## ARMS TO MEXICO GUARDED BY JAP WARSHIPS, CLAIM

### Government Reports Sent to Senate Committee for Investigation

### TWO VESSELS ANCHORED ALONGSIDE EACH OTHER

### Yakuma's Officers and Men Given Enthusiastic Reception, According to Statements

### FEDERAL TROOPS SAID TO BE WELL EQUIPPED

### Are Declared to Have More Machine Guns and Ammunition as Well as Better Clothing

SAN ANTONIO, Tex., Jan. 13.—Government reports that a recent big shipment of arms and ammunition to Mexico was escorted by a Japanese cruiser, have been sent here for the information of the senate committee investigating the Mexican situation.

That Mexico had received war supplies from Japan and that official and unofficial Mexico has lately been entertaining with a show of much enthusiasm officers and men from Japanese warship was known, but until today agents who are gathering information to be studied by the committee, had not learned of any direct connection between the two.

The report which is known at army headquarters here and which has been forwarded to the war department, is that the ship bearing the arms and ammunition reached San Antonio on December 24th. The Yakuma, a warship manned by 800 officers and men, anchored alongside. A part of the Yakuma's personnel were students from the Japanese military academy.

Anticipating the arrival of the warship there appeared at the port a committee representing the Mexican department of war and marine which invited the commanding officer and as many of his organization as could go, to visit Mexico City.

The cargo landed from the Japanese ship is that arranged for by Colonel Emilio Cirolos, who was detained for a short time by the port authorities at San Francisco when he returned to this country. His negotiations were facilitated by Manuel Perea Romero, then the Mexico minister in Tokyo.

To what extent Japanese arms and ammunition have been entering Mexico is unknown. Recent reports from Mexico indicate improvement in the equipment of federal troops, the forces now in the state of Chihuahua being much better supplied with machine guns than for some years. The various units operating in the north are said to have more ammunition than heretofore, their clothing is better and a marked improvement in morale has been reported.

## Low Salaries Drive School Teachers to Positions in Chorus

### Getting Three Times as Much for Singing and Wearing Tights as They Did for Instructing Pupils

CHICAGO, Jan. 13.—Low salaries are driving school teachers to the pink tights and bare legs of the chorus.

So William T. McCoy, chairman of teachers' committee seeking increased pay envelopes alleged today. "Interesting if true," commented Superintendent Mortenson of the Chicago schools.

Which made it necessary to grab the old lanterns and staff and go north in search of the truth.

Exhibit A—In the front row of a glittering spectacle advertised as a "national institution" is a dimple-cheeked young lady named Irene Bennett, who used to teach school at Gettysburg, Pa. She proved it by dragging a "certificate" out of her trunk.

"But never again," she averred. "Why I make \$50 a week for simply looking nice. Maybe I don't earn it, but I get it. And that is reverse English on the school teachers' problems."

She earns four times what she gets.

Exhibit B—In a burlesque show that is "backin' 'em in" here this week are three former school teachers, long past the flapper age, but who still shake a wicked spear. They introduced enough names, places, and miscellaneous data to prove their former occupations before any 12 good men and true.

"Teach school again?" queried one. "The very idea. Dearie, you don't look as stupid as you are. With 40 weeks solid and \$35 every Saturday night, why I simply couldn't afford it. Let somebody else worry about Willie's dirty neck and who was the man who discovered the equator."

Five more were discovered dancing and singing in Chicago hotels and cabarets without any trouble at all. "I'd like to teach," said one, "but I need more money. If they won't pay me for what I know and would rather pay me three times as much for singing four songs every night why I'm agreeable."

## Judgment is Reserved in a Dumping Case

In police court today Magistrate Campbell reserved judgment in the case against the Vineland Canning Co., charged with dumping refuse on a public highway.

Evidence was given that hundreds of cans of spoiled tomatoes, peaches, etc., were thrown into a gully, which formed part of the roadway.

The manager of the canning factory said he had received permission from Councillor Honsberger and Health Inspector Rittenhouse reported to the Board of Health that there was no offensive odor from the stuff.

## Linking the Ocean and Great Lakes

### Governments of United States and Canada Have Passed Orders Enabling Important Preliminaries to Proceed Early

OTTAWA, Jan. 13.—Governments of the United States and Canada have both passed orders approving of the proposed investigation by the International Joint Commission into the St. Lawrence Great Lakes ocean navigation and power scheme. The inquiry will commence at an early date and will be in two phases—engineering and economic. Engineers of the two countries will be appointed to interview all the departments that have interests, including, in Canada, the public works, railways and the Hydro of Ontario. While the engineering data is being secured the commission will investigate the economic phases.

### Nine Great Questions.

What has just been approved are the questions which will be submitted to the International Joint Commission. They number nine. The first question is as to the improvements necessary between Lake Ontario and Montreal to open the way for ocean going vessels and of what draught. Questions three to six are all on engineering problems and how best to meet them. Question seven asks whether the regulation of the Lake Ontario will increase the low water flow of the St. Lawrence below Montreal; while questions eight and nine are as to the industrial development and navigation traffic likely to result from the works.

### The Grand Purpose.

The purpose of the plan is to let the products of the Canadian and American West have an outlet by water to the seaboard and to enable ships of ocean going size to reach the head of the lakes. The essential to the undertaking is the removal of the obstructions between Lake Ontario and Montreal by joint action of the United States and Canada. Both, it is proposed, will share in the benefits of improved navigation and in the development of water powers.

### The Hydro Power Point.

In the later connection it is estimated that power now costing \$100 to generate by steam may readily be secured from hydraulic powers for \$25. At present about two million tons of traffic passes down the St. Lawrence per year, and it is estimated that this will soon be increased to ten millions.

### Meet at Duluth.

The inquiry by the Joint Commission into the economic phase of the question, such as the increased cost of water transportation, will likely begin at Duluth, but sittings will be held at all points in interest. By the recent appointment of Sir William Hearst the Canadian section is now complete.

WANTED—Draftsman familiar with laying out elevating and conveying machinery. Apply American Cyanamid Co., Niagara Falls, Ont.

## THE WEATHER

TORONTO, Jan. 13.—The disturbance which was moving over Manitoba yesterday morning is now centred over Lemiskaming, and light snow has fallen in Ontario. The weather continues mild in Southern Alberta, but it has turned colder again in the Province of Manitoba.

PROBS.—Fresh to strong west and northwest winds; snow flurries; colder tonight and on Wednesday.

## PHYSICIAN MURDERED MOTHER LAW

MARKESAN Wis., Jan. 13.—Dr. J. A. Freudenberg, a young physician of this town was arrested to-day charged with the murder of his mother-in-law, Mrs. Nottie Duffies. A coroner's jury formally charged Dr. Freudenberg with causing Mrs. Duffies' death by means of an injection of mustard in the bladder. The death under mysterious circumstances of other members of the Duffies family during the last five years is being investigated and plans have been made for the examination and examination of the body of Alfred Duffies, Mrs. Duffies second husband, who died two years ago.

Dr. Freudenberg refused to make a statement. Complain upon which warrants for the physician's arrest was issued, was made by Wilfred E. Perry, brother of Mrs. Duffies.

According to District Attorney Paul he received evidence tending to show that the physician might have brought about his mother-in-law's death, November 1, to prevent her marrying a third time.

Mrs. Duffies estate is valued at \$300,000. The physician's wife and her brother are said to be the only surviving members of the family.

Dr. Freudenberg came to Markesan five years ago, virtually penniless. He has a baby daughter, Jane. His wife is thirty-one years old. She says she will stand by her husband.

Miss Wanola Collins returned to-day to Joseph's College, Toronto.

New York funds eased off to 8 1/2 per cent.

## LAW MAKES VACCINATION OF SCHOOL CHILDREN COMPULSORY, BUT DOES NOT COMPEL TEACHERS TO GET VACCINATED

### THE CATCHING OF SMALLPOX

Dr. Curry Medical Health Officer said today that an error had occurred with reference to his remarks regarding catching smallpox as telegraphed to Toronto papers. He said he did not think a third person could take smallpox except through a scab from an infected person.

### Enquiry Opens Into Finances of 19th Regt.

General E. A. Cruickshank this morning opened an enquiry on behalf of the Militia Department into the finances of the 19th Regiment in connection with the duty as canal and frontier guard.

Owing to power being off The Journal is unable to give a detailed report of the proceedings, which are open to the public.

