NO. 94

The Second Week —OF OUR— GIGANTIC SALE!

Will be an interesting one. The first week was an immense success (one of the best in our history). Each day the crowds increased and the sales were larger. Satisfied buyers, pleased with the bargains they had secured, expressed their delight. We are going to make the second week "BETTER YET," and have added to our already long list of bargains, many special lines that were not on sale at first to replace the "sold outs." COME WITH THE CROWDS.

Dress Goods at 39c.

Although some of the designs are sold out, we have still a good assortment, for we laid out a big lot—many of them worth 75c per yard. At the sale price, 39c, they are moving out rapidly.

Dress Goods at 69c.

Worth up to \$1.25, and many of them special values at the regular price. The price of 69c on the table has made it one of the centres of attraction during the past week.

Skirt Lengths and Remnants

The heavy selling of the past week has left us with a number of short ends of Dress Goods and Tweed Suitings, some of them long enough for a lady's skirt, others only enough in them for a child's dress. They all have a remnant price on them—and the figure is a low one.

Striped Skirting at 9c

2 pcs. only in pink and white stripe, a good cloth, full skirting width, 40 inches wide, regular price 15c a yard, special sale price 9c.

Fawn Corduroy 50c.

Worth 75c. A splendid line for Men's Trousers, Boy's Suits, Child's Coats. It comes in two different cords, and is slightly discolored on the back only, our reason for selling it at the bargain price.

Bleached Cotton 10c

36 inches wide, a fine smooth finished cloth, regularly sold at 12½c yd. During our sale we are offering this special at 10c.

Bleached Cambric at 12½-2c.

The 15c quality, and a lovely one it is. A specially fine line for underwear. Spring sewing time is here and you will probably need some of this. You might as well buy it now, while "Sale Prices" rule.

Ribbons at 15c.

The Ribbon Counter has been a busy spot during these sale days. Is it any wonder, when you think of our selling a fine quality of Taffeta Ribbon in all the leading shades, nearly 4 inches wide, at 15c a yard? The regular value of this line would be 25c.

Rummage Dept.

This department on the third floor has been a busy spot ever since the sale opened. The prices here are really ridiculous when you consider the actual value of the goods. It's an interesting spot to visit too. Come and rummage with the crowd—you'll find something there you can use, and the price won't be a consideration at all.

Embroidered Skirtings 25c.

Full Skirt width, on fine India Mull, both black and white grounds. The black are nearly all embroidered in white and the white ones in black, heliotrope and other shades. The regular values of these were \$1.00 and 75c.

Curtain Net at 22c

A bargain that is appreciated at house-cleaning time. It's 52 in. wide, with double border, tape edges, the regular price was 35c, the sale price 22c.

Lace Curtains at 1.63

3½ yards long, 60 in. wide, in swell design and a beautiful quality of net, worth in the regular way \$2.25. See them at the bargain price \$1.63.

Bobbinet Curtain 1.68

The regular price was \$2.25. There is not a large lot at this figure but while they last \$1.68 is certainly a low figure for them.

Lace Curtains 1.98

Only 9 pairs, but regularly were worth \$2.75, fine quality of net, good staple design, 3½ yds. long, 60 inches wide, a good serviceable curtain that will wear well and wash well, special sale price \$1.98.

Linen Suitings at 15c

16 pcs. in shades of blue, green, pink and red. These were regular 25c and 35c. Lines, last season's goods. To clean them up we have made an all round price on the lot of 15c.

Linen Towels 12½c

10 doz. of them 18x33 in. hemmed edges, red border, a good fine cloth, a fine wearing line and good value at 12½c each. Our sale price of 12½c is making short work of them.

44 in. Pillow Cotton at 16c

A great bargain, 44 in. wide, circular pillow cotton, well worth 22c. We had a big quantity of it, but it is going out rapidly.

DEATH CAME VERY SUDDENLY TO LABORER JAKE McDONALD

Unfortunate Man Was Working on Centre St. When He Suddenly Fell Forward and Expired

CAUSE OF DEATH ATTRIBUTED TO HEART FAILURE

Death came unexpectedly and with shocking suddenness to Jake McDonald, while working on Centre street this morning with Blight & Fielder's road-making gang.

The deceased was engaged in loading a wagon, along with several other workmen, when he suddenly fell forward and expired. His home was at the corner of Harvey and Centre streets and he was immediately taken there, and a physician summoned, who, upon his arrival, pronounced life extinct, death being attributed to heart failure.

The deceased only started on the street this morning, and for the first hour he worked without complaining of any illness. About 8.15 he was just throwing some soil into the wagon when his spine fell from his hands and he sank to the ground. The men around him rushed to his assistance, but upon raising his head they found that he was quite dead.

The deceased man came to Chatham about five years ago and is well-known to local employers of labor. He had been working at Gray's carriage works for some time past, but left there last week in order to work on Centre street. He was married to Mrs. McDonald six months ago, and was her second husband.

For the past few days the deceased had complained of a slight sickness, although he was usually a healthy man, and on Saturday last he was examined by a local physician, who declared that his ailment was of little consequence. The suddenness of his death and the lack of a good explanation for the same will most likely prove cause for a post-mortem examination.

A RESPECTED MAN

The Late Douglas Neilson Formerly of This City Was Pioneer of Big Bend

The funeral of Douglas Neilson, who died of peritonitis at St. Luke's Hospital last Friday, April 13th, was held from Smith's undertaking parlors, 119 Post street, yesterday afternoon at 1.30 o'clock, 30 friends and relatives from Riverview attended. There were many flowers, and the services were conducted under the auspices of the Masonic lodge, 145, of which Mr. Neilson was a member. Rev. W. J. Hindley, pastor of the Pilgrim congregational church, preached the sermon.

The interment took place at Greenwood. Mr. Neilson was one of the pioneers of the Big Bend country. Born in Chatham, Ont., in 1859, he came west to California in 1878, and north to Washington in the early 80's. He realized the possibilities of the Big Bend country, and with his brother, James Neilson, opened the first general store at Lind, where he was also a large stockholder in the Farmers' bank.

In the early days, when many of the settlers were in need of the necessities of life, Mr. Neilson was ever found ready to assist in every way at his command. He became largely interested in farming land in Adams county, and with his brother James established the waterworks system of the town of Lind. Spokane Chronicle.

The deceased was born in Harwich and was the son of James and Agnes Neilson, 11th concession, and was connected with the McNaughtons and McGeechys, of the same township. He left this city 27 years ago, and the only connections he has seen since that time was Mrs. Manson Campbell, who is a first cousin, when she accompanied her husband to Spokane last year.

ANOTHER GOOD ONE

Adelaide Thurston and a company of unusual strength in a new play, "The Triumph of Betty," by W. A. Tremayne and Irving L. Hall, with complete scenic production and accessories, and under the management of F. X. Hope, appears at the Grand to-morrow night.

Manager Brisco has been requested by Mr. A. J. Small, of Toronto, owner of the Canadian theatrical circuit, not to leave one stone unturned that will tend to bring out the "standing room only" sign for Miss Thurston to-morrow night, as "The Triumph of Betty" is one of his best bookings of this season.

Adelaide Thurston won the hearts of the Chatham theatre-goers last season, playing "Polly Primrose." The Grand will surely be full to-morrow night.

WON CHAMPIONSHIP

John Smith has received a letter from Murray O'Hara, an old Chatham boy, now in New York, in which Mr. O'Hara draws attention to the fact that his brother Geoffrey won the championship of Canada at 41.2 billiards, by defeating all comers at Ottawa and Montreal, and defeating the former champion at Montreal. A fine cup goes with the honors. But which must be re-attained three times before it becomes the property of the holder.

Mrs. Lettich and daughter, of Dresden, are visiting friends in the city, en route for their new home in Michigan.

THE WEST KENT COMMISSIONERS CONSIDER LICENSE APPLICATIONS

Large Deputations Wait on the Meeting and Advance Arguments Both For and Against Hotel Licenses

ACTION DEFERRED ON SEVERAL APPLICATIONS

The meeting of the West Kent License Commissioners opened this morning at ten o'clock in Harrison Hall. There were present Chairman J. A. Wilson, Martin Drew, Francis Rankin and Inspector Massey.

The applications for new licenses are from J. Plasse, Nora Mount, R. L. Dunn & D. Lee, and Jos. Gott, Chatham; Thos. Redpath, Tupperville; and Wm. Rose, of Chatham Township, The Basswood. A large deputation, consisting of Rev. C. J. Moorehouse and Messrs. B. Holmes, Burrows, Perry and DeWolf, were present from Tupperville, and spoke against the granting of the license to Thomas Redpath. The whole morning was taken up by the hearing of this deputation.

In this case a petition was received, sufficiently signed and so reported by the township clerk. The inspector reported that there were 10 bedrooms on the premises and the law requires only four. Mr. Redpath's character is good. Mr. Moorehouse first addressed the meeting. He said there was no need of a hotel in Tupperville, and he also claimed that the granting of it would be illegal on the grounds that there was not sufficient accommodation in the house. He claimed that some of the names on Mr. Redpath's petition were forged and had no right to be there. He wanted the petition referred back to the clerk, when representations could be made by the temperance element. He said Tupperville is now well provided with accommodation with a restaurant and several boarding houses. He claimed Redpath has been selling without a license. If the license were granted the place would be a dumping ground for people from Wallaceburg and Dresden to come and get drunk. He said that when the license was in force some time ago the Sabbath school was broken up one Sunday by a number of young men who went there drunk. Mr. Burrows, Mr. Holmes and Mr. DeWolf and Mr. Perry also addressed the commissioners. They were opposed to the granting of the license. S. B. Arnold represented Mr. Redpath. He said the deputation had merely presented the temperance arguments. There was need of accommodation from the fact that, as the delegation said, there are eight boarding houses in the place. It is the centre of a large tract of country and the petition is signed by the majority; only four voters in the place out of 50 refused to sign. Mr. Moorehouse said that Harry McGinnis, Fred Seward, Alfred Teeter and Fred Waters, whose names appeared on the petition were forged. After the deputation was heard the matter was left in abeyance. The question of the Basswood tavern then came up. The inspector reported against granting the license. The matter was not acted upon. The Commissioners were considering the Wallaceburg licenses when the meeting adjourned.

HE SAW VESUVIUS

Recent Volcanic Eruptions and Earth quakes Recall T. A. Smith's Trip to Naples

There are many who believe that the earthquake in San Francisco was a sympathetic disturbance with that at Mt. Vesuvius some time before. Mr. T. A. Smith, the florist, who takes a deep interest in matters of this nature, believes that the Frisco seismic disturbance is simply further evidence of the activity of the subterranean fire vein.

