

Just how long the Liberals In two weeks' time The it is apparent that there is determined up. ation to make a fight and keep it up. And they keep hinting that they have For Courage and Gallantry, SUNDAY WORLD will commence its new Serial Story by Arthur Applin. FOR CANADIAN AUTONOMY. President Taft Rewarded The story is a thrilling **Rescuer** of Titanic Toronto Globe, March 1 .--- The colone of love adventure, to the Liberal party were nailed to the masthead by Sir Wilfrid Laur-ier early yesterday morning. The Liberals of Canada are unalterably Survivors. and without doubt one of the best ever run as a opposed to Mr. Borden's policy of "hiring" naval defence. They believe WASHINGTON, March 1 .--- President serial. Taft today presented to Arthur Rostron that as the daughter nations of the empire grow in strength and wealth the gold medal authorized by congress to him for his courage and gallantry in they should protect their own coasts to him for his courage and gallantry in Huge Swindle on the heed ever comes, to take their and bringing them safely to New York place in the empire's fighting line. on his own ship, the Carpathia The on his own ship, the Carpathia. The That is the policy of the Liberal president made a brief speech in pre-party today. It was the policy of the Conservative party also in 1909, when senting the medal, quoting the report of the senate investigating committee the Parliament of Canada deliberately Upon that policy Sir to show the bravery, the painstaking adopted if. Upon that policy Sir Wilfrid Laurier challenges the Borden government to take the verdict of the people by a general election. Mr. Borden met Sir Wilfrid's chal-lenge by the announcement that the government confidently believed that in its policy it had the Canadian people behind if, and would therefore wass its proposals to a conclusion in to Be Revealed During Next Few Days. ess its proposals to a conclusion in rliament. The issue is joined. The arliament. orden government will not consult te people unless it is forced to do so Motor League Closes the withholding of supply or the Membership Campaign longation of debate on the naval bill with the object of preventing its passage. Sir Wilfrid's speech seems to indicate an intention to force the question to a decision at the polls. The campaign of the Toronte Branch of the Ontario Motor League closed at noon Saturday, with the result that 905 applications for membership were re-ceived, and it is expected that this with applications have been received. This brings the total number of mem-bers in Toronto up to 2100, which is wery gratifying when it is considered that there are only 3000 auto owners in the city. Prize's were offered for those who brought in the largest num-ber of new members, but the winners will not be announced until later. Canada may have a general election on the navy issue in May or June. In that election [Liberalism will stand for Canadian control of Canada's de fensive forces on land and sea. WALTERS, KANSAS

statesmen: but that the question of real doubt is whether the Democratic majority in congress, after its longed absence from control over national affairs, may not be inclined to ride the high horse rather recklessly. If this were to happen, and if financial depression were to be caused by it, your public, it is thought, might pro-bably be at first inclined to blame the financiers. longed pro-

financiers.

financiers. Briefly expressed, we believe that your people are for the moment dis-posed to only the bad side of the banking alliances, and combinations, and are inclined to overlook the en-ormous national prosperity and high wages which have accompanied them. Ultimately there will no doubt be a satisfactory adjustment of the dis-puted question, but the interval of un-certainty is likely to be troublesome. We hear constantly from your railway We hear constantly from your railway circles of instances of the innumerable legislative measures and of the conse-quent embarrassment to investment capital, both in the railways and in your other industries.

The European Situation.

The European Situation. Argentina's requisitions of the gold supply are slackening moderately, but your market is expected to send more next Saturday and later. It is a mat-ter of comment that our five per cent. Bank of England rate has now been in force for more than four months—the longest consecutive period in fifty years for unchanged maintenance of so high a rate. Notwithstanding that fact, the bank has lost gold on balance during that period. during that period. For this reason no reduction in the

For this reason no reduction in the rate will probably be urged until the bank's gold holdings appreciably in-crease. The existing money strin-gency, therefore, is likely to last thru March, tho the absolute clearing of Europe's political sky might relieve the situation and even occasion a fail in situation and even occasion a fall in the rate.

At present the political omens are man and Prussian loans increases the feeling of optimism regarding the near return of peace in the Bellian rector, burgets under the use of this new and

feeling of optimism regarding the near return of peace in the Balkan region. Dut the public is weary of waiting. Actual news of an end to the south-eastern war would probably mean a gradual rise in stocks, tho anything like a boom would presumably be ob-structed by the large new financing immediately in view. The better class of investment issue are likely in the end to attract the greater favor. A very dainty St. Valentine lunch-eon, followed by progressive euchre, was given westerday afternoon by Mar.

A very dainty St. Valentine lunch-eon, followed by progressive euchre. Was given yesterday afternoon by Mrs. R. D. Lomax, 403 Dundas street, to some thirty of her friends. The rooms were beautifully decorated in flowers and palms, the predominating color being red. Mrs. Lomax, who received her guests in the drawing-mooni, wore a lovely gown of French Stay charmeuse with shadow lace. A most delightful afternoon was spent.

THE TORONTO SUNDAY WORLD

Supreme Court of Judicature Unanimously Opposed the Appointment of Three New Judges.

Sir James Whiteney may have been quite right when he appointed three Put Grease Into Stove to Make additional judges to the supreme court of judicature last year, but it has developed that he did so against the wishes of the judges who were than and had been for years at Osgoode KINGSTON, March 1 .-- Mrs. Eliza- Hall.

Under the Judicature Act, which vas passed by the legislature on March 22, last year, three judges for She put some grease into the stove the high court bench-Mr. Justice o make the fire burn quickly, when Lennox, Mr. Justice Leitch and Mr. flames shot up and her clothing was Justice Meredith-were appointed. soon in flames. She ran into the bed-When an amendment calling for the room and altho suffering intense repeal of the act was introduced by agony, tried to beat out the flames, but some of the furniture in the room caught fire. Her daughter, Miss Jennie Beel, and her grandson, Louis Mar-chand, of Toronto, came to her rescue, but before they could put out the flames the aged woman was terribly burned all over her body, and they were also burned about the hands. Mrs. Beel lived several hours after the accident. She was widow of the late James Beel and was born in Brock-ville. agony, tried to beat out the flames, Mr. Rowell, leader of the opposition, was voted down, Sir James Whitney said that "a unanimous request was made by the high court judges for an increase of their members." He said that nothing to the contrary had been received by the government since then or since Oct. 23, 1909.

Letters Brought Down.

N. W. Rowell last year asked an order of the house for the return of all correspondence between Sir James Whitney and members of the bench of the supreme court of judicature

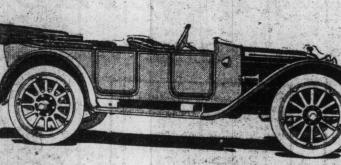

bouching upon the appointment of three more judges. The return has just come down, and in it are a num-ber of interesting letters which were exchanged between the premier and the judges, showing that Sir James did not coincide with the views of the mbers of the bench in regard to ie matter. On October 23, 1909, a letter was

sent to Hon. J. J. Foy, attorney-gen-eral, by the late Sir Chas. Moss, who was then president of the supreme court of judicature, transmitting the ollowing resolutions, which were antimously adopted: 1. That it is the opinion of the judges that in the public interest and for the due and proper despatch of business, there is urgent need of an increase in the number of judges of the supreme court of

Judicature. 2. That the judges recommend that provision be made for the appointment of three additional

judges. 3. That the president communi-cate these resolutions to the at-torney-general of Ontario. The letter added that it had been ap-

THE attention that Oakland Cars, attracted at the Show was no more than is rightly due tothese cars.

MARCH 2 1913

9

Questions of first cost and upkeep appeal more strongly than ever to the motor owner.

Many owners of high-priced cars examined these Oakland models carefully at the Show. These men have driven cars. They know what features in a car cut down tire and gasoline expense. They understand the equipment necessary to Canadian conditions and their opinion is the one you can bank on, because it is unprejudiced.

How can you build them-at the price? The unbiased opinion of motor owners. In building Oakland Cars the first consideration. was build a good car-never mind the cost. We built good cars. Then we regulated our face tory, cut down overhead expenses, and produced these cars at moderate prices. Every Oakland model is fitted with Electric Self-

Starter and Self-Contained Electrc Lighting System, and features all the latest motor equipment of proven value.

The Show is over, but you can examine these cars-or have a practical demonstration at any time,

> Walter Jones First Great Stage Tramp Walter Jones, who created the part f. Jimmy, in William A. Brady's

augh-play, "Baby Mine," will appear his original character when the Jincks. omedy is 'produced at the Grand Theatre this week, for the first time

at this theatre. Mr. Jones is held responsible for the creation of the tramp character to the native stage. That husky voiced

tion from them until his Weary Wasgles, in '1492," in which his suc-cess was enormous, and incidentally was not far from ruining his career, for it was a long time before he could drop that line of character work. Mr. Jones was also featured in the Beach-Armstrong farce, "Going" Gay New York," and other New York Casino successes, and thruout the New York run of "Baby Mine," being the hit of the piece, with his Jimmy Jincks. will be presented. In San Diego there, will be two performances, and in San Francisco sixteen; to the above operas being added "Le Jongleur de Notre Dame," "Jewels of the Madon-na," "Louise," "Carmen," "La Travi-ata," "Pagliacci," "Noel," "The Secret for Suranne," Indications are that Noted Stars Enlist

For Operatic Tour of Suzanne," Indications are that there will be large audiences on all oc-

This splendid 45 Horse Power Five Passenger Car weighs one thousand pounds less than many of the cars having same power. This is a most important fact and should be carefully considered before deciding to purchase. In purchasing the "Overland" the cost of operating is one-third less than any other 45 horse power car.

\$2210 is the price. This includes the U. S. L. Electric Equipment for starting and lighting, also speedometer, tools, top and clear vision wind shield. Everything up to the minute, with the assurance that in buying an "Overland" you are buying a tried and tested car. You take no chances. Efficiency and serviceability, as well as beauty in design and convenience in operating either for city or country use, makes this car the very best value obtainable.

\$1975 is the price of this same car, Model 71 T without the electric starting device, but with electric lighting and all the other equipment.