This morning's session was devoted largely to the item of field allowance the men were allowed on the purchase of an automobile which Col. Burleigh bought for the force.

### Effort to Seat Five Socialists At Albany Fails

Albany, Jan. 12.—An attempt to renege the five suspended Socialist members of the Assembly failed to-night. Assemblyman Charles D. Donohue of New York minority leader, moved reconsideration of the vote by which the suspension resolution was adopted, but the motion was lost 33 to 71.

Mr. Donohue first introduced a resolution calling upon the Assembly to allow the Socialists to resume their seats until such time as that body might by a proper vote sustain the contentions contained in the preamble of the Adler resolution by which they were barred from further proceedings last Wednesday.

Speaker Sweet ruled that the resolution was not in order, in that under the rules only by reconsideration of the vote on the Adler resolution could the question be brought before the House.

"The presumption has gone abroad throughout the entire nation," Mr. Donohue said "that the men who have been indicted by a resolution presented by the majority leader have had an opportunity to be heard. Their constituencies are deprived of representation here, and I believe they ought to be represented."

"I condemn Socialist principles and propaganda. We of the City of New York know how insidious and invidious it is, but if a mistake has been made in denying these men seats in this body every member ought to be enough of a man to stand up and say so. When the members of my party reached Albany this evening they thought the only safe, sane and honorable thing to do was to admit that they had been hasty in denying five duly accredited members seats in this body."

### DIED.

RYDE—At St. Catharines on Monday evening, January 12, 1920, Herbert John youngest son of Mr. and Mrs. Edward Ryde, aged 30 years. A military funeral will take place at 2.30 o'clock on Wednesday afternoon, January 14th, from the residence of his brother-in-law A. H. Wallace, No. 5, Centre street. Interment in Victoria Lawn cemetery.

### Dr. Curry, Medical Health Officer, Sets at Rest Reports That Smallpox Cases Originated at One Dance—Says He Cannot Close Dance Halls—Council Names Board of Health.

When the City Council met last night at 5 o'clock, the bylaw to appoint three members of the Board of Health was taken up. The names of W. P. Holmes, D. W. Eagle and C. M. Gibson were submitted.

Dr. Curry, Medical Health Officer, was present and answered criticism of action regarding vaccination by last year's Board of Health.

Dr. Curry stated that wherever there is an outbreak of smallpox, the City Council shall require that there be compulsory vaccination of all who have not been vaccinated within seven years. He had asked this but the City Council had voted down.

The Provincial Board of Health had recommended strongly that he put the ordinance in force. As far as the school children is concerned he can order them vaccinated and he had done so and will continue to do so.

Ald. Dakers said he objected to the unfair manner of carrying the thing on. He compels the school children to be vaccinated but does not close the dance halls.

Dr. Curry retorted that he didn't think there was any danger from the dance halls. There can only be contagion where some one with smallpox goes to the dance. In any event he has no power to close the dance hall. Neither has he the power to order the dance halls closed.

The City Solicitor said Dr. Curry was quite right about this.

Mayor Lovelace said the discussion was a little beside the question. The by-law was simply to name members of the Board of Health. If the old members are not satisfactory, appoint some one else.

Ald. Murphy said he never knew of any one catching smallpox at a dance.

"Have you, Dr. Curry?" he asked. "No," was the reply.

The bylaw was carried Ald. Dakers alone voting no.

Ald. McLean said it was worthy of consideration, whether the Council should order compulsory vaccination.

Ald. Riffer, declared there was a

street report that every case of smallpox was traceable to one dance hall in the city.

Dr. Curry said he wished to set that report at rest once and for all. Only one case came from the Jessie Warren dance. He had made every investigation and was thoroughly convinced.

Asked by Ald. Avery as to the compulsory vaccination of teachers Solicitor Cummings said he was unable to give an opinion but thought some joint action by the Board of Health and Board of Education might be taken.

Dr. Curry said practically all the teachers have been vaccinated, many of them recently, but he could not see what better action could be taken than for the City Council to order general vaccination. Then every body is included, children, teachers—everybody.

Then it's up to the Board of Education," said Ald. McLean.

A communication was read from the fire department asking that a deputation from the firemen be allowed to wait on the Council with reference to increase in wages, suggesting \$110 a year for first year men; \$120 second and \$130 for third year men. It was signed by the Secretary Treasurer, Walter T. Andrews, City Fire Fighters Union No. 206.

Ald. Avery explained that the union had been formed some weeks ago.

Ald. Ross suggested the Council hear the deputation at its regular meeting. He moved this seconded by Ald. Dakers.

Ald. Veale wanted to know if the Council had ever treated with a firemen's union.

Ald. Dakers reminded him that this is the first union the firemen have had.

Ald. Avery said third year firemen in Brantford get \$4.60 a day. In St. Catharines third year firemen get \$2.98, second year \$2.79 and first year \$2.63.

Objection was raised by Ald. Beattie to discussing the question until the firemen's deputation is heard.

The resolution to hear the deputation at the next meeting was passed.

### Titanic Survivor Awaiting Clue to Disclose Identity

### Mind of Physician Found in New Jersey Jail Blank Since Ill-fated Liner Went Down.

LAMBERTVILLE, N. J., Jan. 13.

—One of the strangest cases of forgotten identity ever recorded is that of "Doctor X" who, at the home of the Rev. Dr. J. T. Bensley here, awaits the clue which will disclose to him his name and history.

The mind of "Dr. X" is blank to everything which has happened since the sinking of the Titanic, an event which he remembers so vividly that it is assumed he was one of the persons who escaped from the ill-fated liner.

He was taken from the local jail by the Rev. Bensley, December 23. Then he was a babbling idiot unable to furnish the slightest clue concerning his appearance here.

A chance remark about some phase of anatomy awakened hidden memories and disclosed the fact that he had a knowledge of anatomy and the science of medicine far more profound than that possessed by the average practitioner. Similarly a piece played on the piano served to recall a considerable knowledge of music.

Today, were it not for his forgotten identity, he would be normal. He awaits the clue which will restore his full memory to him.

"Dr. X" summed up his predicament:

"I should say," he said, "that I am English, but there is a strong presumption that I have spent con-

siderable time in Mississippi."

He was picked up by a truck driver in the outskirts of the town here. At the time he was waatching a sunset, he said then. The truck driver carried him into town, where he eventually found himself in the jail. After several days there, Dr. Bensley took him out.

Dr. Bensley, who was born in England, discovered that "Dr. X" was an Englishman and a graduate of Oxford because of the latter's use of much slang which is peculiar to Oxford. He is apparently from 50 to 60 years old.

### TEA IS ADVANCING.

### MARKET IS STRONG

WINNIPEG.—TEAS.—The higher rate of exchange on the rupee during the past two weeks has made India and Ceylon teas not only very much stronger in market tone, but has actually shown a considerable advance for immediate purchase.

The India market is about closing, and unless large quantities continue to come down it will be at least four months before the market reopens. It was stated here recently that dollar a lb. tea was in sight. It is now very much nearer and it will only be a matter of a few weeks at most, with present sharp advances, before the packers of package tea will be compelled to mark their packages with the dollar sign.

KEEP THE BOWELS REGULAR AND YOU'LL BE HEALTHY

For a Quarter You Can Assist Them Wonderfully With Dr. Hamilton's Pills

You'll never have health if the bowels are inactive. By keeping them right you ensure a clean, wholesome body. Why wait for constipation to clog up and sicken the whole system—use Dr. Hamilton's Pills—they are the finest, mildest laxative known; put strength into the muscles of the stomach and never injure the delicate lining of the bowels. They get you in the habit of performing a certain function at a certain time, and thereby restore normal conditions. Dr. Hamilton's Pills are best because they help Nature help herself, and thereby keep the stomach strong, digestion good, blood pure, complexion clean, spirits bright and happy. Price 25c.

GAUNTLET THROWN DOWN TO PRES. WILSON UNDER FREAK LAW

PIERRE, S. D., Jan. 12.—Under the primary law in this state, if an independent candidate for president issues a challenge to a regular nominee for a joint debate, failure on the part of the challenged candidate to meet him in at least one joint debate in this state bars him from the primary election. Under this provision James O. Gerard, independent candidate, has challenged Woodrow Wilson.