Mr. Smith, during his European trip, had the distinction of visiting the famous volcano Vesuvius, and witnessing an eruption.

"Vesuvius is truly a wonderful and awe-inspiring sight," said Mr. Smith this morning. "At the time of my visit to Naples, I, with some others, ascended to the very brink of the terrible volcano. I was up to within a few feet of the edge of the crater, where the earth-crust is only a few feet thick. One could fly at that time and look over the edge of the opening. Far down below could be discerned the huge sulphur cone, from whence were emitted the most horrible moaning noises."

"Vesuvius, while in action at night time, is a thrilling sight to behold. The great tongues of flame which ascend into the darkness shed a weird, blood-red glow over the whole country-side, for miles and miles around, while the accompanying explosions are almost deafening at times. It is an awful yet fascinating sight, never to be forgotten."

SCHOOL RE-OPENS

There is a Good Attendance After the Easter Vacation and Studies are Again Resumed

The scholars of the Central school returned to their studies this morning fresh from the fun and freedom of the holidays and full of a new zest born of the mental recreation and physical recuperation always attendant upon vacation time.

Nearly all the children were in their places when school opened this morning and in the kindergarten a great many new faces were to be seen. The moderating weather and the favorableness of the time accounts for the number of new pupils in the kindergarten, as mothers generally choose the spring term to start their little ones at school.

The principal and his full staff were in attendance and school and teachers alike are eager to start upon the final work of the year preparing for the examinations, which come off in about nine weeks time. The school is spick and span after undergoing spring cleaning during the holidays, and amid the congenial surroundings of the bright class rooms the children are earnestly working to fit themselves for passing at the exams.

At McKeough school and the High school conditions are found about the same. There is a good attendance and scholars are back refreshed from the week's vacation.

A POPULAR BILL.

There has been possibly no legislation brought in by the Provincial Parliament which has met with such hearty and universal favor and approval as the Educational Bill. At the recent meeting of the Ontario Educational Association this fact was clearly demonstrated.

There are possibly no men who understand the needs of the rural schools as do the Inspectors. They, of necessity, know the conditions thoroughly and when these men join in the general voice of approval, it would seem that Hon. Mr. Pyne has struck the right chord. In addressing the Inspectors Hon. Mr. Pyne was given a hearty and welcome reception. In his address he declared that the Government is anxious to view the Inspectors as the watchmen on the tower of Provincial education. Shortly thereafter it became Dr. Pyne's turn to doff his bonnet and bow.

"What can the Ontario Government do for rural schools?" was the problem up for discussion. "They have already done it all," declared Inspector W. H. Stevens, of Lindsay.

"The new bill fills the bill exactly," observed Inspector Campbell, of South Grey.

"Such unanimity of commendation is so unique," remarked Inspector Smith, of Wentworth, "that we should put ourselves upon record." "The best piece of educational legislation ever produced," was the comment of Chairman W. H. G. Cies, of East Kent.

A resolution was thereupon unanimously passed expressing the pleasure and congratulations of the association of the earnest and successful efforts of the Government to elevate the status of the rural schools. The resolution was handed to the Minister, who said he would take pleasure in placing it before his colleagues.

"A REMARKABLE SESSION."

The Toronto News (Independent) in a recent editorial gives a very fair and comprehensive summing up of the work of the present session of the Ontario Legislature. The article deals with the excellent character of the various bills which have been passed, and speaks in glowing terms of the principles by which the Whitney Government is guided. The following is quoted as a portion of the article:

"In the amount and quality of the legislation which is now before the Provincial Parliament we have no parallel since Confederation. It seems certain that when the session is over the Government will have placed upon the Provincial statute books more sound, useful, and progressive legislation than has marked any session for a third of a century. Indeed, the work in this session will bulk almost equal to that of any previous Parliament. Nor has there been any particular horn-blowing over the Government's performances. It has proceeded upon the conviction that conditions in the Province required the adoption of certain great measures of reform, and it has not stopped to calculate the political results of a simple performance of duty.

"There has been no such fruitful session since Confederation, and surely the notion that the administration of Provincial affairs could not be safely entrusted to the Conservative party has been forever dispelled. The truth is that the Liberal politicians had bargained away their freedom to various entrenched partisan and corporate interests and had exhausted their capacity to give popular and progressive legislation. It was a pity that the change of Government was so long delayed, and a blessing to the Province that at last there was a change, and a change emphasized by a decisive popular majority. Surely in this country we have never heard the last of the wretched argument that it is necessary to the country's moral and material interests that some particular party should hold office forever and that men are guilty of a sort of blasphemous treason when they dare to make the public interest

the prime consideration, and to vote out of office politicians who have surrendered their liberty of action and exhausted their power to serve the country."

A DIFFERENCE IN LUNGS.

In the Edinburgh University three human lungs lie side by side. One is of an Eskimo and is snow white. In life, this would be ruddy with rich blood. Another is that of a coal-miner and is black. The other is of a town dweller and is a dirty slate gray, as are the lungs of most city residents. That's why consumption thrives in cities.

One reason why Scott's Emulsion does so much to keep down consumption is because it helps to keep the lungs clean and supplies them with rich, red blood. It makes the lungs germ-resisting. If the body is run down and health is at a low ebb Scott's Emulsion will build it up quickly and permanently.

JOSEPH MURPHY'S

Famous Play "Kerry Gow" With Allen Doone and a Strong Cast! Joseph Murphy, the famous Irish comedian, presents Allen Doone as his successor in his famous Irish play "Kerry Gow," at the Grand to-night.

Allen Doone's portrayal of Dan O'Hara, in "Kerry Gow," is an artistic creation, and one that this accomplished comedian has built up little to the point of perfect symmetry. Mr. Doone is the central figure in "Kerry Gow." He has a fine appearance, a sweet tenor voice and sings in a manner that delights his hearers. He impersonates the true Irishman, using the Celtic wit to perfection.

Mr. Allen Doone will be seen here to-night in the role of Dan O'Hara, warm-hearted, kindly, blacksmith, and we are told that he gives to the part an artistic and truthful conception.

ADELAIDE THURSTON IN "THE TRIUMPH OF BETTY."

To-morrow night that sweet little actress, Adelaide Thurston, with a most creditable company of supporting players, will be received into the midst of the lovers of the drama in Chatham.

The name of Adelaide Thurston is as well known to the theatre-goers of Canada as the name of Richard Mansfield and Sarah Bernhardt, and it is doubtful if the Chatham theatre-goers would be more anxious to see the two last named stars than the dainty little actress mentioned. It is true that the name of Adelaide Thurston had scarcely been heard of in Canada until her appearance here four seasons ago in "The Little Minister." On that occasion a small audience greeted her, but so finished was the work of this young woman that the small audience grew more enthusiastic over the performance than in the case of many more pretentious organizations and when this dainty comedienne returned to Canada for another engagement she was greeted with an ovation and social reception held in her honor.

Miss Thurston is said to be delighted with her new role, which is said to be better suited to her manner and capabilities than any she has ever appeared in. The petite "star" is provided with a very elaborate production and a company of the first class order of excellence.

THE YANKEE CONSUL.

John P. Stocum, manager of "The Yankee Consul" Company, has not, like some impressarios, permitted his cast to deteriorate merely because he is taking the famous organization on a transcontinental tour. The company which will be seen here on Saturday, April 28th, contains such names as Vera Machelena, Harry Short, Alice Hosmer, Miss Botti, Bonnie Weiden, James E. Ratiff, Geo. Shields, Harry Davies, L. R. Lefelton, Margaret Flavin, James Templeton and Olga Kalng, a list that gives an absolute guarantee of a splendid performance. Regarding the merits of the piece itself, there can be no doubt, for it has been passed upon by the critics and public of New York, Chicago, Philadelphia, Boston and San Francisco and voted the best musical comedy of the past decade.

DISTRICT

DRESDEN

Ed. H. Brennan, formerly foreman of the Times, leaves to-day for a visit to Montreal and Eastern Ontario towns.

BLENHEIM

April 21.—On Thursday evening William, son of Daniel Fraser, met with a bad accident whilst driving home. His spirited team became frightened at some object in the road and got beyond his control. He managed to run them in to the office of the Canada Flour Mill. The tongue was driven into the wall and smashed, William was thrown between the horses and under their feet. He was badly trampled on and kicked. Assistance was soon at hand and the insensible lad was carried home, medical aid being procured. The latest reports are that he is progressing as favorably as could be expected.

Mrs. F. W. Davidson and daughter, of Sarnia, who have been visiting Mrs. T. W. Pearson, returned home on Thursday.

Misses Marion Stewart and Mildred Beemer spent Thursday at Taylor. On Wednesday last at the residence of the bride's parents, Mr. and Mrs. Sturk, their daughter, Rose, was united in marriage to Mr. Fred Toie, son of E. B. Toie, Communication Road South.

The front street is being put into good shape, the town scraper leveling the road.

The funeral of John Watlin took place at the residence of Mr. Wm. Watlin, his brother, with whom the deceased has been living for some time. Heart failure was the cause of death. The service was conducted by Mr. T. B. Shillington.

Mrs. E. Hagerman, of Detroit, is visiting relatives in town.

The last of the series of assemblies given by the Terpiashore Club was like the former dances—a decided success. The crowd was not quite as large as usual. Finney's orchestra, of Detroit, was in attendance.

Miss Maude Henderson, who has been attending Westminster College, Toronto, is at home for the present.

Orlow Coburn has returned from Independence, Miss., where he was present at the L. D. S. convention.

Mrs. Peter Early has received word of the serious illness of her sister, Mrs. T. Roden, Toronto.

TILBURY

April 23.—Carlyle Wellwood, of Detroit, spent Sunday with his parents here.

Public and Separate schools reopened to-day.

Mrs. Hugh Johnston returned yesterday from Toronto, where she has been attending the funeral of her sister, Miss Frank Kelly.

H. S. Shaw, of Detroit, spent Sunday at his home here.

Theodore George, of Detroit, was the guest of Mr. and Mrs. S. Mather, a few days last week.

Miss Helen Young, of the Public school staff, returned on Saturday from her home in Sarnia, where she spent the Easter vacation.

Miss Georgia Marshall, of Merlin, was the guest of her aunt, Mrs. W. A. Shaw, on Sunday.

Miss Hobson, of Comber, is the guest of the Misses Stewart, Carlyle avenue.

