

PILGRIMS SUFFERING IN VIENNA

Heavy Rains Add To Discomfort of Crowds

SUNDAY'S PARADE MAY BE CANCELLED

Thousands of Visitors to Eucharistic Congress Find Their Only Place of Shelter in School Houses.

Vienna, Sept. 13.—Although a heavy rain fell throughout almost the entire day, there was a large attendance upon the various meetings of the eucharistic congress today.

FAMOUS GENERAL SUICIDES

General Nogi, Hero of Port Arthur, and His Wife Kill Themselves as Last Tribute to Japan's Dead Emperor.

Tokio, Sept. 13.—General Count Maresuke Nogi, Supreme Military Councillor of the empire, and his wife, the Countess Nogi, committed suicide tonight in accordance with the ancient Japanese custom as their fiancé and departed emperor and friend, Mutsuhito. The taking off by his own hands of the famous general in itself was dramatic as it was sad.

Following the Samurri custom the couple had carefully prepared their plans for killing themselves and their children so that they would be coincident with the departure forever from Tokio of the dead emperor.

Darkness had fallen and General Nogi and the Countess sat and awaited the signal they had agreed upon to announce their leave-taking. This was the booming of a single gun in the palace grounds at Tokio which was to let the people know that the body of the emperor was starting for its last resting place.

MAY REVOLUTIONIZE THE CANADIAN WEST

Rivers Flowing Into Hudson Bay May Be Tapped to Make the West Industrial Centre—May Electrify Hudson Bay Railway.

Special to The Standard. Ottawa, Sept. 13.—As a result of his trip of personal inspection over the route of the Hudson Bay Railway it is likely after the road is built, it will be run by electricity, if the plan is at all feasible.

MIGHT ACCEPT GOOD OFFICES OF THE U. S.

Uncle Sam May Get Opportunity as Peace Maker.

TO SETTLE TURCO-ITALIAN WAR.

Great Powers of Europe Working to Bring Belligerents to Terms But So Far With No Success.

FAMOUS GENERAL SUICIDES

Chisasso, Switzerland, Sept. 13.—All the great European powers have exercised their good offices in trying to arrange an understanding between Italy and Turkey on a basis which could be made the foundation for official peace negotiations. Both Italy and Turkey, it is understood, however, have declared that they would welcome the good offices of the United States rather than those of any other nation.

STEAMER WELL KNOWN HERE IS DAMAGED BY FIRE IN MONTREAL

The Wakanui of New Zealand Shipping Company Has Fire Aboard Which Does Much Damage to Cargo.

Montreal, Sept. 13.—A fire broke out this morning in the steamer Wakanui, belonging to the New Zealand Shipping Company. The flames originated in the hold where a quantity of paper had been stored.

TO PIPE NATURAL GAS 600 MILES TO CITY OF WINNIPEG

Western Men Have Plan to Provide Winnipeg With Natural Gas at 25 Cents Per Thousand.

Winnipeg, Sept. 13.—Representing a company whose identity is not yet disclosed, William Georgeon and Robert L. Shimmy, of Calgary, are approaching Winnipeg city with a proposition for piping natural gas six hundred miles from Medicine Hat to Winnipeg at an estimated cost of \$20,000,000.

BIG SHIPS FOR ROUTE TO CANADA

Allan and Cunard Lines To Have New Vessels

Montreal, Sept. 13.—News from the other side in to hand with regard to the progress being made with new ships building for the Atlantic trade.

MORE DANGER FROM ASIATICS THAN GERMANS

Sir Richard McBride Talks of Government's Naval Policy.

EXPECTS ACTION TO BE PROMPT AND STRONG.

Asiatic Menace to Western Canada More Serious Danger than German Peril to England Says McBride.

ONE KILLED, BUT OTHERS ARE SAVED

Workmen in Shawinigan Plant Had Narrow Escape.

BURSTING TURBINE FLOODING BUILDING.

Water Rushed in and Men Had Battle for Lives—One Man Drowned—Others Were Slightly Hurt.

WILL UNVEIL MONUMENT TO REV. FR. MEAHAN

Handsome Memorial in Monastery Cemetery to be Formally Unveiled on Sunday Afternoon—General News.

DOUBLE HULL FOR OLYMPIC.

London, Sept. 13.—It is stated that alterations to be made in the White Star Line steamer Olympic will roughly cost \$1,250,000.

MINISTERS LEAVE FOR BANQUET

Ottawa, Sept. 13.—Hon. J. T. Reid and Hon. J. D. Hazen left tonight for Lenoir, Que., to attend the banquet to be tendered Hon. L. P. Pelletier tomorrow night.

JAPAN STILL BUSY BURYING EMPEROR

Another Portion of Mikado's Funeral Ceremonial Carried Out Yesterday at Aoyama—Final Burial Will Take Place on Sunday.

Aoyama, Japan, Sept. 13.—The body of the late Japanese ruler, Emperor Mutsuhito was escorted from Tokio tonight by a great procession of Japanese statesmen and army and navy officers to the funeral hall at Aoyama, where the members of the imperial family and the people of the nation paid homage to the memory of their departed sovereign.

PRONOUNCED DEAD; WALKS STREET NOW

Story of Most Remarkable Case Comes from Winnipeg.

SAVED FROM GRAVE BY MERE ACCIDENT.

Man Named Music Brought to Life After He Had Been Pronounced Dead and Prepared for Burial.

Winnipeg, Sept. 13.—Pronounced dead by a qualified physician, laid out in his home while authority was being sought from the coroner to bury him without an inquest, resuscitated by another physician after a police inspector had suspected a spark of life, and today walking about the streets of Winnipeg, is the strange experience of S. Musick, 1099 Redwood avenue. Had it not been for a series of accidents Musick would have been buried alive, probably to awake out of his comatose condition only to be suffocated.

COMMISSIONER WALDO ON WITNESS STAND.

Says He Has Affidavit From Police Captain Who Was Offered Inspectorship for the Sum Stated.

