A Madrid telegram says:—"When the ex-Empress Eugenie arrived here her mother, the Countess de Montije, was already dead. King Alfonso, who was awaiting the ex-Empress at the station, communicated the news to her. She wished to go to her mother's residence, but was prevailed upon to go to Alba palace, where many thousands of visitors called and inscribed their names." Subsequently the Empress did visit her mother's house, and prayed over the remains.

The meeting held to night to protest against the arrest of lavest by his friends, was the greatest popular demonstration of the kind for many years in the Irish capital. To say that the great room of the Rotunda, the scene of the famous aggregate meetings in O'Connell's days was crowded to excess, would give but a feeble picture of the scene. There were at least six thousand persons present in the immense hall, and all approaches to the place were densely thronged. Even Sackville street and

of the hall appeared like a dense pavement of human heads. Now and then the enormous mass surged to and fro under the pressure of other contingents, vainly strug-gling to gain admittance. The enthusiasm was intense, perhaps a little too boisterous, and the noise made the keeping of the neces sary; silence almost an impossibility. Those close to the platform alone could, with the closest attention, hear the words of the speakers. Present were Mr. Edmund

It reminded him of former days, when the men of Dublin protested against the deeds of oppression, when their countrymen had been struck down and flung into prison. Their language had been misrepresented by the Government press. He denied that there was anything immoral or unconstitutional in what they had said. Perhaps, indeed, their yords could

watched this land movement attententively. His own circumstance told prietary, where the man who tillled the soil owned it.

THE LEADER'S GREETING Mr. Parnell then came forward. The scene was indescribable. The whole assembly rose, cheering for several minutes. He spoke at times under evidently deep feeling. He spoke of the arrests in words to go free. No one man, nor several men, are necessary. They may arrest them. Others abler, purer, braver, will rise up to take their places. They will succeed to-morrow at Balla. There will be a great demonstration on the rights of the tenant farmer to re-

main their own holdings. He continued : | cently calling on the men of Mayo to meet "I expect this will be the crowning on Saturday to protest against the threat-declaration in favour of the people to own ened eviction of a farmer. The document declaration in favour of the people to own the soil. Let the Irish people be only selfrestrained, let them not allow themselves to be forced into illegal paths. This is ble armed resistance to the eviction, a the aim of the Government; that their courage should falter, their patience break down, then would come the secret society spy and informer, and their victims. That had been the story which had been so often written in blood. Let them pledge themselves that there shall be nothing of this, that no provoca-tion shall drive them to illegal courses. Only a little more time and patience and we will set the crown upon this great movement by achieving the only end and aim which we have proposed to ourselves throughout, namely, that the people of Ireland shall own the soil of Ireland shall own the soil correspondent as stating that he had Ireland." Throughout the speech the handled some of a let which were being interruptions of applause were incessant, the audience manifestly sympathizing with the speaker, feeling pride in his leadership. Mr. Parnell's last words were uttered with also calls attent on to an advertisement in deep emotion and telling effect. "THE AFGHAN AND ZULU BUTCHER." A Dublin despatch says at the meeting p-night to denounce the arrests of Daly, avitt, and Killen, 5,000 were present. Mr. Dwyer Gray, member of Parliament presided. The following members of Parliament were present: — Messrs. Parnell, Smyth, Kirk, O'Leary and Biggar. The chair-

man counselled moderate language. Mr. Parnell moved that the meeting call upon Irishmen*to pronounce by public meetings their condemnation of the action of the ernment, which is unconstitutional, and illegal, and thus show the world that Irishmen will not be intimidated by persecution. Mr. Parnell accused the Government of entrapping Irishmen by means of paid spies. He advised Irishmen to be calm, because if they attempted to emulate the Government in illegal action or violence or disorder, then they would be doing what

A MAN WHO PLAYS WITH LOADED DICE. Mr. Parnell said no earthly power could ever succeed against the United and determined efforts of Irishmen in the struggle for their soil. Irishmen would show Lord Beaconsfield they knew how to win a battle, and though they played against a man who had loaded dice, their cause was the strongest. He said the land system was already tottering to its fall. Mr. Biggar already tottering to its fall. Mr. Bi declared Mr. Parnell the leader of Irish people. After the demonstration was over, Messrs. Parnell and Biggar started