Ulcer of the Stomach

Insidious Nature of the Disease—How to Recognize and Cure It.

Ulcer of the stomach may exist for years without very marked symptoms, excepting those caused by indigestion.

In good health, the stomach resists the action of the gastric juices, but when weakened, the membrane is badly nourished and the digestive fluids act upon it as well as upon the food, keeping up until perforation of the stomach occurs. In advanced cases of ulcer of the stomach there is much discomfort after eating, with a constant gnawing sensation between meals, pain from the pit of the stomach back to the shoulder blade.

At the first symptoms of indigestion, treatment should at once be accorded with Mi-on-a. This is a scientific remedy adapted specifically to one purpose, the cure of stomach troubles.

Mi-on-a is not a patent or secret remedy, but is a combination of the purest and most reliable of remedies for strengthening the digestive organs and building up the whole system. It costs but 50c a box. Use it for a few days and there is no reason why you should not be able to eat any food you like at any time without fear or distress.

If you cannot get Mi-on-a of your druggist, it will be sent by mail, post-paid, on receipt of price. Write us for advice on your case from a leading stomach specialist which will be sent free. The R. T. Booth Company, Ithaca, N. Y.

DRAINAGE DECISION

Mr. J. B. Rankin, K. C., of Chatham, official drainage referee, is hearing several cases at the Court House to-day. One, in which three townships are interested, was heard this morning, the said townships being Ellice, Mornington and North Easthope. It was an appeal by Mornington from the report of the engineer. By arrangement Mornington was relieved of any assessment; construction of ditch was modified to lessen the cost, and balance of money charged against Mornington to be borne by Ellice.

E. Sydney-Smith, K. C., for Ellice; G. G. McPherson, K. C., for Mornington; R. S. Robertson, for North Easthope—Stratford Beacon.

One of the most distressing things one can suffer from is bladder trouble. Its nature, often, causes people to silently suffer.

We don't ask you to tell us of the irritation, the catarrh, the scalding—we only say, you will be prudent in trying Bu-Ju, the Gentle Kidney Pill.

Kidney troubles do not stand still. Unless steps are taken, worse will ensue. You take no chances in trying Bu-Ju. Should it fail, you can have your money back—but it won't fail. Only three cents a day.

TAGLESS DOGS

Policeman Tom Groves was busy on the market for a short time Saturday morning, dealing with the owners of some tagless dogs which wander about that place each market day.

He hunted up a couple of defaulters and told them, in a straight manner, that they must at once procure the necessary collars and tags for their dogs, and that if they neglected to do so they would be summoned. The action of the police in endeavoring to either remove or keep a check on these canine itinerants is heartily commended by the market people, for, as one lady remarked to The Planet this morning, "It is most annoying to have dogs running about among the crowd and attempting to steal whatever they can in the way of food from the stalls and wagons."

INSURE MERCHANT SHIPS.

British Admiralty to Spend Large Sum For Purpose of Experiment.

An insurance policy which is likely to amount to £10,000,000 will be taken out by the Admiralty in connection with the forthcoming world-wide naval maneuvers, to cover the risk involved in the co-operation of merchant ships with the navy.

The exact amount to be covered will not be definitely fixed until it is known how many merchant ships are to take part, says the "Evening Standard and St. James' Gazette," but it will be between £7,000,000 and £12,000,000.

It is at present estimated that about 250 ships will co-operate, and on that basis the policy will be for £10,000,000.

Inquiries are now being made in connection with the premium.

The Admiralty has undertaken to make good any losses the merchant ships may incur, and to pay compensation for delay at the rate of 1d. a ton per day.

Papers which shipowners whose vessels are likely to be in the vicinity of the scene of operations during the test are to be invited to fill up will be issued shortly.

The Admiralty has been greatly assisted in making the arrangements by a small committee composed of shipowners and representatives of marine insurance companies.

Worm Fishing For Brook Trout.

Have small hooks, and have the barb sharp as a needle; fine tackle without badly tied knots; the worms carefully placed around the hook, always alive and kicking; and, most important of all, constant watchfulness and alertness at the half second a fish takes the bait, and then firm, delicate handling to guide him to the net. Keep out of sight as much as possible; wade along without splashing and floundering about.

Worm fishing is the simplest, most primitive method of trout fishing; anybody can fill his creel with nice fish if he uses a little thought and care. Trout are so timid, yet such bold biters and brave fighters, that many fish are lost through bungling methods and poor tackle. Many more fish are not taken because the angler shows too much of his many forms.

Personally, in these later years, I rarely use the worm, finding much greater pleasure in casting the fly, and it is certainly just as effective. But there are times when worms are absolutely necessary—Outing.

The Best Dress Goods Stock We Have Ever Shown . . .

That tells the story in a nutshell. It means that you may select the material for that new suit or gown and get the correct thing in any one of a hundred different weaves and materials.

It's a stock that you will rarely find equalled in a city of this size, but the size and growth of our Dress Goods Business warrants unusual efforts.

And the prices, too, are pleasing, our seven-store buying direct from the largest makers brings the prices down to the lowest possible point—much lower than is possible for ordinary stores to quote. For instance:—

CANADA HAS MORE RAILWAY TRACKS PER INHABITANT, THAN ANY OTHER COUNTRY IN THE WHOLE UNIVERSE

Interesting Account of The First Locomotive Ever Run in The Dominion---A Record of The Development of The Railway Service in Canada

Canada leads the world in railway mileage on a basis of population, says The Engineering Journal of Canada, in a recent railway issue. Ratios of mileage to population by countries are as attached:—

CANADA HAS 1 MILE OF RAILWAY TO 290 PEOPLE
UNITED STATES HAS 1 MILE TO 378 PEOPLE
FRANCE HAS 1 MILE TO 1317 PEOPLE
GERMANY HAS 1 MILE TO 1818 PEOPLE
GREAT BRITAIN HAS 1 MILE TO 1850 PEOPLE
RUSSIA HAS 1 MILE TO EVERY 3400 PEOPLE

CANADIAN RAILWAYS PAST AND PRESENT.

The first railway built in Canada was the St. Lawrence and Champlain; rails of wood with spiked strips of iron, opened in 1836. And in those days the optimistic "tout" who predicted that Canada, in exactly the lifetime of one man, 70 years, would have built and manned

called "The Kitten," and being a cat she made her trial trip by moonlight in charge of the English engineer sent out with her. Her limit was 20 miles an hour.

Two Scotch locomotives came next, the "John Harvie," and the "John Nelson," shipped to Montreal in 1848, and used on the Montreal and Lachine Railway.

And it was five years later—in 1853

frame had gone twenty-five tons of iron. The gauge of the old Ontario, Huron and Simcoe Railway was five feet, so that the wheels of the old "Toronto" were 3 1/2 inches further apart than standard gauge engines built nowadays, the new engine built by the Canada Foundry. The diameter of the two drive-wheels on each side was 5 1/2 feet. The old "Toronto" tender carried cordwood, as may be inferred from the shape of her funnel. The cordwood was picked up along the road, beech and maple and the best of bird's-eye maple at that.

"But the first trip of the 'Toronto' was made without either wood or water. The motive power was 'elbow grease,' and the trip was made up Queen street to Yonge, and down Yonge to the corner of Front, where now stands the Custom House, but where in '53 was the switch of the new Ontario, Huron and Simcoe, built by the 'Lady Elgin'.

"The 'Toronto' was 'pinch barred' every inch of the way on temporary rails, which were taken up and relaid at every rail's length of the way. A 'pinch bar' is a close relation to a crow bar.

"The trip occupied five or six days—an average of about 40 feet an hour. This daily 'run' was witnessed by a daily small army of spectators, many of whom were just getting their first glimpse of railroad-land. The horses shied and the dogs barked those balmy April days, while the first Canada-made locomotive crawled down the railway. It was a notable week. For in a few days more the citizens of Toronto would be taking their first ride on the cars.

FIRST RAILWAY TICKET SOLD IN CANADA.

minus of the Grand Trunk. The "Toronto" made her maiden trip to Macell's Corners, now Aurora, on May 16, 1853. John Harvie, now secretary of the Upper Canada Bible Society, was her conductor, and to him we are indebted for the accompanying historic illustrations. The "Toronto" was built by the Sykes Bros. in the shop of James Good, on Queen street. Following are some remarks made in the Toronto News by the editor of the Engineering Journal when engaged on that publication:

"Some days, were occupied by Mr. Sykes and his men in getting the new iron wonder rigged for the journey. And it was the 16th day of May, 'mid singing birds, bursting leaves and piping frogs, when the 'Toronto' got up steam, real Canadian steam, manufactured from Lake Ontario water and bird's-eye maple.

"John Harvie, now secretary of the Upper Canada Bible Society, was the first actual conductor that ever ran a train in Toronto. He was then freight conductor, but owing to the delayed arrival of Mr. Jones, the regular passenger conductor, Mr. Harvie took charge of the 'Toronto' on her trial trip. He sold the first railway tickets ever issued in Canada that May morning of '53. The fare was slightly over two cents a mile. The journey to Macell's Corners, now Aurora, occupied two hours, an average of 15 miles an hour. About fifty people went. There were four cars, a baggage car combined with a smoker, one flat-topped passenger car and two box cars. And all that day the dogs barked and the York County horses snorted in the farmers' fields.

"The 'Toronto' returned to the city the same day, having burned several cords of wood, and scared the day-lights' out of most of the live stock in York County. Toronto was no longer a country town, but a railway centre. And the old 25-ton, five-foot gauge, 'outside-rigged,' wood-burning 'Toronto,' with its two big drive-wheels on each side was the biggest thing that ever tooted a whistle or rang a bell in Canada up to that time."

TORONTO LIVE STOCK.

Toronto, April 19.—Reports of live stock at the city market as reported by the railways were since Tuesday 96 cars, 1001 cattle, 1043 hogs, 281 sheep, 1009 calves. Besides the hogs mentioned above there were 1055 hogs to Park, Blackwell, 685 to King, 685 to Montreal, 685 to Co. and 70 to Fuddy Bros. that were shipped in from country points f. o. b. cars, a total of 1793 hogs, of about 18 car loads, not counted in the above report, as they were not for sale and many of them never near the market.

Exporters.

Trade in exporters is dull on this market in comparison with what the farmers would have expected. One commission firm sold 60 exporters to-day at \$5.10 per cwt. that cost \$5.25 per cwt. and the drover losing 15c per cwt. and all expenses. There were about 5 loads of exporters sold on the market to-day. The market for exporters is very quiet. The market for exporters is very quiet. The market for exporters is very quiet.

