop Langevin had a long interview with Archbishop Duchesne in Montreal yesterday and came here today to interview his former political ally, Hon. Robert Rogers, on the situation, and to protest against the present proposal of the government to have the bill any clause, specifying that separate schools shall be continued in the territory to be added to Manitoba.

Armand Lavergne, Bourassa's first lieutenant, and the man whom Premier Borden considered as the Nationalist's deputy in the formation of his cabinet, is expected to arrive tomorrow to offer similar protest and to support the offer Quebec support to the government in their demands for the fulfilment of the pledges they gave their constituents during the last election campaign.

Will Not Submit.
Mr. Borden's Quebec contingent emphatically declare that they will not submit to the passing of any bill which does not safeguard the rights of the Roman Catholic minority in Manitoba, and if the measure comes down to the house without the required clauses they will move to have it inserted, thus precipitating a serious split in the party ranks.

The whole question was debated at length at Saturday's cabinet council without any solution being reached which will avert the threatened split.

As far as can be learned the government has not yet decided which horn of its dilemma to grasp and the feeling is growing among the more experienced politicians in the province that under all the circumstances the only safe course is to temporarily shelve the whole matter for the session.

In regard to the dispute between Ontario and Manitoba in respect to the division of new territory, Ontario's administration is of the opinion that the Manitoba government is doomed in any case, and that it is politically more expedient to grant the extension of Ontario for a larger slice of territory than was originally intended, including the granting to Ontario of Port Nelson, which is to be the terminus of the Hudson Bay railway.

It is understood that the Manitoba representatives are now pressing for compensation in the shape of a slice of Ontario's present territory. They point out that a very large section of the residents of the Rainy River district have already petitioned the federal government for annexation to Manitoba, owing to dissatisfaction with the lack of regard shown to their interests by the Whitney government. A proposal has been made that this district should be added to Manitoba and the new boundary line on the east of Manitoba should be a line running almost straight south from Port Nelson to the American border. It is hardly likely, however, that Ontario will agree to any such proposition.

Liberals' Naval Scheme Suits Britain.
Considerable interest is felt in the possible announcements in the budget speech which is expected about Tuesday of next week. Many tariff changes are unlikely, but a good many members are priming themselves on the iron boundaries.

It is understood that the Borden government is having some difficulty in its informal negotiations with the admiralty. The government would like to obtain the admiralty's endorsement of some change of plans and has suggested that a direct money contribution would be the best form in which Canada could contribute to imperial defence.

NORTON GRIFFITHS CO. TO GET COURTENAY BAY CONTRACT

Ottawa, Feb. 5—The St. John rumor that the Norton Griffiths Company has been awarded the contract for the Courtenay Bay harbor improvement is, at least, premature, final action not yet having been taken by the government. It is understood, however, that the company will get the job, as it is the lowest tenderer.

FROM ALL OVER THE MARITIME PROVINCES

Saturday, Feb. 3. St. John is fully keeping up the record for merry-making which the evening days of the new year established, and the week just closing has had numerous entertainments...

Leavitt, Mrs. C. B. Allan and Mrs. G. H. Leavitt. Included among the guests were: Mrs. F. E. Sayre, Mrs. Percy Thomson, Mrs. H. O. Schofield, Mrs. T. Escott...

On Wednesday afternoon Mrs. Edward L. Jarvis gave an enjoyable bridge for three tables for her guest, Mrs. Philip...

On Friday afternoon Mrs. James J. MacLaren was hostess at a delightful party for Mrs. Herbert Cowan, of Toronto. The prize winners were Mrs. F. E. Sayre and Mrs. Busby...

On Saturday afternoon Mrs. James J. MacLaren was hostess at a delightful party for Mrs. Herbert Cowan, of Toronto. The prize winners were Mrs. F. E. Sayre and Mrs. Busby...

On Sunday afternoon Mrs. James J. MacLaren was hostess at a delightful party for Mrs. Herbert Cowan, of Toronto. The prize winners were Mrs. F. E. Sayre and Mrs. Busby...

FOR ANNUAL BILL

Article, Declares the Government Against It Quotes the British Navy

He says the only course to be followed is the repeal of the law. "Why does the federal government, and the majority which supports it, hesitate to repeal this law?" he concludes.

"The election of the premier himself, the verdict of September 21 last, condemned the naval law no less than the reciprocity treaty."

"What did he say about free trade?" "Oh, he's against it. He's a protectionist."

"That's strange," remarks the western member. "There are usually two periods of our lives when we believe thoroughly in free trade—when we are in college and when we reach heaven. In the interval between many good men allow themselves to be misguided."

"If I had my way," said another, "I would make him eat the carload of potatoes." "Oh, there's a better way than that," the suggestion comes from a Nova Scotia member.

