MANY PHYSICIANS PRESCRIBE

Lydia E. Pinkham's **Vegetable Compound**

The wonderful power of Lydia E. Pinkham's Vegetable Compound over the diseases of womankind is not because it is a stimulant, not because it is a palliative, but simply because it is the most wonderful tonic and reconstructor ever discovered to act directly upon the generative organs, positively curing disease and restoring health and vigor.

Marvelous cures are reported from all parts of the country by women who have been cured, trained nurses who have witnessed cures and physicians who have recognized the virtue of Lydia E-Pinkham's Vegetable Compound, and are fair enough to give credit where it

If physicians dared to be frank and open, hundreds of them would acknowledge that they constantly prescribe Lydia E. Pinkham Vegetable Compound in severe cases of female ills, as they know by experience it can be relied upon to effect a cure. The following letter proves it.

Dr. S. C. Brigham, of 4 Brigham Park Fitchburg, Mass., writes:

"It gives me great pleasure to say that I have found Lydia E. Pinkham's Vegetable Compound very efficacions, and often pe-scribe it in my practice for female difficulties. "My oldest daughter found it very benefi-cial for female trouble some time ago, and my youncest daughter is now taking it for a female vicakness, and is surely gaining in health and strength.

"I freely advocate it as a most reliable specific in all diseases to which women are subject, and give it honest endorsement."

Women who are troubled with pain Women who are troubled with pain-ful or irregular periods, bloating (of flatulence,) weakness of organs, displace-ments, inflammation or ulceration can be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound. If advice is needed, write to Mrs. Pinkham, at Lynn, Mass. She is daughter-in-law of Lydia E. Pinkham, and for twenty-five years has been advis-ing sick women free of charge. No other living person has had the benefit of a wider experience in treating female ills. She has guided thousands to health. Every suffering woman should ask for and follow her advice if she wants to be strong and well.

WATFORD, JUNE 22, 1906. Good Farm Prices Promised

A sharp rise in grain futurer has been brought about at Chicago by crop damage reports from the middle and southern states. In instances the condition of the wheat crop has been lowered over ten per cent. in the month and that of oats in even greater proportion. During the early portion of the season a period of drought caused anxiety, but this was relieved by rainfall, which in turn developed in sections into a deluge. In parts of Texas fields of grain are practically floating and the extent of damage is hard to estimate. Canadian grain prices have responded to the up turn in the American markets and both Ontario and Manitoba wheat are firmer at higher quotations. Reports from the Canadian west thus far are good. In Ontario a certain amount of winter damage is beyond repair, but the wea-ther conditions latterly are favorable to crop development. As far as can at present be seen another year of good prices for cereals is promised. The British grain markets had a steadily firm undertone which can only be varied by some unusual happening- Re ports from Russia promise a larger wheat crop from the southern districts than that of last year, but against this there is a small Argentine exportable surplus. For many years Europe received from 150,000,000 bu. to 200, 000,000 bu, of wheat from the United

States. In 1904 this was brought down to one third of this amount and

last year barely half. The continual ly larger consumptive demand of the States will make larger inroads on the exportable surplus, and it is but a question of time when Europe will have eliminate the States from its list of granaries. Firm prices for wheat naturally to stimulate the prices of other grains, and it begins to look as though the Canadian farmer will have a ready and profitable market for this season's grain crops.—World.

Man's Life is Full of Troubles.

Man that is born of his parents is of few days and full of microbes. He goeth to school when a youngster and gets the seat of his pants paddled for something he didn't do until he is sick at heart. He growth up like a weed in a back yard, and soon reaches the age when he is composed largely of feet, freckles and an appetite for pie. About the time he gets too long for short trousers and not long enough for long ones he goeth away to college, learneth how to monkey with a three dollar mandolin and play whiskey pok-er. He cometh home a bigger fool than every and marrieth a sweet young thing whose pa is supposed to be weal-thy, but whom he subsequently ascertaineth, couldn't buy the prize rooster at a county fair. He worrieth along from year to year gradually acquiring offspring, until his house resembles a Sunday class just before Christmas. He fretteth through the day and lieth awake nights trying to figure out how to keep himself and his dependent population out of the poorhouse. Efforts are rewarded by have ing his daughters run away and get married and bring home" a nice son-in-law every few days to feast at his board. His sons grow up and call him governor and set him back a five spot every day or two. About the time he has acquired enough lucre to make it worth while for his heirs to quarrel over, he contracts a cold and is hurried

Increased Cost of Living.