Butchers.

Picked lots sold at \$5 per cwt. Loads of good at \$4.40 to \$4.70, medium at \$4.20 to \$4.50, common at \$4.10 to \$4.40 per cwt. Cows at \$3 to \$4.25 per cwt. Hogs at \$4.25 to \$4.50 per cwt. Steers and Stockers.

Mr. Murby reports a dull trade on stockers and feeders, except for a few odd lots of the assorted kind, which sold at about steady prices. The other kinds have been slow and hard to sell all week. Good short-cut steers have been scarce all week, and more of this class would have sold. The run of stockers and light feeders is heavy, but more than the demand called for.

Mr. Murby bought about 250 head this week at the following quotations: Best feeders, 1100 to 1200 lbs., at \$4.50 to \$4.75; best feeders, 1000 to 1100 lbs., at \$4.25 to \$4.50; best feeders, 900 to 1000 lbs., at \$4.25 to \$4.50; Marriage Licenses

THE LICENSE COMMISSIONERS

Continued from Page One.

The Commissioners resumed at 1.30. A largely signed petition asking that permission be granted for the establishment of a colored hotel in the city was presented by Mr. S. B. Arnold.

The first matter considered was the granting of four hotel licenses in Wallaceburg to Messrs. P. W. Glaab, Michael O'Mara, John O'Mara, D. Kinna.

The inspector's reports were favorable to the granting of licenses in each case. Some slight improvements in the lavatory systems of two of the hotels was suggested.

It was moved by Mr. Rankin, seconded by Mr. Drew, that the Wallaceburg licenses be granted.—Carried.

Messrs. Austin, Westman and others appeared in connection with the petition for the colored hotel, begging time to consider the matter before reporting on the same.

The three Tibbitts hotels, of which the proprietors are B. Belord, Mr. Mahew and J. Louges, were favorably reported on by the inspector.

The licenses were granted in each case.

Applications for licenses in Dover were received from A. Cheff, Pain Court; N. Carter, Mitchell's Bay; O. Brown, Mitchell's Bay; D. Gagnier, Pain Court; G. McIntyre and Z. Emery, 8th concession.

The following were favorably reported on by the inspector: A. Cheff, D. Gagnier, G. McIntyre and Z. Emery. These were granted licenses.

The other two were given one month's extension of license to comply with regulations, and if not in proper condition by that time their licenses will be cut off.

Thomas Redpath, of Tupperville, applied for license. The inspector reported that the proprietor had been convicted once but otherwise the report was favorable. The Commissioners withdrew for a few moments to consider the granting of this license in private.

On resuming the chairman reported that they had decided that no licenses be granted to Thomas Redpath, of Tupperville, or William Rose, of Chatham Township.

The Chatham City licenses were next taken up. It was stated that legally 14 licenses could be granted in Chatham.

Applications were received from Jos. J. Carron, Grand Central; Peter Toulouse, Park House; John Glasford, Glasford House; John Plegance, Rankin House; D. J. McDonald, C. P. R.; E. A. Bechard, Aberdeen; J. W. Miles, Shakespeare House; Richards & McCoig, Garnd House; Hogan & Hoy, Montana House; N. Courtney, Courtney House; Jos. Yacht, Montana House; John Dunlop, Idlewild; Nora Mount, Klondyke; F. Merrill, Merrill House; Ethel Fairbanks, Tecumseh House; Mr. Carter, Carter House; and Dunn & Lee for the colored hotel.

The reputation present were heard with regard to the granting of a license to Dunn & Lee, for a colored hotel in Chatham.

Mr. Westman, representing the temperance people, said that the grounds taken by them one year ago, was that only nine hotel licenses should be granted in Chatham. The Council had finally decided on fourteen licenses by law.

The temperance people did not think their wishes had received proper consideration. They believed that in fairness the Commissioners should bring the number of licenses down to nine.

If the License Commissioners went the full limit of fourteen hotel licenses the temperance people would at once institute a local option campaign.

He claimed that there were certain city hotels which were not supplying proper accommodation. He, as the temperance people objected to the granting of a license for a colored hotel, as such was not needful in Chatham. The building was not in sanitary condition and not a fit place for a hotel.

Rev. Mr. Rutledge, representing the Ministerial Association, objected to an increase in the number of city hotel licenses. The he said, could mention certain houses in the city which should be cut off. The association would have the Commissioners reduce the number of licenses.

The association was unanimous in their opposition to the granting of a license for a colored hotel, as such would not be in the interests of the colored people. The association would resort to extreme measures if their wishes were not considered.

The meeting is still in progress at the time of going to press.

S. S. ANNIVERSARY

Yesterday was anniversary day with the Park street Sunday school teachers and scholars, and the event was marked by a number of interesting platform speeches and a fine musical program.

At the rally in the afternoon in the Sunday school hall, addresses were delivered by Rev. Wm. Rutledge and Messrs. W. E. McKeough and A. D. Westman. Solos were rendered by Messrs. Jack Barfoot and Orval Putnam, and excellent numbers were given by a ladies' and a gentlemen's quartette.

COAL WOOD GAS

Never before has a range been made that would give entire satisfaction with all three of these fuels. But in the

Perfect Idea
we have the one and only range that is satisfactory for each and every one of them. We know it is right and it will give us pleasure to prove it to you.

And remember, the cost to you is no more than any other high grade range would be with which only coal and wood can be used.

Why not have one on trial? You run no risk. We will take it away if you are not entirely satisfied.

If You Suffer with Rheumatism

Dr. Shoop's Rheumatic Remedy Will Bring the Utmost Relief that Medicine Can.

The one remedy which many physicians rely upon to free the system of the Rheumatic Poisons which are the cause of all Rheumatism, Lumbago, Sciatica, Gout, Dr. Shoop's RHEUMATIC REMEDY. Dr. Shoop spent twenty years in experimenting before he discovered the combined chemicals which made possible one almost always certain cure for Rheumatism, etc. Not that Dr. Shoop's RHEUMATIC REMEDY can turn bones again—that is impossible. But it drives from the system the poisons which caused the swelling, pain and stiffness, and then it drives out the end of the pain, leaving the system free from Rheumatism, etc. This remedy never fails where a cure is possible. It is put up in tablet form—convenient and economical. You who have suffered and are suffering today from pain and stiffness which you can't get rid of, and which you know to be Rheumatism; you who experience lameness or twinges of pain in damp weather; you who easily become stiff and lame without apparent cause—just try DR. SHOOP'S RHEUMATIC CURE. It is just the kind of a remedy that accomplishes results. Sold and recommended by

When prospects in this vicinity are quite good, Frost has damaged it very little. There is a larger acreage of wheat than there has been for years and the outlook is bright. The new seeding of clover is good, but part of the old seeding has been damaged by the frost. There was never in the recollection of the oldest settlers as much plowing and ditching done in the fall as there was last year, and with favorable weather the spring seeding should be done rapidly this year. —Tilbury Times.

LETTERS

STUDENT VOLUNTEER CONVENTION.

To the Editor of The Planet:

After hearing, at Park St. Church, last night, the Rev. Mr. McGillivray's fine description of the Student Volunteer Convention, held at Nashville, I shall be much pleased if you will kindly print the enclosed, and I shall be most happy to meet personally any desiring to become students.

Fraternally,
WARREN MARTIN.

The Moody Bible Institute of Chicago. Correspondence Department.

Mr. W. Martin, Chatham, Canada:

Dear Friend,—As one whom we believe is interested in all forms of Bible study, as well as the work that the Institute is carrying on, we want to call your attention to our Correspondence Department.

This department is the direct outcome of Mr. Moody's own desire to help the individual persons whom he met as he travelled over the country, who had a longing desire for a systematic study of the Word of God. Especially did he long to give an opportunity of "home Bible study" to those who could not, for many reasons, personally attend the Institute or any other Bible school.

We are sending you, under separate cover, the prospectus which we trust you may have time to look over carefully and see the work that we cover.

If there are among your friends and acquaintances, either about your own home or in some sections of the country, those whom you think might be glad to avail themselves of the opportunity offered, we should appreciate your giving us their names on the enclosed slip. We believe that we should appreciate fully any effort on your part in extending this notice.

Thanking you in advance for the same, we remain,
Sincerely yours,
A. F. GAYLORD,
Secretary.

Nervous Debility
The Latest Method Treatment is a heaven-sent boon to nervous sufferers. There are scores and hundreds of persons suffering from severe nervous disorders resulting from overwork, hurry, worry, business and domestic cares, overindulgence, dissipation, etc. To them life is one continual round of misery, while peace, comfort and happiness are impossible. They suffer from headaches; loss of memory, mental depression, strange sensations, dizziness, dullness, restlessness, tremors, fainting, cold limbs, uterine and exhaustion. In this class of cases almost immediate relief is afforded by my treatment, while the cure itself is a permanent and lasting one.

BLOOD POISON

If you have traces of it you are in constant danger until cured; there is no stand-still in this disease of this kind; you cannot tell how soon the poison will attack the organs of the body; how soon you may have throat, ulcers in the mouth, or tongue, copper-colored patches, sores breaking out, sore bones, hair falling out, itching skin? Call to see me, and receive a written guarantee of a cure, and you may

Egyptian Temple 3,900 Years Old Brought to Light—Built to the Memory of Thothmes III.

The world possesses another archaeological treasure. When, some months ago, in the valley of the Kings' tombs at Thebes, there was discovered a tomb, hitherto unviolated, containing a profusion of marvelous furniture, jewelry, vases, and carvings, as fresh as if they had been made yesterday, it was supposed that the land of the Pharaohs had yielded up ancient objects which could not be surpassed in beauty and in interest. But this discovery, wonderful as it was, has been far surpassed by the latest find in Egypt, the news of which has just been made known by C. T. Curry, an Englishman, and Prof. E. Naville, a French savant, who are both working under the auspices of the Egypt Exploration Fund.

For the last two years the explorers employed by Prof. Naville, Mr. Curry, Mr. Hall, and Mr. Ayrton, have been engaged in excavating the oldest temple that has so far been discovered at Thebes.

It was built in the eleventh dynasty, in the reign of King Mentuhotep Neb-hep-tah, who lived somewhere about 2,000 B. C. It was in the ninth and tenth dynasties that Thebes began to be transformed into an obscure little town on the upper Nile to the home of the Pharaohs, with magnificent palaces and temples of stupendous size and grandeur.

