

CHIGNECTO POST AND BORDERER.

SACKVILLE, N. B., MARCH 29, 1888.

Russia denies that she is making troops in the Crimea.

Lord Stanley of Preston, the new Governor-General of Canada, will start for his post about the beginning of June.

It is reported that negotiations are in progress to retransfer the Government Experimental Farm purchased from Thos. Roach, Esq., Macan, back to him again.

The report that Mr. Blake would return to Ottawa before the close of the session, is incorrect. He has written to friends that he cannot be in Ottawa before July.

British exports to Canada in the two months of 1888 were £249,007 as against £1,031,200 in the like period last year. The imports from Canada in the two months were £53,285, as against £70,895 last year.

The new legislature for the Northwest will consist of twenty-four electors and the appointed members. The appointed members will probably be Lieut-Governor Dewdney and Judges Richardson and Rouleau.

A section of the Unionists propose to introduce into the English Parliament a bill to compromise the Irish rent arrears, by giving the judges discretionary power to decide whether the rent arrears or the whole debt shall be liquidated.

A Fredericton despatch says that of the 107 bills introduced, only 31 have so far been disposed of in the assembly. It is not expected that the house will sit after April 5th. Many members talk of going home for Easter, not to return this session, if they can induce the government to look favorably upon such a proposal.

M. DeLesseps writes to the financial correspondents of the Panama Canal company that 283 new obligations have been subscribed for, placing 50,000,000 francs in the hands of the company. He regards this as satisfactory but authorizes correspondents to continue to receive subscriptions. He hopes parliament will authorize the issue of a lottery loan.

A petition was presented to Parliament on Friday for the incorporation of the Tobique Gypsum and Colonization Railway company, with power to construct a line from Perth Centre, on the New Brunswick railway, up the river St. John to Tobique river, thence along Tobique river valley—with a view to connect with the proposed Restigouche and Victoria Colonization railway.

Sunday night's blizzard was very severe in Wisconsin—the thermometer marked only 10° below zero. Not a night's meeting on the upper Michigan Peninsula roads except those propelling snow plows, which are nearly helpless. It is the most complete blockade of the winter in that section. The storm came so suddenly and fiercely that trains were unable to reach the next station.

The debate on the Cartwright resolutions is resumed from time to time, and it is probable that all the members will have an opportunity of speaking on the subject before the vote is taken. The speeches of Mr. Wood and Dr. Weldon have received high praise, and are generally conceded to be valuable additions to the debate. It is generally understood that a division on the resolutions will not be taken till after the Easter recess.

It is said that the New York blizzard has solved the problem of how to get rid of the English sparrow, but the statement must be taken with a grain of salt. The sparrow has come to stay, and will take more than a snow storm to annihilate him. He encountered the Dakota blizzards on their native heath and bobbed up serenely after they had done their worst. It is not probable that after surviving the wild weather of the wild west he will succumb to an effie eastern snow storm.

In response to the application of the American authorities to the Dominion Government for information as to why articles of natural produce now admitted free into the United States have not been placed upon the Canadian free list, the Minister of Customs has made a report which has been approved by the Council declaring that the Canadian Government's interpretation of the standing offer clause of the act of 1879 is that when the American Government agree to admit all articles therein mentioned, free of duty, Canada will reciprocate, but that reciprocity in natural products cannot be introduced piecemeal.

Mr. Goschen, Chancellor of the Exchequer, introduced the Budget in the British Commons Monday evening. The total expenditure for the current year had been £87,429, showing a saving of £23,000 on the estimate, and £214,000 over the preceding year. The revenue was £20,480,000, being £1,354,000 more than the estimate. The excess of revenue over the estimate, added to the saving in the expenditures, gave a total real surplus of £23,000, the greatest since 1874, when it began a decrease with a balance of £9,950,000, and ended it with a balance of £7,438,000. He had decreased the liabilities by £7,601,000, the largest sum paid off during any year since 1872. The expenditure for the coming year was estimated at £28,900,000, a decrease of £213,000 compared with the present year. The revenue was estimated at £26,287,000, giving a surplus of £2,377,000.

The Fishery Treaty.