No wonder the nousewife now demands an increased allowance for table and other domestic expenses The cost of running a house is steadily advancing. Dun's Index Number shows that commodity prices in the month of May reached a new high record for a period of over twenty-two years. The principal alterations during the month were in breadstuffs, dairy and garden products. Building materials are higher to day than at any time since 1874. Dun's pub lication figures it out on the per centum basis that the total cost of all commodities in most common use is now 106.79, as compared with 98.75 on June 1, 1902. This indicates a remarkable advance in the past twelve months.

A Bad Bruise.

Often causes a good deal of trouble. The best cure is a prompt application of Nerviline which instantly stops the pain, prevents swelling, removes all blackness and discoloration. Nerviline is antiseptic—prevents blood poisoning. No liniment so strong, so penetrating, so swift to destroy pain. You miss a lot of comfort by not using Polson's Nerviline. For nearly fitty years it has been the standard family liniment of Canada.

Reading, writing spelling we say it regretfully, are no longer thoroughly taught in the public schools; laments the Philadelphia Record. The trustees of Cooper Union, in New York, declare that the young men and women who come to them for instruction in the property of the control of the con ion in telegraphy, stenography and type-writing, though of good ability and general information, are lamentably deficient in the fundamentables of the English language. They especially cannot spell. Out of thirty or forty words in ordinary use sometimes one half or even two-thirds are mis-spelled. "This experience of the trustees nearly every newspaper publisher will stand ready to avouch from sore experience," adds the Record. "The common schools no longer teach the common rudiments."

A WIDE SPHERE OF USEFULNESS .- The consumption of Dr. Thomas' Eclectric Oil has grown to great proportions. Notwith-standing the fact that it has now been on the market for over thirty-one years, its prosperity is as great as ever, and the de-mand for it in that period has very greatly increased. It is beneficial in all countries, and wherever introduced fresh supplies are constantly asked for.

Are you a success as a breadmaker? Is your cake and pastry complimented by your friends?

If not, whose fault is it-yours or the miller's. If you are successful in other lines, your reputation as a cook is vindicated, and it is plainly the fault of the flour.

Look up the good bread and pastry makers of your acquaintance and get their flour experience. You will find that most of them

Wilson vs. Douglas—After a few minutes spent in the formal disposition of the last two cases, the remainder of Monday and Tuesday forenoon were taken up with this action. It is a capital illustration of the folly of employing unprofessional men to do professional work. The lawyers, however, are not, we understand, campilaning, as the steps made by non-professional conveyancers, especially in drawing wills, results in fat suits, of which this case was an example. One John Crooks being near death's door, fat suits, of which this case was an example. One John Crooks being near death's door, had his will made in Brooke in 1903. He lett all his property in Ontario and Michigan, where he had formerly resided, to his half-sister, Mis. James Douglas, of Brooke, with whom he was then residing. Unfortunately the person who drew the will allowed Mr. Jas. Douglas to be a witness to the will, which under the law of Ontario, rendered the gifts to his wife void. TIF Rell BIOGRAPHIES **A** Bach

OHANN SEBASTIAN BACH was born in 1685 and died in 1750, aged 65. From childhood he grew up, as all should grow, in an atmosphere of good music in the home. He made such rapid progress in his music lessons that he soon knew more, could play better and compose better than all his teachers.

Bach is the greatest musician that ever lived. He was the inventor; all who came after him were followers or initiators.

all who came after him were followers or imitators. He wrote nearly 1,000 compositions, founded modern orchestral music, perfected organ methods and choral composition, discovered most of the methods in instrumental composition, rearranged the 24 scales, making it possible to play in every key, and established the chief principles of modern piano playing. No one can hope to become even a good concert pianist who has not first mastered Bach's Inventions, Well-tempered Clavier and Fugues.