\$1350 is the price of our 30 H. P. Five Passenger Car.

Allan Aylesworth with the request that the new judges, two or three in number, be looked after n the estimates of 1910. Sir Allar rote to Mr. Foy, saying: "The fac Four people were seriously injured that you have introduced legislation on the subject indicates, of course,

on the High Park' slides about 5.30 that you concur in the views expressed by the chief jus-ice, and in these circumstances it Saturday sleigh seems a bold thing for anyone to differ, yet I must admit that I hesi tate, and cannot rid myself of the feeling that the present staff of supe-rior court judges in the province heavily loaded, was coming around the

ought to be equal to the amount of work there is at the present time." Sir curve when another steigh ahead up Allan said that he had thought the set. recent increase in the jurisdiction of T

The occupants failed to get out of the county courts would have relieved the way and the wheelsman on the the work of the high court judges. He promised the bill careful considera-tion, however. Nothing more was done other sleigh was forced to run to one side to avoid a collision. Unfortuuntil last year, when Sir James Whit-ney introduced his bill to the legislaately the front sleigh was swung too sharply and the bobs plunged over the ture, aiming at an increase of the embankment.

Changed Opinions. Sir Charles Moss wrote to Hon. J One lady sustained a broken hip and other injuries. Two other women J. Foy, in reply to a letter for infor-mation, stating that the judges had changed their former opinions, or in other words, they did not think the were also badly hurt. One of the men also received injuries. The police ambulance was despatchamount of work necessitated an in-crease of judges. "Great changes in conditions have occurred since the re-commendation of Oct. 25," he said. Not Needed. ed to the scene thd the injured removed to the Western hospital.

On March 23, the day after the legislation was passed, seven judges --Boyd, Maclaren, Magee, Britton, Latchford, Sutherland and Kelly--sent resolution to Sir James Whitney stating that there was no need for ad-ditional judges. Two days later Sir lenholme Falconbridge, Sir William Julock, and Mr. Justice Teetzel and

Mr. Justice Riddell, who had not at-tended the meeting of the other seven

judges, sent their concurrence in th

"Lady" Handles Man

ion of their colleagues to the preier. Mr. Justice Middleton followed MONTREAL, March 1.-A constable on duty on St. Catherine street was walking quietly down and probably dreaming of all the "good things" he andum a day later. At a full meet-ing of the judges on March 30 a resolution was drawn up and sent to ir james Whitney expressing the ew that the conditions of the adwould find when he was allowed to return to the police station, when his attention was suddenly attracted by a struggling mass of humanity on the sidewalk. He rushed over and was horrified to see a "lady" holding a man inistration no longer required aditional judges. In reply to this resolution, Sir James ent a letter to each of the judges. The

horrified to see a "lady" holding a man down on the pavement and trying to impress her knuckle marks on the gentleman's face. The gallant officer gently helped the

sent a letter to each of the judges. The wording of the letters were the same, except for an additional paragraph in the one to Sir Glenholme Falcon-bridge, which said: "I may say that I was more or less surprised, having regard to your statement to me a few weeks ago, that you desired the ap-pointment of additional judges." Why They Changed Minds. In a letter of March 27 Mr. Justice Middleton sent a letter to the premier explaining why the judges had chang-ed their minds since October, 1909. He said that the decrease of work did not necessitate an increase in judges, or words to that effect. 'In 1909 the num-ber of cases heard was 1143 and in 1911 the number of supreme court judges were being relieved of consid-erable work to the the set. they should both follow him to the police station, he was shocked to hear the "lady" use some rather strong language in a voice which was not at all musical. He, however, marched his prisoners to headquarters, where i was discovered that the robes do no always make the monk, and that the 'lady" was only a man who had dressed up on account of the mid-Lent car nival.

Judges were being relieved of consid-erable work by the enlarged jurisdic-tion of the county court judges. Mr. Justice Britton, Mr. Justice Su-therland, Sir John Boyd and Mr. Jus-therland, Sir John Boyd and Mr. Justice Riddell all communicated with the remier and explained why they had hanged their view on the subject. Sir James in replying to the receipt of the resolution said that he had received resolution said that he had received "without any covering letter a mem-orandum signed by yourself. . . . Altho there was nothing to inform me from whom it came, I think it is my duty to notify you as one of the signatories that I received .it" Mr. Justice Britton replied that he was not aware of how the memoran-dum was sent, but, "I hasten to assure you that not the slighest discourtesy was intended, and to express my re-

Autor Still of the barg ain Count in Crown Record Field and the spurt in the fast one of the sput in the sput in the fast one of the sput in the sput in the fast one of the sput in the sput i

factory. The recent statement of oper-ations, submitted with the dividend cheques, showed that the profits for the first six months after the mill was started were \$600,664.42. Of this \$270,-000 was paid in dividends, there was written, off plant and development over \$200,000, and the balance of \$101,-901.69 was carried forward. The sur-plus on Dec. 31. last stood at \$351,-\$01.69. Considering the fact that the strike was under way during that time and that production fell as low as \$10,816 per week at one interval in that period, this record must be ac-cepted as a remarkable one. The out-put from the mill in the second week of February was approximately \$60,-000, and since an additional five stamps have been put in commission since that time, it is probable that the production is now in the neighborhood of \$70,000 per week. On this basis the company's earnings for the whole year, ending June 30 next, should leave a very handsome surplus. It is likely that the total earnings will reach about \$2,250,000. Hollinger at New High Record. rank are responsible for the upturn. In fact, there has been considerable comment over the fact that Crown Reserve has been held back so long. It seems justifiable to expect that the It seems justifiable to expect that the shareholders will be receiving divi-dends from the McEnaney within the next year or two, and as the Cobalt holding of the parent concern appears to be able to take care of the present disbursement for a long time to come, it is apparent that the speculative value of the shares is very large.

Hollinger at New High Record.

Hollinger at New High Record. Hollinger shares have soared to a height never before equaled during the week. In this connection it is in-teresting to note their fluctuations in the past three yors. The stock was underwritten privately late in 1910 at \$3.50 per share, a figure which it has never reached in the market. The first open transaction occurred on Dec. 14, \$3.50 per share, a figure which it has never reached in the market. The first open transaction occurred on Dec. 14, 1910, at \$4. The range since that time is as follows:

after paying

scores is bright. The work of the bowl-ers on Friday was sensational thruout. The events scheduled today will begin at 10 a.m., when the first set of two-man teams will take the alleys. The Chi-cago all-star squad will be the feature of the schedule tonisht. This squad includes the Lipmans. who held the five-man team record until defeated by the Overlands of Toledo last night.

Billy said. The one thing apparent was that there was a desire to side track Willard in favor of the Bom-bardier. Something was sprung about the Wells-McCarty prospects hav-ing an international flavor and it finals against Varsity third. The game was argued that there was nothing to prevent Willard hooking up with the winner later in the year. McCarty, the belt-provider, the Wells-McCarty idea.

"The British have done so much for the game of the gloves that I think we ought to display a handsacross-the-sea spirit and extend courtesies to any representative fight-er they send us." said Uncle Tom. Liked the Idea. The British papers liked the idea. They were a unit in extolling Bom-bardier Wells as "the representative Drittle because in the representative

Well, it does not matter much what

British heavyweight," and they de-clared he would command lots of backing from his own country when America selected a man to compete against him. Has Wells ever shown an inclination to hook up with McCarty or anyone else on this side in a regulation cham-

pionship encounter? After all the nice things the English press said about him one might expect to find him fired with the ambition to strive for the champion. ship in the orthodox way. I have no doubt that some of the old-time Britishers on this side of the pond had visions of the Bombardier tying his colors to the ring-post in his corner and coming to the scratch for the championship tussle with the old, ungrammatical formula, "May the best man win," on his lips.

But the Bombardier wants ter rounds and no decision. In justifying his position he said recently:

"Any sane persons knows it is bet-ter to take \$10,000 for a ten-round ter to take \$10,000 for a ten-round bout than for a 20-round affair, par-ticularly if there is no decision ren-dered. If McCarty should be out-pointed I will agree to meet him in a 20-round bout in California on a win-ner-take-all basis and bet him \$5000 on the side. If McCarty declines this offer, he will stand convicted of cow-ardice and I will promptly claim his ardice and I will promptly claim his title. If I don't hear from him I will go out on the road and challenge Mc-Carty in every big city in which he shows. I take this means of proving to the American public that I really mean business." This line of talk is no better and

no worse than the "ordinary "guff" that emanates from ringmen who are as a rule more boastful than belliger-ent. In proposing to fight a real championship battle later the Bom-bardier is putting the cart before the horse. We should have the referee first and the no-decision affair afterwards.

Had Better Wait. As to claiming McCarty's title the Bombardier had better wait until Mc-Carty defaults in an out-and-out championship contest. Champion-ships are not disturbed by no-decis-ion bouts or by failure to engage in

them. As for following Luther around the country and challenging him wouldn't it be the deuce if Wells and woolly Willard in some wild and woolly western spot where Jess is not heread? barred?

And wouldn't it be terrible if Jess said: "Seeing as how you can't land McCarty, and not liking the idea of your going back to England without a match, I'll fight you myself." a match, 14 fight you hiysed. Well, whichever way the cat jumps will be the right way. There are no hard and fast rules for top-notch fighters to follow and if Wells can badger McCarty into a ten-round, nolecision, match no one will

_the fit of the collar_and, above all, in the way a Scotland Woolen Mills suit holds its shape.

13

Three

Weeks

to

Easter

How We Do It

It is purely a case of huge quantities and ultracareful management. Our buyer, when he visits the mills in Scotland, is ready to order thousands of bolts of suitings and overcoatings and so gets the greatest price advantages. Our new workrooms on Richmond Street are very important factors. The six well-lighted floors are carefully planned that no motion is lost. Your suit is cut at one end of the building and emerges from the other end the finished product. Every process is in the hands of specialistsmen who have learned to eliminate useless movements and with the aid of modern machines do in one hour as much real work as the old style tailor does in three. That is why, too, you get your suit from us so much quicker than from the ordinary tailor.