New York, Sept. 13.—The sum of \$15,000 was the price asked of a police captain by "politicians and others" for promotion to the office of inspector, according to the testimony given by Police Commissioner Waldo today as a witness before the Aldermanic Committee which is investigating alleged corruption in the police department.

THE WATERWAYS COMMISSION WILL MEET NEXT WEEK

Ottawa, Sept. 13.—Meetings of the international joint waterways commissions are to be held at International Falls, Minnesota, on Sept. 17, and Kenora on Sept. 19 for the purpose of considering the water levels, the Lake of the Woods and its tributary streams.

SUFFRAGETTE GETS FIVE YEARS FOR USING HATCHET ON REDMOND

Dublin, Sept. 13.—Mary Leigh, the suffragette who recently was sentenced to five years imprisonment for attacking John E. Redmond, leader of the Irish parliamentary party with a hatchet, is in a dangerous condition in Mount Joy Prison as a result of being forcibly fed. Since her incarceration Miss Leigh has steadfastly refused to eat and the prison officials have been compelled to give her nourishment through a tube.

C.P.R. TELEGRAPHERS ON WHOLE SYSTEM MAY WALK OUT TOMORROW

Winnipeg, Sept. 13.—After counting the vote cast by the Canadian Pacific Railway telegraphers, the committee of the men announced today that unless the road concedes a fifteen per cent. increase in wages to all telegraphers by Sunday the men will strike. Should the strike be called by some person who apparently is dishonest enough to conceal the fact

LELIEUX ACT IS OF NO VALUE

Trades and Labor Congress Asks For Its Repeal.

CLAIMS IT HAS NOT MADE GOOD

Delegates Declare It Favors Companies at Expense of Workmen—N. S. Delegate Scores Mining Conditions.

Guelph, Sept. 13.—This has been the busiest day of the trades and labor congress, three sessions being held at which the time was divided between the adoption of resolutions, a protest from French-Canadians against a report in a Toronto paper that they had placed race considerations before the cause, and a discussion of the Lelieux act. The whole afternoon was spent in a discussion of the latter question, the congress going into committee of the whole with Sir George Ankwitz, who is here from London, inquiring into the workings of the labor laws in Canada.

WILLIAM THORNTON

SCHAEFER'S THE FUNNIEST PLAYER IN THE NATIONAL GAME

HERMAN SCHAEFER.

Archie Latam was funny in his day, but "German" Schaefer of the fellow that has ever been connected with the Intron club is the funniest with baseball. During the trip when Washington won 17 straight games, "German" was at his best. So clever and clean was his comedy, that he made the fans like the game, despite the defeats administered their favorites.

Schaefer is popular with the fans because he never gets peeved when they kid him. He can laugh at a joke at his expense, just as well as the fan laughs at his puns. His wit is spontaneous, and seldom does any one get the better of a battle of repartee with Schaefer.

Of course there is a limit to the things Schaefer can do on the coaching lines. The umpires, realizing that the fans like to see him in action, never object to his coming out during a series at Cleveland, Schaefer almost turned the game into a farce by his stunts. The fans were so badly trimmed, that the fans forgot the game in their amusement at Schaefer. Umpire Connolly, seeing the state of affairs, pulled out his mask and yelled:

"Ease up on that stuff! The folks came here to see a ball game, not a burlesque."

"Wrong, as all umpires usually are, Mr. Connolly!" said Herman, wearing his broadest smile, a smile at which no umpire could take offence. "Just a minute and I will convince you."

The crowd looked on in wonderment. Turning to the stands Schaefer asked:

"Ladies and gentlemen, did you come to see the ball game or me?"

"Almost in unison the crowd abouted "SCHAEFER!" So what could the umpire do?

Later in the game some fan who desired to take a little of the singer out of Schaefer, asked, "When do you intend to play, and try to earn your salary?"

"Griffith is saving me for the world's series," answered Herman, at most before the fan finished his question.

Another sought to belittle Schaefer by yelling in his loudest voice, "You're the biggest fourthish I ever saw." Never for a moment did Herman falter.

"It took you a dozen years to find that out, I always knew it."

In Detroit a fan sneezed at the fun Schaefer was having over the trouncing the Tigers were getting, yelled:

"If you were so good, why did Jimmie let you get to?" To which Herman immediately replied:

"If you will look up the records, you'll see Huxley hasn't won any pennants since he made that fatal mistake." No one on the grounds got a heartier laugh out of this than Jimmie.

One of Schaefer's best acts is his tight rope walking, using his white wash lines of the catcher's box as an imaginary wire. It is really one of the funniest stunts ever shown on diamond or stage. After he had pulled his absurdity, one of the fans who didn't like the act possibly because it was so ridiculous, remarked as Schaefer walked toward the Washington bench:

"You must be crazy when you will do that stuff to get the money."

"Sure, I'm crazy!" answered Herman. "Those fellows who make a living driving automobiles and motor cycles 90 miles an hour are wise."

Schaefer's predictions are uncanny. Prior to a game in Cleveland, he announced the Nationals would win 4 to 8 and they did. In Detroit with Dube pitching, the Tigers lead 2 to 0 to the ninth. About the second inning Her-

MARATHONS DEFEATED LYNN; RAMSEY'S HIT WON THE GAME

Yesterday's exhibition of baseball on the Marathon grounds, should satisfy the minds of the would-be critics of the game that the teams that have been playing in the New Brunswick and Maine League this season rank in the same class as the teams that have been playing in the New England league. The Fredrickton team managed to take one game out of three from Lynn, and yesterday the Marathons took the game from Lynn by 4 to 1, by clean first class playing.

Perhaps the small ring of letters who attend the games and imagine that they can do up a winner, and before yesterday's game commenced were offering bets of 5 to 1 that Lynn would win, held the Greeks rather cheaply, but as the Greeks gressed, and was finally won by the Marathons, they had something to sleep on and have now become a few stopped when the announcer said I will single to left. And he did, starting a rally that for a time threatened trouble.