There is reason to fear that the violent objections of a portion of the Opposition press concerning the surrender of Canadian rights by the British fishery commissioners have been entirely wasted, for the indications are that there is very little chance of the fishery treaty being ratified by the United States Senate. The treaty is admitted by thoughtful men on both sides of the border to be a fair settlement of a long-vested question which has caused much trouble and ill-feeling in the past and may lead to graver consequences in the future, but it seems impossible for the Senate to rise superior to party politics and consider the matter fairly on its merits. Harper's Weekly, in an able and dispassionate review of the subject, says:

"The opposition to the ratification of the treaty however will not be based upon its merits so much as upon the exigencies of party, and the argument will be evidently not a clear and concise statement of wrong done to us so much as an appeal to the jealousy and hatred of England. This is an old and familiar trick and it has been sometimes very effective. The easiest and most obvious course for those who wish to prolong the situation or to exasperate it is to insist that our poor, feeble, British-ruled negotiators have been out-witted and bamboozled into a surrender of American rights by a clever and wily Englishman."

If this view of the situation be correct, there is grave reason to believe that the effect of the ratification of the treaty may be to bring about the presidential election will have more influence on the decision of the Senate than the merits of the treaty or the importance of settling the fishery question.

The Exodus.

The Grant papers are producing their annual jeremiads concerning the exodus from the Maritime Provinces to the United States, and, judging by their reports, it is really a wonder there are any men left to emigrate. The Transcript joins the sad refrain with the announcement that the exodus to the States is "unusually large," and grows pathetic over the deserted farms, "and the scores of farms, on which the old men linger, deserted by all their children." Fortunately, the Transcript has a panacea ready, and it informs its readers that "unrestricted reciprocity is the sole cure for the evils which curse these provinces," but unfortunately it neglects to explain why there are so many deserted farms in New England, when that country enjoys free trade, unrestricted reciprocity and commercial union with the United States.

The Quebec resolutions were carried without debate in the Nova Scotia House of Assembly last Thursday by a vote of twenty-two to eleven. The intention of attacking the passage of the resolutions are described—Premier Fielding moved the resolutions in a two hours speech. When he concluded some were shouted "divide." It was exactly 6 o'clock and very one closed a night session. Premier Fielding was momentarily engaged in replying to a question from one of his supporters while a few humorous members shouted "divide," "divide." A moment later the speaker put the question and before any one realized what was being done a faint cry was followed by a roar of nays and a division was called for. Attorney-General Longley shouted "hold it hold it" but it was too late, the names were being recorded. In less than a minute, without any discussion and, therefore, without any detailed knowledge of the question, the majority had passed the Quebec resolutions. The members who have for a month past been preparing elaborate speeches are furious with rage. The fanciest part is that Mr. Fielding only skimmed the question in his speech, reserving many features to be elaborated by his co-delegates, Mr. Longley and Mr. McGillivray. Three Government men voted with the Opposition.

PERSONAL.

Chief Justice Waite, of the United States Supreme Court, is dead.

Queen Victoria arrived at Florence Saturday. The populace accorded her an enthusiastic reception. A decree is to be issued empowering the Crown Prince William to transact public business in the event of the Emperor becoming disabled.

Dr. R. C. Weldon, M. P. for Albert County, has disposed of his farm property, the price being \$4000. Mr. Congdon, county school inspector, was the purchaser.

Mr. Mobbans, commissioner of public works for Quebec, has resigned in the provincial cabinet. He felt called upon to take this step pending the result of the proceedings to disqualify him.

The Metropolitan will leave early in June to attend the Pan Anglican council, which meets in Lambeth in June next. His Lordship will be accompanied by the Rev. Canon Medley, who will perform the duties of chaplain or private secretary. The bishop could not leave in May to attend the council.

The late emperor's will shows his total savings did not exceed \$12,000,000. A large portion of the property is left to increase the crown treasury or general fund of the crown, established by his father. The remainder is divided among the Empress Augusta, Emperor Frederick and grand duchess of Baden, Babelsburg castle and Coblenz palace are bequeathed to the Empress Augusta.

The sale of Government horses takes place at Fredericton to day. The sale is likely to be largely attended.

The annual Oxford Cambridge boat race was rowed last Saturday and was won by the Cambridge crew.

PARLIAMENT.

Ottawa, March 23rd.—Minister Thompson moved the first reading of the bill to ratify the fishery treaty.

