NATURAL MINERAL WATER

is well known to, and highly recommended by, members of the Medical Profession as a specific for the cure of a large number of diseases: such as Female Troubles, Rheumatism, Indigestion, Dyspepsia, Kidney Complaint, Salt Rheum, and ailments of every kind arising from impurities of the blood, etc. It is deemed to be unsurpassed in all cases of General Debility.

The marvelous curative powers of the Abenakis Mineral Spring Water, named for the Abenakis tribe of Indians, were well known to these and other Indian tribes, many of whom are said to have come great distances to procure restored health and strength from the use of the "Water of Life," as they called the waters.

The Mineral Water is used as a beverage and for baths. It is bottled at the Springs and shipped to all parts of the country. Write for large Descriptive Booklet, Testimonials and Analysis of the Abenakis Mineral Water.

GEO. W. REED & CO.,

MONTREAL.

FOR SALE, in Canada (about 5 miles West of Niagara Falls) in the Garden of the Dominion, that First-Class Grain, Pasture and Fruit Farm known as "BEECHLANDS," situated immediately East of the town of Thorold, and 4½ miles from St. Catharines, in the Province of Ontario; about ¼ mile from P. O., Market, Railway Stations, Churches, Schools, &c., containing about 90 acres fertile loam clay; Fishing Stream of Water and Railway through the place; Partridge Grove at lower end; Barns, Stables and other Outhouses, all for \$7,500. Or will sell without large Stone House and part of Orchard, Grove and Lawn, say 8 acres. The Gothic Stone Lodge-House, at the North gate is ample for ordinary family. Easy terms of payment. The place is well adapted for, and produces Wheat, Oats, Barley, Hay, Clover, Apples, Grapes, Pears, Peaches, Plums, Cherries, Quinces, Strawberries, and other small fruits, nearly all of the finest quality. Or will Lease Farm, Lodge and Outbuildings (the latter somewhat out of repair), with privilege of buying. No waste land. Thorold and St. Catharines have a connecting electric-tram service running through the manufacturing town of Merritton. The steam railway service to the Falls has been replaced by an electric railway service. Address the owner, M. S. FOLEY, Editor and Proprietor of the "Journal of Commerce," Montreal, Canada.

The Sylvester Gas and Gasoline Engines

are, beyond doubt, the most complete and economical Engine on the market. They are compact and perfectly under control, easily managed, get up speed immediately, thoroughly reliable and where intermittent power is required, they are just the thing.

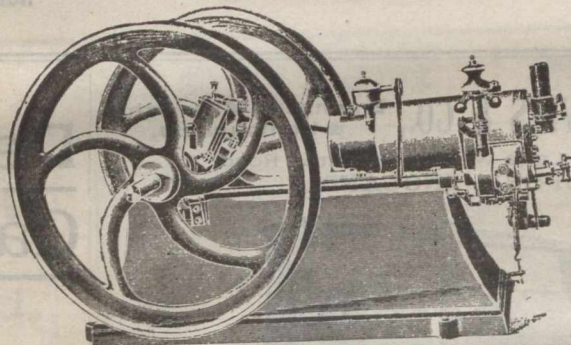

They are built in sizes from 1 to 20 horse power, upright and horizontal, for pleasure yachts, boats, shops, farm work and any purpose where light power is required.

Tell us to what use you want to put the engine and what power you require, and we will name you prices.

WANTED

A firm to take up the manufacture and sale of

Proctor's Patent Mechanical Stokers & Self Cleaning Bars.

These inventions have been the subject of a great number of patents, and may now be looked upon as complete and well developed machines.

As a proof of the utility of this invention, 8,500 have been fitted up in England.

Also one fourth of this number have been renewed, many of which have been working 20 years, and 65 per cent. of the business is from old customers.

These Patents can be taken up either on Royalty or would sell for cash and small Royalty.

APPLY :

JAS. PROCTOR,
Hammerton Street Iron Works,
BURNLEY, ENGLAND.

Do you require any Printing this week?
Telephone Main 238 will ensure prompt service.

Commercial Summary.

Merchants, Manufacturers and other
business men should bear in mind that the
"Journal of Commerce" will not accept ad-
vertisements through any agents not specially
in its employ. Its circulation—extending to
all parts of the Dominion—renders it the
best advertising medium in Canada—equal
to all others combined, while its rates do not
include heavy commissions.

—The storms of the past week caus-
ed considerable damage in the vicinity
of Sherbrooke, Que.

—Mr. Thomas J. McCaffrey, formerly
manager of the Union Bank of Canada
in Winnipeg, will be business manager
of the new assay office to be estab-
lished at Vancouver, B.C.

—The total duty collected at the port
of Toronto for the fiscal year ending
June 30, was \$5,310,985.52, as compar-
ed with \$5,367,248.44 for last year, a
decrease of \$56,262.92. The number of
entries for the year just closed show
an increase of 3,514 over 1900, the fig-
ures being for 1901, 96,551; 1900, 93,037.
For the month of June this year the
duty collected was \$378,845.60, compar-
ed with \$312,366.10 for the correspond-
ing month last year, an increase of
\$66,479.50.

—Negotiations which were in pro-
gress some time ago with the Repub-
lic of Mexico looking to the establish-
ment of a parcel post between Canada
and Mexico, have been concluded. The
convention had been agreed upon, and
then the question arose as to the
transit of the parcels through the
United States territory. The postal
authorities of the United States do not
allow closed parcels to enter their ter-
ritory. Any packages going from Can-
ada to the United States come within
the category of fourth-class matter,
the rate on which is 1 cent an ounce,
but the packages so sent must be read-
ily opened for inspection. The Uni-
ted States Government objected to
closed parcels passing through their
territory, and accordingly the pro-
posed postal service between the Do-
minion and Republic has been dropped.

—The American Canoe Association has, it is reported, purchased Sugar Island in the St. Lawrence, and will use it as a summer home.

—Their many friends will be pleased to learn that the enterprising firm of W. P. Butterfield, galvanizing works, Shipley, Yorkshire, England, have bought over the business of the Yorkshire Tank Cistern & Copper Company, Shipley, and intend to work it in connection with their own business, under the name of W. P. Butterfield.

—The new steamship Lake Manitoba, of the Elder-Dempster Line, was launched from the Tyne shipbuilding yard of C. S. Swan & Hunter, Limited, last week. The vessel, which is the sixth steamer built by this firm for the above company, is intended for the Canadian passenger trade, and will be run in their Beaver Line between Liverpool and Montreal in the summer and Halifax in the winter. She is a twin-screw vessel of the following dimensions: Length over all, 483 feet; beam, extreme, 56 feet, and depth, moulded to upper deck, 34 feet 10 inches. Above the upper deck a complete shelter deck right forward and aft has been fitted, whilst above that again there is a bridge 162 feet long.

—The Anchor steamship Armenia, from New York, bound to St. John, N.B., to load deals for the west coast of England, went ashore in a dense fog on the morning of the 29th ult., on Nigger Head, a point about seven miles from St. John. After she had been on the rocks about an hour two tugs went to her assistance, but were unable to pull her off. When the tide went down she fell over on her side, with her smokestack down to the water. Capt. J. W. Shankin, in command, has been to sea for 50 years. The Armenia is 2,218 tons register, of the following dimensions: Length, 364.3 feet; breadth, 38 feet; depth, 28.6 feet. She was built at Glasgow in 1881. She was lately engaged in carrying passengers from Mediterranean ports to New York. Previously she was engaged in the Indian trade, and of her crew of 66 persons, fifty are Lascars.

—High praise is given in recent issues of the Glasgow papers to an illustrated lecture on Canada by Mr. Frank Yeigh, in the music hall of the exhibition before an audience comprising several thousand people. The Herald says: "The lecturer, who is a Canadian-born, proved himself thoroughly conversant with matters relating to the great Dominion, as he conducted his audience from Nova Scotia to the Northwest and the Rocky Mountains. Mr. Yeigh was flattering to the Scot in Canada. He would like to see more of our countrymen there, and he would also like to see more money used to exploit the resources of our transatlantic colony. One of the most popular series of beautifully-colored stereopticon views was one illustrating the doings of Canadian soldiers in South Africa. Mr. Yeigh made appropriate reference to the martial spirit displayed by the Canadians, which, he thought, would help to link the motherland and the colony closer together." Mr. Yeigh has also appeared in Edinburgh in connection with the Nelson free library halls in that city. The Scotsman reports that the large audiences present were deeply interested in the graphic description of the natural resources of the Dominion, its rich resources and vast potentialities. Mr. Yeigh also gave his subject before the 1,300 inmates of the Quarrier orphanages at Bridge-of-Weir.

—A blue-book on India, just issued, shows that £18,390,000 was expended for the relief of famine sufferers during the year 1899-1900. The mortality from the plague for the five years ending March, 1901, according to a London report, was nearly 600,000. The census completed in March, 1901, shows that the increase in population during the past ten years was only five to six millions, instead of the normal nineteen millions. The loss represents death from famine, and the decrease in birth in consequence of the famine.

—Mr. C. R. Somerville, paper box and gum manufacturer, London, Ont., is about to build a five-storey factory on the Anderson property. It will be 80 feet wide, and 100 feet deep.

—A collision of freight trains on the Grand Trunk near Bowmanville, Ont., on the 1st inst., caused a loss to rolling stock, merchandise, etc., of some \$35,000.

—The financial year of 1900-1901 just closed shows the largest customs receipts in the history of the Dominion. Exclusive of the Yukon and the Coast, from which returns have not yet been received, the customs revenue for the year is \$28,990,254. This is an increase of \$81,236 over last year, and will be \$200,000 when all returns are in. In 1896 the customs revenue was \$20,000,000. The returns for June show receipts were \$148,464 more than in June of last year.

—The recent additional order from the Home authorities for hay for South Africa means that including the August shipments, 56,000 tons will be sent from the Dominion. Up to the present since the outbreak of the war the Home Government has expended in Canada over \$2,000,000 for hay, jams, meats, preserved vegetables, etc.

—A shipment of Canadian tobacco is being sent to Belgium with a view to endeavoring to open up a market there for this product of the Dominion. It is stated as likely that Prof. Robertson, now in England, will proceed to Antwerp for the purpose of finding a competent agent to handle it.

—The International Salt Combine, reference to which was made in a former issue, appears to be something more than a mere rumour. A New York letter states that the formation of the international salt combine is progressing rapidly, and a definite announcement relative to the deal is expected early in July. Mr. Archibald White, president of the National Salt Company, says the main reason for organizing the company is that there are enormous salt deposits in England and on the continent, and that economies are to be introduced that will materially increase the earnings of all included in the consolidation. The enormous quantity of salt in Europe has been a menace to the plans of the Americans.

—The last act in the story of a sensational mining venture, says a Vancouver, B.C., dispatch, was perfected a few days ago, when the concern, floated for two million pounds in London under the name of the Goldfields of British Columbia, was wound up. The Goldfields syndicate owned the Waverly and Tangier mines, which were exploited as extremely rich. Compressor, concentrator and other plants were purchased for over \$100,000, but were dumped along the trail. One pound shares were boomed in London to 32 shillings and then the crash came. Nothing was ever realized on the assets. The whole plant has been purchased by the Marble Bay Mines of Texada Island and will be installed there at once. The Goldfields smash was one of the worst in the history of British Columbia mining.

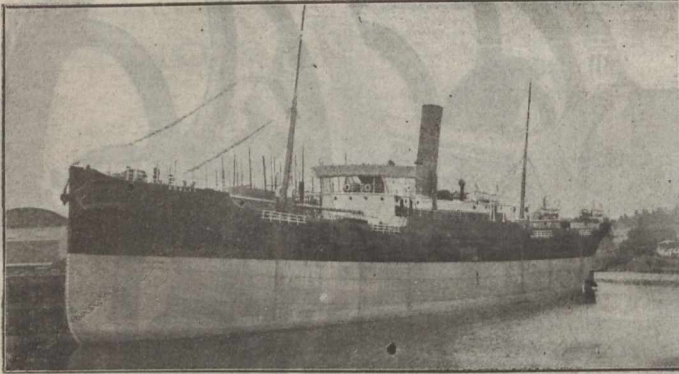

—The success which has attended recent attempts at shipping Canadian peaches, pears, grapes, etc., to European markets, has stimulated growth to an extent not hitherto calculated on. The latest success, which goes hand-in-hand with this is the successful shipment of strawberries to distant points. An Ottawa dispatch of recent date says: Strawberries, which have hitherto been considered too perishable to ship from Grimsby, Ont., to Ottawa, were successfully brought to the capital this week in a refrigerator car modelled especially for the purpose. The berries arrived in the city absolutely dry, all the moisture having been carried off by the automatic system. The success of this shipment is said to have solved the problem of shipping perishable fruits by a system of refrigeration which may be relied upon.

—Canadian Pacific Land Department reports land sales for June to be 50,168.03 acres for \$161,352.28, as against sales for the same month last year of 57,831.07 acres for \$18,779.64. Canada North-West Land Company's land sales for June, 1901, are 8,600 acres for \$48,500. During the same month last year the latter company's sales were 7,600 acres for \$41,000.

Special estimates to Canadians under the New Tariff.

—Recent advices from Halifax, N.S., state that the plans for the fortress have been completed by the Imperial authorities, and the work will commence at once. The fortress will be much larger than that at the York Redoubt, and will be armed with the most powerful of weapons. It was the intention to erect a fort out of the water, on the principle adopted in ports in England, but it was subsequently decided to have it constructed out of the solid rock. The site selected is three miles west of Herring Cove entrance to the harbour, immediately facing the water. The Imperial authorities selected a large granite cliff which has a hollow in the centre. The main part of the fort will be located in this hollow, and the work to be completed of cement, giving the appearance when completed, of a solid cliff. Steam drills for dynamite blasting and a stone crusher have been transported to the site of the fort and work will be commenced at once. The fort will have as its principal armament sixteen of the latest style guns, of the disappearing type. These will be fired by instructions from a conning tower, and will be worked on the system in modern war vessels. The fort will be the largest this side of the Atlantic.

—At a recent meeting of the Norfolk Chamber of Agriculture, says a London cable, the following resolution with reference to the importation of Canadian store cattle, was carried after discussion, with one dissident:—"The Norfolk Chamber of Agriculture protests against the continued exclusion of Canadian store cattle from Great Britain as most unjust to the grazing interest, and prays the Government to remove the restrictions at an early date and to allow these animals to be landed for fattening by British farmers. In the opinion of the Norfolk Chamber of Agriculture, Canadian stores are among the most healthy cattle ever fattened in Norfolk, and in view of the complete immunity from all serious contagious diseases of the flocks and herds of Canada there is no reason for their continued exclusion from this country." The resolution was ordered to be forwarded to the High Commissioner for Canada, the Colonial Secretary, the President of the Board of Agriculture, the Central Chamber, and the local members of Parliament.

THOMAS FARRAR, Borough Brass Works,
KEIGHLEY, England.