To practice or play on Bach had only the clavichord, an instrument small in dimensions, limited in scale, thin and weak in tone as a mandolin, and poor in construction as an old-fashioned melodeon.

He had no such beautiful and marvellous instrument as

The Bell Piana

But seated at the sweet, rich, pure toned Bell Art Piano, with its greatest of modern improvements—THE ILLIMITABLE REPEATING ACTION—Bach would have brought forth music lovelier than any the world has yet heard. To all musicians the great Schumann's advice, had he lived in our day, would undoubtedly have been "Make Bach and the Bell Piano your daily bread." Singular Affair.

A rather singular occurrence happened in this village the other day when Norman McLeod divided his earthly possessions with his wite and they agreed to live separate. This couple are both past 70 years of age and have no family. Accoding to the terms of the agreement he gave nis wite \$585 and twice this represents about what they both made in 30 years' struggle in America. They have both worked all their lives to have a small farm, and shortly after the last payment was made they both mutually agreed to separate and go whither they may. KEEP CHILDREN WELL.

KEEP CHILDREN WELL.

In thousands of homes throughout Canada there are bright, thriving children who have been made well and are kept well by the use of Baby's Own Tablets. In many homes parents say this medicine saved a precious little life. Dr. A. Danais, L. D. S., Riviere du Loup, Que., says: "At the age of five months we thought our little girl was dying. Nothing we did for her helped her until we gave her Baby's Own Tablets, and only those who have seen her can realize what a change this medicine has wrought in our child. She is now about eighteen months old, eats well, sleeps well, and is a lively laughing child, and weighs 37 pounds. We always keep the Tablets in the house now for we know their great value." If mothers wish to feel absolutely safe they should keep a box of Baby's Own Tablets in the house always. They cure all the minor ailments of children and are absolutely safe. Sold by medicine dealers or solutely safe. Sold by medicine dealers or sent by mail at 25 cents a box by writing The Dr. Willioms Medicine Co., Brockville,

East, and is under suspicion as to other diseases.

Its origin and habits are such as to put us on our guard. It lays its eggs in excrement, preferring horse manure, but it that does not offer, readily sing any other. It feeds on the same and on the sputum of diseased throats and lungs, on refuse of all kinds, and it bears on its hairy teet and legs particles of these substances.

Unlike the mosquito, the house-fly is not a biter—but it has its own way of carrying contagion. It deposits, wherever it goes, disease; and disease germs may abound in its breeding and feeding places. On the joint of meat exposed for sale by the butcher, on the bread and sweetmeats of the confectioner's counter, or the edge of the milk pail, on the kitchen and dining-room tables, they have been found.

tables, they have been found.

The epidemic of typhoid fever in Chicago in 1902 fixed guilt on the fly. It was especially severe it the nineteenth ward, which furnished one-seventh of the deaths, while containing the one-thirthy-sayth of which furnished one-seventh of the deaths, while containing but one-thirthy-sixth of the city's population. This locality did not differ from the rest of the city in its water or its food supply, but it did differ in having more than fifty per cent. of its houses without sanitary plumbing, the water being insufficient. Flies caught in undrained closets, on the fences, and in the room of a patient were proved to carry the germ.

Young-McIntyre.

On Thursday evening, June 7th, the home of Mr. and Mrs. Duncan McIntyre, 6th line, Plympton, was the scene of a quiet but very pretty wedding, when their youngest daughter, Miss Tens was united in marriage to T. B. Young, London Road. The ceremony was performed by Rev. A. Barker, B. A. The bride was lovely in a beautiful gown of white point de'esprit trimmed profusely with lace, over pure white silk. After the ceremony the guests repaired to the dining room, where a dainty repast was enjoyed. The many costly and beautiful gifts sent in testify to the high esteem in which the bride and groom were held by their many friends.

June Wedding.