These are a few of the things Herman Schaefer, the funniest man in baseball is pulling every day. He isn't like the monologist in vaudeville who changes his stuff daily, and any time you see a matinee with the Washington club as an attraction, you can figure on getting double your money's worth.

BORDER CITY RACING AND BASE BALL

Special to The Standard. St. Stephen, Sept. 13.—The fourth day of the big fair, has been an equal success with the first three days, and the finances are expected to show a substantial surplus.

The Caladonian Band, of St. John, furnished the music today and were heard with pleasure by all.

A ball game between picked teams from St. Stephen and Calais was featured this afternoon, and was watched by a large number. It was not a tight game, but was interesting in places. Calais started with "Hip O'Neil, recently of the Halifax Societies on the mound, but he was hit pretty hard, and was replaced in the fifth by Crowell. For St. Stephen "Rip" Pines, of Eastport was the mound artist. Ryan caught for Calais, and Mid-

den was in for St. Stephen. The horse races, especially in the 2:16 class were as good as could be seen anywhere. The four leaders ran very closely bunched in every heat.

2:28 Trot and Pace—Purse \$300. Roland Leslie, J.A. McKay, Ban. Gor.1 11 Prince Baron, Gallagher Bros.3 32 Woodstock.3 23 Lady Pandy, H. Love, St. Stephen.3 23 Pills, H. R. Hale, Milltown.4 45 Teddy B. O. J. Bishop, Presque Isle.5 5 4 Time—2:22 1/4, 2:19, 2:20 1/4.

Jordan went out pitcher to first. O'Brien hit out three times. Winter singled to left and went to second on a wild pitch. Ramsey went out short to first.

FOURTH INNING. In this inning the Lynn team made their first run as was noted above. For the Marathons Pinkerton fled out to centre while O'Donnell and Dutton struck out.

FIFTH INNING. Wheeden fled out to centre. Walker singled to centre and went to second when Orcutt beat out a hit to short. Strands fled to short. McGovern, Ryan and Orcutt went out to second.

SIXTH INNING. Logan went out second to first. Neptune pitcher to first and Harrington fled out to centre. O'Brien fled out to left. Winter struck out, and Ramsey went out pitcher to first.

SEVENTH INNING. Ryan drew a base on balls. Wheeden singled to centre. Walker hit to Pinkerton who put Ryan out at second and doubled Walker at first.

EIGHTH INNING. Orcutt fled out to catcher. Strands fled out to short and McGovern fled out to third.

NINTH INNING. Logan went out second to first. Neptune drew a base on balls. Harrington went out second to first and Ryan fled out to second and the game was over.

LAST GAME OF THE SEASON TODAY---SATURDAY

MARATHONS GAME CALLED AT 3 O'CLOCK

WHO'S THE BEST YOUNGSTER IN AMERICAN LEAGUE?

"EDDIE FOSTER" SAYS BAN JOHNSON.

Eddie Foster, third baseman of the Washington club, is the best young player to come into the American league this year, in the opinion of President Ban Johnson.

"Foster is but one of several very fast players, who have made great records in their first season's efforts. When every view of Foster's work is considered, however, I believe he is entitled to the honor of leading the list."

"Foster is a fast fielder, covers a lot of ground, hits well and plays a magnificent inside game. He is a wise player in every way and is improving all of the time."

"This is his second adventure in the American league and he learned much by his first experience. Like many a young player he was not ready for fast company the first time up, and he did not know how to take care of himself."

"It is different now, however, for he has learned his lesson well and realizes it is up to him to keep himself in condition to deliver the best baseball that is in him."

"Foster is a Chicago boy. He was discovered by Robert McJoy, when Robert was manager of a semi-professional team several years ago. He was with the New York team in 1910 but was not of much use, so was sold to Rochester, of the International league. He played great ball for Rochester, and last fall Jim Mc-

EDDIE FOSTER.

"It is a delicate thing for me to pick a player as the best youngster in the American league, but I feel that Foster deserves the distinction, work hard to make as good a record as Foster has made for himself."

AN EXPLORER DISCOVERS RACE OF BLONDE ESQUIMAUX IN NORTH

Seattle, Wash., Sept. 13.—Vilhjalmar Stefansson, after spending more than four years in Arctic exploration has returned to Seattle by steamer from Nome, Alaska, and told of his probable discovery of the descendants of Scandinavian colonists of Greenland, who were last heard of in 1413 and who, when trade with Greenland was resumed in the 17th century, had disappeared. Stefansson and his companion, Dr. R. M. Anderson, of Forest City, Ia., made a valuable zoological and ethnological collection, which is now on the steam whaler Belvedere, with Dr. Anderson, and will arrive in San Francisco the first week in November on the way to the American Museum of Natural History, New York. Stefansson will leave for New York tonight.

Stefansson reports Dr. Anderson in perfect health. The Belvedere is now whaling off Wrangell Island, Siberia. During more than four years Stefansson and Anderson were together only nine months, as they could cover more ground by separating themselves. Stefansson and Anderson went to the Arctic in 1908 by way of Winnipeg, Edmonton and down the Mackenzie River to its mouth. They were bound for Coronation Gulf, a region marked on Canadian maps as uninhabited, and which they had been warned to avoid. Stefansson spent the first winter at the mouth of Colville River, Alaska; the second at Cape Parry; the third on Coronation Gulf and Victoria Land, and the fourth at Cape Parry.

On leaving the Arctic he made a leisurely journey along with a dog team from Cape Parry to Point Barrow, two miles, visiting all the Eskimo settlements along the coast. He left Parry March 22 and reached Point Barrow June 15. The expedition made its headquarters for collecting at Bally Island, a resort of whaling vessels east from the Mackenzie River, and here the aerial gathered was placed on the Belvedere. It will not be unpacked until it arrives at the New York museum.