Sir John moved that the speaker withdraw his warrant previously issued for the Kent country election, and on motion of Sir John the House then ordered the issuance of a new writ. This course was pursued in consequence of the speaker having gone beyond his powers in issuing the writ in December last. Mr. Kenney, Halifax, then resumed the debate on Cartwright's resolutions in one of the most practical speeches of the session. He said the balance of trade in favor of the United States was eight millions, and asked could Canada secure a better balance sheet under the new scheme. We at present export sixty-seven million dollars worth of goods to the United States, of which eleven millions are already on the American free list and the proposed American readjustment under the measure now before congress would place nine millions more on the free list, leaving sixteen millions of their import from Canada on those American would still levy duties. Now taking these classes of goods remaining dutiable, the United States purchases from Canada within \$1,600,000, of the aggregate demand for those articles, so that if unrestricted reciprocity be obtained and Canada secure entire control of the American importations of these products, her export trade would only increase by 1,600,000. All other increase of trade would simply consist of exchange between border districts of the two countries which would not materially increase the wealth of either country. In other words, unrestricted reciprocity merely signified a net increase of less than two millions in Canada's export trade. What would Canada lose? First, seven millions of revenue to be made up by direct taxation, but while Canada imports eight dollars per head from Great Britain the United States imports only two dollars per head. Under unrestricted reciprocity Canada would import no more per head from Great Britain than the United States does at present. This would mean an additional loss of seven millions of the customs duty on an aggregate loss of fourteen millions, to be made up by direct taxation. Mr. Kenny then dealt at length with the fishery, coal and farming interests, showing that the United States was not the chief market for Nova Scotia's produce, and that under the scheme proposed advantages obtained would not compensate for the very obvious advantages.

In the evening Mr. Beauclerk, Government, and Mr. Durney, Opposition, spoke in French. Mr. Paterson, of Brant, followed in favor of the resolutions.

March 26.—The debate was resumed to-day by Rykert (Lincoln) who spoke four hours. In referring to the statement made in Tuesday evening's debate by Mr. Paterson (Brant) that at the international board of trade meeting at St. Louis in 1874 a resolution had been moved by the Hon. Thomas White and seconded by Adam Brown, now member for Hamilton, substantially favoring such a measure of unrestricted reciprocity, Mr. Rykert showed that they favored the same measure of reciprocity as the present Government were willing to agree to at any time. He also read from speeches of White and Brown this session to show that they pressed sentiments exactly the same as those they had embodied in the resolution of 1874. Mr. Paterson having also read from the evidence given by the manufacturers before the trade depression investigating committee of 1878, for the purpose of proving that these manufacturers, etc., are in favor of unrestricted reciprocity. Rykert had telegraphed these parties for a statement of their views at the present time, and the majority of them most emphatically deny that they are at all favorable to unrestricted reciprocity. "In fact," said Mr. Rykert, "Mr. Laurier, the acknowledged leader of the Opposition has not yet in the House or elsewhere endorsed the scheme of unrestricted reciprocity, and he (Rykert) doubted that the Opposition had raised their colors to the mast, but that they would be found trying some new expedient at an early date."

Mr. Taylor (South Leads) followed and exposed the Opposition's barley tariff. He stated that the barley American had been in the barley business for a number of years, and that there had practically been no difference in the price paid in Canada until, during the past year, he had actually paid one cent more per bushel more in Canada than his partner had paid in the United States.

Mr. McMillen, then took the floor till midnight in favor of Cartwright's resolution.

Sir John presented a petition to the London Methodist conference asking an extension of the franchise to women.

March 27.—The Northwest Government bill was introduced to-day by Sir John Macdonald. It provides for a legislative assembly of 25 members, to be elected on a household and income suffrage for constituencies not yet determined. As there are not likely to be any legal members in this assembly at first, it is proposed that the Dominion Government shall nominate three legal experts to advise the assembly. These would have the right to sit and take part in discussions, but not to vote.

On motion of Mr. Laurier, the speaker was authorized to issue warrants for a new election in Russell county.

Hon. John Carling laid upon the table the annual report of the department of agriculture.

Mr. Mills made a motion of adjournment, to give himself an opportunity of arranging the Government for not having brought down measures promised in the speech from the throne. He claimed that it was due to the members that they should know what these measures contained, in order that dur-

ing recess they might consult their constituents about them.

Hon. Mr. Thompson ridiculed such a reason as this being advanced. He was sorry that the main circumstance that Mr. Mills could not spend Good Friday and Easter day in studying the franchise and other promised bills should have been made the occasion of the attack he had just made on that on the National Policy and the variety of other subjects unconnected with that which he rose to discuss. He pointed out that of the nine measures promised in the speech from the throne four had already been laid on the table, and so far from the House being delayed for want of the other five, it had not yet had time to commence the consideration of a single one of those already presented.

Cartwright followed in the line taken by Mills and held that the Government's procrastination would be unreasonably prolonged, inasmuch as there was every likelihood of a long discussion on the budget (which he thought would indicate a large increase in expenditure), on the Newfoundland matter, and on the other five. It had not yet had time to commence the consideration of a single one of those already presented.

The debate on unrestricted reciprocity was resumed by Ferguson (Welland) and Haldpath, also spoke.