The temple which Prof. Naville and his associates have been laying bare is built on a platform, to which access is given by a ramp, and it is remarkable because it has in the middle a great block of masonry, the purpose of which is not known, but which, it is thought, was perhaps the base of a pyramid.

This year the efforts of the explorers have been directed toward the back part of the temple. They wished to see how it ended and how it was connected with the mountain at the end of the amphitheatre of Deir el Bahari.

Early in the work Mr. Hall discovered the inclosure wall of the temple and found that the inclosure was interrupted by a court or wide avenue, lined on both sides by a single row of columns and directed toward the mountain. The rock had been cut open to make way for the avenue.

On the north side of the court, over the inclosure of the old temple, remains of a shrine of the eighteenth dynasty were found. The shrine was built in the reign of the great King Thothmes III. He lived 1,500 years before Christ, about 150 years before the Exodus of the Jews to the promised land.

This was the King who in seventeen campaigns subdued Palestine and Syria, planted a tablet of victory alongside that of his father on the banks of the Euphrates, penetrated northern Mesopotamia, stormed Karkemish, on the Euphrates, planted garrisons and appointed governors everywhere, and when he died, after a reign of fifty-four years, was regularly receiving tribute from an empire extending from the upper waters of the Euphrates to the fourth cataract of the Nile. He was the greatest conqueror among the Pharaohs and the greatest military genius in his history of Egypt.

Thothmes III. obtained that he embellished the temple of Egypt in a manner unequalled by any of his predecessors, though they had all been great builders. The gigantic temple of Ammon at Karnak was mostly built by him, and under his rule Egyptian art attained its greatest development.

LONDON'S LATEST FAD.

Chameleons Which Change Color to Suit Dress of Mistress.

The chameleon promises to be a favorite pet in London this year. One great point in favor of the chameleon is its accommodating habit of taking on the hue of the color against which it is placed. Thus one chameleon will match up with gowns of half a dozen different shades. So, though fashionable, it is really quite an economical adornment.

Much, however, will depend upon the weather, for, like the summer girl, the chameleon only thrives when the sun is bright. To import them now would be almost madness, as a cold snap would rob them of their brightly colored little lives.

The chameleon is really the ideal pocket pet. It has a habit of sitting on its hind legs, and it has weird, staring eyes perched on the top of its head. To pursue natural history further, it may be pointed out that the chameleon never goes far from home.

It has two little arms, with almost human-fingered hands, and with these it clings for an indefinite time to anything on which it is placed. For instance, if you put a chameleon on a plant it will cling to that plant until removed. Or if a lady attaches it to her gown it will cling passionately to the dress. It will never fall off, and it will never run away. In fact, it may be said that chameleons always become very much attached to their owner.

The species most recommended is the one hailing from Morocco, which is about five inches long, and has a fascinating habit of curling its tail between its legs and up its chest, and these placed on its hind legs and provided with penholder as a walking-stick will sit for hours on end without moving.

The diet of the chameleon consists of meal-worms—with which your baker will surreptitiously supply you—and flies. The latter the chameleon catches for himself in the summer months by shooting out his comparatively immense tongue.

There is one sad aspect to the chameleon fashion. When the summer has flown and cold weather comes, the chameleons must be sent to the very hot plant house or sent south for the winter. One well-known marchioness, who became very fond of her chameleon, last summer sent it to Biskra during the winter months. At the present moment it is in excellent health, and will be restored to its devoted mistress when spring develops.

THE CHAMPAGNE MAKER.

"My His Face is Always Decorated With Scars."

The Frenchman's face was hacked and notched.

"Have you been a duelist?" one asked.

"No, no," the man replied. "I have been a champagne maker." He touched his face. "These honorable nicks," he said, "are champagne scars."

"Champagne scars," he went on, "decorate the visages of all the workers in the underground champagne mills of Rheims. They are caused by the bursting of the bottles. About one bottle of champagne in every ten bursts."

"There are miles and miles of champagne caves in Rheims, caves cut in the solid limestone rock, where, in a constant temperature of 45 degrees, millions of bottles of wine refine and ripen."

"The workers down there smell nothing but champagne all day long, champagne escaping from burst bottles, and as the turners move along the racks—each turns 35,000 bottles daily—they are continually saluted with explosions. Bang! And the glass splinters fly, and a little fountain of champagne perfumes the damp air."

"Day after day each bottle must be turned, turned fifty times altogether, all the sediment in it has all mounted up and concentrated itself around the cork. Then the corks remove the corks, let the sediment thicken wine in the neck of the bottle blow off and skillfully replace the cork again."

"The corks' and turners' work is dangerous. These men are nearly all scarred like me."

Dinner in the House.

The dining rooms of the House of Commons are usually quite empty on any call made upon them by members, but on the opening days of the session these resources may break down, writes T. P. O'Connor in M. A. P. Not only will many new members, waiting to be seated in the House during the first triumphant days after they have been returned, but will be even more anxious to entertain their friends and relations. Plenty of the younger members, especially, will want to let their wives and sweethearts see the green-room of the House of Commons; the nooks and corners where members are able to disport themselves. When I entered the House last, the foot of woman was kept as rigorously from the inner tabernacle of the House as from the portals of a monastery of Trappists. There was nothing but a dingy underground cellar, where it was reported that a lady had once or twice dined; where usually she was treated to nothing better than a dry sandwich and a cup of tea. Now she roams all over the House. Behind the Ladies' Gallery there is a little room where she can have, even by herself, a cup of tea and even a mutton chop; and where also she can dress for dinner. Mrs. Gladstone used constantly to use this dressing-room for her husband and not always very elaborate toilet on the nights when she had come down to hear a great speech by her husband. Ladies have also some half-dozen rooms which run along the terrace, and where a tier is allowed to have a party there unless there be some ladies among the guests. The pressure on this part of the House is often overwhelming.

Not So Silly.

Wearily from the chase, the ostrich of the desert had stuck his head in the sand.

"You silly bird," said the hunter, coming up. "Do you imagine I can't see you?"

"You mistake my purpose," replied the ostrich, with dignity. "Of course you can see me, but you miserable, feather-stealing, egg-hunting land pirate, I thus relieve myself of the necessity of seeing you."

Conscious that he had the better of the argument, the ostrich yielded \$40 worth of plumes without a murmur.

VICEROY OF INDIA.

His Work No Easy Task—Frontier Troubles and Independent Rulers a Burden—Heavy Correspondence.

The appointment of Viceroy of India is in many ways one of the greatest positions that a British subject can be called upon to occupy, but it is very far from being a sinecure.

The work of the day ordinarily starts at a very early hour. When the late Lord Dufferin held this office he would often be at work with his secretaries as seven in the morning. The correspondence that has to be read and attended to each day is enormous, and is probably only equalled by that received by the President of the United States. From Bombay, Bengal, Madras, the United Provinces, Burma, and other parts of our Indian Empire reports and documents of the first importance are received every day, and these have to be very carefully considered and dealt with by the Viceroy.

In addition to this, never a day passes but what important communications are received by cable from the India Office in London. Needless to say, the Viceroy's clerical staff is very carefully organized, so as to be able to deal with the vast amount of what may be termed routine work that has to be performed every day, but there still remain many matters that can be dealt with by the Viceroy alone.

To assist in the administration of India the Viceroy has a Council of five members, with the Viceroy as an ex-officio member. Each of the five members takes charge of a certain department, such as Finance, Public Works, Revenue and Agriculture, etc. Foreign affairs, however, are dealt with by the Viceroy personally, and it is this department that is responsible for fully four-fifths of the worries to which the Governor-General of India is subjected.

When Lord Lansdowne held this office he once declared in the course of a private conversation that the north-western frontier had shortened his life by ten years. The Indian frontier, not even excepting the line between Canada and the United States, is the most important land boundary possessed by the British Empire, and with the contest that is ever waging between Great Britain and Russia for supremacy in this part of Asia the strain on the Viceroy is at times very severe.

The vice-regal year naturally divides itself into three unequal portions. During the cool season the Viceroy has his headquarters at Government House, Calcutta. When the summer comes, and Calcutta is a city of abomination for Europeans, the Government is transferred to the Vice-regal Lodge, Simla, among the hills whose spots of snow make one feel cool even on the hottest day.

The third portion of the Viceroy's year, though the shortest, is in many ways the most important. It is an annual autumn tour through India, which is practically the only opportunity the Viceroy gets to see anything of the great country he governs. With the growing demands on his time each year it is becoming more difficult for him to see anything like the whole of India during his period of office.

Another source of anxiety and hard work for the Viceroy are the native rulers of the independent and semi-independent States. These, to use the words of an ex-Viceroy, are "the most cussed people on the face of the earth." They are extremely proud and haughty, and very tenacious of their "rights"—real or imaginary. If the Viceroy omits one compliment to which they deem themselves entitled, or if they are received by one soldier or fewer than their neighbors, or are not honored with the same number of guns, they proceed to hatch dissatisfaction and trouble without further ado. The wild, semi-civilized tribes on the frontiers are not nearly so much trouble as these native princes, since a display of superior force will usually bring them to their senses.

The dining rooms of the House of Commons are usually quite empty on any call made upon them by members, but on the opening days of the session these resources may break down, writes T. P. "Dodd's Kidney Pills are the Very Best Medicine Ever Used for Kidney Trouble"

Mr. Robert Sheppard, ex-Mayor of Gananoque, Ont., Testifies to the Merits of Dodd's Kidney Pills.

Gananoque, Ont., April 23.—(Special.) "I suffered off and on for over four years from kidney trouble," writes Mr. Sheppard, of this place, "and though I tried many remedies and was under a doctor a long while and was slightly, I had Bright's Disease slightly, Lumbago, pains in my loins and at times all over my body. My skin was dry, hard and burning, I could not sleep, the least exertion made me perspire fearfully and my blood was so bad I broke out in boils all over the neck and back. I was in this state when I started taking Dodd's Kidney Pills and in an incredibly short space of time the boils disappeared, I recovered my health and now I am quite cured."

PAUL LAURENCE DUNBAR.

First American Negro to Win Real Place in Literature.

Paul Laurence Dunbar, who died the other day, was the earliest American negro to win real place in the contemporary literature of his country. Perhaps it is only natural his strongest work should have been that in which he dealt with the life of his own race, of whose humor and pathos, mirth and melancholy he was one of the most sympathetic of interpreters.

PAUL LAURENCE DUNBAR.

