## INTRODUCTION.

HIS Majefty having thought proper, to take into His Royal Confideration, the modes in which the Manual and Platoon Exercifes are at prefent performed by his Troops;-and itappearing to His Majefty, that fome alterations might be made in both, which would be productive of great utility, and advantage to His Service ;-particularly, by reducing the unneceflary length of the former;-His Majefty is therefore pleafed, hereby to recall, and cancel His former Regulations, refpecting the Manual and Platoon Exerifes, and to order that, in their ftead, the following thall be adopted, and invariably practifed in future, by His whole Army.
BY HIS MAJESTY's COMMAND,

WILIIAM FAWCETT, Adjutant General.

Adjutant General's Ofice,
April 20, 1792.

## The

## MANUAL and PLATOON EXERCISE.

## Pofition of the Soldier under Arms.

THE equal fquarenefs of the fhoulders, and body, to the front, is the firft, and great principle of the pofition of the foldier:- The neels muft be in a line, and clofed :-The knees ftraight, without fiffnefs :-The toes turned out, fo that the feet may form an angle of about 60 degrees :-The arms hang near the body, but not ftiff; the flat of the hand, and little finger, touching the thigh, and the thumbs as far back as the feams of the breeches:-The elbows and Moulders are to be kept back :-The belly rather drawn in ; and the breaft advanced, but without conftraint :-The body to be upright, but inclining rather forwards, fo that the weight of it may bear chiefly on the fore part of the feet :
-The head to be erect; and neither turned to the right, nor to the left; the eyes alone will be glanced to the right.

The body of the foldier being in this polition, the firelock is to be placed in his lefi hand, againf the fhoulder; his wrift to be a littla turned out; the thumb alone to appear in front; the four fingers to be under the butt; and the left elbory to be rather bent inwards, fo as not to be

## ［ 4 ］

Separated from the body，or to be more backward or forward than the right one：－The firelock mut reft full on the hand，not on the end of the fingers ；and be carried in fuch manner，as not to rale，advance，or keep back one fhoulder more than the other ；the butt mut therefore be for－ ward，and as low as can be permitted without conftraint；the fore part a very little before the front of the thigh；and the hind part of it preffed by the wilt againft the thigh ：－It muff be kept Steady，and firm，before the hollow of the foul－ der ；should it be drawn back or carried too high， the one fhoulder would be advanced，the other kept back，and the upper part of the body would be diftorted，and not fquare with refpect to the limbs．

## MANUAL EXERCISE．

Words of cormmanki．

Explanation．

Firing the firelock to the trail in 2 motions as
玉ッ5。
3 REEFERs． usual，feizing it at the ret at the lower loop，jut above the fuel；at the 2 d ，bring it down to the right fides，the butt within two inches of the ground；at the 3 d，drop the bute on the ground， placing the muzzle againft the hollow of the right Shoulder，and the hand flat upon the fling．
add．Fix ©．：．

At the word，fix，place the thumb of the right hand，as quick as poifible，behind the barrel，ta－ king a gripe of the firelock；as foo as the word of command is fully out，pun the firelock a lit－ the forward，at the lame time drawing out the bayonet with the left hand，and fixing it with the utmost celerity ：－The infant this is done，re－

## [5.]

turn, as quick as poffible, to the order, as above deferibed, and ftand perfectiy fteady.

As foon as the word houlder is given, take a 3 d . Shoulgripe of the firelock with the right hand, as in fix-der arms. ing bayonets, and at the laft word, arms; the firelock mult be thrown with the right hand in one motion, and with as little appearance of effort, as poffible, into its proper pofition on the lett fhoulder; -the hand croffes the body in fo doing, but muft inftantly be withdrawn.
rft. Seize the firelock with the right hand, 4 th. Preunder the guard, turning the lock to the front, fent arms. but without moving it from the fhoulder.

2d. Bring it to the poize, feizing it with the left hand, the fingers extended along the lling, the wrift upon the guard, and the point of the left thumb of equal height with the eyes.

