

# SEPARATED FOR 29 YEARS; MET HERE WEDNESDAY

### John M. McDonald and His Brother Donald Surprised— How it All Happened.

Thursday, Apr. 3.  
After being separated for twenty-nine years, two brothers, John M. McDonald, of West St. John, and Donald McDonald, of Jardineville, Kent county, met yesterday here. Both were born in Cape Breton and lived there until about thirty years ago, when they started out for western Canada.  
They soon separated and neither heard of the other until several days ago when a son of Donald noticed the arrival of his uncle in the St. John directory. He soon located him and then communicated with his father in Jardineville with the result that the two brothers met yesterday.  
After spending several years in the west, Donald came back to New Brunswick and settled in Kent county. He made several efforts to locate his brother but failed and during the last few years he had given up the search. John had remained in the west until about two years ago when he came to St. John and is now in the employ of the Dominion Coal Company.

# PASSED RAISED BANK NOTES ON REXTON PEOPLE

Richibucto, April 1.—A strange young man appeared in Rexton yesterday and succeeded in passing several money notes. Mr. Parkes, manager of the Royal Bank, pronounced them five dollar bills raised in ten dollars. Soon after passing the bills the strange man disappeared. Constables are on the lookout for him.

# WEDDINGS

### Theriacal-Babineau.

Richibucto, March 31.—A wedding of much interest took place this morning in St. Augustine church when Miss Alice Babineau was united in marriage to Nicholas Theriacal, of Burnside, Gloucester county. The bride looked exceedingly well in a travelling costume of grey, green and black lace with large outside plumes. She carried a white prayer book and a bouquet of white roses and lilies of the valley. The wedding ceremony was performed by Rev. J. J. McLaughlin, in the presence of a large number of interested friends and relatives, the bride being given away by her father, Mr. Theriacal.

The church was tastefully decorated with evergreens, potted plants and cut flowers. The bride wore a fashionable wedding, when Miss Alice Babineau was united in marriage to Mr. Theriacal, of Burnside, Gloucester county. The bride looked exceedingly well in a travelling costume of grey, green and black lace with large outside plumes. She carried a white prayer book and a bouquet of white roses and lilies of the valley.

The bride was given in marriage by her father, and was elegantly gowned in white satin characteristic of the latest fashion, with wreath of orange blossoms. She carried a large orange bouquet of roses and lilies of the valley. The groom wore a tuxedo, Mr. Thomas Patislo, of Truro (N.S.), the bridesmaid, Miss Beattie Kilburn, wore a lovely gown of pale blue and white, the bridesmaid, Miss Beattie Kilburn, wore a lovely gown of pale blue and white, the bridesmaid, Miss Beattie Kilburn, wore a lovely gown of pale blue and white.

VOL. LII

# FOUR COMPANIES IN NEW CANADIAN MAIL SERVICE

### Will Divide \$1,000,000 000 Subsidy

### Tri-Weekly Sailings in Summer and Two in Winter

### Halifax and St. John to Be Winter Ports, and Lines Can Choose Either—C. P. R., Allan, Canadian Northern, and White Star—Dominion Lines Awarded Contract.

Special to The Telegraph.  
Ottawa, April 7.—Hon. E. P. Pelletier, postmaster general, in a brief statement to parliament before the orders of the day were called this afternoon, laid upon the table of the house the contract just concluded for the Canadian ocean mail service. By its terms there will be inaugurated a tri-weekly fast mail between Quebec and Montreal and Liverpool and Bristol in the summer months and a semi-weekly mail between Halifax and St. John and Liverpool in the winter months. The mail will be carried by four lines of trans-Atlantic steamers, the C. P. R., the Canadian Northern, the Allan and the Dominion-White Star. In all twelve fast steamers will operate on the route in the summer, and eight in the winter. The subsidy to be \$1,000,000 an increase of some \$400,000, a portion of which will be saved from the amount of \$185,000 now paid annually for the service via New York.

The sailing from Canada will be on Tuesday, Thursday and Saturday. The contract comes into force on May 1 next. The four companies involved jointly and severally agree to secure, some other vessel should any of those stipulated in the contract become disabled at any time.

### Vessels for the New Service.

The vessels participating in the service will be the Empress of Ireland and British Columbia of the C. P. R. line; the Royal George and Royal Edward, of the Canadian Northern line; the Victorian, Virginia and Heparian, and Heparian with the two new vessels of the Allan line; the Calgarian, of the Allan line; and the Lauriat and Megantic, of the Dominion-White Star line.

