**Knight (H. Gally.) ECCLESIASTICAL ARCHITECTURAL OF ITALY, FROM THE TIME OF CONSTANTINE TO THE FIFTEENTH CENTURY**, with introduction and notes, and *illustrated with 80 beautiful and interesting views of ecclesiastical buildings in Italy, some of which are illuminated.* 2 vols, imperial folio, half bound morocco, 25.00. H. G. Bohn, 1843-4.

2

This splendid work was executed at the expense of Mr. Gally Knight, and it is worthy of the high reputation of the author. It gives examples of the primitive churches and of the changes of style in Italian architecture from the time of Constantine to the Fifteenth Century. No expense was spared in the production of this sumptuous work, and the drawings were all executed on the spot by artists of acknowledged talents and fidelity, and the engravings are on a scale sufficiently large to give a just idea of the buildings.

**Roberts** (David.) VIEWS in the HOLY LAND, SYRIA, IDUMEA, ARABIA AND NUBIA, ABOUT 250 EXQUISITELY BEAUTIFUL PLATES, with historical descriptions by the REV. DR. CROLY and W. BROCKEDON. Atlas folio, *clean and in the original parts.* (PUB. AT ABOVE £40.) 35.00. Pub. by H. G. Moon, 1842. 3

"Among the many splendid works published during the present century, the above has always held a prominent position. It is valued no less for its artistic execution than for the deep and absorbing interest which it delineates. To the oriental traveller it is a valuable reminiscence of the spots that he has visited, and to those who are strangers to the east it presents a faithful picture of the existing state of the Bible Lands."

SKETCHES IN THE HOLY LAND, SYRIA, IDUMEA, EGYPT AND NUBIA, about 250 VERY BEAUTIFUL PLATES (*reduced from the larger series*) in *double tints*, with descriptions by DR. CROLY and W. BROCKEDON. 6 vols in 3, imperial 8vo, *half morocco gilt and gilt edges*, 15.00. (PUB. AT £8 8 o.) 1885 6

PICTURESQUE SKETCHES IN SPAIN, 26 FINE LARGE AND BEAUTIFUL TINTED LITHOGRAPHS. *Imperial folio, half morocco, some plates a little foxed and binding a little rubbed*, 5.00. (pub. at £4 4 o.) 1837. 5

**Carter's Specimens of Ancient Sculpture and Painting**, from the Earliest Period to the Reign of Henry VIII., now remaining in England, consisting of Statues, Basso-Relievos, Sculptures, &c., Brasses, Monumental Effigies, Paintings on Glass and on Walls, Missal Ornaments, Carvings on Cups, Croziers, Chests, Seals, Ancient Furniture, &c., &c., designed to show the Rise and Progress of Sculpture and Painting in England, to explain Obscure and Doubtful Parts of History, and to Preserve the Portraits of Great and Eminent Personages, with Historical and Critical Illustrations by the following distinguished Antiquaries: Francis Douce, Richard Gough, William Bray, John Fenn, J. S. Hawkins, and Rev. J. Milner, of Winchester, reprint of the enlarged edition, arranged in Topographical Order, with additional Notes by Sir Samuel Rush Meyrick, Dawson Turner, John Britton, F.S.A., and others, including also the MS. Notes contained in copies left by the late Richard Gough and Francis Douce, and now preserved in the Bodleian Library, and a General Index, *with 120 large engravings, many of which are beautifully coloured, and several highly illuminated with gold, carefully reproduced from the original plates*, in 1 handsome vol, royal folio, bound in half crimson morocco, topedges gilt, (first pub. £15 15.) 18.50. 1887. 6

"The present edition has very considerable advantages. It is better arranged and more correct than the first; has large additions and illustrations, in the form of notes, contributed by competent scholars; and is accompanied by a complete index, the want of which has always been felt. The plates are in good condition, and many of them beautifully coloured. The Missal Plate, which is splendidly illuminated in gold, carmine, and ultra-marine, the Lynn Cup, the Crozier of William of Wykeham, and the Paintings on Glass, have a most brilliant effect, and render this volume perfectly irresistible to the lover of antiquarian lore."