"How would you work it out?" "Oh, we'd put some unbiased newspaper man like H. F. G., behind Speaker Brown's throne and let him do the talking."

"I see," says Devin M. P., "that Sam going to have all the boys in Canada sitting the bullseye at fifteen meters of the rifle."

"Where Monk Plinches. Further remarks on the usefulness of Boy Scouts in election campaigns are foretold on the entrance of Louis Philippe Pelletier and Frederick W. Brown."

"It seems to me," comments the person with eye-glasses, "that sort of thing is getting the youth of Canada interested in practical politics over-early."

"The Montreal Harbor Board is straightened out. The way Mr. Trempe is straightened out, the way Bill Maclean's railway restlessness is straightened out, the way the question is straightened out, the way everything is straightened out—that is to say it is staved off for a year until the government catches its wind."

"The winter care of the dairy cow is one of the most important questions to be considered by the dairy farmer, and upon the successful carrying out of this winter plan depends the paying quality of the herd in general."

"The winter care of the dairy cow is one of the most important questions to be considered by the dairy farmer, and upon the successful carrying out of this winter plan depends the paying quality of the herd in general."

"The winter care of the dairy cow is one of the most important questions to be considered by the dairy farmer, and upon the successful carrying out of this winter plan depends the paying quality of the herd in general."

WINTER CARE OF DAIRY COWS ONE OF THE QUESTIONS WHICH SHOULD BE THOROUGHLY UNDERSTOOD—ON THIS DEPENDS THE PAYING QUALITY OF THE HERD IN GENERAL.

GENERAL OTTAWA WINTER FAIR

World's Record Made in Dairy Test—Lectures on Horses, Cattle and Poultry.

The outstanding feature of the Eastern Ontario Stock and Poultry Show held in Ottawa in January was the new world record in dairy tests that was established by Maude de Cole, the pure bred Holstein cow exhibited by Thomas Spratt, of Billings Bridge.

It is an interesting fact that Rhoda Queen, the cow that came second in this year's test, gave Maude de Cole a close run, as a full sister of the latter. She is owned by Neil Sangster, of Ormsworth (Que.).

"The average farmer is very apt to believe that his cattle are sound when they are not, and that his horses are sound when they are not."

"The average farmer is very apt to believe that his cattle are sound when they are not, and that his horses are sound when they are not."

"The average farmer is very apt to believe that his cattle are sound when they are not, and that his horses are sound when they are not."

"The average farmer is very apt to believe that his cattle are sound when they are not, and that his horses are sound when they are not."

He said he had used with the best success a few carrots, every other night. He believed to be a good addition to the ration.

Speaking on the subject Care of the Colt to Three Year Old, John Bright, of Myrtle Station (Ont.), declared that farmers as a rule do not manifest any interest in a colt between the ages of weaning period and the day it does its first harness.

"Even though you feed a good colt, you may easily ruin it by not giving enough feed to build up bone and muscle compared with the amount you feed it to make flesh."

"Even though you feed a good colt, you may easily ruin it by not giving enough feed to build up bone and muscle compared with the amount you feed it to make flesh."

"Even though you feed a good colt, you may easily ruin it by not giving enough feed to build up bone and muscle compared with the amount you feed it to make flesh."

"Even though you feed a good colt, you may easily ruin it by not giving enough feed to build up bone and muscle compared with the amount you feed it to make flesh."

City councillors, over there, may almost anything which they may regard for the well-being of the people. They are professional administrators, with practical life-tenure of office, and are not engaged in private business.

Up to date this fall about 25,000 sacks has arrived. Wholesale prices for Maine potatoes in the market at \$3 a sack and say this price is just about double the price a year ago.

The importation of sterilized canned milk into Bengal is steadily increasing, and last year amounted to 500,000 rupees (about \$162,000).

The government has taken a good deal of pains to establish a factory for the improvement of cattle and also to teach natives, by example, the care of cattle, methods of milking cows, and the care of the milk.

POULTRY WHAT TO FEED FOR EGGS

Some Results of Investigation at Maine Experiment Station. For about twenty-five years the same family of Barred Plymouth Rocks has been carried at the University of Maine, and one way has been learned to feed and handle them to secure eggs and to avoid the losses from over-fatness, which are so common in the case of birds that are bred.

PROSPECTS ARE STILL BRIGHTER

Great Industrial Activity Throughout New Brunswick Seems Certain

Electric Power May Be Developed in Queen's County Coal Areas—Cost Not Yet Figured Out, Says Col. McLean—The Plan—The Gibson Property.

Monday, Feb. 5. Industrial activity among many different lines is promised as one of the results of the great forward movement in New Brunswick. Large cement works, backed by English capital, are likely to be established in Albert county and at Greenhead and Kesteven, in St. John county, and an authoritative announcement regarding the removal of the companies interested is fully expected. It is also reported that the concern interested in the iron mines of the province may establish smelting works in St. John, encouraged by the removal of the federal duties on iron and steel.