Our Dublin correspondent says :—I have just had an interview with Mr. Mac-Dermott, Q.C., respecting the Agrarian outrage perpetrated on Wednesday night at Monasterdam, the particulars of which were forwarded to you yesterday. > Mr. George Kirke, member of Parliament for Louth, spoke next. He is a plain but forcible speaker, but every word said clearly came from his heart, and secured a sympathetic audience, which more eloquent speakers would not have obtained. He said he was a tenant farmer, and had always been on good terms with his landlord, even when their interests did not agree. He had watched this land movement attention and reticence that had never before occurred. They said that they preferred to pay the full half two years' rent due in November and begged that the other half should stand over for the present. Mr. MacDermott seeing they were so determined consented. Flaherty, who was present, hearing the landlord announce the reduction, asked whether the surplus he had already paid would be refunded, thereby disclosing the fact that he had paid the full amount. Mr. MacDermott now remembers the looks of surprise and watched this land movement attention.

MORE ARRESTS THREATENED. A London despatch says it is likely there will be several arrests in Ireland to-day of well-known ringleaders in the late move-

ments. A great meeting was held to day at Loona Moor, two miles from Balla. The chair was occupied by Mr. John Louden, President of the National Land League, of Maye. Messrs. Parnell, Gray and other prominent gentlemen were present. They wished to take the horses out and draw the carriage. They also threatened to cut the traces of the Government omnibus. Mr. Parnell arrived at ten in the morning. He visited the prisoners in the gaol, and accompanied them to the Court. Before this time large his back by flogging with hawthorne bushes, and then gave him back to his wife, and then gave him back to his wife, loudly cheered Maloney. There were three other magistrates on the Bench. Mr. Monroe, Law Adviser to the Irish Gevernment, conducted the prosecution. Mr. Louden, a Dublin bar-rister, defended Daly. Mr. Rea, a well-known blatherskite, generally b lieved to be slightly orazy, defended Killen. Davist defended himself. The Court was crowded with friends of the low when West and his fellow-lodger "Yankee Brown" were away. Mitchell then ato up prisoners, interspersed with policemen, Crown officers, and ladies. BRANTFORD' NEW FACTORY. necision of the Chry Council to Give the Required, Bonus.

Brantford, Ont., Nov. 25.—The City Council met last night, and took into consideration the granting of a \$5,000 bonus to Mr. Clayton Slater for the erection of a cotton mill here. After very favourable discussion by the members present, it was decided that the Finance Committee should meet Mr. Slaten and the City Solicitor this morning, with a view of receiving from Mr. Slater written agreements, pledging himself to carry out certain undertakings if the bonus was granted, and secure from him a deposit of \$200 to cover the costs of the by-law if submitted. The Finance Committee was also empowered to instruct the City Solicitor to draft a by-law, to be submitted at the Council. Mr. Slater has purchased four acres of land on the Holmedake property for his factory, and the new building will be commenced immediately

after the bonus by-law is passed.

THE HARVEST OF THE SEA.

The Catch for the Past Season in P. E. 1. St. John, Nov. 20.—Col. Hunter Duvar, Inspector of Fisheries, has just forwarded to the Fisheries Department a report on the condition and product of the fisheries of Prince Edward Island for the past season. From this document it is learned that the catch of the staple fish has been unprecedented, as may be seen from the following table:—

ployers received low prices for the products. Computed at official rates, the increase in the value of the above harvest of the sea is very marked, inasmuch as the the yield of the coast and streams of Prince Edward Island in 1878 show only \$340.

344; while this year it amounts up to \$1,402,501; being an increase of \$562,157. Of this large total amount Kings County produced \$561,215; Prince County, \$475,534 and Queens County, \$365,751. The very large increase in the product of the lobster factories is noticeable, there being an increase in the year of more than 600,000 cans. Dissatisfaction is felt by some of the packers as to the present close season, there being a wish among them to have the time of canning extended to the 20th September. The rapid growth of the lobster industry is shewn as follows:—In the year 1871 there were canned in Prince Edward Island, 6,711 lbs; in 1875, 161,248 lbs; in 1876, 362,676 lbs; in 1875, 2,272,825 lbs; or an increase on the year of 623,025 cans.

Report of Commissioner Hoyt. Before the Mast on the Great

WASHINGTON, Nov. 20.

Washington, Nov. 20.

The annual report of Indian Commissioner Hoyt shows that during the past year the Indians made a steady advance in civilization, unparalleled in any previous year. The Ogallala and Brute Sioux took the lead. Their progress in the last eighteen months has been marvellous. It is no longer a question as to whether Indians will work. Indians, who are willing and anxious to work, are largely in a majority. From all except five civilized tribes in Indian territory there is a call for lands and an increased desire for house, agricultural implements, waggons, etc., and for citizens' dlothing.