3d. Bring down the firelock with a quick motion, as low as the right hand will admit without conftraint, drawing back the right foot at the fame inftant, fo that the hollow of it may touch the left heel.-The firelock in this polition is to be totally fupported in the left hand;-the body to reft entirely on the left foot;-both knees to be ftraight.

Ift. By a turn of the right wrift, bring the ${ }_{5} \%$. Shoulfirelock to its proper pofition on the fhoulder as der arms. defcribed above, the lefr hand grafping the butt: -2d. Quit the right hand, bringing it brikly ${ }^{2}$ Motions. down to its place by the fide.

Ift. At one motion throw the firelock from $G_{i t h}$. the fhoulder acrofs the body, to a low diagonal Charge recover, a pofition known in many regiments hy bayenef. the name of porting arms, or preparing for the 2 Motions. charge, in which the lock is to be turned to the front; and at the height of the breaf;; the:muzzleflanting upward, fo that the barrel may crofs

## $\left[\begin{array}{ll}{[ } & 6\end{array}\right]$

oppofite the point of the left houlder, with the butt proportionally depreffed: the right hand grafps the fmall of the butt, and the left holds the piece at the fwel!, clofe to the lower pipe, the thumbs of both hands pointing towards the muzzle.

2d. Make a half face to the right, and bring down the firelock to nearly a horizontal pofition, with the muzzle inclining a little upwards, and the right wrift refting againft the hollow of the thigh, juft below the hip.
N. B. The firf motion of the charge is the pofition which the foldier will, either from the thoulder, or after firing, take, in order to advance on an enemy, whom it is intended to attack with fixed bayonets; and the word of command for that purpofe is, "prepare to charge'." The fecond pofition of the charge is that which the front rank takes, when arrived at a few yards diftance only from the body to be attacked. The firf motion of the charge is alfo that which fentries are to take, when challenging any perfons who approach their polts.
7th. Shoul- I. Face to the front, and throw up the piece dir arms. into its pofition on the fhoulder, by aturn of the 2 Mations. right wrift, inftantly grafping the butt, as above deicribed, with the left hand.
II. Quit the firelock brifkly with the right hand, bringing it to its proper place by the fide.

The men muft be taught likewife : to fupport arms at three motions, throwing the firft and fecond nearly into one: at the firft motion, they feize the fmall of the butt under the lock with the right hand, bringing the butt in front of the groin, and keeping the lock fomewhat turned out : at the fecond they bring, the left arm under the cock: at the third they quit the right hand

## [7]

hand. In carrying arms from the fupport, the motions are exactly reverfed.

In marching any diftance, or in ftanding at eafe, when fupported, the men are allowed to bring their right hand acrofs the body, to the fimall of the butt, which latter muft, in that cafe, be thrown ftill more forward; the fingers of the left hand being uppermoft, mult be placed between the body, and the right elbow : the right hands are to be inftantly removed, when the divifion balts, or is ordered to dre/s by the right.

The motions in the manual exercife will, in 9 ime. future, be performed flower than heretofore, leaving three feconds between each motion, except that of fixing bayonets, in which a longer time muft be given.

The manual is not to be executed by one word, or fignal, but each feparate word of command is to be given by the officer who commands the body performing it.

In regard to the motions of fecuring, grounding, and trailing, as well as thofe of piling, 8c. it will be fufficient for the foldiers to be taught to perform them in the moft convenient, and quickeft method. Returning bayonets is to be done from the order, in the fame manner as fixing them.

The manual, and platoon exercife, will no:longer make a regular part of a review, but will only be gone through, when particularly called for by the reviewing General.

The platoon exercife is always to be done with ranks clofed, except at the drill.

Sentries pofted with fhouldered arms, are-permitted afterwards to fupport, but not to flope them.-On the approach of an officer, they immediately carry their arms; and put themfelves into their proper pofition, which is:not to be done

## $\left[\begin{array}{lll}{[8}\end{array}\right]$

at the inflant he paffes, but by the time he is within twenty yards of their poft, fo that they may be perfectly fteady, before he comes up.
Crporals.
Corporals marching with reliefs, or commanding detachments, or divifions, will carry their arms adfanced, as at prefent; for which purpofe a foldier when promoted to that rank, mult be taugh: the pofition of advanced arms.