The feature of the collection, from a popular standpoint, comprises the skins, skulls and leg bones of 19 barren ground grizzly bears ready for mounting. Only one barren ground grizzly is in any museum. It is supposed that bears of two species are in the collection. The barren ground grizzly attains a weight of 700 lbs. Dr. Anderson found pottery farther east than ever before known and also grass baskets.

Of the so-called white Eskimos of Coronation Gulf, Stefansson said: "They were taller than the Greenland Eskimos, but not so tall as those of Alaska. They spoke Eskimo, though I thought I detected some Norse words, and they lived in the typical Eskimo way. I counted thirteen groups of these people, who numbered probably two thousand, and saw one thousand of them. Ten of these groups of tribes had never come into contact with whites and had not even a tradition of them. Two tribes had tradition of the St. John Franklin expedition. An old man of one tribe had seen Richardson in 1848, and an old man in another tribe had seen Collinson in 1853.

The thirteenth tribe had been visited by whalers. "Between the country of the blond Eskimos and the Mackenzie is a barren strip three hundred miles wide, which is never crossed by Eskimos. The Eskimos west of the strip have no knowledge of Eskimos to the east. Those to the east know there are western Eskimos, but believe them to be cannibals. Musk ox, polar bears and seals are abundant and the blond Eskimos live well. Many of them have eyes as blue as my own and very blonde eyebrows are a rule. A great many of them have sandy or chestnut beards. They have no tradition of their ancestry. On Victoria Land are a number of stone houses, but the blond Eskimos shun them, saying they were built by spirits who inhabited the country before men came. Stefansson was unable to gather statistics of blue eyes, for when the blue-eyed persons found I was seeking them they avoided me, not understanding what I wished. However, I took cephalic measurements of a large number of the males, and I found that the facial index was the same as that of the Eskimos—Scandinavian half-bloods of Greenland, and not typically Eskimo.

"I made note of the tribe visited by Collinson in 1853. He wrote that it numbered three hundred persons. There are now 2390 and all are in good health. On the other hand, Dr. Richardson in 1848 found two thousand Eskimos between the Mackenzie River and Bailey Island. These Eskimos have been in contact with whites and only forty persons survive, and they are diseased."

While they retain few of the customs of the Norsemen who were lost from Iceland in the twelfth century, their method of living is entirely different. The conditions under which they live are of the most primitive sort. No vegetation, except moss and a few stunted willow, grows in their habitat. They are meat and fish eaters. The island abounds with caribou and the sea with seal and other fauna. They use bows made of willow bound together with sinews and their arrows are tipped with flat and native-copper, which is prized out of ledges or found in stream beds on the mainland. Their knives are made of copper, with horn handles, and made in much the same manner as implements were made by the early Norsemen who inhabited Greenland.

Stefansson built fourteen churches, two monasteries, a nursery and other structures, the ruins of which are still standing. These people crossed to the coast of America for timber. There were of the Eskimos at this time, either in Greenland or Newfoundland. The Norsemen settled in two colonies, one on the north and one on the south of Newfoundland. In the fourteenth century Eskimos came from the north and exterminated the north settlement. Their record was complete till 1441, when the Black Plague scourged Europe and for two centuries communication between Newfoundland and the old country was cut off. When communication was restored the people of the second settlement were missing. Their graveyards, buildings and other adjuncts of their semi-civilization were found. The theory was formed that the people had drifted to a settlement further west across the narrow straits, where they intermingled with Eskimos, whom they took along with them to the island on which their descendants make their headquarters.

They still use the bone needles that were invented by their forefathers, and many of their methods of life are similar to that of their progenitors. Different environment, a more rigorous climate and a lack of vegetation, however, has changed many of their usages. They are a migratory people, never remaining longer than a few weeks in the same place. When they moved Stefansson and his associates moved with them. They never live on the coast itself, and it was for this reason that Amundsen failed to discover them when he sailed past their island. In the winter time they settle on the ice in the centre of a bay and hunt seal. In the summer they go to the centre of the island, where they eat the caribou which there abound in thousands. One in a great time they capture one of the rare specimens of Baren Land bear. Their houses are made of snow, with a roof of drift-wood which on rare occasions is found on the coast. The stray fragments of wood are highly prized. They furnish their clothing. Their shoes are cut to come well up to the thighs. Here it is met by a kind of undershirt which reaches to the neck. The coat is fashioned in almost precisely the same manner as the full dress coat worn at inaugural balls by

herself to force Japan to open her doors, we shall demand of her to give up her racial prejudice and deal freely and impartially with all.

"But certain Americans may say the Japanese are less than men. In 1905 years they have taken Formosa, annexed Korea, and invaded Manchuria. Are the Japanese imperialistic and committed to encroaching on friendly countries? But this is a mistaken view. Did not Formosa come to us as a prize? Did not China herself hand it over to us? Korea was the nearest foreign country to us and too weak to maintain her independence. Had she been annexed by another power it would have been like filling up the Japanese sea with a power that is more vital to us than Russia's. We have fallen heir to Russia's rights in Manchuria. Japan has no idea of enlarging her possessions on the mainland.

"The white races occupy advantageous positions in the world and treat with contempt the more backward races. Their habit of oppression and their race is lawless and unreasonable and cannot be tolerated for a moment. I think the time has come when the white races should be content with their own rights and stop meddling with the rights of other races. The crux of the labor problem is that free competition is a disadvantage to the American laborer and the complications and trouble that arise are the result of political meddling. Ambitious politicians have agitated these questions to win the favor of voters.

"Many people in western countries believe it to be next to impossible to get a Japanese to change his ways. Certain papers say that, this being the case, it is useless to attempt co-operation with our people. Who would have any use in attempting to change the ways of a nation? Commodore Perry fifty years ago came to our shores that in less than fifty years extra-territoriality would be abolished. Japan would take rank among the nations and grapple with Russia and win a complete victory over her? This has been a time of rapid progress while foreigners have noticed the marked differences in manners and customs, and seeing little change in this respect, have entertained doubt as to the progress of our society. While it cannot be denied there is a foundation for this view, from the Japanese standpoint the transformation of the more backward races is astonishing. When we compare the former with the present we cannot escape the feeling that we live in a different world."