This is particularly manifest in "When Malindy Sings," one of the earliest "Lyrics of Lowly Life," dedicated to his mother, who was the prototype of the heroine of the poem. Here are the verses which incidentally show his deep love of his mother:

When Malindy Sings,
G'way an' quit dat noise, Miss Lucy—
Put dat music book away;
What's de use to keep on tryin'?
Ef you practice twell you're gray
You can't ain't no notes a-fryin'!
Lak de ones dat rants and rines
Fom de kitchen to de big woods
When Malindy sings.

You ain't got de nachel o'gans
Fu' to make de sou' come right
You ain't got de tu's an' twistin's
Fu' to make it sweet an' light.
Tell you one thing now, Miss Lucy,
An' I'm tellin' you true,
When hit comes to real right singin'
Tain't no easy thing to do.
Easy 'nough fu' folks to hollah,
Lookin' at de lines an' dots,
When dey ain't no one kin sense it,
An' de chime comes in in spots;
But fu' real melodic music,
Dat jest strikes yo' heart and clings,
Jes' you stan' an' listen wif me
When Malindy sings.

Ain't you nevah hyeahd Malindy?
Blessed soul, tek up de cross!
Look hyeah, ain't you jobin' honey?
Well, you don't know what you los'
Y'ought to hyeah dat gal a-wa'bin',
Robins, lak's, an' all dem things
Hush dey moufs an' hides dey faces
When Malindy sings.
Fiddlin' man jes' stop his fiddlin',
Lay his fiddle on de shelf;
Mockin' bird quit tryin' to whistle,
'Cause he jes' so shamed hisself.
Folks a-playin' on de banjo
Draps dey fangs on de strings—
Bless yo' souls, fu'git to move 'em,
When Malindy sings.

She jes' spreads her mouf and hollaah
'Come to jesus,' twell you hyeah
Sinnahs' tremblin' steps and voices,
Timid-lak, a-drawin' neah;
Den she tu's to 'Rock de Ages,'
Simply to de cross she clings,
An' you an' yo' tears a-drippin'
When Malindy sings.

Towahs, stop dat ba'kin, hyeah mel
Mandy, mek dat chile keep still;
Don't you hyeah de echoes callin'
Fom de valley to de hill?
Let me list'n to de angel wings,
Th'oo an' yo' tears a-drippin',
Sof an' sweet, "Swing Low, Sweet
Chariot."

Ex Malindy sings.
His sonnet to Harriet Beecher Stowe
represents the earlier side of his work
before he had begun to write in dialect.
It is a fine sonnet, and shows the
deep sympathies of Dunbar with his
race:

Harriet Beecher Stowe,
She told the story, and the whole world
At wrongs and cruelties it had not
known
But for this fearless woman's voice
alone,
She spoke to consciences that long had
slept;
Her message, Freedom's clear reveille,
From heedless hovel to complacent
throne,
Command and prophecy were in the
tone,
And from its sheath the sword of jus-
tice leapt.
Around two peoples swelled a fiery
wave,
Both both came forth transfused
from the flame.
Blest be the hand that dared be strong
to save,
And blest be she who in our weakness
came—
Prophet and priestess! At one stroke
she gave
A race to freedom and herself to fame.
Here is one example of the dialect
work for which was Dunbar's principle
work for some years before his
death:

The Requim.
Lay me down beneaf de willers in de
grass,
Whah de branch'll go a-singin' as it
pass,
An' when I's a-layin' low,
I kin hyeah it as it go
Singin', "Sleep, my honey, tek yo' res'
at las'."

Lay me nigh to whah hit meks a little
cool,
An' an' watah nigh so quiet lak an
cool.
Whah de little birds in spring
Ust to come an' drink an' sing,
An' de chillen waded on dey way to
school.
Let me settle w'en my shoudahs draps
dey load.
Nigh enough to hyeah de noises in de
road;
Fu' I tink de las' long res'
Gwint to scoot de ma sperrit bes'
Ef I's layin' mong de things I's allus
knowed.

national remedy for indigestion and
that remedy is Dr. Hamilton's Pills,

Force of Perseverance.
There are two ways of attaining an
important end—force and perseverance.
Force falls to the lot only of the priv-
ileged few, but austere and sustained
perseverance can be practiced by the
most insignificant. Its silent power
grows irresistible with time.

A hearty appetite does not always
indicate a healthy condition. It is
not the quantity of food which is im-
portant, but the quality which is as-
similated, which determines the ac-
tual value of the food consumed. If
the stomach and organs of digestion
and nutrition cannot convert the
food into nourishment, and into
blood, then the food is an injury in-
stead of a benefit. For all disorders
of the stomach and its allied or-
gans of digestion and nutrition, there
is a certain remedy in Dr.
Pierce's Golden Medical Discovery.
It removes clogging obstructions. It
strengthens the stomach, nourishes
the nerves, enriches the blood and
builds up the body. It is a flesh-
forming, muscle-making prepara-
tion, making firm flesh instead of
flabby fat. "Golden Medical Discovery"
contains no alcohol, whiskey or
intoxicant of any kind, and is equally
free from opium, cocaine and all nar-
cotics.

Not What Was Ordered.

walls were not properly bonded.

THE TONGUE OF HEALTH

Must be more than a stimulant—
must be a food as well. There is
one medicine that is both a food and
a tonic, it aids digestion, promotes
assimilation, converts food into nu-
triment that builds up nerves, blood,
brain and bone. That tonic is Fer-
rozene, which contains exactly what
a run-down system needs. Ferrozene
supplies oxygen to purify the blood,
phosphorus to develop the brain,
iron to harden the muscles. No won-
der it makes such vigorous men and
women. You'll eat, sleep, think and
feel better by using Ferrozene; try
it now. Fifty cents buys a box of
fifty chocolate coated Ferrozene tab-
lets, at all dealers.

PRINCE ARTHUR'S VISIT.

Young Prince With a Future — Royal
Uncle Giving Him Training in Diplo-
macy — Questions of Etiquette.

Prince Arthur's visit to Canada pos-
sesses none of the significance that at-
tached to the tour of the Duke and
Duchess of Cornwall and York, or
even a rapid journey through Cana-
da of considerable interest. That the
young prince will be heartily welcom-
ed on his own account not less than the
special envoy of King Edward may be
taken for granted. Apart from his
royal blood, he is a young man of pro-
mise, and it would appear that his royal
uncle is giving him a training in diplo-
macy which may of value in the
future. It is of the utmost im-
portance that the members of the
royal family should understand the
varied character and aspirations of the
great colonies that owe them allegiance,
and a rapid journey through Cana-
da cannot fail to leave a lasting im-
pression on Prince Arthur. We know
that this was the case with the present
Prince of Wales, for his public utter-
ances have proved it. At the same
time, the anxiety of our representative
citizens to instruct the prince as to our
institutions should not blind them to
the fact that he is just a boy, and no
doubt a day's visit to a fishing boat
of a Board of Trade bulletin. If they do
nothing but refrain from boring Prince
Arthur, we have no doubt that he will
thereafter speak with the utmost
thoroughness of the Canadian people,
says The Mail and Empire.

A Question of Etiquette.

There is one unpleasant feature that
seems inseparable from all royal visits
to Canada, and for aught we know to
the contrary it may apply to other
countries. This is the jealous and
misunderstanding that they invariably
bring with them, but generally among individuals.
When the Duke and Duchess of Corn-
wall and York were here an Eastern
city was violently stirred by a quar-
rel between the provincial and munic-
ipal authorities on a question of prece-
dence. It may be that the feud then
engendered has not yet been settled, so
his royal highness is not the only one
we can only hope that the incident
will be heart-breaking, but it was
not till he had left that the inevitable
incident transpired. In this case
it was a matter of the pay and trans-
portation of his men, and we observe
that precedent is followed at Van-
couver, and a quarrel is developing on
the subject of silks and frock coats.
Some of the democratic aldermen
claim to doff their celluloid collars and
cowhide boots in honor of the prince,
and argue that the wearing of con-
ventional garments is at variance with a
robust Canadian spirit.

The Duke's Example.

If Prince Arthur's father in
most of dress he is sure to be highly
diverted when he learns of the Van-
couver controversy. The Duke of Con-
naught was recently in South Africa,
and the Cape Town Times' illustrations
of his visit to the Cape were interest-
ing as studies in dress. In the
score or so of photographs of dis-
tinguished groups the duke is invari-
ably the plainest dressed man in sight.
He always appears in a light
faded suit and a Panama hat. Some-
times the other members of the party
sport silks and frock coats, and
sometimes they wear negligé garments.
It is said that the duke's wardrobe
cost \$5 and \$2 was the duke's favorite.

On Many Missions.

Prince Arthur's mission to Japan to
invest the Mikado with the Order of
the Garter was not his first important
embassy. A year ago last December
he was sent to represent King Edward
at Rome, the occasion being the bap-
tism of the young Prince of Piedmont.
He was received in special audience by
the Pope, and listened to His Holiness'
remarks on the subject of the "Red
Prince," who was not only of England,
but of the world, as the sun never
sets on his dominions. On the prince's
return to England he was despatched
to represent King Edward at the fun-
eral of the Dowager Duchess Alexan-
drina of Saxe-Coburg-Gotha. Next
month he is again sent to Germany
to be present at the opening of the
great cathedral at Cologne.
On this visit he was invested with
the Black Eagle by the Kaiser. Again
in June he was in Berlin as King Ed-
ward's deputy at the wedding of the
Crown Prince, and in January, 1903,
he was at Prince Arthur for greater
diplomatic duties later on, and he
is generally recognized as one of the
most promising members of the
royal family.

Of Distinguished Ancestry.

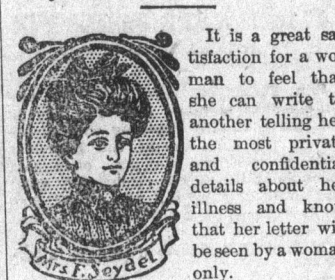

Arthur Frederick Patrick Albert of
Coburg and Gotha, who was born
on Jan. 13, 1882. He is the son of the
Duke of Connaught, who is King Ed-
ward's brother, and the grandson on
his mother's side of Prince Frederick
Charles of Prussia, surnamed "The Red
Prince," who was one of the greatest
soldiers of his time, and crowned a
brilliant career by the siege and cap-
ture of Metz in 1870. Through his ma-
ternal grandmother, Princess Freder-
ick-Charles, who was a Princess of An-
halt-Dessau, and a famous beauty of
the court of Berlin, Prince Arthur is
directly descended from the "Old Des-
sauer," the virtual creator of the Fran-
sian army that was such a terrible
weapon in the hands of Frederick the
Great. Prince Arthur has two sisters,
one of them Princess Margaret, wife of
the Crown Prince Gustavus Adolphus
of Sweden, and the other Princess Vic-
toria Patricia.

