GENERAL INDEX

TO THE

JOURNALS

OF THE

HOUSE OF ASSEMBLY

OF THE LATE PROVINCE OF

UPPER CANADA;

COMMENCING WITH THE

FIRST SESSION OF THE NINTH PROVINCIAL PARLIAMENT (1825,)

AND ENDING WITH THE

FIFTH SESSION OF THE THIRTEENTH PARLIAMENT (1839-40.)

(BEING THE LAST SESSION BEFORE THE UNION OF THE CANADAS.)

BY

ALFRED TODD,

CLERK OF COMMITTEES.

PRINTED BY ORDER OF THE LEGISLATIVE ASSEMBLY.

Montreal:

LOVELL AND GIBSON, SAINT NICHOLAS STREET.

1848.

P R E F A C E

ON the 8th September, 1841, an Order was passed by the Legislative Assembly, directing "a General Index to be made to the Journals of the House of Assembly of the late Provinces of Upper and Lower Canada." In accordance with the above Order, this Index (to the Journals of Upper Canada) was prepared; But it appearing that there was no complete set of the Journals prior to 1825, in consequence of the destruction of the Parliament House, and most of the Parliamentary Records, by fire, the Compiler has deemed it advisable to include, in the present Work, the series of *printed Journals only* (which commence with that year); and should it be thought desirable to have an Index made to the incomplete set of the M.S. Journals prior to that date, it may form a separate volume.

The nature of the Work, and the method of its arrangement, cannot be better described than by quoting the following from the Preface to the last Index-Volume of the Commons' Journals, which was directed to be used by the Compiler, as a model in the preparation of the present Work:

"The object of an Index of the Journals of the House of Commons is Twofold: To exhibit, as briefly as is consistent with useful information, all the matters which have been brought under the notice of the House; and secondly, To shew the manner and form of all the Proceedings of the House upon those matters. Under the First description, the various *Accounts and Papers* presented to the House, *Addresses* presented by the House, *Committees* appointed by the House, and indeed all Transactions and Motions whatever, are included; whilst under the Second description, or DIGEST, are to be classed, instances of the various Authorities for presenting *Accounts and Papers* to the House, the Modes of so doing, and the various Orders, Resolutions, and Incidental Proceedings relative to *Accounts and Papers*: and in like manner with regard to *Addresses, Committees*, and the other large Titles which occur in the Alphabetical arrangement."

Under the head of "Supply" will be found a Table, shewing the sums voted by the House in each Session; and, inasmuch as the system that obtained in the Legislature of Upper Canada, of introducing a separate Bill for each grant (instead of including all grants in a general Bill of Supply, as is now the custom), rendered the same liable, in passing through the various stages of the Bill, to alteration or rejection, it was found necessary to examine the Statutes, to ascertain the amount

actually granted, in each case, in order to render the information under that head more complete. This has been done accordingly; and an extra column has been added to the Table, shewing the sum appropriated by each Act, with the chapter of the Statute.

Nothing further need be added, except to state, that the most ready plan of finding the entries under any particular subject, will be, to look at once in the General Alphabet for the title of the subject in question, without regard to the sub-heads, "*Addresses*," "*Committees*," &c. By so doing, all entries relating to that subject will either be seen at once, or a reference will be found to such of them as appear under the sub-heads: For instance, if the matter sought for relate to the Cobourg Harbour, under the head "*Cobourg Harbour*" will be found a reference to the main entries in "*Harbours*," and also, to all *Addresses*, *Committees*, *Messages*, *Petitions*, &c., relating to the subject, which may be contained in the sub-heads.

ALFRED TODD.

LEGISLATIVE ASSEMBLY,
Montreal, 24th February, 1848.

Passed by the Council, 201.—Address to His Excellency, praying him to communicate the Bill to the Imperial Government; Sent down by the Council; Passed, 211. Answer, 224. See *Speeches*, 41.

II. Orders and Resolutions :

20. Several Resolutions, declaring that the construction given to the Constitutional Act, which appropriates the Clergy Reserves exclusively to the Church of England, calls for the immediate attention of the Legislature, —that the present provision for the support of District and Common Schools is quite inadequate,—and that it is the opinion of a great proportion of the inhabitants of the Province, that the Reserves should be sold, and the proceeds applied to increasing the allowance for such Schools, endowing a Provincial Seminary, and erecting Chapels for all denominations of Christians, (1826-7) 23. Bill ordered, 25. See *supra*, 2.
21. Resolution, reported, from a Committee of the whole House, declaring that the reservation of one seventh of the lands of the Province, for the support of a Protestant Clergy, having been generally made in lots of 200 acres throughout the several townships, has materially retarded the improvement of the country; that it is unjust and impolitic to appropriate the Reserves to the support of one Church exclusively, and extremely difficult, if not impracticable, to divide them among the Clergy of all denominations of Protestants; that a large majority of the inhabitants are averse to the establishment of any dominant Church, and that, to terminate the dissension and jealousy hitherto existing on the subject, it is extremely desirable that the Reserves be sold, and the proceeds applied to the promotion of education; Resolution amended and agreed to, (1831) 94. Address to His Majesty, praying him to recommend to Parliament to pass an Act, authorizing the sale of the Reserves for the above purposes, and the erection of places of worship; Ordered; Presented, 95. *Not proceeded in.*—A like Resolution proposed; The following amendments severally proposed and negatived, *viz.*—That “or other improvements” be added, after “Education,”—That an Address be presented to His Majesty praying that he will not consent to any alienation of the Reserves,—That it is expedient to alter the law appropriating the Reserves to the support of a Protestant Clergy, so as to include Dissenting Ministers, (1831-2) 41. Resolution agreed to, and Address ordered, 42. See *Addresses*, 20.
22. Resolution reported by a Committee of the whole House, declaring that the House has repentedly passed Bills to provide for the sale of the Clergy Reserves for the promotion of Education, which have been rejected by the Council, without any other measure having been proposed by them upon the subject; that the House cannot but express extreme astonishment at the representation made by the Council, that the Legislature were unable to concur in any measure relative to the Reserves,—and they feel bound to declare, that they have always been ready and anxious to settle the question, and also to express a hope that His Majesty will not be induced by any representations, secret or open, to depart from His gracious intention of complying with the earnest wishes of the people of this Province on that subject;—The said Resolution to be communicated to His Excellency, with a request that he will transmit the same to the Secretary of State, and call the early attention of His Majesty's Government to the importance of the subject, (1835) 362. To be engrossed, and read again on the following day, 363. Adopted, 365. Two Members ordered to wait upon His Excellency with a copy of the Resolution, 366. See *Accounts and Papers*, 97.
23. Resolution reported by a Committee of the whole House,—That it is desirable to appropriate the Clergy Reserves, and the proceeds arising from sales thereof, to the promotion of the religious and moral instruction of the people; amendment, for substituting “to the purposes of general education,” negatived, (1836-7) 172. Resolution agreed to; To be communicated to the Council, and their concurrence desired, 173.
24. Resolutions proposed, that reservations be made in each township, of 100 acres of the said lands, as glebes for the residence of Clergymen of the Churches of England and Scotland,—and a similar reservation in each circuit for resident Wesleyan Methodist Ministers (limited to 100 circuits),—the Clergy Reserves to be sold, and annual stipends paid, of not more than £100 to each such Clergyman and Minister,—the surplus to be expended in aid of erecting places of worship,—a Board of Commissioners to be appointed to carry the same into effect,—and an Address to be presented to Her Majesty, praying Her to recommend to Parliament the passing of an Act, to authorise such appropriations; Several amendments proposed and negatived, and Resolutions agreed to; Referred to a Select Committee, (1839) 167 to 172. See *Committees*, 594.