SMALL CHILD ONLY SURVIVED IN THE VILLAGE OF SANTITO

MEXICO CITY, Jan. 12.—One small child is said to be the only survivor of all the inhabitants of the village of Santito, State of Puebla, which was overwhelmed by poisonous gases. Indian refugees arriving at Huatusco from the San Miguel region are unable to give any details regarding the loss of lives there, but say hundreds of persons were killed. Six hundred met death at Barraca Grande. Government despatches, which were filed after the confusion had ended, give estimates of 2000 dead.

MONTREAL LABOR VEXED Hints of a General Strike in Contemplation Appear.

MONTREAL, Jan. 13.—Indications of a general strike in this city as a result of the discharge of the employees of the civic waterworks plant who struck for higher wages were manifested at a meeting of the Trades and Labor Council Sunday. An appeal to the Lieutenant Governor to investigate the situation is suggested, and a resolution places favors of the consideration of a complete cessation of all work of all the organized labor in Montreal.

LOOK! CHICAGO PUTS IT—NEY TAX ON FREE BATHS

CHICAGO, Jan. 12.—The high cost of living has finally reached free bathing. The city council license committee, which is extending the license system to make up for lost liquor revenues, has ordered a five cent tax on baths at the municipal free bath-houses. The tax will cover soap and towels.

RESUMING RELATIONS Lord Kilmarnock Proceeds to Berlin to Represent Britain.

LONDON, Jan. 13.—Lord Kilmarnock left London for Berlin yesterday morning for Berlin to assume his duties of British Diplomatic representative at the German capital. His departure marks an important step in the reestablishment of diplomatic relations between Great Britain and Germany, which will be effected immediately.

ENRICHING THE SOIL Some Hints Upon the Wise Use of Artificial Fertilizers.

Fuller Use of These Fertilizers Likely — Their Application Must Be Handled Intelligently — Study Your Own Soil Closely — General Farm Hints.

THE use of artificial fertilizers in this country is bound to increase. These materials are, however, expensive and it is not surprising that they should make an effort to inform themselves regarding the conditions under which they will give the best results. Too many people are using fertilizers without fully realizing that they carry plants food and that the real object in applying them is to supply needed available food for the plant.

To intelligently make use of these materials there are three points to be considered. First, the needs of the soil, second, the needs of the plant, and, third, the nature of the materials to be applied. It should always be kept in mind that the soil carries immense amounts of plant food, but that only a small quantity of this is rendered available during the growing season. The acids, formed by the decay of the organic matter in the soil is the chief natural agency operating to bring the big store of mineral matter into a form that may be taken up by the plant. The organic matter is also the source of nitrogen to the plant, and it increases the water-holding capacity of the soil as well as improves its physical condition. Consequently every effort ought to be made to maintain or increase the amount of decaying organic matter. Otherwise the crop will be grown largely from the added fertilizers and not from the plant food of the soil. It is for this reason that it is sometimes stated that if you commence to use fertilizers you must continue their use.

However, no matter how much we try to render available the immense stores of food in the soil, we cannot bring it about fast enough to supply the needs, especially of heavy feeding crops, such as the maize, turkeys and garden crops. Hence the need of manures. Stable manure cannot always be got in sufficient quantities to fulfill requirements, nor does it always furnish the needed plant food in the right proportions to develop the plant properly. To supplement the manure is the place of fertilizers.

Stable manure is essentially a nitrogenous fertilizer. Hence if used in large quantities it will force big leaf and stem growth and retard maturity. Consequently, a plentiful supply of stable manure would help the growth of lettuce, spinach, mangold, etc.; but it would not be so satisfactory for the tomato, sugar beet, or other crops that mature by bringing to maturity. What these plants need is some stable manure and some mineral fertilizer to force early maturity. On the other hand, plants like lettuce, spinach, etc. are grown for their leaf and stem and maturity is not a necessary part, hence a soluble form of nitrogenous fertilizers may even be added after heavy applications of manure with good results. The manufacturer of uric fertilizers seeks to prepare special mixtures that will be suitable for different crops, but the farmer or gardener should strive to inform himself regarding his soil and crop needs that he may be able to select the form of fertilizer that will bring about the growth desired, and he should study the fertilizer materials available that he may buy intelligently and economically. — R. Harcourt, O. A. College, Guelph.

General Farm Hints.

Put a plant or two of rhubarb in the cellar which should be kept at a temperature of 50 to 70 degrees in sand, which is kept moist and in the dark so that it will produce stems and no leaves. Do some reading on gardening work for this year, but more especially think over the failures of the last.

If the roads are in good shape, get your manure out and spread. A dressing of 8 to 10 loads per acre will keep the orchard in condition. If buying in the larger cities, order early as the car situation is serious enough to delay shipments.

Light pruning of apple orchards, taking out the small wood with the long-handled pruners, may be carried out during bright weather. Grape trimming may also be looked after when the weather is suitable. Before feeding or selling any grain crops make good provision for your own seed supply.

Finish cutting out of black knot of cherry and plum. Inspect and oil windmill before winter.

If weather is fine and warm may continue to spray peach trees and give first application to trees badly infested with San Jose scale. On rough days during this and succeeding months it is well to go over all packages, barrels, boxes, etc., mending broken carriers, handling baskets.

Be sure pumps are in good condition. It is not too early to consider the question of getting help for the big crop which will have to be raised in 1920. Depreciation of Machinery. Did you ever think of the relation of the farmer's bank account to the roof shed? Machinery depreciates faster in the weather than it does in use. The time saved by having a rust-free implement will soon pay for the shed. ADVERTISE IN THE JOURNAL

Lloyd Prevost May be Saved By New Belief

MOUNT CLEMENS, Mich., Jan. 13.—A new trial, leading directly away from Lloyd Prevost, now in the McComb county jail, awaiting trial, charged with the murder of J. Stanley Brown, into the Detroit underworld, has been discovered. The shrewdest and most experienced private investigators obtainable are combing the lower class cafes and saloons and the rendezvous of taxi drivers and professional gunmen in Detroit, in an effort to fasten the slaying of the eccentric rich Mount Clemens youth on two suspects of the case, not mentioned before.

This was intimated by the attorneys for the defense, when they declared that some startling new evidence will be revealed at the preliminary examination of their client, which will occur some time early next week. "This evidence, even in its present state of developments, tends to clear Lloyd Prevost of the charge of murder laid against him," said one of Prevost's attorneys. "It involves others who, we believe, carried through the murder not for money, primarily, but for pecuniary gain."

Prevost's legal advisors further asserted that evidence which had been turned up by special private investigators, points to the probability that the actual slayers of J. Stanley Brown were professional gunmen inspired by robbery or monetary payment from their employer. The attorney refused to amplify his statements or give any hint of the identity of the new suspects.

THANKS TO START IN DAIRY FARMING

Vermillion, Alberta, Soldier Settler, Expresses Appreciation of Government Aid.

OTTAWA, Ont., Jan. 12.—"I like the place fine and I have got a good start in life, especially in the milk business when butter fat is 70c a pound," writes Joe Lewiston, of Vermillion, Alberta, to the District Agriculturalist of the Soldier Settlement Board of Canada, at Edmonton.

"I paid \$200 per acre for this quarter and I know it to be worth \$30, and it is so close to town, especially in the milk business when butter fat is 70c a pound," writes Joe Lewiston, of Vermillion, Alberta, to the District Agriculturalist of the Soldier Settlement Board of Canada, at Edmonton.

"I paid \$200 an acre for this quarter and I know it to be worth \$30, and it is so close to town, it is an ideal place for the dairy business."

"I wish to thank you and ours in the Soldier Settlement Board for the way in which you have handled our business in my case. You hear lots of kicks, but, when we sit down and think, we realize what there is to go through at your end of it. Everything else is going fine here and was glad to have a real start in life."

FOUR SAY THEY ROUTED 100

DUBLIN, Jan. 12.—Police barracks six miles from the village of Tuam, Galway county, were attacked Thursday evening by about 100 men, according to reports reaching this city. They fired repeated rifle volleys which rattled the doors and smashed the windows. Two or three bombs were thrown, one wall being demolished and a police sergeant being slightly wounded. The occupants of the barracks returned the fire. Four constables heard the explosions of the bombs and hastened to the scene. When they arrived they attacked the besiegers so vigorously that they abandoned the field.

