## THE HOLMES HORROR.

Howard Pitezel.

NEW EVIDENCE SECURED.

to him have also been found in the chimney hole.

Coroner Carter took charge of the bones, and held an inquest, at which the officers and others testified. The grand jury is in session, and Judge McCray ordered it to proceed at once to taking testimony, and to-day the witnesses will be examined. The Court said every effort will be made to bring Holmes here for trial.

The drug with which Howard Pitezel is thought to have been killed before his body was burned in the big stove in the Irvington cottage was found to-day. A part of a bottle of syanide of potassium was found burled in the barn. It was given to the coroner, who said:—"If there is killing to be done this is the drug with which to do it." Boys digging under the Holmes house in an unfinished portion of the celar found the two feet of Howard Pitezel. They had been burned, but not destroyed, and were evidently too bulky to put Into the chimney hole. With the feet was found burled a five quart can. There was some coal oil in it.

An Alleged Accomplies.

New York, Aug. 30.—A Herald special from Little Rock, Ark, says:—"J. C. Allen, eilas Caldwell, the horse thief, now sorving a ten years sentence in the penitentiary here, has made a statement to Warden Moore regarding his knowledge of H. H. Holmes and his operations. In the course of his statement he said he met Holmes in Tennessee in 1893, and met Pitezel in Chicago later. Allen further said that Minnie Williams, who was living with Holmes as his wife, was present at a

talked of a plan to kill Pitezel, who had \$1,000 insurance on his life, because he was drinking, and apt to talk too much, and also knew too much. Allen was to assist, and a trunk was bought in Fort Worth in which to put the body. Pitezel was then in Kansas City. At this point Allen says Ho mes patted Allen on the back and said:
—'Mascot, it is \$10,000 and a trip to Long Branch, and from there to California, and more buildings.' Pitezel was to be 'fixed' in Chicago. Holmes asked Allen, the lateer says, to insure his life, for \$10,000, which Holmes was to collect in his own peculiar way, but Allen thought of the large trunk bought for 'Pitezel, and would not do it. He declares he then parted company with Holmes, and hasn't seen him since. He

any murders.

"Allen says he saw Minnie Williams at
St. Joseph, Mo., at the meeting referred
to. He thinks she went to India, as he

Alien says he saw mindle Williams at St. Joseph, Mo., at the meeting referred to. He thinks she went to India, as he saw letters from her, and knows Holmes sent \$1,000 to her there.

"Referring to the 'castle' Allen says:—"'It was used for a death trap, for I heard Holmes and Quinlan talk about putting people out of the way. A stranger to the city during the World's Fair was decoyed into that 'castle' and murdered for his money. He did not have as much money as Holmes thought, only \$4,500. A bright little boy was enticed into the castle during the Fair, and held in a room for five days for a reward for his recovery. No reward being offered they were afraid to turn him o it, and the gas was turned into his coom at night, and he was sufficeated."

"I was not in Chicago when Annie Williams was killed, but was as the castle two or three days afterwards. Holmes and Quinlan coolly discussed the manner of the mounter to me. her murder to me. Holmes' version was that she was knocked on the head with a stool by Minine Williams, and then given some drug by Holmes to make her die easy. The cause of her killing, as explained by Holmes, was that one of the girls must be put out of the way, and that he could manage Minnie easier than he could Annie. Minine Williams was crazy in love with Holmes, and she was jealous of her sister, as Holmes was paying her some attention too, and he took particular pains to increase her jealousy to work her up to the point of killing Annie. The death trap in the castle was made by Quinlan, who is a fine mason, and a niegro, whose name I have forgotten. Quinlan is equally guilty with Holmes in taking human life; Holmes doing the planning and Quinlan the execution, Quinlan's wife knowing all of their work of this kind. I will state here that Pitezel's wife, I am thoroughly convinced, knew of the murder of her husband and children. Holmes and ahe were villy confidential and she knew what was going on."

Philadelphia, Aug. 81.—Lawyer St

ed with the idea. It seems a most remarkable fact that the only cable line on the whole Pacific coast is the Canadian Pacific cable connecting Vancouver Island with the mainland, a distance of some twenty-one miles. The great Orient is therefore practically shut out of fast communication with the West, with which its interests must ever be closely identified. "That is our new empire," said Mr. Hosmer, speaking to your correspondent on the subject again to-day. "The trade with the Orient, is as yet merely in its infancy, and is destined to assume gigantic proportions. The construction of a cable to Japan, which would cost the comparatively small sum of four millions, would do more than anything else to stimulate this trade."