## PLATOON EXERCISE.

## Explanation of the feveral Motions, as taught at the drill.

Explanation.

Words of command.
1/f. Make ready.

AS ufual, bringing the firelock to the recover, and inftantly cocking.

1f. Slip the left hand along the fling as far as the fwell of the firelock, and bring the piece down to the prefent, ftepping back about lix inches to the rear with the right foot.

After firing drop the firelock brikly to the 3d. Fire. priming pofition.

2d. Half cock.
4tb. Hon- Ift. Draw the cartridge from the pouch.
${ }_{\text {didge. }}^{\text {dil }}$ cart- 2 d . Bring it to the mouth, holding it bet ween the fore-finger and thumb, and bite off the top of $i$.
5tb. Prime. Ift. Shake fome powder into the pan.
2d. Shut the pan with the three laft fingers.
3d. Seize the finall of the butt with the above three fingers.
6rb. Load. Ift. Face to the left on both heels; fo that the right toe may point directly to the front, and the body

## $\left[\begin{array}{ll}{[9]}\end{array}\right.$

body be a very little faced to the left, bringing at the fame time the firelock round to the left fide without finking it. It could, in this momentary position, be almoft perpendicular (having the muzzle only a finall degree brought forward), and as foo as it is fteady there, it muff inftantly be forced down within 2 inches of the ground, the butt nearly oppofite the left heel, and the firelock itfelf fomewhat loped, and directly to the font ; the right hand at the fame infant catches the muzzle, in order to fleady it.

2d. Shake the powder into the barrel, putting in after it the paper and ball.

3d. Seize the top of the ramrod, with the forefinger and thumb.

It. Force the ramrod half out, and Seize it 7 tb. Dray $t$ ackhanded exactly in the middle.

2d. Draw it entirely out, and turning it with the whole hand and arm extended from you, put it one inch into the barrel.
rIft. Puff the ramrod down, holding it as be-Ram fore exactly in the middle, 'till the hand touches down cartthe muzzle.

2d. Slip the fore finger and thumb to the upper end, without letting the ramrod fall further into the barrel.

3d. Puff the cartridge well down to the bottom.

4th. Strike it two very quick ftrokes with the ramrod.

1it. Draw the ramrod half out, catching it otb. Rebackhanded. $\quad$ urn ram-

2d. Draw it entirely out, turning it very rods. briskly from you with the arm extended, and put it into the loops, forcing it as quick as poffible to the bottom; then face to the proper front, the finger

## [ 잉]

finger and thumb of the right hand holding the ramrod, as in the pofition immediately previous to drawing it, and the butt raifed two inches from the ground.

10 b. Sboulder arms.

Strike the top of the muzzle fmartly with the right hand, in order to fix the bayonet, and ramrod, more firmly, and at the fame time throw it nimbly up, at one motion, to the fhoulder.
N. B. Though the butts are not to come to the ground in cafting about, as accidents may happen from it, yet they are permitted, while loading, to be fo refted; but it muft be done without noife, and in a manner imperceptible in the front.

## Explanation of priming and loading QUICK.

Words of command.

1f. Bring the firelock down in one brifk motion to the priming pofition, the thumb of the Prime and right hand placed againft the pan cover, or fteel ; lsad. the fingers clenched; and the elbow alittle turned out, fo that the wrift may be clear of the cock.

2d. Open the pan, by throwing up the fteel, with a ftrong motion of the right arm, turning the elbow in, and keeping the firelock fteady in the left hand.
$3^{\text {d. }}$. Bring your hand round to the pouch, and draw out the cartridge.

The reft as above defcribed, excepting that, in the quick loading, all the motions are to be done with as much difpatch as poffible ; the foldiers taking their time, from the flugel man in front, for cafting over, and houldering only.

## Priming pafition.

In firing three deep, the priming pofition for the front rank is the height of the waiftband of
the brẹeches: for the center rank, about the middle of the fomach : and for the rear rank, clofe to the breaft : the firelock, in all thefe pofitions, is to be kept perfectly horizontal.

Explanation of the position of each RANK IN THE FIRINGS.

> Front rank, knseling.