DR. DEVAN'S FEMALE PILLS

Light purging of apple orchards, taking out the small wood with the long-handled pruners, may be carried out during bright weather. Grape trimming may also be looked after when the weather is suitable. Before feeding or selling any grain crops make good provision for your own seed supply.

CURING LYMPHANGITIS The "Monday Morning Disease" Affecting Horses.

Symptoms Described, and a Course of Treatment Suggested for Alleviating and Curing the Trouble—Working Over Asparagus and Rhubarb Beds.

LYMPHANGITIS, commonly called weed, a shot of grease, or Monday morning disease, is a common ailment in horses. Some horses are predisposed to the trouble and suffer after being exposed to slight exciting causes.

It occurs in horses that are accustomed to regular work and high feeding, when such are given a rest for a day or longer and in the meantime receive their regular ration of grain, hence the name "Monday morning disease," it frequently being noticed on Monday morning in work horses that have stood idle and been well fed since the Saturday evening preceding.

It consists in inflammation of the lymphatic glands, usually those of the hind limb or limbs, but it is not uncommon for the fore limbs to be the seat.

Symptoms.—The first symptoms usually are rigors (shivering) followed in some cases, colicky temperament; but as those symptoms usually occur at night they are not often noticed. The first symptoms usually noticed are well marked soreness and lameness, usually of a hind limb. From reasons not understood the right hind limb is more frequently involved than the near one. Pressure upon the inner surface of the limb from the abdomen or mamma downwards reveals well marked soreness, and at first a beaded condition to the touch. If a fore leg is the seat this condition will exist on the inner surface of the fore arm. There is usually well marked increase in temperature, a full, rapid pulse and often more or less well marked labored breathing. Appetite more or less impaired, and in some cases colicky pains are noticed. The swelling of the parts usually increases rapidly and the beaded condition disappears, and there is usually a decrease in soreness and lameness. Exercise reduces the swelling and lameness, but they reappear during the night, and as each time this occurs there is a tendency to organization of some of the exudate which may result in a chronic big leg, hence it is not wise to exercise or work until the acute lameness has disappeared.

Treatment.—If colicky pains be well marked, give a colic cure, as opium or each of lactanum, sweet spirits of nitre and tincture of belladonna in a pint of water. Follow up with a brisk purgative of 7 to 10 drams aloes (according to size of patient) and two drams ginger. Give the purgative at first if colicky pains are not well marked. Follow up with four drams nitrate of potassium twice daily for two days. Keep the patient comfortable and quiet, free from drafts and bathe the affected leg frequently with hot water and after bathing rub well with a stimulant liniment, such as made of 2 oz. oil of turpentine, 1 oz. tincture of iodine, 1/2 oz. gum camphor, 6 oz. alcohol, and water to make a pint. Feed bran only until purgation commences, then feed reasonable quantities of hay but no grain. Continue treatment until the acute soreness and lameness have passed, then give regular work or exercise. The swelling will reappear at night for a few days. Prevention consists in either materially reducing the grain ration on days that the horse is not working, or seeing that he gets exercise in some way.

Repeated attacks usually result in a chronic big leg, called elephantiasis, which is incurable.—J. H. R., Ontario Agricultural College, Guelph.

Working Over Asparagus and Rhubarb Beds.

The handling of asparagus and rhubarb beds in the spring of the year is largely dependent on the situation of them and the time that the owner has at his disposal both in the fall and spring. Where properly handled the asparagus beds in the fall of the year should have had all tops removed and burned and the soil ploughed over the top of the row so that a furrow would be left to remove the water.

In the spring of the year the asparagus bed, if ploughed in the fall, should be ploughed back and then given a thorough disking so that the soil would warm up quickly, especially around the crown of the plant. After this cultivation should be practiced until the 1st of July when cutting should cease and the bed receive a heavy coating of good manure and a considerable quantity of commercial fertilizer.

Rhubarb beds in the fall of the year should be manured heavily with well-rotted manure after the tops have been removed. Rhubarb beds in the spring of the year are generally given a cultivation and much of the rougher manure carried from the roots of the plants and the crown. This permits the warming up of the soil and consequent early growth.—A. H. McLennan, Vegetable Specialist.

Clover Seed and Hay Crop.

A crop of seed and of hay can be made from the second crop of clover just as well as any other crop, according to the experience of a Pennsylvania farmer. In his practice the crop is cut when most of the heads are filled and brown. It is then cured in the usual way for hay and when good and dry the hullers will get out all the seed as well as if the stalks were dead and weatherbeaten. The resulting hay, while not of the best quality, is very good and the cattle will eat it even to the last bit.

ADVERTISE IN THE JOURNAL

Tieper Trial Is On Next Month

Buffalo, Jan. 12.—The second trial of John Edward Tieper will be held in the early part of February, according to a statement made by District Attorney Guy B. Moore yesterday, following a conference with R. R. O'Malley, counsel for the accused man.

Tieper was found guilty of murder, second degree, by a jury before Justice Wheeler in 1917 in connection with the killing of his mother, Agnes Tieper, on the Orchard Park road about four years ago. He was sentenced to Attaura for "not less than twenty years, nor more than life." The appellate division at Rochester recently reversed the conviction and granted Tieper a new trial.

Mr. Moore said that Mr. O'Malley assured him he was ready for trial, adding: "We have not agreed upon the exact date, but it will be as early as in February as possible."

Justice Cole will preside at the February term of Criminal Court.

CHANGING conditions have given the Dominion a new electorate—the women of Canada.

Canadian womanhood, to take full advantage of its prerogatives, to take its proper place in the management of Canadian affairs, must keep informed on the questions of the hour—must have the knowledge of events that will be the foundation of definite opinions on public questions.

Women Must Read the Daily Newspaper

The extension of the franchise to women was the fulfillment of a policy consistently advocated by The Globe in season and out of season.

But this is only the beginning. Womanhood must serve as well as vote. They must advocate reforms that are badly needed.

There must be legislation for the aged, as well as for the young, pensions for mothers, educational improvements, unemployment and sickness insurance.

These are some of the questions on which the womanhood of Canada will now have to take sides. Therefore, in this respect, The Globe has a special appeal for progressive, right thinking Canadian women.

The Globe is not a political organ. It never has submitted to outside dictation. It supports progressive liberalism, because it believes that true liberalism draws its inspiration from the needs of the people.

Its daily Women's Department and Thursday's Women's Section have a special interest for womanhood in the home. It was the first Toronto paper to establish a women's department, edited for all Canadian homemakers.

The Globe is first and last a Great Family Newspaper. It serves the women in the home, in public life, in business, in the professions and in industry.

What The Globe has been in the past is its guarantee of what it will be in the future. The aim of its publishers and its Editor is to take advantage of the tremendous facilities at its disposal—to make it even more worthy of a place in every Canadian home.

**Making a purely vegetable Medicine**  
**1875—1919**  
 In 1875, Lydia E. Pinkham of Lynn, Mass., gathered and dried the roots and herbs which she used in the now famous Lydia E. Pinkham's Vegetable Compound, from the fields and forests, then steeped them on her kitchen stove and filled a few bottles at a time, to alleviate the suffering of her women friends, neighbors and acquaintances, and the success of this medicine was unparalleled.  
**After 44 Years**  
 These illustrations show the present method by which vast quantities of this well-known remedy are produced and from exactly the same kind of roots and herbs used by Mrs. Pinkham in the beginning.

**First**—The various herbs used are of the finest quality, and gathered at the time their medicinal strength is the highest.  
**Second**—After the herbs are properly ground and mixed, the medicinal properties are extracted by soaking in large stone jars, covered.  
**Third**—Then the extract is drained through percolators, acting somewhat like a coffee percolator.  
**Fourth**—To insure a thoroughly pure medicine, it is carefully pasteurized by heat in special apparatus, and bottled hot.  
 Throughout the entire process, from the crude herb to the finished medicine in bottle, cleanliness and exactness are the watch-words.

**The Reliability of Testimonials Guaranteed**  
 The testimonials published by the Lydia E. Pinkham Medicine Company come to them unsolicited. Never knowingly have they published an untruthful letter, never is a letter published without the written consent of the writer. The reason that thousands of women from all parts of the country write such grateful letters is that Lydia E. Pinkham's Vegetable Compound has brought health and happiness into their lives, once burdened with pain and illness. It is easy to realize how these poor, suffering women feel when restored to health; and their keen desire to help other women who are suffering as they did.

