FEDERATION OF THE CIVIL SERVANTS

Outside Service of Dominion Will be Asked to Co-Operate.

POWERFUL BODY

OTTAWA, Saturday.—Considerable talk has led to a definite plan for a complete federation of the Civil Service in Canada. Through no action has as yet been taken in the matter it is probable that the outside service all over the Dominion will be asked to come into a Federation Association of Civil Servants. This, at any rate is the idea which some prominent local members of the Government intend to act on. With complete organization throughout the Dominion would become a powerful body and through complete co-operation, the service would be much more likely to gain the ends than through the incomplete organization of the inside service alone.

EXTERMINATING GAME IN NORTH LAND

Hundreds of Hunters are Slaughtering Moose and Caribou.

KILLING FEMALES

In all the thousands of miles from Vancouver to the North Sea and from Edmonton to Dawson, the country is dotted with hunters at intervals from twenty to one hundred miles apart. From this it will be seen that the game has no way of escaping, as there is no stretch of more than a hundred miles where the crack of the gun is not heard. With nearly every one it is a case of doing his level best to kill all he possibly can, even though ninety-nine per cent. goes to waste and rots on the ground. The Indians are the only men who regard the preservation of game as a necessity, says a Dawson correspondent of the Toronto Globe.

"I have been in the Northwest for eleven years and travelled from east to west and from north to south and have seen slaughters of large game on several occasions that would make Buffalo Bill's buffalo killing look like child's play. The first of these killings I witnessed toward the head of the Klondike River in the winter of 1898, when a herd of caribou came upon a hunter's camp and he killed the head of the herd. I remember it well. It was a case of doing his level best to kill all he possibly can, even though ninety-nine per cent. goes to waste and rots on the ground. The Indians are the only men who regard the preservation of game as a necessity, says a Dawson correspondent of the Toronto Globe.
