## Men's Furnishings

Men's Wool Scarfs, and Silk and Wool Scarfs. New up-to-date goods

**\$1.25 to \$2.25**

Men's All Wool English Sox in plain colors or heather mixtures.

**50c to \$1.25**

Men's Dress Shirts, W. G. & R., Arrow and Laing makes, all made of best quality cambria, in good patterns, plain or stripes

**\$1.75 to \$3**

Men's Suspenders 50c, 75c and \$1

Men's Scotch Knit Wool Gloves 50c to \$1

"I am the Handy  
**PERFECTION Oil Heater**"

COME in and see me. I am filled with oil, ready for you to light and lift.

Light me—see how quickly I get going, how clean, odorless and comfortable my heat is. Lift me—see how easily I can be carried from room to room.

I offer you convenience, comfort and real economy—10 hours of "heat by the roomful" on a gallon of kerosene oil.

### Grace Church

REV. E. A. SLACK, L. Th., Rector

Sunday School 10 a. m.  
 Matins and Sermon 11 a. m.  
 Holy Communion 1st and 3rd Sundays of the month at 11 a. m.  
 Evensong and Sermon every Sunday at 7 p. m., except last Sunday in the month when the only service of the day will be at 3 p. m.

### St. John's, Nelson

Evensong and Sermon every Sunday at 2.30 p. m., except last Sunday in the month when Holy Communion will be celebrated at 10.30 a. m.

### Knox Church

REV. C. SINCLAIR JONES, Minister

Morning Service—"Cornelius"  
 Evening Service—"The Handwriting on the Wall" third in series on the night scenes of scripture.

Sunday School and Bible classes at 9.45 a. m.

The Church Club meets Tuesday evening at 8 o'clock.

### Methodist Church

REV. C. L. POOLE, B. D., Pastor

Services at 11 a. m. and 7 p. m.

10 a. m. Sunday School and Bible classes.

The Y. P. S. meets on Monday evening at 8 o'clock.

Prayer Service on Thursday evening at 8 o'clock.

### CARD OF THANKS

Mr. and Mrs. J. J. Millar and family wish to thank their many friends, including the King's Daughters, C. G. I. T., Methodist Mission Circle and Knox Sunday School for their many kindness shown to Jean during her recent illness.

The Family Herald & Weekly Star and Waterdown Review, both papers one year for \$2.25.

### Save her many fatiguing miles

What more welcome Xmas Gift for your wife or mother than an extension telephone?

The time and strength used in running up and down stairs to answer or make telephone calls can be better employed.

Extension telephones cost only \$1.24 a month! The charge for installing is only \$1.00! They are a wonderful convenience.

If you order now, we can install an Extension telephone for Christmas.

Every Bell Telephone is a Long Distance Station

### Locals

A large number from here attended the Winter Fair at Guelph this week.

Mr. Edgar Richards of Toronto spent a few days at his home here last week.

Miss Grace Campbell and Mrs. A. Newell visited with friends in Dundas on Tuesday last.

Mrs. Francis Scott, of Lanes, was the guest of Mr. and Mrs. W. S. Griffin on Monday last.

Mr. John Campbell of Harriston visited with Mr. and Mrs. M. Mc Millan over the week end.

Mr. and Mrs. Geo. Willis spent last week with friends at Fonthill, Port Colborne and St. Catharines.

Mrs. Huffman has returned to her home in Freelon after spending the summer with friends at "Woodhill."

The Devotional Committee of the Methodist Ladies' Bible Class will meet with Mrs. E. T. Sawell on Tuesday, December 11th.

The W. M. S. of the Methodist church will meet next Wednesday, December 12th at 2.30 p. m. at the home of Mrs. Joseph Tuck.

Mr. Neil Flatt left last Saturday for Chicago where he will take part in the judging contest at the Live Stock Show now being held in that city.

Mr. Hollyman, our new baker, has moved his family to the village, and is busy getting the old Buchan bake shop on Dundas street in shape for business.

The Women's Auxiliary of Grace Church held a very successful bazaar and concert in the Memorial Hall Wednesday afternoon and evening of this week.