The prospect of having electric power developed in the Queen's county coal areas is also receiving attention. Col. H. H. McLean, M. P., said yesterday that there could be a ready sale for all the power which could be generated. He said the whole scheme was quite practicable, but that the cost had not yet been figured.

The plan would be to build coke ovens which the slack coal could be made into coal, the railroads taking all the green coal available, and the gas which is a by-product of the coke ovens, used to drive the dynamo of a generating electricity much cheaper than can be done by the hydraulic method.

With cheap power supplied and the establishment here of large iron smelting works drawing the raw material from the mines in the province, the prospect of a big steel shipbuilding plant coming here is bright.

Another big industry assured is the new paper mill in Lancaster to be run by a company with \$3,000,000 capital, headed by the Senator James of Banter (Mc). Col. McLean said yesterday that this company had secured an option on the immense properties of the Alex. Gibson Company in York county lasting until March 15. It is said to be practically settled that the transfer will be made before this time and that the new company will also secure controlling interest in the Edward Artington Pulp and Paper Company, and that the new mill will be run in connection with the present pulp mill at Union point.

OTTAWA FOOD PRICES SOAR

(Ottawa Journal, Feb. 3). "What is butter?" "Forty cents a pound." "What are eggs?" "Fifty cents a dozen for fresh ones, but can give you packed ones at 43 cents." "What are potatoes worth?" "Two dollars a bag." This conversation between a grocery clerk and a newspaper reporter was in tabloid form, but it represents nothing small to thousands of good Ottawa housewives. It states what is a fact. Potatoes are now selling at 82 a bag, far dearer than they have ever been before in Ottawa, and it may be remarked that the next highest quotation was four years ago, when the price was asked to pay at seven shiny quarters for every bag they bought.

"Then as to butter. Today at some of the smaller grocery stores they were asking 40 cents a pound for dairy butter and 53 for packed. Even in departmental stores the quotations were 38 cents and 42 cents. Butter is the commodity which when purchased nearly dropped dead when they saw a clerk digging into a big tub of butter, asked that it was not the best, and that it was 43 cents a pound." The clerk added: "I hardly see how the poor man lives these days; some of the people are coming out of the butter and are blackstrapped on their bread (mashed)." During January, eggs reached the "high water mark" of 43 cents a dozen. Stripped ones can now be bought for 50 cents a dozen, but even at this rate they are scarce. It is on record that those staying at boarding houses throughout the city have not lately noticed a superabundance of fresh fried eggs on the menu.

"Then it might just incidentally be remarked that coal is higher, some fuel merchants asking \$8 a ton. Beef is also scarce and prices higher than they were a month ago."

Mr. Borden and Mc Temere (Toronto Telegram, Con.) The truth is that Mr. Borden sought diligently for a way of establishing legal restrictions on the right of parliament to touch the Ne Temere issue at all. The electors of Toronto will have to face the question of their own responsibility for the surrender to clericalism at Ottawa. Even this city may be so party-ridden that it is possible for Hon. George E. Foster and Hon. A. E. Kemp to secure nomination as members of the house that dodged into the nearest court room when it was threatened with the displeasure of the ecclesiastical influences that hold the Ne Temere doctrine. Do Toronto and English-speaking Canada believe in nothing nobler or higher than the dodge which this city's ministers and members of the Ne Temere party have used against the cowardice of a Borden government, even as they protested against the clericalism of a Laurier government, may be common crying in the wilderness of this country's indifference to the rights outraged by the Ne Temere decree. The all-but-completed surrender of the house of commons completes the degradation of a country that should hoist the flag with the crossed keys as its national ensign, and let Canada be a state of the church in name as well as in nature.

Paint and varnish can be easily removed from the hands by first rubbing well into them some grease or lard; then washing with soap and water.

WANTED

WANTED—At Biggar Ridge, Carleton county, School District No. 11, a second class female teacher to commence first of April and teach all first of January, 1912. Apply to W. A. Biggar, secretary, State lowest salary. Feb. 1, 1912. Address: Forester Post Office. 1082-17.

WANTED—A girl for small family at Rothsay. Good wages. Apply, Mrs. Andrew Blair, Rothsay.

RELIABLE representative wanted, to meet the tremendous demand for fruit trees throughout New Brunswick at present. We wish to secure three or four good men to represent us as local and general agents. The special interest taken in the fruit-growing business in New Brunswick offers exceptional opportunities for men of enterprise. We offer permanent position and liberal pay to the right man. Stone & Wellington, Toronto, Ont.