"Recognized by World."
"On account of our victory over the Russians the world has recognized that we have made great progress, yet the world will not acknowledge our claim that society has made progress and our customs have improved. The fact that so great a war could be successfully waged is proof that our people have been benefited by their studies in science and refutes the superficial accusation that we are an inferior people.

"We have no claims to present to America, except free access to the labor market, our right to have a free hand in the economic development of the country, that they lay aside their racial prejudices, that they discard the views that America belongs to themselves alone. Let them recognize that it is common property and for the common convenience of the entire human race. We only put forth the claim that heaven has decreed that every human being under heaven and every dweller in the earth is entitled to a part of the immense territory on the American continent. In other words, just as America took it upon

themselves to force Japan to open her doors, we shall demand of her to give up her racial prejudice and deal freely and impartially with all.

Goods Bearing This Trade Mark Are Made and Guaranteed by the Largest Drug Firm in the British Empire

When you buy **Na-DrU-Co**, whether Toilet or Medicinal, bearing this Trade Mark, you have positive assurance that the contents have been compounded by Druggists who are experts in their profession—from Formulæ that have been tried out and proved worthy—and from goods that are pure and fresh.

When you buy a Toilet or Medicinal Preparation bearing the NA-DRU-CO Trade Mark you buy the product of a responsible, reliable Firm. Behind every one of the hundred

stands the National Drug and Chemical Company of Canada, Limited, with a Paid-Up Capital of over Five Million Dollars—Fourteen Wholesale Branches in Canada—and the largest Drug Business in the British Empire.

SENSATIONAL ARTICLE A JAPANESE NEWSPAPER URGES WAR WITH THE U.S.

Pekin, Sept. 13.—The Shaka Sei Saku, or Social Police, a Japanese publication, has just printed a remarkable article directed against the United States from the pen of Count Itagaki, who was the originator of the Japanese parliamentary system. The paper containing the article was confiscated by the government, but a copy of it fell into the hands of the Far East, which has reproduced it in English. The article is headed "Japan Shall Knock at the American Door." It says:

"America's opposition to Japanese so far as we are concerned is annoying and on their part disgraceful. The immediate cause seems to have been an economic one concerning labor, but the crux of the labor problem is that free competition is a disadvantage to the American laborer and the complications and trouble that arise are the result of political meddling. Ambitious politicians have agitated these questions to win the favor of voters.

"Many people in western countries believe it to be next to impossible to get a Japanese to change his ways. Certain papers say that, this being the case, it is useless to attempt co-operation with our people. Who would have any use in attempting to change the ways of a nation? Commodore Perry fifty years ago came to our shores that in less than fifty years extra-territoriality would be abolished. Japan would take rank among the nations and grapple with Russia and win a complete victory over her? This has been a time of rapid progress while foreigners have noticed the marked differences in manners and customs, and seeing little change in this respect, have entertained doubt as to the progress of our society. While it cannot be denied there is a foundation for this view, from the Japanese standpoint the transformation of the more backward races is astonishing. When we compare the former with the present we cannot escape the feeling that we live in a different world."

"Recognized by World."
"On account of our victory over the Russians the world has recognized that we have made great progress, yet the world will not acknowledge our claim that society has made progress and our customs have improved. The Understudy of the Sun McClary's Sunshine Furnace

WHEN Old Sol swings low and far away he appoints an understudy for the purpose of keeping Jack Frost where he belongs—Outside.

Years ago McClary's "Sunshine" Furnace, by reason of its marvelous heating capacity and the balmy June air it suffused the house with, was specially appointed Understudy to the Sun. That appointment has been confirmed year after year, and—your "Sunshine" Furnace—Jack Frost's Master awaits your orders for the coming winter.

Remember the past winter—the Frost King was very active—He battered us with a three months' siege of snow and ice—Almost conquered the thermometer by chasing the mercury out of sight. But he failed to penetrate thousands of homes, because the Understudy of the Sun—McClary's "Sunshine" Furnace—was on the job in the cellars of these homes.

It's easy to keep Jack Frost at a safe distance with the "Sunshine" Furnace. He may storm and rave outside, but there is no place for him within—because, the Understudy of the Sun has demonstrated its mastery in the home.

There are a multitude of reasons why the "Sunshine" Furnace does save fuel—reduce coal bills—reasons that will be printed in the following advertisements. Here is one that should make you call on the McClary agent at once—the "Sunshine" Furnace has four radiating surfaces—surfaces that gather up the heat greedily and diffuse it liberally all over the house. But—you just call on the McClary agent and ask to be shown. If you do not know him write us at our nearest address and we'll tell you. You certainly owe it to yourself to find out why McClary's "Sunshine" Furnace is called the "Understudy of the Sun."

To Speak Here On Sunday.
Mrs. Deborah Knox Livingstone, state president of the Rhode Island W. C. T. U., will speak on temperance in St. David's church tomorrow afternoon at four o'clock, and in the Unique Theatre in the evening at half past eight o'clock.

at fat persons dying suddenly, the only wonder is that they live as long as they do. The very fat persons, the excessive heavyweights, those who have stood in the unenviable front rank as such, have all been short-lived. The next fattest is luging around a mountain of flesh. The next fattest man on record was Daniel Lambert, of England. He weighed 738 pounds, and is mighty near the danger-line. The fattest man of whom there is any authentic record was Miles Dar-

den, of North Carolina, who died in Tennessee in 1867 at an early age, forty, in 1808. These, of course, are exceptional cases, but, other things being equal, the man or woman who weighed more than 1,000 pounds or unwieldy tips the beam at 225 pounds or over—a most unsightly and unwieldy tip of the beam—has a very short life. THE WEATHER

Toronto, Sept. 13.—A disturbance has developed over Manitoba last night, and a rather pronounced cool wave is following showers that have occurred from Saskatchewan to upper Ontario, but elsewhere in Canada the weather has been generally fair.