PICTURES—Memorial Hall on Monday, Dec. 10th. Betty Compton in "The Rustle of Silk" Also Mack Sennett Comedy "The Saucy Madeline" Pictures at 8.15 p. m. sharp. Admission 27c and 16c

A quiet wedding was solemnized Thursday of this week when Mr. Geo. E. Horning and Mrs. Martha Prudham were united in marriage at the bride's home by Rev. C. L. Poole. After a short stay in Toronto the newly married couple will leave for Pasadena, California, on an extended wedding trip.

### Sunday School Convention

At the 33rd annual convention of the East and West Flamboro Sunday School Association held at Carlisle last Friday the following officers were elected. President, Chas. Flatt, Millgrove; Vice-President, Silas Gadye, Carlisle; 2nd Vice-President, William Robinson, Aldershot; Secretary-Treasurer, W. E. McFarlane, Millgrove; Children's, Mrs. L. Lancey, Millgrove; Boys', Rev. F. W. Hendershot, Carlisle; Girls', Mrs. W. R. Pearson, Clappison; Home Department, B. D. Maynard, Dundas; Teacher Training, Rev. C. S. Jones, Waterdown; Missionary, Mrs. H. Davidson, Clappison; Temperance, Mrs. J. Sheppard, Clappison; Adult, P. H. Davidson, Dundas; Next year the convention will be held at Freelon.

### If Editors Told The Truth

Only a short time ago the editor of a paper grew tired of being called a liar, and announced that he would tell the truth in future, and the next issue contained the following items:

John Doyle, our groceryman, is doing a poor business. His store is dirty and musty. How can he do much?

The Rev. Mr. Stye preached last Sunday on Charity. His sermon was punk.

Dave Cankey died at his home here last Tuesday. The doctor gave it out as heart failure. Whiskey killed him.

Married—Miss Sylvia Rhodes and James Collins, last Thursday at the Baptist Parsonage, by the Rev. Gordon. The bride is a very ordinary girl who doesn't know any more about cooking than a jack rabbit and never helped her mother three days in her life. She is not a beauty by any means and has a gait like a duck. The groom is an up-to-date loafer. He has been living off the old folks at home all his life and is not worth shucks. It will be a hard life.

### Hospital for Sick Children

COLLEGE ST., TORONTO.

Dear Mr. Editor:—

Recent discoveries in medical science have called attention to the great service rendered by an up-to-date hospital through facilities provided for research. Probably few laymen appreciate the amount of this work conducted under the auspices of the Hospital for Sick Children. Yet it is only by intensive study of the causes of children's diseases that the hospital staff has been able to establish a world-famous record for cures. Statistics show that the rate of infant mortality in this Province has been steadily decreasing, until it is now among the lowest in the world. What that means is that hundreds of Ontario parents owe their children's lives to the research work in the laboratories of the Hospital for Sick Children.

Although the doctors give their services freely, the bills for equipment add up annually to a good many thousands of dollars. But in view of the results attained, I feel that not one of your readers will avail of the money so spent, and I confidently venture the hope that many of them at this Christmas season will wish to enrol themselves in the Hospital's campaign on behalf of Ontario's childhood.

To carry on this research work there is not one cent except what comes in from voluntary subscriptions. For the care of the children occupying hospital cots there are certain statutory grants, but these represent scarcely more than half what the Hospital needs. Last year, for instance, the Hospital doctors looked after an average of 253 in-patients and 192 out-patients daily. Quite a colony of ailing youngsters! And the expenditure—although whittled down to the minimum commensurate with efficiency—was \$318,917. The income to the extent of at least \$100,000 depends upon the regard which the people of Ontario have for the Hospital's work and the generosity with which they express that regard.

May I ask you, Mr. Editor, to point out to your readers that since the establishment of the Hospital for Sick Children, at least four more Ontario youngsters every hundred have survived the trials of childhood? For with that simple statement I feel sure that many of them will bestow their benediction upon the work of the Hospital for Sick Children by sending some Christmas gift, according to their means, in care of the Secretary-Treasurer, at 67 College Street, Toronto.

Faithfully yours,

IRVING E. ROBERTSON,  
 Chairman of Appeal Committee.

Since the Hospital Opened its Doors in 1875, 65,231 In-Patients Treated — 603,055 Attendances of Out-Patients.

**The Welsh Patent Fuel.**

The present day conditions of the patent fuel trade in Wales might be studied by Canadian miners and capitalists with some advantage; this trade, however, is very dull in Wales to-day, due to a combination of conditions, some of which are temporary, and some of a more permanent nature. It would appear that the economic conditions in Wales brought this product up to such high prices during 1919 and 1920, that it had the effect of making Continental purchasers look for a substitute wherever possible.

