Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

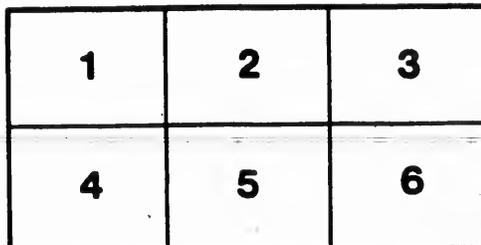

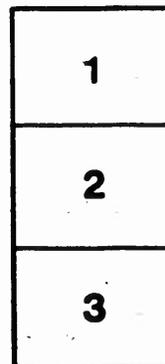

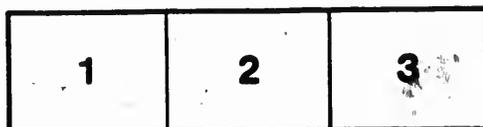

Library of the National Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives nationales du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

## Preface

**I**N presenting to my customers and the public a new **Price List of Machinery, Mill and Manufacturing Supplies**, I desire to thank them for the patronage of the past, to call their attention to the numerous and important additions to the lines of machinery and supplies previously offered, and to assure them that by careful and prompt attention to their requirements, I shall endeavour to merit a continuance of their patronage.

**Circulars or Catalogues** will be sent on application, containing the detailed specifications of any machine or line of goods enumerated herein.

**My control of staple lines** of manufactured goods, and my facilities for supplying them are of such a character as to enable me to fill orders promptly, and to compete in prices with any manufacturer or dealer, either in or out of the Dominion for the trade, and at the same time furnish only the best goods in each line.

**I can supply full equipments** for Railway Shops, Machine Shops, Furniture Factories, Planing Mills, Saw and Shingle Mills, Contractor's Plant, etc., etc., of the very best goods at lowest prices, and almost always for immediate shipment.

**I will supply any manufacturing or milling concern with everything they purchase in my line**, guaranteeing to keep them right on quality and price.

**This Price List only covers new machinery and goods.** I always have in stock a large stock of second-hand machines, which, having been refitted by first-class competent engineers and mechanics, are in as good condition for work as such machines can be made. I will send list of these in any specific line on application. I prefer to have customers see second-hand machinery before purchasing.

I have added a very full and complete **Code**, for brevity in telegraphing, to this catalogue, and will answer all prepaid telegrams promptly at my own expense.

Soliciting your patronage, I am,

Yours faithfully,

A. R. WILLIAMS.

# Iron Working Machinery

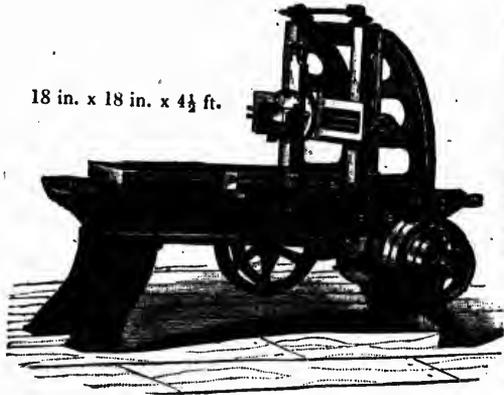

The Iron Working Machines enumerated in this Catalogue are (with a few exceptions) manufactured exclusively for my trade by

**THE LONDON MACHINE TOOL CO.**

This firm have a first-class equipment of tools, commodious premises, skilled workmen, modern facilities and methods, and guarantee all their productions to be right up to or ahead of the times, and strictly first-class. Do not be deceived by any statements of rival concerns or interested parties to the contrary. They do not ask purchasers to take any risk whatever on the quality of the tools. Specifications given herein will bear comparison with those of any manufacturer of machine tools in the world.

## Iron Planers

18 in. x 18 in. x 4 1/2 ft.

SOHO MACHINE WORKS, TORONTO

# Veneer Machinery

I control the patterns, and manufacture to order heavy, substantial Veneer machines, suitable for cutting cheese-box material and Veneer from  $\frac{1}{8}$  to  $\frac{3}{8}$  of an inch thick. Can arrange the capacity of the machine to suit the work required, cutting from 3ft. to 6ft. long. The machine is built on a heavy oak timber frame, solidly tenoned and bolted together. Iron work fitted on, complete, and making one of the most substantial Veneer machines manufactured on the continent. I have quite a number in use, and can furnish good references as to the ability of the machine.