No action, however, is likely to be taken in this direction until the Imperial Government expresses its policy, and Mr. Chamberlain's attitude on the question is awaited with considerable interest.

Stock Enoker Shoots Himself.

Montreal, Aug. 31.—The street was thrown into a terrible state of excitement to-day when it became known that Mr. Alton F. Clerk, one of the best known and most popular members of the Stock Exchange, had committed suicide by shooting. Mr. Clerk had been in financial difficulties for some time, and his seat on the Stock Exchange was to have been sold this morning. The financial difficulties for some time, and his seat on the Stock Exchange was to have been sold this morning. The financial difficulties preyed on his mind, and there is no doubt that the oppound a firm of the worny led to his terrible act. Mr. Clerk was last seen alive early this morning at the post-office by a friend, who noticed that he appeared to be in much trouble. A few minutes afterwards he left a letter at the office of Mr. Turpin, stock broker, and an old friend, informing him that he could not stand the strain much longer, and that by the time Mr. Turpin got the letter he would be beyond all earthly trouble. Mr. Turpin, thoroughly alarmed, hastened to Mr. Clerk's office, and there in the vault

any case the letter was drawn up by Mr.
Carbonneau himself. The action, his
Honor thought, appeared to be one in revenge, and Mr. Carbonneau had since admitted that he did not fully know the otrcumstances of the affair when the action
was taken, as he did not have access to the
company's books. The case was therefore
dismissed.

dismissed.

The Cattle Embarge,
A meeting of the Montreal sattle shippers was held this afternoon/to consider the question of the embarge on Canadian cattle. The meeting was largely attended, and after a long discussion a resolution was passed to the effect that Sir Charles Tupper be communicated with to urge upon the British Government to meet the wishes of the Canadian Government by sending experts to this country to deterwishes of the Canadian Government by sending streets to this country to determine whether pleuro-pneumonia existed. It was also decided in the event of his proposition not being acquiesced in that the Canadian Government be memorialized to effect some reciprocal arrangement by which American cattle can be shipped by Canadian ports.

Petition to Wind Up.

John Crowe, who was to-day sentenced to three years for robbing \$200 from a companion, has had a rather chequered career, and is well known in Toronto, where he formerly resided. Some eight years ago Crowe was charged in Toronto with killing his young child, but the trial did not proceed. Crowe has a wife and family in Toronto.

An important shipment of cattle, consisting of 275 head of British Columbia cattle, will be made from here to morrow.

Mr. H.V. Roy, of Muntreal, has just returned from an exploring tour of Alaska and the Yukon country, in the course of which he made an exhaustive survey of the mines. He reports the progress of the mining operations as very satisfactory, and regards the prospects for future increase as exceedingly good.

## WOLSELEY IS CHIEF.

MR. SMALLEY ON THE DUKE OF CAMBRIDGE'S SUCCESSOR-

Appreves the Choice.

The Duke of Cambridge has for a long time been one of the best abused men in England. The charges against him are many. He is cousin to the Queen. He is rich. He holds various military sineoures. He is ranger of Hyde Park, and also of the parks called St. James', Green and Richmond. He was in the Crimean War and was not thought to have shown brilliant capacity in that contest, whereas all other British Generals, as we know, were distinguished by the highest military talents. He enjoys an annuity of \$60,000 a year. He has been commanderin-chief for forty years, save one. He has opposed reforms. He has enforced discipline and his own views of army adn'tistration, regardless—when he could be regardless—of the views of annateur sold be

This is a forminable into it seems to bring against any man. Some of them are true. In the way in which I have put them they are all true. To say that he is cousin to the Queen is only a round about way of alleging that he holds his

JOY WOLMERS.

A Combridge, but as the one high to be induced, it is on high to be induced, it is seen that the condition of the sent and the condition of the condition of

she could not safely venture on this darling object of her motherly and queenly ambition.