Italy, Sweden and Norway, and Switzerland have developed their water power; while France and Spain have started local industries from low-grade coal. France has helped her industries along by informing all the State-owned railways that they must use local patent fuel whenever practicable.

The selling price of patent fuel is controlled to a great extent by the difference between the market price of local dust and large coal; to-day this is about \$2.75, which amount must pay all charges and provide a profit for the manufacturer. The largest single item is for the pitch binder, which amounts to \$2.25 per ton at the present price; so this measure difference of 50 cents must pay all other charges and in addition a profit; consequently for the time being, at least, the position looks rather hopeless.

As pitch is a residue from the distillation of coal-tar for other more valuable products, it is difficult to determine the actual cost of production; as a result the price is set by demand, and is all the traffic will stand.

The demand both in the United States and on the Continent for coal-tar as a road material is so great that its utilization for patent fuel is practically prohibitive. The solution of this particular situation would seem to be the immediate research work to find a new and less expensive binder than coal-tar.

Owing to the coal strike in the United States and the consequent consistent rising cost of Pennsylvania Anthracite, the Welsh patent fuel manufacturers have developed a successful trade in Eastern Canada (which trade they will do their best to retain).

In this Canadian trade only the small size briquettes, or ovoids, are sold, as it is not practicable to use pure anthracite in the larger sizes of patent fuel. There is complete combustion with the Welsh patent fuel; with no clinker, and the present price of \$16.50 per ton, this fuel recommends itself.

**Real "Best-Sellers."**

What is the most popular book in the world?

If we take the test of translation, the works of Shakespeare have been translated into nearly forty languages, and Homer has been rendered into over a score.

The blind poet, however, does not run Shakespeare so close as does another Englishman, Daniel Defoe. The public was recently reminded of the number of editions of this writer's masterpiece, and of how much some of them are prized by collectors, by the announcement that an English lady, the late Mrs. George Morrison, had bequeathed to her son "her collection of editions of 'Robinson Crusoe.'" And a still more famous collection, that built up by Mr. W. S. Lloyd, of Philadelphia, contains editions in thirty-three different languages, including Latin, Greek, Arabic, Persian, Turkish, and Hebrew.

If we take the test of circulation in English-speaking countries, the novels of Dickens are perhaps the most popular of the classics. They certainly continue to command a wide sale.

But in point both of sales and translations, there is no book in the world that even approaches the Bible. It stands in a class absolutely alone.

According to the recently published report of the British and Foreign Bible Society, the number of Bibles and Testaments in English and Welsh bought last year showed an increase of 317,000, as compared with 1921, the total being 1,101,574.

**An Ample Bill**  
"You seem to consider your hotel bill outrageous—what's it for?"  
"For the hotel, I think."

**Canada's Eastern Coal-Fields**

**Maritime Province Mines and Their Relation to the Coal Output of the Dominion.**

Less than one per cent. of Canada's total coal resources are found in her eastern coal fields in the provinces of Nova Scotia and New Brunswick, all of the rest being west of Winnipeg. Nevertheless the collieries of Cape Breton were among the first worked on the American continent and during 1922 the eastern fields produced 39 per cent. of the total Canadian output. Mining operations are known to have been in progress since 1785 and indeed many of the difficulties now encountered in this field are due to the early attempts at mining when the main object was an immediate output of fuel at lowest possible cost and little consideration was given to the future possibilities of undersea mining at long distances from shore shafts.

The coal, which is bituminous in character and of varying quality, is mined in five areas, or fields, usually referred to as the Sydney and Inverness fields in Cape Breton, the Pictou and Cumberland fields in Nova Scotia proper, and the Minto field in New Brunswick. The Sydney field is the most extensive and is credited with about 78 per cent. of the total available coal in the two eastern provinces.