SOHO MACHINE WORKS, TORONTO

# Hydraulic Engines

Six sizes of engines are built, and are designated by their diameters. The two-inch is adapted to the requirements of the smallest chamber organ, while the seven-inch, at the average water pressure, will be found sufficient to supply wind to the largest concert instrument. The two-inch requires a floor space of 7 x 10 inches, while the seven-inch occupies 16 x 18 inches. The former stands 18 inches high, and the latter 36 inches high. The intermediate sizes are in proportion.

Diameter	Stroke	Square inches of Piston	Supply Pipe	Waste Pipe	Price	Code
2 in.	9 in.	3 in.	$\frac{3}{8}$ in.	1 $\frac{1}{2}$ in.	\$60 00	
3	12	7	1	1 $\frac{1}{2}$	115 00	
4	12	12 $\frac{1}{2}$	1 $\frac{1}{2}$	1 $\frac{1}{2}$	145 00	
5	14	19 $\frac{1}{2}$	1 $\frac{1}{2}$	2	185 00	
6	16	28 $\frac{1}{2}$	2	2 $\frac{1}{2}$	235 00	
7	18	38 $\frac{1}{2}$	2 $\frac{1}{2}$	3	300 00

## The New "Otto" Silent Gas Engine

SAFETY! CONVENIENCE! ECONOMY!

Started instantly with a match. Always ready to give out its full power at once. Expense ceases when engine stops. No boiler, no gauges, no coal, no fires, no steam, no pumps, no explosions, no danger, no ashes, no engineer, no extra insurance, no unpleasant heat, almost no attendance. Where power is required at intervals it is the cheapest motor known. Over 10,000 in use.

Nos. 0000 to 3, inclusive, are built with one pulley, and Nos. 4 to 10, inclusive, have two pulleys and are run by two belts. When one pulley only is used it is placed on the right hand, as one faces the outlet, and the blower is designated as Right Hand. When desired, the smaller sizes can be fitted with two pulleys.

Nos. 4 to 10, inclusive, are furnished with adjustable bed, or with combined adjustable bed and countershaft, when so ordered.

B. F. Sturtevant's

HOT BLAST

Steam Heating Apparatus

COMBINED STEAM FAN AND HEATER

FOR HEATING FACTORIES AND BUILDINGS:

When writing for information respecting heating, give sketch showing size of building; location of boiler; proposed location of heater; if engine will be required, and such other information as you may be able to give.

*For Ventilating and Heating Combined. (See Memoranda above.)*

FOR DRYING LUMBER, ETC.

When writing for information, give location of boiler in factory; proposed location of kiln, heater, etc.; quantity of material per day required; whether fan is with or without engine; if kiln is to run night and day; if exhaust or live steam is to be used; if factory is to be heated at same time by same apparatus. *Give full particulars.*

See over for specifications. Keep close to them.

NOTE.—B. F. Sturtevant's lines of manufacture embrace—in great variety—all the appliances for pressure and exhaust blowing, dry kiln and factory heating, ventilation, etc. He issues special catalogues for each department, as well as a general catalogue and price list. If inquirers will do me the favor to state as fully as possible their requirements I will understand which catalogue to send them. I have the Canadian Agency, and carry most of the sizes of standard goods in stock.

## Allington & Curtis Dust Separators

RIGHT & LEFT HAND  
MACHINES

Right-hand machines have inlet opening on left-hand side; left-hand machines have inlet opening on right-hand side. In ordering, please state which hand is most convenient to avoid elbows and bring hopper in required position.

SOHO MACHINE WORKS, TORONTO

# Duplex Steam Pumps

I am having a full line of Duplex Pumps (Worthington pattern) manufactured to order, specially for my trade.

THESE PUMPS are substantially constructed, having all the working parts made of the very best material and of extra strength, so as to be durable.