III. Questions Negatived, or Superseded :

25. That an Address be presented to His Majesty, praying that he will not comply with any request that he may recommend to Parliament the alienation of the Clergy Reserves, from the purpose for which they were originally set apart, (1831) 95.—The like, (1831-2) 41.
26. Motion, for leave to present a Bill to provide for the disposal of the Clergy Reserves; Superseded by motion for an Address to His Excellency, for information relative to the Address to His Majesty, of last Session, on the subject, (1832-3) 15.
27. That it having been intimated by the Colonial Secretary, in a Despatch to Sir Francis Bond Head, that the constitutional objections to the interposition of the Imperial Parliament on the question of the Clergy Reserves, would be considered by His Majesty at an end, if both branches of the Legislature should apply for such interposition,—and all efforts heretofore made by the Council and Assembly, to concur in a measure for a settlement of the question, having failed,—it is expedient to beseech His Majesty, to recommend to the Imperial Parliament to take measures for regulating the future appropriation and management of the Reserves, (1836) 201.
28. That it is inexpedient to reinvest the Reserves in the Crown, but that they should be sold, and the proceeds paid into the Receiver General's hands, for the public uses of the Province, (1837-8) 323..
29. That the House having been called upon by Her Majesty, to distribute the Clergy Reserve Fund, so as to promote the spiritual and temporal interests of the people, that object would be best accomplished by appropriating the proceeds of 250,000 acres of those lands, for the support of District Grammar Schools, (1837-8) 324.

44. That by the Constitution of the Province it is provided, that a reservation equal to one-seventh of all lands granted be made, for the support of a Protestant Clergy,—that the waste lands of the Crown are the property of the British Nation, and it was the right of the Imperial Parliament to make such an appropriation of lands for the purposes of religious instruction; as to them seemed meet,—and this House has no right to legislate upon the lands which belong to the British Nation, &c., (1839) 344.

8. Notice, by Mr. Fothergill, that he will, next Session, move certain Resolutions, relative to the boundary line between Upper and Lower Canada, and the expediency of Addressing His Majesty, for such an alteration of the same as would give to Upper Canada the benefit of a seaport,—or failing that, that the said Provinces be united, or an Union made of the four British Provinces in North America, under a Viceroy, (1826-7) 93. *Not moved.*
9. Resolutions of the Legislative Council and Assembly of Lower Canada, declaring that it is expedient to appoint Commissioners to treat with Commissioners on the part of Upper Canada, upon matters of common concern, relative to the imposition of duties, and the improvement of the Rivers St. Lawrence and Ottawa, and the roads of communication between the two Provinces; Sent down by Message from His Excellency, (1829) 21. Address ordered, 624. See *Addresses*, 132.
12. A series of Resolutions proposed, setting forth, that the chief causes of the evils under which Upper and Lower Canada have suffered, may be traced to their unwise division into separate Provinces in 1791, when, the line being drawn a few miles above the navigable waters of the St. Lawrence, the commerce of Upper Canada was placed entirely under the control of the Lower Province; and that the interests of both Provinces would be best consulted, by re-uniting them under one Government, upon certain terms (therein set forth); Reported by a Committee appointed to draft an Address to Her Majesty on the state of the Canadas, (1837-8) 350. One of the Resolutions negatived, and the others agreed to, 351. Resolutions to accompany the Address, 353. See *Addresses*, 96.

MacNab, Speaker of the House, and the Attorney-General (Mr. Hagerman) should proceed to England, to draw the immediate attention of the Imperial Government to the difficulties which threaten Upper and Lower Canada, and to submit for their determination whether a Union of the Canadas, the annexation of Montreal to this Province, or any other measure, will best tend to promote the interests of these Provinces; To be communicated to the Council, and their concurrence desired, (1837-8) 372. 14. Several Resolutions proposed, declaring that the House is still of opinion that an Union of the Canadas, on the terms proposed in the Resolutions of the House last Session, is indispensable,—and that it is expedient that one or more authorized Agents should proceed to England, to represent the interests and opinions of the people of Upper Canada; Amendment, that the main objections to an Union set forth in the Address of 1836-7, still exist, and that relief from our present necessities might be better obtained by measures less dangerous, negatived; Motion, for an Address to His Excellency, to dissolve the House, and appeal to the country on the question, negatived; Resolutions agreed to, (1839) 83. To be communicated to the Council, and their concurrence desired thereto, 90.  22. Motion, for an Address to Her Majesty, acquainting Her Majesty that the House has adopted Resolutions assenting to a re-union of the Canadas, without insisting upon any conditions in the details, but stating that they conceive it to be their duty to submit to Her Majesty, the great advantage that would arise to both Provinces, from the Seat of Government being placed within the present limits of Upper Canada, Negatived, (1839-40) 161.
 23. Motion, for an Address to His Excellency, praying to be informed whether he has transmitted to Her Majesty's Ministers, the draft of a Bill to be submitted to the Imperial Parliament, for uniting the Canadas, and if so, that he will communicate a copy of the same to the House, Negatived, (1839-40) 285.