**Bartolozzi-PAOLI** (P. A.) Paesti quod Posidoniam etiamdixere Rudera, in Latin and Italian, ABOVE 60 FINE ENGRAVINGS (including 15 plates of coins) AFTER THE BARTOLOZZI SCHOOL, many of which, including a large folding plate, engraved by BARTOLOZZI HIMSELF; A FINE COPY, IMPERIAL FOLIO IN OLD RED MOROCCO BINDING, yellow edges, 10.00. *Roma*, 1786. 7

Pesto or Pestum, a town of Naples in ruins, first a Greek colony, afterwards (B.C. 275) Roman, destroyed by the Saracens in the 9th century. The remains of its buildings and temples, etc., are well represented in the above splendid work.

**Carter's Ancient Architecture of England**, including the Orders during the British, Roman, Saxon, and Norman Eras, also under the Reigns of Henry III. and Edward III., the whole chronologically arranged, *Illustrated by 109 large copperplate engravings, comprising upwards of 2,000 specimens shown in plan, elevation, section, and detail*, reprint of the best edition, carefully reproduced from the original plates, with Indexes, Alphabetical Chronological, and Systematic, and Illustrative Notes, by John Britton, F.S.A., &c., 2 vols in 1, royal folio, fine impressions of the plates, half morocco, top edges gilt, (published at £12 12,) 15.00. 1837.

Mr. Sayers, in his "Hints on English Architecture," says: "That splendid and comprehensive work, 'The Ancient Architecture of England,' by Mr. Carter, one of our most distinguished architectural draughtsmen."

"This collection supplied a want which had long been felt, and enabled the architect to do his work. For this purpose, simple but accurate outlines, on an intelligible scale, are alone required; highly finished plates, on a small scale, though they may be liked by the amateur, are worse than useless to the art, as they encourage the builder who attempts Gothic Architecture to content himself with a general resemblance, and to blur all the minor features. A work, professing to treat on architecture, and wanting in plans and sections, is no better than a treatise on anatomy which omits the representation of the bones."—*Quarterly Review*.

To the architect, the antiquary, and the artist, this celebrated work is alike indispensable, and it should find a place in every good library, by the side of the *Vetusta Monumenta*, published by the Society of Antiquaries, and *Gough's Sepulchral Monuments*, two national works to which Mr. Carter contributed largely.

"Among the many distinguished persons who, within the last seventeen years, have occupied the most exalted stations in the country, there is scarcely one of whom posterity will not have, in some part of this series of sketches, the most accurate representation that the pencil can convey; a representation in which the fidelity of the more elaborate portrait is combined with a degree of freedom and spirit that the more elaborate portrait very rarely exhibits. *Nor is it only a collection of portraits of the most eminent public characters of the day that posterity will possess in these sketches; but so vigilant has been the eye, and so prompt the pencil of the author, that there has scarcely been an incident of any interest in the political world since the publication commenced which he has failed to record.*"—Preface.

This is an interesting series of books to the professional engineer, and should be especially so to Canadians. In the first volume we notice a descriptive historical account of the Rideau Canal, the causes which led to its construction, the communication prior to 1827, and a description of the works by means of which it is converted into a steamboat navigation, with 30 pages of letterpress and 4 folding maps, etc., by Lieut. Frome, Royal Engineers. Subsequent volumes have papers on the demolition of the Glacier Bastion at Quebec, 3 pages and lithographic view. The dam constructed across the waste channel of Long Island on the Rideau canal in 1836, 5 pages of letterpress with plans and sections by Major Bolton. An important paper by Lieut.-Col. Phillpotts on the "Navigation of the Canadas," with above 50 pages of letterpress, several plates and a large folding map showing the line of water communication from Lake Erie to Montreal on a scale of 10 miles to the inch. Report on a survey of a line for a canal to unite the Bay of Fundy with the Gulf of St. Lawrence, with 3 folding maps, by Capt. Crawley. It will be understood these valuable contributions and maps are original, being the actual work of the contributors.