—Considerable interest has been aroused in Washington, U.S., on receipt of a late special cable from Paris stating that the shortage in the French wheat crop would probably necessitate the importation of at least 36,000,000 bushels this year. France gets wheat from outside, chiefly from the United States and the Argentine Republic, but the duties imposed on American wheat and flour have been practically prohibitive for several years. Germany is also in danger of a heavy shortage in her wheat supply. Mr. Mason, the United States Consul at Berlin, has sent a report to the State Department, saying that the unfavorable condition of the wheat and rye fields of Germany has grown more and more ominous, "until it is now recognized as inevitable that the cereal harvests of 1901 in Prussia will show the largest and most disastrous deficit that has been recorded in recent years. From the most careful estimates that can now be made, the winter wheat crop of Prussia, which was 2,245,515 metric tons in 1900, will this year not exceed 1,192,000 tons, leaving a deficit of 1,053,515 tons, which would cost \$43,732,500 to replace with imported grain. Including the deficit in the rye crop, Mr. Mason says that in Prussia alone there will be a shortage of 1,766,636 tons of bread-producing cereals, valued at \$67,246,500.

—Recent London advices state that after a prolonged debate and considerable disorder, the House of Commons, in committee, on the 28th ult., adopted the coal tax by a majority of 86.

—Mr. J. P. Morgan does not seem to have spent all his available cash in ocean steamships and rare paintings. He proffered something over \$1,000,000, last week, for the erection of three buildings in connection with the Harvard Medical School at Boston.

—The Bank of Hamilton is increasing its capital from \$2,000,000 to \$2,500,000, and the Bank of Toronto is increasing its capital from \$2,000,000 to \$3,000,000.

—The Franco-Canadian Steamship Company has secured the services of the Garth Castle, of the Castle Line of steamships, to take the place of the Lusitania, now wrecked on the Newfoundland coast.

—The Montreal Customs collected \$37,847.11 for June in advance of the corresponding month last year. Following are the collections for the months of June, 1900-1901: June, 1900, \$731,607.93; June, 1901, \$769,455.04.

—The Nova Scotia Steel Company, says a Halifax dispatch, has passed out of existence, and in its place has arisen the Nova Scotia Steel and Coal Company. This reorganization was accomplished at a meeting of the directors of the Nova Scotia Steel and Coal Company on the 28th ult. The capital of the Nova Scotia Steel and Coal Company is \$9,500,000. The directors of the old company were elected without change as directors of the new.

—Recent advices from Duluth, state that by deeds filed on the 27th ult. at West Superior, Wis., with the registrar of deeds, the Great Northern Railway Company secured control of Superior Bay front for a distance of about ten miles. The purchasing of the last lot by J. J. Hill means the starting of work on vast improvements by the erection of passenger and coal docks. The plans include the largest merchandize dock in the world for the handling of the Oriental trade.

—Ottawa Notes.—The Hull electric cars will commence to run into Ottawa over the interprovincial bridge this week. This will give Ottawa people an opportunity of going to Aylmer direct without the necessity of changing cars at Hull, and, it is said, for a ten-cent fare.—D. Smith, C. A. Macpherson, Kingston; Hugh Macpherson, Nelson, B.C.; F. H. Hooper, Brownsburg, Que., and F. King, Kingston, have been incorporated under letters patent to take over the business carried on by the Ontario Powder Works, and to manufacture and deal in explosives. Total capital stock, \$100,000.

"Extra" Brand.

The J. C. McLaren Belting Co.
FACTORY:
MONTREAL. TORONTO. VANCOUVER.

—Our Cornwall, Ont., correspondent writes:—Crops in the vicinity of Cornwall, with the exception of some on low land, promises an abundant yield. The hay crop is the best for years, and if the weather suitable for curing it will be had, farmers will have nothing to complain of. The grain crop it is too early to speak conclusively about, but if the weather continues as favorable as it has been for the last month, the crop will be one of the finest for years.—The price of cheese on the Cornwall board rules high, about the same as last year, but the flow of milk is put at from fifteen to twenty per cent. greater, consequently the farmers will be better off, even if prices on the whole make are not as high as last year, which make the prospects of the farming and business community very bright.—The Council are submitting a by-law for the purpose of erecting a waggon factory. It is expected that the company will employ from fifty to seventy hands, and have a capacity of ten waggons a day. Should this industry be carried on it will mean much for the prospects of the town.—The St. Lawrence Power Co. are pushing their work as rapidly as possible, expecting to have by the 1st of September, 1,000 horse-power ready, and later on in the fall some 3,000 more. It is a well known fact that the company is composed of some of the strongest financial men in this country, so that with the increased demand for electric power for manufacturing and the cheapness with which they will be able to produce it, we look for a large influx of manufactures in this locality.—The town and vicinity are well situated, having two railroads competing, and also navigation. Some eighteen or twenty steamers pass by the town every week carrying both passengers and freight.—The cotton industry at present is somewhat dull, the Colored Company's mills only running week about since the middle of April. This of course, makes some difference with business men. If this half-time work continues much longer they will find themselves short of the best class of operatives.—The Toronto Paper Co. will soon have their new addition completed, which will increase their output fully one-third. They will then have one of the largest and most complete paper manufacturing establishments in the Dominion. They are rushed with orders at present, having to run every minute possible in order to partially fill the demand.—Other manufactures seem to be as busy as usual, and with the prospects of so bountiful a harvest, and the prices of all agricultural commodities so high, the usual prosperity will continue or increase.

—The revenue returns for the United Kingdom for the quarter ended June 30 show an increase from all sources of £5,481,105, and a net increase of £3,068,105 over the returns of the corresponding quarter of 1900. Of the increase £2,440,000 is derived from the income tax and £727,000 from the customs.

"PERFECT" SCOTCH WHISKY.

This Whisky has been well known for nearly a century. During that period it has not varied in character. There is nothing finer in the market. Made solely from home-grown barley, and sold perfectly matured when seven and ten years old.

—A special general meeting of shareholders of the St. Lawrence & Adirondack Railway Company was held at Montreal, on the 2nd instant. The act respecting the St. Lawrence & Adirondack Company, which recently passed in Parliament, was unanimously accepted, and approved, and it was decided to issue debenture bonds to the amount of \$300,000 for the purpose of equipment.

—The St. John, N.B., Customs returns for June were \$73,967, an increase of \$2,193 vore the same month last year. Total St. John Customs receipts for 1899-1900, were \$897,659, for 1900-1901, gain of \$61,996. Transactions at the Government Savings Bank, St. John, for the year ending June 30, were: Deposits, \$759,124; withdrawals, \$683,730; deposits for June, were \$62,538; withdrawals, \$58,612.

—Ottawa advices state that the Government, on the recommendation of the Hon. M. E. Bernier, has adopted an important regulation affecting tobacco factories. Foreign leaf imported for the manufacture of cigars pays a duty of 10 cents a pound. After cigars are manufactured there is quite a residue left, which is known in the trade as "cuttings." It has been decided that when these cuttings have been re-cut, packed and exported, a refund of 10 cents per pound will be made to the manufacturer under certain restrictions. Formerly the tobacco factories burned their cuttings from cigar leaves, not having any other use for them. Of late, however, a considerable demand for this kind of tobacco, has sprung up in St. Pierre Miquelon, Gibraltar and other places.

—The Knechtel Furniture Company, Hanover, Ont., has been authorized to increase its capital from \$100,000 to \$750,000. The following Ontario concerns are incorporated:—The Musson Book Company, Toronto, capital \$40,000.—The London Sugar Refining Company, \$1,000,000; provisional directors, J. A. Moody, J. M. MacIntyre, D. A. MacIntyre, of St. Thomas, and F. T. Fawkes of London; the company is formed to manufacture and deal in the products of sugar beets.—The C. H. Hubbard Company, Toronto, \$50,000, to manufacture and deal in surgical supplies.—The Ottawa Saw Company, Ottawa, \$15,000.—The River du Loup Pulp Company, Toronto, \$500,000; provisional directors, J. W. Hutt, of Liverpool, N.S.; G. St. Pierre, J. E. Pineau and S. C. Rion of Fraserville, Que.; Hon. J. R. Stratton of Peterborough; C. Kloefer of Guelph; A. G. Ross of Toronto. The company is authorized to carry on all works pertaining to a pulp company, and is to acquire all the rights of the River du Loup Pulp Company, incorporated under Quebec laws.

—Vancouver, B.C., reports the arrival at Ashcroft, recently, of what is believed to be the largest ingot of gold ever cast. It represents the greater portion of the year's clean-up of the Cariboo Consolidated Hydraulic Mining Company. The big gold brick weighs a thousand pounds, and is worth approximately \$200,000. It is worth \$10,000 more than one which was sent to New York a year ago. The gold was brought down on a dray in charge of three mounted officers. They were four days making the trip with a four-mule team. The ingot is 3 feet long and 2 feet thick, and is to be sent to the Glasgow Exhibition.

—Woodstock, Ont., became a city on the 1st inst., stepping forward in an attire worthy of the occasion.

—American enterprise backed by British capital, has arranged to build, says a London cable, an extensive cold storage plant and abattoir at Barrow-in-Furness. Howard Crosby Cooke, representing New York and Chicago capitalists, in a recent conference with the directors of the Barrow-in-Furness Railway Company, which owns the Barrow docks, agreed to the details of the project. The English interests are of the strongest character. The Duke of Devonshire is chairman of the Barrow-in-Furness Railway. Mr. Cooke stated that the plans include the erection of a cold storage building with a capacity of 1,000,000 cubic feet, to be the most complete packing establishment in Europe. It will be modeled after the latest American pattern, and will cost £150,000 (\$750,000). The promoters expect that the Leyland-Atlantic Transport Line will bring American cattle, apples and West Indian fruits in great quantities as soon as adequate receiving facilities are available on this side.

—An order-in-council has been passed cancelling the regulations re the reservation of land for prospecting for petroleum on Dominion lands, and the following submitted therefor: "All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon territory shall, on and after the 1st day of July, 1901, be open to prospecting for petroleum by any individual or company desiring to do so. In case there should arise any dispute as to whether lands are or are not unappropriated, the question shall be decided by the Minister, whose decision shall be final. Should oil in paying quantities be discovered by a prospector on any vacant lands of the Crown, and should such discovery be established to the

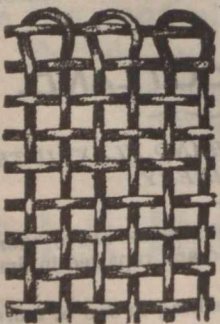

satisfaction of the Minister of the Interior, an area not exceeding 640 acres of land, including and surrounding the land upon which the discovery has been made will be sold to the person or company making such discovery at the rate of \$1 per acre. Provided such lands are available at the time application therefor is made." Provision is made that a royalty may be levied upon the sales of petroleum, the royalty to be fixed by order-in-council.

—It is pleasing to note that, even though Montreal's progress in building grain elevators is shown by a few sticks driven in the mud as the second year glides by, little towns and ports up West are active in a way that means business. A Detroit dispatch states that Messrs. Botsford & Jenks of Port Huron are figuring on the erection of a million-bushel elevator at Point Edward, Ontario. A member of the firm says: "We have asked the Council of Point Edward for an extension of taxes for 20 years, but would be willing to pay school taxes on an assessment of \$25,000. As soon as this is ratified we will commence work, and in four months the elevator will be running. The elevator will be built of steel, on the tank storage system, with a capacity of one million bushels, and will be one of the finest on the lakes. The main elevator building will hold some four hundred thousand bushels. Behind this building will be rows of immense steel tanks, each containing 25,000 bushels. The grain will be distributed into those tanks through tubes.

—It is reported that the offices of railroads in the different combinations located in all principal cities will be consolidated. The report is revived in connection with the Morgan-Hill syndicate operation. After the offices of individual lines have been brought together it is said that thousands of solicitors and passenger agents will be eliminated, in the interests of economy.

—A party of six representative farmers of the Molakan tribe, of South Russia, says an Ottawa letter, arrived in that city a few days ago. The men, who are fine, stalwart-looking agriculturists, are pioneers coming after a delegation of the tribe who visited Canada last year. These six will settle and at the same time look about them for good land. The tribe numbers some 12,000 in all, and is looking for a home where good land can be had and liberty enjoyed. They are a sect by themselves, neither smoking, drinking nor eating pork. They refuse to do military work but are not Quakers. They are seeking a new home for political reasons and have plenty of money for all the men of the tribe to set up on well without requiring any aid.

—New York advices report that negotiations which have been at work for some months for the formation of a \$10,000,000 light weight and enamel oilcloth trust will be completed probably before the end of the present week. Seven concerns which manufacture only light weight or table oilcloth and enamel cloth such as is used on carriages will be in the trust. They are Atha & Hughes, of Newark, N.J.; Joseph Wild & Co., New York; Goodiatte Oilcloth Company, Passiac, N.J.; Keystone Oilcloth Company, of Morristown, Pa.; Western Linoleum Company, of Akron, O.; Ohio Oilcloth Company, of Youngstown, O., and A. F. Buchanan & Sons, of Montrose, N.Y. The corporation will be formed under the laws of New Jersey, with an authorized capital of \$10,000,000.

—Nova Scotia in general is experiencing an amount of industrial activity beyond what might be traced to the rapid expansion at Sydney. The member for Cumberland, N.S., in Ottawa, recently, said manufacturing activity is noticeable at present all through Nova Scotia, and especially at Amherst, in Cumberland County. "In this town," he said, "things are booming to an extraordinary extent. Some industries are working night and day, and exporting their products to the Isle of Man, to Spain, to Cuba, to South America, and to British Columbia. The Rhodes Curry Company are busy turning out cars—eight and ten a day—as well as conducting other important operations throughout the Province."

—From Sherbrooke, Que., we learn that Mr. J. R. Woodward has men at work opening the pit of his Ely copper mine. The development work shows a very rich vein of copper ore carrying a small percentage of silver. It is Mr. Woodward's intention to interest capitalists and work the mine on a large scale.

—Summer tourists are seeking Northern Ontario in even greater numbers than anticipated by those who had recently become interested in hotel building, etc., in that new and attractive district. We learn from Toronto that at a meeting of the Muskoka Navigation and Hotel Company recently, at which were present Col. McLaren, Hamilton; A. P. Cockburn, M. C. Dickson, and E. L. Sawyer, arrangements were completed for the building of a second hotel in Muskoka district of the same general character as the Royal Muskoka. The latter, it is expected, will be open for business on July 15, and is the first of a series of hotels the company proposes erecting in this district. The second will be begun this fall so as to be completed early next spring.

—We learn from Hartford, Conn., that the Hartford Fire Insurance Company of that city, has reinsured the entire business in the United States and Canada of the American Fire Insurance Company of New York. The American was organized in 1857, but reinsured its risks to the Phoenix and Brooklyn in 1895 and reorganized.

—Referring to the Government cartridge factory at Quebec, the Superintendent, on a recent visit to Ottawa, stated that in addition to turning out ball and blank cartridges on an average of a million and a half rounds annually, some three or four thousand common, shrapnel, and segment shells are being produced. In connection with the manufacture of projectiles it is proposed to go a step further than the manufacture of cast-iron shells and to produce projectiles of forged steel, the plan to manufacture these, being now on its way from England. It is proposed to begin with the manufacture of twelve-pounder breech-loading shells, but the plant is designed for expansion, and will be capable of producing 5-inch and 6-inch shells when required. About 135 hands are employed at the factory.

MEDAL & HIGHEST AWARD, Centennial Exhibition, MELBOURNE, 1888.