In South Africa.
Prince Arthur was educated at Eton,
whence he went to Sandhurst, for he
had chosen the army as his profession.
In May, 1901, he was gazetted to the
second Lieutenancy in the 7th (Queen's
Own) Hussars. Soon after this ap-
pointment his regiment was ordered to
South Africa, but the young prince was
left at home. But in January, 1903, he
became a full Lieutenant, and was for-
warded to the front. There he saw
active service until stricken down with
dysentery and invalided home. As soon
as he recovered he was sent back to
the front, and continued his military
studies. These he takes very seriously,
working hard and asking no favors. If
he fails to distinguish himself in either
army or diplomacy observers of Prince
Arthur's progress will be sadly disap-
pointed.

IN STRICT CONFIDENCE.

Women Obtain Mrs. Pinkham's
Advice and Help.

She Has Guided Thousands to Health.
—How Lydia E. Pinkham's Vege-
table Compound Cured Mrs. Fred
Seidel.

It is a great satisfaction for a woman
to feel that she can write to
another telling her the most private
and confidential details about her
illness and know that her letter will
be seen by a woman only.

Many thousands of cases of female
diseases come before Mrs. Pinkham every
year, some personally, others by mail.
Mrs. Pinkham is the daughter-in-law
of Lydia E. Pinkham and for twenty-five
years under her direction and since her
decease she has been advising sick
women free of charge.

Mrs. Pinkham never violates the confi-
dence of women, and every testimonial
letter published is done so with the
written consent or request of the writer,
in order that other sick women may be
benefited as she has been.

Mrs. Fred Seidel, of 412 North 54th
Street, West Philadelphia, Pa., writes:

Dear Mrs. Pinkham:—
"Over a year ago I wrote you a letter
asking advice, as I had female ill and
could not carry a child to maturity. I re-
ceived your kind letter of instructions and
followed your advice. I am not only a well
woman in consequence, but have beautiful
baby girl. I wish every suffering woman
in the land would write you for advice, as
you have done so much for me."

Just as surely as Mrs. Seidel was
cured, will Lydia E. Pinkham's Vege-
table Compound cure every woman
suffering from any form of female ill.

If you are sick, write Mrs. Pinkham,
Lynn, Mass., for special advice. It is
free and always helpful.

The People of Great Britain.

Ethnologically Great Britain is a mix-
ture of many races, resulting from a
succession of invasions. When the Ro-
mans invaded Britain the inhabitants
were Celtic, mixed with an earlier
Euskarian non-Aryan element. They
continued to be mainly so until the
fifth and sixth centuries, when the lev-
els of parts of the country were overrun
by German tribes. Then followed inva-
sions by the Danes and other Scandi-
navian tribes and lastly the Norman
conquest. The inhabitants of England
and the lowlands of Scotland, there-
fore, sprang from an amalgamation of
the original Celtic with German and
Scandinavian blood. Wales and the
highlands of Scotland are still inhab-
ited by descendants of the ancient Celtic
tribes. The people of Ireland also are
of Celtic origin, although there is an
admixture of many other races.

ABOUT RHEUMATISM.

There are few diseases that inflict
more torture than rheumatism and
there is probably no disease for
which such a varied and useless lot
of remedies have been suggested. To
say that it can be cured is, therefore,
a bold statement to make, but Cham-
berlain's Pain Balm, which enjoys
an extensive sale, has met with great
success in the treatment of this dis-
ease. One application of Pain Balm
will relieve the pain and hundreds
of sufferers have testified to perma-
nent cures by its use. Why suffer
when Pain Balm affords such quick
relief and costs but a trifle? For
sale by all druggists.

Money Value of St. Louis.

When Louis IX., the saint, sur-
rendered with his whole forces to the
Saracens at Mansura on the 5th of
April, 1250, 1,000,000 golden bezants—
equal to half that number of the lives
of the day—were demanded for his
freedom. But the Moslems came down
to 800,000 bezants, and in the end by
surrendering Damietta Louis got off
for 100,000 marks—equal, roughly, to
over \$1,000,000 of today. These golden
bezants contained about 30 shillings
worth of our gold, but to go to market
with would buy then as much probably
as 7½ sovereigns now would. Were
the scorners allowed to break forth
of their gold, the saint's ransom would
be paid and his body would be treated
by his people when Louis died. Being
hard up for embalmers, they had,
according to the journal of Au-
bery, to quarter and boil him down in
separate caldrons and so sent but his
whited skeleton to France—London

MURDER WITH AN AXE.

Aged Maniac Farm Hand Kills His
Working Comrade.
Lindsay, April 20.—An insane man's
sudden frenzy of anger has resulted in
a murder near Kirkfield.

Two men named Miller and Dillon
were in the employ of a farmer named
John McNulty, who lives about four
miles north of the village. At an early
hour Wednesday morning McNulty
gave the men directions to cut wood
near the house. He then went to the
barn to feed his cattle, and when he
returned to the house later he found
Dillon, who showed him the dead body
of Miller, who had a terrible wound in
his chest, caused by an axe, lying on
the ground.

"Why did you do it?" asked the hor-
rified farmer of Dillon, but the latter,
who appeared dazed and stupid, made
no reply and walked into the house and
laid down.

He was shortly afterwards arrested
by a county constable on the infor-
mation of McNulty.

The only motive that can be assigned
for this terrible crime is anger on the
part of Dillon, who thought that Miller
intended to get him out of his job.

It was but a short time ago that Dil-
lion was brought before a magistrate
on a charge of insanity, but, owing to
the lack of evidence necessary to com-
mit him to an asylum, he was liberated.
Dillon is a man of about 50 years of age.

FATALITIES AT COBOURG.

Collapse of Framework Kills One Man,
Badly Injures Second.

Cobourg, April 20.—The body of Jas.
Kearns was found in the creek run-
ning about a mile back of the town
yesterday. He was a man about sev-
enty years of age. It is supposed
Kearns slipped off the culvert.
While removing the frame of the
Cobourg rink last evening, a serious
accident occurred, which resulted in
the death of one man and perhaps fatal
injury to another. Edward Terry and
Norman Purser were engaged in
pulling a rope fastened to one of the
girders, when the whole structure col-
lapsed instantly killing Terry and
breaking Purser's shoulder besides in-
juring him internally. Coroner Elliott
has ordered an inquest.

Terry, who was twenty-four years
old, leaves a wife and two children.

ESTIMATES OF THE DEAD

Hundreds are Said to Have Died in Hotel Collapses

LIVING WELL CARED FOR

San Francisco, April 23.—The announcement is made that the fire is out and that only smoking embers remain. The condition of the homeless and shelterless persons encamped throughout the city is remarkably good and of substantial assistance are being received from cities in all sections of the United States. The grand total of all moneys subscribed to date is \$4,154,000.

The engineering department of the United States army, having in charge the construction of temporary buildings in Golden Gate Park for the housing of the homeless, reported yesterday that eight buildings 150 feet long 18 feet wide and 12 feet high will be finished to-day. These buildings will be cut into compartments large enough to furnish sleeping room for a family, and each compartment will have an entrance from the outside. Lumber is being delivered at the park in large quantities and 135 carpenters are at work on temporary buildings.

The vaults of the shattered auditor and the tax collector are intact. There is something like \$5,500,000 in the vaults of the city treasury. The relief committee announced yesterday that the citizens no longer will be hindered going through the streets and no process will be necessary.

Celebration of Mass.
On the steps of the shattered churches and on the green slopes of the parks and the cemeteries, the people of San Francisco assembled yesterday at the usual hour of religious service. Grateful for the opportunity of expressing thanks for their preservation and anxious for words of cheer and comfort to carry them through future trials, the people assembled yesterday in even larger numbers than is customary.

There was no distinction as to sect or denomination, the gatherings including as a rule a large percentage of the families camping or residing in the vicinity. Catholic clergymen celebrated masses in the Jewish cemetery and every creed knelt with bowed head while the services were in progress. On the steps of St. Mary's Cathedral and on the upheaved pavement of Golden Gate avenue, overlooking the blackened waste that commenced just across the street, Archbishop Montgomery celebrated mass at 8 o'clock.

The service, attended by thousands covering the church steps and extending up and down the street in either direction.

No Suffering.
The committee having in charge the relief of the hungry reports that even the homeless person here is being cared for and that there is no suffering on the score of either food or drink within the city. Within a few hours an ample supply of milk will be assured.

Health Measures.
Only 30 patients are quartered in the territory that comprises park emergency hospital. Considering that over 500 injured persons received attention at the park since Wednesday morning, this is regarded by the physicians as very promising. Over 1,000 physicians and attendants are serving in the park at present.

Water In Plenty.
Experts of the Spring Valley Water Co., who have been engaged in making a thorough examination of the mains and reservoirs of the system, have reported that the company has in its reservoirs enough water to supply the city at the regular rate of 50,000,000 gallons a day for a period of 600 days. Street cars were running on Fillmore street yesterday, and there was plenty of power. The service was free. The cars on Sutter and Pacific avenue probably will be run by horses.

Five children were born last night in the hospital that have been established at Golden Gate Park, making eighteen births in this park. Eight babies have been born in Buena Vista Park.

Will Occupy Houses.
Hundreds of houses in the unburned districts have been vacated by their occupants, who either have fled from the city or are camped in the parks. These, with 1,000 vacant homes and flats, and all public buildings, will be used for housing the homeless.

Gen. Funston, Mayor Schmitz and Gov. Pardee met in conference at Gen. Funston's headquarters at Fort Mason yesterday, and had a thorough understanding of the relief measures and the policing of the city. It was decided to divide the city into three districts, one under the federal troops, one under the state troops, and the other under the police.

The Dead Are Hundreds.

That the number of dead will run into several hundred is becoming apparent now. However, eastern people need to have little solicitude for their friends who were here as tourists at the time of the earthquake. It may be safely asserted that few, if any, such persons have been killed or injured. The casualties, with few exceptions, were confined to the occupants of cheap lodging houses.

The carving in of the Royal lodging house, at 40th and Minna streets, cost about 125 lives.

The collapsing of the Portland House, 60th street, between Mission and Market, entombed 60 persons. Many of these were saved before the fire reached the spot.

The large five-story Brunswick rooming house with its 300 rooms filled with guests at 60th and Howard streets, collapsed and fire started amid the ruins.

Contractor and Builder

ruins five minutes later! It is estimated that over 300 persons lost their lives there.