Table with weather forecasts for various cities including Victoria, Vancouver, Edmonton, Battleford, Moosejaw, Regina, Qu'Appelle, Winnipeg, Port Arthur, Farry Sound, London, Toronto, Kingston, Ottawa, Montreal, Quebec, St. John, and Halifax.

Lower lakes and Georgian Bay—Winds gradually increasing in force, becoming showery, chiefly towards evening or at night.

AROUND THE CITY

Police Find Purse. A purse containing a small sum of money and tickets was found on Water street a few days ago and will be returned to the owner at the central police station.

Oruro From Bermuda. The Pickford and Black West India Line steamer Oruro, Capt. Bale, arrived in port Friday morning and landed 70 passengers and a general cargo.

Property Transfer. L. P. D. Tilley announced yesterday that the St. John Real Estate Company had purchased a double tenement house on Wright street from Commissioner Wigmore.

Will Complete Borings Today. The engineers who have been making borings for the foundation of the bridge to be built at the reversing falls, expect to finish their work today. They will submit their report at once.

Withdrawal Suburban Services. After Sept. 14 all C. P. R. suburban trains running between St. John and Westford with the exception of the leaving Westford at 6.45 a. m., and train leaving city at 6.10 p. m., will be withdrawn. These two trains will be discontinued after Sept. 21st.

Will Preach Here Sunday. Rev. E. Balne, accompanied by his bride, formerly Miss James of Sackville, will preach at Zion Methodist church Sunday evening. On Monday Mr. Balne will proceed to his home in New Germany, N. S.

Suspension Bridge Repairs. The work of repairing the suspension bridge was practically completed last night. The flooring of the bridge has all been re-covered, and portions of the under flooring have been renewed. Considering the conditions, the contractors have carried on the work with despatch.

Domestic Servants from London. A party of girls from Great Britain sent out by the provincial representative in London, arrived in the city yesterday, and were sent by the local immigration office to various parts of the province where positions have been secured for them. Most of them will enter domestic service.

Country Market. The country market is well stocked with produce of all kinds for today. Lamb is very plentiful and a fair quantity of veal is also to be had. While there is not a large supply of chickens these to be had are exceptional as regards quality. Vegetables of all varieties are plentiful. The quotations today will be about as follows: beef, 10 to 20 cents; lamb, 10 to 15 cents by the quarter; veal, 10 to 15 cents; pork, 14 to 15 cents; chickens, \$1 to \$2; fowl, \$1 to \$1.50; ducks, \$1.50 to \$2. Potatoes will sell at 25 to 30 cents per peck, beans, 40 to 50 cents per peck, and peas, 50 cents.

New Observatory for St. John. R. P. Stupart, director of the meteorological department for the Dominion of Canada, arrived in the city yesterday on matters connected with the observatory here. Besides making an inspection of the observatory at St. John, Mr. Stupart is looking over different sites suitable for the establishment of an observatory larger than the present accommodation at the customs house. The present accommodation is inadequate for the work and a building where more room can be had as well as better exposure for the instruments is desirable, and the erection of such a building is being considered. Mr. Stupart said last evening that he had a couple of suitable locations in view, but had not decided on any of them. He will go to Wolfville today where a new station is to be established.

Another Picture Theatre? It is reported that another large moving picture theatre will be established on Waterloo street. About a year ago Architect F. Neil Brodie prepared plans for the construction of the brick building of Amland Bros. on Waterloo street into a moving picture house, but for some reason the project was never proceeded with. When asked if the present report was related to this project a member of the firm of Amland Bros. said that he knew nothing about it, and that it was their intention to continue using their premises for their present purposes. He said that about a year ago they had been approached in the matter of establishing a moving picture house, but had not taken it up as they did not consider it a good proposition. It is said, however, that a new building may be put up with a frontage of 100 feet, four stories high and capable of seating a thousand people.

MAINTAINING EXPERIENCE WITH THE CRUISE

Schooner Yarmouth Packet Attacked by Whale on Her Last Voyage from St. John to Yarmouth.

A half-railing adventure befell the schooner Yarmouth Packet, Captain John Thurber, on her last voyage from St. John to Yarmouth, and for a time her master and crew had reason to fear that the fate of Jonah was about to overtake them. Off Boar's Head a couple of big whales were seen. One of them showed a considerable interest in the schooner and began to swim around her in narrow circles. While the crew watched amazed at his peculiar antics the Leviathan of the deep headed for the port bow and dived with the sound of water breaking over a tide-rock. A few moments after the whale, rising under the bottom of the schooner, struck her a tremendous thump, and lifted her bows five or six feet out of water, setting her rigging shaking and the sails slatting violently. Apparently alarmed by the collision the monster raised about thirty feet of his tall out of the water and flung his great flukes at the starboard bow, throwing the anchor inboard, bursting the bulwarks, and causing the schooner to lurch almost on her beam ends. Then he disappeared.

After the schooner recovered her bearings and her crew realized that the monster was not going to return and smash their vessel, they found that the anchor flukes and iron gear forward had torn great hunks of blubber out of the whale's tail and that buckets of slime had been left on the decks. It was a wonder the schooner had not been smashed like an egg shell. As it was she was so shaken up that she began to leak and they had to keep the pumps going quite regularly.

Captain Thurber in 1905, while master of the Freeport schooner Swan, had a somewhat similar experience with a whale.

MORE FLATS WANTED IN ST. JOHN Real Estate Men Say that there is a Good Demand for Cottages with Modern Improvements.

The need of flats containing modern improvements to accommodate the influx of people who wish to settle in the city was brought to light yesterday when a tour of the leading real estate offices showed it to be almost impossible to secure an eight room flat with up-to-date conveniences and at a reasonable rent in the city. Questions asked at the different real estate offices showed it to be all the demand for house room had been far in excess of the supply for some time past and this is another proof that St. John has a real live boom by the fact that this period of the year it was formerly an easy matter to secure a house.