But if I dealt with all the other counts of the indictment against the Duke of Cambridge I should exeaust my space. I will touch only on the really important ones. Aga must be admitted. The Duke is but nine years younger than Mr. Gladstone, and is two months less two days older than the Queen herself. To this day, however, he is one of the hardest working men in England. His industry was never denied, nor his conscientious devotion to what he thought the true interests of the army. If the Horse Guards—his military headquarters—have been for many purposes so long omnipotent, it is because the Duke toiled early and late at the immense mass of business which passed through his hands. No eight hour law for him. He is at work by nine in the morning, and his day is not over till long past the next midnight. It is his rule to betake himself to his beloved official papers after dinner, say by alven in the evening, and to finish them off before he goes to bed, which is commonly not till two in the morning or later.

If he did his work badly hiszkeal would be no excuse, but he does it extremely well, from his own point of view and from a merely administrative point of view. He is methodical, business-like, and he has an almost unequalled knowledge of the multitudinous details which go to the governing of an army. He has, even now, vigor and endurance enough to tips out for the many a younger man. All of his race have strong physiques. Old George Third, his grandadner, had. Treglyan said of him that he did his work indefatigably, conscientiously and as

Not so the Duke of Cambridge. At would be soo much to say that all milistry reforms have found in him an infexible opponent, but many have, and these mong the mest vital. There are still plenty of soliders, and soliders of high reals, who will tell you to this day that the British army as a whole is the worse, and not better, for the almost revolutionary changes which have been made in it, changes due largely to its new commanders, Lord Wolseley. That, of course, is a pipe clay view. All armies have been modernized, and the British army, which was most conservative of all, had to be modernized with the rest. You cannot pit Brown Bess against the Lebel or Les Metford rife. I use that as an extreme illustration. The Duke, I believe, has not stood in the way of material improvements. But he opposed the abolition of purchase, opposed the re-organization of purchase, opposed the re-organization of the whole machine, which was necessary to make it efficient and modern. The stook appeal to British prejudice used to be made by declaring that the British army was being Prussianized. That is only saying that the Prussian was recognized as the best model. All European armies, the Freuch included, have been Prussianized. The German genius for organization was supreme, and Mothe was the supreme expression or incarnation of it. And organization is one of those things for which the English have little genius. But a dozen Dukes of Cambridge's command was the foremost champion of army reform. It is, of course, dramatic and piquant, and it is also in the order of things, that the champion of the new should turn out the champion of the old. The old order changeth. The new man steps to the front. The periods during which Lord Wolseley held the adjutancy-general ship of the army were periods of acute conflict between him and the Duke, and of much strong language on both sides. The Duke's proficiency in that are is known. Lord Wolseley's is less strong, it one sones, than foreible and plain. But with or without language he conceived

Wolseley's personal character that I wish to say something.

I wish it the more because I think he is much misunderstood in this country. Much of what has been said about him here has been hostile, much of it bitter. He is not popular in the United States, and I imagine that our dislike of him springs from the supposition that he dislikes us. There is a minor zeroson, which I will refer to in a moment. We date our enmity to Lord Wolseley—we in the North, at any rate—from the civil war. He was supposed to take sides with the South, and he probably did. In the first

modeling to do will the matter. Among with which private feeding is totally use connected; though this, I know, is disputed by the locklers, who treat a dissenst from Mr. Gladstone's policy as evidence of personal aminority. But Lord Wolsey, and the connected of though this is a disputed by the locklers, who treat a dissenst from Mr. Gladstone's policy as evidence of personal aminority. But Lord Wolsey, and the connected of the policy of o

in such different way assessment in the control of the pulse of the pu

ment of the American mind is apt to disguise itself in slowness of utterance. If such a word may be used of a man, Lord Wolselvy is charming in manner and charming in character. He is a soldier so charming in character. He is a soldier to the tips of his fingers, but not too obviously a soldier. He conforms to the rule that a well-bred man should not have any stamp, professional or other, too visibly impressed upon him. He is not to be summed up in a phrase, but it may be said of him that there is no better soldier, no more interesting companion, no more honorable man, no finer intelligence, and certainly no man whom the great majority of Englishmen more beartily wished to see commander-in-chief.

Good Time to Buy Furs.