**Ailing Women Should Try**

This great hand-written Bible is the largest volume in the world. It is being compiled of written testimonials from 12,000 contributors, from the highest to the lowest rank. The King and Queen of England are to contribute. The purpose is to concentrate attention afresh upon the Bible. It will be exhibited in Canada, America and Australia. The size of the Bible is 5 feet 2 inches by 3 feet 6 inches.

**Farm and Country Life in Canada**

**F**ARMING is a basic industry in Canada. From the first days of its publication, The Globe has always strongly advocated the development of scientific agriculture.

When the breeding of pure-bred stock in Canada was first deemed necessary, The Globe, by example and precept, showed what could be done.

The late George Brown was a leader in experiment. At Bow Park Farm, near Brantford, he bred from imported cattle so as to place pure-bred stock at the disposal of his neighbors.

From those days to the present, the furthering of the interests of the Farm and Country Life of Canada has been an important feature of The Globe.

The Weekly Farm Department has always been a source of inspiration to the farmers to improve their knowledge of agriculture.

The Globe believes that one of the best ways of teaching a man is to show him what his neighbor is doing. This is the policy The Globe adopts in its Farm Department. Two members of The Globe staff devote their whole time to the collection of material for this Department and in so doing spend several days each week in the country. They visit good farms all over Ontario and attend Fairs and Conventions. They report all developments in rural life as reflected in these gatherings as well as in the personal experience of successful farmers. Through its "Farm and Country Life" Section, The Globe has identified itself with every movement calculated to improve the conditions under which farmers and their families do their daily work.

This is the service thousands of Farmers in Ontario and elsewhere receive and appreciate, and one of the reasons why many thousands of them read The Globe.

But that is not all. Keen competition, and the continued fluctuation of prices make it necessary for the farmer and his family to keep in touch with current produce and other commodity prices even from day to day.

The Globe has a well-merited reputation for accuracy, because in nothing is it more dependable than in its market reports. All prices quoted in The Globe are verified by the highest authorities SIX TIMES EVERY WEEK.

But besides all this, The Globe is a Great Family Newspaper. It is as much a necessity and convenience in the Farm Home as anywhere else. The coming of the daily paper to the Farm Home ranks in importance with the rural mail delivery, the telephone, electricity and the good road.

It broadens the outlook of those who live on the farm. It keeps them informed on current events the world over. Not only does The Globe do this, but it serves the agriculturists of Canada in a peculiar and appropriate way.

The service The Globe has already rendered three generations of Farm Life is a guarantee of what it will do in the days to come.

*This is why The Globe should have a place in every Farm Home in Ontario.*

**Children Cry for Fletcher's**  
**CASTORIA**

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are especially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

**What is CASTORIA?**  
Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its base is pure Glycerine. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind-Colic and Diarrhoea; relaying Feverishness arising therefrom; and by regulating the Stomach and Bowels, aids the assimilation of Food, giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

**Hospital for Sick Children**  
TORONTO

Upkeep of Big Charity Requires Fifty Cents a Minute.  
Dear Mr. Editor:  
The 44th annual report of the Hospital for Sick Children, Toronto, shows a notable advance in every department of its service to the suffering and crippled youngsters of this province. The ward accommodation has been taxed to its capacity, and the summer annex, the Lakeside Home, was opened for the first time since the outbreak of war.

The daily average of cot patients has increased during the year from 182 to 233, including children from practically every county in Ontario. Even had the cost of supplies and labor remained stationary, the substantial increase in the number of patients would alone account for the addition to the charity's debt, which at the close of the fiscal year was \$109,000. This debt has become an embarrassing burden. Further increase must threaten impairment of an enviable efficiency.

The Hospital is in the forefront of all institutions upon this continent devoted to the care of sick children. Its cost \$335,399, including children from 122 to 143, are cared for at the service of the children of Ontario all the resources of medical science, but in addition, provides for a training school for 120 nurses and for unsurpassed clinical facilities for the University students who are preparing to engage in their profession throughout the province.

The income which must be forthcoming to finance this absolutely essential work figures out at seven hundred dollars a day; and, as there is no endowment fund, all but a fraction of this amount has to be derived from individual benevolence. Therefore the Trustees are making a Christmas appeal to every lover of children to foot the bills for some period of time, no matter how short it may be. A minute of mercy costs fifty cents.

For churches, societies, lodges, etc., who have more ample funds wherewith to assist the youngsters to a fair start in life, the making of cot is suggested. A number of memorial-cots have been thus dedicated in honor of the overseas service of fellow-members. This privilege is extended in recognition of gifts of \$2000 in recognition of or \$500 to the Lakeside Home, which can be paid in annual installments if so desired.

Literature, illustrative of all branches of the past year's work, together with any other information desired, will be gladly furnished on application to the Secretary, the Hospital for Sick Children, College Street, Toronto. Contributions should also be addressed to the secretary.

IRVING E. ROBERTSON,  
Chairman of Appeal Committee.  
Two kinds of medals are to be awarded to men who served in the Canadian navy during the war.

**SAGE TEA DANDY TO DARKEN HAIR**

It's Grandmother's Recipe to Bring Back Color and Lustre to Hair  
You can turn gray, faded hair beautifully dark and lustrous almost overnight if you'll get a bottle of Wyeth's Sage and Sulphur Compound at any drug store. Millions of bottles of this old famous Sage Tea Recipe, improved by the addition of other ingredients, are sold annually because it darkens the hair so naturally and evenly that no one can tell it has been applied.

Those whose hair is turning gray or becoming faded have a surprise awaiting them because after one or two applications the gray hair vanishes and your locks become luxuriantly dark and beautiful.

This is the age of youth. Gray-haired, unattractive folks aren't wanted around; so get busy with Wyeth's Sage and Sulphur Compound tonight and you'll be delighted with your dark, handsome hair and your youthful appearance within a few days.

**DOCTOR WARD, The Specialist**

SPECIALIST IN THE TREATMENT OF NERVOUS CONDITIONS, NERVE EXHAUSTION, BACKACHE, LUMBAGO, RHEUMATISM, STOMACH AND LIVER TROUBLES, ACNE, SKIN DISEASES, CATARRH, ASTHMA, RECTAL TROUBLES, PILES, FISTULA AND BLOOD CONDITIONS. The knowledge gained from many years' experience in treating diseases just like yours is of much benefit to you and assures the ailing man of prompt relief. When a man knows that he is again feeling well—that he is rid of his ailment—he feels that a heavy load has been lifted from his shoulders. I give every patient the benefit of the knowledge acquired through the long experience of a graduated, licensed and registered specialist, in order to bring about the most satisfactory results in the shortest possible time.

**NERVE EXHAUSTION**  
A CONDITION AFFECTING MANY MEN—THE GREAT AMERICAN DISEASE—IT IS BROUGHT ON BY OUR MANNER OF LIVING—OUR WORRY AND HURRY—AMERICANS EXHAUST MORE NERVOUS ENERGY THAN ANY OTHER RACE OF PEOPLE.

There are a great many men who need treatment for their nervous system. These men do not know what is the reason they don't feel right—why they can't work like they used to—why they tire so easily and why they are irritable, nervous, despondent, weak, pale and lack ambition. These conditions require the expert knowledge and treatment of a specialist who has had many years' experience in just such ailments. A specialist learns by experience to know just the right treatment at the right time so that the patient can be dismissed at the earliest possible time. Men affected with nervous exhaustion have no endurance—no ambition—everything they attempt is an effort. Life to them appears as a long, gloomy future. Their appetite is poor and variable—they become irritable, cross and discouraged. They have pains and aches in various parts of the body and there is often indigestion and pains in the stomach. Sleepless, wakeful and restless nights follow.

**RHEUMATIC AILMENTS**  
SCIATICA AND OTHER FORMS OF RHEUMATISM, LUMBAGO, PAINS IN BACK, SWELLING, HOARSENESS, PAINFUL CONDITIONS IN ANY PART OF THE BODY—INFLAMED AND SWOLLEN JOINTS OF LEGS AND ARMS—MANY OTHER SYMPTOMS.  
Hundreds of men are suffering with some form of Rheumatism. Many of these men go from day to day suffering untold agonies thinking they cannot be cured. They have tried liniments, rubbing, massage, salts and other treatments without experiencing any relief, and they are now going through life thinking they are martyrs to that burden called Rheumatism. If these men could only know how easy it is to get rid of many rheumatic conditions I know they would not suffer another single day. Then all sufferers of rheumatism would be strong and healthy if they could get rid of the condition. Rheumatic patients are nearly all strong and robust before being attacked by this ailment, and therefore it is so hard for the man to understand why he should suffer the agonies of such a condition. When a man gets rid of such a condition he feels that a heavy burden has been lifted from his life, and he starts right out to make up for lost time both in money and pleasure. When a man comes to my office suffering with the above condition he is given a most careful examination, and he is given treatment that he feels is giving him great benefit.