The results of Indian labour during the year are much larger than ever before. The Indians, exclusive of the civilized tribes of the Indian territory, cultivated 329,000 acres, and raised 1,551,000 bushels of grain and vegetables. The civilized tribes in the Indian territory cultivated 273,000 acres, and raised 3,117,000 bushels of grain and vegetables. The Commissioner says the most intelligent and best-disposed Indians are now earnestly asking for a title in severalty to their lands, as a preliminary to supporting themselves from the products of the soil. The only sure way to make the Indians advance in civilization is to give each head of a family 160 acres, and each unmarried adult 80 acres, making the allotments inalienable and free from taxation for twenty-five years. The report states that the successful experiment last year of employing Sioux to remove 2,000 tons of freight 150 miles to the new reservation led to the purchase of enough transportation material to enable all the Indians, except the tribes of Colorado, New Mexico and Arizona, to haul their own supplies. Among other recommendations of the report is one for the enactment of a law preventing polygamy, and providing for legal marriage among Indians. For this purpose it is so proposed to make civil magistrates out of Indian agents.

SIR,—I am informed by Mr. McPherson, a fish dealer at Sackett's Harbour, that over five hundred shad, weighing from two and one-half to four pounds each were taken in whitefish nets set in deep water, off Sackett's Harbour, in Lake Ontario, during last summer. Their stomachs were full of the common food of the lake, showing that they feed in the lake, and the chances are that they never have been to salt water, and that we have added a new fish to the waters of the lake. I have opened thousands of shad taken in the Hudson, Connecticut, and Potomac rivers, and hardly ever find anything in their stomachs. I think they have become land-locked, and will make Lake Ontario their home.

At the last meeting of the Wroxeter School and in a few e Tory who injuries the contract of the section.

At the last meeting of the Wroxeter School Board a row occurred. The meeting was held for the purpose of engaging a successor to Miss Harris. Three of the trustees voted for the engagement of Miss Jessie Brown to fill the vacancy. The chairman abstained from voting, thus leaving the other two members in a minority. Mr. Gibson, one of the minority, claims that the event of a tie he has a casting vote, and on these grounds he has protested against the engagement of Miss Brown. The present school law gives the chairman a second or casting vote in addition to his vote as a member, but only when there is a tie. Here there was no tie, and there is nothing to compel the chairman to vote as a member for the purpose of producing such a state of affairs as is contemplated by the section.

At the meeting of Austrian teachers at Vienna, early in June, Prof. Deruhardt advocated in an address, the following propositions:—I. The introduction of practical exercises in the productive and representative arts into the common schools is a pedagogic necessity. 2. The practical exercises must bear a definite ratio to the theoretical instruction for the sake of mustual support and advancement. They must cultivate theoretically, esthetically and practically. 3. The most suitable division of the practical exercises is into work in the garden and work in forms; every school ought to have a school-garden.

4. Social circumstances render urgent the establishment of non-compulsory industrial schools in addition to the public schools; the work done in these should yield objects of commercial value, without,

FAMILY BALSAM

A Safe & Effectual Remedy.

PROMPLY RELIEVING

PAIN AND INFLAMMATION.

FOR EXTERNAL AND INTERNAL USE

This Family Balsam is composed of Barks, Roots, and Resinous Gums from the trees of bur Native Forests. Each one of these ingredients is good for the complaints for which FAMILINE is recommended, but when compounded together they make a Balsam which is a positive cure for the complaints. This Balsam takes the place of salves, ointments and liniments. It has been tried during the past two years, every one using saying, "I would not be without it." Every family should have it in their house, ready for use.

Numerous testimonial have been received, which will be published, from persons who have used the Familine Balsam. For its quick and sure healing properties, it has no equal; for its relieving and allaying infammation, no medicine has ever been compounded equal to it. It is perfectly safe to use at any and all times, and a quick and thorough cure for such complaints as

ocws will produce 6,000 pounds, on an average.