Whatever your position or income, you should be wearing a Scotland Woolen Mills \$15 suit!

REMEMBER-It is only three weeks to Easter.

Toronte, Hamilton, Londen, Detroit. Fort William, Winnipeg, Brandon, Regina, Saskatoon, Calgary, Edmonton

Murphy Tired Badly. In the latter part of the fight Murv. m. milinulnovn a vo 87-89 King St. East In the latter part of the fight Mur-phy tired perceptibly and was un-able to evolve a successful defense against Wolgast's body punches, but the blows seemed to do him little damage. While Ad fought what was probably his best battle since his ill-ness, it is evident 'he no longer car-ries the hefty punch that stopped sturdier boys than Murphy in the past. The opinion of experts pres-ent at the mill is that he would have slight chance to regain the title in slight chance to regain the title in another battle with Ritchie. another battle with Ritchie. Packey McFarland and Jack Brit-ton have at last been corralled for a ten-round bout. The art.cles have been signed and sealed, the weights arranged, and the "split" of the dough adjusted to the satisfaction of every arranged, and the "split" of the dougn adjusted to the satisfaction of every-body. All that remains is for the boys to climb thru the ropes and start things. This interesting event is scheduled for Madison Square Garden next Friday night, and it goes without saying that the immense arena will be packed to the doors with ioyal fans who have long been rooting for this clever pair to settle their dif-

Packey is Corbett's Choice. I have frequently expressed my come, but t may interest my readers my views once more now that the match has been clinched. Packey is probably the most scientific boxer in the ring today. Britton is moddeled son what on the McFarland plan, but comparing the men on their New York exhib tions he hardly looks the equal in skill of h's rival Chi-cagoan. Jack showed in a recent bout with Young Ahearn that his round arm style of hitting leaves him open at times for a fast left-lead, and it is needl ss to say that if Ahearn's be sure to take advantage of every opportunity to sting h'm with that merber. While I expect Packey to lead on points throut the contest I

hardly look for the bout to termin-ri fire the limit altho consider-able ill feeling exists, and there is no telling what may happen in a grudge battle. However, I would if it mill to a sloughter, and look for the boys to regale the sports with a high form of Queensbury entertain-

Kilbane a Clever Boxer. Local cr.ucs are at last forced to amit Kilbane is a "real champion." iny's display of form when he topped George Kirkwood, the hard-a'ting St. Louis featherweight, so im-pressed the experts that they are now eady to concede him a chance when ae boxes Johnny Dundee in Los Angeles next month.

To my way of thinking Kilbane's vistory over Kirkwood does not stamp him as a worthv holder of the feather-weight title. Not that it lowers him any in my estimation as a great box-er, but because Kirkwood had demon-strated in recent contests that strated 'n recent contests that he was reserve.

strated in recent contests that he was on the down grade. Only a few weeks ago he boxed Teddy Hubbs, a young-ster from Pittsburg, and was given a thoro trouncing for ten rounds. So I fail to see where the champion gain-ed much prestige by stopping him in six. of this important sale. Kilbane's performances in this city

Kilbane's performances in this city with Dundee and O'Keefe were far more 'mpressive than his showing with Kirkwood or I am no judge. Still, it was his failure-to stop those application.

Shill, it was his failure-to stop those lads that started the local critics on his trail. Dundee and O'Keefe are both clever boys, that is as compared with Kirkwood. whose chief claim to

HAT ORANGE you had for breakfast was grown in California; the raisins in the piece of pie eaten at lunch time came all the way from Spain; the currants that dot our puddings and cakes travel farther---from Greece; and the assortment of fruit offered as dinner dessert often represents many countries of the world---nearly always many countries except our own. 'Twould almost

as dinner dessert often represents many countries of the world—nearly always many countries except our own. 'Twould almost make you think Ontario had no fruit. And yet—fifteen and three-quarter millions of dollars is the value of the average annual fruit crop of the Province of Ontario. Apples, pears, peaches, plums, cherries, grapes, raspberries, blackberries, currants, goose-

localities and under proper treatment. Going back a few years, taking statistics as compiled by experts on this subject, for the years 1901-1905, I find that the average yearly crop was then valued at about seven and a half millions. Now, from 1905 up to the present the acreage of fruit lands in the province shows an increase of only eleven and a quarter per cent. So that, making all due allowance for increase in prices, it is evident that much more fruit is being produced.

berries, strawberries, are grown abundantly in suitable

It used to be the common belief, even of fruit growers, that there were "good years" and "bad years" for fruit, and also that there were "on" years and "off" years for trees. The apple tree that bore heavily one year was privileged to take a rest the next. Between the "bad" years and the "off" years—they seem to miss each other so often—a lot of orchards gave up the idea of producing apples at all.

Now, I had occasion to visit all the principal applegrowing districts of the province during one of the recent "bad" years, and I saw right in the same neighborhood orchards bare and barren alongside of orchards which could not possibly have had finer crops. Also, in my compilation of information as to the records of orchards, the "off year" theory was seriously upset by authentic figures showing excellent yields from the same orchard for a number of years in succession, and in some cases these records were proved down to the individual tree.

This brings us face to face with the work of the division of the department of agriculture known as the fruit branch. The object of this department is to show fruit growers how to produce better fruit and more of it. We are going to find out how they do it, or rather how they have been doing it.

Said Mr. Percy W. Hodgetts, the alert and aggressive young expert, known officially as director of the fruit branch: "We have fully demonstrated to growers the value of spraying. There are now no fruit men attempting to produce fruit on a commercial basis who do not recognize that spraying is an actual necessity." But the growers were not educated up to this point with-

out a struggle. There was the deep-rooted idea that a tree required only to be planted and left alone. To grow grain, of course, you had to plant seed every year, but having prepared the ground, and sowed your seed you simply waited and let it grow and multiply. Apples or other fruits were treated much the same way, only that, as they required but one planting, it was seldom thought necessary to do anything to the ground in order to supply food for the trees. Still less was there any thought that wormy apples, scabby and spotted fruit, could be avoided by spraying the trees with certain material. Nor did the grower realize that insects almost indistinguishable from the bark, were sucking the vitality out of his trees, and that other insects and other diseases were rothlessly destroying their power to obtain food from the air, by esting up the leaves which are the lungs of the tree.

But scientific study of fruit growing discovered that it was possible to overcome nearly all the injurious pests by a simple process of spraying the trees, blossoms, and fruit, with a chemical mixture. In the earlier days of spraying the Bordeaux mixture was the favorite, but of late this has given way to a combination called lime-sulphur.

How did the fruit branch educate the fruit growers to a realization of the value of spraying? They took charge of orchards in different parts of the province, cooperating with the district representatives of the department of agriculture. These men supervised the work, provided the spray material and equipment, and the farmer or fruit grower was asked only to furnish the labor necessary to do the spraying. In different localities and under varying conditions, it was shown time and again that orchards which had been but fitful and weak producers, could be made to bring returns far in excess of any other products of the farm for a similar acrease The surrounding fruit growers began to sit up and buy spray pumps and learn how to boil lime-sulphur wash. The man who tells you now that "it doesn't pay to spray" has against him the entire evidence of those WHO KNOW.

As an aid to effective educational work in fruit growing, the fruit branch has been conducting for a number of years what is called "orchard survey work." A county, or portion of a county, is covered each season by scientifically trained fruit men who make a farm-to-farm canvass and record the location, acreage, kind of fruit, varietles, trees in bearing, trees non-bearing, nature of soil, tillage, fertilization, diseases, insect pests, marketing, income—in fact a detailed record of the orchard from every standpoint. This data is exceedingly valuable, as you may readily understand. This survey work so far has been carried on in the counties of Simcoe, Huron, Lambton, Elgin, Lincoln. Wentworth, Durham, Northumberland and Prince Edward.

An experimental farm at Jordan Harbor is under the supervision of the director of the fruit branch, but it

may be regarded as in the preliminary stages, as it has little or no fruit in bearing yet, being practically newly planted. During the past ten to fifteen years, a member of experimental stations have been conducted at different points thruout the province for the purpose of testing fruits and finding out what varieties are best suited to the respective localities. Mr. Hodgetts says that this experimental work is in effect completed, and that lists of the recommended varieties have been compiled. He considers that experimental work in fruit growing should now be devoted to improving the standard varieties. In speaking of classes and varieties of fruits, one must keep in mind that Ontario (even what is regarded as the fruit growing portion of it), covers a wide area and includes varying climatic conditions. Thus, it is that in Prince Edward County the Ben Davis Apple grows to such a size that you need to see it to believe it; that the ruddlest Northern Spies come from Oxford County; that they have on the St. Lawrence brought the McIntosh Red to such a state of perfection that the fruit growers set up a memorable stone in honor of the parent tree of the McIntosh Reds. Varying conditions in soil, climatic influences, moisture, and the like make it important for the grower to know just what varieties of any kind of fruit are adapted to his location, and it is thru the survey work and experimental work of the fruit branch that he is able to procure authoritative data on these matters.

Much work is yet to be done in the making of better fruit. The effectiveness of spraying has been demonstrated beyond question; the need of feeding the tree by cultivation and the use of fertilizers has been brought home to the growers, and now the fruit branch intends to make a strong campaign for the proper pruning of orchards. Some work has been done already in this respect, but, in addressing a meeting of fruit growers, Mr. W. F. Kydd, of the fruit branch, who knows the orchards of the province thoroly, stated that "there were not six properly pruned orchards in the whole of Ontario." It will be the business of the fruit branch to teach correct methods of pruning, and to prove its value as it has proved the value of spraying. This is being done by actual demonstrations in the orchards, where large numbers of fruit growers gather and watch the operations of experts at pruning. Our artist has here pictured the work of pruning, but for lack of space has left out the audience.