**Terrible**  
Bug—"Let's go through that long dark tunnel, Miss Bug."

Production during the first six months of 1923 showed a decided improvement over the corresponding period of 1922 with an increased pro-

duction of over a million tons and with largely increased shipments to the Montreal market contracted for. It is estimated that the strike during July caused a loss in output of about 400,000 tons. It also resulted in a loss of some of the sales that had been made in the Montreal market. Within two weeks of the resumption of mining, however, the daily output again reached a high level. Practically every colliery is working at maximum output consistent with the available labor for work at actual mining. A persistent shortage in the number of miners has been increased through considerable numbers joining the ranks of the harvesters going to Western Canada. Yet despite these drawbacks if there are no further serious interruptions to output the 1923 production may exceed that of any of the past six years. At the present time large expenditures are being made on permanent improvements that will contribute materially to a better and safer production of coal. With labor conditions on a more satisfactory basis and rates of compensation so adjusted as to attract and retain the native miner, our eastern coal fields will be placed on a better basis to take care of wider markets. The extent to which these wider markets can be obtained in central Canada will depend on ability to compete in quality and price with the enormous producing capacity of the United States bituminous mines.

The Cumberland and Pictou fields possess a little less than 10 and 9 per cent. respectively of the total; the Inverness field about 2 1/2 per cent.; and the New Brunswick field about 1 1/4 per cent. In 1913, the two provinces produced a total of 8,850,000 short tons and in 1922 only 8,850,000 tons. The relative amounts produced from the several fields last year were: Sydney field 79 per cent.; Cumberland 11.8 per cent.; Pictou 9.7 per cent.; Inverness 3.4 per cent. and Minto 4.9 per cent. The output is used largely for locomotive fuel and for bunkering ships. It is used by industrial power plants in Eastern Canada and for the manufacture of coke to supply the iron and steel furnaces at Sydney. It is also used to a large extent as a domestic fuel throughout the Maritime Provinces. For domestic use the output of particular mines and selected seams is employed, but even at that many consumers in the cities of Halifax and St. John and at other points prefer to pay a much higher price for Pennsylvania or Welsh anthracite. Much of the Nova Scotia coal is high in sulphur and for the manufacture of metallurgical coke a careful selection of the coal is necessary. The coal so used is further washed to reduce its ash and sulphur content. In 1914 over 2,600,000 tons of Nova Scotia coal were marketed in the province of Quebec. During the war this market was almost entirely lost but by 1922 had been regained to the extent of about 50 per cent.

Dentist (applying a tool to his ear)  
"Now this is going to hurt just a little."

**Sheep-dog Trials in Wordsworth's Country.**

**By Melesina Seton-Christopher**

All my life I had longed to see the trials of these wise dogs on the Westmorland Fells. For once expectation was not disappointed. The sight was unique in its picturesque simplicity and reality. The scene set in the most suitable surroundings—in the heart of the great hills. A green valley gave on the one side an immense sloping stage, and on the other a perfectly graduated auditorium. Plain boards, ranged in tiers on the ground, were all that was necessary to accommodate the spectators. Above, the sunlight caught the tops of the hills and crowned them with emerald and gold.

The dogs are not usually of the shaggy, bob-tailed English type, but are often lithe, smooth-haired creatures of every sort of mixed breed—speed, endurance, and intelligence being the qualities aimed at. The trials were announced to begin, on a black-board, in white chalk, freehand, and it was added that the time for each was limited to eight minutes. In that space the dog, after reaching the three sheep let out from a pen low down on the opposite hill, had to endeavor to guide his trio up the slope, past one white flag and between two others near the summit—something like half a mile in distance. To drive sheep away from the shepherd is in itself a difficult task, as a dog's inclination and training are to bring them always back to his master. The sheep have then to be brought down the slope between two more flags, across a road, through a narrow iron railing, and back into the field where the spectators are clustered on the bank, and where hurdles and the final pen have yet to be negotiated. The dog is meanwhile guided only by such signs and whistles as the freemasonry between him and his master have established, and the shepherd tethers himself at the starting-point with a rope passed round his wrist. Once dog and sheep are back in the final field the shepherd may help. He plunges down the hillside and joins his dog in the endeavor to drive the sheep through the hurdles, and then, by a narrow entrance, into the pen where they must be finally folded; and all before eight minutes have elapsed.