ALL BEARINGS are interchangeable, and can easily be removed and duplicated in case of accidental breakage or unusual wear.

THE VALVE MOTION is the most prominent and peculiar feature of this pump, and is the point to which it owes its complete exemption from noise or concussive action when in operation, and which will allow of the pump being run at a higher speed than can be reached by any single cylinder steam pump. Two steam valves of each other, the one piston acts so as to give steam to the other, after which it finishes its stroke and waits for its valves to be acted upon before it can renew its motion; this pause allows all the water valves to set quietly, and removes everything like harshness of motion, and as one or the other of steam valves must be always open, there can be no dead point. The pump is therefore always ready to start when the steam is admitted, and is controlled by simply opening or closing the throttle valve.

ALL PUMPS are guaranteed to give first-class service, and as good as can be given by any pump manufactured, at any other place, or by any other manufacturer.

10	80	52 x 45	8	8	8	2000	5000	1200	Deed

The above capacity is estimated on a total height of 25 feet, with 40 lbs. steam pressure at the Pump. A deduction must be proportionately made on higher elevations; also greater or less quantity, according to pressure of steam. On long or high Deliveries an Air Chamber should be formed on Discharge Pipe, using a tee instead of elbow where there is a turn of the pipe, with piece of capped pipe extending above.

## Hardened and Ground Steel Mandrils

These mandrils are made of good Tool Steel, hardened and ground perfectly true, to fit holes reamed by our reamers. They are slightly tapering and the size is stamped on the large end. They are not injured by careful driving. We recommend raw-hide hammers for that purpose.

Diameter	Length	Price each	Code	Diameter	Length	Price each	Code

All of the above cutters have one-inch holes and have half-round key way to fit No. 25 Stubs wire. All over 3/4 face are cut with spiral teeth.

b., Toronto.

## THE Pickering Governor

This Governor, by its accurate regulation and good workmanship, will commend itself wherever used.

I guarantee to regulate accurately any style or size of engine, and under all circumstances.

For durability in all its parts, simplicity of construction, and economy in fuel, it cannot be equalled.

Having no joints, its action is direct, thereby insuring greater sensitiveness than can be secured with any other Governor.

*In ordering Governors, be particular to specify the style wanted.*

If no special dimensions are given, Governors will be sent according to the table below:—

Size of Valve or Steam Pipe	Portable	Plain	Finished	Speeder, extra	Stop Motion and Speeder, extra	Diameter of Cylinder Suitable for	Extreme Height	Diameter of Base Flange	Diameter of Pulley advisable	Rev. per Minute for Fig. 1	Code for plain Governor with Speeder

## CLASSIFIED

### Malleable Iron, Gas, Water and Steam Fittings

**CLASS A.** Price, Galvanized, 48cts.; Black, 35cts. per pound.

- Elbows, 1/2, 3/4, 1, 1 1/4, 1 1/2, 2, 3
- Tees, 1/2, 3/4, 1, 1 1/4, 1 1/2, 2, 3
- Right Hand and Right and Left Hand Couplings, 1/2, 3/4, 1, 1 1/4, 1 1/2, 2, 3
- Reducing Couplings, 1/2 x 3/4, 3/4 x 1, 1 x 1 1/4, 1 1/4 x 2, 2 x 3
- Rod

**CLASS B.** Price, Galvanized, 28cts.; Black, 18cts. per pound.

- Elbows and Tees, 1/2 to 1, inclusive.
- Elbows, side outlet, all sizes.
- Street Elbows, 1/2 in. and smaller.
- Crosses, to 1 in., inclusive.
- Drop Ells and Tees, all sizes.
- Caps and Lock-Nuts, to 1 in., inclusive.
- Reducing Couplings, 3/4 x 1 to 1 in., inclusive.
- Right and Left Couplings, 1/2 to 3, inclusive
- Extension Pieces, all sizes.
- Right and Left Fittings, to 1 in., inclusive.
- Right Hand Couplings, 1/2 to 3, inclusive.
- Chandelier Hooks, Waste-nuts and Loops
- Return Bends, to 1 in., inclusive.
- Wall Plates.
- 45° Elbows, 1 in. and smaller.