A glance at the flat to let column in the different newspapers will show that only a few houses are being advertised and it is to be regretted that all of these do not contain modern improvements. In last evening's Globe only two flats were advertised, one of which was rented in the morning, while the other is without modern conveniences. For the past few days a gentleman from Boston accompanied by his wife and family has been in the city looking for a flat. As this gentleman's work requires that he should stay here in the future he naturally desires to locate here, but so far his search for a home has been unavailing and yesterday he stated his intention of returning to Boston. Another case to show that the demand for house room exceeds the supply came to light a short time ago when a tenant of one of the flats of the city became dissatisfied with his surroundings and decided to leave. The flat in which he lived was rented a few hours later by a man who paid \$50 more rent per year.

As there is not sufficient accommodation in the city at present for the people who desire to settle here, it is hoped that in the near future some enterprising firm will build a series of cottages or tenement houses in or near the city. One real estate man when seen yesterday afternoon said he thought it would be an excellent scheme if instead of tenement houses a series of cottages were built near the city. He said that in other cities when it became necessary to enlarge the living accommodation this was done and had always proved satisfactory. He said in St. John when a young man got married it was necessary for him to rent a house, but under the existing conditions it was almost impossible to do so. On the other hand if cottages such as have been suggested were built, they would be rented at a reasonable figure.

THE STANDARD WILL SOON HAVE PAR RIGE PLENTIFUL

Order Placed for One of Most Modern Hoe Machines.

At a meeting of the directors of the company held on Tuesday of the present week, a contract was arranged with Messrs. Hoe & Company, of New York, for the construction and installation of the most modern press manufacturing by electric power. This press will, for the time being, have a capacity of sixteen pages in black, with an additional color done in black or printing three other colors. It will be possible with this press to print on 8 page paper with color work on every page, or to print any even number of pages up to 16 with combinations of color results. It will also be possible to turn out a regular four page weekly supplement printed in four colors. The press will be equipped with electric motor and will include in its make-up a quarter page folder by which the sheets will be turned out ready for mailing.

Other Improved Equipment to be Added to Plant and Standard Building to be Completely Remodelled.

In view of the success which has attended The Standard since its establishment, and anticipating continued growth both in circulation and advertising patronage, the management of this paper has decided to make ample provision for future requirements. At a meeting of the directors of the company held on Tuesday of the present week, a contract was arranged with Messrs. Hoe & Company, of New York, for the construction and installation of the most modern press manufacturing by electric power. This press will, for the time being, have a capacity of sixteen pages in black, with an additional color done in black or printing three other colors. It will be possible with this press to print on 8 page paper with color work on every page, or to print any even number of pages up to 16 with combinations of color results. It will also be possible to turn out a regular four page weekly supplement printed in four colors. The press will be equipped with electric motor and will include in its make-up a quarter page folder by which the sheets will be turned out ready for mailing.

More New Equipment.

The contract with Messrs. Hoe also includes a much larger metal furnace than is now in use, with an extra hot, automatic plate cutter, automatic shaver, and up-to-date trimmer, a combination flat and curved routing machine and other necessary stereotyping outfit. There are also a considerable quantity of mechanical equipment which for the most part has not yet been installed but which will be put in place within a very short time. This includes a matrix roller, additional steam boiler, and other gear.

To Remodel Standard Building.

At the same meeting the directors considered and approved plans recently prepared by G. Ernest Fairweather for the re-construction of the Standard building on Prince William street. Mr. Fairweather was requested to call for tenders for this work as soon as could possibly be done. These plans require the preparation of the basement of the present building for a modern press room, the press to be located in the northern side of the building fronting on Prince William street and open back onto a rear southern part of the building will be devoted in front to a public vestibule with direct open public entrance from the street to the top floor. This vestibule opens into the mailing department which will occupy the remainder of the entire ground floor with the exception of that portion devoted to the press room.

The business offices of the company will be located on the second floor, the mechanical department on the third and the writing rooms on the upper floor. Under the new arrangements there will be express and freight elevators and a generous stairway, while in the rear of the building on a portion of land, now unoccupied, there is to be constructed a two story basement made of reinforced concrete with steel arches, capable of storing two full cartloads of paper. The work will involve almost the entire reconstruction of the building and it is hoped, unless something should interfere, that operation may be begun in the very near future.

A Modern Newspaper Office.

It is the intention to make The Standard building one of the most convenient and best equipped newspaper offices in Canada, and Messrs. Hoe & Co. guarantee that the plant to be installed will be equal for its size to anything in existence. The Standard is growing very rapidly in popular favor. The directors realize that the limited mechanical capacity of the paper has at times prevented the best display of news material and has even resulted in shutting out certain articles which would otherwise have added materially to its news value. It is believed, however, that with the new equipment, and the improved internal facilities there will be no difficulty in taking care of all the important news that can be secured, while at the same time giving every reasonable attention to advertisers.

It has not been the custom of The Standard to make any pretentious claims to circulation, but it is the belief of the management that this paper now enjoys a paid circulation better than that of any newspaper published in the Maritime Provinces.

Cashmerettes.

F. A. Bykeman and Co., have imported this season from the English and German makers a very fine variety of Cashmerettes. Velours and Flannelettes, which are so much in demand for waists, kimonoas and house dresses. These goods are distinctly different in the pattern from mostly all other goods of a similar class, and are priced most attractively. Cashmerettes with fleece back and fine surface like cashmere are only cents a yard and make the daintiest of winter waists or house dresses, while the velours which are priced from 25 to 35 cents, are of a heavier comfortable texture for winter wear. Kitchen Girds and Bell Bows wanted—Royal Hotel.

MOOSE AND PAR RIGE PLENTIFUL

Game Warden Dean Says Outlook for Fine Hunting Season for New Brunswick is Very Bright.