SALESMAN WANTED. SALESMEN wanted for Nursery Stock, Seed Potatoes and Automatic Sprayers. Either or all. Cavers Bros., Gals, Ont. 23-5-29-59.

Our classes are much larger than ever before in our long history. We are grateful that our efforts to do good work are appreciated, and are striving to not only maintain but to increase our reputation. Catalogues to any address. S. KERR, Principal

NOTICE is hereby given that application will be made to the Legislature of the Province of New Brunswick at the next session thereof for the passage of an Act to be entitled "An Act to consolidate and amend various Acts of Assembly relating to the Church of England in New Brunswick." Dated this fifth day of January A. D. 1912. JOHN FREDERICKSON, Bishop of the Diocese of Fredericton. 291-29

KINNEAR SETTLEMENT SURPRISE PARTY

Kinnear Settlement, Feb. 5—On Saturday evening a very enjoyable surprise party took place at the home of Mr. and Mrs. Ralph McFee, it being the sixty-third birthday of Mr. McFee. During the evening Mr. McFee was presented with a very handsome rocker and the friends made merry with games and music. Lunch was served in Mrs. McFee's usual good taste. The following were present: Mr. and Mrs. Noah Mann, Mr. and Mrs. Solomon Mann, of Mainville; Miss Vivian Rose, Corn Hill; Frank Alward, Moncton; Miss Nellie and Minnie Alward, Hurdwicke; Fred Keith, Steeles Settlement; Miss Mabel Douglas, Walter and James Douglas, Intervale; Mr. and Mrs. John Steves, Mrs. Asenath Keith, Miss Bedford Keith, Benjamin Keith, Mrs. Annie Keith, Miss Annie Cameron, Miss Clara Steves, Oran Cameron and Ora Mann, of Kinnear Settlement.

GIVE IT A TRIAL. A merchant had a lot of goods, but no one came to buy. In one of his despondent moods he thought an ad. he'd try. He sold his goods in half a day. And ever since he cries To every one who comes his way: "It pays to advertise."

ACCUSED DYNAMITE MADE TO SHOW HIS TEETH TO JURY

Los Angeles Prosecutor Claims Dents on Fulminating Caps Used in Explosion Were Made by His Molars.

Los Angeles, Cal., Feb. 2—Bert H. Connor, on trial here for conspiracy to dynamite the Hall of Records building, was led up and down in front of the jury box yesterday, with the hand of C. Roy Horton, deputy district attorney, pulling his lips away from his teeth, as the teeth of a horse are bared before a sale. In concluding his argument, Horton declared that dents on fulminating caps introduced as evidence were the imprints of Connor's teeth, and contended that they showed he had chipped the jury box caps attached in turn to the sticks of dynamite found near the building. As Horton spoke, Connor was seen to close his lips tightly.

"Look at him," cried the prosecutor. "He does not dare open his mouth; he does not dare show his teeth." As Connor started to speak, Horton pulled him from his chair, and stood him up before the jury box. Horton grasped the prisoner's jaw, pulling the lower lip away from the teeth, calling attention to the fact that Connor's teeth are far apart. When he had finished and released the prisoner, he passed the fulminating caps into the jury box, declaring they bore the marks of the.

EVERETT WOMAN IS ACCUSED OF STABBING HUSBAND

Mrs. Susan Haynes Weighed Only 90 Pounds, But She Was a Whirlwind in a Scarp.

Boston, Feb. 3—Baraged at her 200-pound husband, Mrs. Susan Haynes, who is 20 years old, a bride of a year, and about 90 pounds in weight, snatched up a blunt paper cutter and, according to the Everett police, stabbed him twice with it. The whole affair occurred in the very pretty cottage which Mrs. Haynes and her husband, Henry Haynes, who is a year her senior, occupy at 23 Myrtle street, South Everett. It appears from the police story, that last night about 11 o'clock, words were high between the couple. In the midst of the argument Mrs. Haynes, greatly angered, snatched up the paper cutter and, it is believed, before she realized she had stabbed her husband twice with it. The first blow inflicted a glancing wound in the left arm and the other struck Mrs. Haynes over the right eye, making an ugly cut two inches deep. The cries of the wounded man aroused the neighbors, and the police were notified. Policemen O'Neil entered the house and found Haynes lying on the floor, unconscious, with his wife sobbing over him. He was taken to the Everett Hospital, where his chances of recovery are regarded as good, while Mrs. Haynes was taken to the Everett police station to await the outcome of his injuries.