Local Legislation.

February 21.—Several local bills were committed and Mr. Killam presented the petition of John Calder and 749 others, praying that aid be given to Shediac and Cape Tormentine railway. The speaker said as the matter involved a charge on the public treasury, the petition would have to receive the authority of the government before being received. Mr. Killam withdrew the petition and said he would bring it before the Government.

March 22.—The greater portion of the time was taken up in discussion of a bill for the incorporation of the River Counties Railway Company, which led to some sharp personalities between Mr. Killam and Mr. Tweedie.

March 23.—Mr. Humphrey committed a bill authorizing the extension of the Moncton Cotton Manufacturing Company from taxation. The bill was vigorously supported by Messrs. Humphrey, Hanington, Killam and Black, and was opposed by Mr. Richardson in a long speech, in which he denounced all such legislation as fraught with danger to the country's interest. Hon. M. Blair moved an amendment exempting county school rates. The amendment was lost on division by a vote of 13 to 10.

March 24.—Mr. Lewis, of Albert introduced a bill further amending the law relating to county courts, and intended to change the date of holding the County court in Albert Co. The Government bill relating to the same subject was agreed to by Mr. Hanington supported.

March 25.—The bill relating to attachment, one of the law commission's bills, was under discussion all the afternoon. It was vigorously opposed by Hanington, Black, Killam, Tweedie and others and final progress was reported.

March 27.—Hon. Mr. Blair gave notice of the introduction of the Government railway bill on Thursday. Provincial Secretary McLellan submitted the following supplementary estimates:

To provide for the importation of stock \$20,000
To provide for new departmental buildings \$25,000
To provide for opening up new lands, Co. of Northumberland 5,000
Total \$50,000

Scott Act Notes.
—Since June last over seventeen thousand dollars has been collected for Scott Act fines in Addington county, Ontario.
—Robert O'Neill, of Sydney, C. B., who was convicted last week of a first offence against the Scott Act and who gave evidence in his own case, was tried on Monday before Stipendiary Moseley for perjury and was committed for trial in the Supreme Court.
—Judgment was delivered last week in the recent liquor prosecutions at Truro and the following fines imposed: E. Leckett, for selling and exposing for sale, \$70; W. A. McKim, for exposing for sale, \$20; Simon Fraser, for exposing for sale, \$10; Thomas Dickie, Lower Village, for selling, \$20. The convicted parties have, through their solicitor, given notice of their intention to move the cases to the supreme court by certiorari.
—A Charlotteville despatch of the 22nd inst., says—William Millman, the young man under sentence of death at Charlotteville, made a desperate attempt to escape from jail last night. He was notified yesterday that Governor-General Landseer had refused to commute his sentence, and that the last hope had vanished. This served him to make a desperate attempt to break jail. At half-past six minutes of the condemned cell, with a basket of provisions which had been sent to the condemned youth, just as the jailer stepped, beside the cell, the prisoner suddenly dealt him a heavy blow on the side of the head with a bottle which he had concealed behind his back. The jailer was momentarily stunned, but grappled with his murderous prisoner. The struggle lasted but a few moments, when Millman shook the jailer and flew from the cell to the jail yard. By this time the jailer had recovered his senses and the blow and raised an alarm, when Millman was promptly recaptured and heavily chained to the wall. He was afterwards found to be a man of no ordinary intelligence, and he says he cannot account for his assault on the jailer.
—The Literary Magazine for March comes out in a new dress which is highly creditable to its publishers. The Magazine is published by Messrs. J. L. Black, of Fredericton, N. B., and is a very extraordinary dollar's worth of literature, the nearly 2,000 pages per annum. Those who see it are not surprised at such very complete and interesting articles, for example, by Prof. Perry, of Williams College, is a recent letter to the publisher: "I have long been a subscriber to the Literary Magazine and I am glad to see it all so long as I am able to read."

"From the Past to the Future."

