They got McCoskell to exhibit his pockets, which he refused to do when they snatched it and ran off with the contents, \$180. BLAKE AT BOWMANVILLE

THE LEADER OF THE PROTECTION ADDRESSES HIS CONSTITUENTS.

THE FIGURES OF THE ELECTION.—The battle should be improved.—The Syndicate Monopoly and the Northwest—Provincial Rights, etc., etc.

BOWMANVILLE, Dec. 27.—The town hall was filled this evening on the occasion of an address to his constituents by West Durham by Mr. Blake. The hall would hold about 400. Mr. H. Lockhart was in the chair. The attendance was a good one. A number of ladies were present. Mr. Blake spoke with his usual force. He was well received. He took this, the first opportunity that had presented itself, to thank the electors who had returned him and especially those who had worked in his interest during his absence in other parts of the province where he was most urgently needed. His friends had very high hopes in the late election that the voice of Ontario would

HAVE A DIFFERENT TONE. 55 conservatives voted for him in 1878. The figure was 23 liberals, in 1878 the figure was 23 conservatives, showing an increase of about fifty per cent. But as a matter of fact the vote of Ontario as expressed from the way it is voted in Parliament. The liberal vote at the polls was almost equal to the conservative. He had revised his first calculations and compared them with those of Mr. Meredith who had challenged his figures. The result was according to his figures, and he considered them accurate, that 136,300 conservatives voted and 138,300 liberals, a total.

CONSERVATIVE MAJORITY OF 2100. Of the ninety-two members elected the conservatives were not really entitled to any more than forty-six and a half members, and the liberals forty-five and a half. Really, however, the former had 55, 20 per cent more than they were entitled to. Why was this? The conservatives discovered that opinion was changing against them and by a gross abuse of power in the gerrymander act they altered the bounds of the constituencies. Eight seats were thus lost to the liberals, namely, Monk, Lanark, Muskoka, Brockville, North Middlesex, North Bruce, East Huron and North Essex.

ADDED TO THE LIBERALS. The eight seats were given to the liberals 45, an approximation to what they were really entitled to. The gerrymander also

WEAKENED THE LIBERALS. In a great many other cases in the eight by-elections of the liberals they had an average majority of 800; in the eight liberal conservative constituencies they had an average majority of 800.