Speeches.

- I. Speeches of the Lieutenant Governor, or Governor General, at the Opening and Close of each Session; 1—41.
- II. Speech of Sir Francis Bond Head, on his assumption of the Government; 42.
- III. Incidental Proceedings; 43—47.

- I. Speeches of the Lieutenant Governor, or Governor General, at the Opening and Close of each Session:

[1825.]

1. 11th January, 1825.—His Excellency's (Sir Peregrine Maitland) pleasure is signified, that a Speaker should be chosen, 3.
2. 13th January, 1825.—The Lieutenant Governor has called the Legislature, at the time which accords best with the public service. He announces that a large sum has been dispensed from the Imperial Treasury, to the sufferers by the late War,—and that the East India Company's Charter has been so modified, as to admit of our receiving a direct supply of an important article of consumption: Also, that the Imperial duty on Tobacco grown in the Western District, has been reduced, in compliance with the Joint Address of last Session. He has directed the Accounts and Estimates to be laid before the Assembly; and calls their attention to the existing Debt, and the propriety of adopting measures for its extinction. At the present time a variety of circumstances have concurred, in raising the Empire to an unwonted height of power and prosperity. He informs them that the Imperial Government is disposed to afford its co-operation, for the completion of the great Works projected by the Commissioners of Internal Navigation,—and expresses his conviction, that from the continuance of unanimity in the proceedings of the Legislature, His Majesty will receive a convincing assurance that the advantages extended are duly appreciated, 3.

I. Speeches of the Lieutenant Governor, &c.—*continued.*[1825]—*continued.*

3. *13th April, 1825.*—In the results of a long Session, His Excellency finds few measures of general interest. Though compelled by circumstances, to reserve the Bill for further regulating our Commercial intercourse with the United States, he will endeavour to give immediate effect to the provision relative to admitting the horses of travellers. He trusts that the amendments to the Welland Canal Act, will facilitate the completion of that Work. He regrets that no provision has been made for the expenses of the Government, and will afford an early opportunity of supplying the omission, and endeavour, in the mean time, to avert the inconvenience to which the Public Service will be exposed. He is not at liberty, in consequence, to consent to any other appropriation from the Provincial Revenue; and hopes that circumstances will not again interpose, to prevent the consideration of important measures, 101.

[1825-6.]

4. *7th November, 1825.*—The Lieutenant Governor congratulates the Legislature upon the continuance of the general tranquillity. He anticipates great benefit to the Province, from the recent change in the commercial system of the Mother Country, as respects her Colonies,—and considers certain exceptions admitted into the enactments, in order to regulate the intercourse with the United States, as additional proofs of the attention of the Imperial Government to the interests of the Colonies. He refers to the recent enactment for admitting British North American Wheat into the United Kingdom, and feels confident that if the results prove successful, the indulgence will be placed on a more permanent footing. The good consequences expected from permission to import Tea direct from China, have been already, in a great degree, realized. He will direct the Accounts and Estimates to be laid before the Assembly. He solicits attention to the Expiring Laws, and is desirous that the Militia Pension Act may be continued. He anticipates an increase in the Revenue, and informs them that a larger proportion of the duties at Quebec, has been awarded by the Arbitrators, than formerly,—and hopes that under these advantages, the existing pressure on our Revenue will not much longer be felt. He states that His Majesty has caused a Military Survey to be made, of the North American Provinces, in order to provide more effectually for their security. He is, at length, empowered by His Majesty, to propose a measure, intended to set at rest the apprehensions of a large portion of the population, respecting their Civil Rights, 5.
5. *30th January, 1826.*—In closing a long Session, the Lieutenant Governor is happy to find, that a portion of the same has been devoted to the advancement of Works of public improvement. He thanks the Assembly for the Supplies for the past and present years, and for the timely assistance to the sufferers in New Brunswick, which has been gratefully acknowledged by the Lieutenant Governor of that Colony. He expresses his satisfaction at the Bill to facilitate the circulation of British Silver, and the Joint Address to His Majesty, on Colonial Trade; but regrets that His Majesty's recommendation respecting the Civil Rights of a certain portion of the inhabitants, should not have been met with the feeling it was expected to call forth. He feels it his duty to declare, that something has recently been wanting to our advancement, which the efforts of the Government, without the cordial co-operation of the Legislature, can never supply, 118.

[1826-7.]

6. *5th December, 1826.*—The Lieutenant Governor informs the Legislature, that no material change has taken place in the general condition of affairs in the Province; but that the agricultural and commercial interests of Great Britain have experienced unexampled depression. He has visited the several Districts, and has found in all, unequivocal proofs of substantial advancement. He fears that the want of Courts of Equity, and other imperfections in our system of jurisprudence, must soon produce serious inconveniences, if not remedied. He has directed the Accounts and Estimates to be laid before the Assembly, and will communicate His Majesty's pleasure on the several Addresses of last Session. He thinks favorably of the prospects of the Province, and of the system of emigration recently adopted by the Imperial Government. He informs the Legislature, that measures are about to be adopted by the Imperial Government, for strengthening our Military Defences, and also, for constructing a Canal from Lake Ontario to the River Ottawa. He states that the Welland Canal is proceeding with rapidity: and directs attention to the improvement of the Highways. He will communicate His Majesty's Instructions respecting the naturalization of Aliens, 1.
7. *17th February, 1827.*—His Excellency observes, with pleasure, several measures of public interest, and hopes that the aid so liberally afforded to the Welland Canal, and several public Works, will produce the benefit expected. He thanks the Assembly for the Supplies for the Civil Service, and assures them that he has ever guarded strictly against an unnecessary expenditure. The Bills relating to the Civil Rights of certain Aliens, are necessarily reserved; but he doubts not that they will be found effectual for the purposes intended. The powers in relation to the projected Rideau Canal, will doubtless prove satisfactory to the Imperial Government. The exertions of Members may be of much use, in giving a right direction to that enterprize and intelligence which is increasing with the growth of the Colony, 97.

I. Speeches of the Lieutenant Governor, &c.—*continued.*

[1828.]