ST. JOHN PEOPLE AMONG HEIRS OF LATE ED. CALLAGHAN

Brooklyn, N. Y., Jan. 31—The will of Ed. Callaghan, former St. John resident, who died in this city January 18th, was filed for probate in the Surrogate's court, and disposes of a \$15,000 estate as follows: To his two sisters in St. John, Mary Connolly and Jane Colgan, \$500 each. To the Roman Catholic Orphan Asylum and the Protestant Orphan Asylum, both in that city, \$500 each. To a nephew, James Boden, now residing at Spring Valley (N. Y.), the sum of \$2,500. To two other sisters, Bridget Boden and Margaret Thornton, both residing at No. 438 Ninth street, this city, \$500 each. Five \$1,000 bonds of the Mexican Light & Power Company are to be divided equally between two nephews, Edward M. and John Boden, both nephews residing at the Ninth street address. The residue of the \$15,000 estate is to go to his nephew, John, who is named as executor.

There are nine clauses in the will—one of them reading that his remains are to be interred in a Roman Catholic cemetery in Brooklyn.

BIRTHS

McBAY—In this city, at 80 Victoria street, Feb. 1, to Mr. and Mrs. Walter B. McBay, a daughter.

MARRIAGES

CODNER-WEATHERHEAD—At the residence of Heskiah Codner, 8 Cranston avenue, on February 1, by Rev. J. H. A. Anderson, B.D., James H. Codner to Alice Maud Weatherhead, both of St. John.

DEATHS

COADY—In this city, in the 31st inst., John T., eldest son of Anne and the late Michael Coady, leaving a wife and three children to mourn.

HATFIELD—In Amherst (N. S.), on February 1, of pneumonia, Mrs. George A. Hatfield.

LAUGHY—At Norton, N. B., on Feb. 2, after a short sickness with appendicitis, Mrs. D. Laughy.

DOWNING—In this city, on the 2nd inst., Sarah Olive, widow of Maurice Downing, leaving three sons and three daughters to mourn. (Boston and Fredericton papers please copy.)

MEADE—In this city, on the 2nd inst., William Meade, in the 68th year of his age, leaving three sons and two daughters to mourn. (Boston and Philadelphia papers please copy.)

WAGONS CARNIVAL SAYS HE WAS NOT IN ROME

Hon. Geo. H. Parley Denies That He Was Sent to the Vatican—Was Here Friday.

Among the school passengers on the C. P. R. liner Empress of Britain, which arrived here Friday night, was Hon. George H. Parley, minister without portfolio in the Borden government. To a Telegraph reporter Hon. Mr. Parley denied that he had had any official signature, and that he had not conferred with the British ambassador in the Canadian government regarding the Ne Temere decree. Mr. Parley said that he had not been in Rome. His trip abroad had been for a rest after the fatigue of the recent dominion election campaign and he had spent a delightful time in the south of France and but a short time in London. He had been present at the Giffiths funeral which Earl Grey, former governor-general of Canada, was presided with the freedom of the city of London. He was accompanied by his daughter, Miss G. L. Parley, and they went out last night to Ottawa, where Mr. Parley will resume his parliamentary duties.

ALBERT TRAPPER GOT SILVER GREY FOX

Expects to Get \$500 for the Pelt—News of Hopedwell Hill.

Hopedwell Hill, Feb. 1—There is a report that eyes Albert county may save a fox ranch in the near future. The enterprising resident who is thinking of going to the Yukon to hunt for the Steddy or macomber, who has been living at River side for some years, and done considerable in the way of trapping and hunting the fur-bearing animals of the Steddy or macomber, Noel has his eye on a live fox or two, and is talking of getting a small farm started at Riverside. Last week Noel shipped to Montreal a very valuable silver grey fox skin, which he purchased from a resident of Osborne Corner, Albert county, who trapped the animal some weeks ago. The Indian, it is said, paid \$800 for the skin, and he pronounces it a genuine silver grey and worth in the market at least \$500. The fur is black with the exception of a strip down the back, where the tips of the hairs are silvery white, and the pelt has been examined by a great many interested residents.

A party of about thirty young people spent a very enjoyable time at the home of Mrs. Annie Kesteven, last evening, the gathering being in honor of Miss Adele Keiver's birthday. The evening was spent in playing of parlor games, music, etc., and refreshments were served.

A pretty big business is now in progress at the Prescott pond at Albert, in gathering ice. About a thousand cakes will be cut.

Three government mechanical engineers were at Albert this week examining the saw mill engineers who have to qualify under the new act. They were in candidates from the portable and stationary mills, including the Prescott and the White mills, and those of W. J. Carraway, and others. All of the men passed and were given certificates.

Mrs. John Danahy and Mrs. Power, of Albert, have been very ill, are both recovering.

ALL CITY MILITIA UNITS TO DRILL IN CAMP THIS YEAR

Ottawa, Feb. 2—General orders issued by the militia department announce that all city units will be ordered to camp this year. It has been conceded by the militia authorities that the training which city corps have received in the past has been insufficient. It is realized that the training which these units receive in cities is deficient in practice, and now every regiment in practical work. This work will consist of long marches, sham battles and technical training.