A pretty home wedding took place on Wednesday June 13th at the residence of Mr. and Mrs. Henry Freer sixth line of Metcalfe, when their third eldest daughter. Eliza May, was united in marriage by Rev.
Mr. Irwin of Watford to Bryon Moore, a
prosperous young tarmer of the township of
Enniskillen. At 5 o'clock the bridal party
took their place in the lawn under an arch of evergreens decorated with red white and blue, to the strains of the Mendelssohn march played by Miss Alma Knight, cousin of the bride. The bride was beautifully attired in white organdie, trimmed with lace and ribbon, wearing a bridal veil caught up with white roses and carrying a boquet of white peonies. The bride was attended by Miss Blanche Moore, sister of the groom, who was similarly attired, and Myrtle Freer niece of the bride made a pretty little flower girl carrying the ring in a basket of white peonies. The groom was attended by Mr. John Freer brother of the bride. After the ceremony the gueste, numbering 150, repaired to the duning room where a sumptuous repast was laid, to which all did ample justice, after which the evening was spent in music, games and dancing till the wee small hours of the morning. The presents received were both numerous and costly. Among them being a china set of dishes from St. Paul's church choir of which the bride was a member also a Japaness tea set, from St. Paul's Sunday School. ## Purely Personal

Copyright, 1906, by Homer Sprague 

Stetson read the advertisement for a second time. It was seldom that he read the personal column, usually plunging straight into the financial news, but this morning Dodds had chatted with him until he was almost at his destination, and his eye fell idly upon the column.

"Will the gentleman who saved the life of a young woman at Central yesterday afternoon please send his address to Grateful, box 512?' He closed his eyes and with mental wision he could see it all again-the automobile, the trolley car which prewented escape and, above all, the piquant little face lying limp against his shoulder. For a moment he was tempted to answer the advertisement. Twice during the day he penned a note to "Grateful," but each time he tore it up in disgust. It seemed a pretty poor trick to be sending his address that he might be thanked. He would like to look into those blue eyes again when they were not dilated with terror, but he must wait for some other opportunity.

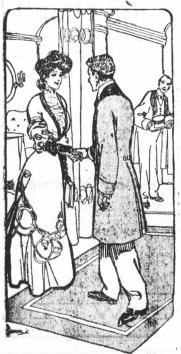

The next morning the advertisement was repeated. He knew, because he turned to the column the first thing. He smiled grimly as he thought of the temptation of the day before. They could advertise until doomsday, but they would get no answer from him.

It was almost with apprehension that he looked the third day, but his mild curiosity was changed to indignation. This time the personal read:

"Will the gentleman who saved the ife of a young woman at Central quare Monday afternoon kindly return her watch, and no questions will be asked? Grateful, box 512."

This, then, was why she had adver-tised for his address. She believed that during the excitement he had robbed her of her watch. And all the dreams he had dreamed in the past two days of those blue eyes brimming with gratitude looking into his were but idle visions! He was sorry he had seen the advertisement. He probably never would see the girl, but it had been pleasant to believe that he had

course of the past year he had encountered her upon the street, and from the very first he had been interested. He was not exactly in love, he told himself, but very near it. Now he would have to dodge if he saw her; he would have to slip into some store or across the street. It would be intolerable. He cut out the advertisement and placed it in his pocketbook.

As soon as the morning mail was disposed of he drew toward him a letter head and wrote rapidly. Several sheets were destroyed before he finally decided that the letter would do, and before he slipped it into the envelope he regarded it for a third time.

"Mr. Robert Hardy Stetson," it ran, "begs to assure 'Grateful' that she is in error concerning the disappearance of her watch. Mr. Stetson would suggest that 'Grateful' make application to the police. He is ready to give them ample proof as to his honesty and standing."

The tiny business card in the corner would give the address, and he flattered himself that the note would serve Ats purpose, It was given a boy to take

to the newspaper office, and the rest of the day Stetson divided his time mourning his dead romance and wondering what the girl would say when she read the letter. He flattered himself that it was dignified and eminently calculated to remind her of her transgression.

Possibly could he have seen the recipient when she glanced over the formal lines he would have been surprised, for, with her face wreathed in smiles, she nodded at the clerk.