**CLASS C.** Price, Galvanized, 25cts.; Black, 16cts. per pound.

- Elbows and Tees, 3/4 to 1 in. } Such as have smaller outlets than 3/4 to be classed "B."
- Crosses, 1 1/2 and larger.
- Caps and Lock-Nuts, 1 1/2 and larger.
- Reducing Couplings, 1 1/2
- Right and Left Couplings, 1 1/2 and larger.
- Right and Left Fittings, 1 1/2 in.
- Right Hand Couplings, 1 and 1 1/2 in.
- Return Bends, 1 1/2 in. and larger.
- Right and Left Couplings, 1 in. and larger.
- Straps, not Tinned, all sizes.
- Street Ells, 1 in. and larger.
- 45° Elbows, 1 1/2 to 2 in., inclusive.

**CLASS D.** Price, Galvanized, 22cts.; Black, 14cts. per pound.

- Elbows and Tees, 1 1/2 and larger. } Such fittings in this class as have outlets smaller than 1 inch are to be classed as "C."
- Right Hand Couplings, 1 1/2 and 2.

## THE PENBERTHY Improved - Automatic - Injector

THE MAKERS SAY :-

"As every Injector is tested before it leaves the factory, we know that if properly connected as in diagram furnished, and instructions are carried out, they cannot fail to work." We therefore offer to pay the expenses of any man to come to the factory, and \$10 per day while there, if the Injector does not work, providing it has not been misused."

As the body will last for years, it is only necessary to order working parts to make Injector good as new. Every purchaser can repair his own Injector without sending it to factory.

*The "Improved" Boiler Feeder*

NEW STYLE, WITH MCAVITY'S PATENT IMPROVEMENT

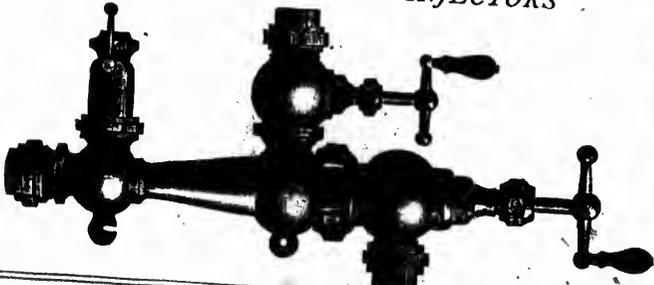

These are constructed in two parts, shown, one side being designed for lifting and delivering, and the other for forcing against pressures. The lifting side only need be used to raise water to a moderate height, and extreme height the forcing side.

Each Boiler Feeder carefully tested and proved before leaving the factory.

**PRICE LIST**

SOHO MACHINE WORKS, TORONTO

# Vises

## Double Screw Parallel Leg Vise

This Vise requires very little more power to move than the ordinary Single Screw Vise. It holds the work parallel always, at any opening up to the full measure of its capacity. The jaws are made of the best tool cast steel, welded on, file cut, properly hardened and of convenient shape; and for a strong, durable, convenient vise, there is nothing to equal this "Fisher" Vise in the market.

"THE FISHER"

### PRICE LIST

No.	Weight	Face of Jaws	Opens	Price Each	Code

## Eagle Anvils

These anvils are fully warranted. The "Peter Wright" and all anvils, except the EAGLE, are made with a body and horn of fibrous wrought iron. This soft iron gradually settles, carrying the face with it, and the anvil becomes hollowed on the face. Shear steel for the face is used, but it can never be made to take good temper like cast steel. The EAGLE ANVIL body is made of gun metal—crystallized iron—which neither settles nor breaks, and not only the face, but the horn also, is of the best Tool Cast Steel, welded on so perfectly by the process of its original and only inventor, the late Mr. Mark Fisher, that it is warranted never to come off. The face, planed to a true surface, is made so hard that it always remains so. The steel horns are tough and unhardened and will not break or bend.

## Sturtevant's Portable Forges

The Blower is made in the same manner as the regular Sturtevant Steel Pressure Blowers, with Babbitted journal boxes, steel shaft and galvanized steel blast wheel, guaranteed to give a stronger blast than any other wheel made. The hoods are of sheet steel in place of stove-pipe iron, and the fire-pan is of double thickness, lined with asbestos to prevent the heat from cracking the main pan or affecting the running gear.