—American provision importers in London, according to a late cable from that city, view with dismay the Canadian project to build fast steamers to transport dairy and other perishable produce to British markets. They are strongly of the opinion that unless the United States Department of Agriculture speedily awakes to the seriousness of the situation Americans will be practically excluded from the British provision trade. Canadian bacon has already in a large measure superseded the American product. This is shown by the statistics of imports. In 1889 Canada sent to England 4,000,000 pounds of bacon, valued at \$384,000. The importation was increased last year to 135,000,000 pounds, valued at \$12,750,000. Lord Strathcona, in an interview this week, said that Canada's exhibits at the Paris and Glasgow Expositions were directly productive of large orders from European houses. The excellence of the product has undoubtedly increased the demand from these same houses, and has made it more widely known. Canada's scanty home population, as compared with that of the United States, compels the Dominion to seek foreign trade. However, he did not believe that there is any likelihood of Canada driving out American products.—A member of the firm of Reynolds' Sons, bacon factors, asked his opinion, stated that 20 years ago they sold 500 boxes of American bacon every week, but now sell less than 100 boxes of it in a year. The question is one entirely of quality. Canadian bacon is from hogs that have been better fed than are American hogs, and is far superior to the American article, which is common and oily.—John B. Donaldson, London manager for Armour and Co., said that the whole question in a nutshell was a question of price. We do not want the English market, he stated, when prices at home are higher. The two countries are working on different principles. Canada desires chiefly to build up foreign trade, while America is constantly seeking the most profitable market."

—Canada's mineral products rose from \$10,221,255 in 1886, to \$49,584,027 in 1899. The latter figures have been surpassed by the complete returns available for the year 1900. The value of the metallic products increased from \$2,118,608 to \$29,282,823, and of non-metallic from \$7,852,647 to \$20,001,204. Gold now forms 42.88 per cent. of our mineral production, and coal and coke 21.45 per cent.

—The Manitoba Premier, says a Winnipeg letter, states that the Snowflake, Waskada and Wellwood extensions of the C.P.R., will cost the Province \$75,000 and will be completed by Nov. 1. The extension from Brandon northwest would also be finished by the same time.

DAIRY PRODUCE.

A London, Eng., circular date 21st ult., treating of the dairy produce situation, says: Butter.—The cooler temperatures which began above a week since increased gradually in force until two or three days ago, when the weather was almost winterly in the greater part of the United Kingdom and even snow fell in France. During the past two days the temperature has been warmer and showers of rain have refreshed the surface of the ground; but the rainfall is yet far too small to be of practical benefit. The demand for Canadian creameries continues good, and last week's prices are firmly maintained. Choicest quality is making 98s to 100s, and "fancy" lots are selling at 103s, with a prospect of higher figures next week. The price in Canada has advanced a shilling during the week, and on Wednesday all over Canada the markets were cleared at values equal to 102s to 103s c.i.f., London. If this rise were due to local demand the situation would stop c.i.f. transactions, but as the rise is due to export demand, it is probable values will go still higher unless cheaper butter can be had elsewhere, and it is difficult to see where that will be. Irish supply is insufficient to meet the demand, and American butter is as dear as Canadian. As Canadian shippers are finding great difficulty in securing refrigerated space for butter, it looks as if some of it will have to go into cold store there, and this will curtail supplies to British markets for the time being. There is an arrival of about 3,432 boxes of New Zealand butter in the Wakanui which is being largely put into cold store at prices from 100s to 102s, according to quality.

The Copenhagen Official Quotation remains at 88 kroner, where it has stood for nine weeks, and is now 7 kroner or nearly 8s below the corresponding week of last

year. Then the quotation remained at 88 kroner from 15th March to 24th May. Although the Danish quotation is unchanged, the market is firm in Copenhagen, and but for the large supplies of Russian butter in Denmark, the quotation would undoubtedly have been advanced this week. The danger of the situation lies in the fact that the quotation may be raised 4 kroner next week. Continental imports for the last three weeks have been 70,000 cwts., 62,000 cwts., and 55,000 cwts, respectively. The deficiency of the home supply of butter in the United Kingdom may be deduced from the fact, that for the four weeks ended 1st June, the imports were 57,383 cwts. in excess of last year, and 23,882 of the year before, and yet with the exception of Danish, prices are higher than last year. In fact, Danish butter is far and away the best value of any butter on the market to-day, and the mystery to everybody is why the Danes are selling at 5s to 10s per cwt. below market value.—Cheese.—The demand for Canadian cheese is improving and prices are advancing. This is largely owing to the deficient make of cheese in the United Kingdom up to date, combined with the prospects of the deficiency increasing during the next two months. Canadian prices have advanced in the Dominion markets one shilling per cwt. on the week, and are now equal to 48s to 49s per cwt. c.i.f. British ports. New Zealand shows a decided improvement in demand, especially for coloured, which sells at 43s to 44s, and white at 47s to 48s. Same week last year choicest quality sold for 51s to 52s and finest for 49s to 50s.

—Our correspondent at Bedford, Que., writes under date July 2: 725 boxes creamery butter sold to-day at 18½c to 19c; 77 tubs dairy and separator at 15c to 17c½; eggs, few offering; price 12c. Hogs sold in large numbers at 6½c, 6¾c, 7c per lb., live weight.

MONTREAL, FRIDAY, JULY 5TH, 1901.

SOME LOCAL MUNICIPAL MATTERS.

A stranger walking along through the district of the most important business part of the city that was devastated by the great fire of last January and then along the front of the central portion of the harbour will, undoubtedly, come to the conclusion that there is a want of enterprise in Montreal business circles, and in municipal management, and that there is a decadence in the public spirit that has heretofore built up the city to its present state of prosperity and the acknowledged leading city of the Dominion.

It is lamentable that no practical steps have yet been taken to restore the Board of Trade buildings that now stand as a hideous eyesore to disfigure that large section of the business part of the city. It is quite conceivable that there difficulties of a financial character in the way

of a rebuilding, or a restoration, of that important structure, but a resolute spirit to maintain the character of the city for enterprise will find a means of overcoming them. What is required for the occasion is the prompt action on the part of the men in a responsible position

to deal with the question. The business interests of the city cannot afford to allow those ruins to remain standing as a testimony of the decadence of Montreal's public spirit.

It is not too much to say that the apathy and want of energy of the Council of the Board of Trade in this matter reflects no credit upon them. So far as the members of the Board of Trade are aware, no practical steps tending to a reconstruction have been taken. Such a condition should not be allowed to continue and the President and the Council of the Board will have to be wakened up—if they are sleeping—and aroused to perform the proper duties of their offices. The season for building operations is fast passing and so far as is known not the first step has been taken to remove the reproach that now lies on the trade of the city and the Board is likely to have to transact its business in a location—as it now does—incompatible with the character of the city.

Another feature resulting from that fire is that some of the private proprietors on St. Peter and St. Paul streets are again building on the old lines, instead of the new lines laid down by the corporation for widening. With a proper public spirit some of the proprietors on St. Paul street are preparing to build on the new line, but others are not intending to do so. St. Peter street is one of the most important business streets in the city, but it presents a most unsightly appearance and is inconvenient for business from the irregularity of the street lines all along its length, from Notre Dame street to Commissioners street. Especially at both ends it possesses a kind of bottle-necked appearance that is objectionable in every respect. At the lower end, at St. Paul street, the recent fire seemed to afford a good opportunity to widen the street at that point without any great expense. Instead of doing this the proprietors are now proceeding to build on the old lines regardless of the new lines laid down by the city on its plans. In the public interest this is to be regretted. In the negotiations that have been going on in this respect, we have been told that the city can do nothing because it has no money with which to pay for the improvement. No one will be so unreasonable as to expect the proprietors to give their land for the general good without compensation, but sooner or later the improvement will be made, and then the proprietors will be paid only for the land and not for the improvements made since the fire. It is hard to understand why there should be any financial difficulty in this matter, if all the parties interested will comply with the law as it now stands. The ruins are such that most people will consider that the parcels of property in question are only vacant land. In Article 452 of the new charter, and the following clauses, provision is made for precisely such cases—how the property can be expropriated and the money can be provided for its payment. There appears to be no real difficulty in the way of securing this improvement at the present time if the city and all the parties interested are desirous of carrying it out.

Then, again, when the stranger extends his walk to the city front of the central portion of the harbour, he will see a condition of things not creditable to any of the authorities concerned. The new works in the harbour are, of course, of considerable magnitude, and whilst they are going on so as to bring the new piers and shore wharves up to the costly high level, the whole of the central portion of the harbour is materially disjointed

and in confusion. In a measure, this was inevitable, from the plans adopted, and will, from present appearances, continue longer than was predicted by the advocates of the high level plan.

As matters now stand, the work has to be carried on to completion, and an onlooker might reasonably ask if it could not be pushed more energetically, especially as regards the shore wharves, and the other works connected therewith, so that the ghastly dilapidated remains of the old dyke could be removed from sight. The inconvenience arising from the present condition in that locality is prejudicial to the trade of the port, and may be of more than temporary importance. Apart from the inconvenience to the trade, the vital question arises of the danger to the health of the city from the stagnant pool of the most noxious matter that now exists in the basin opposite to the Custom House. This Journal has repeatedly called attention to the serious danger of an epidemic of disease from this source. Some attention has been given by the provincial authorities to this matter, but, so far, without any practical result following their action. If that body has no machinery for enforcing its orders, it is a useless organization, and might as well be abolished.

It is admitted on all hands that the main sewer of the city that has its outlet at the point in question, should be diverted and made to empty into the running water below the Victoria pier. It has always been a nuisance in its present position, and should have been removed long before the new harbour improvements were begun. Its position was bad enough for years, when there was a weak current to carry away the sewage, but now there is no current whatever to change the water. Inside of

the new piers the basins are stagnant pools and if the pestiferous matter is allowed to remain and accumulate, a day of reckoning will surely come, and those responsible for the neglect of ordinary regard for the public health, will be blameable for the dire consequences certain to follow. It is not possible to complete the harbour works—or, indeed, to continue them much further, without blocking up that main sewer. That the city could not allow to be done, as it serves a very large section of the city.

The difficulty about this matter appears to be a financial one, and seems to be a question as to whether the city or the Harbour Commissioners, should bear the cost of the work. Whatever the bearing of the legal question may be, the present condition should not be allowed to continue. The work has to be done eventually or the central part of the harbour will, in a few years, be deserted by vessels. As we have frequently pointed out long ago, that work should have been carried out last year, so that the harbour improvements could be continued this season on the shore wharves. As it is, there will be delay for how long, with the present inaction of the authorities, no one can tell.

The dispute, which has involved delay, will prove costly as well. The work, it is well understood, could have been done more cheaply before the new revetment wall was built than it can be now, and consequently the folly of the delay is the more apparent. The city was a party to the arrangement for the new harbour plans, and it is only reasonable that the city should provide for disposing of the city's sewage. The cost of that should not, in all fairness, be thrown on the general trade of the country, as it would be, if the Harbour Commissioners have to foot the bill.

The evident desire of, at least, some of the aldermen to shirk, or evade this question may, from a narrow civic point of view, commend itself to some minds, but it is scarcely likely to enhance the reputation of the City Council, in the country at large, for broad-mindedness when they endeavour to make the trade of the country pay for the city's sewage works. That is what is involved in this question, the cost of which will be in the vicinity of \$80,000. Can Montreal afford to be placed in an unenviable light before the country in order to avoid a legitimate expenditure of so comparatively insignificant an amount, when the health and future prosperity of the city is considered. The cry of "no money" will not avail. We refuse to believe that the financial condition of the city is such that the means for this work being pushed cannot be found.

THE LATE MR. ANDREW ALLAN.

Full of years and full of all the honours he cared for, Mr. Andrew Allan passed away on the 28th ult., in a home, and in the midst of a family where his chief interest centred, and where his greatest enjoyment of life was found. The deceased was the head of the great ship-owning firm, Messrs. H. & A. Allan, whose steamers have a world-wide fame. He was born at Saltcoats, Scotland, on Dec. 1st, 1822, his father, Captain Alexander Allan, was in command of vessels trading between the Clyde and St. Lawrence. In 1846 he joined his brother Hugh in business as merchants in this city, which firm established a line of sailing vessels between this port and Liverpool. In 1853 they had 15 ships in service, to which they added two iron screw steamers. They organized the Montreal Ocean Steamship Company

and added two more steamers to the fleet, the sailing ships being gradually displaced. In 1857 the Allan firm, for such it was, commenced carrying the mails between Quebec and Liverpool in summer and Portland and Liverpool in winter. The service was satisfactorily performed, and though some troubles were met with owing to the very imperfect buoys and lighting of the St. Lawrence, involving heavy losses, the Allan boats gradually built up a fine reputation for steadiness of service, and attractive accommodation for passengers. The Allan firm first adopted the spar or flush deck on their steamers, which, to its scandal, met with even the hostility of the English Board of Trade officials, to whom such an improved form of construction, or, indeed, any change, seemed obnoxious. The Allan line was then the leading trans-Atlantic service, a position it has ever since maintained; for, taking all the circumstances into account, the number and tonnage of vessels, the business they do, the reputation they have for safety and comfort to passengers, and the up-to-date arrangements for freight, there is no steamship line ahead of the Allan liners. Mr. Andrew Allan was master of every detail in the working of the enormous business of the firm, and remarkable for his shrewd judgment in selecting officers and directing the policy of the firm. He was some years President of the Merchants Bank, where his business knowledge was very valuable. He had served as President of the Harbour Commissioners and of the Montreal Telegraph Co. Deceased was a thorough Canadian, was proud of this country's progress to which the Allans have contributed so materially and are yet contributing by their enterprise and determination to add even more distinction to the splendid shipping record of the Dominion. A large family is bereaved, bereaved indeed, for no better father ever lived than the late Andrew Allan.

STATE CABLES AND TELEGRAPHS.

The Ottawa Board of Trade has issued a circular letter on "State-owned cables and an Imperial Postal Cable service for the Empire." They consider it their duty to express a conviction that all British possessions should be directly connected by State-owned telegraph cables under the control of the Post Office, which the Board of Trade considers would involve all the land telegraphs of the several British possessions being also State-owned. The land telegraphs of the United Kingdom, New Zealand, Australia, India and South Africa are already nationalized and administered by the Post Office.

A Pacific cable is likely to be established at an early date under a joint agreement between the Home Government, the Governments of Canada, Australia, and New Zealand, with every prospect of Canada being connected with the United Kingdom at an early date by a State-owned trans-Atlantic cable. When these works are completed and the Canadian land telegraph lines nationalized, the whole distance from England to the shores of the Indian Ocean, to Western Australia, will be covered by a series of cables and land telegraphs under State control.

The pamphlet issued by the Ottawa Board of Trade includes a paper on "Postal Reforms and Development of Imperial Cable Service in the Victorian Era," by Sir Sandford Fleming, who is the author of the suggestion advocated by the Ottawa Board of Trade. Sir Sandford is sanguine that the cost of cables will be reduced as the

cost of postage was in 1840 when the penny rate was established. He affirms that distance is no element in the cost of transmitting a cable message, "there is practically no greater outlay incurred in transmitting long distance than short distance messages." This is the case, no doubt, but cable messages differ from the postal service in this vital respect; while many thousands of letters only cost a small fraction of a penny to deliver, the distance they are carried being trifling and their numbers and easy delivery favouring economy, in the case of ocean cables there are no short distances, there is nothing answering to city or suburban deliveries of letters, or bags of letters hauled only a few miles. Each cable has to traverse the maximum distance, as, unfortunately, there are no short stages in crossing the Atlantic or Pacific, so that the maximum cost is incurred by each word in a cable. Still, the fact that distance does not proportionately enhance the cost of transmitting a cable message, it would seem as if the present rates were excessive, and that the business of the cable companies could be made equally, if not more profitable, by reducing rates and so enormously enlarging the number of messages. That, however, may be a difficulty, for again there is this further difference, between cable service and the postal, there is no mechanical restriction in the way of postal matter and the more there is to carry the cheaper is the work done, while in regard to cables it is obvious that there is a limit to the capacity of the lines. We are not, therefore, as sanguine as Sir Sandford Fleming about the cable rates being reduced as were the postal in 1840 to a merely nominal sum.