This is a capital time to buy furs. Is sounds ridiculous, doesn't it? when the sund is a sunday in the heavens and malins are the only wear, but it is true. I realized it myself yesterday, when a charming girl confided to me that she had hovered between getting her life in sured and purchasing a sealskin coat. She had finally decided on the former, but to my notion a good sealskin often insures and purchasing a sealskin coat. She had finally decided on the former, but to my notion a good sealskin often insures and purchasing a sealskin coat. She had finally decided on the former, but to my notion a good sealskin often insures policy. At this season there is a great reduction in the price of furs, and it is easy to leave an order and save money when cold weather comes and the garment is needed. As for the fashions in fur, believe me, they are pretty well settled by this time. Broadly speaking, sealskin capes will be waits-length, jackets are moderately short, and sleeves slightly more reasonab e than they were last skin capes will be waits-length, jackets are moderately short, and sleeves slightly war. Velvet, trimmed heavily with fur, will continue to be worn, but for more definite information a trip to any first-class furrier's will suffice. I am only suggesting the economic possibility of the

KING OF THE SEA. By M. Quad.

HE HAD A GENTLE DISPOSITION.

Builets cut the bell rope, Bullets hit the bell. Bullets cilpped and splintered the woodwork of the tower. By and by, when almost the last cartridge in the

dieted a warm wave and before noon of that day the thermometer was down to the lowest point reached this winter. Thursday morning a committee of indig-

carponter suddenly attreed a should of alarm and pointed to the north. The sight we saw made every man hold his breath. A great bull whale, fully ninety feet long and of enormous girth, was breaching. He shot out of the water, until it seemed to us that he rected on his tail alone, and being not over a quarter of a mile away, it was as if a great pillar of stone had been shot up from the bottom of the sea by some mighty power. The huge body held its poise while you could have counted thirty. Then it leaned to the south and toppled over like a giant tree under the blows of the ax, and the ora it was like the collapse of a brick building. There was no sea on when he appeared, but directly after his fall three great waves came rushing down upon us, and the ship was tossed and buffeted for the moment as if facing a howling gals.

It was not that the monster had breached so near us that turned every face white with fear as he fell, but it was what we had seen during the half minute his gray-black body was exposed. There were two harpoons sticking into him, with their lines coiled many times about

"There she is."

The speaker, a fall bronzed man in the strites, leaned forward in his saddle as he spoke, and pointed out to his companion a vague and indistinct object that had just domed up on the edge of the distant horizon.

The vast prairie, like a restless and troubled see, rose and fell away from them on all sides, and save for the peculiar object that had just dawned on their vision there was nothing else visible to the eyes of the father and son, except the vast dome of the sky overhead, flecked by the moving panorama of fleecy clouds.

Months before the daughter, who was the pride and solace of the old man's life, had gone East on a visit, and to-day the father and son had ridden out. on the prairie in hopes that they might in advance catch a first glimpse of the form they both loved so well.

Ten minutes, then twenty, then thirty passed by, and the old man gazed with kindling eyes at the prairie wagon that now, plain to the view, was slowly drawing nearer. But this was not what had first claimed their attention, and as father and son put spurs to their horses the old man turned to the younger, his eyes glad with the light of expectation and impationee, as he exclaimed:

"I knew her at once, Jim, even before the prairie wagon came in sight. What a lucky thing it was that it wrote her to be sure to wear her matinee hat!"

Latter day speakers of Ereglish are gettings for be preserved and promoted a sea over her quarter which flooded the each event and the province of the ship had sea over her quarter which flooded the excessed of the prairie was the profession of the complete as a sea over her quarter which flooded the excessed of the prairie was the profession of the ship had been allowed and the profession of the ship had been allowed and the shating of the sale should be a sea over her quarter which flooded the excessed of half a mile, and just as we had began to feel relieved, the monster slewed about and came for the sale profession of half a mile, and ju

that day the thermometer was down to
the lowest point reached this winter.
Thursday morning a committee of indigmant citizens started out to wait upon
him, but he got word in time and was
not to be found. We reached home Friday noon and for several hours were kept
busy explaining matters to different
delegations and committees. Our horse
editor came out of his hiding place about
10 o'clock at night, looking more like a
ghost than a man, and it will be a week
or more before he will feel easy in his
mind. As near as we can figure, he got
the weather for the Sandwich Lelands
mixed up with the weather for Arizona.
We are extremely sorry that anything of
the sort should have occurred, and our
readers oan rest assured that it will not
happers again. We have labeled the
different pigeon holes and shall herafter
keep each weather by itself and thus
render mistakes impossible.