Like the Conservatives.

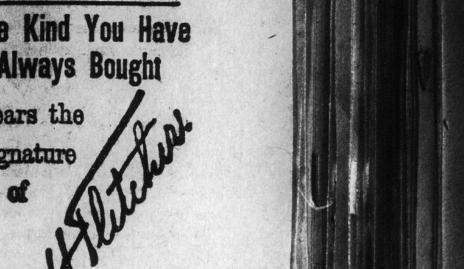

(The Times). A statement has appeared in the press to the effect that after Joe Paul was elected chief of the Indians at St. Mary's reserve, he appointed Isaac Paul as assistant chief. This is not correct. Isaac Paul was not appointed, but was elected to office, the same as the chief. He is in the city today, and informed the Times that just as the Conservatives have won from the Liberals the Pauls have triumphed over the Jacobites, and now every regiment in practical work. This work will consist of long marches, sham battles and technical training.

DR. J. COLLIS BROWNE'S Chamberlaine

The Best Remedy known for the Most Stubborn Coughs, COLDS, ASTHMA, BRONCHITIS, ACTS LIKE A CHARM IN DIARRHOEA, DYSENTERY, and COLIC. Beware of cheap imitations. Sole Importers: Lyman Bros. & Co., Toronto, Limited.

GASTORIA

For Infants and Children. The Kind You Have Always Bought Bears the Signature of

Apocryphal Remedy for Constipation, Sour Stomach, Diarrhoea, Worms, Convulsions, Feverishness and Loss of Sleep.

WILSON'S INVALIDS' PORT (A La Quina au Perou) A BIG BRACING TONIC. The only preparation of its kind on the Canadian market that has been encouraged by the generous support of the leading members of the Medical Profession.

Of Interest to Women. A frying basket should be dipped in boiling water or heated in the oven before being put in the hot fat. It will thus not reduce the temperature of the lard. When scrambled eggs are saved, make a tomato sauce, adding to it a few Spanish peppers, chopped fine. This will be a delicious accompaniment to the eggs. A rich puff paste, baked in strips about an inch wide and two or three inches long, is very good in sandwiches. Crusty jelly and whipped cream are used for filling. A bare broom splinters matting easily. If you have no long-handled soft brush, make a gray cotton flannel covering for the top of the broom.

The best thing to dust furniture is a large soft paint brush which has been dipped in olive oil and squeezed almost dry. This will take up every bit of dust without sending it flying about.

To make whole wheat bread, take four cups of whole wheat flour, two of white flour, half a cupful or sugar, one teaspoonful of salt, one yeast cake, dissolved in enough warm water to make a stiff batter. Let rise until light, mold in two loaves, let rise again and bake in a moderate oven. A teaspoonful of shortening adds to the richness.

Cold bluefish or almost any cold fish, except coarse fish, like salt cod, may be utilized for salad. Season with plenty of salad dressing, very slices of young onions and a minced parsley. Serve on a bed of lettuce.

When the edges to prevent raveling and sew on the wrong side of the stocking, where you catch the hose supporter. This will keep the finest hose from being torn, and if done neatly is not disfiguring to the stocking.

Sometimes a new ribbon or tape is needed in a garment that is almost worn out. Perhaps it can only be washed a few times more. Crochet a waiststitch of common string and run in the binding, and it does very nicely for a short time.

When you are picking beans, or in fact any kind of dry fruit, you will find that it makes your work considerably lighter to put the fruit to be picked into a colander. The finer dust and chaff will go through and save you the trouble of picking it out and the danger of having it stay in.

When olive oil dressing will not thicken after the necessary amount of oil has been used, best is a small quantity of dry cornstarch. This prevents the curdled or oily appearance. After standing a short time the dressing will be stiff and will not taste of cornstarch.

Lamb's liver, which is very delicate, and not so much used as it deserves to be, is delicious minced and served on toast. It is also excellent diced, cooked two or three minutes in a tablespoonful of butter, and folded in an omelet, with peppers and a minced olive or two.

CHURCH IS SHAKING UP THE ADMIRALTY

Has Accomplished Many Reforms Since Assuming Charge of British Navy.

London, Feb. 2.—Young Winston Churchill is being taken seriously by a large part of the British press and public. This tribute to his ability has been a long time coming, but apparently many who were disposed to criticize his methods and temperance are now of the opinion that he has a certain force, which is being used for the good of the nation.

The change in public opinion in the matter has been sudden. A month or two ago Mr. Churchill was merely a bad boy, hardly worthy of adult notice except in the way of admonition. The public would not forget a certain reported music hall anecdote of his early youth or the Sidney street affair during the Boer war...