The eight boats for the winter service will be the Empress, the two Royals, the Albatron and Calgarian, the Victorian and the Heparian.

The WhiteStar will not join in the winter service beyond supplying the Teutonic as a spare ship.

The companies have the right of selection in each port they will sail from. The amount would have been \$650,000 per year but for the contention by the British postal authorities that the two Empresses were not Canadian but British carriers, in as much as they were subsidised as part of the Liverpool to Hong Kong route. The new scale of payment for mail carriage under the postal union will become effective on January 1, 1914.

### Contract in Effect May 1.

Montreal, April 7.—The Atlantic mail contract between Canada and Great Britain has been awarded to the C. P. R., Allan, White Star-Dominion and Canadian Northern Royal lines of steamship joint-ventures, commencing from the termination of the existing contract with the Allan line at the end of the present month.

The existing contract with the Allan line was to be terminated at the end of March, but was extended today for a month.

The statement made today at the various shipping offices of the lines affected was to the effect that the contract has been awarded and would be made public in the house of commons probably tomorrow. A tri-weekly service is to be maintained in the summer and a bi-weekly service in winter. An arrangement that involves considerable change being made in the sailing dates of the steamship lines. The Royal and White Star lines will sail with the mails on Tuesdays, the C. P. R. Empress White and the Allan lines, Victorian and Virginia, will handle the Thursday mails, and Saturday mails will be by the Allan line, Teutonic and Comoran.

Halifax, April 7.—Miss Augusta P. Day, one of the 29 patients treated by Dr. Friedrich Friedmann at the clinic of the Hospital for Deformities and Diseases of the Joints, told the New York American yesterday of her remarkable recovery from tuberculosis, following the Friedmann treatment. It is the first story of Friedmann's work in America told by one of his patients. Miss Day is bookkeeper at 383 Hudson street. She lives at 139 Chestnut avenue, Jersey City. Two sisters of Miss Day died from pulmonary tuberculosis and following the death of the second sister, Miss Day contracted tuberculosis of the bone in the left arm.

### FORMER AMHERST MAN KILLED AT BUTTE

Amherst, N. S., April 7.—(Special)—George Elstone, of Leicester (N.S.), near Amherst, received a telegram today from Butte, Montana, informing him that his brother, James Elstone, had been killed in an accident which happened in a mine there. The deceased is a single man, forty-five years of age, and lived Nova Scotia twenty-five years ago. It is understood that James Elstone has amassed a considerable fortune which will go to his only surviving relative, his brother George.

# BORDEN INTRODUCES CLOSURE RESOLUTION

### Its Passing Will Gag Free Speech

### Sir Wilfrid Laurier Declines to Set a Date for a Vote on Naval Debate, and Battle Continues—Liberal Chieftain Invites Borden to Leave it to the People—Dr. Pugsley Tells of the Malay "Gift"

### Canadian Press

Washington, April 7.—The Democratic party, in full possession of the executive and legislative branches of the national government, today turned the wheels of legislation toward a revision of the tariff. In a session called early in the morning a bill was introduced for the country a tariff bill voluminous in detail and radical in its proposed reduction of existing duties. As a whole it was the product of debate and study by the Democratic members of the committee after several months of work. It carried also the approval of the president.

Consistent with the introduction of the measure in the house during the opening hours of a session called especially to revise the tariff, the president was turning over in his mind questions of procedure and strategy upon which the success or failure of the party programme may depend. Doubt About Senate.

While the Democratic majority in the house is sufficient to secure tariff revision by a single bill or by a series of bills embracing separate schedules, the situation in the senate is less certain. The Democratic majority in the senate is not as large as in the house, and the opposition is more numerous.

### A Drafts Proposal.

A second amendment provides that any minister of the crown, after having given notice on the previous day, may move in committee of the whole that the further consideration of any resolution or clause of a bill, or any amendment thereto, be postponed indefinitely, or for a specified period of time.

### Naval Bill Up Again.

After a rest of twenty-three days from naval debate the government brought the question again before parliament today. Discussion was resumed in committee on the \$35,000,000 bill, the "Culivrie amendment" to it, just where it dropped on the famous Saturday night of March 16, when the government tried to force closure, and were frustrated by the opposition led by Hon. Wm. Brewster, Frank B. Carroll and Dr. Clark.