"Moose and partridge are plentiful now, and from what I hear there will soon be a large number of hunting parties in the woods," said Game Warden Dean of Musquash who was in the city yesterday. "I understand that there are a large number of Americans coming to New Brunswick to shoot this season. Guides in my district, say they have booked all the parties they can handle. It has been the opinion in some quarters that moose and partridge are becoming scarce in this part of the province, but the fact is there has been a notable increase in game in recent years. Hunting parties this year should have no trouble killing moose or partridges."

EARTHQUAKE DAILY FEATURE OF LIFE IN HARVEY STREET

Blasts in Sewer Trench Cause Commotion Among Residents—Big Boulder Hurlled Through Window of House

The people who live in the vicinity of Harvey street are every day given an excellent imitation of an earthquake by the large blasts that are being fired to remove the rock from the water and sewerage trench on Harvey street. A few days ago a rock about the size of a walnut was blown through the large plate glass front in the innates building, completely smashing a window in the home of Mrs. Creary on Main street and driving the casing nearly a foot out of place.

This incident occurred about three o'clock in the afternoon, the stone was thrown over a three-story building and across the street. Needless to say the shock to the building when the stone struck was considerable. The inmates thinking for a moment that it was struck by an earthquake but greatly to their relief an inspection of the window showed that the damage had been the result of the blast. Luckily the stone struck the casing of the window or a larger amount of damage might result.

DOMINION COAL CO. WILL SOON ENLARGE THEIR PLANT HERE

M. J. Butler, general manager of the Dominion Coal Company, at Sydney, C. B., arrived in the city last night and is at the Royal. To a Standard reporter he said that the company is having a very successful year. The company's plant here has been working to their full capacity. With the addition of another blast furnace which has been installed and is to begin operations today, the output at the iron and steel works will be greatly increased. With the addition of the new blast, there will be five furnaces in operation at the works. Speaking of the improvements proposed here by the Dominion Coal Co. Mr. Butler said that it will hardly be possible to have all the work completed this season as several months will be required for the project. A start will be made soon, however, on some of the work.

PERSONAL

MANTELS GRATES TILES. If you are renovating your house, or building a new one, you will need something of this kind. If You Cannot Come In, Send for Cuts and Prices. W. H. Thorne & Co., Ltd. Market Square and King Street

Announcing the Seventy-Fifth Anniversary of THE KNABE. A notable event in the world of art and commerce, signaling the completion of three-quarters of a century of the continuous manufacturing of an instrument whose supremacy is recognized on both hemispheres. The artizanship engaged in its production is not the acquisition of one generation, but a pedigree of skill running through seventy-five years, not merely in the masters of this great industry but in the family of the employees, many of whom have been engaged in its manufacture for periods of twenty to fifty years, giving every assurance of maintaining these Knabe standards which have established its pre-eminence as the WORLD'S BEST PIANO. To properly commemorate this auspicious occasion we are exhibiting a complete line of the latest Knabe models. A visit to our warerooms will be greatly appreciated. Sole Canadian Representatives WILLIS & CO., LIMITED, MONTREAL. Sole Agents Halifax and St. John WILLIS PIANO & ORGAN CO.

You Know What You Are Doing When Using An ENTERPRISE MONARCH STEEL RANGE. This range is the best example of all that is modern and up-to-date. It has so many real helps to cooking that there is no guess work; for example: MRS. RORER'S THERMOMETER GUIDE. THE ENTERPRISE HEAT ECONOMIZER. THE ANTI-SCORCH COVER. THE CONTROLLER DAMPER. THE HINGED TOP. THE OVEN THERMOMETER. Do not let all these factors impress you with advisability of buying a "MONARCH". EMERSON & FISHER, LTD., - 25 GERMAIN STREET

Millinery in All the Elegance of Fashion's Fall Decree. This week-end exhibit of millinery presents some particularly fetching creations in dress hats. The models are clever and exclusively beautiful in effect. Valuable ideas may be had from a brief inspection. There are also the season's best thoughts in tailored hats, simply trimmed but decidedly fashionable; a great variety of different styles. UNTRIMMED HATS, practically all the new season's shapes and shades in velour hats, plush hats, chenille hats, velvet and silk hats. Our stock of trimming accessories is large and complete, including a handsome display of ostrich feathers, feather mounts, feather bands etc. Hats to Order in Any Style You Wish. MILLINERY SALON—SECOND FLOOR.

Fall and Winter Overcoats Of Surpassing Stylishness. He would be a hard man to please who came to this department and went away again without buying an overcoat, for there are so many styles, so many different shades and patterns, that practically every design has been anticipated. This collection of overcoats is undoubtedly the largest, most varied and exclusive ever offered in the city, and represents the most fashionable models produced this season by leading makers. Single and double-breasted convertible collar coats in plain box back or the new half-belted back effects; some of the coats are lined throughout, others are quarter lined with either Italian cloth or silk. The cloths are double backed and mostly of the soft weaves in thick, fleecy materials and have a warm, comfortable appearance. English and Scotch Tweeds and Homespuns, also the new combed Pile and Nap cloths in blue. Plain effects, fancy stripes, diagonals and fancy mixtures. The coats have plain set-in sleeves and the new split sleeves. We also show the very newest split sleeve Raglans. A feature in the heavy coats for winter is the Tweed Ulster in double-breasted style, half belted back, wide storm collar and strap on sleeves. This model is offered in the same cloths and colors as the other coats and is going to be very popular this season. The price range of all these classy overcoats is from \$8.50 to \$24.00. For the man who is a trifle conservative in his dress we are showing a number of styles in the full length and three-quarter length coats, 46 and 50 inches, with velvet and self collars. Some are made in the regular standard styles, others in full box effects, with patch pockets, a few have corded velvet edges on pockets, cuffs and collars. The coats are in black and grey Melton, Scotch and English Tweeds in fancy mixtures and diagonal weaves. The leading colors are greys and browns. Prices from \$10.00 to \$27.00. We Are Sole St. John Agents for the World-Famous "Burbury" Coats. CLOTHING DEPARTMENT. Manchester Robertson Allison, Ltd.