Since the orchard acreage is being considerably increased from year to year by extensive new plantings, it has become advisable to assure the grower of a fair start with his young trees by a system of nursery inspection which will enable the fruit branch to issue a certificate as to the healthy conditions of the stock from any particular nursery. A provincial entomologist has been attached to the staff of the branch so that expert, scientific knowledge of fruit pests and diseases will be the basis of all nursery certificates issued. While the growing of good fruit in profitable quanti-

While the growing of good fruit in profitable quantities is the great problem for the fruit farmer, he has still an important matter to deal with in marketing his crop to the best advantage. The co-operative association, which has been fostered by the fruit branch, does much to solve the marketing problem. There are some forty of these associations in Ontario, and while they are not exactly under control of the fruit branch, they are connected with it by the fact that the director of the fruit branch has been and is now secretary of the Fruit Growers' Association.

The management of these co-operative associations is not always the same, sometimes the association owns a storage plant, and has a salaried manager, sometimes the marketing is conducted on a percentage basis, but the general advantages are that shipments can be made in large quantities, and that the marketing can be done with less expense. To some extent, the properly conducted association proves a protection to the buyer. For example, in the Niagara peach district, the local associations bring in each season an expert outside packer who supervises the grading of the peaches, and thus ensures uniformity and eliminates the danger of the careless or dishonest individual shipper. When you buy a basket of peaches or a barrel of apples packed by a reputable association, its doesn't matter whether you open it at the bottom or the top—the fruit is the same all the way thru.

I believe that Ontario could consume far more fruit. locally if there were some better arrangement for the getting together of the producer and the consumer, but at the same time, it is necessary for the growers to look to outside markets. They must sell certain produce in the British markets; they have a good chance to market a very large portion of certain crops in Western Canada. To assist in the capturing and holding of new markets the fruit branch has taken charge of the packing and shipment of peaches to Great Britain. Also, last year two men were kept in the west during the tender fruit and apple seasons; these men kept the Ontario growers, thru the fruit branch, in touch with conditions in the west, as to prices, demand in various localities, condition of shipments, business done by competing growers from other places. The experience of these men has proved extremely valuable in respect to the improvement of shipping for the western markets.

"The west would take all our Northern Spies," said Mr. Hodgetts, "that is, if they were properly packed." And the question of packing is one of prime importance. So important is it that a regular campaign was put on during the winter and apple packing classes held at three or four points in each of thirteen apple growing counties: two or three expert packers spending two days in demonstration work at each centre. The reason for the need of such instruction is that the old-fashioned apple barrel is going out of use excent for the British market. For the west the demand is for boxed fruit. And this demand for boxed fruit is going to result in the growing of better fruit because a more uniform grading is required with the box than with the barrel.

There are other important phases in the spread of the zospel of "better fruit"—the fruit exhibits at the exhibition and horticultural show are valuable from an educational as well as an advertising standpoint, and the "fruit car." which has formed part of the agricultural demonstration train each year since that feature was inaugurated, carries with it the example and proof of the value of spraying and otherwise taking care of the orchard. From year to year under the influence of the manysided educational work on fruit growing done under the direction of Mr. Hodgetts, the Province of Ontario should continue to produce still better fruit in still greater quantities.

The Smoke Nuisance

Uncle Sam is on the warpath against that modern form of the "black plague," the soft coal smoke evil. One of Uncle Sam's experts, H. M. Wilson, thinks the smoke nuisance costs the country six hundred million dollars a year.

EDITORIAL

The damage done annually in the large towns of the United States by smoke would build in every city of one hundred thousand inhabitants a structure equal to the Washington Congressional Library, considered the most beautiful building in the world. There would be left over enough to maintain the army and navy for the current year-and then plenty left, after that, to build the Capitol at Washington. This financial damage is figured at six hundred million dollars annually. In a recent edition of "Iron Age" we find the following: Annual loss in Cleveland from smoke, six million dollars; in Cincinnati, eight million dollars; in Pittsburg, ten million dollars; in Chicago. seventeen million dollars.

The estimated annual financial loss in the United States is five hundred million dollars, or seventeen dollars for every man. woman and child, living in large cities.

More than that, the damage goes far beyond the financial losses set forth. Here are some other items charged to the smoke nuisance: Untold damage done to clothing, furniture, buildings, and trees, streets and parks. Additional expense of lighting houses and offices in the daytime. Large increase in the death rate from lung diseases, caused by breathing sulphuric acid and other poisons in the smoke-laden air.

Bad firing, more than soft coal, it appears, is to blame for the black clouds that pour forth from so many smokestakes. The government expert had demonstrated numerous times in Pittsburg, it is recorded, that they can fire any chimney with the softest coal and yet not raise a single cloud of black smoke.

Forty-three per cent. of Chicago's smoke, it is said, comes from the engines of railroads.

Investigation proved that a locomotive fireman in a run of two hours used eight thousand pounds of coal, making steam with difficulty, and filling the air with smoke. The next day, another fireman, with the same engine and making the same run in the same time, used four thousand five hundred pounds of coal, making plenty of steam and no smoke. Result of intelligent firing, a saving of forty-two per cent. of fuel and no smoke.

Smokeless fires are not only the best in every way, but they are also the cheapest. The day will soon be here, Uncle Sam thinks, when firemen who are unable to learn how to avoid clouds of smoke from their fires will find themselves without jobs.

GOING AND COMING

Education in Japan

The thirty-seventh annual report of the minister of state for education in Japan is in many respects an inspiration and an example to all who are engaged in educational work It is not a mere record of good work done, al tho in this respect it is remarkable when we remember the short time that Japan has been in contact with western civilization; it is full of suggestive ideas, and those in supreme command insist on the necessity for all the work being of an educational nature, which great difference between the present and the past conditions of Japan is clearly recognized. Not only are its internal affairs now more com plex than ever, but its international relations have become multifarious and varied, and its intercourse with other nations more frequent and intimate. While a good general education is given as a foundation, special attention is paid to every department of technical education.

Considerable discussion has followed in Great Britain upon the statement made by Grand Admiral Von Terpitz, the imperial sec-retary for the German navy, to the budget committee of the Reichstag. According to the many succeeding philosophies. Is it not more than strange, sir, that all metaphysical philosophies differ? Hardly any two of them but are as wide apart as the poles. He is not aware of any difference between his soul and sciousness from his physical organ-ism; he is not even aware of the rents and other "vital airs" in his body; and yet he goes along gaily every day dogmatizing about what other people cannot know, and using the very powers whose existence he denies. Just as tho the motorman le turned the crank. Which, of course. This correspondent is understood to is true, but only an insignificant part of the truth. It is some months be a professional man of experience and travel. When he can get off so and travel. When he can get on so many crudities in a comparatively spermatozoon, and now, evidently having forgotten the former discus, comes back to me as the This reduction is equivalent to raising the temperature 19 deg. as it affects man and beast. This means more comfort for man, saving of fuel in the home, and of feed for the stock. Windbreaks also prevent the drifting of snow around buildings and feed yards. Studies and measurements show that there is considerable increase in yield of fields and combards sheltered by tree growth. The dry

Richmond, Va., is vying with San Francisco, and Chicago with Atlanta in fighting the sooty fiend. An adjunct of the Smoke Inspection Department of Chicago is filled with cartoons culled from the pages of the leading newspapers there, all vigorously attacking the smoke plague.

A bulletin, a careful observance of the following rules will do much toward reducing the smoke evil: First-Education of all firemen so they will fire intelligently. Second-The installment, wherever practicable, of automatic stokers, or appliances such as blowers and steam jets for thoroly mixing a proper proportion of air in the furnace. Third-Laws and ordinances, reasonable, but sufficiently rigid to make offenders against the smoke laws feel that they cannot offend with impunity. Fourth -The creation of an intense and widespread public sentiment based on intelligent knowledge of the baneful effects of the smoke plague which morally will compel men to respect public opinion in that regard.

British Citizenship

At the Royal Colonial Institute luncheon given recently to Mr. J. S. Dennis, Earl Grey announced that the Imperial Goverament was about to introduce a measure securing that a naturalized citizen of any of the Dominions should have the full rights of citizenship thruout the empire. The anomaly of an alien being a British citizen in a self-governing Dominion, and remaining an alien in other parts of the empire, has been in existence far too long, partly, perhaps, because no acute case of hardship has occurred to attract general attention. The subject was, however, discussed at the Imperial Conference, particularly that of 1911, when Sir Wilfrid Laurier referred to the large influx of American citizens into Canada. These immigrants, he said, generally take out letters of naturalization as soon as it is possible for them to do so, but they are British citizens in Canada only, and if they go to Great Britain revert to their former status of American citizens. The conference unanimously affirmed that "Imperial nationality should be worldwide and uniform."

Undoubtedly there are certain difficulties which must be overcome in providing for uniform citizenship Chief among these is the differing periods required for qualification set by the British Dominion Governments. In the United Kingdom five years residence is necessary, while in Canada two years suffices, and still shorter terms in Australia and New Zealand. The matter of the status of colored races is another point for which special provision will have to be made, the Australasian states not permitting naturalization in their case. The bill about to be introduced has been the subject of discussion by the various governments concerned, and the remedies proposed will doubtless be acceptable to the Dominions. In his speech Mr. Dennis showed the vital importance to the empire as a whole of making clear this question of imperial citizenship. "The advance made in Canada during the last five years," he said, "was far greater than any advance made in any part of the American continent during any similar period. United States farmers are crowding into Canada in spite of efforts made by meetings of governors and vilification in the press. Now, we want to make these settlers proud of Canada as a whole. One little thing needed to assist this end is to remove the difficulty man best to be trusted. now existing in the naturalization law."

Minimum Wage For Women

California is one of the more recent states that have conceded woman suffrage and to this may be ascribed the pending bill before the legislature providing a minimum wage for women. The amount is proposed to be fixed by an industrial welfare commission, consisting of the state labor commission, a woman member and a representative of the employ-ers, the last two to be appointed by the governor for two-year terms. The bill was drawn after study of the Oregon law of which it emdies various features.

Should the bill pass the commission wil have power to investigate wages, hours and conditions of labor and, where wages are found to be inadequate, to call in conference representatives in equal numbers of employers and employed, along with one or more disinterested representatives of the public. This conference will recommend to the commission an estimate of the minimum wage adequate to the occupation under review. Opportunity will then be given for a public hearing and thereafter an order establishing a minimum wage will become effective in sixty days. Authority is also given the commission to establish maximum hours of work for women and minors.

