CHATHAM, N. B., MARCH 28, 1895.

A Parliamentary Session.

The uncertainty is over at last, and the Parliament of Canada is summoned to meet on Thursday, 18th April. The fact shows that the proverbial uncertainty of all things human applies especially to matters political.

It is evident that the Government did not know its own mind in the matter until a very short time before another session was announced, and that the secret, even then, was kept.

Mr. Lewis' letter in another column, on the subject of the breaking water, is very interesting as well as suggestive. Without laying much stress upon it, the facts stated show the urgent necessity of the breaking water.

The government, therefore, has acted wisely in deciding to have a session rather than a dissolution. It is said that initiation is the most sincere flattery.

Mr. Adams knows, also, that he has incurred the opposition of the most influential men in the County who supported him four years ago.

We believe that the World is greatly mistaken in its opinion that any man or number of men in Northumberland carry hundreds of votes in the hollow of their hands.

Mirrored and True.

The World appeared to have "broken loose" on Saturday. It sailed from the Revolving Britanic editorial, saying "The must have been hoodwinked by some public nuisance into making this senseless change."

What a pity it is that the World was not as candid with Mr. Adams months ago as it is now!

At the Government House at Ottawa, Thursday, 21st day of March, 1895; present, His Excellency the Governor-General-in-Council.

Several voters have presented to us the question as to whether—having been induced to promise their vote to either of the Dominion candidates who have of late been canvassing the county or to their personal or political friends in view of the fact that there is not to be an election as it is understood.

The principle involved in this is that the professional politicians who are supposed to be disinterested, to manage conventions and political organizations, enjoy the confidence of political leaders, and, generally, act as directors of party affairs.

A correspondent "Justice," presents the view of many fair-minded persons in Chatham and its vicinity respecting the charges that have been made before the Local Government against the Police Magistrate of Chatham.

Mr. Adams knows, also, that he has incurred the opposition of the most influential men in the County who supported him four years ago.

It is not because the employer holds the vote of the employed "in the hollow of his hand," but because there is a mutual and friendly intercourse which influences both in acting in the same way.

The Manitoba School Question.

Ottawa, March 21.—The Cabinet met this afternoon at 2 o'clock, all the members being present, except Sir Frank Smith, Hon. Mr. Ferguson and Mr. Patterson.

At the Government House at Ottawa, Thursday, 21st day of March, 1895; present, His Excellency the Governor-General-in-Council.

Several voters have presented to us the question as to whether—having been induced to promise their vote to either of the Dominion candidates who have of late been canvassing the county or to their personal or political friends in view of the fact that there is not to be an election as it is understood.

The principle involved in this is that the professional politicians who are supposed to be disinterested, to manage conventions and political organizations, enjoy the confidence of political leaders, and, generally, act as directors of party affairs.

A correspondent "Justice," presents the view of many fair-minded persons in Chatham and its vicinity respecting the charges that have been made before the Local Government against the Police Magistrate of Chatham.

Mr. Adams knows, also, that he has incurred the opposition of the most influential men in the County who supported him four years ago.

It is not because the employer holds the vote of the employed "in the hollow of his hand," but because there is a mutual and friendly intercourse which influences both in acting in the same way.

What was Proposed by "Yellow" Martin.

R. P. Robin, ex-teacher of the opposition in the Manitoba Legislature, made the following statement: "I believe the remedial order is right and just, irrespective of its effect on political parties."

At the Government House at Ottawa, Thursday, 21st day of March, 1895; present, His Excellency the Governor-General-in-Council.

Several voters have presented to us the question as to whether—having been induced to promise their vote to either of the Dominion candidates who have of late been canvassing the county or to their personal or political friends in view of the fact that there is not to be an election as it is understood.

The principle involved in this is that the professional politicians who are supposed to be disinterested, to manage conventions and political organizations, enjoy the confidence of political leaders, and, generally, act as directors of party affairs.

Mr. Adams knows, also, that he has incurred the opposition of the most influential men in the County who supported him four years ago.

It is not because the employer holds the vote of the employed "in the hollow of his hand," but because there is a mutual and friendly intercourse which influences both in acting in the same way.

Canada last week, and Catholic appealing to their flock to never give up the fight.

Stewart Murray, grand master of the Orange, said in an interview: "I do not think Canada will ever be able to satisfy the half-breed on the banks of the Saskatchewan in 1895. How many millions will it take to satisfy the people of Manitoba by subjecting them to the Catholic hierarchy?"

At the Government House at Ottawa, Thursday, 21st day of March, 1895; present, His Excellency the Governor-General-in-Council.

Several voters have presented to us the question as to whether—having been induced to promise their vote to either of the Dominion candidates who have of late been canvassing the county or to their personal or political friends in view of the fact that there is not to be an election as it is understood.

It is not because the employer holds the vote of the employed "in the hollow of his hand," but because there is a mutual and friendly intercourse which influences both in acting in the same way.

News and Notes.

Parliament will meet on April 18. Mr. Gladstone presided over a meeting of Grand Trunk shareholders in London, which passed resolutions condemning Sir Henry Tyler's management.

Sir Charles H. Tupper has tendered his resignation as Minister of Justice. He may withdraw it, or, if he is made leader of the House of Commons.

A despatch received on 23rd at Shanghai from Formosa says that the Japanese attempted to make a landing at the Pescadore islands but were repulsed with some loss.