"You needn't put it in again," she said. "Thank you, very much."
Stetson scowled at the pale tinted

note on his desk the following morn-The girl could have no justification for her suspicions, certainly none cant he would accept. It was impertinent of her to make answer to him. For ten minutes he turned it over and over before he slit the cover and drew forth the inclosure. He stared for a moment dumfounded at the opening lines, which ran:

"Miss Alice Everton Woodrow begs to thank Robert Hardy Stetson for his somewhat tardy answer to her advertisement. She begs to assure Mr. Stetson that she does not believe him to be a thief. His unwillingness to answer the earlier advertisement led to the suggestion on the part of the clerk in the advertisement office that the amended form of personal would be more likely to bring forth an answer. If Mr. Stetson will be good enough to call at 635 Auburn avenue he will not only receive the grateful thanks of Miss Woodrow, but of her father, who would be glad to meet the son of his old schoolmate."

Stetson looked at his watch. He could ot in decency call be no use in trying to work when every letter was but a picture of a pair of blue eyes set in a piquant face and

framed in golden hair. He had been trapped, but he was glad of it. He was especially glad to know that she was willing to take such pains to find him. It showed that she really did care and justified his earlier opinion of her.

He wished that he could announce a general half holiday in the office, but since this was not possible without explanation he could at least take one himself.

He was uptown at 11 and spent the rest of the time in pacing his room and deciding upon the important item of a necktie. He could scarcely wait until it was time to start and set out afoot that he might at least kill time that way.

The servant showed him into the library instead of the drawing room. Miss Woodrow sprang from her easy chair by the open fire as he was announced and came toward him.

"I thought you might call this afternoon," she said as he took her hand, so I told James to bring you in here.

I am so glad you have come."
"So am 1," said Stetson promptly,
"though I did not come to be thanked."
"To meet father," she suggested demurely. "I am afraid he will not be in until 6."

"I don't mind waiting," said Stetson

Strange "Teas."
Tea is not always the fragrant beverage which cheers but does not inebriate, and the name has curious application. Ginger tea was once a most popular beverage. Cowslips and other howers and herbs, including camomile, thyme, marjoram, balm and mint, have been used. Histories have made us familiar with the substitutes for tea which our Revolutionary grandmothers used after the tea from the East India company's ships was poured into Boston harbor. Tea made from the leaves of ribwort, strawberry plants and currant bushes, sage, thoroughwort and other herbs was drunk. So called "liberty tea" was made from the leaves of four leaved loose strife, while Hyperion tea, according to a valuable chronicle of the time, was made from raspberry leaves and was said by patriots to be very delicate and most excellent. The beverage may have tasted so to the patriotic palates, but many a colonial dame must have longed if she had allowed herself for the fragrant Hyson which she had been accustomed to en-

The inclination of the moon's orbit to the horizon accounts for the harvest and the hunter's moon, which occur when the tipping is slightest, thus permitting the moon to rise about the same time for several successive evenings. The moon often appears much enlarged when on the horizon, but this is caused It was only 10 now. A Puzzling Trick.

Take a piece of writing paper about three inches square and with a lead dipped in water, draw a circle, a square, a triangle or any other geometrical figure. Put the paper carefully on a pan of water, letting it float and leaving the surface dry. Carefully drop water on the surface of the paper until the space within the figure is filled. The moistened pencil lines will keep it from flowing outside the figure. Now place the point of a pin over some point in the figure near the edge. The pin point must penetrate the surface of the water, but must not touch the paper. At once the paper will float around until the pin points directly to the center of the figure. See if you can find out why it does this.

Although it is the most poisonous reptile known to inhabit northern Africa, it is the favorite among the snake charmers. These conjurers know how to render this serpent rigidly unconscious by pressing the nape of its neck with a finger. This act appears to throw the reptile into catalepsy, in which he is as stiff as an iron rod. ## BY-LAW NO. 2, 1906.

A By-law to repair the drain from lot 12, in Township of Warwick, westward to outlet, along the Boundary line between the Township of Brooke and Warwick, in the County of Lambton.

Whereas complaint has been made to the Municipal Council of the Lownship of War-wick by residents of said Township that the ditch or drain along the Boundary line be-tween said Township and the Township of

Brooke is out of repair.

And whereas said ditch or drain was

And whereas said ditch or drain was originally constructed and improved partly by funds of both Townships interested, and partly by statute labor and subscriptions from parties benefitted.