The lecture on Friday evening was delivered by Prof. Smith, with Prof. Tweedie in the chair. The chairman commented upon "the excessive modesty" of Prof. Smith in the past, and expressed a hope, which all who heard the lecture will echo, that we may henceforth permanently include Prof. Smith among our public lecturers. Unfortunately the audience was not so large as it ought to have been considering the reputation of the speaker for learning and culture. The subject of the lecture was "From the Past to the Future." The conditions of society about a century ago were compared with those of the present, the advances estimated, and out of this arose some considerations concerning the prospects and direction of future advance. The lecturer referred in commencing, to the material, intellectual and moral and remarked by the way on the fact that the division was rather practical than philosophical, since the groups were not mutually exclusive. Thus during the last century the average length of human life has increased some nine years, and this one fact implies advance in all three directions. The lecturer limited his field to the last two, simply referring to the other for a passing illustration of the material life, the drink and the polluting habits, and the superstition of our forefathers, were graphically portrayed and illustrated by many striking and entertaining facts and anecdotes. A hundred years ago England was the leader of the slave-trade. Even a prominent Missionary Society was an owner of slaves and refused to allow its slaves to be taught concerning the Scriptures. That worthy minister, Newton, the friend of Cowper, said he had never enjoyed such pleasant hours of communion with God as on his two last trips to Guinea when he was the captain of a vessel in the slave-trade. The horror which such a sentiment now excites shows how great has been our progress. Literature is no longer the monopoly of a few modest and refined. But we are still far from the ideal. Though civilization has made enormous strides since the days of our great-grand-fathers, we are yet imperfectly civilized. Brevitizing the slaves and the colored man in our daily papers. People are in ignorance of the primary laws of health, and bestow nothing like due attention on the body. The old monasticism, which regarded care for the body as a sin, and the mind and body are so interdependent, and the weak body prevents the mind from doing its best and complete work. The man of the future will probably live longer, and with his more perfect mind will accomplish more. There is a great hope of progress when a knowledge of the elementary principles of science becomes general, and men instinctively sit upon them. But the body is only the animal part of the man, and useful as far as it helps his soul to manifest itself. There is possibly a good time coming when people will be as careful to feed their mind as they now are to feed their bodies. To the perfect man one is as essential as the other. We have a great deal to do in this respect to get some knowledge of "the best that has been said and done in the world." Culture has become more possible for the many than ever before. With healthier bodies and more educated minds why should we not expect a more rapid progress in the preceding? The eloquent peroration was a stirring appeal for each to battle manfully in the struggle. We may be "little and unknown," but who can say what is small or great? When the Lord of the vineyard sends his servants to reap, whether they be tolled in some humble sphere may not be rewarded above him who lived in the blaze of fame?
—A despatch from Oporto, Portugal, dated March 21st, says—While a performance was in progress at the Banquet Theatre last night, a fire broke out. The theatre took fire and was destroyed. The house was full of spectators and a number were injured. Two bodies have been recovered from the ruins. Many persons were injured. A later despatch says—Eight bodies have been taken from the ruins. Most of those burned were in the third tier of boxes and the galleries, where whole families suffered. A terrible struggle was going on as the doors when the spectators tried to escape. Large numbers were suffocated and transported to the hospital. Some of those who were so seriously injured that they vomited blood. Nearly all the victims were spectators.
—Putnam's has obtained a widespread popularity as a rare for Cough, Croup, Sore Throat, Scrophula, Stiff Joints, Nervous Prostration, Consumption, Impoverished Blood, Lung, Blood and Brain.
—With HYPOCHONDRIA.
Putnam's Emulsion is made from the purest material, is very palatable and can be taken and retained by the most delicate. BROWN BROTHERS & CO., Chemists, Halifax, N. S.
—The freight traffic on the Burlington road is again at a standstill, owing to the strike of 9200 men employed in the Burlington yards at Chicago. The company had received no notice from the strikers. No grievance has yet been presented, nor has any demand been made by the strikers' union. It is thought that the strikers' union has been taken into the fold of the brotherhood in consideration of their going on strike. Railroad shakings will move no freight until the second strike is settled.
—How to Gain Flesh and Strength.
Putnam's Emulsion is as palatable as milk. Delicate people improve rapidly upon its use. For Consumption, Throat affections and Bronchitis it is unequalled. Dr. Theobald, Ala. says: "I used Scott's Emulsion on a child eight months old; he gained four pounds in a month." Put up in 50c and \$1.00.
—Mrs. Minnie Leibkuehner, of New York city, poisoned her three children on the 22nd. Two of her children aged 8 and 7, are dead, and the other aged 4, cannot live. The mother is also suffering from the effects of the poison.

Ladies who want to know what to buy and where to get their Spring Outfits should not fail to be present at F. A. Wilson's Spring Opening, which takes place on 5th and 6th of April. Special show of Lace and Embroidered Dresses. Photographs.—Frederick C. Palmer has opened a Studio opposite the Brunswick House, and for the purpose of introducing their work, will, for the next thirty days, make Photographs at the following reduced prices: Cabinets, \$4.00 per doz., \$2.50 half doz.; Cards, \$2.00 per doz., \$1.25 half doz.; Pictures taken equally well in cloudy weather. Satisfaction guaranteed. Tintypes taken if required.