This allows for very little error on the part of either performer, and it was a beautiful sight to see the sheep-dog start, when the signal was given, like an arrow from a bow. The sheep are of the wild, mountain type—Herdwicks—taken from three different flocks, and each dog has a fresh lot to deal with. After tearing down the slope and half-way to his quarry, the dog nearly always turned his head, cocking his ears and waiting for his master's bidding. With fingers in mouth the shepherd whistled a long-sustained carrying whistle, almost like the sound of a travelling rocket, and then softly fluted like a piping bird when a cautious follow on was re-

quired. A sharp, abrupt sound, which signifies the dog is to lie down, is one of the most vital and important signals.

With the long-drawn whistle, off goes the dog in close contact with the sheep, but the latter are by no means tractable. One will break away and bolt towards the flock it has left, and the dog will go whirling off in pursuit, hardly ever failing to get ahead and turn the erring sheep back to the right course. It was marvellous to note how the various whistles of the master guided the dog now to dart on quickly, then to lie down, now a swift, circling movement and a slow follow on, all punctuated by the sudden crouch whenever the sheep showed signs of following the right course. Nearly all the signals between man and dog are confined to the various whistles and movements of the shepherd, but now and then a quick "What a you do!" "Steady now, lass," "Gaw a' hint," broke out, but verbal directions lose marks to the performers. The early days are past when dogs were in a state of bewilderment, and the shepherd said, in an aside to his friend: "I donna gen how to talk to the dogs with all they ledles about."

One of the best dogs we saw was of the collie type—a sinuous creature, black and tan, with tender chestnut eyes, aged eight. He made no mistakes whatever, but firmly and gently guided his charges with absolute obedience to every sign given by his master. The audience watched breathlessly while the shepherd whistled and crooned, now loud, now soft, now

long, now short, to the ever-watchful dog. As each difficulty was successfully overcome the crowd, composed partly of visitors, broke into an involuntary storm of clapping, instantly smothered in a rushing sound of "Hush!" from the habitués, who know well how unfair such distractions are to man and dog. It was, however, extraordinarily exciting as the pretty collie brought the sheep into the field and was there joined by his master. Then the man made a cautious movement and the dog, at the signal, crouched. Then a slight motion, then a quick lie down, another inch length move and the nose of the first sheep was within the narrow aperture of the pen. Still the slightest false movement and the other two sheep might be off. The dog took another pace, then crouched again, and the two hesitating sheep cautiously stepped in, and all three were safely penned with twenty-three seconds to spare. The dog sprang forward with a joyous leap to be patted, and as man and dog reached the clapping, cheering line of people, the young shepherd grinned and said simply: "Not s'bad that time."

The dogs apparently give no further thought to the sheep as soon as success meets their efforts or the short, sharp, time whistle goes. The sheep are at once gathered up by a clever collecting dog, whose job it is to do this all day, and who never interferes with them while they are taking part in the tests, however near they come to him. The collie meanwhile had retired to the side of a tent,

**My Littleness.**

Two pinholes in the curtain.  
My eyes;  
Two weeds flapping in a field of corn.  
My hands.  
And in the distance like a fogsore blowing.  
My heart.

I am no bigger than mountains,  
Or mightier than stars,  
The Sybils smelle of me familiarly,  
Daisies touch lips with me.  
I shall be dust soon.

—Lourelne A. Aber.

**The Vine.**

Love is quaint like columbine,  
Queer and new like lilies  
Among moon-faced flowers; a vine  
All original, like these.

And it matters not a whit  
What it climbs on, I am told;  
An old shed will do for it—  
Or a pillar cased in gold;

So it have, till it be grown,  
Something for a trellis,—good!  
Old love can climb round its own  
Twisted hemsuckle wood.

—Able Huston Evans.

**Worry! Wouldn't you?**  
"Why are you so worried over the loss of your purse?"  
"Great heavens, man, my wife'll have to come home from the shore two weeks before the time!"

## CAUSE OF BACKACHES

Every muscle in the body needs a supply of rich, red blood in proportion to the work it does. The muscles of the back are under a heavy strain and have but little rest. When the blood is thin they lack nourishment and rebel. The result is a sensation of pain in these muscles.

Many people are frightened into believing that backaches are due to kidney trouble, but the best medical authorities agree that backache is very seldom due to kidney trouble. In fact not more than one backache in a hundred has anything to do with the kidneys. The whole trouble is due to thin or impure blood, and those who are troubled with pains in the back or loins, either frequent or occasional, should look to the condition of the blood. It will be found in most cases that Dr. Williams' Pink Pills by building up the blood and feeding the starved nerves and muscles will banish the pains and make you feel better in every other way. How much better it is to try Dr. Williams' Pink Pills for your blood than to give way to unreasonable alarm about your kidneys. If you really suspect your kidneys any doctor can make a test in ten minutes that will set your fears at rest, or tell you the worst.