8. *15th January, 1828.*—His Excellency doubts not that the Legislature will regard with undiminished interest, the works in progress for improving the Navigation. He informs them that His Majesty has provided for the establishment of an University, in the Province. He has directed the Accounts and Estimates to be laid before the Assembly; and has reason to believe, that though the past year has not been favorable in a commercial point of view, no diminution of the Revenue is to be apprehended. The Expiring Laws will require attention. The provision for the sale of Lands in arrear for taxes, will shortly take effect: His Excellency's opinion of the necessity of the measure, remains unchanged, but he will be happy to concur in any provision, for preventing unnecessary rigor in the details of the system. He thinks it will be found necessary to provide a more speedily available fund, for the improvement of the Highways. He expresses much satisfaction at the harmony which has prevailed between the different branches of the Legislature, 5.
9. *25th March, 1828.*—His Excellency had hoped that provision for the improvement of Roads, and other measures of general interest, might have been presented to him; and has not, therefore, suffered the prorogation to be hastened by any circumstances, however unusual. He thanks the Assembly for the Supplies. He assents, with pleasure, to the Bill to enable Religious Denominations to hold the necessary lands: that for the relief of certain Aliens, must be decided by the Imperial Government, and he reminds them, that the relief intended by it would have been extended long ago, had the wishes of the Government been seconded, when first expressed. He bids farewell, in the hope that no misapprehension as to the real interests of the people, and the proper objects of all good Government, can be general or lasting, and that the present season of peace and prosperity, will be employed in a zealous application to objects of acknowledged utility, 135.

[1829.]

10. *8th January, 1829.*—His Excellency's (Sir John Colborne) pleasure is signified, that a Speaker should be chosen, 1.
11. *9th January, 1829.*—His Excellency, on assuming the Government, was desirous of meeting the Legislature at an earlier period, but the present season was judged more suitable to the interests of the country. No surer proof of the vigilance and judgment of the Legislature can be adduced, than the prosperity and contentment of the people. The Public Accounts and Estimates, and the commands of His Majesty in relation to several Addresses, will be laid before the Assembly. He calls attention to Expiring Laws, and recommends the repeal of the Act for securing the Province against Seditious attempts. The Report of the Arbitrators, relative to the duties at Quebec, is satisfactory. He advises an improvement of the system of Public Schools; and the adoption of measures to re-model the Royal Grammar School, and incorporate it with the University,—and conceives that exertions should be made to attract able masters to the country. The expense attending the Works in the Gore and Niagara Districts, has been great, but few will regret that they have been undertaken. From the observations of the Deputy Post Master General, relative to Mail Roads, he is convinced that a better system than Statute Labor must be resorted to, for maintaining them. On the encouragement afforded to Public Improvements, mainly depend the agricultural and commercial interests of the Colony, 5. See *Committees*, 859. *Privileges*, 9.
12. *20th March, 1829.*—His Excellency regrets that no measure has been adopted, in relation to the Schools, or the Roads. He thanks the Assembly for the offer of a provision for the Public Service, which he would have gladly accepted, had not the Crown Revenue proved sufficient for the purpose. He points out the embarrassment that may be experienced, from the public business being allowed to accumulate towards the close of the Session, and thinks that this inconvenience should be remedied in future, 76.

[1830.]

13. *8th January, 1830.*—The activity of the Agriculturists throughout the Province, points out the profitable results to be anticipated from affording them encouragement. The extension of the Welland Canal to the Grand River, and the improvement of the River St. Lawrence, are worthy of attention. The Accounts and Estimates will be laid before the Assembly, and it will be seen that the expenses of the Government have been defrayed by the Crown Revenue, and a surplus remains to be disposed of. The necessity for reforming the Royal Grammar School, is evident. His Excellency considers that the delay in revising the Charter of the University, must tend, under the circumstances, to the advancement of the Institution. His Majesty's pleasure on the Reserved Bills has not been communicated. He recommends an examination of the Expiring Laws. He will draw their attention to the want of a system of Secondary Punishment. The diligent investigation which the questions submitted to the Imperial Government are receiving, evinces His Majesty's desire that this Province should reap the full benefit of good institutions, 1. See *Committees*, 631.

I. Speeches of the Lieutenant Governor, &c.—*continued.*[1830]—*continued.*

14. *6th March, 1830.*—The assiduity with which business has been transacted, enables His Excellency to relieve the Members from their attendance. He notices, with satisfaction, the Bill for the payment of the War Losses, and several measures relating to Public Improvements; but must reserve that relating to Shop Licences, from the absence of the accounting clause. He thanks the Assembly for the Supplies and general appropriations. A comparison with former years, will show how susceptible the Province is of rapid improvement; and much benefit may be expected from the individual exertions of Members, 86.

[1831.]

15. *7th January, 1831.*—His Excellency's pleasure signified, that a Speaker be chosen, 3.
16. *8th January, 1831.*—His Excellency informs the Legislature, of the demise of King George IV., and calls their attention to the declaration of His present Majesty, on succeeding to the Throne, that he will rely on the zealous co-operation of Parliament, in his endeavors to protect the liberties of the people. The prospects of the Colony are favorable to exertion. The successful results expected from the improvement of the inland navigation, call for such alterations in the system of making Roads, as will enable the inhabitants of remote townships to participate therein. The Accounts and Estimates will be laid before the Assembly. He calls attention to the Expiring Laws. The Returns and Reports prepared, will shew the effect of the measures adopted for completing the Public Works, and for fostering existing institutions, which, he trusts, cannot fail to accord with the wishes and interests of the people, 3.
17. *16th March, 1831.*—His Instructions to make the important communication of the 28th ultimo, relative to the Civil List, prevented His Excellency from proroguing the Legislature at the time at first intended. The Bills for improving the Roads and the Internal Navigation, will be very generally beneficial. The grant for the extension of the Welland Canal, will prove sufficient, if judiciously applied, and the prosperity of the Colony will most probably be promoted by it. He thanks the Assembly for the Supplies; they will perceive that the expenses of the Government have been reduced, except in those charges depending on the increased population. Those expenses that were supported by the Imperial Government until 1827, can now be defrayed from the duties under the Statute of 14 Geo. III., the assignment of which Revenue to the Legislature, has enabled them to make permanent provision for the Judges and principal Officers of Government, besides leaving a surplus, 105.

[1831-2.]