Newspaperial—in its issue of last week
the Pine Hill Recorder gave notice of
suspension, and we understand that Ero.

log from frowning ledward marcin, child of four years, and for saving from asphyriation in a coal oil tank, at risk of his own life, one James Brennan—Association's bronze medal.

Frank Ward, a young man of To.on'to, for rescuing from drowning at Ward's island a child, Fred. Smallwood—Association's bronze medal.

Norman Henderson, a lad of Oobourg, for saving from drowning a small boy named William Slamin—Association's bronze medal.

F. W. Kirk and George Inksetter, of Hamilton, for prompt action and gallant conduct in rescuing from drowning in Lake Rosseau, Muskoka, a Mr. Badgerow, et Toronto—Parchment cortificate to each.

The Bev. John Mockridge and Willis Mockridge, for prompt action and gallant conduct in saving from drowning in Lake Rosseau a young lad named Grier—Parchment certificate to each.

There were several other cases submitted. Some of these were not deemed worthy of recognition and others were held over for further evidence. So soon as the engraving on the medals is completed, and the acts recorded on the parchments, the presentations will be held in a public manaer in the several localities.

Said to be Worth a Million Dollars-Re

Said to be Worth a Mullion Dollars—Reported Failure of Scaling and Whaling.

San Francisco, Calif., Aug. 31.—The steamer Bertha, Captain Hays, arrived in this port last night from Unalasks and Behring Sea. She brought with her one of the most valuable cargoes that has ever come into this harbor. It is composed of scalakins, furs, whalebone, and gold dust, and it is estimated to be worth between \$750,000 and \$1,000,000. Her passengers report the almost utter failure of the whaling fleet. Captain Hays says that all the scalers who went into the Behring Sea fared poorly, but he brings a pleed of news that 44 vessels cleared from Unalasks for Behring Sea, nearly everyone of them carrying a scaling fing. It seems that the captains were warned by the revenue cutters at Unalasks that they would be esteed if they went into the sea without the flag. The captains took the hint. The scale in the vicinity of the Pribyioff Islands, it was learned, are fast disappearing, and they are even more some outside the prohibited some.

Chicago Socialists will Unfur in Hones of Keir Hardie—Petus Objection.

Chicago for Keir Hardie, the English labor leader, it is said an attempt will be made to unfurl the red flag. The Socialists have the flag ready, and say they will by it at the big open air demonstration on Sunday. Messrs, Hardie and John Swinton are to be present as guests and speakers. The Sunday demonstration is protected by the Socialistic labor party for the purpose of opening the fall campaign for the election to the Drainage Board. Police Inspector Fitzpatrick says:—"The Socialists will not be allowed to unfurl any purely red flag on the streets, even if they are allowed to unfurl the the grove. The Socialists will not be allowed to unfurl any purely red flag on the streets, even if they are allowed to unfurl the the grove. The Socialists

is will not be anowed: a manufacture it y red flag on the streets, even if they are allowed to unfur! it at the grove. The Socialists have not applied for a permit to march, and without authority from the city they could not march at all. If they apply for a permit the red flag business will be settled then and there."

A MAIDEN SOLILOQUY.

A yacht can lay over on a tack
And hold her nose in the spray,
But a girl wouldn't relish such sport at
that,
Because she's not built that way! And run for an (oyster) bay;

A girl, like a yacht, can luff and fill,
And at times she can stop in stays;
But she cannot carry a haby-jib
Because she's not built that way!
A yacht can stand ten miles on a leg,
And can make her cables pay,
But a girl can hardly hold out so long
Because she's not built that way!

Because she's not built take way.

A yacht can hug up a sca-girt shore
And salute the fingship May.

But a girl would much rather hug her
beau
Because she is built that way. The Old Man Was Canny.

Because she is bullt that way.

The Old Man Was Canny.

A Durham miner, aged seventy-three, visited a Newcastle lawyer (a bachelor) for the purpose of making his will. The old man's property consisted of two small cottages, which had cost him \$150, and a little furniture.

The lawyer having asked his client how he wished to dispose of his property, the latter replied: "Ma old woman hes to her all se long as she's my widdow. Efter that ma beairns gets all."

"What age is your old woman?" asked the lawyer.

"Seventy-two," replied the miner.

"And how long have you and your wife been married?" asked the lawyer.

"Over fifty years," replied the miner.