Frankness.

Frankness is the art of saving things you hon estly think exactly as you think them. To be frank is to be naturally straightforward. Look the other fellow in the eye.

In the same manner as a straight line is the shortest distance between two points, so is frankness the only right course between all people. Because nothing is wasted. The frank man is the

lowed to have her way. "It's like this," Mr. Piper put it. "If I carve up the 'gator to save the turtle, the 'gator's gone. And if I wait and see whether digestion tri-umphs over obstacles, and it does, why, the turtle's gone. Seems to me, taking a bird's-eye view of that big the incident's closed, as the politicians say, and the Zoo's shy a couple o' strong cards. Um-um!" The Lynx Snarled at Callers.

A hyena was an object of much in-terest, altho, contrary to all tradition and our most cherished ideals, it never positively laughed. But what the hy-ena failed to furnish in that way was supplied by joyous visitors at irregu-lar intervals. The Zoo' atmosphere

was intermittently laughter-laden. You had only to pass on to the next cage, where the lynx sat and snarled at callers, when he wasn't chasing himself stupidly from end to end of his pen, in order to grasp this. His very foolishness made everybody gurgle in low, suppressed tones. Once an animated discussion took

place on the proposition to call a single bob-cat a "link," and only pluralize a pair. Manager Piper, to whom an orthographical precisian was re-garded as a suspicious person, anyway, agreed that "one link, two lynx" would sound infinitely more euphon-ious and be easier to get the tongue

around than "one lynx, two lynxes." But the debate presently branched off into a warmer one on the subject of investing the animal with an entirely

"The Common Law," a dramatization of the famous novel by that title, by Robert W. Chambers, will be presented for the first time in this city, at the Grand next week, and the countiess numbers of fiction readers who have thoroly enjoyed this, the most sensational of all Mr. Chambers' works, and one of the most startling stories ever printed, will doubtless be glad for an occasion to see the life-like characters as portrayed in this play. "The Common Law" relates a most remarkable story concerning an artist

and his unsophisticated model; their troubled love affair. The new and curious twist to the eternal triangle the stage given in this book Mr. Chambers is truly absorbing, and there can be no question 'about it, otherwise over a million and a quar-ter of the books would not have been sold. And, prior to its publication in book form, it would not have enabled the Cosmopolitan magazine, in which the story was first publish-ed, to build up its circulation as enormously. The artist is madly in love with his model, a beautiful gir, keenly alive to what she imagines is the difference in their station in life She refuses to marry him, because she is of the opinion that it-will make him unhappy and ruin his future. First logic stands as the barrier, between them; and the artist's mother and sister both pleading with him not to marry the girl, makes his position a most trying and difficult one of delineation. The arrival of the other man, his attempt to make the beauti-ful model forget here sweetheart, a realistic stage fight, and Neville's finaldecision to end his woes, are all cal-culated to keep the audience in a continual thrili; but the change of the view of the mother, when she sees the true conditions of the case, and the girl's final realization of the falsity of her theories and the for falsity of her theories, and the ac-ceptance of the artist as her husband in the end, all combine in bringing order out of apparent chaos. It is promised that the entire production, which is the original one, will prove utterly staisfying from all points con-

"54" HUDSON 65 Miles an Hour. To 58 Miles in 30 Seconds from Standing Start,

Who Will Be the Lucky 1000?

The last 1913 Hudson car will be shipped from the factory on May 15th, which only means a matter of ten weeks. Out of the total production for this time there are only 1000 Hudson cars for which the factory have not received orders. That is a small percentage of the number of people who want them as before a single Hudson car was offered more than 1000 individuals had paid their deposit to assure getting cars. If you desire a Hudson car this year place your order at once as with these 1000 cars it is a case of "First come, first served"—the Hudson factory having over 1400 Agents.

ectric Self-Cranking—Electrically Lighted

Why This Great Demand?

People recognize now the importance of engineering brains in their relation to mechanical perfection. Without knowledge a smooth, simple, safe, satisfactory car is impossible. These cars are designed by 43 skilled engineers gathered from Europe and America, representing 97 factonies. They had a hand in building over 200,000 automobiles. They represent about all that has been learned in motor car design, Some have made the greatest headway of all in designing six-cylinder cars. Some are specialists in other lines. So the combined skill and knowledge of all these new is focused upon

All who are motor-wise recognize the impor-tance of having a car built under such favor-able conditions. That is why, with the maxi-mum of 1000 cars not specified, only one out of three of those who will want HUDSONS will be able to get them.

What better assurance could be offered than that these men who possess about all the knowledge that has thus far been gained in automobile building have joined in saying, "The New Hudsons are the best we know."

The Hudson "37" is their four-cylinder masterpiece. It sells at \$2425 completely equipped with electric self-cranking device and electric lights, speedometer, clock, top, wind-shield, and twelve inch upholstering. There is nothing more to buy.

The "54" Hudson—A six, capable of doing 65 miles an hour and a speed of 58 miles in 30 seconds from standing start, is offered as a car superior to any automobile on the market, regardless of price. It sells at \$3200 completely finished and equipped as above. Prices are f.o.b. Detroit, duty paid.

"Henceforth I shall wear chains on my car whenever there has been even a heavy dew." **GAS FOR TESTING.** In making factory tests of the hun-dreds of thousands of automobile mo-tors manufactured every year, the automobile companies consume im-mense quantities of gasoline. With the increased price of gasoline, the expense of this testing is a large item Now this is to be largely reduced by

with the companies. Now this is to be largely reduced by means of a new apparatus which has been designed by the engineering de-partment of the Detroit City Gas Co., a subsidiary of the American Light, & Traction Co. After months of ex-periment the Detroit City Gas Co. has evolved a mixer for gas and air, thru which artifical gas is used for testing, instead of gasoline. As the motors are put on the testing blocks and op-erated for hours at high speed, a large amount of gasoline is required. With the new apparatus artificial gas at a low cost will be used instead of gasoline, thus, in addition to lower-ing the cost to the automobile com-panies, also cutting down the con-

panies, also cutting down the con-sumption of gasoline, as thousands of sumption of gasonine, as thousands of barrels are used every year for test-ing purposes. The new apparatus has been given a thoro trying out at the Ford plant and is now being used there. Other Detroit plants are to inthere. Other Detroit plants are to in-stall the new testing apparatus. The Detroit City Gas Company is making many experiments along the line of the use of gas in industrial plants, and its suc-cess is such that an officer of the company recently said: "Our peak load on our gas plants today is but the ordinary load of tomorrow."

Wilhalm's Idea of Golf.

Withsim's idea of doit. The German Emperor's knowledge of golf is by no means extensive. His generosity, however, made him lend a ready ear to the request of Sir Frank Lascelles for a grant of land for the purpose of a golf course.

"So you want ground for your golf club, Sir Frank?" he said. "We haven't got nice grass meadows round Berlin like you have in England, but I'll give you a bit of the Grunewald." aNow, the Grunewald is a pinc forces Now, the Grunewald is a pine forest near the capital, and a favorite Sunday resort of the people of Berlin. The ambassador thought it out for a moment, and then answered, somewhat doubtfully:

"Ah, sire, I am afraid there would

be too many trees." "Trees!" exclaimed His Majesty. "All the better to keep the sun off when you are playing in the summer." --Tit Bits.

TREAD NON-SKID TO-DAY TO-DAY Get To-morrow's Use From To-day's Tires

A DUNLOP

TRACTION

Features that apply not only the day you buy the tires but six months after are the only features you ought to pay for.

With ordinary non-skids the tread is bound to wear smooth sooner or later-usually sooner-because there is no size to the non-skidding surface.

It is different with Dunlop Traction Tread. When you buy this the you get the biggest anti-skidding surface in the world. The wear on Dunlop Traction Tread corrugations is but the slightest, and it's no greater in the centre of the tread than on the sides.

Thus with Dunlop Traction Tread you get the benefit of the traction grip all the way down with the wear. Therefore, you are still getting what you can get from no other tire-what you paid for in the first place. It isn't sufficient that you look ahead when driving your car. Look ahead when buying your anti-skid tires.

Note:-The "buttons" found on ordinary non-skid tires SAME TIRE are herewith repre-

In one of those friendly after-luncheon, get-together carties at a well known city club, eleven men drifted on to he subject of the dangers of skidding. With a single exception ach of the eleven owned an automobile, and each had a skidand experience to relate, and each felt that his particular

While nearly all had experimented with the various so-called anti-skid tires, and acknowledged their possible advan-tages when new—yet when it came right down to "Brass Tacks," there wasn't a single one in the crowd but admitted that for *sure results* for the absolute elimination of every possibility of skidding, nothing even approximated Weed possibility of skidding, nothing even approximated Weed Chains, and nothing took their place. Every one of the ten owners carried at least one pair of Weed Chains in his car.

Go where you will, put the question to any assembly of automobile owners you like and the verdict will always be the same—"We can't get along without them." Weed Chains are universally acknowledged to be the only anti-skid device that can be absolutely re-lied upon at all times and under all road conditions.

Stevens-Duryea The Stevens-Duryea Company, the nanufacturers of this car is the only factory that has developed something really new in motor cars for several years, and this is not an experiment but is an advance in construction and design, the car being designed from tread to top as a single piece of construction, i.e., the chassis and body are blended into one, not only in ap-

pearance but in actual fact. The relations of each detail to the rest of the car were carefully weighed in making a design to give the utmost riding comfort and convenience, for the Stevens-Duryea has always been built as the best passenger-carrying conveyance that could be devised. An-other refinement that has been added to the new Stevens is the adjustable rear seat, which by the simple turning of a small wheel that is conven-iently located the seat can be moved forward or backward, or tilted up-wards or downwards as the passenger may desire, and which is of great comfort to the passenger while tour-

Ing. This car comes fully equipped, with all the necessary equipment for tour-ing, having a Stevens-Duryea top complete with head-lining, side cur-tains and envelope, the side and single curtains have large windows of extra quality celluloid the Stevens-Duryea universal position windshield which is not as in the case of other cars an ccessory, but is part of the body itself, the top also fastening to the top of the windshield makes the body, vindshield and top one integral; the car is electrically lighted thruout, having an electric lighted system consisting of a generator seat, which is located on the forward left side of motor, and storage battery, supplying current for external adjustable focus: headlights, a combination and rear lights.