As to bringing all telegraphs, ocean and land under the Post Office, the feasibility of such concentration is very doubtful, and its desirability even more so. At present all telegraphs, ocean and land, can be controlled in case of necessity by the government, so the need for this power of control is already supplied. The scheme advocated by the Ottawa Board of Trade does not state what Post Office is to have supreme control of the telegraphs. It seems to us quite impracticable to place our telegraphs in Canada, those in Australasia, India, Hong Kong, the West Indies, Newfoundland, all under control of the Post Office authorities in London, Eng. What is to be gained thereby if workable? The telegraph service in England is very badly managed compared to what we in Canada enjoy. To impose upon all the telegraphs of the Empire, the limitations, defects, absurdities of the British service would be an insufferable nuisance; such a scheme would break up in a week.

Looking at the matter all round we do not see the urgency, or desirability of placing all the telegraphs of the Empire under the control of the Post Office; it would be too complicated a scheme to work as smoothly and with regularity essential to meeting the needs of business.

THE NEW YORK BANK FAILURE.

The failure of a National Bank in the United States is not so uncommon an incident as to excite in itself much surprise, as these institutions are in many hundreds of cases built up on such very sandy foundations that it takes only a moderate financial breeze to topple them over. It is no uncommon record to find several National banks in each monthly return of failures, suspensions, or liquidations, and as many new ones organized. "They come like shadows, so depart." In each State of the Union there are several hundred banks, the larger num-

ber of them with a capital of from \$50,000 to \$100,000 and doing a business such as would only be enough for a small branch of a Canadian bank. Their circulation is all based upon Government bonds, which lock up almost as much capital as is gained by the circulation, so that although the notes issued by the National banks are safe, they are of trifling profit to the issuers, and of very restricted service to the community.

The failure of the Seventh National Bank of New York has excited more widespread interest than such events usually create because the causes of its collapse are so remarkable, and so indicative of a source of the gravest danger to the banks of the States. Nor does it require any indulgence in morbid pessimism, or any anxiety to wish the devil good morning before meeting him, as the proverb warns against, to see in the same causes a possible risk to Canadian banks.

The collapse of the Seventh National Bank was directly caused by violations of the law of the United States respecting the extent of a bank's loans to single customers, and the certification of cheques. It is useless, therefore, to plead the sufficiency of a banking act to keep institutions in safe courses. The American Currency Act contains the following clause:

"The total liabilities to any [national banking] association of any person, or of any company, corporation, or firm for money borrowed, including in the liabilities of a company or firm the liabilities of the several members thereof, shall at no time exceed one-tenth part of the amount of the capital stock of such association actually paid in."

The above law does not restrict the discounts of any firm's commercial paper, when such paper is drawn against actual values, such as is represented by bona fide trade bills. Such discounts are not "loans" in the proper sense, as they are simply transfers of credit based on goods. The bank in discounting a trade bill buys a debt payable at a fixed date for which it pays cash, less the interest on the money until the debt matures. In the selection of such debts for purchase lies the skill, or otherwise, of the banker who has, or should have, the financial ability of the seller of the debt as good security for the debt's redemption, as well as the capacity of the debtor to fulfil the promise made by his acceptance, or note. When paper of this class is made honestly by the payer, and drawn by the creditor on reputable traders, the losses on such discounts are trifling. Were punctual payment in full of such paper more rigidly insisted upon by banks, and all paper rejected that experience showed was likely to be renewed at maturity, bankers and merchants would have less anxiety and more profits.

Another clause in the American National Banking Act reads as follows:

"It shall be unlawful for any officer, clerk or agent of any national banking association to certify any cheque drawn upon the association unless the person or company drawing the cheque has on deposit with the association, at the time such cheque is certified, an amount of money, equal to the amount specified in such cheque."

The punishment for breaking this part of the law is severe.

Where, then, did the Seventh National Bank fail to keep within the law? In the first place, it loaned \$1,800,000 to one stock broking firm, Henry Marquand & Co., the loan being \$1,300,000 in excess of the total capital of the bank! In the next place, the bank certified cheques to be used for Stock Exchange purposes for an amount enormously in excess of the deposit made by

the drawer standing to his credit when the cheques were drawn. The Marquand firm having this bank at its back had been plunging pretty wildly on 'Change. It was "short" to an enormous amount, some 100,000 shares being involved. In plain English, the bank had "stood in" with this brokerage firm as practically as if it and the bank had been partners. Apart from Stock Exchange business the firm had become engaged in railway, coal land, and electric lighting enterprises. In financing these affairs the firm floated the securities of a number of companies it was promoting, and the Seventh National Bank was utilized for these operations. The "underwriting" of such stocks and bonds was carried on, as the same business has been elsewhere, in all cases regardless of this class of business being utterly contrary to the basal principles of sound banking. Indeed, no more vicious departure from those principles can there be than to utilize the resources of a bank in promoting an industrial enterprise by taking up its securities in advance of investors with the intention of creating a fictitious demand for such stock and bonds, and thereby giving to them an utterly fictitious value. Such a form of business is akin to gambling with marked cards, as stock quotations are so manipulated as to decoy innocent investors who are in the dark as to what influences are at work affecting prices.

The failure of the Seventh National Bank of New York is a revolting exposure of the dark side of Stock Exchange financing in that city. It should be a caution to Canadian bankers to keep well within the lines of legitimate banking.

DRAWING ATTENTION TO THE STORE.

The merchant who succeeds in keeping attention directed to his store succeeds in selling sufficient goods to continue in a profitable way if the other details of his business are properly conducted. The merchant who does not keep attention directed to his store cannot expect to hold the trade at present enjoyed, because other dealers who do will gradually draw his trade away; and once gone it is much more difficult to restore than it was to obtain originally. These facts should serve to impress upon retailers the absolute necessity of being thoroughly alive to the changing situation as observed throughout the continent in the distribution of general merchandise. A point not generally observed in regard to an energetic dealer is that he not only helps to clear a wider path for himself but he assists in preventing greater opposition, for the fact of his being known as possessing the necessary vigor and utilizing every known means of enlarging his trade, often prevents prospective dealers from getting too close to him, knowing that the fight being already on and waged so persistently, would mean but an addition of extreme measures were his trade infringed upon.

Another point of even more obscurity is that very few retailers really know the extent of their own business ability. Every day happenings, in business and outside of it, prove this each week of the year. The athlete on the stage who draws an admiring throng was no athlete before he devoted time and strict attention to the constant surpassing of his former feats, gradually training his mind and muscles to greater accomplishments, until he became so proficient that his ability became worthy of praise. The race for preferment in the mercantile field to-day is of the same character. The dealer who wins and pushes on from one accomplishment

to another is the man who is constantly aspiring and using further endeavors each week in drawing attention to his store, and making it worthy of that which is bestowed.

At this stage of the discourse it would be quite natural for the dealer who even allows his show windows to become semi-opaque through flies, dust, etc., to rise and ask a respectful explanation of this apparent mystery which veils so much of the retail business of the country. But the dimness of his windows partly tell the story and partly reflect the placidness of a mind grown accustomed to "things as they are" and which endeavors, only in so far as absolutely compulsory, to follow the changed conditions of business from year to year, at as slow a pace as admissible. But as facts, not reflections are what this dealer would desire in explanation of the foregoing we will take his own general stock and the trade he is enjoying, and for thirty days will see what alterations and improvements can be made in the store and stock, and what addition can be made to his sales as compared with the preceding month. This man, we will say, has been doing a quiet local trade in a town of a few thousand inhabitants and with a good farming country surrounding. His stock, particularly of dry goods, can not be said to be inviting, for portions of webs of all classes below silk, principally purchased years ago, are taking a lengthened rest after a brief season of attention, and appear to reflect the fact that the longer they remain the less they are worth. He sells a few yards off one of these occasionally, but the bulk of his sales is in seasonable wash fabrics and a few new webs, the production of the present season. The amount of old goods held in stock, however, and which are as conspicuous as the new, envelops any redeeming features attached to the latter and serve to place the entire stock in the list of past season goods.

The temporary manager would, on taking hold of the store for thirty days, under a guarantee, and permitting the wholesale house interested to form a decision, first announce both in and out of town that for two days during the following week the store would be closed. This announcement would be made as mysterious and as prominent as printers' large type could convey; the only hint at explanation being the words "a surprise in in store; look out!" He would then go through the dry goods stock from shelf to shelf, re-folding, re-wrapping and reversing ends on rolling boards, cutting some entirely into remnants of a length consistent with regular needs for waists, skirts, suitings, aprons, etc., etc., until every web left on the shelves would present at least a new appearance. Preparations would be made, meantime, for a "great clearing sale," commencing on the grand opening day and continuing for twenty-one days. Bargains in everything would be announced. Among them being "fire stocks, bankrupt sale goods, ends of mill cloths, balances of wholesale supplies, etc., etc.," the whole combining but a moderate purchase while being sufficient to blend with the original stock and assist its sale. Similar changes and additions would be made in the shoe stock, notions, groceries, woodenware, tin and hardware stocks, etc. Extra space would be cleared for an outside display, this of a degree so elaborate that the store would look like an overflowing hive. Streamers of dress goods would wave in the breeze from upper windows and lofty poles, while shoes affixed to eighteen-foot planed boards, would be placed in rows and intermingle with the other goods. Plain price tickets of large size in asphaltum black on glazed white cardboard,

would hang on every article, while within the store like displays would be seen from ceiling to floor, every article not strictly staple and in actual every day need being ticketed and placed in the most conspicuous shape. Thus the sale would open, and the average retailer will readily conclude as to the result. Once changed from its former quiet unassuming method, such a business would require only a thoroughly capable buyer and manager in order to keep the added interest at or near the same pitch as shown during the opening weeks. But this manager would not prove his capacity, if, after the first sale was ended, he should quietly allow another month to elapse before changing the scenery, securing new job lines to close out below somebody's cost price, throwing on the sacrificing table remnants of his own stock that showed an inclination to be slow, and thus keep perpetual what the public desired.

Some men in business are not desirous of doing a trade beyond what the locality provides, and which they are reasonably sure of holding, but these are exceptions. The majority of general dealers who do not succeed are either incapable of properly conducting business, or will not continue to devote their energies towards promoting it beyond what they consider is "doing their best." Let one of those be given a position to-morrow as general manager of a small departmental store, owned by some stock company, being given to understand that the business will not run itself, except into the ground, and if he possesses the ability to grasp the situation in its proper light, he will simply surprise himself by his own originality and accomplishments in what he never dreamed of at a time when, as his own dictator, he had the very best chance of conceiving new ideas and putting them into effect.

BRITISH FIRE INSURANCE RETURNS.

The statistics relating to the fire insurance companies of Great Britain are always much behind those operating in Canada and the United States. It seems as though the authorities who are responsible for this delay had not yet realized what century they are in, and that its ideas are, for they quietly pigeon-hole the returns of companies for months and bring them out when they have lost much of their interest. But for the necessity, or at least desirability, of keeping such statistics on record, the returns of the British fire companies might be ignored, but they have much value in this respect, as a basis for comparisons. The following table has been drafted from more elaborate ones which have been published in several English journals, and are up to the latest date on which returns have been published. The companies given are those known in Canada:

Companies.	Premis.	Interest.	Fire Loss.	to pm	Ratio	Ratio

CROWN TIMBER DUES.

A new set of regulations relating to woods and forests was adopted by the Executive Council of the Province of Quebec on the 1st instant, and promulgated by order-in-council. One change, says a Quebec letter, is in regard to the dues on pulp wood which are largely reduced. It is provided:—All licenses to cut timber are subject to an annual ground rent of three dollars per square mile or fraction thereof; also, to an annual fire tax, the amount of which is fixed from time to time by the commissioner. These licenses run from 1st May to the 30th April following, and no claim for over charge of ground rent, and fire tax in the extent of the limits can be entertained after the licenses have issued. All licenses expire on the 30th April, after being issued, but the licentiate who conforms to the existing regulations has, until the 1st September following, the right of renewal of same. Any infraction of the law or regulations forfeits the said right, but the commissioner may consent to the renewal of the license, on payment of the ground rent, and such penalties as he may see fit to impose.

All wood goods cut in virtue of a license are subject to the following charges:

Square and waney timber cubic foot:	
Oak and walnut	4 cents
Other descriptions	2 "
Saw logs, boom and dimension timber per 1,000 feet, B.M., of:	
Spruce, hemlock, balsam, cypress, cedar, w. birch and poplar	65 "
Red pine	80 "
White pine and other varieties	\$1.30 "
Cordwood (firewood), per cord of 128 cubic:	
Hardwood	20 "
Softwood	10 "
Pulp wood per cord of 128 cubic feet, with a reduction of 25 cents per cord on timber manufactured into paper pulp in the Dominion of Canada	65 "
Rails not exceeding 12 feet in length per 100 pieces:	
Cedar rails	30 "
Rails of other varieties of timber	15 "
Pickets per 100 pieces:	
Cedar pickets	15 "
Pickets of other varieties of timber	10 "
Cedar or pine shingles per mille:	
Short	10 "
Long	15 "
Poles of all kinds of timber for carrying electric wires, per lineal foot:	
Poles 10 ins. diameter or less at the butt	1/4 "
Over 10 inch diameter at butt	1/2 "
Railway ties of all kinds of timber, per piece	2 "
Hemlock, lathwood, per cord of 128 cubic feet.	20 "
Hemlock bark, per cord of 128 cubic feet	32 "
Futtocks, knees, floors of birch and other ship-building material, and all wood goods not enumerated in foregoing list, an ad valorem duty on the invoice	10 p.c.

The cord of 128 cubic feet is considered, for the purposes of this tariff, to be equal to 600 feet B.M. The present rate of ground rent for licenses to cut timber shall not be increased until 1st of September, 1910, and all license-holders who have conformed and shall conform to the regulations concerning the administration and sale of timber on Crown lands shall have, up to that date, the privileges of renewing their licenses at the same rate of ground rent; and the dues now exacted by the regulations on all timber cut in virtue of a license shall not be increased before the said date of 1st September, 1910.

LOYALTY TO THE TRADE IS OUR MOTTO.

THE OTTAWA ELECTRIC COMPANY.

The Annual Meeting of the Shareholders of this Company, was held on Monday, 24th June, 1901, at Ottawa, when the seventh annual report for the year ending April 30th, 1901, was submitted, as follows:

To the Shareholders of the Ottawa Electric Company:

Gentlemen,—Your Directors beg to submit their seventh annual report covering the Company's operations for the year ending April 30th, 1901.

This report presents a balance sheet of the assets and liabilities of the company as at April 30th, 1901, together with statement of the revenue and expenditure, of profit and loss account and of the installations for the year ending on that date.