**FARM LOANS FOR SOLDIERS**

**Agricultural Training For Soldier Settlers**

A SOLDIER is entitled to the benefits of the Soldier Settlement Act if he can satisfy the Agricultural Qualification Committee in his district that—  
(a) He has performed the required military service;  
(b) He is sincere in his intention to make farming his permanent occupation;  
(c) He is physically capable and is fitted in general to make a success of the farming business.  
If he is otherwise qualified, but has not had sufficient practical agricultural experience, the Committee may recommend that he be given agricultural training. A generous scale of allowances for soldiers in training has been adopted.

**Training Centres For Soldier Settlers**  
The applicant who is recommended for instruction in agriculture may first be sent to a Training Centre, specially operated for the purpose, where he will learn, by practical experience, how to handle and feed horses and other live stock; milking; the operation of farm machinery, ploughing, etc.; general farm building work; farm blacksmithing; the different kinds of soil and rotation of crops; the selection and judging of live stock and the marketing of farm products. Short lectures on the business management of a farm will be given.

**With A Selected Farmer**  
After the course at the Training Centre, the length of which depends on the progress of the individual but will not exceed three months, the man is placed with a carefully selected farmer in the district in which he intends to settle, to complete his training. During this period (not exceeding one year), the soldier is visited from time to time by representatives of the Soldier Settlement Board, who check his progress and recommend when he is considered qualified to take up a farm of his own.

It will be evident that by this system of preliminary training the soldier settler will gain a thorough practical knowledge of farming without expense; will learn to appreciate the responsibility involved in the venture, and at the same time gain a clear conception of just what farm life means.

**On His Own Farm**  
When a settler is deemed qualified by the Agricultural Qualification Committee, the Board will assist him to become established on a farm of his own, and will, through its Agricultural Advisers, continue to co-operate with him in his work, thereby ensuring his success and consequent ability to discharge his obligations and become permanently established.

**Fair To Both**  
The procedure outlined not only gives the soldier an opportunity of first becoming familiar with his environment and of acquiring the experience requisite to success, but ensures adding to the nation's fundamental industry only competent and satisfied producers.

Detailed information regarding the provisions of the Soldier Settlement Act and further particulars regarding agricultural training may be obtained from the Provincial Superintendent, 32 Adelaide Street East, Toronto, Ont.

**BUILDING AN ICEHOUSE**  
Type for Use on the Average Farm.

Every Ontario farmer produces Milk—and most of the farmers do—should know a quantity of ice each year to make it easier to cool the milk down after evening milking, and to keep it in such short periods,—week-end, for example,—as he may require before delivering it at the factory or other point of destination. In order to preserve the factory some form of ice-house is necessary. The purpose of this article is to describe in a simple type of ice-house which is a good ice-house. An ice-house does not necessarily have to be expensive, but certain things in regard to its construction are to be kept well. The emphasis first and they are the most important. The construction of ice from sun's rays, if the house is either national, free circulation of the top, air-tight foundation, a good quality of dry sawed lumber, and the mass of ice, the thickness of the ice, if the ice can be secured in a room under a shed, or a lean-to side of a building, and unless one has a good plan for building a more permanent structure, the latter of convenience is often a factor in this case, and an ice-house I am about to describe is a good illustration of this. Only once have I seen it, but there is no reason why it should not be used generally. This particular type consists of a structure of wood at one end of the house which has the structure of wood at the other end, the amount of ice required, probably a building 15 feet square and 12 feet high would be enough for most farmers' needs. The structure and at the side of the house to the barn, or rather the wall, is built a concrete one about 6 feet square and 6 or 8 feet high. A door in the basement admits one to it. In the winter the door is closed, but for letting in the cold air for the ice which is packed closely together and at the side of the structure and the side of the top of the storage and the house is a narrow passage-way or allowing the foul or used air to escape. The ice is packed in this passage-way. In this case the farmer has his own containing cream separator, and this storage and water is a good thing to have. It is a good thing to have in the winter, such as the meal, are also stored in it, but of course only for a short time. Hence much of the ice is saved as well as is a good thing. The building is a good, the studding being both sides. It would be advisable to have the space between the studding with planer shaving or quality sawdust. The roof is covered with shingles. The gables left somewhat open for ventilation. Plenty of sawdust is packed in next to the walls. A good depth over the top, water is used between the cakes. If a few cakes of ice are used for household use they are easily taken out of the sawdust. The ice-house or the sawdust is convenient. It will be seen, therefore, that an ice-house does double duty, namely, providing a good storage room, cooled by the structure and the side of the house for various incidental use in summer-time. In a case of this sort there would not be much to be said for the ice-house. The refrigerator and the ice-house would take care of the cooling and preserving of the food. Following this arrangement is a good thing to have in the winter. In many cases the farmer has a horse in his barn. I have measured in recommending it to the farmer in general.—R. R. Graham, Colke, O., ed.

**Still a Place for the Good Horse**  
Horses have not been used as much as in the past. In Canada they were broken out and have increased in number since 1914. However, good heavy draft horse is still a valuable animal. Many of the old Country men, however, are a weakening in the Canadian horse market should soon be a good thing to have. Draft geldings are sold for from \$200 to \$500. A recent report from the Ontario Agricultural Department told me recently of a number of Canadian geldings and transport horses) sold for \$200 to \$500 (\$200). One of the men of Great Britain, a very supply of work horses was made in 1914 and a number of useful horses were also taken. France, Russia and Germany, however, have lost a heavy percentage of their stock during the war. At present the Percherons have been imported from France. It would seem that during the reconstruction of the horse market in the East and not West, it is to be expected that the heavy draft horse should turn in most useful owner.

BUILDING AN ICEHOUSE

Best Type for Use on the Average Farm.

Every Milk Producer Should Have One.—The Work and Cost of Erection Light Compared With the Benefits.

Contributed by Ontario Department of Agriculture, Toronto.

EVERY Ontario farmer who produces milk—and most of the farmers do—should store a quantity of ice each winter in order to make it easier for him to cool the milk down after the milking, and to keep it sweet through short periods, week-ends, for example, as he may be required to keep it before delivering it at the factory or other point of disposal. In order to preserve the ice in its factory form some form of ice-house is necessary. The purpose of this article is to describe in a few words a type of ice-house which will give good satisfaction.

The ice-house does not necessarily have to be expensive, but certain conditions in regard to it must obtain if the ice is to keep well. These I emphasize first and they are:—(1) Protection from sun's rays, this may be done by painting the exterior of the house, either natural or artificial, free circulation of air at the top, air-tight foundation, (2) Good quality of dry sawdust, (3) Careful packing of the mass of ice, and (4) Careful packing of the ice. If these conditions can be secured in a rough way under a shed, or a lean-to on the side of a building, all is well unless one has other plans for building a more expensive structure elsewhere. The factor of convenience is often a deciding factor in this case, and the type of ice-house I am about to describe is a good illustration of this. Only once have I seen it in use, but there is no reason why it should not be used quite generally.

This particular type consists of a structure of wood at one end of the barn which has the stable beneath. The size would vary with the amount of ice required, but probably a building 15 feet square and 12 feet high would be large enough for most farmers' needs. In the structure and at the side adjacent to the barn, or rather the base of the wall, is built a concrete enclosure about 6 feet square and 6 or 6 1/2 feet high. A door in the basement wall admits one to it. In the side wall, opposite to the doorway there is a door of 3 or 4-inch tile near the bottom for letting in the cold air from the ice which is packed closely to the concrete enclosure on all three sides over the top as well. Between the top of the storage and the barn is a narrow passage-way or flue allowing the foul or used air to exit hence the structure in the storage is provided for. In this passage-way the farmer has his milk separator, cream separator, and a place to put in his storage, such as butter, and also stored for a few days of course only for a few days at that. Hence much handling of ice is saved as well as convenience. The building is made of wood, the studding being boarded up. It would be advisable to have the space between the studdings with planer shavings or quality sawdust. The roof is made with shingles. The gables are somewhat open for ventilation. Plenty of sawdust is used under the ice next to the walls, and a good depth over the top, none is used between the cakes of ice. If a few cakes of ice are required for household use they may easily be taken out of the sawdust at the top of ice-house or at one side more convenient.