18. *17th November, 1831.*—His Excellency has summoned the Legislature at a time that appears more convenient than the early part of the year. Several regulations respecting Colonial Trade, have been introduced into the province by the Imperial Government, since last year; an alteration in the Timber Duties was contemplated, and should any be made, the interests of the North American Colonies will not be neglected. He has directed the Accounts and Estimates to be laid before the House, assuming that the Civil List Act of last Session comes into operation on 1st January, 1832. He has been commanded by the King, to propose the enactment of a Bill, declaring that the Judges shall in future hold their commission during good behaviour. The grant for improving the Highways, has proved very beneficial, but it is necessary to establish a system for ensuring the effectual repair and improvement of Roads and Bridges, 7.
19. *28th January, 1832.*—His Excellency observes with satisfaction, several measures of great interest to the Colony. He thanks the Assembly for the sums voted for Public Works and Institutions. He recommends Members to use their influence in organizing, in their respective Counties, Societies for affording information and assistance to Emigrants; the increasing value of land, and the improvements in progress, being the favorable results of Emigration. The Imports and Exports have also materially increased; all of which advantages are proofs of the property and independence created, in a few years, by the industry and labor of the settlers, 131.

[1832-3.]

20. *31st October, 1832.*—The continued Emigration, which is forcing the Province rapidly forward, will render this Session of peculiar importance; the population has increased one-fourth during the past year. No subject is more closely connected with the prosperity of the Colony, or requires earlier consideration, than the anticipated increase in the flow of emigration. The Rideau Canal has been completed, but its chief advantages cannot be attained while the unfinished works on the Ottawa obstruct the passage to the St. Lawrence. The Arbitrators relative to the duties at Québec, not having agreed upon an arrangement, a

third will be appointed by the King. The Cholera has nearly disappeared from the Province. At the time when it spread through the Eastern Districts, the Executive Government adopted such active measures as the exigency demanded. Detailed accounts of the sums expended in consequence, will be laid before the Assembly, together with the Accounts and Estimates for the service of the Civil Government, —and His Excellency trusts that provision will be made for the service of the year, and for the salaries, &c., not sanctioned last Session. His Majesty has acceded to the request of the House, respecting the appropriation of the Grammar Schools Fund. It will be the duty of the Legislature to decide on the mode of applying the School Funds to the intended object, and whether it might not be effected better by the appointment of a Commission, than by an annual vote, 9.

21. 13th February, 1833.—His Excellency observes many measures that cannot fail to be highly conducive to the prosperity of the Province; and he notices with satisfaction, the Bills for the settlement of the War Loss claims, and for the amendment of the Penal Code. He thanks the Assembly for the grants for the Civil Service, and for Public Works. During the Recess, Members may obtain information towards maturing a measure, now very necessary, for extending Instruction in every township. Arrangements can be made for selecting portions of the School Lands, for the use of any particular District or Township. In improving Harbours and Navigations, the capital of the country is doubtless augmented, but the advantage of good Roads, leading from them to the back Townships, cannot be too highly estimated, 140.

[1833-4.]

22. 19th November, 1833.—His Excellency congratulates the Legislature on the favorable prospects of the several Districts. Though the number of Emigrants have not been so large as was expected, the property invested by them exceeds that in any former year. He conceives that if the actual resources of the Colony were sufficiently known and appreciated, an extensive system of Emigration would be adopted by the Parent State. The Report of the Arbitrators relative to the duties at Quebec, shall be transmitted, as also, the Public Accounts and Estimates, and the Accounts of the Casual and Territorial Revenue. The subject of Education demands an early consideration,—particularly the questions which relate to Township Schools, District Schools, and the extension of the Charter of the University upon more comprehensive principles, —to any of which measures His Majesty will readily give immediate effect, 9.
23. 6th March, 1834.—His Excellency observes with satisfaction, the many valuable measures concurred in, especially those for establishing the independence of the Judges, and the law respecting Real Property; but he had trusted that some mode of applying the School Fund would have been decided on. He thanks the Assembly for the grants for the Civil Service, and for Public Works. No measure seems more calculated to promote the prosperity of the Canadas, than the contemplated improvements on the St. Lawrence; the circumstances under which they were undertaken are propitious, the population and wealth of the Province having of late years made a rapid increase, 163.

[1835.]

24. 15th January, 1835.—His Excellency's pleasure signified, that a Speaker be chosen, 14.
25. 16th January, 1835.—His Excellency has convened the Legislature at a time when the interests of the Province are greatly prospering, resulting, obviously, from the flow of Emigration to the Province, and the useful Public Works constructed therein. The improvement of the Navigable Waters in the most flourishing Districts, will engage their attention. The completion of the works on the Ottawa, has brought the Rideau Canal into full operation; and the commerce on the Welland Canal increases. The Public Accounts and Estimates, and Statements of the Casual and Territorial Revenue, will be laid before the Assembly, with accounts of the disbursement authorised during the prevalence of the Cholera, which they will, he doubts not, provide for the repayment of. The Expiring Laws demand attention. He will communicate the suggestions of the Imperial Government, relative to a revision in the Legal Institutions to prevent unnecessary delays, and to the arrangements proposed for re-organizing the Post Office in these Colonies. The assurances he has received, during the past year, of attachment to the Sovereign, have afforded His Excellency the highest gratification, and will be duly appreciated by the Legislature, 14.
26. 16th April, 1835.—The Bills relating to Banking Companies are necessarily reserved, but His Excellency will draw the attention of the Imperial Government to the important objects in view in passing them. He observes with satisfaction the renewal of the grant for Schools. He thanks the Assembly for the Supplies, and for the repayment of the sums expended during the prevalence of the Cholera. He requests that Members will collect information, in their respective localities, relative to the most beneficial system for the improvement of the Roads. He regrets that no appointment has been made, of Township School

Commissioners. Any representation on the Charter of King's College, from either House, will receive prompt attention from the Imperial Government; and while it is important that the Institution should be opened without delay, he is persuaded that the Council of King's College will consent to a revision of the Charter in accordance with the opinions of the two Houses. It will be for the advantage of the people to prepare for the reception of the Emigrants expected from the Parent State, 418.

[1836.]