The net profit of \$25,700.19 as shown, is arrived at after providing for all general expenses and fixed charges, (including interest on bonds), also for all the expenses of operating and maintenance and after setting aside a reasonable sum to provide for bad and doubtful accounts.

The amount of \$7,147.56, brought forward from 1900 makes a total at credit of profit and loss account of \$32,847.75 from which has been appropriated the sum of \$19,550, to cover difference between the par value and selling price (95¼) on \$460,000 bonds, dated Dec. 1st, 1900, (to which bond issue special reference is made later in this report), leaving \$13,297.75 to carry forward at credit of profit and loss account.

Upon comparing the gross revenue with that of last year, your directors point with pleasure to an increase of \$19,680.93. This must be looked upon as satisfactory, particularly when considering the temporary loss of business, and consequently of revenue, due to the disastrous conflagration which occurred at about the close of the last fiscal year.

The gross expenditure has, however, more than counterbalanced the increased revenue, being \$36,558.91, in excess of the expenditure of last year, and is attributable to the conflagration and to the abnormal expenses incident to obtaining temporary power and electrical appliances for immediate operation. The destruction of four of the company's power houses necessitated the operation of the steam reserve plant to its fullest capacity, and the rental of additional power at high rates. Much of the work done immediately after the fire was necessarily of a temporary character and has been charged to operating expenses.

The increases in expenditure due to the fire are accounted for as follows:

Operation of steam station (fuel not included) ..	\$3,572.72
Repairs to lines and changing arc lamps	5,000.00
Fuel	10,800.94
Rentals of power	7,800.94

Temporary work after fire (including freight and express charges, &c., on temporary machines ..	3,367.41
Insurance	1,113.60
Lamp renewals	2,288.00
Superintendence, management, etc	2,015.30

\$36,558.91

Had it not been for the conflagration the past year's showing would have been satisfactory.

Contracts have been placed for all hydraulic and electrical equipment for the company's new power plant, and a large portion has been delivered and paid for. The hydraulic machinery has been installed, and the generating station is now well under way, and when completed will be a modern plant in every respect. The lines through the burned district have been rebuilt, and a map showing the vast area in the city and suburbs covered by our wires has recently been published in the daily press setting forth in a comprehensive manner the widespread character of the company's system; a copy of this map has been mailed to all shareholders. Your directors trust to have the new plant in operation early in the autumn, when it is hoped that the most important of the economies previously outlined to the shareholders will begin to take effect, and it is confidently expected that the commencement of the operation of the new system will mark a new era of prosperity for the company.

To meet the expenditure necessitated by the construction as outlined above considerable additional capital has been required.

A new issue of stock to the amount of \$218,200 was made, all of which was subscribed for at par, increasing the capital stock of the company to \$1,000,000. Of this new issue the sum of \$73,065.63 had not been called in at close of the fiscal year.

It was also decided to issue \$500,000 first mortgage 20-year bonds, bearing interest at 5 per cent. per annum. These new bonds bearing date of December 1st, 1900, were all sold at 95¼, \$320,000 of this amount being necessary to redeem at par the bond issue made in 1894, and the balance of \$180,000 to apply on the capital expenditure above referred to. The difference between the selling price and the par value of the new bonds delivered, amounting to \$19,500, has been written off this year in profit and loss account; only \$460,000 of the total amount of \$500,000 having been delivered at date of April 30th last.

In conclusion we respectfully beg to call your attention to the large net increase in installations and in the number of customers, which point to good results for the year upon which we are now entering.

All of which is respectfully submitted.
(Signed), T. Ahearn, President, F. P. Bronson, Vice-Presi-

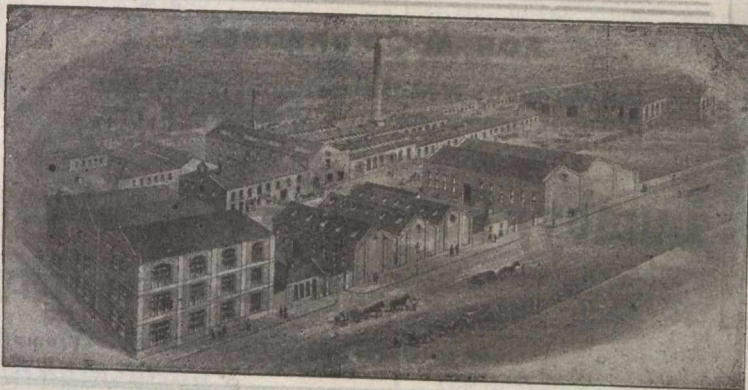

Contractors to the Lords of the Admiralty.

NEW RULES RE PACKING OF FRUIT.

On several occasions during recent years this Journal has advocated the adoption and enforcement of rules governing closed packages of perishable fruit—notably apples—to the end that fraud might be prevented and that a growing market across the seas might be permitted to expand, benefitting all concerned, and doing away with the doubts, which, owing to past carelessness—or worse—have of late interfered with the free sale of Canadian fruit. Copies of the Fruit Marks Act, which came into operation on the 1st instant, are for distribution at the Commissioners' branch of the Department of Agriculture. This is the Act passed last session to carry out the wishes of growers and shippers as expressed to the Minister at a meeting at Toronto last spring. The objects of the Fruit Marks Act are to eliminate fraud in the marking of such fruit packages as do not admit of ready inspection without opening, and to restrain the use of eulogistic superlatives as applied to inferior fruit, a practice which has made the public suspicious of all attractive epithets, to the great detriment of many really high grade brands which mean all they say.

The object of the Fruit Marks Act is, first, to eliminate fraud in the marking of such fruit packages as do not ad-

mit of ready inspection without opening. Section 4, of the act, provides that all such packages must be plainly marked: (a) With the initials of the Christian names, and the full surname and address of the packer; (b) With the name of the variety or varieties; and (c) With a designation of the grade of the fruit. Section 5 reads—"5. No person shall sell, or offer, expose, or have in his possession for sale, any fruit packed in a closed package, intended for sale, unless such package is marked as required by the next preceding section."

In future, therefore, anyone sending dishonestly or carelessly packed fruit on the market, must at the same time, clearly advertise to the public who is responsible; and the trade will not be slow to find out who are responsible shippers." Section 6 reads: "6. No person shall sell, or offer, expose or have in his possession for sale any fruit packed in a closed package, upon which package is marked any designation which represents such fruit as of finest, best or extra good quality, unless such fruit consists of well-grown specimens of one variety, sound, of nearly uniform size, of good color for the variety, of normal shape and not less than ninety per cent. free from scab, worm holes, bruises and other defects, and properly packed."

In the matter of packing, the policy desired by growers and dealers alike has been: "Let the face of the package be an index of the bulk." Section 7, of the act embodies this policy: "7. No person shall sell, or offer, expose or have in his possession for sale, any fruit packed in any package, in which the faced or shown surface gives a false representation of the contents of such package; and it shall be considered a false representation, when more than fifteen per cent. of such fruit is substantially smaller in size than, or inferior in grade to, or different in a variety from, the faced or shown surface of such package." The wholesale or retail purchaser must be able, on seeing the face of a package of fruit exposed for sale, to count upon finding substantially the same variety, size and quality of fruit all the way to the bottom, of that package. If this simple reform in the direction of honesty can be achieved, incalculable good will have been done to the fruit trade of Canada, both foreign and domestic. If once fraud is put down, and uniformity of packing established, confidence will return, and increased trade with higher prices and healthier conditions are sure to follow.

CANADIAN AND U.S. FAILURES.

The failures in the Dominion for the first half of 1901 numbered 672 against 700 last year, and 587 in 1899. Aggregate liabilities were \$5,530,926, against \$5,012,042 in 1900, and \$5,636,340 two years ago. Aside from the entire absence of banking defaults there was nothing noteworthy in the half-year's record. A few large failures in pulp and paper swelled the total amount of manufacturing in-

debtedness considerably above last year's, although fewer failures occurred:

Provinces.	No.	Commercial.	
		Assets.	Liabilities.
Ontario	234	\$1,597,291	\$1,900,103
Quebec,	245	1,688,398	2,446,942
British Columbia	43	671,950	538,250
Nova Scotia	50	73,400	209,450
Manitoba	63	266,056	240,736
New Brunswick	29	84,006	143,945
P. E. Island	8	26,100	51,500
Total	672	\$4,407,201	\$5,530,926
Total 1900	700	3,715,630	5,012,042
Newfoundland 1900	4	1,250	4,700
Newfoundland 1900	4	1,250	4,700

The failures in the U.S. footed up 5,759 for the six months, against 902 for the corresponding period of 1900. The liabilities were \$13,162,063 and \$12,362,921 respectively.

—Grand Trunk Railway System—Earnings 22nd to 30th June, 1901, \$731,208; 1900, \$717,335; increase, \$13,873.

—Mr. W. C. McIntyre, chief of the wholesale dry goods firm of McIntyre, Son & Co., has returned from a trip abroad, during which he visited the manufacturing centres of the United Kingdom and the Continent in the mutual interests of the firm and of their extensive clientele throughout Canada.

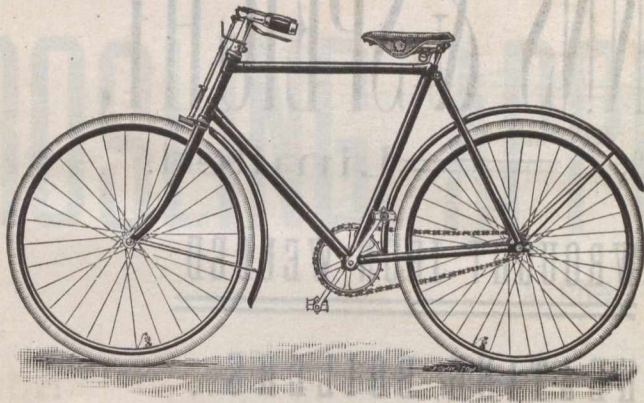

—Our St. Thomas, Ont., correspondent writes: The returns at the port of St. Thomas show a large increase of business for the year ending June 30. The receipts for the three last years were: 1899, \$106,104; 1900, \$126,558; 1901, \$180,057.—Mr. E. A. Domville, manager of the St. Thomas Car Wheel Co., has arrived home after a business trip of ten months in England, where he was superintending the construction of a mammoth plant for a company at Barrow-in-Furness.—The Lake Erie & Detroit River Railway extension from St. Thomas, to Ridgetown, Ont., was opened for traffic on the morning of July 1st. The new stations on the road between St. Thomas and Ridgetown, are—Middlemarch, Shedden, Iona, West Lorne, Dutton, Kerr's Siding, Rodney, Taylor, Muirkirk, and Highgate.—The boot and shoe firm of Cronk & Rusling, St. Thomas, was dissolved by mutual consent on the 29th ult., Mr. Cronk continuing the business.

—The revenue of the Quebec Crown Lands Department for the fiscal year expiring 30th June, was \$1,465,000, while that of Ontario was \$1,447,000. This, it is stated, is the first time since Confederation that Quebec has beaten her sister province.

—The Customs receipts at the port of Montreal for the year ending June 30, amount to \$9,018,648, as against \$9,136,377 for 1900. The rebate in duty on British products, however, if reckoned at last year's ratio would

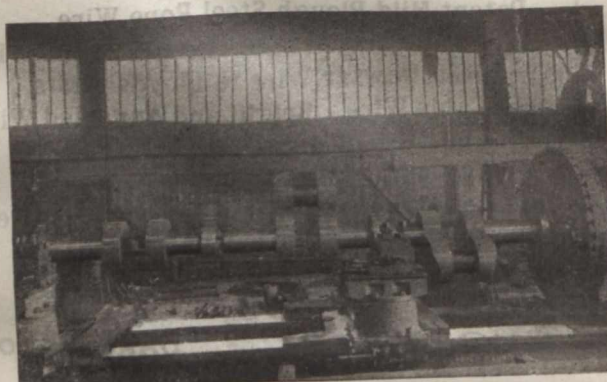

show an increase for the year just ended of over \$80,000.

—The City National Bank of Buffalo has been placed in the hands of a receiver.—The Niagara Bank, also of Buffalo, has been declared insolvent, and has been closed.—Sturges' Bank,

a private institution, at Mansfield, Ohio, has closed its doors and a deed of assignment has been filed.

The assignee has prepared an approximate statement of the affairs of Taylor Bros., brick and paper manufacturers, Toronto, which shows assets of \$80,000 and liabilities of \$134,535.19, leaving a deficit of \$54,523.19. The assets are made up of paper stock, \$15,000; brick yard, \$52,000, and sundries, \$13,000. Making up the liabilities are: direct, \$43,216.45; secured, a total of \$345,224.44, from which after deducting the value of the security held \$162,142.96, a balance is left of \$83,081.48, and preferred \$8,228.26, making a total of \$134,523.19.

FINANCIAL.

Montreal, Thursday, noon, July 4,

The failure of three banks in the United States within the last fortnight is a disagreeable feature, though the total amount involved is not as much as there would be were one of the quite obscure banks of Canada to fail. The whole capital of the three banks is below a million dollars and their deposits are small. The more is known of the 7th National the greater is the scandal. The brokerage firm, Marquand & Co., who had borrowed over three times the amount of the capital, appear to have secured control of the institution, a not difficult task when a bank has only \$500,000 of capital. This is becoming a serious danger to our financial institutions, of various kinds. Two or three designing men can secure a controlling interest in the stock and the whole institution then

is worked for their private aggrandizement. It would be easy to give illustrations of this new form of conspiracy against the general interests of stockholders and those otherwise interested in companies thus manipulated. There will be an outcry one of these days and exposures that will not be as pleasantly odorous as a rose bush in June. The United States is threatened with strikes so extended as to prove a most grave obstruction to business. The trust system enormously enhances the social danger of strikes as the spectacle of a few men reaping millions out of an industry which yields a bare living to the workers is calculated to develop discontent and a spirit of revolt. Yet the business of the country goes on expanding. The clearings this week and last make a record. Those in this city go over all precedents. Consols remain very low in spite of peace rumours, which are discredited. They run from 93 1/2 to 93 3/4. German consols, 3 1/2 per cent., are quoted at 100 1/2, and 3's at 90 1/2, so the British consol at 93 1/2 is considerably higher than the German. The local Stock Exchange has been busy with Montreal Street transactions, the sales having been large at prices ranging from 302 1/2 to 304 1/2. Heavier earnings are expected from the taking over of the Belt Line, "round the Mountain," which is patronized by crowds just now. It is doubtful whether the enlarged revenue will so overtop increased expenses as to justify the recent advance in price of the stock. Pacific was neglected, a few going at 105; Steel, preferred, 85; Heat and Power, 98 1/2 and 99; a few Molsons Bank sold at 202; Bank of Montreal, 254; Bank of Ottawa, 201 3/4. Paris, exchange on London, 25f. 18c.; Berlin, 20m. 39 1/2 pf. New York money on call has been ranging from 6 to 25 per cent. Local foreign exchange,

60's, 9 1/4 to 9 3/8; demand, 9 3/4 to 9 7/8. Money as last week, or a shade easier.

The following is a comparative table of stocks for week ending July 4th, supplied by Chas. Meredith & Co., Stock Brokers, Montreal:—

Banks.	Shares.			Average same date 1900.

MONTREAL WHOLESALE MARKETS.

Thursday, July 4th, 1901.