Carrying out a matter President T . Robinson of the Republic Rubbe Company at Youngstown, Ohio, ha had in mind for a considerabl period, the directors at the annua neeting held recently, authorized il

To Tin Sheet Copper. To tin sheet copper on one side, says Postcard collecting semed to be on The Engineer, metal is taken of the of the crazes at the Automobile Show correct gauge, or within one number of the crazes at the Automobile Show. Practically every manufacturer who usual pickles and by scouring with has an exhibit is giving away postsand or swarf and sand. The sheets cards of his favorite car, and it was are then coated with a killed spirit common to see a group of people flux. They are next placed upon a making the rounds of the big hall in fux. They are next placed upon a holder laid at an angle of 45 degrees to the tinning pot, so that the excess of tin will return oy gravity. The ox-sheet, and yeny excess wiped off with mops made of plumber's tow. The ox-is removed by diluted sulphuric acid pickles. The sheets are washed and dried, and then, if necessary, rolled again to gauge and polished. For cleansing tinnued articles there is nothing better than whiting mixed with a little kerosene oil, the surface being polished afterward with a little of the dry whiting or Vienna lime.

being polished afterward with a little of the dry whiting or Vienna lime. Of children born of parents at the age of 41 one-third die during the first year, while the rate of mortality among those born of parents between the ages of 21 and 30 is less than 8 per cent. During the year 1911, 23,039,000 gallons of beer were consumed in the City of Nuremberg, making the average con-sumption of each man, woman and child rather more than 69 gallons.

GENERAL COMMENT ON CARS AT RECENT AUTO EXHIBIT

The auto show at Exhibition Park was the most successful affair of its kind ever held in this city. There have been more cars and better cars. The attendance was larger and the sales very much greater than at any of the other previous exhibitions. The buildings used on this occasion are particularly suitable, being intended primarily for exhibition purposes.

Of the cars, little that is new can be said. The popular priced car still continues its forward march; on the other hand the expensive limousine and touring car has lost none of its prestige, and a steady demand exists and will continue to exist for this class of machine. The goal of standardization is grad-ually being approached by the different manufacturers, and all the cars in the show, especially among the four-cylinder models, are examples of pretty much the same practice of de-sign construction and equipment. sign, construction and equipment.

sign, construction and equipment. The self-starter has proven the most interesting and novel feature of the cars shown. Nearly every machine is equipped with this highly important device. The electric type is of course most popular and will undoubtedly be the standard equipment of the future. Electric lighting is also becoming practically universal, even the low priced car is being thus equipped. In the matter of engine design there have been practically no changes, and the same may be said of the gen-eral designs of transmission, frame and other parts of the car. In the matter of body design, the five-passenger touring body In the matter of body design, the five-passenger touring body is still the most popular, closely seconded by the light four-passenger, and the roadster type. The inside drive coupe is also becoming very popular, especially among the growing class of people who operate a car all winter.

Some Points.

A noticeable feature of the new cars is the luxuriance of the upholstery; many of the cushions are nearly a foot thick, and most of the seats are more comfortable than the most expensive arm chair.

The left hand drive seems to be gaining a few recruits, but the old fashioned right hand drive bids fair to hold its own. the motor truck has a special advantage over the horse. This was demonstrated during the last few days, when the merchants

The electrics at the show are becoming more and more im-portant every year. Very many of these highly efficient ve-hicles are on exhibition and a large number of sales have been made. Toronto bids fair to become a second Detroit, which as

The commercials. The enormous activity evidenced in the commercial field has reflected in the business done at the recent show. Trucks of all standards, from the light delivery truck up to the five-tor lowinthan were on exhibition, and every day hard headed tor lowinthan were on exhibition, and every day hard headed

certain forms of construction which have made a strong appeal in this country since they were introduced in the motor cars built by The White Company, of Cleveland, O. Such features as long stroke mot

Complany, of Cleveland, O. Such features as long stroke mo-tors with cylinders cast in one block and gas passages formed within the cylinder casting, enclosed valve mech-anisms, single ignition systems and four-seed tranmissions have in-creased in favor with the leading manufacturers of Europe. These fea-tures coincides with the design which was brought out by the White Company several years ago.

American designers are now paying greater attention to these features, and a number of recent converts apin the automobile show here. pear In a number of ways the design of the White car is in advance of the European types. High economy of gasolihe consumption and efficiency of self-starting systems have not been achieved to the same extent in foreign cars as in America. cars as in America. Location of Steering Wheel.

The location of the steering wheel and control levers in European cars, while opposite to the American preference for left side, nevertheless rec-ognizes the advantages of the left side drive with centre control because the rules of the road in Europe are ex-actly the reverse of the American law and European adherence to the right side drive is due to the same condi-tion which make the left side drive most suitable and popular in America. In dozens of small details of chassis In dozens of small details of chassis designs and coach work, the foreign design draws a distinct parallel with the White design. Lubrication sys-tems, for example, show preference for a forced feed of oil thru a drilled crankshaft rather than depend alone upon the natural splash of oil. The trend of cylinder design and di-mensions favors a stroke considerably longer than the bore, but without a fixed standard or limit, each maker endeavoring to arrive at the exact reendeavoring to arrive at the exact relation between bore and stroke that produces the greatest efficiency and fuel economy without loss of power,

which is a strong characteristic

Which is a strong characteristic of White cars. Of clutches there are several types now in general use in Europe, and the best makers cling to the cone type with leather facing. Here, too, the White shows advanced design because this clutch not only contains spring inserts to make engagement smooth and gradual, but the leather facing is held by T-bolts, which al-low replacement without removing the clutch unit or disturbing its bear-

Transmissions. There is no fight over transmissions in Europe. The four-speed gear box is in universal favor, as forecasted All kinds of Rubber Belting, Hose, Packing, Bicycle and Motor Cycle Tires, Truck Tires when the White Company introduced a car with this transmission a few ion a few years ago. Owners are quick to rec-ognize the advantage of four speeds

whipped into shape so that a genuine largh factory is the result. "Baby Mine" is a play that has been a positive and legitimate success from its first production. The aim of the authoress and producer has been to create real fun, merriment and laughter; and they have succeeded al-most to the limit. There has been nothing so strong, as fascinating, and intense comedy; during the present age at least. This comedy is a sea-sational success, as it abounds with situations and fun that produce cycio-nic outbursts of iaughter. There is unbridled galety created all the time, and there is not a dull or solemn

As a special extra attraction on the week's bill, Manager Shea has booked Hardeen, the "King of Hand-cuffs." This is the first appearance here of this man, who has be-come world famous for his thrilling escapes and his contempt for locks and bolts. He will give examples of his skill thruout the week. Another feature of the week's bill is John E. Hazard. Mr. Hazard has not been seen at Shea's in several seasons, but the theatre-goers know him well, and will be sure of a merry laugh at some of his new stories. Wilfrid Clark and his company have a new comedy sketch, full of laughs. and Flannagan and Edwards are of-fering their new version, "Off and On." favorites here, and will find a warm welcome. Charles Mack and company are presenting "Come Back to Erin." a dainty Irish comedy, that will please Sheagoers; and the Flying Wards. aerialists; will complete the week's bill.

The cook told her Mayme: "Yes. The cook told her sense of the word. Then, placing that she would not stay on the place, Donia's hand in Ivan's, he revokes the oath and leaves them alone in ecstasy of their love.

As a special extra attraction on to her native land. After Donia's departure, Ivan is frantic with grief and soon follows her to Russia. Going to her home, he again declares his love for her nome, tells her he cannot give her up. In this intense scene, they are discovered by Gregory, who is already making arrangements for their marriage. He

arrangements for their marriage. He is furious when he sees the manifes-tations of Ivan's arcent love for her and for the first time, learns that he has a rival. Donia pleads with Ivan to leave her, that she cannot and must not break her oath and can never he his. Gregory dogs Ivan's foot-steps to kill him. Donia suspects Gregory's purpose and follows them Gregory's purpose and follows the van enters his lodgings and Gregory peering thru the door, watches him. Ivan, who has made up his mind that life is not worth living without Donia takes a small vial of poison from his pocket and is about to drink it when Gregory rushes into the room, and dashes the bottle from his hand. Fear-

ing an encounter between the two men, Donia rushes between them. Gregory tells Ivan he realizes that Donia does not love him, and confess-es he does not love her in the true Then, placing

At Gayety Theatre

Billy Arlington in a Spectacular Extravaganza Here This

Commencing with Monday matinee, Jacobs and Jermon open a week's engagement at the dayety Theatre with gagement at the dayety Theatre with their "Golden Crook" extravaganza company with Billy Arlington, the "laughing hobo," who is known as one of the funniest comedians making annual visits to this city. Ed John-ston, in a similar character, is his chief support. Included in the cast is Mile. Veola, prima donna; Jeanette Buckley, soubrat: Jack Strouge Urgie Buckley, soubret; Jack Strouse, lyric tenor; City Comedy Four, dispensers of melody; Boyd and Veola, Elenor Cochran, and as an added extra attraction, the Golden Troupe of Rus-sian Court Dancers, who are making their first American appearance, will present a series of native dances.

The "Golden Crook" is a spectacular extravaganza that rivals any of the Kiralfy productions of our fathers, in-cluding the famous "Black Crook." There is a dazzling chorus of thirty-five statuesque beauties who can both dance and sing, as well as look be-witchingly beautiful. The offering is somewhat different from the average somewhat different from the average burlesque show, and it is intended to lend the charm of variety in order that the patrons may not become

sence of burlesque, are found in plenty. Music, which delights the ear, is one of the predominating features in the shape of twenty famous song hit numbers, all of which are very whistleable. A spectacular num-ber which has awakened much favorable criticism is the Imperial Russian able criticism is the imperial russian Court Dancers, featuring Ella and Morre Golden, a poem of motion to music, entrancing, with magnificent electrical embellishment. The action

Miss Billie Burke in " 'Mind the Paint' Girl" Toronto's Favorite Actress To Be At the Princess Theatre Next Week.