All dealers in medicine sell Dr. Williams' Pink Pills, or you can get them by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Making Love-Letters Private.

There have always been parents and guardians to hinder and thwart the hapless lover, and many girls have been obliged to resort to methods of deception.

The simplest means ever employed was to write the love message with fresh milk instead of ink. On the receipt of a blank sheet of paper, all the recipient needed to do was to sprinkle it with soot or charcoal. The grit stuck to the lines traced by the pen.

When the trick was of no avail, chemists would perform the task of writing with acetic acid. Another chemist applied sulphuretted hydrogen gas to the letter and the secret was unfolded.

Another "sympathetic" ink is that produced from cobalt, the writing of which disappears in the cold, but appears again as often as one chooses after being exposed to a moderate degree of heat.

Characters written in diluted sulphuric acid and lemon-juice become black or brown; those written in solutions of nitrate and chloride of cobalt, and of chloride of copper, are rendered green, the color disappearing when the paper is allowed to cool in a moist place.

### His Hearing Restored.

The invisible ear drum invented by A. O. Leonard, which is a miniature megaphone, fitting inside the ear entirely out of sight, is restoring the hearing of hundreds of people in New York city. Mr. Leonard invented this drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell he is a deaf man. It is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural drums. A request for information to A. O. Leonard, Suite 437, 70 Fifth avenue, New York city, will be given a prompt reply.

A number of sharpened gear shaped wheels that intermesh do the work of a lawn mower that is almost noiseless.

## Unquiet Earth.

When they call earth quiet  
I think they have not seen  
Old roads covered and  
Old paths lost.  
There is nothing more restless  
Than small, fine green  
That stirs in the seed that  
The wind has tossed.

The old earth mother  
In every field and thicket  
Uncovers and recovers,  
Bearing without rest,  
Eggs and sprouts and lichens,  
Mouse and worm and cricket,  
And wild red honey at  
Her warm brown breast!

Seed that dies to live again  
And no man understanding,  
Sour green fruit that loves the sun  
But waits till frost for sweet;  
And that old word of dust to dust,  
Destiny commanding,  
Flower and fruit and seed to make  
The year complete.

The earth is never beaten;  
She has harvests in wild places.  
The bear knows the berry,  
The fox knows the grape,  
And all the old dead in her  
Come out with flower faces;  
She trembles with the forces  
That quiver and escape.

When men call earth quiet  
I think they do not know  
How root calls to root  
And breaks the brown clod.  
They've never watched the woods  
Come  
Where men no longer go  
And eat the long road where  
Our feet once trod.

—Louise Driscoll.

## GUARD THE BABY AGAINST COLDS

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### No Ancient Utensils Ever Found in Tin.

While tin has been in use for a great many centuries, yet ancient vessels of tin are so rarely found by archaeologists as to be well nigh unknown. This is not due to the fact that tin rusts, for the metal does not combine chemically with the oxygen of the air or that of water, but to the circumstance that a sort of decay does attack it, producing a change in its crystalline structure, the nature of which does not seem to be clearly understood. This ends in reducing the tin to a fine gray powder. The process proceeds much more rapidly at certain times than it does at others and seems to be transmitted from one piece of tin to another, almost like an infectious disease.

### Try This.

Young Author—"When I write far into the night I find great difficulty in getting to sleep."  
Friend—"Why don't you read over what you have written?"

## EASY TRICKS

No. 56

Gone

Show five cards to the audience, asking a spectator to fix his mind upon three of them without telling you which he selects. Drop the cards into a hat. Reach into the hat and expressing your determination to take out one of the cards not selected, take out a card. It is not a selected card. Take out another. That is not one of the cards selected. The hat must now contain the three cards which were selected. Ask the spectator to reach into the hat and take out the remaining three cards. He finds the hat absolutely empty!  
It seems impossible but it is really very easy. Take the three of spades and paste its back to the back of the seven of diamonds. Take any other four cards and paste them as in Figure 1. Now, cut as indicated by the dotted lines. This dotted line follows exactly the outlines of the 8 of clubs. To the back of this card, paste the deuce of hearts.