27. *14th January, 1836.*—His Excellency alludes to various projects, suggested in several Districts, for improving the Internal Communications by land and water, which will claim attention. The works on the St. Lawrence are far advanced. There has been a great decrease in the number of Emigrants, and every encouragement should be afforded by the Legislature, to Emigration: by improving the Roads, giving facilities to commerce, and making the means of Education easily available, the strongest inducements would be afforded. He commends to their consideration, the propriety of establishing Townships Schools,—of amending the Court of Requests Law, and of providing for the support of the Penitentiary. He will communicate the modification of the Charter of King's College, which he has submitted to His Majesty's Government. He will bring under their notice the state of the Gaols. The War Loss claims have not yet been fully paid, but upon £20,000 being provided from the Provincial Revenue, the remaining £36,000 will be defrayed by the Imperial Government. The Duties collected within the Province, have materially increased. The Public Accounts and Estimates shall be laid before the Assembly. The Addresses of last Session have been laid before His Majesty. The inquiries of the Commissioners appointed by His Majesty, respecting the Crown Revenues, the Constitution of the Legislature, the Clergy Reserves, &c., will, he trusts, accelerate the final adjustment of those questions. The dissensions in Lower Canada cannot be regarded with indifference, as their injurious effects have already been felt. The Imperial Government will feel it their duty zealously to protect our Institutions, 1.
28. *20th April, 1836.*—His Excellency (Sir Francis Bond Head) recapitulates the principal events of the Session; and having stated that he had been selected by His Majesty's Government, to carry into effect the measures determined on for remedying the grievances complained of by the Assembly, last Session,—expresses his regret that he has not obtained from the House that assistance, in carrying the same into effect, which he had expected; and alludes to the difficulties between himself and the late Members of the Executive Council, which led to their resignation,—and the subsequent proceedings of the Assembly, on the matter. He expresses his surprise and regret, that the Assembly should have deemed it necessary to stop the Supplies. The effect of this decision will be severely felt by all people in the Public Offices, by the cessation of improvement in the Roads, by the delay in the payment of the War Losses, and by the check of Emigration. In the complaints made against him to His Majesty, by the House, they have availed themselves of a high Legislative privilege, against which he has no constitutional objection to urge; but he cannot but regret that they should have characterised His Majesty's Government, as "Downing Street Law." He regrets that he has totally failed in the object of his mission,—and declares the course of policy which it is his intention to adopt, as long as he remains Lieutenant Governor of the Province. He has received, with pleasure, evidence of the re-action that is hourly taking place in the public mind; and hails the manly British feeling which he sees prevailing through the the Province, 524. See *Accounts and Papers, 457.*

[1836-7.]

29. *8th November, 1836.*—His Excellency's pleasure signified, that a Speaker be chosen, 14.
30. *9th November, 1836.*—His Excellency congratulates the Legislature, on the loyal feeling that pervades the Province. He brings under their consideration the following subjects, *viz.*:—The settlement of the Clergy Reserves,—a revision of the Charter of King's College,—the disposal of the School Lands, and promotion of Education,—the expediency of increasing the number of Judges,—of erecting a Lunatic Asylum,—of opening out new Roads, and constructing a Great Western Rail-road,—an inquiry into the state of the Welland Canal,—and the feasibility of connecting Lake Huron with the Ocean, by the River Ottawa,—and the adoption of an efficient system for regulating the repair of the Roads. He has recommended to the Imperial Government the sale of so much of the Military Reserves as are not required for defence. He hopes for a beneficial alteration in the Land Granting Department,—and has obtained very extensive tracts of land from the Indians. We may reasonably expect, from the advantages we possess, that the redundant population and capital of the Empire, will now flow towards this Province. He will direct the Public Accounts and Estimates for the current and ensuing years, to be laid before the Assembly, and trusts they will speedily relieve the Government from the embarrassment consequent on the withholding,

[1836-7]—continued.

last Session, of the Supplies. He feels confident that the distinguished station attained by this Province in the estimation of the world, will be upheld by the legislation of the present Session. It had been asserted that British sentiments were uncongenial to the soil of America, but Upper Canada has repudiated the libel. The Legislature has not the power to alter the Constitution of the Province, he therefore declared, after his arrival, that he had not the power or inclination to alter a letter of it, and grateful for the support that sentiment has procured him, he declares it to be his intention to maintain the Constitution inviolate, 14. See *Committees*, 75. 241. 607. 651. 725. 767. 840. *Messages*, 12. *Supply*, 2

31. *4th March*, 1837.—His Excellency is gratified at the unremitting attention to the public business during the past Session, and notices with satisfaction the important law improvements which have been introduced,—also, the several measures for increasing the number of Judges,—for establishing a Court of Equity,—for amending the Charter of King's College,—for the completion of the Welland Canal,—the formation of a Great Western, and a Northern Rail-road,—the improvement of the Trent, and survey of the Ottawa,—and the improvement of Roads and Harbours. The War Loss claims have been finally adjusted. The alterations recommended in the Land Granting Department will produce general satisfaction. The labors of the present Session will tend materially to promote Emigration. The reasons rendering it necessary to reserve the several Banking Bills, have already been communicated. He thanks the Assembly for the promptitude with which the Government has been relieved from embarrassment, and for the Supplies for the current year. The appointments and commissionerships entrusted to his selection, shall be made without partiality. He has observed with pleasure, the mutual good feeling between the two Houses, 643

[1837.]

32. *19th June*, 1837.—His Excellency's pleasure signified, that a new Speaker be chosen, Mr. Speaker McLean having vacated his seat by accepting office, 1.
33. *20th June*, 1837.—His Excellency has summoned this extraordinary Session, for the consideration of the Commercial difficulties that have assailed the Province. The Banks in the United States having refused to redeem their notes in Specie, and the Upper Canada Banks having continued to redeem theirs, it remains to be considered, whether they should not be empowered to continue business, for a time, without redeeming their notes; on the other hand, whether the Province would not eventually be a loser, by its Banks breaking faith with the public creditor on the ground of a supposed necessity, or the expense of procuring specie. His own opinion is, that character is of more importance to this young Province, than the cost of obtaining specie for its banks,—that the British Empire has, by plain integrity, amassed its wealth,—and that Upper Canada will find it to be her duty and interest, to adhere to that principle in the religion and the Commercial policy of our ancestors, which commands us "to be true and just in all our dealings," 2.— See *Committees*, 779.
34. *11th July*, 1837.—His Excellency is gratified at the prospect of relief to the Agricultural and Mercantile interests of the Province, by relieving the Banks from all fear of penalty, in case they find it necessary, in accommodating the public, to suspend the redemption of their notes. He is making arrangements for the issue of the money granted last Session for improving the Roads, and has no doubt that the alteration allowed in the terms of the Debentures, will facilitate the negotiation of the loans authorised for Macadamized Roads. No efforts shall be wanting on his part, to give the measures agreed on their most beneficial effects, and he trusts the Banks and the people will mutually support each other, 77.