LOCAL MATTERS.

—Hay commands a good price here. —Tantram bridge ought to be fixed up. —Daily services at St. Paul's this week. —Measles are disappearing from Mt. Allison. —Easter vestry meetings next Monday morning. —Lower Sackville wants a good hardware store. —The ice is disappearing in the river. The bay is clear. —The festive sleigh bell is making way for the rattle of wheels. —The telephone between Sackville and Dorchester works well. —Old brand chestnut maple candy is now in the local market. —Good Friday to-morrow. Banks and public offices are closed on that day. —The lumber crop the past winter in this vicinity was larger than usual. —Mr. John T. Carter, who has been very seriously ill for some weeks, is recovering. —Mr. Alex. Hume has sold his mare, Black Bess, to Mr. J. Walter Allison, Halifax N. S. —Mr. Wood's admirable speech on Commercial Union, etc., is in type; will appear in our next. —Mr. Alfred Peley, Port Elgin, contracted \$50 for five days ago towards supporting the rum traffic. —Messrs. Arthur Brookes and Thomas B. Hicks are going into the butchering business in Sackville. —The smelt trade in Baie Verte is done—it was never much the past winter. About 50 tons were caught and sent over the Cape By. —Messrs. Silas and Harvey Copp, Middle, received on Monday by the Cape By, a portable saw mill from A. Robb & Sons, Amherst. —Mr. A. T. Parson, manager of the N. E. Freestone Quarrying Co., Wood's Point, and wife, arrived here on Saturday. —One of the largest and finest importations of English goods ever made here has just been opened by Mr. Chas. Pickard. —Mr. J. E. Hume has leased the store on 25th street, which will fit up with goods for gentlemen's furnishing department. —Messrs. A. & W. Fawcett shipped on Monday an extra pair of Easter cakes to Halifax. They weighed about 3600 lbs. —Mount Allison's lecture course has been very successful. One of the best of the course was delivered by Prof. Smith on Friday night. —The new parcel post system with the United States is a great convenience as well as saving to those desiring to send parcels. —The funeral of Mr. Charles Hicks, one of the most respected farmers of this place, took place on Tuesday last and was largely attended. —Have you inspected the assessment roll for the current year? It is taken care that you are taxed high enough? The preliminary lists are about closed. —The wife of L. H. Davies, Esq., M. P., came over in the ice boat on Saturday, making the trip in 2 hours and 20 minutes. She was en route to Ottawa. —Mr. C. Fawcett is making patterns preparatory to introducing a new line of stoves of the very latest styles, selected by himself in United States markets. —The late B. Smith and family, of Batsford, leave in May for Oregon, where three sons of his are thriving. He has sold his farm to Mr. Scott. —Two deaths in one house occurred at Mt. Pleasant, Potoford, on Sunday evening. Mr. John Blacklock, an old and respected inhabitant, and his young nephew, the son of Mrs. Robt. Lamb. —A wood-hauling party to Parson Wiggins' domicile took there great big unmanageable logs, but on Monday a chopping party followed and they were reduced to piles of highly respectable stove wood. —Sackville, with its easy communication by rail and water, its central position, its ready access to cheap coal, its freedom from taxation, and cheapness of living, is a most desirable location for a manufacturing business of any kind. —Stone business promises to be lively the coming summer. The local demand is good and building trades in Boston and New York promise to be very active. The Wood Point quarries will probably be worked up to their full capacity. —The old graveyard at the Methodist Church is an eyesore to the place. The "dug-out" on the side of the roadside ought to have a stone wall protecting as well as screening the side hill. A neat fence ought to be placed around the grounds, trees ought to be planted and walks laid off. Instead of looking like an overgrown and neglected backwoods pasture, it could be made a thing of beauty.

LOCAL MATTERS.