Bring the firelock brifkly up, to the recover, Make catching it in the left hand; and, without fop-ready. ping, fink down with a quick motion upon the right knee, keeping the left foot faft, the butt end of the firelock, at the fame moment falling upon the ground; then cock, and inftantly feize the cock and fteel together in the right hand, holding the piece firm in the left, about the middle of that part which is between the lock and the fwell of the flock : the point of the left thumb, to be clofe to the fwell and pointing upwards.

As the body is finking, the right knee is to be thrown fo far back, that the left leg may be right up and down, the right foot a little turned out, the body ftraight, and the head as much up, as if thouldered; the firelock muft be upright, and the butt about four inches to the right of the infide of the left foot.

Bring the firelock down firmly to the prefent, Prefent. by diding the left hand, to the full extent of the arm, along the ning, without letting the motion tell ;-the right hand at the fame time fpringing up the butt by the cock fo high againft the right choulder, that the head may not be too much lowered in taking aim; the right cheek to be clofe
elofe to the butt ; the left eye chut, and the middle finger of the right hand on the trigger, look along the barrel with the right eye from the breech pin to the muzzle, and remain fteady.

Pull the trigger ftrong with the middle finger, and as foon as fired, fring up nimbly upon the left leg, keeping the body erect and the left foot faft, and bringing the right heel to the hollow of the left; at the fame initant drop the firelock to the priming pofition the height of the waiftband of the breeches; half cock; bandle cartridge, and go on with the loading motions, as before defrribed.

## Center Rank.

Sake ready.

Prefent.
Fire.

Spring the firelock brifkly to the recover; as foon as the left hand feizes the firelock above the lock, raife the sight elbow a little, placing the thumb of that hand upon the cock, with the fingers open on the plate of the lock, and then, as quick as poffible, cock the piece, by dropping the elbow, and forcing down the cock with the thumb, ftep at the fame time with the right foot a moderate pace to the right, and keeping the left faft, feize the fmall of the butt, with the right hand: The piece muft be held in this pofition perpendicular, and oppofite the left fide of the face, the butt clofe to the breaft, but not preffed, the body ftraight, and full to the front, and the head erect.

As in the foregoing explanation for the front rank.

Pull the trigger Arong with the middle finger, and, as foon as fired, bring the firelock to the priming pofition, about the height of the fomach;

## $[13]$

mach ; the reft, as in explanation of priming and loading - with this difference only, that the left foot is to be drawn up to the right, at the fame time that the firelock is brought down to the priming pofition ; and that, immediately after the firelock is thrown up to the fhoulder, the men fpring to the left again, and cover their file leaders.

## Rear Rank.

Recover and cock, as before directed for the Make centre rank, and as the firelock is brought to the ready. recover, ftep brifkly to the right a fuli pace, at the fame time placing the left heel about lix inches before the point of the right foot. - The body to be kept ftraight, and as fquare to the front as poffible.

As in explanation for the center rank. Preforto
As in explanation for the center rank, remem- Fire. bering only the difference of the priming pofition for this rank, as before defcribed; after firing, and fhouldering, the men ftep, as. the center rank does.

In firing with the front rank ftanding, that rank makes ready, \&ic. as fpecified in the article relative to the platoon exercife.
N. B. In giving words of command, as wellofficers. in as out of the ranks, officers are to fland perfectly fteady, and in their proper pofition ; their fwords heid firmly in the fult of the right hand, with the upper part of the blade refting againtt The fhoulder, the right wrift againft the hip, and the elbow drawn back.

## $\left[\begin{array}{ll}14\end{array}\right]$

## Firing ky Platoons.

The officers, inftead of giving the words, platoons, make ready, prefent, fire, are to prononce the words hort, as for instance, town, ready, pent, fire.

In firing by platoons, or divifions, the offceres commanding them are to flop out one pace, on the clone of the preparative, and face to the left towards their men: They there land perfeatly fteady till the left part of the general, when they ftep back again into their proper inservals, all at the fame time. After a divifion has fired, the right hand man of it deeps out one pace, in front of the officer, but fill keeping his own proper front, and gives the time for caffing about, and Mouldering, after which he falls back again into his place in the front rank.