I carry a very large stock of this belting, and in the widths  $4\frac{1}{2}$  in. and under (in single belting) always have an assortment varying from 14 to 20 oz. to the square foot, and in the widths 5 in. and over (in single belting) to 16 in., I have an assortment of weights from 18 to 24 oz. to the square foot. Widths up to 4 in. have laced joints or laced and riveted, or riveted only, just as customers prefer. Widths  $4\frac{1}{2}$  in. and over are all laced and riveted joints. All joints are glued. I also have in stock 3,  $3\frac{1}{2}$ , 4, 6, 8, 12 and 18 in. in double belts, weighing from 36 to 45 oz. to the square foot.

I append herewith the usual low Canadian price list (see discount sheet for discounts). If any of my customers prefer to buy by the weight, I will sell by the pound on a net cash basis, 6 in. and under in single belting, 75c. per pound; over 6 in. in single belting, 85c. per pound. Double belting, any width, 95c. per pound.

Pliers for clinching, 35 cents per pair.

### DIRECTIONS.

Place the ends of the belt to be fastened on a block of soft wood and drive the fasteners, beginning about one-fourth of an inch from the edge of the belt, and continue driving them at distances of one-half inch apart. Having done this, turn the belt over and place it on a piece of iron; if you have pinchers use them to curve the points of the projecting fasteners, then use the hammer to drive the points *back into the belt*. (Always clinch them toward the end of the belt.) Now drive fasteners between those just clinched so that they may be *clinched* on the side that the others were *driven*. Clinch as before, and you will have the best, cheapest and simplest fastening in use.

# The Swinging Hose Rack

This cut represents the Swinging Hose Rack with 100 feet of 2½-inch Linen Hose coupled to the water outlet, with nozzle on the end and ready for use at a moment's notice. As the name indicates, the Rack swings, and when not in use is swung back to the wall. It is ornamental, **always ready, always in place,** and when brought into use, the moment the nozzle is grasped it will swing into the necessary angle, the hose, being laid on in layers, will run off rapidly and regularly, avoiding the possibility of twists and kinks, thus saving time when minutes are of importance. Underwriters recommend it as the best device in use for the rapidity with which a fire can be reached. Hotels, Apartment Houses, Factories, Railroad Stations, Steamboats and all Public Institutions that desire to make their system for protection as perfect as possible, need them.

## FRENCH BAND SAW BLADES

I have the exclusive agency, and import direct from the makers, in France, these well-known Saws. I purchase in long lengths, and braze to order. Every saw is guaranteed to the satisfaction of the purchaser. Customers can do their own brazing, if they so choose. Prices are for unbrazed Saws. Brazing extra, as per list. Give extreme lengths in ordering, and be particular to say whether you want the Saws brazed or unbrazed.

THE "DAISY"

# Hot Water Boilers

The "Daisy" is the development of years of careful thought and long experience in the manufacture of Hot Water apparatus and combines in its construction simplicity, durability and efficiency. The particular design of the heater herein illustrated has been in general use for two years past, and of the several hundreds already in successful operation, there has been heard of them nothing but the highest commendation.

The above principle. Each for it. This Ra space than any o

**PECORA PAINT CO.'S STEEL COLORS**

*For Engines, Tools and General Machinery*

This paint gives a smooth and handsome finish; dries quick and hard; is uniform in shade, and very durable. In four shades—light, standard, medium and dark.

Barrel (800 lbs.) .....	at 10c. per lb.	Code.
Half Barrel (400 lbs.) .....	" 10 $\frac{1}{2}$ "	Miss
Quarter Barrel (150 to 250 lbs.) .....	" 11 "	Missal
Cans (6 in a case) 26 lbs. each .....	" 12 "	Missile
"Paint Thinner," for Flat Color .....	90 per gal.	Mission
and Filler .....	\$2 80	Missive
		Mist

The Filler makes rough castings smooth, fills all holes and irregularities even, thus preparing the castings for a fine finish with the "Steel Color."