NEW ORGAN.—The director of St. Joseph's College, Memramcook, has purchased a new vocal organ for that institution from the agent here, Mr. G. C. Fawcett. EXCURSION tickets at one fare will be issued from all booking stations on the I. C. R. and Eastern Extension, on 25th and 26th and 28th and 29th March, good for return up to 3rd April. A FINE ANIMAL.—Yesterday Mr. James Melnois shipped to Boston a very handsome grey filly which he purchased from Mr. David Wheaton. The colt, which weighs 1,175 lbs., will be three years old next July. THE SECRETARY SEAMAN'S FRIEND Society, Halifax, acknowledges with thanks the following subscriptions to "building fund" of New Salsers Home. Collected by cards.—Miss Datsy Wood, \$11.00; Miss Lena Powell, \$4.00. CHANGE OF BUSINESS.—It will be seen by advertisement this week that Mr. H. W. Knight has given up the saloon business and is going extensively into the fresh meat and provision trade. Mr. Knight is sure to make his new venture a success. THE R. C. congregation of Sackville have purchased an organ for their new chapel. It was placed in the chapel last week. A choir has been organized under the direction of Rev. Father Porquis, of St. Joseph, and high mass was celebrated last Sunday. THE BOOKSTORE has been thoroughly renovated and has had its appearance greatly improved by new paint and paper. The proprietor is offering to supply paper hangers and decorators as required has made a new departure which will no doubt be appreciated by many, and should be well patronized. A GENUINE SURPRISE PARTY.—The Rev. Mr. Mackay, of Port Elgin, was pleasantly surprised on Tuesday last, by several friends from the Shomague section of his congregation, who visited the Manse, bringing with them a good supply of excellent hardwood. Their kindness is highly appreciated by the pastor and his family. N. B. & P. E. RY.—The Monday morning train to Cape Tormentine has been cancelled, but a special train will leave Sackville every Monday morning till the strait is clear of ice in time to connect with the ice boats. No definite time for starting can be fixed, but passengers will be able to learn the time the train will leave by enquiring of Conductor Trueman on Sunday evening. MOUNT ALLISON.—Miss Dickie, a teacher in the Ladies' College, writes to Truro yesterday that she spends the Easter Holiday's. Prof. Tweed leaves to-day for a short visit to his home at Hampton, and Prof. Smith also goes to-day to visit his mother at Truro. Mrs. T. T. Davis has been seriously ill of measles, but is now convalescent. Mr. Curtis, Theological student, has been suffering from a severe attack of pneumonia, but is recovering. POINT DE BUTE.—The Rev. Mr. Ackman delivered one of his able lectures in Upper Point de Bute last Friday evening. Music, his history and influence, being the theme. The widely extended fame of the lecturer renders elogia superfluous. On this occasion, however, the manner in which the subject was treated, evinced such painstaking research and perspicuity of arrangement as irresistibly gave rise to the conviction that one more chaplet adorned a brow already so often crowned. A selected band of musicians supported the lecturer, and at well chosen intervals, flooded the building with beautiful music, vocal and instrumental. Before the large and delighted audience dispersed, a basket sociable was held, in order to raise funds to purchase a Sunday School library. The cause was good, most ably advocated and crowned with success, viz: Thirty dollars. Mr. Bliss occupied the chair, and Mr. Hiram M. Oopp has sold the house formerly occupied by him at Point de Bute, with land and out buildings to Mr. J. A. McQueen.

Smith and family, of Batsford, leave in May for Oregon, where three sons of his are thriving. He has sold his farm to Mr. Scott. —Two deaths in one house occurred at Mt. Pleasant, Potoford, on Sunday evening. Mr. John Blacklock, an old and respected inhabitant, and his young nephew, the son of Mrs. Robt. Lamb. —A wood-hauling party to Parson Wiggins' domicile took there great big unmanageable logs, but on Monday a chopping party followed and they were reduced to piles of highly respectable stove wood. —Sackville, with its easy communication by rail and water, its central position, its ready access to cheap coal, its freedom from taxation, and cheapness of living, is a most desirable location for a manufacturing business of any kind. —Stone business promises to be lively the coming summer. The local demand is good and building trades in Boston and New York promise to be very active. The Wood Point quarries will probably be worked up to their full capacity. —The old graveyard at the Methodist Church is an eyesore to the place. The "dug-out" on the side of the roadside ought to have a stone wall protecting as well as screening the side hill. A neat fence ought to be placed around the grounds, trees ought to be planted and walks laid off. Instead of looking like an overgrown and neglected backwoods pasture, it could be made a thing of beauty.

LOCAL MATTERS.