Part of the large Cosmopolitan House, 5th and Mission streets, collapsed at the first tremble. Many of the sleepers were buried in the ruins and others escaped in their night clothes. At 7th and Mission street, the Wilson House, with its four stories and 800 rooms, fell to the ground a mass of ruins. Few of the inmates were rescued.

The Denver House on lower Third street fared the same, and none may ever know how many were killed. Two hundred bodies found in the Potrero district, south of Shannon street, near the Union Iron Works, were cremated at the Six Mile House yesterday by order of Coroner Walsh.

At noon yesterday reports were made by the deputies sent out by the health officers of the finding of 200 bodies in the crash came, and are little better than the bodies were buried. Practically every bank in San Francisco will be rebuilt. H. P. Lillenthal, president of the Anglo-California Bank, said: "Now is the time for every man to put his shoulder to the wheel to build up the new city. There is going to be a new city, and I am going to do all I can to make it the greatest city in the world."

Chinese in a Bad Way.
One of the problems facing the relief committees on both sides of the bay is the sheltering of the Chinese. They are without homes and without prospects of securing any. They can get no land. Unless the Government undertakes their relief they are in grave danger. Those who have money cannot purchase property, as no one will sell to them.

Cliff House Hardly Touched.
The Cliff House not only stands, but the damage sustained by it from the earthquake will not exceed \$500.
Terrible Strain Tells.
The terrible strain of the last few days is beginning to tell on the people. The reaction has come, and suspense over missing relatives and friends is causing illness and in some cases insanity.

At Central avenue and Oak street a man became insane and attempted to kill his wife with a cleaver. He had to be arrested to prevent him from injuring himself or family.
Than 300.
Washington, April 23.—The loss of life at San Francisco is estimated at less than 300 in a telegram addressed to the Secretary of the Treasury by Superintendent of the Mint Leach.

Mayor Schmitz has issued the following proclamation, which citizens are instructed to observe:
Do not be afraid of famine. There will be abundance of food supplied. Do not use any water except for drinking and cooking purposes. Do not light any fires in houses, stoves or fire-places. Do not use any house closets under any circumstances, but dig earth closets in the city. Within a few hours an ample supply of milk will be assured.

Shetland Ponies For Canada.
London, April 23.—A score of fine Shetland ponies were shipped to Canada from Dundee on Saturday, the first exportation for many years. It is expected to re-open a trade which was formerly considerable.

Judge Born in Canada Dead.
New York, April 23.—Judge Martin McMahon of the Court of Special Sessions, died here Saturday night of pneumonia, aged 68. He was born in Canada on March 21, 1838.

POLICE STOP VESSELS.

Many Tons of Food Thus Received For the Stricken City.

San Francisco, April 23.—For two days and nights a squad of police has been performing patrol duty in Golden Gate Strait. Two lieutenants and eight men, aboard the tug Sea Rover, Friday night, prevented the departure of several vessels from the harbor, for the reason that they carried food. All vessels were stopped and compelled to drop anchor in the stream or return to the dock, where the food was unloaded and turned over to the authorities. On Thursday a similar detail of police succeeded in saving for San Francisco many tons of food that would otherwise have been carried to cities up and down the coast.

Nelson Raises Funds.

Nelson, B. C., April 23.—Mayor Gillette and a committee of citizens to-day raised about \$1,800 for the relief of San Francisco by public subscription.

Peterboro Is Prompt.

Peterboro, April 23.—In response to a telegram from Vancouver to Mayor Best asking the city to send aid to the sufferers in San Francisco, a special meeting of the city council decided to forward sixty cases of Quaker Oats, and the American Cereal Co.'s agent in Vancouver has been wired to ship the goods at once. Their value is about \$200.

How New York Helps.

New York, April 23.—One hundred wagons glittering with gilt and enamel, the property of Barnum & Bailey's circus, started Saturday from Washington Park, Brooklyn, on the most remarkable invasion of New York ever recorded in its municipal history. All of the wagons bore signs announcing that immediate contributions would be received along the route traversed of all non-perishable articles which might be sent to San Francisco at once. Everybody on the route gave everything they could spare for suffering strangers.

Sympathy Acknowledged.
Ottawa, April 23.—The following telegram has been received at Rideau Hall:

Washington, D. C., April 21.—Earl Grey, Governor-General of Canada, Ottawa.

I thank you for the kind message of sympathy, which I assure you I deeply appreciate. Signed, Theo. Roosevelt.

Relief Reaches \$11,500,000.
New York, April 23.—It was estimated last night that the fund rapidly is nearing the enormous total of \$10,

000,000, and will have passed that figure by Monday, when Congress, it is announced, will add \$1,500,000 to the \$1,000,000 already appropriated.

'QUAKE, THE LEVELLER.

Santa Rosa in Ruins and Laborer and Millionaire on an Equality—100 Dead in the Town.

Santa Rosa, Cal., April 23.—The list of known dead now totals fifty-eight, and it is believed that 100 is a conservative estimate of the fatalities here. From the wreckage. The entire business section is in ruins, and practically every residence is damaged, fifteen or twenty being badly wrecked. The damage to residences was caused principally by the sinking of foundations.

The brick and stone business blocks, together with the public buildings, were all thrown flat. The court house, hall of records, the Occidental and the Santa Rosa Hotel, the Atheneum Theatre, the new Masonic temple, Oddfellows' block, all the banks—everything—went, and in all the city not one brick or stone building is standing, except the California & North Western Depot. It is almost impossible for an outsider to realize the situation as it actually exists here. The completeness of the devastation is really the redeeming feature, for it puts all upon exactly the same basis, commercially speaking.

All on a Level.
Bankers and millionaires are going about with only the few dollars they happened to have in their pockets when the crash came, and are little better off than the laborers who are digging through the debris. Money practically has no value here now, for there is no place to spend it. Almost everyone here is sleeping out of doors, being afraid to enter their homes, except for a short while at a time, until repairs have been made. There are plenty of provisions. Some have been supplied by other towns, and much has been brought in from the surrounding country. Before the fire gained headway, several grocery stores were emptied of their contents in anticipation of what might follow.

Another Town Demolished.

Berkeley, Cal., April 23.—A private letter received Saturday by Postmaster Schmidt brings the information that Fort Bragg, one of the principal lumbering towns of Mendocino County, was almost totally destroyed as a result of a fire following Wednesday's earthquake.

The bank and other brick buildings were leveled by the tremors. But one person of the 5,000 inhabitants was killed, but scores were injured. Relief expeditions at once were sent to Fort Bragg from surrounding towns and villages, and the people of the ruined area are being cared for.

Felt 'Quake' in Vessel.

Astoria, Ore., April 23.—The steamer Allacoon, which arrived yesterday from Eureka, reports that the Point Arena lighthouse was destroyed by the earthquake. The vessel, while off Eureka Wednesday morning, was severely shaken. The captain thought the vessel had struck bottom, but after making soundings, found that she was in 12 fathoms of water. The captain changed his course to westward.

\$250 For Stabbing Father.

Bellefonte, April 23.—George Cameron of Carlisle Township, who stabbed his father, was convicted of common assault by Magistrate Jarman of Bancroft, and fined \$250 and costs. Old Mr. Cameron claimed he was suffering from a lapse of memory, and said he could remember nothing that happened on the morning the affray took place.

A drop in the bucket is worth two in the bucket shop.

Great men are in some degree inspired.

SPRING SUITS

We usually dodge the sort of patterns that "hit you in the eye."
Our Men's Spring Mixture Suits illustrate that.

The patterns are full of character and none of them will be duplicated elsewhere, but they are mostly the quiet rich effects characteristic of the best custom tailors.

Men's Spring Suits \$6.00 to \$20

Boys' Spring Suits \$2.00 to \$7

Sore Lungs

We want everybody who has a hard cold in the chest to use Ayer's Cherry Pectoral. Our long experience with it, over sixty years, tells us there is nothing its equal for coughs, colds in the chest, bronchitis, hoarseness, sore lungs, weak throats, and weak lungs. Doctors tell us the same thing. Ask your doctor about it.

We have no secret! We publish J. C. Ayer & Co., Lowell, Mass.

The formulas of all our medicines are published in our books.

"Moses Oates" Is Dead.

Toronto, April 23.—Death removed Saturday morning in the General Hospital J. Gordon Mowat, who, under the pen-name of "Moses Oates," was at one time a well-known figure in literary and journalistic circles in Toronto. Many years ago Mr. Mowat owned the Galt Reformer. In the early nineties he founded a publication called The Lake Magazine, which only ran for about ten issues. Failure in that venture, however, did not discourage him, for he made arrangements for the publication of The Canadian Magazine, the first issue of which was brought out in March 1893. Mr. Mowat was its editor for two and a half years.

Two Tragical Deaths.

Sarnia, April 23.—Carpenter Wesley Sauter, who was in jail here, had an attack of heart failure Saturday, and died in the hospital during the night.

Renford Johnston, 24 years old, formerly bartender at the Northern Hotel here, was found dead in the stable hayrack there yesterday. He probably fell from the hay-loft. Dr. Bradley will hold an inquest.

Victim of Wreck.

Southampton, April 23.—The body of a woman was found on the beach Saturday morning near Stokes Bay, about 30 miles north of here. It is supposed to be that of Mrs. Harry LaMotte, cook on the steamer Kalyuga, which was lost with all hands off this shore last fall.

DESERVED PRAISE

The Blenheim News-Tribune in an account of a cantata recently given in that town, has the following to say of one of Chatham's talented and popular vocalists:

"Miss Gertrude Hollinrake, of Chatham, who has recently started coming to Blenheim to teach singing, also sang twice, and was recalled each time. She has a beautiful soprano voice, of much strength and deep expression. Her equal has seldom been heard in public here."

Work hard—you'll get there.

More Bread in a Barrel.

That extra cost per barrel which your grocer asks you for

Ogilvie's Royal Household

doesn't go into anybody's pocket.

It comes back to you.

It is the difference in money between flour you are sure of and flour you are not.

It covers the cost of inspecting the entire wheat crop of the country, and selecting the choicest grain.

It pays for advanced milling methods, for cleanliness, for purity and for scientific flour-making.

It comes back to you in the shape of light, wholesome, nourishing bread and pastry.

A barrel of Ogilvie's Royal Household Flour goes farther than a barrel of any other flour. It makes more bread and better bread.

You are not really spending that extra amount—you are investing it.

Do not let it stand between your family and good baking. Go to your grocer and say "Royal Household."