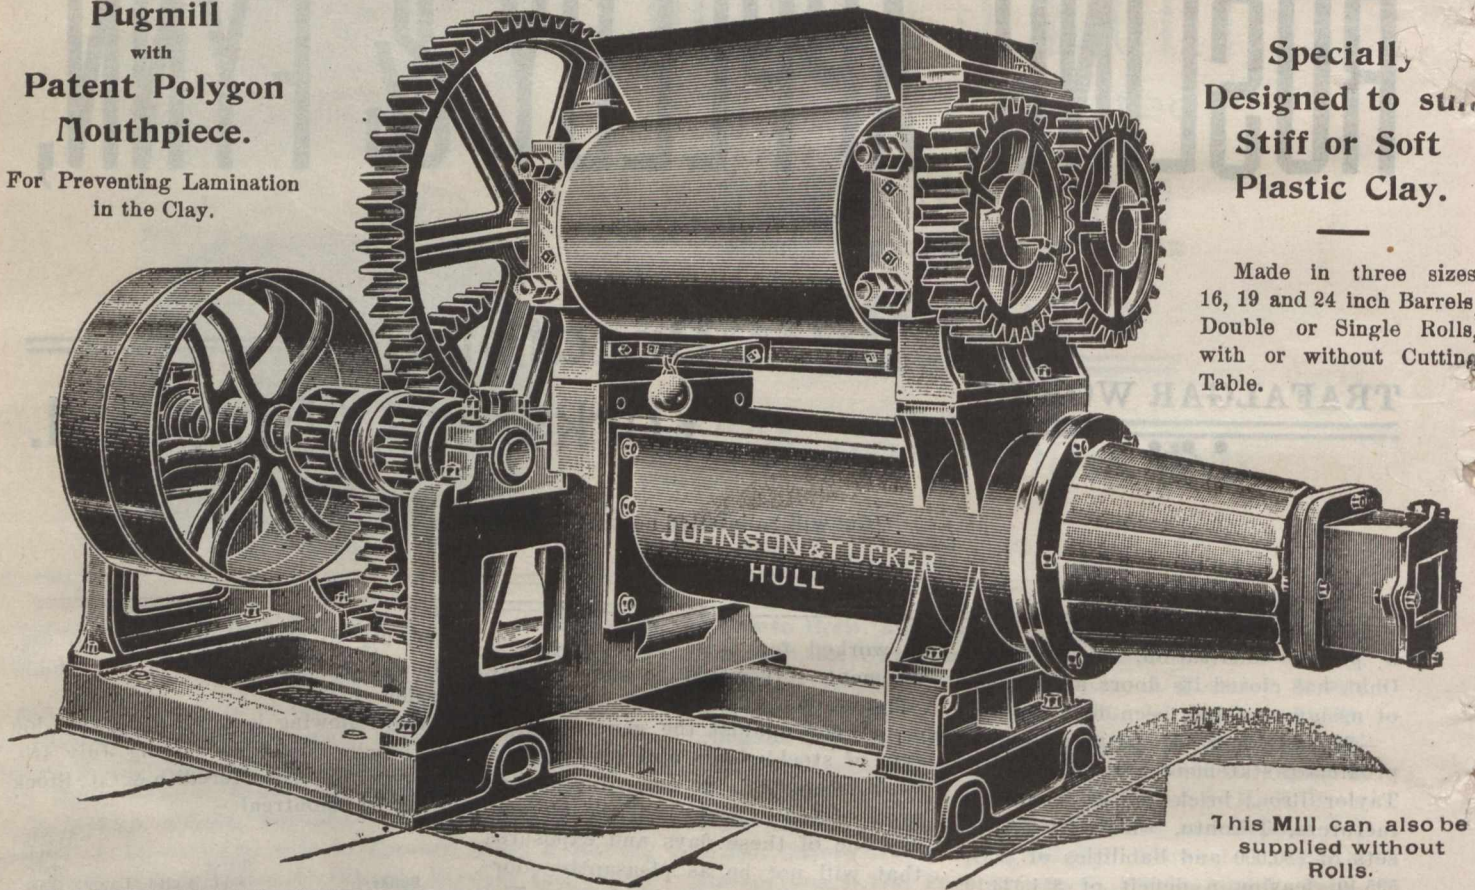

The extreme heat which encircled almost the entire week within its melting grasp left little energy afloat. Trade has been moving only as necessity urgently called, so that prices in the greater number of lines, have been nominally unchanged. Leather is firmer in keeping with higher prices for hides, while an active export demand keeps stocks light. Manufacturers are buying freely in anti-ci-

S. DAVIS & SONS,

MONTREAL, Que.

pation of a healthy fall trade assured so far through favorable crop conditions. In dairy products butter and cheese have both declined a fraction, but the high prices existing permit of a really safer export business at present values. Groceries are very quiet except in sugars which show an active movement. Hardware trade is good despite weather conditions, dealers being quite busy up to the present. Cut nails have advanced. Hides are dearer as usual with the advancing summer. Linseed oils have taken

a decided advance, being 3c higher for the week. Retail trade throughout the country is prosperous, largely owing to the chances given farmers through good pastures, high prices and good prospects for bountiful crop yields, all reports now favoring the latter.

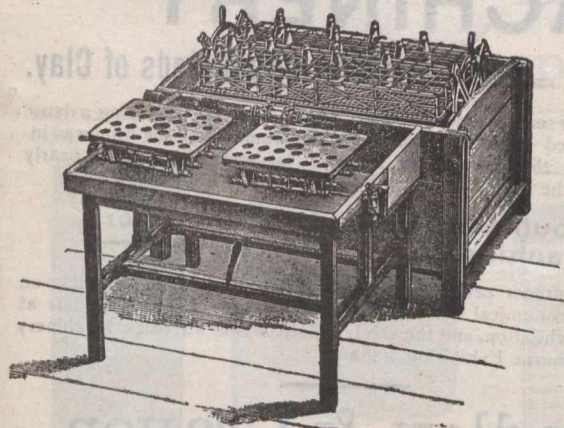

BUTTER.—The market is ruling decidedly easier with large offerings and considerably less business passing. Prices are quoted $\frac{1}{2}$ c to 1c lower, with finest creamery 19 $\frac{1}{4}$ c to 19 $\frac{1}{2}$ c lb.; under grades, 19c. Dairies are holding steady with several large sales during the past day or two. Best in carlots at 16c to 16 $\frac{1}{4}$ c f.o.b. West would mean 16 $\frac{1}{2}$ c to 16 $\frac{3}{4}$ c Montreal. Locally it is difficult to make over 16 $\frac{1}{2}$ c for finest and exporters' offer for that description 16c spot. Loyer grades are somewhat scarce and in good sale at 11c to 14c. Exports of butter from ports of Montreal and Portland, for Europe, for the week ending June 29th, 1901:

	Local.	Thro'.	Total.
To Liverpool—			
Nymidian	1,884	1,191	3,075
To Manchester—			
Commerce	2,221	75	2,296
To London—			
Rosarian	3,113	1,408	4,521
Total	7,218	2,674	9,892
Corr. week last year ..	12,752	3,280	16,032
Total shipments since			
May 1st, 1901	70,766	9,094	79,860

Shipments via Portland:—			
		Cheese.	Butter.
Ottoman, Liverpool		2,578
Cumeria, London		19,044
Total		21,622	44
Since May 1st, 1901		60,842	44

CEMENTS, ETC.—Trade is dull, being confined to small lots. Some inquiries are abroad for large lots but no orders are reported placed. Arrivals for week ending 3rd, were: 13,160 Belgian and German cement; 1,450 English cement, and 234,900 fire bricks. A London cable of the 3rd instant, states that the British Commercial Agent in the United States, reporting on the cement industry there, says he thinks British cement makers are not paying sufficient attention thereto. Apart from the increased employment of home-made cement, which rose from 13.2 per cent. to 73.9 per cent. of the total used in America between 1891 and 1899, that of the German and Belgian makers is supplanting the British, which for the nine months ended in March, 1901, was only 11 per cent. of the total imported. An expert and importer is quoted as saying that the decline in the importation of British cement is due to the better quality of the German article, and the cheapness of the Belgian, while the British makers are unwilling to improve the quality of their product.

CHEESE.—Market dull and somewhat unsettled, with quotations showing a wide range. Finest Western is dealt in at 9 $\frac{1}{4}$ c to 9 $\frac{1}{2}$ c, whereas to force sales it would be difficult to make over 8 $\frac{1}{2}$ c to 8 $\frac{3}{4}$ c. Finest Eastern, 8 $\frac{1}{4}$ c to 9c. Interior transactions:— Woodstock, Ont., July 3. — Cheese market well attended but dull.

Fifteen factories boarded 3,303 boxes, no sales. The bidding hovered around 8 5/8c, and reached 8 7/8c for one consignment. It is said that 9 3/8c was secured by one factory in private sale this week. There has been a drop of nearly one cent since last week and sellers do not expect a rise for some time.—Napanee, 3.—Fifteen factories boarded 1,066 white, and 273 colored; all sold at 8 7/8c.—Picton, 3.—Fifteen factories boarded 1,580 boxes colored, and 35 white. Highest bid, 8 13-16c; 1,455 sold.—Stirling, Ont., 3.—1,085 white were boarded, with sales as follows: 885 boxes at 8 11-16c; 100 at 8 5/8c; balance unsold.—Orms town, Que., 3.—Offerings cheese, 547 boxes; and butter, 182 pkgs. Cheese sold at 8 3/4c and butter at 19c. Exports of cheese from ports of Montreal and Portland, for Europe, for the week ending June 29th, 1901:

COUNTRY PRODUCE. — Old potatoes are again lower, being plentiful at 40c to 45c per bag, in lots, and 5c to 10c more in small quantities. New potatoes are very slow in reaching the market. Some home-grown—or rather home-picked—are offered, the size comparing favorably with haws, or goseberries. These are offered at about 30c peck. Beans are quiet at \$1.25 to \$1.35 per bushel.

Craven's Patent Brick Moulding and Dressing Machines.

BRICK MACHINERY

For Working all kinds of Clay.

The stiff or semi-plastic system of Brick-making for producing a dense plastic pressed brick ready for immediate removal to the kiln was invented by us 28 years ago, and it is most successfully working in nearly all parts of the world.

**Double the Strength of any other
Machines in the Market.**

Brick plants for producing the best plastic-pressed facing bricks on the most economical system. Awarded Three Highest Medals at Adelaide Exhibition, and the ONLY Gold Medal for Brick Machinery at the Melbourne Exhibition, 1888-9.

Bradley & Craven,
LIMITED.

Westgate Common Foundry, WAKEFIELD, Eng.

Manufactured for the Canadian Market, under the new Preferential Tariff, 8 $\frac{1}{2}$ % per cent. in favor of English Goods.

Eggs.—Arrivals are lighter but ample for requirements, as the demand has fallen off as usual in the early summer weeks. For candled stock quotations are 12c to 12 $\frac{1}{2}$ c; straight lots, 11c; Prince Edward Island, 10c to 10 $\frac{1}{2}$ c. Retailers report unusually heavy sales this season, prior to the hot weather, caused by the freshness of stock. From now on, however, many may be respected for their age, if not for other qualities.

FLOUR AND FEED.—There is a brisk local demand for flour. Millers are also receiving considerably more orders from the Maritime Provinces. Prices on some brands have been slightly lowered in sympathy with the decline in wheat. In regard to feed stuffs the hot spell has created a better demand for both bran and shorts, as there is some fear of pastures drying up and people are rushing to buy. Prices are steady. Quotations on another page.

GREEN FRUITS, ETC.—The extreme heat worked favorably for at least one branch of trade, lemons selling at an almost unprecedented rate. Stocks have been fairly heavy, which has prevented any real advance in prices, although the tone of the market is very strong. For the New York market a prominent dealer reports that notwithstanding last week's auction sales aggregated 80,700 boxes, the market at the close showed a material advance over that ruling the week previous. The same has been directly attributable to the hot weather which has increased the consuming outlet. There has been no great boom in the market, however, and while prices are somewhat higher they are not excessive. The greatest advance has been in the 360 size, this fruit being in heavy demand from the South. Hardly 25 per cent. of the fruit arriving is of 360 size, and the best trades are now obtained in the

larger sizes. Quite a few Verdelli lemons are now arriving on this market. This fruit is hard, long-keeping, and will stand shipment a long distance. The Verdelli lemons are practically all 300s. The quantity of 360s of this variety arriving is infinitesimally small and they are taken at high prices. Strawberries are nearly over, and prices are low owing to the abundant supply. Quality, however, is not all that would be desired. Quotations are: Winter apples, \$3.50; California apples, Bxs, \$2.00 to \$2.25; Messina oranges, boxes, \$2.75 to \$3; do. ovals, half-boxes, \$1.90 to \$2.00; do. blood,

half-boxes, \$1.75 to \$2.00; lemons, 300s, \$1.75 to \$3.00; Bananas, 8-hands, \$1.50 to \$1.75; No. 1, \$1.75 to \$2.25; extras, \$2.00 to \$2.25; pineapples each, 10c to 20c; cranberries, Cape Cod, per 100qt., \$9.00 to \$11.50; new figs, mats, 3 $\frac{1}{2}$ c per lb.; do. boxes, 8c to 12c per lb.; new dates, 4c per lb. Nuts, Pecans, extra large, 14c; do. large, 12 $\frac{1}{2}$ c; walnuts, 12c; filberts, 12c; French chestnuts, 10c per lb.; cocoanuts, \$3.25; California celery, per crate, green tops, \$7.50; new Florida tomatoes, \$2.75 to \$3.25; Tennessee tomatoes, 4-box crates, \$1 to \$1.10; radishes, 15c doz. bunches; Canadian strawberries, 5c to

7c per box; California plums, \$1.50 to \$1.75 per box; California apricots, \$1.25 to \$1.50; do. paches, \$1.25 to \$1.50; new Bermuda potatoes, \$3.50 to \$3.75 per brl.; onions, \$3 per crate; Egyptian onions, 2c lb.; Canadian, brls., \$2.50; new carrots, 25c doz. bunches; gooseberries, 50c basket.

GREEN HIDES, ETC.—A second advance of ½c lb. on beef hides took place this week making No. 1 now 7½c and others in proportion. Lambskins have also advanced to 20c, and clips to 20c. There is more movement, though the scarcity of cattle is very apparent. In the New York market dry hides were being freely purchased at top figures. Green hides were quiet, owing to the approach of the holiday but there were little to offer as packers were well sold up and were holding for outside figures. The Chicago market was in a similar condition, some round lots sold at top prices and packers were not seeking trade.

GROCERIES. — Sugars are holding steady at last week's quotations. Demand is becoming brisk now that the heavy season is about on. Other groceries are quiet, as in reality has all

business shown for the week owing to the great heat which really prevented filling of orders in some instances. As a result there is little to be said locally. Advices from London reporting on Valencia raisins state: The situation is highly satisfactory, the vines never appearing in a more healthy condition, and in the Pedregues district, which usually produce the finest fruit, the prospects of an abundant yield were never better. This state of affairs is causing holders to be more anxious to dispose of their old fruit and quarter boxes of good selected quality are offering at 24s, showing a decline of several shillings. Very little definite information has been received as to the coming crop of sultanas and latest news points to a much smaller yield than for many ears. There is a brisk demand for currants in the Liverpool market, and satisfactory clearances are reported from London. The market in Greece is unchanged, and present stocks held there are estimated at between 700 and 800 tons. Inasmuch as Holland and Germany continue buying in Greece, it is probable that the bulk of the remaining stocks will be worked off to these countries. With regard to the new crop, it appears

that there has been more or less rainy weather, but no serious damage thus far has been done. Most exporters estimate a moderate crop, and all agree that the quality will be excellent. Late advices from the Columbia River, state that the prospects are against a salmon pack even equal to that of last year. The advices state that the volume of water in the river

continues up, while the weather is cold for the season—conditions much against the run of fish. Another factor in the season's operations has been the increased demand for fresh salmon for cold storage purposes. This has not only absorbed supplies which would ordinarily have gone to canners but has had a marked influence on the price of raw fish to the packers. Conservative cannerymen estimate that the total pack this season will not be over half of that for 1900, which was below the average of that for several previous seasons.