And whereas the said Council of the Township of Warwick acting under Section 76 of the Municipal Drainage Act, has procured an examination to be made by C. A. Jones, E.q., D. L. S., being a person competent for such purpose of the ditch or drain proposed to be repaired and of the lands and roads liable to assessment under the "Municipal Drainage Act" and has also procured pluns, specifications and estimates of the drainage work to be made by the said C. A. Jones, E.q., and an assessment to be made by him of the lands and roads to be benefitted by such drainage work and of other Isnds and roads liable for contribution thereto, stating as nearly as he can the other lands and roads liable for contribution thereto, stating as nearly as he can the proportion of benefit, outlet liability and injuring liability, which in his opinion will be derived or incurred in consequence of such drainage work by every road and lot or portion of lot the said assessment so made being the assessment hereinafter by this By law enacted to be assessed and levied upon the roads and lots or parts of lots hereinafter in that behalf specially set forth and described and the report of the said C. A. Jones, Esq., in respect thereof and of the said drainage work being as follows:

Petrolea, Jan. 16th., 1906. To the Municipal Council, Township of War-

wick.
GENTLEMEN:—In compliance with instructions received from your Honorable Body I have made an examination of the drain on the Townline between the Township of Warwick and Brooke in front of Lots 3 to 11 inclusive of Warwick and extending a short distance in on to Lot No. 2 of the same township, with a view to repairing and improving the said drain to be known hereafter as the "McGill Drain."

I learned that this drain has been constructed and repaired by various means such as statute labor, private contributions, grants ont of general funds &c., but I believe without any definite system of levels so that in some places it is quite a large drain and in others quite small and insufficient to prevent it overflowing and flooding in times of freshet.

I consider it would have been better, had the upper portion of this drain not been carried so far west along the highway without allowing it to follow more closely the natural trend of the water as it has, necessitated cutting through a couple of pronounced ridges, one near the 9-10 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the other, the 9-10 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the other, the 9-10 side road of Warwick and the other, the 9-10 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the other near the 6-7 side road of Warwick and the vesterly along the highway to its present continued westerly along the highway to its present continued westerly along the highway to its present continued westerly along the sould have continued westerly along the sould have continued westerly along the sould have continued westerly along the norther with a

or 1768 rods.

The Branch Drain I have also staked and evelled in the same manner commencing with tation "of tait is head which is about 12 rods east of the line between the west ½ and east ½ fold of of Warwick where the Leach Award Drain, or the outlet thereto, strikes the townline. It runs westerly along the northerly side of the highway a distance of 31 chains of 124 rods.

where it enters the Main Drain at station 1131/2

where it enters the Main Drain at station 113% on same where, as above mentioned, it crosses from the south to the north side of the highway. This makes a total of 1292 rods in both.

The culverts across the townline at stations 53% and 113% are both in good condition and being comparatively new ones and of sufficient size will not require any work done on them, the one opposite the 6-7 side road of Warwick is in very fair condition and wide enough, but the covering is about a foot too low and will require to be raised.

In my estimate of the vost of the proposed work, I have not included the construction or repair of any of the culverts of bridges over the drain leading from the private land to the highway as all the parties, either prefer or are agreeable to build or repair their own bridge or culvert and I have kept this fact in view in making my sessessment on the lands affected for the cost of the work. There should, however, be a certain uniformity in these bridges or culverts and I would recommend that where they are built with posts and stringers they conform to the following regulations, viz:—

St. ot 0.52 they be at least 5 ft. wide and 3½ ft high in clear.

St 134 to 154 they be at least 6 ft wide and 3½ ft high in clear.

St 134 to 276 they be at least 7 ft wide and 3½ ft high in clear.

Should they be built with long stringers resting on the ground at the edge of the drain, the ends of the stringers should project at least 2 ft beyond the edge of the drain and the underside of the stringers be at least 3 ft 9 in above the bottom of the drain.