Thereupon the laywer suggested to his client that he should give the wife the interest during her life, whether she continued a widow or otherwise.

"But surely," replied the lawyer, "you don't expect your old woman, now seventy-two years old, would marry again after your death?"

The miner, looking the lawyer full in the face, answered with much selemnity: "Wey, hinney, ther's ma knaaning what young chaps like yourself will de for money."—Pearson's Weekly.

The Tables Turned.

"Honry," said Mrs. Meekins, as she put

money."—Pearson's Veckly.

The Tables Turned.

"Henry." said Mrs. Meekins, as she put the finishing touches to her tollet preparatory to a bicycle ride, "I dislike to hurt your feelings."

"Do you, my dear?"

"Certainly, but I can's wear the neckties that you bought for me. They are simply outrageous combinations of color. There is one thing that a man should never undertake, and that is to select his wife's cravats and sus-penders."—Washington Star.

Washington Rules to be Accepted—Congress Awaiting Britain's Action.
Washington, D. C., Aug. 30.—The present of the Washington rules to prevent collisions at sea is reported bright by Navigation Commissoner Chamberlain, who has just returned from an informal consultation with Ambassador Bayard and the British authorities upon the subject. After the assent of nearly all the martitime nations to the rules had been secured last year by the United States, Great Britain in February, Johned by other powers, asked delay until the rules could be referred to a Parliamentary committee. This committee, which was about to render a generally favorable report, came to an end with the abrupt dissolution of parliament upon the defeat of the late Ministry. A new committee must be appointed, and the desire of the United States that the committee be appointed at the present session of parliament has been clearly indicated to the British Government. Delay in appointing the committee until February might impede action by Congress, should any be necessary, and it is expected that parliament will show the same courtesy to the United States which Congress at the last session showed to Great Britain.

READY FOR THE CEREMONY.

family, preparations for the woulding made. Both parties must learn n

family, preparations for the welding are made. Both needes must learn new songs and dances for the coming event. The bride gets her stock of meats, spoons, dishes, etc., ready for house keeping. Her father's gift is a blanked and alwas an ox, which is looked monat alwas an ox, which is looked in one of the manblezi—ance trail spiritis. Its loss by death would be thought a brion of the descrition of the protecting spirits of her father's house.

On the wedding day the bride, with a gay following proceeds towards the bridegroom's kraal, which she will not onter until night, the whole company singing and dancing as they go. The bridegroom's party looks on at first and then joins in the revelvies.

On the record by he groom contributes to the festivities by slaughtering a cow. The bride wanders about the kraal at night, and is supposed to be crying for her father's kome. She tries to run away, but the girls pravent her. On the third appears bearing a spear in one hand and a dish of water in the other. Coming up, singing and dancings, she throws the water over her busband, sprinkling her brother and sister-in-law at the same time, as a symbol that from that time her sway is to provail in her husband's household. Then she breaks the spoer, and makes a last pretended attempt at escape. If she is not stopped at the gate of the brank, and on all he has done for her, saying the number of cows he has received is too small, but that he hopes she will be well treated, etc. He emphasizes his words by jumping up and vlotensy kick-hield. Then the father of the oride takes a she will treated, etc. He emphasizes his words by jumping up and vlotensy kick-hield. It was Written in Hieroglyphics Which the Druggist Was Unable to Make Out.
Here is a fac simile of a prescription which was handed in to be made up at a prominent drug store in this city during the last week, and which the ohemist has been unable to make out. It was written by a well-known physician in regular practice here, who seems to have invented

Stychown 91/2 acid aum 91/2 Jum Beam 37 Amous Go KITULAN 9 if Ind a fel us xxx dinle one a de

CAN ANYBODY READ THIS? CAN ANYDODY READ THIS?
some system of hieroglyphies of his own.
The chemist who was asked to compound this prescription says: "I am unable to read it and doubt very much. If many druggists in this city can.
As an explanasion of this occurrence it may be stated that physicians are in the habit of writing hieroglyphics as prescriptions for even the simplest remedies, so as to mystify patients and make them think the doctors very learned. Others go a step further, and invent symbols that are not to be found in any pharmacopoela. to mystify panents and the doctors very learned. Others go a step further, and invent symbols that are not to be found in any pharmacopoela.