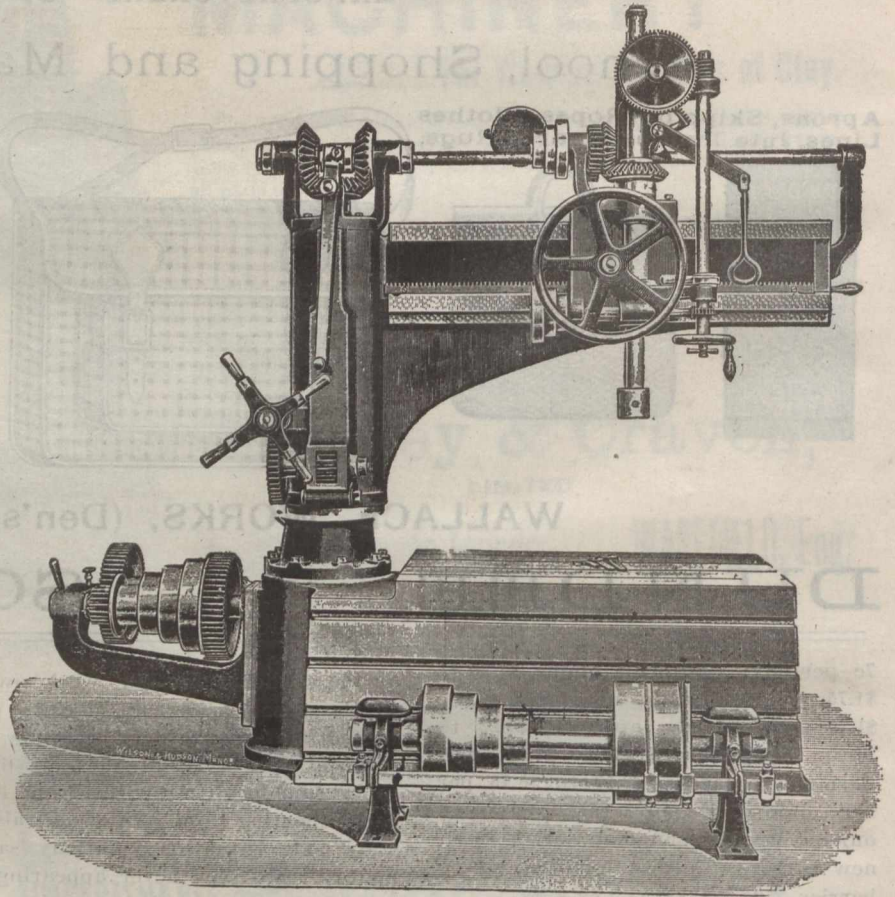

The tea market is unsatisfactory. There is an oversupply of cheap, undesirable blacks, principally Ceylons, bearing Colombo stamp. These teas are not needed here and the exporters are losing money on them, finding out even if late that quantity is not everything in the profitable shipment of tea. Furthermore, much of this low grade leaf will be put into consumption through blending, and will injure the trade in the choice Ceylon article, of which the Canadian public have been taking to favorably since introduced.

HARDWARE AND METALS.—Cut nails are advanced, the base price for car lots being now \$2.35, and in smaller quantities, \$2.45. No other changes have occurred since last report. Wholesale firms report trade exceptionally brisk. Where the bulk of the heavy trade has usually been put through early in June, even July now finds orders rushing in. Metals are steady, with a declining market abroad. In the London market tin has been losing ground, showing a decline of £2 on Tuesday. Closing prices were: Spot tin, £129, with sales of 60 tons; futures, £119 5s, with sales of 70 tons. Soft Spanish lead, £12 6s 3d.; G.M.B. spelter, £16 10s. The closing prices of pig iron warrants in the Glasgow market were: — Scotch warrants, 51s 11d; No. 3 Middlesboro, 44s 7½d.

LEATHER AND SHOES.—A fairly good trade is doing in leather. Shipping is brisk and this serves to keep supplies light. Prices are getting firmer in sympathy with hides which are advancing and are quoted higher. Shoe manufactures expect a good season owing principally to the outlook for the crop, and furthermore to the fact that retailers' stocks are generally in better shape than shown during many seasons. Make and quality have had much to do with this, having permitted retailers to count on more sales for the amount of stock carried without sizing up.

LIVE STOCK. — Shipments from the port of Montreal to the different foreign ports for the month of June, 1901, were:—

	Cattle.	Sheep.	Horses
London	2,170	2,154	20
Liverpool	2,285	18
Glasgow	3,102	4,008	144
Bristol	1,591	12
Manchester	1,155	1,546
Newcastle	253
Cardiff	507	320
South Africa	800
Totals	11,063	8,018	994

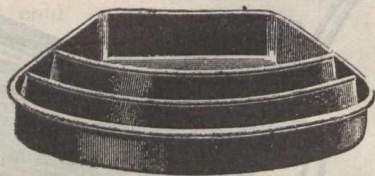

The total shipments of live stock from the port of Montreal for the season to date, with comparisons, were:—

	Cattle.	Sheep.	Horses
1901	22,395	16,472	2,036
1900	25,577	7,131	1,399
1899	28,837	11,835	1,553
1898	28,899	2,682	2,844
1897	37,011	6,566	3,032
1896	28,780	9,066	4,715

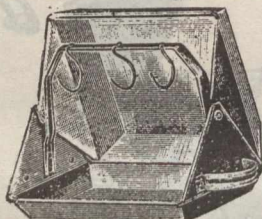

OILS AND PAINTS. — The feature of the week has been an advance of 3c per gallon in linseed oils, raw being now quoted at 82c to 83c, and boiled at 85c to 86c. The U.S. markets are still higher, having advanced fully 25 p.c. in a brief period. Paints are in good demand, and firmer in price. Glass is steady. Turpentine is unchanged.

PROVISIONS.—While the tone of the market is extremely firm, there is no actual advance. The keen competition which has been apparent for some time between curers of meat, not only throughout the entire Dominion, but extending to the Middle States—the centre of production—has kept prices high for the producers and has at the same time held prices down for the retail dealers in hams, bacon, salted, etc. Many new pork industries have started throughout the West recently and the product of these must find a market. Quotations are:— Heavy Canadian short cut mess pork, \$19.50 to \$20.00; selected heavy short cut mess pork, boneless, \$20.50 to \$21.00; family short cut back pork, \$19.50 to \$20.00; heavy short cut clear pork, \$19.00 to \$19.50; pure Canadian lard, in 375 lb. tierces, 11½c; parchment lined 50 lb. boxes, 11¼c; parchment lined pails, 20 lbs., 12c; tin pails, 11¼c; tins, 3, 5

and 10 lbs., 12c to 12 1/4c; compound refined lard, in 375 lb. tierces, 7 1/4c; parchment lined wood pails, 20-lb., 8c;

tin pails, 20-lb., 7 3/4c; hams, 12 1/2c to 14c; and bacon, 14c to 15c per lb. Fresh killed hogs, \$9.50 to \$10 per 100

The Dominion Bank.

NOTICE is hereby given that a Dividend of 2 1/2 per cent. upon the Capital Stock of this Institution has been declared for the current quarter, being at the rate of 10 per cent. per annum, and that the same will be payable at the Banking House, in this city, on and after **Thursday, the first day of August next.** The transfer books will be closed from the 30th to the 31st July next, both days inclusive. By order of the Board,
T. G. BROUGH, Gen. Manager.
Toronto, June 26th, 1901.

lbs. Trade in the latter light owing to the heat. Chicago, 3.—Cash quotations were 10c to 15c lower, closing: Pork, \$13.87 1/2 to \$14; lard, \$8.40 to \$8.45; short ribs, sides, \$7.75 to \$7.95; dry salted shoulders, 7 1/4c to 7 1/2c; short clear sides, \$8.25 to \$8.35.

Wool.—The fourth series of auction sales opened in London on Tuesday last. As usual on the opening days the selection was poor, and the attendance was poor. On fine merinos prices showed a decline of 5 p.c. and on crossbreds of 5 p.c. to 10 p.c. Locally, trade is not brisk. Some lots are selling steadily, but the fact is that manufacturers are not busy. Merchants are doing more buying in England than ever, while Canadian manufacturers are being given orders for ends and specials, perhaps a double roll here, a single roll there and so on. It can readily be seen that even on these end orders prices are cut down to a minimum. Canadian wool is dull and still awaiting a market.

accomplish, but it is true, nevertheless, that when chairs, tables and sideboard, reflect the likeness of the beholder, it produces a pleasing gratification. In the first place, it indicates a tone of cheerfulness, while it further gives evidence of a spirit of domestic cleanliness and industry. Mr. Ruskin says that if Englishwomen would but make their homes more inviting by making them brighter, they would not have to complain so much of their husbands and sons going elsewhere to seek for pleasure and society. That there is much truth in the statement cannot for a moment be doubted. Among

the household aids that have contributed to make the artisan cottage look bright as a palace Stephenson Bros.' Superior Furniture Cream is deserving of special recognition and adoption. Whatever may be the properties of this polish there can be no question but that it possesses excellences that place it in the front rank of furniture polishes. The composition, evidently scientifically prepared, shows it to be the discovery of an ingenious mind, and which, no doubt, has been brought to its present state of perfection after long scientific experiments. One great quality of Stephenson Bros.' Superior Fur-

niture Cream is, that it is perfectly free from any injurious chemicals, while at the same time it is healthy and harmless in its use. These are important qualities in a polish, and such as should not be overlooked in choosing a household aid of this description. Regarding the special properties of Stephenson Bros.' Superior Furniture Cream, as a polish, we have only to say, it is par excellence. Without very great effort in its application it imparts a brilliant gloss to every kind of polished wood, whether oak, mahogany, maple, walnut, or any other plain or fine wrought furniture. Wherever it has been adopted

it has given the utmost satisfaction to both mistress and servants. The former likes it because it produces a bright and transparent polish, and the latter like it because it is easy and labour-saving in its application. Another advantage is—and this, too,

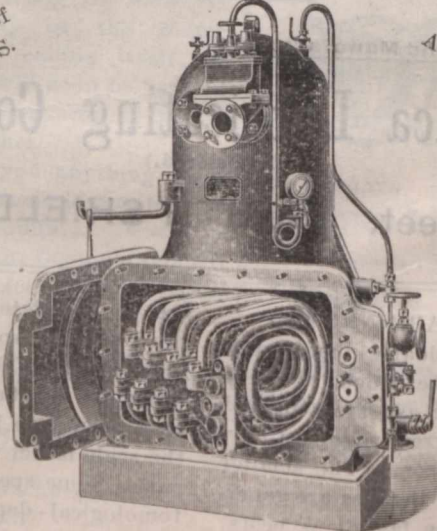

is of importance—that it is exceedingly economical in its use. Hence it may be safely affirmed that when the excellent qualities of Stephenson Bros.' Superior Furniture Cream becomes more generally known it will have a general adoption.

In addition to the above, this firm have placed upon the market, and with decided success, a hat polish, which for economy in use and perfection in its workings compares favorably with anything of the kind hitherto offered. In these times of growing economy it seems like waste to cast aside a straw hat, straw or wicker work basket, or other wicker articles merely because they have become tainted in shade through natural causes, accident, etc. Here is where a bottle of Stephenson Bros.' Hat Polish aids in being advanced, and restores with the slightest effort, these goods to the appearance they claimed when they first left the sellers' hands. This polish is made in the following colors: Black, Dead Black, Light Brown, Dark Brown, Moss Green, Myrtle Green, Victoria Blue, Navy Blue, Bright Red, Ruby, Heliotrope, also colorless, and other shades required. It dries in ten minutes. Sold in 3d and 6d bottles. The reputation of this firm has been proven to an extent which permits of any of their manufactures being taken on their merits. Write for circulars, price lists, and special terms to Canadians under the new Canadian tariff, to Stephenson Bros., Ltd., Bradford, England.

Morison's Radial Evaporator

Fitted in upwards of 2,000 STEAMSHIPS.

Minimum of Labour and Attention required at sea.

Strong in construction, Simple in design and Efficient in working.

General Handiness and Facilities for cleaning UNSURPASSED.

PRISONER FOUND NOT GUILTY, TOLD "NOT TO DO IT AGAIN."

The Dublin correspondent of an English paper thus reports a trial which ended in a time-honored sentence being pronounced by the Judge: At Ne-nagh Quarter Sessions yesterday (June 5th), before County Court Judge Moore, K.C., a laborer named Michael Dunne was charged with the illegal possession of several rolls of tweed, the property of the Foxford Convent. The material had been consigned to Mr. Bernard Cavanagh, a draper in Roscrea, and was missed from a railway wagon at Roscrea Station. Head Constable Shell deposed that thefts from railway waggons at Roscrea Station had been going on for the past two or three years, and suspicion had been directed towards the prisoner. Witness searched Dunne's house, and found the tweed concealed under the seat on which his wife was sitting. Complaints had also been made as to larcenies of brandy, tobacco, and other articles, and in the prisoner's house some bottles of brandy and a quantity of tobacco, corresponding to the stolen property, had been found. The defence was that there was no evidence that the tweed had reached Roscrea, and that the tobacco and brandy had been sold to the prisoner's wife by a peddler. The jury, after half an hour, returned a verdict of acquittal. His Honor, addressing the prisoner, said: "You have been found not guilty by the jury, and of course I discharge you. Don't do it again. Don't steal again, but try and live an honest life."

LEUCANIUM ARMINICUM.

That is the formidable name of a scale insect, says the Globe, which is attacking the white ash trees in and about Toronto, in great numbers during the present season. The smaller limbs of second-growth trees are generally selected by the fastidious pests. The scales are black, moist, snail-like lumps, almost large enough to cover a five-cent piece, and some branches

are so completely covered that they cannot be grasped without crushing the insects. This pest is a close relative of the San Jose scale, and is very similar to but not identical, with the scale insect which attacks the burr oak. Some specimens sent to the entomological department at Washington have been fully identified, so there is no uncertainty as to their generalogy. Scale insects fasten themselves

to the bark of their favorite trees and suck the substance that should go to nourish the leaves and fruit. The proboscis with which a scale adheres and draws sustenance is of the nature of a stem, and once fastened it cannot survive removal. Under the outside coating each insect lays from 300 to 500 eggs, so they make up in fecundity what they lack in powers of locomotion. The newly-hatched insects do not travel far before making themselves fast to a branch and becoming a part of it. White ash trees attacked can be relieved by brushing off the accumulating lumps, a process quite easy with such large insects, but impossible with a diminutive pest like the San Jose scale.