When you display the cards, hold them as in Figure 2. The seven will hide the misleading nature of the other "card." After the spectator has selected the three cards, put the "fan" of cards in the hat. The first card you take out is the three of spades. That is not one of the selected cards but no one will observe that it had not previously been displayed. The next card to be taken out is the deuce of hearts. That, of course, leaves the hat empty.

(Clip this out and paste it, with other of the series, in a scrapbook.)

### Worth While.

Some little word of kindness, softly spoken,  
To light the path when skies are dull and grey,  
May serve to heal the heart that's well-nigh broken,  
And bring new life and hope with ev'ry day.

Some little kindly act of self-denial,  
To place a fallen brother on his feet;  
The one bright spot that through long years of trial  
Makes life worth while and mem'ry passing sweet.

A cheery smile to make some heart feel lighter,  
And help to ease life's burdens, come what will,  
Can make this dull old world seem all the brighter,  
And bring the Heaven we dream of nearer still.

### MONEY ORDERS.

Send a Dominion Express Money Order. They are payable everywhere. There are two elements that go to the composition of friendship. One is Truth; the other is Tenderness.

Keep Minard's Liniment in the house.

Modern fashions are said to have raised the standard of health among women.

Mother! Give Sick Baby "California Fig Syrup"

Harmless Laxative to Clean Liver and Bowels of Baby or Child.

Even constipated, bilious, feverish, or sick, colic Babies and Children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely. It sweetens the stomach and starts the liver and bowels acting without griping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeits! Insist upon genuine "California Fig Syrup" which contains directions.

## WARNER'S SAFE KIDNEY & LIVER REMEDY

is the quickest and best relief for pains in the back and the many other indications of kidney trouble. Sold for 50 years. Satisfaction in every bottle. At your druggist, or direct from WARNER'S SAFE REMEDIES CO. Toronto

## SMOKE

in 1/2 lb tins

and 15¢ pkts.

## OLD CHUM

The Tobacco of Quality

Manufactured by Imperial Tobacco Company of Canada Limited

### Out of Step.

An Irish sergeant was drilling two very stupid recruits, who could not be prevailed upon to keep step. Losing all patience, he shouted:

"If I knew which of ye two spalpeens was out of step, I'd put him straight in the guard-room."

Ask for Minard's and take no other.

Oatmeal is responsible for more defective teeth than either white flour or rice.

## COLD

IN THE HEAD?  
Get quick relief. Rub nose inside and out with

## Mentholatum

At all Drug Stores. Write for Free Sample. THE MENTHOLATUM CO. Bridgeburg, Ont. Box 38

## Pimples Disappear

"You don't need mercury, potash or any other strong mineral to cure pimples caused by poor blood. Take Extract of Roots—druggists call it "Mother Seigel's Curative Syrup"—and your skin will clear up as fresh as a baby's. It will sweeten your stomach and regulate your bowels." Get the genuine. 50c. and \$1.00 Bottles. At drug stores.

## ASPIRIN

Say "Bayer" and Insist!

Genuine

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product proved safe by millions and prescribed by physicians over twenty-three years for Colds, Headache, Toothache, Lumbago, Earache, Rheumatism, Neuralgia, Pain, Pain. Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell trade mark (registered in Canada) of Bayer Manufacture of Aspirin is the Bayer Manufacture of Monosodiumacetate o' Salicylicacid. While it is well known that Aspirin means Bayer Manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

If all things for the same purpose are kept together, time and trouble will be saved the housekeeper.

**Poultry Increase Income.**

Produce infertile eggs by removing the roosters from the flock in the summer time.

Provide clean nests and keep eggs clean.

Gather the eggs twice daily during the summer, to prevent them from being heated by the hen.

Keep them in a cool dry place away from the flies.

Market them at least twice each week.

Insist that they be bought on a quality basis.

Producers are admonished not to wash eggs.

**When to Cut Wheat.**

Wheat may be cut with safety when the straw has lost nearly all its green color and the grains are not entirely hardened. If cut sooner than this, shriveled kernels will result. If left standing until fully ripe, a bleached appearance, due to the action of the elements, often results, and loss from shattering may ensue. Wheat that is fully ripe is also more difficult to handle. Where the area of wheat is large, cutting should begin as early as it can be done safely.