It will be seen, therefore, that this type of ice-house does double duty in degree, namely, providing a small cold storage room, cooled by the barn directly, in addition to housing for various incidental uses in summer time. In a case of this kind there would not be much need of taking out ice except for supply to the household refrigerator as the house would take care of the necessary cooling and preserving of the ice.

Building this arrangement to be desirable, and in many cases practical on Ontario farms, I have much pleasure in recommending it to farmers in general.—R. R. Graham, O. A. College, Guelph.

Still a Place for the Good Horse. Horses have not been meeting a good demand in Canada since the war broke out and have increased in value to \$50,000 since 1914. However, good heavy draft horses is hard to find, and if Old Country markets are any criterion of the trend of affairs an awakening in the Canadian draft horse market should soon follow. Draft geldings are selling in England for from \$200 to \$500 and some up to \$1,000 each. A returned soldier told me recently of seeing a number of Canadian geldings (family and transport horses) sold in London for £100 (\$500) each. One-fifth of Great Britain's ordinary supply of work horses went to war and a number of useful brood mares were also taken. France, Belgium, Russia and Germany, four of the great horse-producing countries, lost a heavy percentage of their stock during the war. Already the importation of Percherons has gone from Western Canada to France, and it is not unlikely that during the period of reconstruction our horse market in the East and West. It will be to breed any horse on the Canadian farm the heavy draft of good quality should turn in most money to the owner.

NOTED.—Telephone operators. Appointment Chief Operator Bell Telephone Building. 031.f.

# Religion Is Patriotism

## It is the Root of Personal Righteousness, the Mainstay of Social Order, the Bulwark of International Peace

### The Makers of Canada

The earliest settlers in Canada were roused by the Call of the Church to develop a noble and useful citizenship. Young and old were invited to turn their eyes from material things, and to regard the splendor of unseen realities. Knowing that Religion is the only true safeguard of stability in the State, they built Churches, Schools and Colleges, to train men for the Christian Ministry, and to spread abroad in the land the benefits of education. This they did in their poverty, and thus directed the course of history in Canada to this day.

### The Testing of Canada

Because of such sacrifices, there arose in Canada a public spirit hostile towards all injustice, dishonesty and cruelty. The War tested the moral fibre of the Canadians of a later day. Would they choose material ease and wealth, or would they risk all in defence of freedom and the rights of the weak?

Over 400,000 men voluntarily offered their lives, and endured hardships as good soldiers for the defence of equity and fair dealing in all human relationships, and for the vindication of public right. Nor were the people at home less steadfast. Besides bearing the national cost of the War, they gave voluntarily for the help of the soldiers more than \$90,000,000. Canada nobly stood the great trial.

### The Menace of To-day

That conflict is ended. Now comes another test. Not only in Canada, but all over the world, sectional and class struggles for material rewards and for mastery threaten the present basis of Society. The vision of spiritual values gained in the War is in peril of being forgotten. The supremacy of sacrifice, the nobility of service, the reality and glory of the Unseen and Eternal, the promises of Christ; these were the things by which we lived during the War. Now there is great danger that they may fade from view, giving place to selfishness and the love of ease.

The great non-Christian peoples of the world comprise two-thirds of the human race. They are mastering our modern scientific knowledge, and if they remain Pagan may yet turn it to our destruction. Paganism stands for the supremacy of Might, the very ideal

### Right the Good Fight

we fought and conquered in more than four years of war.

### Victory only through Christ

How can we retain the heavenly vision? How can the world be guarded against another attempt to establish the Pagan ideal? Only through the Church of Jesus Christ. There is no other agency or society that has any possibility or hope of bringing about a full

realization of the brotherhood of all mankind, and the reign of the Prince of Peace.

### What the Church Has Done

All the progress of humanity in Civilization for the last 2000 years has been inspired, directly or indirectly, by the Gospel of Jesus Christ. It has ended slavery, protected life, ennobled women, educated the children and safeguarded their lives, sanctified the home, established schools, missions and charities.

### The Coming Era

Victory places upon the shoulders of the Allied Nations the responsibility for directing new conditions to right ends. Canada must do her share. The Church must prepare to meet the needs of the new day. Old standards of life with old habits of thinking and of giving will be wholly inadequate. We must do in our day what our fathers did in theirs. The hope of the world is bound up with the strengthening and extension of the Church of Jesus Christ.

### The World's Need is Spiritual

I speak as one standing upon the watch-tower, and know what the need of the land is. It is not material, it is spiritual. Get the spiritual, and the material will follow. The wounds of the world are bleeding, and material things will never heal them. And that is why I hail any movement which brings the great spirit of brotherhood. The one need of England and France today is the healing and the brotherhood of the Cross of Christ.

—Rt. Hon. David Lloyd-George, Before the Brotherhood Convention, London, September, 1919.

# The Forward Movements

### FIVE Christian Communions, Anglican, Baptist, Congregational, Methodist, and Presbyterian, are convinced that the time has come to rouse all Christians to a clearer understanding of their calling and stewardship in Christ, their King. They believe that the Church should be equipped adequately with men and money to enable it to meet the needs and opportunities of the New Day.

belief in God, the Father Almighty, Maker of Heaven and Earth, and in Jesus Christ, His Son, Our Lord. They now

declare to their respective constituencies, and also unitedly, to the Canadian people, that the only effective method of making good citizens is by urging men to a more faithful practice of Christianity, by inculcating personal faith in Jesus Christ. They insist that there is no other dependable way of correcting evil tendencies in individual and national life. They call the people to repentance. To all Christians their message is, "Awake, Arise. Fight the Good Fight, For Canada and For the World!"

EACH of the Communions named is in the midst of a Forward Movement. Each is seeking by prayer and by earnest effort to accept all its responsibilities. Each is striving to extend its activities in Canada and in Foreign Lands.

Your Church needs your help, but, far more, you need the help of your Church to learn the difficult art of living wisely and well.

Consult your Clergyman. He serves you and your children. Ask him how and when you can serve in this day of national emergency. Give yourself to the task. Say: "Here am I, send me."

FEW FOLKS HAVE GRAY HAIR NOW

Druggist Says Ladies are Using Recipe of Sage Tea and Sulphur.

Hair that loses its color and luster, or when it fades, turns gray, dull and lifeless, is caused by a lack of sulphur in the hair. Our grandmothers made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful, and thousands of women and men who value that even color, that beautiful dark shade of hair which is so attractive, use only this old time recipe.

Nowadays we get this famous mixture improved by the addition of other ingredients by asking at any drug store for a bottle of "Wyeth's Sage and Sulphur Compound," which darkens the hair so naturally, so evenly, that nobody can possibly tell it has been applied. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning the gray hair disappears; but what delights the ladies with Wyeth's Sage and Sulphur Compound is that, besides beautifully darkening the hair after a few applications, it also brings back the gloss and lustre, and gives it an appearance of abundance.

Girl Nabbed In Red Raid?

Chicago, Jan. 10.—Many futile clues were run down to day in the general search for Jeanne Anna DeKay, the heiress mysteriously missing from Hull House. Cablegrams from her father in Switzerland, indicate that he is coming to this country to assist in the search.

One of the theories that finds many adherents is that the girl is this victim of some person who held a life-long grudge against her father. He made many enemies in his spectacular career, particularly when he was connected with Porfirio Diaz in Mexican affairs, whereby he cleaned up a fortune. There is also the theory that Miss DeKay was among the many "reds" arrested in recent raids and that she is held in some outlying station cell, awaiting classification and identification. She had expressed sympathy with radical ideas, but had hardly been here long enough to become connected with the "red" association. Hull House is located in a district where the "reds" are numerous. She secretly left Hull House some time during the night eleven days ago and simply dropped out of sight. It would be very easy for a girl to drop out of sight in that district.

Her brother, John DeKay of the University of Virginia, still insists he believes she is still alive and in hiding, but the police are equally positive she is dead and that when the ice breaks up her body will be taken from the river, or more likely the drainage canal, which runs not far from Hull House. There is also the theory that she boarded one of the lake steamers and leaped overboard.