Many of the present bridges I find are even larger than the minimum I have specified particularly in the lower portion while some of them at the upper end are smaller, but where they are new they might be left or a time to test whether the present are smaller, but where they are new they might be left or a time to test whether and the stringers be at least 3 ft 9 in above the bottom of the drain, the ends of the stringers be at least and the underside of the

In getting clothes ready for the wash, care should be taken taken that towels or any articles that are at all damp should be dried before beingput into the general re-ceptacle of soiled clothes, particularly in ummer, as there is danger of such articles being mildewed.

WE heard on the street the other day of a man who claimed he was too poor to take his home paper, but all the same he read a notice in one of our neighboring Republic papers, telling how to prevent a horse from slobering and sent \$1.50 for the receipe. When the \$1.50 worth of information came it said: "Teach your horse how to spit."

FARMERS, who secure the services of FARMERS, who secure the services of Old Country men or women, should beconsiderate. These people in many instances are not accustomed to either the hours or the methods of Canada, and while willing to work and anxious to get on, they may easily be discouraged if pushed too rapidly at first. They will work in all right, but give them a chance.

THE Clerk of the Peace has received instructions regarding the amendments to the Act respecting commitments to lunatic asylums and the custody of insane persons. The examination of insane persons, dangerous to be at large, is taken from the County Judges and Justices of the Peace will now make examination. Municipalities that have made a habit of sending them to goal will be compelled to send them direct to the asylum.

TORONTO HOG MARKET. Toronto, June 19.—Hogs, live, \$7 to \$7.-25; dressed, \$10 to \$10.50.

London, June 19.—Canadian cattle are firmer at 11c to 11½c per pound; refrigerator heef is 8c to 8½c per pound; sheep, 13½c to 14c per pound.

Toronto, June 19.—The run at the City Cattle Market to day was 60 loads, with 1,155 head of cattle, 400 sheep and lambs, 400 hogs and 202 calves.

While higher prices were paid to day at the City Cattle Market for choice and fair to good cattle, still trade on the whole was slower and more draggy than it has been for some time. The reason for this state of affairs was that the good cattle, the well-tinished stall fed export cattle especially, were very scarce and much in demand, consequently the higher prices than last week inished stall fed export cattle especially, were very scarce and much in demand, consequently the higher prices than last week for the same class of cattle. On the other hand there is this week a rather heavy delivery of grass oattle, many of them, as usual, in very poor condition. For this kind of stuff there is a poor demand and prices are, therefore, lower. The demand for fat cow beef, which for some weeks sent prices for this class of stock away up, has now practically disappeared, and prices are down from ic to ic per pound. This lower range of prices, however, does not apply to the better class of cattle, for one or two choice loads of export steers sold to day at \$5.20 to \$5.30. A small lot of fancy butcher heifers, about half a load, and weighing about 1,000 pounds, was sold by Crawford & Co. at \$5 10, a pretty good evidence that for choice quality cattle the market is as firm as ever it was this season. There is also a good demand for good quality stockers and feeders. The scrub stock is not wanted. There is also an over-supply of milch cows, and none but choicest quality are in demand.

 COUNTY COURT.

The County Court and General Sessions of the Peace opened on Tuesday, June 12th, at one p. m., before His Honor-Judge—Mc-Watt, there being 13 grand jurors, and 32 petit jurors in attendance. Four petit jurors failed to answer to their names and a line of \$5 was imposed on one, for whom there was no excuse given.

The jurisdiction of the county court has been so far encroached upon by the extension of the jurisdiction of division courts, and the costs of litigation in the county court are so heavy in proportion to the sums involved in the disputes over which it has jurisdiction that in any well-considered plan of law reform some radical change must be made.

Thom v. McQuhitty, was an action for the price of a treadmill supplied by the plaintiffs, who were manufacturers of agricultural implements at Watford, to the

plaintiffs, who were manufacturers of agricultural implements at Watford, to the defendant, who is a farmer living about sixty miles from Ottawa. The detence was that the machine would not work, and could not be made to work, and was consequently uscless. There was considerable difference of opinion amongst the witnesses as to some of the details of setting up and testing the machine, but it did not seem to be disputed that it had not been made to work. The plaintiffs relied on an ironclad contract contained in the order signed by the defendant when he bought, which, they contended, obliged the buyer to immediately notify the agent and maker in writing, if contended, onliged the buyer to limited activity, in the machine did not work properly, to give all necessary assistance in making it work. It it did not then give proper service it was to be returned and a new machine supplied. to be returned and a new machine supplied. Failure to give notice in writing or to immediately return the machine, it was contended, left the purchaser legally liable to pay for the machine, even if worthless. This form of order is now very common amongst manufacturers. The defendant had not returned the machine. Judge MacWatt struck out the jury, and tried the case himself. Judgment was reserved. Mr. Cowan for the plaintiff; Mr. Logan for the defendant.