All this merely wastes time and frequently interferes with the very work physicians are expected to accomplish. Why should they not be compelled to write their prescriptions in plain English, so that are described to the compelled to write their prescriptions in plain English, so that the compelled to the compelled to write the compelled to the compelled to write the compelled to the comp

I knew a man, a voluntary exile from society, a being who sought no vanity with his fellow man—the sum of whose interest was a cresented by his bags of gold. All

He lerked and bolted himself within his hove, where he hugged his bags of gold, councing and recounting their contents with giuttonous, devouring eyes while he kept a vigilant car for the sound of an intruder. The tinkle of his money was sweeter far than the nusic of eathedral dragan; and he starved himself amid squalid surroundings to save himself the pangit gave him to park with a copper.

If he heard the footstep of a passer-by he was instantly alert, and securing his gold in its place of biding, he weet it for an attack. The fear in which he daily lived made every sound the approach of an armed robber. He ventured forth only when necessity compelled him—and how he.

with in him. His sympathy, his thoughts
were all for himself.
Follow him to his pallet at night, wher

last thought is of his wealth, and in the silent witches it gives him no rest. He shivers and groans, distorts his feature and clubbes at the air. He sees his de invaded, the robbers at his bags. H

Napoleon's smooth face was a sure evidence of his distilke for a beard. In some anecdotes of the Russian campaign there is a story told of the great emperor and a Napoleon had made a rather lengthy de tour from the line of march with a detachment of officers. Arriving at a small village they refreshed themselves with a good meal and baths. Napoleon, wishing to be shaved, the village barber was called in, while the poor fellow strapped his razor and passed it industriously over the great emperor's chin, he remained slient, and seemingly melancholy, although performing his work with amazing rapidity and smoothness. When he had finished, Napoleon compllimented him, remarking:

t e kings upon kings and emperors that have died without knowing what it was to be shaved by me, I am sad and melan

The Modern Girl. "John," she said thoughtfully, "of course it is well to be proud of your daughter's success at the seminary, but— "But what, my dear?" he asked.
"Well, it seems to me that you are a triffe thoughtless at times."
"I don't quite understand you," he

'It's all right to speak of her standing in her class," she explained, "and it is all right to be proud of her social accomplishments. Talk of her taste if you wish to, her cooking and her singing lessons, her vivacity, her knowledge of modern languages and her sunny disposition, but what?"

any mistake?"
"Why, it's about time to find a husband for her, and I would suggest, John, that you say nothing about her gymnasium work or the fact that she played centre rush on the seminary football team. I have noticed that that has a least the seminary football team. I have noticed that that has a celebrated Wooden Pumps for sale very cheap. Apply to B. JOVERIN, Reporter Office.

and there learned five languages and how to spend money royally. It is no unusual sight to see her at court and other high social functions surrounded by a mob of diplomats and princelings of different nationalities, addressing each in his mother tongue and flinging off witticisms in French, German, Spanish, or Italian, as the occasion deman ds.

Since the union of this distinguished Belgian family with the Ward family, the old Prince de Chimay, who was Minister of Foreign Affairs at the Belgian court, has died, and his estates have become the inheritance of the husband of the princess. There has never been any money in the family and [their chatean in the Province of Hainaut, near Mons, has been restored by the wife's money to the extent of \$300,000. Prince de Chimay is a good looking typical Belgian, devoted to the life of a country gentleman. He is said to have no ambitions beyond a good day's sport and a good dinner. The fruit of the marriage is two children, a jittle girl and an heir a year and a half old.

R. D. JUDSON & SON PRINCESS DE CHIMAY

ETIQUETTE FOR CHURCH WEDDING Some Invitations That Must be Recognized by Autumn Brides,

For church weddings everything per tains to formality, and the invitation as well as the ceremony is impressive in all details. The names of the parents heading the invitation are now more often written in full, thus insuring a good-looking line at the top of the note. The use of the initials, which are indefinite, is to be discouraged. The "r" and "rs" in "Mr." are frequently engraved above the line, owing partly to the English custom of so doing and because, when the parents' names are long, more space on the line is gained. With short names the abbreviations are preferable on the line with the other small letters. For the same reason "and" in full is substituted for the abbreviation, although the latter is more tains to formality, and the invitation n "and" in this substituted for the ab-eviation, although the latter is mor-ten used. The line, "requests the hono-your presence," almost invariably ap-pars on a church invitation with "hon-