[1837-8.]

35. *28th December*, 1837.—His Excellency's pleasure signified, that a Speaker be chosen, to serve during the absence of Mr. MacNab on Military duty, 14.
36. *28th December*, 1837.—His Excellency has called the Legislature a few days earlier than usual, on account of the present state of the Province. He condoles with them on the death of King William IV. The Throne of Great Britain is now adorned by Queen Victoria. Notwithstanding the prosperity of the Province, he has suddenly been called on to suppress a Rebellion of the most extraordinary nature; he details the rise and progress of the Rebellion, and the enthusiasm with which the people, from various parts of the Province, and of all parties, in obedience to his summons, aided him to suppress it. He informs them, with regret, that a considerable number of Americans have sympathized with the Rebels, and that a body of Americans has recently taken possession of Navy Island, within our territory, for the avowed purpose of invading our freedom, and changing our institutions. The people of Upper Canada belong to an Empire that will not suffer its subjects to be injured with impunity. He trusts that a few days will prove the good faith of the American Government, and he is now in communication with the Governor of New York,

I. Speeches of the Lieutenant Governor, &c.—*continued.*[1837-8]—*continued.*

and Her Majesty's Minister at Washington, thereupon. He has made arrangements for calling out the Militia, if required. The Public Accounts and Estimates shall be laid before the Assembly. He trusts that provision will be made for the extraordinary expenditure caused by the Rebellion, and for indemnifying such persons as have suffered in consequence of the same, either in person or property. Under ordinary circumstances, many important matters might be submitted, but a speedy termination of their labors might be more advisable at present. Nothing is more important, than to protect the people against a recurrence, of such events, and to provide for repelling hostile aggressions upon our territory, 15. See *Committees*, 325. 841. *Printing*, 16.

37. *6th March, 1838.*—His Excellency is gratified, that notwithstanding attempted invasions of our frontier, the Legislature have been enabled to give their attention to the public interests. He trusts the Militia Law will promote the efficiency of that force, and considers the other measures adopted, as well suited to the exigency. He thanks the Assembly for the Supplies, and regrets, that at a time when the disturbed state of Lower Canada must tend to diminish our Revenue, new charges should be created, by the unexpected hostility of our allies. He regrets that there is still a desire, among a portion of the American people, to force republican institutions on us. All classes in the Province had risen to repel them. The Provinces of Nova Scotia and New Brunswick had evinced a general desire to assist us. The Queen's Troops were allowed to retire from the Province, and the people of Upper Canada had successfully put down the Rebellion. He protests against the invasion of the Province by its allies, and animadverts upon the conduct of the Americans in relation thereto. His successor being hourly expected, he returns to the Mother Country, and will remember, in retirement, the lessons taught him by the people of Upper Canada. With the hope that the genius of the British Constitution may ever illuminate this noble land, and that the people may be animated by its influence, he bids them Farewell, 450.

[1839.]

38. *27th February, 1839.*—His Excellency Sir George Arthur is enabled, by the internal tranquillity of the Province, to meet the Legislature, after a Recess of unusual length. The postponement of the Session had been induced, by pressing duties connected with the public defence, and the administration of justice. His Excellency reviews the recent occurrences connected with the Rebellion, and the subsequent invasions from the United States, the destruction of the "Sir Robert Peel" steamboat within American waters, &c. He advises an amendment of the Militia Laws. The disposal of the numerous criminals connected with the Rebellion and Invasions, has been one of his most arduous duties. The Government have uniformly desired to act mercifully, but the repetition of unprovoked injuries called for some severe examples. The case of those who have suffered in person or property claims attention. His Excellency has been pleased to extend to the militia-men wounded during the Rebellion, the same provision as that allowed to the Regular Forces, and a similar provision for the widows of officers who have fallen. He earnestly recommends a settlement of the Clergy Reserves question, and also, a revision of the enactments relating to Schools. He is commanded by Her Majesty, to bring the surrender of the Casual and Territorial Revenue under the consideration of the Assembly. He regrets, that, in addition to the large sums expended by the Imperial Government for the protection of the Province, the late events have caused a considerable expenditure beyond the sum appropriated last Session,—which has been advanced from the Crown Revenues, and the details, with the Public Accounts and Estimates, will be laid before the House. Such of the claims arising out of the late disturbances, as might properly be defrayed from the Military Chest, have been discharged, but others remain to be provided for. An alteration is required in the mode of negotiating our Debentures in London. A portion of the sum placed in the hands of Thos. Wilson & Co. on account of the Provincial Loan, has been paid, and the remainder is expected shortly. There has been no falling off in the Revenue. The Reports on the state of the Public Works shall be communicated, and it is advisable to take steps for their completion. It is worthy of consideration, whether some better system could not be contrived, for the improvement of the Roads. The Government is anxiously waiting for an early resumption of cash payments by the Banks. He will transmit Her Majesty's Answers to the Joint Addresses of last Session. He has found it necessary to suspend, to a limited extent, the *Habeas Corpus* Act. The improvement of the country has been materially obstructed by past events, but it is hoped that a state of tranquillity and security will soon be restored, 1. See *Committees*, 404. 594. 640. 778. 859.
39. *11th May, 1839.*—His Excellency rejoices that the Legislature has resolved to leave the settlement of the Clergy Reserve question with the Imperial Government, and he will transmit the Bill and Address relating thereto, without delay. He hopes that the Bill accepting the cession of the Casual and Territorial Revenue will prove satisfactory to Her Majesty; the omission, however, to provide for certain annuities charged thereon, renders it necessary for him to reserve it. The Bill for the promotion of Education, gives him great satisfaction, and he hopes that a liberal provision may be made, next Session, for Common Schools. He is happy to observe a Bill for the establishment of a Lunatic Asylum. He considers that, the time

[1839]—continued.

fixed for a resumption of cash payments by the Banks, should have been much earlier, but, nevertheless, concurs in the Bill agreed to by the two Houses. He thanks the Assembly for the Supplies, and will restrict the disbursements within the narrowest limits consistent with efficiency. The serious doubts expressed by the Imperial Government, as to passing any measures tending to affect the Monetary System of the Province, have rendered it necessary to reserve such Bills as have that tendency, and in the mean time the sale of the stock in the Upper Canada Bank, will enable him to carry on the Public Service. It has been necessary, in consequence, to reserve the Bill for relieving the sufferers by the Rebellion and Invasions, lest claims should be presented before means are provided for their liquidation. The protection and advice of the Imperial Government in our money concerns, must be sought for at this crisis. The exertions of Members to maintain the constitutional spirit that has actuated them, and the loyalty of the people, will ensure to them those institutions they so justly appreciate,—in any measures to be adopted for the future regulation of these Colonies, 390.