Theatre Manager Is Fined for a Technical Offence

A fine of \$10 and costs was today imposed by Magistrate Munroe of Thorold against manager McCarroon of the Griffin theatre on a technical conviction for improper returns of war tax at the Thorold theatre.

The conviction was under the Rules and Regulations of the Amusement Tax Act and the Magistrate expressed the view that he did not think there had been any intention to defraud the government, but that it was more likely a clerical error.

The charge was brought by government Inspector Boal, who attended the performance of "Mickey" at the Griffin theatre at Thorold during November and estimated the attendance at about 400 whereas only 135 war stamps were reported.

For Sale By Heintzman & Co.

Death of H. J. Ryde

Another young life was terminated on Monday night when one of St. Catharines most esteemed young men, in the person of Herbert J. Ryde, son of Mr. and Mrs. Edward Ryde, 5 Centre St., passed away following an illness the result of being gassed while serving King and Country in the recent great war.

The late Mr. Ryde who was born in Guelph 29 years ago received his education at that place and came to St. Catharines later where he learned the jewelry business, with his brother-in-law, A. H. Wallace. While engaged at this store, Herbert made his way into the hearts of the public, and was known for his kindly disposition and unfailing hospitality when opportunities prevailed.

On New Year's day, 1915, he went to Toronto and from that city enlisted with the Mechanical Transport, 2nd Ammunition Squadron, going almost immediately into active service, and although he was seriously gassed on three different occasions he still retained the strong ambition of seeing the war successfully terminated, and not until he was entirely overcome by the effects of the gas did he resign his ambition.

While serving at the front, deceased came through some of the heaviest battles, viz., Vimy Ridge, St. Julien, Ypres and Passchendaele, and at that time he was compelled to remain indoors he was wearing the Mons Medal. Previous to enlisting in the war just past he was a member of the bearer section in the 19th Regt., and also a volunteer fireman, and since the termination of the war was a faithful member of the G. W. V. A. In religion he was an English churchman and during his stay in St. Catharines attended St. Thomas Church regularly another place where he was highly respected and was a leading post for the young people who he could advise in the interests of the church and the different organizations connected therewith.

He is survived by his parents, Mr. and Mrs. Edward Ryde, who reside with their daughter at 5 Centre street, two sisters, Mrs. A. H. Wallace, St. Catharines; Mrs. Charles Beck, Willowbrook, Sask., and one brother, A. E. Ryde, of Ottawa.

A military funeral will be held from the home of his sister, Mrs. A. H. Wallace, 5 Centre street, at 2:30 o'clock on Wednesday afternoon.

A sleighing party in Hull was in collision with an automobile, and several persons were severely injured.

There is no better New Year's resolution you could make than to pledge that you will grant your teeth the Dental attention they require.

Sound, healthy teeth are a physical and mental comfort and you cannot afford to go through another year without them.

BIG LOSS IN GRANARIES

Bad Weather and Mice Destroy Much Grain.

Concrete Structures Best — How to Make Old Granary Efficient— Flush Ewes to Increase 1919 Lamb Crop — Great Shortage of Fall Wheat Seed.

Concrete Structures Best — How to Make Old Granary Efficient— Flush Ewes to Increase 1919 Lamb Crop — Great Shortage of Fall Wheat Seed. (Contributed by Ontario Department of Agriculture, Toronto.) NO hard and fast rules can be laid down for the erection of a convenient and efficient granary. Each problem requires a knowledge of local conditions and requirements. Granaries, in the majority of cases, are built constructed with too little regard for strength, durability and convenience. These structures should be located immediately over the feed room, each bin having a chute with a controlling slide, or a canvas distributor to convey the grain to the hopper of the grinder; or if the grain is intended for market, to a sack placed on the scales below the chute ready to receive it. To facilitate emptying the grain, the floor of the bins should be sloping.

The important consideration in the location of granaries and bins for loose grain is to be sure that the structure is designed with sufficient strength to prevent bulging of the sides and springing of the floor, for grain, owing to its enormous outward thrust, corresponding somewhat to that of water, has a tendency to burst the sides unless well braced or supported. Timber construction requires frequent repairs to prevent decay and general deterioration from use. It is always liable to climate conditions. The boards will crack and shrink in the summer when the bins may be empty, and when the new grain is dumped into the bins an enormous quantity promptly disappears into the cracks and crevices and through mice holes, entailing considerable loss to the farmer, to the consumer and to the nation. Thousands of bushels of grain are, in this way, annually lost to the producers through sheer indifference to the condition of the granary. Yet this preventable waste may be easily remedied and made secure by lining the bins with sheet metal.

The watchword is "Conservation." Every grain needed to feed the Empire and its Allies. It is, therefore, highly desirable at this time to bend every effort to eliminate all possible leakages and conserve our grain for the need of the Allied nations. While there is an annual depreciation on a timber structure varying from 4 to 8%, concrete construction grows better as it grows old; hence, concrete properly reinforced, is the ideal material for granaries, because it is both damp-proof and rat-proof, two very essential features in the construction of granaries.

Concrete properly made, to suit existing conditions, is absolutely impervious to moisture, and can be kept as dry as any structure of wood ever built. The experience of many farmers is that grain, mature enough to be placed in storage, will not spoil the second winter. Concrete, not with corn mold, provided there is good ventilation and the roof is tight. To get rid of rats and mice destroy their nesting place and to this end concrete is pre-eminently the best material and is recommended for all farm structures.

Under average present day conditions a reinforced concrete granary may represent an additional outlay of about 35% over that required to construct of timber, but the high efficiency distinctive of concrete quickly offsets this increased initial cost. Concrete construction has many in short, important advantages. The contents are safe from the depredations of rodents, is damp-proof, requires neither paint nor repairs, is fireproof, the grain is perfectly preserved under all conditions of climate and temperature, and the resulting structure is practically everlasting. Prof. John Evans, Ontario Agricultural College, Guelph.

Care of Ewes After Weaning.

In order to avoid under trouble it is necessary to keep a close watch of the ewes for a few days after they are separated from the lambs. No a few cases of defective udders can be traced to the want of a little care in this respect. Milk out just enough to keep the udder soft the day after the lambs have been weaned. After two days' time they are again milked out. Some ewes do not need any more attention after the second milking. Such ewes may be marked to indicate that they are dry. Three more days should elapse before the next milking is done and this method followed until it is certain the entire flock is safe. In conjunction with the method outlined above the ewes should be separated some distance from the lambs, and be on scant pastures until all are perfectly dry. This is a good time to go over the flock and cull out all undesirable members. Non-producers and those with broken mouths and poor udders should not be retained. A good deal of the success of the subsequent lamb crop will depend upon the treatment the ewes receive from time of weaning until after they are bred. They should have good pastures and be given an opportunity of putting on flesh. This is what is commonly called "flushing." Nothing is better for this purpose than rape pasture. It is usually from six weeks to two months from date of sowing that rape is ready for pasture. If rape pasture is not available new seedling or second crop of clover will serve fairly well. Stock should not be turned on rape or fresh clover for the first time when the leaves are wet from rain or even dew, in order to avoid trouble from bloatings. J. F. Sackville, B.S.A., Ontario Agricultural College, Guelph.

The Royal Bank of Canada

Give Your Boy a Chance. You Will Not Miss the Small Monthly Amounts

On the first day of every month draw a cheque for \$10.00 the credit of your son's Savings Account. Do this regularly for (say) ten years. Your boy will then have \$1389.42. He can own a farm when other boys are still working for wages.

Capital and Reserve.....\$ 34,000,000 Total Resources.....\$580,000,000

SECURITY

A Savings Bank Account not only provides an assurance for the present, but guarantees you security in the future.

To save is to succeed—

THE CANADIAN BANK OF COMMERCE

PAID UP CAPITAL.....\$15,000,000 RESERVE FUND.....\$15,000,000 ST. CATHARINES BRANCH, R. G. W. Conolly, Manager.

Watch Your Child's Tongue! Constipated Children Gladly Take "California Syrup of Figs"

For the Liver and Bowels

Tell your druggist you want genuine "California Syrup of Figs." Full directions and dose for babies and children of all ages who are constipated, bilious, feverish, tongue-coated, or full of cold, are plainly printed on the bottle. Look for the name "California" and accept no other "Fig Syrup." Beware!