The value of a cow, measured for factory cheese production, is determined by the pounds of milk she yields, and may be looked at wholly from this standpoint; in which case nothing less than 6,000 pounds should be satisfactory. The cheese dairyman has then a simple standard of selection—merely the yield of milk—and the sale milk dairyman has the same standard. This is very easily determined with a pair of spring scales hung in the stable, with a book having a name or number for each cow; and by weighing and entering the milk of each cow in the book one day in a week, the average of these weighings will give the average of these weighings will give the average yield per day, near enough for all practical purposes. Can't a dairyman afford to take this small trouble to learn the individual character of his cows, when profit or loss depends upon it? A cow that yields only 3,000 pounds, at five or six years old, should be got rid of as a pauper that lives on your charity and refuses to work. Only heifers with the first calf can be tolerated with so low a yield; and the prospect is not favourable even with the heifer. She should yield 4 000

Sir, —In the report from the Ontario Experimental Farm, in your valued paper of 14th inst., I was astonished at the wise men attempting to fatten two-year-olds, costing \$45.50 apiece, on palm nuts, and paying \$15 for bedding. Was it eiderdown? The idea of attempting to fatten special cattle mixed up with fifty other cattle and turned out daily to water, is eve, and sometimes far into the hours when it would be wiser to go to bed than to sit up to sing and pray.

the week.—When, 251,000 to 10,000 cpt; saint, 251,000 to 10,000 cpt; some state of the week of the state of t majority of the esuntry markets were inactive.

Cable advices for the preceding week state that the Mark Lane and country markets were them dull. With liberal arrivals from abroad, prices declined a shilling for all descriptions of wheat. There was not much pressure to sell, but the enormous visible supply in America, and the uncertainty as to the actual extent of the surplus available for export those, samed a precity general absonation from buying. The supplies at the country markets were light, and wheat in a fit state for either sowing or milling was decidedly scarce. But imports were very large amounting to 305,000 to 400,000 quarters of wheat, and 170,000 be 175,000 barrels of flour, while home deliveries in the whole of the United Kingdom were about 158,000 quarters; making a total supply in the week ending on the 15th inst. of about 650,000 quarters of wheat, which is 220,000 to 230,000 quarters above the average consumption; and which excess must be regarded as the primary cause of the subsequent dullness. Cable advices show a slight decrease during last week of a first prices; the range seems to be from \$1.50 to \$25.00 to 200,000 quarters above the average consumption; and which excess must be regarded as the primary cause of the subsequent dullness. Cable advices show a slight decrease during last week of the subsequent dullness. Cable advices show a slight decrease during last week of the subsequent dullness. Nov. 6 to Dec. 4, is:—Wheat, 592,000 quarters, comprising nil quarters from the Danube and Black Sea; 427,000 quarters from Atlantic ports; 75,000 quarters from California, and 90,000 quarters from Chili and Australia, along with 179,000 quatters of corn, all from American Atlantic ports. The latest and most trustworthy estimates state that it will be necessary for England to import this harvest year eighteen million quarters of wheat. Continental advices by mail state that in France supplies were scanty, owing to farmers having been engaged in the fields, and farmers having been engaged in the fields, and the holidays having caused some falling off in the attendance. Consequently, the wheat trade ruled quiet, and some decline occurred in values, although the reduction necessary to effect sales in the country was less marked than in Paris, as the previous rise had been less. An undecided tone prevalled, and millers showed a good deal of reserve in their purchases of wheat, especially as they had to reduce the price of fleur. The winds having been favourable large arrivals of wheat had reached the principal ports during the week, the total imports into Marseilles, Bordeaux, Nantes, Havre, and Dunkirk having exceeded 334,000 qrs in the previous week. The heavy supplies had depressed prices; which receded about two francs on the week for all descriptions. Californian wheat was offered at Wheat, fall, new, per bush \$1.22 weigh The heavy supplies had depressed prices;
which receded about two francs on the week for all
descriptions. Californian wheat was offered at
equal to 56s 9d to 57s 3d, and red winter at 56s to
56s 9d per 480 lbs. In Germany the weather was
damp and foggy but the temperature mild for the
season. At Berlin the wheat trade was much less
active than before, the speculative movement having apparently died out. Transactions in spot
wheat were very limited, and in the term market
prices receded 4 marks per 1,000 kilos, in consequence of duller advices from abroad. Rve on spotalso
was less active. At Hamburg the week opened very
quiet but markets improved as it advanced. Fine
yellow Mecklenburg and American winter wheat
sold at 56s 6d to 58s, and good yellow and white
mixed Holstein at 52s to 55s per 504 lbs., free on
board. Barley met a limited inquiry, but no decline occurred as stocks were moderate and holders
refrained from pressing sales. At Dankig wheat