There was plenty of encouragement given to the public not to forget. Even now the all common and have seen with the young man. They parody Sir Joseph Porter's song from Phinaros with Mr. Churchill in Sir Joseph's place as first lord of the admiralty...

There had been danger of war with Germany shortly before. That the government had decided that the fleet needed an overhaul, in an application of new methods, was generally accepted as the underlying reason. It was argued that the government wanted more push and energy in the admiralty and that, in spite of that, the fleet was not being improved...

Mr. Churchill's first move was to have a deal in the composition of the administrative body known as the sea lords. He appointed new men. There was much comment on this rather radical move, but it was not in the line of adverse criticism.

The recent creation of a naval general staff has been received with a degree of approbation that is surprising in view of the fact that the admiralty has been in quarters to poke fun at anything of an administrative character for which Mr. Churchill was responsible. The general staff is the admiralty's staff, quite as active as its friends, and until Mr. Churchill took the bull by the horns and announced to the country that a general staff was to be created without saying "By your leave" to parliament, nobody had any opposition to the plan in the admiralty. But when the thing was done there was a chorus of approbation and mighty little backbiting.

Under his authority as first lord of the admiralty Mr. Churchill has created an operations division and assigned a high ranking officer to take charge of it with the title of director. Other directors of other new divisions were assigned from the naval list.

In the development of the naval general staff scheme Mr. Churchill will apply the principle of the United States navy after the agitation several years ago over the demand that seagoing officers should outline the general points of tactical cooperation.

The personnel of the war staff, which is an expansion memorandum, will consist of naval officers fresh from the sea and returning to the sea fairly frequently.

Another reform is provision for frequent consultation and co-operation between the army and the navy in the preparation of war plans.

The navy and the army, to quote Lord Haldane, the secretary of state for war, "are now going to co-operate in this problem of defence in a fashion they have not done before. In his memorandum Mr. Churchill made it plain that he intended to do his utmost to abolish what he called "watertight compartments," meaning the establishment of a bureau staff in which each bureau was to be sufficient unto itself without necessary co-ordination and co-operation in the various elements of the naval establishment.

To overcome this he intends to bring the heads of the general staff divisions into frequent consultation with the chief of the general staff, so that each will regard himself as part of a whole and not a separate entity, having no responsibility or relationship to the other branches of the naval establishment.

To guard further against falling into a rut Mr. Churchill has invited the entire commissioned personnel, which numbers 12,000, to give their views on the subject to a rather dangerous experiment in a great way, as demonstrated in the United States, but Mr. Churchill apparently believes that it will do good in breaking away the cobwebs that are bound to appear if constant effort is not made to destroy them.

Mr. Churchill has rather passed a narrow gauge to criticize his own work. He is now carrying out the contract for the construction of wharves and a dry dock at Courtenay Bay.

The Canadian government is not likely to take any action for a year at least, either for the repair of the Liberté naval act, or for the substitution of some other form of naval aid.

H. M. Davy, who is in charge of the boring operations in St. John harbor, left last evening for Ottawa to confer with the government in reference to some government work which is to be carried on in Montreal. With favorable weather conditions Mr. Davy expects that his work in this city will be completed in a very short time.

TO CALL SPECIAL MEETING OF THE COUNTY COUNCIL

Important Business Includes Request for Concessions from Consolidated Pulp & Paper Co., Ltd.—After Sugar Refinery.

Important business having been presented for the consideration of the municipal council, the warden has decided to call a special meeting which will be held early next week. It is understood that the Consolidated Pulp & Paper Co., Ltd., after Sugar Refinery.

The number of permits issued for 1911 was 136, of which 121 were for wood and 15 for brick.

The insurance on the buildings as estimated by the inspector was \$780,050 and loss \$38,485.

The class of buildings were divided as follows: Wood \$26,700; Brick \$32,600; Total \$59,300.

MONCTON HOT AFTER SUGAR REFINERY

Civic Delegation Going to Halifax to Offer Inducements—Board of Trade to Give a Banquet to Minister of Railways.

Special to the Telegraph. Moncton, Feb. 5.—At a meeting of the board of trade tonight the matter of offering inducements to the Acadia Sugar Refining Company to erect a refinery in Moncton to take the place of the burned Halifax refinery was discussed. The board decided to co-operate with the city council and appointed a committee, composed of C. P. Harris, W. F. Humphrey, A. C. Chapman and Hon. C. W. Robinson, to accompany a delegation from the city council to interview the officers of the company with regard to concessions in case a refinery is built here.

The Moncton Tramways, Electricity & Gas Company submitted an offer to C. P. Harris, representative of the Acadia Sugar Refining Company here, to supply natural gas at 15 cents per thousand feet if the company rebuilds in Moncton.