Time was when the only real fad among theatregoers on this side of the Atlantic was the Maude Adams fad. Now there is a Billie Burke fad, too, and it is growing constantly. Tim Murphy and Gertrude Quinlan in an Irish-American Play Here Next Week.

THE "MIND THE PAINT" CIRL A. W. Pinero's Best Comedy SEATS ON SALE THURSDAY will be anticipated keenly. "Top O' the Mornin'" is the very latest of Mr. Savage's productions. It was given its first performance on New Year's Eve and, excepting for a week'or so since that time, has been running in Chicago at the Olympic Theatre. The newspaper reviewers of Chicago hailed the plece as a novelty and a "hit," and the response of the playgoing public has evidenced the soundness of their judgment. "Top O' the Mornin'" has scored as few other comedies have scored within the last decade." "Top O' the Mornin'" comes here directly from Chicago and on its way to New York. As its alluring title suggests, it is an Irish-American play, goers whose antecedents were not suggests, it is an Irish-American play, written by an Irish-American author, (Anne Caldwell), and, furthermore, played by an Irish-American com-pany. Tim Murphy and Gertrude Quinlan, both too well known to re-quire more extended introduction than the mention of their names, are at the head of the company of nearly

Wedderburn on a motion for a select committee; and in his speech he put forth the plea- that home rule was peculiarly adapted for Scotland, be-cause she had a distinct system of haws customs, and traditions. He haws for the select in the horthern is not confined to Liberals. All over the country Tor-ies are to be found who are heartily sick at seeing Scotland compelled. Lazarus like, to pick up the mouldy custom the the select is a select in the horthern is are to be found who are heartily sick at seeing Scotland compelled. Lazarus like, to pick up the mouldy commits that fall at long intervals tish affairs, it was impossible in the house of commons to get time to dis-

cuss details which were unfamiliar to the bulk of the assembly, and for which they had no direct respon-

sibility. How difficult it was to get the house of commons at that time With home rule granted to Ireland, a breach is made in the constitu-tion, which must remain in an un-stable condition till the Irish method has all-round application. Those who have given the subject serious study know that the nation will be driven

press at the time of the confer-ence on the house of lords' veto. It was a unique instance of the Ethi-opian changing his skin and the leopard its spets. Then federalism was halled as the solution of the par-liamentary problem, but with the collapse of the conference, federal-tere with the risk of the gives and rabbit, the present ars:--The Fossa, 192 ibs. of food. The Glutton, 114 ibs. of food. These figures do not do full credit to the victor. While the Glutton is con-tent with its horsefiesh and rabbit, the present argin of the par-conference. contapse of the conference, receration the forse has consumed most of the ism was whistled down the wind. For obvious reasons, there was a lull in the Scottish home rule agitation. Precedence was given to Ireland; but when Ireland no longer blocks dawn to dusk it would still be ready the way. Scotland's time must come.

For obvious reasons, there was a lull in the Scottish home rule agitation. Precedence was given to Ireland: but when Ireland no longer blocks the way, Scotland's time must come. Scottish Liberals are a long-suffer-ing race. Loyalty is part of their na-ture; and it takes a good deal of provocation to make them kick over the party traces. Even Scot-tish patience has its limits, and it will be well if the government realize the strength of the demand in the northern kingdom for home rule. The demand is not confined to Liberals. All over the country Torcrumbs that fall at long intervals from the imperial table. One thing is certain — the government will not move rapidly in the direction of of

Scottish home rule unless roused energetic action by public opinion.

King George to Make Trip in Aeroplane

His Majesty Declares His Intention to Make an Ascent This

LONDON, March 1 .--- King George has declared that during his visit to the military camp at Aldershot he intends to make an ascent in one of the military biplanes.

Week.

It is reported that the Queen opposed the idea with all her might, but the King declared that in army cir-

cles it was deplored that in England alone of all European countries. no royal person had ever been up in the air, and that he considered it advisable that himself or one of his sons

should make an ascent. In military circles there is great re-joicing at the King's victory over the anxiety of his consort, who persists in looking upon aeroplanes as the invention of the Evil One.

Our Royal Family On Athletic Fields

The Prince of Wales has lost no time in making a reputation in the football field. for the other day he won a match for his college by scoring the only goal of the game. Our Royal Family have seldom been distinguished as athletes, altho King George, in his younger days, was quite a good hockey player. King Edward, indeed, used, as a lad, to try his hand at cricket, but his complete lack of success, coupled with an aptitude for missing catches, soon caused him to abandon the game. George V.-both as Prince of Wales and as King-has shown the greatest interest in our national pastimes. He has witnessed the cup final at the Crystal Palace, and BILLIE BURKE, CHARMING COMEDIENNE, WHO WHEN BE AT AND PRINCESS THEATRE WEEK OF MARCH 10, IN HER GREATEST SUCCESS "THE MIND THE PAINT' GIRL." mo

estry panels, known as the Gatellier set, is now in the galleries of the Duveen house. They are made from cartoons by Francois Boucher, the favorite artist of Madame de Pompadour. In attractiveness and value they probably equal the famous set of Boucher tapestries sold to Henry E. Huntington by the same firm about two years ago, and now decorating his house at Los Angeles. These tapestries represent scenes

ing the reign of Louis XV., and delivered to the Comte de Gatellier, for whom they were executed. They were intended to decorate a ballroom, and it seems clear that the four smaller panels were designed for the space between windows opening on a terrace. It is hard to imagine a more charming decoration for a ballroom.

Through some misfortune in the family, it seems, the tapestries were not placed in position, but remained in a dark room for many years. This would explain the extraordinary freshness of their brilliant coloring. They continued in the possession of the Gatellier family, undisturbed by revolutions, until about fifteen years ago, and now they have been brought to America.

Houdon. Bought by Judge E. H. Gary for Over \$100,000.

HE past few weeks have probably been more remarkable than any previous period for the importation of great works of art. American millionaires have now taken the role of art patrons once played by Italian merchant princes, French noblemen and English peers.

Charming

Bust of Sabine

Houdon, by

Antoine

Jean

Judge E. H. Gary, of the Steel Corporation, has just acquired one of the most charming works of eighteenth century French sculpture, the bust of little Sabine Houdon, at the age of ten months, by her father, Jean Antoine Houdon. The bust was bought from the Duveen Brothers, the art dealers, of No. 720 Fifth avenue, New York, who had previously acquired it at the Jacques Doucet sale in Paris. The price paid by Judge Gary must have been in excess of \$100,000, as \$98,000

of country life and, breathe that

spirit of grace and artificiality which makes the great attraction of French eighteenth century art. They were completed in 1762, dur-

was paid at auction in Paris. The little masterpiece, which is only about fourteen inches high. is of white marble upon a pedestal of turquoise marble. It bears the inscription "Sabine Houdon, 1788." It shows a little girl with chubby, firm cheeks, smooth hair and a delightfully boylsh and roguish expression of face. The shoulders are nude, and the head is slightly turned to the right.

In later years, when the subject of this work became a beautiful young woman, her father made a celebrated bust of her, with curly hair. Sabine married a M. Duval, and the bust of her as a child remained in the possession of her descendants until about eight years ago, when it passed to M. Doucet.

America is taking the same lead in the acquisition of classic pieces of tapestry as in other forms of art. A beautiful series of eight Beauvais tap-

with Saints and Donors," by Fra Lippo Lippi, rivals in importance any previous acquisition of old masters by Americans. It was bought by J. Pierpont Morgan from the Duveens just before the banker's recent departure for Europe, and placed on exhibition in the Metropolitan Museum at almost the same time.

This is pronounced by the best critics to be one of Fra Lippo's greatest works. It is wonderfully decorative, admirably artistic and charmingly devout. It was painted about 1440, and placed on the altar

of the Church of Vincigliata, where it remained until 1790, when the church was rebuilt. Then it was transferred to the Palaz-

"Of course, there will be the little god of love to guide her and be her companion, but she cannot quite decide whether he would look best at the prow of a canoe or snuggled up between herself and the One Man in the depths immery hammock. But she knows that she wants neither the man nor the little fat god to companion her when the Summer lets her sport in the ocean.

By Margaret Lillis Hart.

"Now, why tell the public anything

It's shivery and cold, and furs are nice when you venture forth, and it is wonderful to sit at home and read the future in the depths of the wood embers that glow in the open fireplace-and that is where you'll find My Lady these Winter-weary days. Her dreams are not of the Winter joys-'cause she's

had them; and while she enjoyed to the full the swish of

mirror look-and the rush of the stinging air as she was whirled along faster than the wind on an iceboat-she does not dream of these, for the best dreams are only the things you have not had and never may have. She dreams the hours away thinking of her wonderful Summer to come.

Of course, there will be the little god of love to guide her and to be her companion, but she cannot quite fig-

between green banks, or snuggled up between herself and the One Man in the depths of a Summery hammock. She can't quite decide on which would appeal to her, but she finds it almost better than the reality 'cause she can dream of both at one and the same time.

Even My Lady knows that she cannot have more than one reality in life at one time, and that's why she likes her day dreams.

doesn't want the little fat god of love with her thencause he never would look good in a bathing suit-and she doesn't want the One Man or any other man near, because at times they are all so bossy—and My Lady is a swimmer who can do more tricks in the water than were ever invented at "the old swimming hole."

So My Lady dreams of the Summer to come and her joys, 'cause Easter is only a minute away-and Summer here in two minutes, or at most three, as she reck

arp, frosty skates on the ice that is as smooth as the depths of your

THE SOUL DISSECTOR

Now, if you enjoy poetry at all, you will lose much by not reading

Browning. He has written many simple but stirring pieces such as "The Ride From Ghent to Aix," "The Pied Piper of Hamelin," "Herve Riel," and

numerous short lyrics. Begin on these and you will get a taste for his work

which will encourage you to read further, even at the cost of some effort.

has shown us clearly the necessity of striving with the work of an author,

the importance of putting ourselves in the author's place and seeing the

monologs and his longer poems. Take "My Last Duchess," "Andrea del Sarto," "The Epistle to Kar-

shish" and poems of similar structure and style and you must first create a

suitable background, you must imagine, at times, a whole surrounding company of characters. All this extraneous groundwork the poet had in

mind; you must endeavor to get into his mind and see out of the windows

of his imagination. How else can these poems be made clear to you? But just here is part of the benefit to be derived from the reading

something added to it in experience and in power.