[1839-40.]

40. *3rd December, 1839.*—The Governor General (Right Hon. Charles Poulett Thomson) informs the Legislature of Her Majesty's fixed determination to maintain the connexion with Her North American Possessions. There are no grounds for apprehending a recurrence of the aggressions on our frontier; but should unforeseen circumstances again call for exertion, we have ample means of defence, in the loyalty of the people, and the protection of the Mother Country. He will shortly bring under their consideration, the subject of the Re-union of Upper and Lower Canada, recommended by Her Majesty to the Imperial Parliament. The condition of the Public Departments requires attention; a Commission has been appointed, to inquire into the subject, and their Report shall be communicated, when prepared. An arrangement has been concluded by the Imperial Government, for opening a communication, by steam, between Great Britain and British North America. The decisions on the various Addresses and Reserved Bills, shall be made known without loss of time. The financial condition of the Province requires most attentive consideration; and measures should at once be adopted, for enabling the Provincial Revenue to fulfil its obligations. The Estimates will be prepared with a due regard to economy. The Banks have resumed specie payments, notwithstanding the commercial difficulties in the neighboring States. He has again to submit the surrender of the Casual and Territorial Revenue in exchange for a Civil List, and the grounds on which the settlement lately proposed was not assented to, shall be explained. The affairs of the Canadas have for years occupied the attention of the Imperial Parliament, and their settlement admits of no further delay; he appeals to their wisdom, loyalty, and good sense, to co-operate with him in such measures as may tend to restore peace and prosperity to the country, 1. See *Committees*, 839. *Printing*, 16.
41. *10th February, 1840.*—His Excellency expresses his deep sense of the zeal and assiduity of Members, during this the most eventful Session of the Legislature. Their willing acquiescence in the proposed Re-union of the Canadas, has much gratified him, and he looks forward to an early completion of the measure. The Bill for the disposal of the Clergy Reserves, will, if finally concurred in, set that question at rest. The Bill for the payment of the losses by the Rebellion and Invasions, has been reserved, to await Her Majesty's decision on the Address praying that they may be defrayed from the Imperial Treasury. He thanks the Assembly for the Supplies. Their decision relative to the Civil List under the proposed Union, rendered it impossible for him to submit any proposal for the surrender of the Crown Revenues in exchange for a Civil List for this Province, but their Resolutions shall be transmitted to Her Majesty. The circumstances of the Province have prevented the adoption of measures for the removal of its financial difficulties. He hopes that Members will endeavor to promote, in their several Districts, that spirit of harmony and conciliation which has distinguished their proceedings here. He himself will endeavor so to administer the Government, as to promote the happiness, unity, and prosperity of the people, 385.

II. Speech of Sir Francis Bond Head, on his assumption of the Government:

42. *27th January, 1836.*—His Excellency informs the Legislature, that he has been commanded by His Majesty to lay before them the Answers to the several Addresses and representations of the two Houses last Session. He has nothing to promise or profess, but calls upon the Legislature for that loyal, constitutional, unbiassed, and fearless assistance, which the King expects, and the interests of the Country require. (1836) 71. See *infra*, 46. *Committees*, 837.

14. Resolution, that the House will, on Monday, 21st November, 1825, proceed to the consideration of the losses sustained by certain inhabitants of this Province, during the last War with the United States, (1825-6) 9 Subject referred to a Committee of the whole House; 21. Considered; Report progress, and two Resolutions, expressing a desire that the Legislature of Lower Canada will concur in the imposition of new duties on imports, to provide for the relief of the sufferers; Further report, of two Resolutions, for expunging the former Resolutions from the Journals, and for Addressing His Majesty, to pray that He will lay the matter before the Imperial Parliament, 33. Resolution, granting £57,412 10s sterling, towards the payment of the War Losses; Further Resolution proposed, for applying the duties on Salt and Whiskey, imported from the United States, to liquidate the above amount; one amendment proposed and negatived, and another, for adding "upon His Majesty's Government providing an equal sum," carried; main motion, as amended, negatived, (1830) 29.—Motion, that the duties on Whiskey and Salt alone, be applied to liquidate, &c.; amended; main motion, as amended, negatived, 34. Former Resolution expunged; Resolution, that the House are unwilling to admit the principle, that the inhabitants of a Colony should bear the losses sustained by them in a national war, but as they are anxious to relieve the sufferers, it is expedient to continue the duty on Salt, and to apply the same, together with the proceeds of the duty on Whiskey, imported from the United States, to the liquidation of the War Loss claims; Committee appointed to draft a Bill, with instructions to limit the amount to be so applied to £57,412 10s. sterling, with interest, to be paid solely out of those revenues, and on the condition that the Imperial Government contribute an equal sum, 38. Bill presented, 39. See *supra*, 1.
16. Resolutions proposed, that it has been found impracticable to raise the loan authorised by the Act of last Session, for the payment of the War Losses, and as it appears that nothing less than the actual payment of the sum of £57,412 10s. will induce the Imperial Government to make their payment of the like sum, it is expedient to authorise the Receiver General to raise the same by a loan, to be repaid in 25 years,—the duties on Salt and Whiskey to be applied to the payment of the principal and interest of such loan, and the Provincial Revenue to be pledged to make good any deficiency, and the moneys arising from the sale of Forfeited Estates to form a sinking fund for the redemption of the loan; an amendment proposed and negatived, and Resolutions agreed to, (1831) 96. Bill ordered, 98. See *supra*, 3.