"Buffalo is an exchange point for more trade than any city in the world."
"Twenty-eight railroads run near or through Buffalo."
"Buffalo has the biggest office build-

ing in the world (known as Elicott square)."

HAS HOPES BEYOND THE "PAN."

The Buffalo correspondent of the London, Eng., Daily Express, sends the following to his paper: "Is it possible that there are some people in Europe who want to know why Buffalo should have an exhibition? Were such individuals here they would find not one, but a hundred reasons ready-made. Buffalo is the city of big B's. Everything is the Biggest or the Best. Buffalo is fired with a great ambition. It hopes to become the biggest city in the Western Hemisphere (to begin with), and this Exposition is a prospectus intended to stimulate its growth by advertising its existence. The 'Rainbow City' of the 'Empire State' is already calling itself 'the City of Light' (it will soon be 'leading City of Light' also), and it does not mean to hide its light under a bushel.

"Before telling you anything about the Exposition, I would like to tell you something about Buffalo. I will go to the 'Manual of the Common Council' for the official facts and unbiased opinions.

"To begin with:—

"Buffalo has the biggest grain market in the world.

"It has the biggest lumber market in the world.

"It has the biggest horse and sheep markets in the world."

J. SHANKS & Co. LIMITED DUBLIN · IRELAND

JOHNSTON, BAIRD & CO.,

An article of daily use which is well advertised must shortly either run its course or become widely popular. The latter is being steadily shown in the case of a coffee essence placed upon the market by the enterprising firm of Messrs. Johnston, Baird & Co., Glasgow, and London, manufacturers of high grade table goods, including essences, sauces, etc. Coffee essence is an article which since its merits have become more recognized, has been winning friends and customers near and far. But like many other commodities of merit, inferior grades assist to a large degree in injuring the general sale so that the meritorious article often suffers, by being subject through name to all that may be said

taken from a recent issue of the Scottish Trader: Messrs. Johnston, Baird & Co., Glasgow and London, Stand No. 147.—The making of coffee essence is one of the most important and ever-growing industries in the United Kingdom, and to the popularising of this stimulating beverage by putting it on the market in an easily-prepared form, Messrs. Johnston, Baird & Co. have contributed their quota. Visitors to the Exhibition will find them represented by a large octagonal case in the Industrial Hall. The stand contains a tastefully-arranged pyramidal display of Coffee Essences, Worcester Sauce, Cocoa Essence, Fruit Wines, Lemon Squash, Health Salts, Syrups, Vinegar, Curry Powders, and other specialties prepared by the firm. Special prominence has been given to

inscribed in gold lettering—Baird's Coffee Essence, Baird's Worcester Sauce, the trade mark of the firm, &c. Four arc pendant lamps supply the light, and the entire display being mounted on a pedestal, visitors can walk round and inspect the numerous tastefully-labelled articles which comprise the exhibit. Although coffee essence, as we remarked, has been given a good show, equal care has been exercised to display the other goods to the best advantage. In the tier which forms the base of the pyramid of bottles is ranged malt vinegar and fruit wines; the next tier is occupied by lemon squash, and at the very top the structure is neatly tapered off with a bottle of flavouring essence. Messrs. Johnston, Baird & Co.'s trade, both export and home, is increasing very

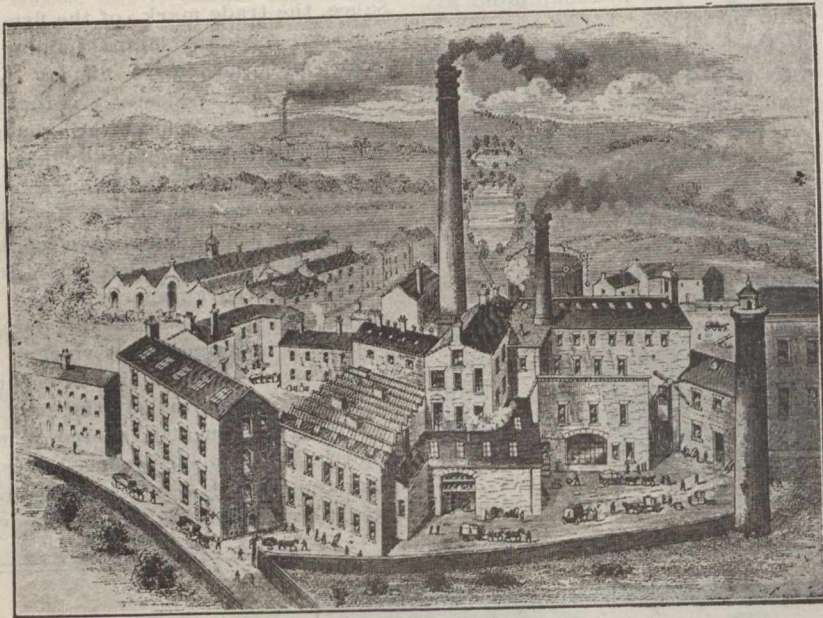

against its inferior followers. High above these is being gradually proven the excellence of "Baird's," the name implying genuineness of manufacture, of contents and care in labelling, packing and shipping.

Among the multitude of splendid exhibits at the Glasgow Exhibition there stands prominently out that of Messrs. Johnston, Baird & Co., as a request to the world to sample a class of goods which testing will best explain. We take pleasure in reproducing the following description of this exhibit,

their display of coffee essence, which is prepared with great care, and in taste and flavour approximates closely to pure coffee. It is made from fresh roasted beans, and blended with a judicious proportion of the choicest chicory, and manufactured with machinery specially constructed to retain the full aroma of the freshly-roasted coffee beans. Around the base of the case, which is made of mahogany, runs a fine series of moulding and plain and floral panelling. Around the top on the different segments are

rapidly, and we have no doubt their stand in the Exhibition will bring their wares before a still larger clientele. A passing observer cannot fail to notice that Messrs. Johnston, Baird & Co. must pay a great deal of attention and taste to the neatness and finish of their manufactures. But what evidently they consider to be of more importance, and to which they devote their special attention, is that the quality of the contents are kept up to the highest standard. The motto which they have always adopted upon their

F. H. MACPHERSON,
Secretary B. of T.

posters and show cards, "The best of all," is borne out by consumers of their manufactures, Consumers and trained coffee tasters admit that Baird's Coffee Essence is equal in flavour to coffee made from the freshly-roasted coffee bean. This coffee essence is the only coffee used in Messrs. Thos. Jenkins & Son's popular restaurants in the Exhibition. The advantages of exhibiting a stand at the Exhibition can hardly be over-estimated, and firms like Messrs. Johnston, Baird & Co. will reap the reward of the trouble and expense involved in erecting so very handsome a stand at probably the greatest industrial exposition ever held in the United Kingdom. The experience of many firms of the Exhibition which was held in Glasgow in the year 1888 confirms the opinion we express in regard to the advantages which are derived from placing specialties before the public in general. Send for prices and special terms to Canadian trade.

—Early in 1900, when another famine in India seemed inevitable, a commission was sent by the Indian Government to Australia to examine into the methods of wheat cultivation there with a view of their being adapted to India, for Australian wheat is practically drought and rust proof. The report of the commission has just been made public by the Indian Gov-

ernment, and while it declares that climatic and racial differences stand in the way of a general establishment of Australian methods in India, still superior nourishing power and greater ability to resist both drought and rust can be attained in India by the application of the scientific principles that have been successfully followed in parts of the new commonwealth. The process has been one of careful artificial selection by cross fertilization and the repeated selection from the produce thereof. The report recommends that this drought-resisting grain should be secured for India and grown on the experimental farms of the Agricultural Department, where further improvement might still be attained. In the meantime, the native cultivators should be taught to overcome their reluctance to embark on the innovation through adequate object lessons. It is thought that their prejudices may soon be overcome if a drought-resisting wheat is evolved by the department and grown on Government farms till the native cultivators see for themselves that it only requires one slight irrigation to three or four demanded by the older varieties they themselves grow.

—Recent advices from Chicago state that prominent Western merchants, all heavy shippers of merchandise, are preparing to call to account before the Interstate Commerce Commission the

heads of the various railroad combinations and the community-of-interests alliances of the trunk lines of the country. Charges are made that, following in these movements of consolidation, freight rates have been advanced from 30 to 50 per cent. through quiet and organized manipulation of the various classifications of commodities. Behind the movement to attack this scheme of freight advances by applying to the Interstate Commerce Commission for relief lies the plan for a still more vigorous blow. The complainants intend to press a demand that Congress shall take a hand in forcing the formation of a uniform classification of freight, which shall be effective on every railroad in the United States.

—The people are gradually growing better. In 1889 the convictions for drunkenness in Ontario amounted to 4,797. In 1899 this had dropped to 1,892, a decrease of 2,905, or over 60 per cent. In 1889 there was one conviction for drunkenness for every 295 persons, and in 1899 one for every 826, the figures indicating that between these years the reduction was progressive. The number of persons to each conviction in the Provinces of Canada for the year 1899 is as follows:—

Ontario	826
Quebec	461
Nova Scotia	448
New Brunswick	253

Manitoba	355
British Columbia	207
Prince Edward Island	341
The Territories	180

In Ontario the returns for each period of five years since 1886 show progressive improvement in the lessening of the numbers of commitments for misdemeanors and crimes:

From 1886 to 1890, the total commitments were	4,311
From 1896 to 1900 the figures had again dropped to	1,920

A decrease in 13 years of . . . 2,391 This represents a reduction of over 55 per cent., and a reduction which will be much emphasized when we consider the intervening increase of population.

A NEW MOVE

Modern business houses are always on the lookout to enlarge the scope of their business and increase their clientele. Messrs. G. W. Reed & Co., 785 Craig street, Montreal, have completed arrangements with the Luxfer Prism Co., Limited, who had their offices at 1833 Notre Dame street, and hereafter Messrs. Reed & Co. will handle Luxfer Prisms and Art Glass Work, in connection with their other lines.

"Luxfer Prisms" have been thoroughly established as a staple feature in all first class commercial buildings where space is valuable, and everyone knows of the wonderful effect produced by them. There is no feature in a building that gives such a bonafide and constant benefit as Luxfer Prisms. The improvement in light in business premises to say nothing of

the direct saving in gas or electric light bills during daylight hours soon repays the initial expense of Luxfer Prisms.

Electro Glazed Art Glass is another feature that Messrs. Reed & Co. will introduce to the building trade. This is a new style of glazing exclusively done by the Luxfer Prism Company. Their work in this line is unique.

By placing their goods in the hands of a well known firm like G. W. Reed & Co., the Luxfer Prism Company feel sure that their customers will have the best attention paid to their wants, and thorough satisfaction will result.

HUGHES' PATENT POWER PRESS

Patented in the United Kingdom, Germany
United States of America, Etc.

The Normanby Brick Company, Ltd.,

Patentees and Sole Manufacturers,

NORMANBY, Near MIDDLESBROUGH, ENG.

Are now prepared to offer their Patent Press Adapted to Steam Power.

This Machine has many advantages over the ordinary steam press of which the following are the chief, viz: 1.—Every brick is one exact thickness when it leaves the box, the only variation being in the depth of the panel. 2.—The stretcher parts are absolutely free from Arris. 3.—Equal pressure and 2 nips are brought to bear on each side of the brick, which prevents twisting and the pressure can be increased or reduced as desired. 4.—The repairs are reduced by about 50%. 5.—Capacity from Eight to Ten Thousand per day of 9½ hours. 6.—Hands required to work the machine, four boys.

The Machine can be seen at work at the above works any day by appointment.

For all further particulars apply as above.

Special prices to Canadians under the new Tariff.

New and Improved Combined Biscuit Cutting Machine.

A New, Improved Combined Hard and Soft Dough Gauging, Cutting, Scrao-Separating, and Panning Machine. Roller size, 24 in. x 8 in. This Machine is entirely new, and an improved pattern, of extra strength and power, and is adapted for cutting all kinds of hard, soft, fancy biscuits, etc. A number of very important improvements having been introduced. The Gauge Rolls are of increased diameter. A set of Conical Driving Gear for regulating their speeds. A Scaper has also been devised for cleaning the Web. By a new arrangement, the adjustment of the Skip Motion is also simplified. An important improvement has been effected in perfecting the delivery of the Skip. A Roller is provided for pressing the Cutting Canvas to Canvas Roller. The Ratchet Wheels are moved by double Pawls, the one slightly in advance of

the other. The whole of the Ratchet Wheels are fitted with our Automatic Silencer. All the reciprocal movements of the machine are regulated independently on each quadrant. All the working parts of the machine are fitted with best gun-metal bushes. The entire get-up of this machine is of the strongest and most substantial character, and all the details are of the most approved kind. Every opportunity of adding improvements has been accepted, while no device that could add to the usefulness of the machine has been neglected. The workmanship and materials are of the best class. We manufacture the above machine in different sizes, prices and particulars will be sent on application. Enquiries solicited for our Dough Mixing Machines, Brakes, Travelling Ovens, and other Bakery appliances.

Leading Hotels in Canada.

ROSSIN HOUSE, TORONTO, Canada.

A. Nelson, Proprietor.

The proprietor has found necessary owing to the increased patronage of this popular Hotel to increase its capacity by an addition of 75 rooms, elegantly furnished en suite with baths, now ready for occupation. The latest exposed sanitary plumbing has been adopted throughout. THE ROSSIN is admittedly the largest, best appointed and most liberally managed hotel in the Province, having accommodation for 500 guests.

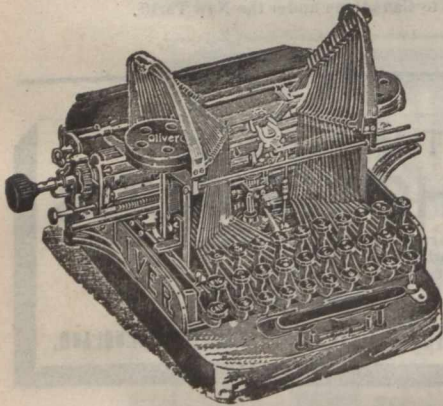

A. NELSON, Proprietor.

THE RUSSELL, OTTAWA.

THE PALACE HOTEL OF CANADA.

This magnificent new Hotel, fitted up in the most modern style, is now re-opened. The Russell contains accommodation for over Four Hundred Guests, with passenger and baggage elevators and commands a splendid view of the City, Parliamentary grounds, river and canal. Visitors to the capital having business with the Government find it most convenient to stop at the Russell, where they can always meet the leading public men. The entire Hotel is supplied with escapes; and in case of fire there would not be any confusion or danger. Every attention paid to Guests.

F. X. ST. JACQUES, Propr.

BOILER SHOP.

THE STEVENSON BOILER, MACHINE SHOP AND FOUNDRY WORKS AT
PETROLIA, ONT., (now of twenty years' standing), continues to make Marine, Stationary
and Portable Boilers of all kinds. The Canadian Oil Wells and Refiners and Mills in this section are nearly
entirely supplied with Boilers and other Plate Work from this shop; while for well-drilling purposes it
has sent many boilers to Germany, Austria, India and Australia. It also makes Oil Stills, Tanks, Bleachers
and Agitators, Salt Pans, Steam Boxes for Stave and Hoop Mills, and any desired work in Plate or Sheet
steel or Iron, as well as all productions of Machine Shops, including Steam Engines and Castings in Iron
and Brass.

Having a full outfit of machinery and tools, including Steam Riveter, and men of long experience, it
invites comparison of the quality of its work, with any shop in Canada.