Ruskin in his essay on books and reading-"Of Kings' Treasuries"-

of the kind in Europe, which is said to be far too small to accommodate the many who wish to hear his lectures.

Dr. Robert Kerr has written an account of Morocco, its laws, its customs, and the European situation.

Ellen Key's "Woman Movement," which was published in the Swedish

review of 1200 to 1500 words. Suit-able bocks will be given as rewards

Bargain-Hunters. "My wife and myself are trying t get up a list of club magazines. B

taking three you get a discount." "How are you making out?"

"Well, we can get one that I'don't want, and one that she doesn't want, and one that neither wants for \$2.25. -Washington Herald.

HV-ER! Here's to the land where the sunbeams SHINE, Another night that is bright with the North-Lights' QUIV-ER! —William Wye Smith.

Repetition of whole words or phrass, like the recurring of the same ote or bar in music, makes another of the "tone-color" devices of poetry. Sometimes this occurs regularly at the end of a line, and is then called a refrain or burden. The general effect is to impress strongly the particular

mood of the poem. L. The sun has KISSED THE APPLES, KISSED THE APPLES; * And THE APPLES hanging mellow, Red and yellow, All down the orchard seen, Make a glory green. THE SUN HAS KISSED THE APPLES, KISSED THE APPLES; And the hollow barrels wait By the gate. Perchance you have been frightened away from Browning's works by the general cry of "obscurity." You were afraid you couldn't understand The cider-presses drip With presses drip

With nectar for the lip. -Roberts. II. Notice the whole' stanza repeated: SHADOW NOW, DEAR HEART, in the littlá SHADOW NOW, DEAR HEART, and

IX .--- The Cynical Miss Catherwaight.

Miss Catherwaight did not like dances and days and teas, she had only to stop going to them instead of making unpleasant remarks about those who did. So many people repeated this that young Van Bibber believed finally that he had said something good, and was somewhat pleased in consequence, as he was not much given to that sort of thing. Miss Catherwaight did not like dances

ing-rooms, outwardly courteous and distinguished looking, but inwardly somnolent and unhappy. She was a born and trained social leadtr, and her daughter's coming out was to have been the greatest effort of her life. She regarded it as an event in the dear child's lifetime second only in import-ance to her birth equally important with her probable marriage and of much more poignant interest than her possible death. But the great effort proved too much for the mother, and she dfed, fondly remembered by he peers and tenderly referred to by a great many people who could not even show a card for her Thursdays. Her husband and her daughter were not going out, of necessity, for more than a year after her death, and then felt ived very much together and showed themselves only occasionally. They entertained, tho a great invitation to one of these dinners; and an invitation to one of these dinners soon became a diploma for intellectual as well as social qualifications of a very high order.

is the only other decoration in the case which holds the Order of the Gar-ter in the Jewel Room at the Tower. It is made of copper, so that its in-trinsic value won't have any weight with the man who gets it, but I bought this nevertheless for five pounds. The soldier to whom it belonged had loaded and fired a cannon all alone when the rest of the men about the betterv had rest of the men about the battery had Miss Catherwaight's collection of run away. He was captured by the Miss Catherwaight's collection of orders and decorations and medals was her chief offence in the eyes of those of her dear friends who thought her clever but cynical. All of them were willing to admit that she was clever, but some of them said she was clever only to be unkind. Young Van Bibber had said that if Young Van Bibber had said that if

"But, Miss Catherwaight," some op-timist would object, "these men un-doubtedly did do something brave and oble once. You can't get back of that; and they didn't do it for a medal, a great deal, and she used to carry her husband away from his library overy night of every season and left him standing in the foorways of draw-ther standing in the foorways of draw-distinguished looking, but inwardly somnolent and unhappy. Well, they continued to live and work together. They were both or the silver medal." with my unfortunate collection. This is what brought me here," she said, hold-ing out the silver medal. "I came across it just now in the Bowery. The name was the same, and I thought it just possible Mr. Lockwood would like to have it: or to tell you the their spare time together. They to have it: or to tell you the their spare time together. They is and work together. They were both orphans and dependent on themselves. I suppose that was one of the strong-set bonds between them; and they knew no one in New York, and always is pent their spare time together. They "I wonder who that woman was?"

which almost everybody had heard, it products the analysis of over a hundred media. And hear it was an and family Bibles in a pawning raxors and the same, and the same was the same, and the same was the same, and the same was that the same was the same, and the same was that the same was the same, and the same was that the same was the same t

him with either questions or confes-They had seen sitting there some time, he with his hands folded on he

evening paper and with his eyes a pawn shop. Indeed! Well, of course, relled; and—and then, tho the wo-you know Mr. Lockwood could not man married, the two- men kept closed, when the servant brought in a card and offered it to Mr. Catherwaight. Mr. Catherwaight fumbled over his glasses, and read the name on the card aloud: "'Mr. Lewis L. Lockwood.' Dear me!" he said; "what Miss Catherwaight shook her head of their lives, and both were proud, vehemently and smiled in deprecation. and each thought the other in the "This medal was in his safe when wrong, and so they have kept apart

ever since. And-well, I believe that can Mr. Lockwood be calling upon me about? Miss Catherwaight sat upright, and

Miss Catherwaight had listened in reached out for the card with a nervsilence and with one little gloved hand tightly clasping the other. ous, grasping little laugh.

"Oh, I think it must be for me," she said; "I am quite sure it is intended "Indeed, Mr. Latimer, indeed," she began, tremulously, "I am terribly for me. I was at his office today, you ashamed of myself. I seemed to see to return him some keenseke of see, to return him some keepsake of have rushed in where angels fear to tread. I wouldn't meet Mr. Lockshop. Something with his name on it wood now for worlds. Of course I might have known there was a wothat had been stolen from him and pawned. It was just a trifle. You boys. They went to school in West-chester County. They were Damon and Pythias and that sort of thing. They roomed together at the state college and started to practice law in Tuckahoe as a firm, but they made nothing of it, and came on to New "No," said young Latimer, dryly, needn't go down, dear; I'll see him. It was I he asked for, I'm sure; was it not. Morris?" Morris was not quite sure; being

such an old gentleman, he thought it must be for Mr. Catherwaight he'd

Mr. Catherwaight was not greatly nterested. He did not like to disturb his after-dinner nap, and he settled back in his chair again and refolded his hands.

"I hardly thought he could have come to see me," he murmured, drowsily; "tho I used to see enough and more than enough of Lewis Lock-wood once, my dear," he added with a smile, as he opened his eyes and nodded before he shut them again "That was before your mother and I were engaged, and people did say that young Lockwood's chances at tha time were as good as mine. But they weren't, it seems. He was very atentive, tho; very attentive." "Attentive-to whom?" she Miss Catherwaight stood startled

derstanding continued, until now it has become irretrievable."

now it is only a reminder of a time sense of hearing on a strai that is past and put away, but which first movement at the door. was very, very dear to me. Perhaps I should tell you that I had a mis-understanding with the friend who gave it to me, and since then we have

never met; have ceased to know each other. But I have always followed his

you and your friend separated, and I ing. cannot bear to think that it was she-my mother-who should have been the things at the office for a little while,"

cause. She could not have understood; she must have been innocent of any knowledge of the trouble she had going to Marvland for a few weeks brought to men who were such friends of hers and to each other. It seems

now why you said I would not tell the story of that medal. But, after all, it

has become irretrievable." He had forgotten her presence apparently, and was speaking more to himself than to her as he stood look-ing down at the medal in his hand. "You were very thoughtful to give me this," he continued; "it was very the home the lawyer had made for the home the lawyer had made for the home the lawyer had made for the both. He did not know what to argue from this, but determined to sit up and wait, and so sat smoking be-fore the fire and listening with his sense of hearing on a strain for the first movement at the door.

He had not long to wait. The front door shut with a clash, and he heard Mr. Lockwood crossing the hall quicklife as a judge and as a lawyer, and respected him for his own sake as a man. I cannot tell—I do not know how he feels towards me."

The old lawyer turned the medal over in his hand and stood looking down at it wistfully. The cynical Miss Catherwaight could not stand it any longer. "Mr. Lockwood," she sald, impul-sively, "Mr. Latimer has told me why you and your friend separated, and I

shooting."

The Heyday of Hobbies -BY MARGARET BELL-

Madame Innes-Taylor's Antiques.

There is no occupation today quite so fashionable as hobbying. There are hobbies for fun and hobbies as a profession. The latter named are us-ually employed for the same purpose as any other profession, money-mak-ing. Hobbies as a side dish are mush-rooms to steak. To use a very pro-saic and very human metaphor. Nadame Income Total and the same purpose and not have so much opportunity for pli-laging. The chest was very useful. In it an ancestor of Jacques, the poach-er, hid his precious pewter and brass.

Madame Innes-Taylor is a veritable hobbyist. From antique pewter and tumbled the whole chestful of possessions down into the well. orass to theatre programs, from in-Many years later, an English gent-

usement house programs. Every barn, and wheeled it on a cart to the thing in Madame Innes-Taylor's col- cottage of the Englishwoman who had lection has a history, and in some cases, the history evolves itself int been kind to him. There are some peculiar looking pistols and swords hanging on the a veritable romance.

a veritable romance.
Take the oak chest which stands in her library. It is black with the dignity of age, and has the additional distinction of being one-hinged. It is a veteran of antiquity, so to speak.
That chest is interesting. Not so much because it is black with age, and originally rested in the tobaccober in the greasant. Not even because the present owner once resting a uthorities, who pursued him as
because the present owner once resting the present owner from the Belbecause the present owner once resting the present owner gia. authorities, who pursued him as would make a sorry sight of a Bur
