Just to what extent the other banks have come to the assi tance of Federal cannot be exactly as crtained. A well-informer citizen said last night that he did not think a dol ar had been advanced as yet; that a certain stipulation upon which it was to be advanced had not as yet been complied with. The way such advances are made as this; the Federal turns over to the bank advancing mone the pick of its paper under discount, and that is held and collected by the bank advancing the money they means the banks a siet the one in difficulties, sustaining no loss and parning g od interest on the outlay. Some people are innocent enough to imagine, that the assisting banks in ke a gift of the money they put into the roubled institution.

me member of it who has the capacity to lead the rest, or to advise a scheme of relief. In y were led heretofore by Mr. Strathy whatever way he wished, and now that he is gone they are in considerable of a funk. They are the men who are mainly responsible for the present conditi not affairs; they are the men who should have stepped in long age, and stopped the abuses of stock speculation carried on by their general manager. Instead of this they willingly lent themselves to all his schemes. There were any number of warnings, but they willingly lent themselves to all his schemes. There were any number of warnings, but they willingly lent themselves to all his schemes. There were any number of warnings, but they willingly lent themselves to all his schemes. There were any number of warnings, but they willingly lent themselves to all his schemes. There were any tumber of warnings, but they willingly lent themselves to all his schemes. There was the federal's pith luring the past two ye rs. Here are the names of some of those who went under. There was J. Walsh who suicided in the midst of a Federal deal. Hope & Temple ourst; next R. H. Temple & Co.; J. A. Machellar was another; then there was the Farley and Mara affair; then came Farley on his own account; and after him Mara on his own account. Every one of the firms had been wrecked by reason of speculation in Federal. But still the dance went on and no heed was aken of it by the directors, and now the of reliable firm of Forbes & Lownsborough to down under the weight of it, and others will follow in a few days. But beside the orokers who were wrecked there were scores and secores of investors and speculations of the stock of the managin for a rise. In order to get the money lie would have to pledge the stock to Mr. Strathy, or his loan co-pany. Along would come a man who wanted to go short of the tick, or in other words invected in it in hope of its decline. Mr. Strathy had no compuration in leading the best of the manager. He was earning, as he thought, double in

nis great object. This sort of work was kept up for years, and as a consequence any numer of brokers are ruined and speculators likewise.

A, few foolish people, including the Globe newspaper, say it was the criticism of the newspaper stay trought on the panic. It was nothing of the kind. It was this disgrated in the state of the brokers and the knowledge that the other bankers had of Mr. Strathy's double dealing in the matter tat produced, the want of confidence.

The immediate cause of the decline in the stock was not the action of the bears, as the news, apers hint; it was brought about in this way. When Federal was 116 last week a meeting of the bull-brokers and loan companies interested in the stock's rise was held, and a resolution come to to hold it up. Anticipating a rise and expecting the deal to be get shead of the rest, either on their own account or on acc unit of clients, bought 600 shares; suddenly the agreement failed to consummated, Growski & Buchan, in order to get ahead of the rest, either on their own account or on acc unit of clients, bought 600 shares; suddenly the agreement failed to connect in some of the details and there was a gen ral helter-skelter to get out; the bulls threw the stock on the market and kept throwing it, and so knocket it down. There was no short interestat that time.

Beside the speculation there were a constderable number of loses in ade. What the amount really is cannot be stated at present, there were heavy losses in this province. We are afraid that the losses will show to be pared down. Two very serious mistakes we made in forconnection with he bank. It had far too many agencies. Net only had it agencies, but it had scattered all over the province a number of pett shaving so ops uner pravate names, but which more, or less traded on their connection with the bank. SATURDAY MORNING, JUNE 28, 1884.

Stocks Must Go. The indication in all directions is that stocks are too high, and that there is yet a considerable shrinkage in their value to take place. The New York stock market would appear to be attacked by dry rot. It declines two or three points every day, and then with a great effort recovers half a point. This has been going on for several weeks. Canadian stocks have felt the same influence, and they have been falling, though not at the same rate at which the tumble has taken place in the United States. There is no Canadian bank stock now at 200. Canadian Pacific is below 40. Bank of Commerce is as low as 113, and the other banks are from 15 to 20 points lower than they were six months ago. Even securities, such as stock in insurance companies and the like are all naturally shrinking in value, and will continue to do so for some time. There has been much inflation in all stocks, and a reaction is bound to be brought about. In fact, it is now in operation. Though individuals may lose largely by this decline, general business will be none the worse for all such securities being held at nearer their true value.

The Graduates of Victoria.