Burgess v. Peters occupied the court most of Wednesday. The plaint:ff sued the detendant for \$150-as commission on the sale of a farm for defendant. The latter contended that the sale had not been made through the exertions of the plaintiff, and that he had not, for that reason, earned a commission. The jury tound a verdict tor the plaintiff, and fixed the commission at \$18.00, which would also give county court costs to the plaintiff. Mr. Towers for the plaintiff; Mr. Lesueur for the de-

Strangway v. Brydges.—The plaintiff claimed of the defendant damages for the Strangway v. Brydges.—The plaintiff claimed of the defendant damages for the failure of the latter to properly till and manage a farm upon which he was the plaintiff's tenant. This farm is in the 10th concession of Enniskillen, at the Brooke townline. The plaintiff was to receive one half of the crops as his rent. He contended that, contrary to the terms of the lease, the tenant had failed to sow a large part of the land or to grow any crop on it last year; that he had put in the seed too late in the season to grow a crop; that he had neglect. that he had put in the seed too late in the season to grow a crop; that he had neglect-ed to cut the hay or harvest the grain in good time, and that they were wasted, and that the farm had been badly mismanaged. The defendant counterclaimed for an equal-In elementary counterclaimed for an equality formidable list of sins of the plaintiff.

Just before the case was called the parties arranged a settlement of the matters in dispute. Mr. Weir and Mr. F. W. Wilson, of Petrolea, for the plaintiff; Mr. Cowan for defendant.

#### A Dehorned Dilemma

A former resident of Lambton, now living in Saskatchewan, had an experience recently that is not likely to escape his memory for many moons. He was driving a herd of steers from one ranch to another, and came The sheep market is steady; spring mbs firm.

to a turn in a small river, which, by crossing would save him a tramp of two or three miles. He decided to drive the cattle

across the stream, and swim over himself Removing his gaments he bound them firmly to the horns of the boss steer. The cattle crossed in safety and he swam across after them. The steers felt so good after their punge in the drink that they decided to have a little frolic and started for house their plunge in the drink that they decided to have a little frolle and started for homeat at a gallop, the leader setting a merry pace, the trousers and underwear of the driver fluttering from his horas like the pennant of a yacht in a stiff breeze. Here was a pretty how do you do. Without reiment enough to flag a handcar, a chilly prairie wind fanning his unprotected frame, and the key to his suit case lost, he felt his position keenly. By crawling through the tall grass, and availing himself of the protection of a friendly fence he managed to reach a hay stack near his home, and his loud cries for assistance attracted the attention of his wife. That gaments dangling from the horns of the leader of the herd, she came to the conclusion that he had been gored to death, and set out to find the margled remains. Her feelings when she observed the undraped form of a man pecking around the correct of the stack, and howling like a dervish ner feelings when she cosed test and and and ed form of a man peaking around the corner of the stack, and howling like a dervish can be better imagined than descrited, and it was some time before she could realize the situation and come to his rescue with a table cover and a pair of gum boots.

Making a flying switch for the house he seized his trusty rifle. There was a sharp crack, a dead steer, and tresh beef at the ranch for the next two weeks.

#### The Western Fever.

[Hamilton Times.] [Hamilton Times.]

The public school inspector of East Middlesex reports 78 tewer pupils on the roll than in 1904. That kind of thing is not peculiar to Middlesex. The people have the western fever, and those who have families bent or farming seek the prairies and farms for their sons. There is, too, a tendency to seek the cities, and in two ways the rural districts are drained of their young. This is to be regretted, from a Provincial point of view, but it is not to be doubted that a liberal admixture of Ontario people in the West will prove beneficial to