Today the Liberals appeared to be determined that they would not concede the advantage of Sir Wilfrid Laurier's policy. His speech was taken as indicating that he was in perfect health and first class fighting form.

### John Pierpont Morgan is the name.

He is 46 years old and a graduate of Harvard. He looks like his father did at 40, talks like his father did, and like his father acted and smoked big black cigars like his father used to.

# TARIFF REVISION MAY BE HELD UP IN SENATE

### Democratic Leaders Undecided About Trying to Pass All the Items in One Bill—Sugar Schedule, Which is Likely to Meet the Most Opposition, May Be Detached and Pre- sented as Separate Measure.

AGE

Commercial Fertilizer Analysis Print neglected.

When are all the people who use the fertilizer bag a perfume of the contents? need not concern them for they do with values.

The form in which the fertilizer is second in importance to the food itself. Plants take from the soil in solution, chemicals applied are insoluble.

Ground bone is one of the phosphoric acids. It is a white substance, however, so many purposes it is of little value. When acted upon by acids it becomes available.

Basic slag is a by-product of steel making. It contains a fine powder of phosphoric acid. One of the best potash fertilizers is made of potash, a salt made from the ash of wood.

Phosphoric acid is a valuable fertilizer. It is a white powder, which when mixed with water it should be used in New Brunswick as it is a cheap source of supply.

When the various amounts are known, as stated on the label, the farmer can pay the price of the fertilizer constituent.

Commercial prices at present are as follows: Nitrogen in nitrates, 16 cents. Nitrogen in dried blood at 20 cents. Phosphorus in water-soluble 10 cents.

Phosphorus in ammonium phosphates, 9 cents. Phosphoric insoluble in a rate, 4-1-2 cents. Potassium, 5 to 6 cents.

AGRICULTURE

Commercial Fertilizers and How They Should Be Selected. Analysis Printed on the Bag Cannot Afford to Be Neglected.

When are all the people to disregard the size of the fertilizer bag and the color and perfume of the contents? These matters need not concern them for they have made up their minds to do with values; but the analysis printed on the bag—printed there for the protection of the farmer—cannot afford to be neglected.

It is of prime importance that the farmer should know that what is supplied in the fertilizer, if fertilizer is complete, is potassium, phosphorus and nitrogen—the three plant foods which become exhausted in the soil.

The form in which the food is found in the fertilizer is second in importance to the food itself. Plants take up their food from the soil in solution, so that, if the chemical applied is insoluble, they are not used.

The materials used as sources of nitrogen by the fertilizer manufacturer are quite varied. One of the commonest forms is nitrate of soda, commonly called Chile salt.

Ground bone is one of the chief sources of phosphoric acid. It is a very slow acting substance, however, so slow that for many purposes it is of little immediate value.

Basic slag is a by-product of the Bessemer steel manufacture. The slag is composed of phosphoric acid and contains about 12 per cent of phosphoric acid.

One of the best potash fertilizers is the muriate of potash, a salt mined in Germany. It contains about 60 per cent potash. It is a low grade potash salt.

Phosphorus in ammonium citrate-soluble phosphates, 9 cents. Phosphorus insoluble in ammonium citrate, 4 to 6 cents. Potassium, 6 to 8 cents.

The mixing of fertilizers is not a difficult matter and may be performed by any farmer. A sand sieve is used in getting rid of lumps and in bringing the mixture to uniform mass.

CONGRESSMAN GARDNER WARMS GLOUCESTER OF DEMOCRATS' INTENTION.

SEE RUIN AHEAD. Fishermen Would Move to Maritime Ports and Take Their Catches Direct to American Ports—Proposal Also to Cut Tariff on the Cured Products.

Friday, Apr. 4. Boston, April 4—Free fish from the provinces threatens Gloucester, according to a telegram received from Congressman Gardner at Washington.

Mr. Gardner says that the Democrats have decided to put fish on the free list, and Gloucester interests state that such action will spell ruin for them.

Other dealers say that the small fish dealers who are unable to send vessels to the banks and pay the duty on the fish will be able to compete with the big companies if fish are admitted free.

Some fishermen say that if fish are admitted free, all of the Gloucester fishermen will leave here for the provinces, instead of bringing the fish to Gloucester and paying a duty, they can then bring them in free and will profit considerably by living nearer the fishing banks.