The board of trade decided to tender a banquet to Hon. Frank Cochrane, minister of railways, in the near future, Hon. J. D. Hazen and other politicians being included among the guests.

The city council at its monthly meeting tonight resolved to carry the fire and insurance department for the year amounting to more than \$117,000, being over \$9,000 in excess of last year. The estimates provide for the equipment of a six-vault corps and a new fire company.

An executive committee of three months was appointed. The president, the vice-president, the secretary and the treasurer were elected. The association reaffirms its favor of the inspection of lands under the supervision of the forest department, and urges the government to extend the possibility of extending the possibility and for other purposes.

Against Export of Timber. The association concluded a convention in the rooms of the hotel yesterday afternoon. The printed reports from both federal and provincial governments are being examined. The association is now working on a plan to provide a system of making appointments, and the government is to be placed in the hands of the government.

It was resolved to extend the possibility of extending the possibility and for other purposes.

OPTION TAKEN ON LEE FARM

Talk of Bigger Brick Making Industry—Sale to F. G. Spencer.

It is learned that the option on John Lee's farm at Little River involves about 100 acres at a price of between \$400 and \$500 an acre. The purchasers are a syndicate of six local men headed by Thomas Nagle. The property was placed with Armstrong & Bruce for sale and was turned over by them to F. G. Spencer at a substantial advance on the original price.

Two building lots at the east end of British street were turned over last week at a good profit to the owner. It was understood he purchased them for \$300 about five years ago. He sold them for \$1800 last week.

The buildings belonging to the estate of the late Andrew Myles, carpenter, one situated in High street, the other in Acadia street have been purchased by John Maguire. The price paid was \$3,000.

Miss Furlong has purchased from G. H. Waterbury the house on Union street, in which she is at present residing.

William McCuskey, former partner of a local syndicate, purchased on last Friday B. Brennan's farm on the Board's Head road. The land has a frontage on the river and was formerly the Steaton property.

SEPARATE SCHOOLS QUESTION UP AGAIN

(Continued from page 1.) The admiralty does not view this suggestion with favor. It feels that if Canada should make Britain a gift of \$10,000,000 to be used for the purchase of a Dreadnaught, the British government should not be asked to contribute more than the amount of the gift.

The people who oppose the Ne Temere decree can be fooled, and the church that upholds the Ne Temere decree can't be fooled.

Canadians may be temporarily or permanently deprived of their rights by the clerical leaders at Ottawa. Such Canadians must also be deprived of their sense before they can recognize the noble lines of moral heroism or political courage in the figure of the Borden government. That government represents itself as a skulker into the nearest law court with an issue which should be kept in parliament until it is settled by legislation, instead of being settled by litigation.

A TUBERCULAR MONUMENT. According to Professor G. P. Merrill, head of the geology at the National Museum, the Washington Monument, which stands on the banks of the Potomac River, Washington, is suffering from tuberculosis. According to a writer in the Potomac Mechanics, there is danger that this disintegration, while not immediately fatal, will materially shorten the monument's life. The action of the weather on the cement filling between the masonry outer facing and a lime substance is causing the cement filling to form on the outer facing and a lime substance is causing the cement filling to form on the outer facing and a lime substance is causing the cement filling to form on the outer facing.

It is pointed out that the association were first advised that this association never intended to go to further the necessary to amend the association should not be entered into. The association should not be entered into. The association should not be entered into.

The report of the commissioners of the Free Public Library, presented to the meeting of the common council yesterday afternoon, showed the affairs of the library to be in a very satisfactory condition. The receipts for the year amounted to \$5,836.57, while the expenditures were \$5,287.20.

FORCES ARE READY

Mr. Copp Looks for Interesting Session of Legislature—Went to Fredericton Last Night.

A. B. Copp, M. P. P., of Sackville, leader of the local opposition, passed through the city last evening en route to Fredericton. To a reporter for the Telegraph he said that the opposition forces were on the alert and were looking for an interesting session of the legislature. He said he was pleased to hear that things were so bright in St. John, and in the event of the dominion government carrying out the programme of the late minister of public works for the development of Courtenay Bay, he felt that it would be a great success.

INCREASE IN BUILDING IN CITY IN 1911

Number of Permits Not So Large, But Value Was Greater.

The report of the building inspector for 1911, presented to the common council yesterday afternoon, showed an increase in the amount of building for last year over 1910 although the number of permits issued was not quite so large. The value of buildings for which permits were issued was \$472,700, as compared with \$324,175 in 1910, an increase of \$148,525.

The class of buildings were divided as follows: Wood \$26,700; Brick \$32,600; Total \$59,300.

The number of permits issued for 1911 was 136, of which 121 were for wood and 15 for brick.

The insurance on the buildings as estimated by the inspector was \$780,050 and loss \$38,485.