A landlady buried an infant on the banks of the river Trieste at Trieste, Austria, Friday. Twelve bodies have been recovered. A variety show was in progress when the infant was buried. Six dogs, four children were killed. All but four or five of the audience escaped.

The beautiful farm residence at Midland, near Elgin, Alberta, owned by Mr. J. B. Babiker, was totally destroyed by fire Friday, from a defective stove. The house was worth \$2,500. Only a part of the furniture was saved.

Mr. John L. Waller, formerly U. S. consul at Tamatave, island of Madagascar, has been before a court martial by the French military authorities, at Manzanillo, and been found guilty of having been in correspondence with the British consul at Tamatave, and has been sentenced to 30 years imprisonment. On April 20, 1894, Mr. Waller secured a concession from the French government of the whole of the Southern part of the island of Madagascar and this concession was obtained in spite of the repeated protests of the French President and the French colony generally.

Thursday evening the Salvation Army was carrying on its accustomed open air meetings at one of the street corners. There was quite a crowd gathered round. A well dressed man surprised them by walking into the centre of the ring and asking if he could sing to the people. The captain replied that he could if he had been converted. The stranger sang a hymn in a good voice and at its close presented the Captain with a dollar and went on his way followed by the "Good Samaritans," and half-a-dozen of the astonished army. (St. John Gazette.)

A severe gale swept the south of England Saturday afternoon and evening. Many houses were unroofed. In London three persons were killed and three injured severely by falling walls. A race boat on the Thames was upset, and two occupants drowned. Many instances of death in the storm are reported from the provinces. Several ancient and historic trees at Rugby and Oxford were uprooted, three between twenty seven and thirty feet each in circumference.

It is now a well recognized fact, states a useful journal, that the structures of the eye, especially the cornea and conjunctiva, are subject to malarial infection, periodical in character, differing from the usual affection of these parts, but involving actual tissue change, and amenable to quinine or other antimalarial treatment. Some elevation or abatement of the normal epithelium may occur, or intra-ocular hemorrhage during the cold stage of a paroxysm.

Mr. Samuel Francis an Indian, writes the Yarmouth Herald from Pobocro, under date of March 16th, as follows:—"Three men Samuel Gode, Samuel Francis and John Labrador, went into the woods on the edge of Spruce Ridge to come to the carcass of a dead caribou, which was being devoured by 17 wild cats and 10 foxes. When the animals saw us they turned on us. We had no gun nor arrows and we had no talk about them. John Labrador had all his clothes torn off. We killed five foxes and seven wild cats. We had to fight for our lives. When we reached our camp John Labrador was suffering much pain, and he could not rest at night. This is as true as a star."

Scientific Miscellany.

AN INCUBATOR FOR HATCHING MOSQUITO EGGS.—DUAL EXISTENCE—BYE MALARIA.—ELECTRIC FISH TRAWLING—REGULATION OF ICE AND WILDLING OF DOGS THE SAME PHENOMENON.

An incubator for hatching hen's eggs under reduced atmospheric pressure has been devised by Prof. C. Giacomini, an Italian embryologist, who expects to appear in the study of teratology.

In a comparison of several thousand cases, Dr. Kovacs, of Budapest, finds the proportion of deaths from weakly constitutions, or maladies traceable to the mother, to be twice as great among children of mothers under 20 as among those of mothers over 30.

The Ottawa Free Press (Ottawa) says:—"The bill recently passed by the Governor-General-in-Council with reference to the Manitoba School, has been made public by the Government."

Winipeg, March 26.—In the course of interviews which have appeared, none have had the effect or carried so much weight as that given by Hugh John Macdonald, son of the late Conservative chief and ex-member for Winipeg. Mr. Macdonald is so generally respected here that his dispassionate and statesmanlike utterances have done much to promote a spirit of moderation.

Winipeg, March 22.—Everybody in Winipeg is now engaged privately and through the newspapers giving their views and opinions on the remedial order in the school law, and nothing else is talked of. Premier Greenway was seen by your correspondent to day, but wanted to wait until the order came before he gave an official interview. The premier, after the government refuses to do anything and submits that reply to Ottawa, then the remedial order, according to the private statement, is hereby referred to the whole supreme authority to deal with the matter, and the jurisdiction passed from the provincial government altogether; but, added Mr. Greenway significantly, "The Dominion parliament has not passed an act yet."

The remedial order put this question:—"Supposing the Dominion parliament passes an act restoring to Catholics their former rights, and that on an appeal to the country, the act is carried, would you be willing to see that, according to the late decision of the provincial council, the Dominion parliament would have power to repeal the act so passed by the Dominion parliament?"

The premier answered there is nothing to do but to accept or reject certain propositions. The Dominion government has said: "We wish you to do so and so; evidently there is no room for a suggestion here. Acceptance or rejection is all that is necessary." It is not the Dominion parliament that determines to entertain the terms of the order, they may possibly modify them before going to extreme and passing the act. That is why, they may say and another order; really one would say what they will do down there. Perhaps they have no idea themselves.

Winipeg, March 25.—Greenway and all his ministers declare they will resist to the bitter end the restoration of separate schools. His Excellency the Governor-General, who presided yesterday, declared that the remedial order, if passed, would be a straight line now between the old and the new school system.

At the beginning of the year, Franco-Canada had 328 electric lighting stations in operation. Of these, 131 have a capacity of 9,850 horse power, were driven by water; 119, of 29,000 horse power, by steam; 29, of 6,000 horse power, by water and steam; 14, of 1500