The amount of wheat and flour in transit on the 25th inst., was equal to 2,220,000 quarters, against 2,557,000 on the 6th inst., and 1,544,000 quarters at the corresponding date last year. The approximate quantity of grain on passage for the United Kingdom for orders, expected to arrive during the four weeks from Nov. 5 to Dec. 4, is:—Wheat, 592,000 quarters, and 90 to \$1.55 for gobblers. Geese have been very plentiful, and have ranged from 45 to 60c, the latter for choice. Ducks have sold from 45 to 60c, and soul from 35 to 45c per pair. Boxlothave brought 75,000 quarters from California, and 90,000 quarters from Chill and Australia, along with 179,000

slightly. At St. Petersburg wheat ruled quiet during the week; and rye was quiet and lower. There was not much doing in wheat shipments from Southern Russis, and of those being made the greater part were for Moditerranean ports. Egyptian advices state that at Alexandris the wheat market was characterised by considerable animation, but as prices rose almost daily export operations were checked. Subsequently, however, a somewhat quieter tone prevailed and prices gave way slightly, especially for forward deliveries. On this continent markets have been rather unsettled, closing with a firmer feeling than prevailed in the latter part of last week. At that time, however, operations at New York were checked by the extreme prices current for No. 2 red, which prevented the filling of shippers' orders, the market being relatively six to sight cents per valled and sove Liverpool and London. This check on exports caused an increase of stocks to over twelve million bushels, being the largest stock ever held in New York. Since then the tendency of prices has been upwards, probably sympathy with the firmer feeling in English freets, so that the margin against shipments. TRADE-Has been rather less active, but fairly

Land—The demand has improved, probably in consequence of the scarcity and firmness of butter, and prices seem rather firmer; a tot of 40 pails sold at 9½c, and small lots bring 9½ to 9½c; tinnets wring 9 to 9½, and tierces 8½ to 8½c for small lots.

Hose—Rail lots have begun to offer, and have old at 85.25 to 85.35. Street receipts were large on used ay, but smaller to-day; prices have been asier at \$5.25 to \$5.50.

ruesday, but smaller to-day; prices have been easier at \$5.25 to \$5.50.

SALK—Liverpool coarse is firmer, with small lots selling at 90c. Liverpool dairy in unbjesched bags is steady but unchanged at \$1.20 to \$1.25, and in bleached bags at \$1.45 to \$1.50. Goderich remains quiet and unchanged, with sales of car-lots at \$5c.

DRIED APPLES—Have been firm and advancing, with a good demand for round lots; sales of these have been made at 5 to \$4c, and in one instance \$4c was paid. Small lots have been inactive, and are usually held at 6 to \$4c.

HOPS—There has been some enquiry heard, and sales have been made at 30 to 31c for choice, and at 24 to 28c for ordinary, new. Yearlings have remained much as before at 8 to 15c, according to quality and quantity.

GROCERIES.

TRADE—Has been quiet all over both in jobbing and with the country.

TRADE—Has been good many have been sold on English account at firm prices. Stocks are small all the standard of the second of the s

day for Chicago. Cod has been selling fairly well at former prices. Quotations stand as follows, the outside prices being for retailers lots:—Herrings, Labrador, bbis, \$6.75 to \$7; Shore, \$5.50 to \$5; Salmon, salt water, none; Cod-fish, now, per 112 lbs, \$6; boneless, per lb, 6 to 64c; Trout, \$3.00; white-68h, none; Hackerel, bbis, none; half-bbis, none; Sardines, ½a, \$2 to 10c; do. ½a, 18c.

Toracco—Has been active at firm but unchanged prices. Job-lots have sold at \$3c for No. 1 Rough-and-Ready; of Navy threes at from 18c for No. 2 Rough-and-Ready; of Navy threes at from 18c for No. 1 and 18c for No. 2, and of Peerless at 15c for No. 1 and 18c for No. 2, all in bond. Quotations are as follows:—Manufactured 10°s, 33 to \$7c; do. ½a, 6c, 8s, and \$8, \$71 so \$6c; Navy, \$3s, bright, \$4 to 56c; Navy black, \$7 to \$60; Solaces, 36 to \$4c; Extra bright, \$8c; Virginia, \$8 to 90c.

Liquors—Meerrs. Gooderham & Worts' prices of whiskey have been advanced 5c, and those of alcohol and pure spirits 12c, this week. Brandies seem decidedly firm, and in outside markets an advance is expected, but there has been no change here as yet. Quotations are as follows:—Pure Jamaica Rum, 16 o. p., \$2, 30 to \$2, 50; Demerrar, \$2, 20 to \$2, 50; Herring, \$2, 50; Sec. \$3, 50; S

CATTLE TRADE-Has been very quiet all week.