—Hay commands a good price here. —Tantram bridge ought to be fixed up. —Daily services at St. Paul's this week. —Measles are disappearing from Mt. Allison. —Easter vestry meetings next Monday morning. —Lower Sackville wants a good hardware store. —The ice is disappearing in the river. The bay is clear. —The festive sleigh bell is making way for the rattle of wheels. —The telephone between Sackville and Dorchester works well. —Old brand chestnut maple candy is now in the local market. —Good Friday to-morrow. Banks and public offices are closed on that day. —The lumber crop the past winter in this vicinity was larger than usual. —Mr. John T. Carter, who has been very seriously ill for some weeks, is recovering. —Mr. Alex. Hume has sold his mare, Black Bess, to Mr. J. Walter Allison, Halifax N. S. —Mr. Wood's admirable speech on Commercial Union, etc., is in type; will appear in our next. —Mr. Alfred Peley, Port Elgin, contracted \$50 for five days ago towards supporting the rum traffic. —Messrs. Arthur Brookes and Thomas B. Hicks are going into the butchering business in Sackville. —The smelt trade in Baie Verte is done—it was never much the past winter. About 50 tons were caught and sent over the Cape By. —Messrs. Silas and Harvey Copp, Middle, received on Monday by the Cape By, a portable saw mill from A. Robb & Sons, Amherst. —Mr. A. T. Parson, manager of the N. E. Freestone Quarrying Co., Wood's Point, and wife, arrived here on Saturday. —One of the largest and finest importations of English goods ever made here has just been opened by Mr. Chas. Pickard. —Mr. J. E. Hume has leased the store on 25th street, which will fit up with goods for gentlemen's furnishing department. —Messrs. A. & W. Fawcett shipped on Monday an extra pair of Easter cakes to Halifax. They weighed about 3600 lbs. —Mount Allison's lecture course has been very successful. One of the best of the course was delivered by Prof. Smith on Friday night. —The new parcel post system with the United States is a great convenience as well as saving to those desiring to send parcels. —The funeral of Mr. Charles Hicks, one of the most respected farmers of this place, took place on Tuesday last and was largely attended. —Have you inspected the assessment roll for the current year? It is taken care that you are taxed high enough? The preliminary lists are about closed. —The wife of L. H. Davies, Esq., M. P., came over in the ice boat on Saturday, making the trip in 2 hours and 20 minutes. She was en route to Ottawa. —Mr. C. Fawcett is making patterns preparatory to introducing a new line of stoves of the very latest styles, selected by himself in United States markets. —The late B. Smith and family, of Batsford, leave in May for Oregon, where three sons of his are thriving. He has sold his farm to Mr. Scott. —Two deaths in one house occurred at Mt. The Dead Emperor.

To-day, with bending head and eyes, then, too, Columbia, Less for the mighty crown laid low in sorrow—law for the Emperor.

Sweet girl—And do you really stand and watch my window every night before you go home, George, dear? George—“I have been doing so, my love, but I shan't any more.”

—Ella Wheeler Wilcox advises all women to marry. That coincides with Disraeli's recommendation to the sex.

—The new Inman Line Steamer City of New York, was launched in the Clyde on Thursday.

—The old story boiled down:—She (early in the evening)—Good evening, Mr. Sampson. Same She (late in the evening)—Good night, George.

—The general aspect of the dairy animal is thinner, sharper and more angular than the feeding animal.

For Sale and To Let.

THE HOUSE on Salem Street, near Capt. B. A. Read's, at present owned and occupied by Mrs. Albert Black.

To Rent.

THE house and grounds formerly the residence of the late Reuben Chase, Esq., Upper Sackville.

Children Cry for Fitcher's Castoria.

The Face in the Plank.

A True Ghost Story.

Last summer I was living at the upper edge of Harlem.

"What kind of a man was he?" "I thought he had been on a big spree, and that he had got a touch of the jim-jams."

"I followed the man's advice, and I suppose he must have spoken to the captain about me, as some person connected with the boat kept me in sight until I was safe ashore in Harlem."

"I had noticed everything along the river, being a minute observer. At the time I speak of there was also a bright lantern light at the head of the pier, doubtless intended as a signal for some vessel that was expected to land there."

"I had been working very hard at land compressing a good deal of my sort of labor into a very few hours every day, and there had been more or less worry mixed with it, and my nerves were very sore."

"I had been working very hard at land compressing a good deal of my sort of labor into a very few hours every day, and there had been more or less worry mixed with it, and my nerves were very sore."

"I had been working very hard at land compressing a good deal of my sort of labor into a very few hours every day, and there had been more or less worry mixed with it, and my nerves were very sore."

"I had been working very hard at land compressing a good deal of my sort of labor into a very few hours every day, and there had been more or less worry mixed with it, and my nerves were very sore."

"I had been working very hard at land compressing a good deal of my sort of labor into a very few hours every day, and there had been more or less worry mixed with it, and my nerves were very sore."

Cruise of the Maria.

(New York or Washington Herald.)

A short time ago a yacht called the Maria was mysteriously fitted up in this city. Quite as mysteriously she took her departure, and she is now probably at her destination, one of the Florida reefs.

"I had noticed everything along the river, being a minute observer. At the time I speak of there was also a bright lantern light at the head of the pier, doubtless intended as a signal for some vessel that was expected to land there."