Mr. Justice Rose the other evening in the Elm street church stated his opinion that the graduates of Victoria would be found strongly and unitedly opposed to the idea of consolidating the university of Victoria with the university of Toronto. We know, as a matter of fact, that many of these graduates will, when the issue is fairly raised in the general methodist church, support the sound position taken so boldly and so well by Dr. Dewart, an admirable court of review. H. that the graduates of Victoria would be so boldly and so well by Dr. Dewart, and we shall be much surprised to find any considerable number of them taking up a position of uncompromising hostility to a fair scheme of federation. We are forced to this conclusion by the following amongst other considerations:

1. Victoria college would never have been established as a means of affording secular training to students had the orig inal state university endowment not been misapplied and misappropriated. Now that the endowment has been secularized for nearly forty years the graduates of Victoria can be trusted to see that there is no suicide in their incorporation with the institution of which most of them would have been alamni, but for the grasping and mistaken policy of Bishop Strachan. 2. If the methodist church had not an

arts university now it would not think of establishing one unless forced to do so by the unsatisfactory character of the teaching in the state institution. That that teaching is not unsatisfactory now, bear witness the sixty students of University college and all the methodist students of the past: bear witness also the still greater number of students preparing in University college for the ministry of other churches. The methodist church, under the necessity of greatly enlarging and improving its university, is placed, as nearly as may be, in the position of a church asked to start a new institution. The situation has completely changed within a year, and the graduates of Victoria may be trusted to see and appreciate the

3. They can also be trusted to see and appreciate the fact that no Canadian university at present stands any where near the first rank' of American institutions in point of endowment, equipment or work done, and that consolidation of means and economy of energy are absolutely necessary to put Ontario on a par with some of the states of the union in the matter of facilities for higher education. The denominational feeling is strong among the graduates of Victoria, but we do not believe that it has drowned out or driven out the feeling of patriotism. If we want to see a fatal exodus of the very flower of our young people-those who are earnestly seeking to improve themselves-let us keep up our present in-

efficient university system 4. The graduates of Victoria university know that they are' as numerous at present as the graduates of the university of Toronto. They know that as years go by, if the institutions remain apart, they are likely to become relatively less numerous. They know that if union takes place now they will ipso facto become graduates not of the present university of Toronto, but of the consolidated and enlarged institution which will replace it. They know that, as members of the new convocation, they will have the mating graduates and be in as good a position, man for man, to control its management and shape its destiny. They know that such a union would be a co-ordination of two corporate bodies, not the subordination of one to the other, and in such a prospect there cannot possibly be anything to be dreaded as dishonoring

We have no fear of the graduates of Victoria, as a body, opposing union on fair terms but they ought to let their voic be heard in the coming discussions.

Sheriffs' Fees.

To the Editor of The World. Siz: I take the liberty of calling the at tention of your readers to an unjust imposition in the shape of sheriffs' fees. At present a writ in the hands of the sheriff against John Smith stands as a lien against the lands of all the John Smiths in the county. Consequently, when any John Smith wishes to convey his land he mast prove that he is not the particular John Smith mentioned in the writ a process often entailing considerable loss and in writs certainly does not exceed one for every live hundred persons wishing to convey land and yet all these five hundred persons at an expense exceeding \$500 must every five hundred persons wishing to convey land and yet all these five hundred persons at an expense exceeding \$500 must furnish writs to prove that one out of that number has a writ against him.

Now, if instead of general writs, the execution was entered on the register as writered and the register as writered and the register as writered and rectangle lies are now at the register and re mortgages and mechanics' liens are now supplies. Chromos, artotypes, entered, that which now costs five hundred &c.

Speculation.

To the Editor of The World. SIR: Please oblige an old subscriber by inswering the following questions. A.M. 1st. Are stock brokers a blessing or

curse to the country they live in? Stock brokers who sell or buy shares for legitimate investors are necessary. The speculating broker, the one who deals in margins, is a gambler.

2d. Does the law provide a fitting punishment for bank officers who speculate with moneys entrusted to them?

Yes. The city of Glasgow bank officials were punished.

were punished.

3d. Does panics such as lately took place on Wall street affect the financial

tanding of a country? 4th. Can bulls and bears and stock

brokers be looked upon as legitimate workers for the commonwealth? No. 5th. Is the W. J. Ingram of Montreal spoken of in this morning's World the same man as was associated with Manager Hague of the Merchants' bank, Montreal?

In conclusion, do you think we have more men than enough trying to eke out a living in Toronto than is good for morality by money speculation?