TRADE—Has been very quiet all week.

BREVES—The market has been very poorly supplied with all grades, save "feeders." The offerings of the better grades, however, have probably been sufficient, as there has been no enquiry: export cattle ner for Montreal, and the local day has been checked by large receipts of pork, try and dressed meat, and also by a desire on the part of butchear to clear off stocks on hand. First-class have not been offered, but a few choice steers, averaging not under 1,200 lbs., would have found a sale for the local market at \$4.25 to \$4.50. Second-class, consisting of light steers and heifers and heavy oxen and buils, have been very scarce, and all offering, but no more, wanted at \$5.75 to \$4. Third-class and "feeders" have been treely offered, and the latter readily taken at from \$3 to \$5.50; but it is said that the bvers are nearly filled, so that a maintenance of this demand is not to be depended upon.

SHERF—Receipts have been very small indeed, but they have been sufficient, as the same causes have checked the demand for these as for cattle. Prices have shown no change, and stood at from \$5 to \$5.50 for first-class wothers, dressing not under 70 lbs; and \$4 to \$4.75 for second-class, with rather a slow sale for the latter.

Lambs—The active demand of last week has fallen off very considerably, chiefly in consequence of the influx of pork and poultry. Still the few offering have been all wanted and readily taken, but had supplies been as large as usual, prices must have declined. Choice picked lambs, dressing from 50 to 56 lbs, have been bringing \$4.12 to \$4.25; and lots of first-class, dressing from 40 to 48 lbs, from \$3.50 to \$4. Second-class, dressing from 50 to 56 lbs, have been bringing \$4.12 to \$4.25; and lots of first-class, dressing from 60 to 38 lbs, have remained nominally unchanged. First-class, dressing from \$5 to \$5, with a very slack demand.

Calves—Have been decidedly inac'ive; scarcely any have been offered or wanted, and prices have remained nominally unchanged. First

two weeks, I had returned to me by the said firm \$972.58.

Emglish Cattle Markets,

Mr. Richard Hall, in his circular of the 13th inst., reports the above markets as follows:—
Liverroot, Monday, Nov. 10.—The supply of stock was considerably larger than on last Monday. The demand fair for cattle at last week's prices, a fair clearance being effected. Sheep were in better request, and higher rates were obtained for prime wethers. All other kinds unchanged in value. The American supply of live cattle was smaller than that of last week, which was the smallest of the season. No sheep arrived. The arrival of fresh meat amounted to upwards of 4,000 quarters. Cattle, 5,012; sheep, 9,017. Beef, 5\frac{1}{2}\text{d} to 7\frac{1}{2}\text{d}; mutten, 7\text{d} to 9\text{d} per 1b.

LORDON, Monday, Nov. 10.—The cattle trade was dull and weak. The total number of beasts on offer was 4,230, including 70 foreign. From the Midland and Home counties we received 2,510; from Scotland, 50, and from Ireland 1,500 head. There was again plenty of room for improves the condition. The demand was heavy. The best scots and crosses sold at 56 4d but 5s per 8 the was frequently accepted for good beasts. In the sheep pens were 10,100, including 1,010 foreign. The demand-was very dull, and prices had a drooping tendency. The extreme quotations for the best Downs and haif-bred was 6

PICKERING COLLEGE

Endowed and maintained by the Society of Friends, but open to young people of both sexes of all denominations, aims to give a thorough practical education at the lowest possible cost. Its curriculum is precisely the same as the High School programme, but its students have many advantages not to be obtained in most High Schools, such as board in College building, a reading-room well supplied with the best current news and literature, comfortable study-rooms, parlours, bedrooms, etc., gymnasiums, playgrounds, etc. Especial attention is given to students reading for third and second-class certificates, and for matriculation in Arts, Law or Medicine. Students are required to take only those subjects they require for their respective examinations. A Commercial Form is established in which Commercial Arithmetic, Business Composition and Bookkeeping are thoroughly taught. Optional courses for those who do not yish to read for any examination. There is a Literary Society, and a course of lectures will be delivered during the winter by eminent educationists and others. A Bible class meets every Sunday afternoon, and on Sunday evenings lectures are given on conduct and morals. Only earnest students are invited to attend. There are no prizes, or scholarships, or rewards. Fees \$150 per annum, including board, washing, fuel, light, etc. No extras. For a copy of the "College Announcements," apply to