The flugel man of a battalion, is a' fo to keep his front, in giving the time of exercife.

In firing by grand divifions, the center officen falls back, on the preparative, into the fourth rank; and is replaced by the covering -ierjeant.

# RULESAndREGULATIONS 

FOR THE

# FORMATIONS, FIELD EXERCISE, and MOVEMENTS, 

0

HIS MAJESTY'S FORCES.

> Adjutant General's Cfice, April 20, 1792.

HIS Majesty thinking it highly expedient, and neceffary, for the benefit of his fervice at large, that one uniform fyitem of fieldexercife, and movement, founded on juft, and true principles, fhould be eftablifhed, and invariably practifed throughout his whole army, is therefore pleafed to direct, that the rules, and regulations, approved of by his Majesty, for this important purpofe, and now publifhed herewith, fhall be ftrictly followed and adhered to, without any deviation whatfoever therefrom: And fuch orders before given, as may be found to interfere with, or counteract; their effect and operation, are to be confidered as hereby cancclled, and annulled. It is his Majesty's farther pleafure, that the General Officers appointed to review his troops, fhall be inftructed to pay particular attention to the performance of every part of thefe Regulations, and to report their obfervations thereupon, for his Majesty's information, fo that the exact uniformity required in all movements may be attained and preferved, and his Royal intentions thereby carried into full efrect.

By His Majesty's Command.

## WILLIAM FAWCETT, ADJUTANT GENERAL.

## INTRODUCTION.

THE great objeet in view from the fe regulations, is to eltablifh one general and juft fyitem of movement; which directing and governing the operations of great, as well as of fmall bodies of troops, is to be rigidly conformed to, and practifed by every regiment in his Majesty's fervice. - The important purpofes of this fyftem are to reconcile celerity with order; -to prevent hurry, which mult always produce confufion, lofs of time, unfteadinefs, irrefolution, inattention to conmand, \&c.-to enfure precifion and correctuefs, by which alone great bodies will be able to arrive at their object in good order, and in the fhorteit face of time; to inculcate and enforce the indifpenfable neceifity of military dependance, and of mutual effort, and fupport, in action, which are the great ends of difcipline; -to fimplify the execution, and to abridge the variety of novements, as much as poflible, by adopting fuch only as are neceffary for combined exertions in corps, and that can be required, or applied in fervice, regarding all matters of parade, and inow, merely as fecondary objects ;-to arcertain to all ranks, the part each will have to act, in every change of fituation that can happen, fo that explanation may not retard, at a moment when execution hould take place;---to enable the commanding officer of any body of troops whether great or inail, to retain the whole re-

## [ iv ]

latively as it were, in his hand and management, at every initant; fo as to be capable of reftraining, at all times, the bad effects of fuch ideas of irdependent and individual exertion, as are vifionary and huitful; and of directing them to their true and proper objects;-thofe of order, of combined effort, and of regulated obedience, by the united force of all which, a well difciflined enemy can only be defeated.

To attain thele effential ends, no extraordinary alterations will be required; nor any thing farcher enjoined than a ftrict obfervance of the the rules hereafter laid down, and a dereliction of fuch practices as would counteract them.

Thefe rules will be found few, fimple, and adapted to the underitanding, and comprehenfion, of every individual; but they will require perfect attention in all ranks:-In the foldier, an equal and cadenced march, acquired and confirmed by habit, independent of mufic, or found : -In the oficer, precifion, and energy of command; the prefervation of juft diftances ; and the accurate leading of divifions, on given points of march, and formation :-Thefe circumitances, together with the united exertions of all, will foon attain that precifion of movement, which is fo effential, and without which, valour alone will not avail.

## [ v ]

Thefe Regulations are divided into parts; and each part fabdivided iato various articlès" of explanation.

$$

## PARTI.

## Instruction of the Recruit.

THE feveral heads of inftruction for recruits are to be attended to, and followed, in the manner and order here fet forth. It requires in the inftructors to whom this duty is entrufted, and who are to be anfwerable for the execution of it, the moft unremitting perfeverance, an accurate knowledge of the part each has to teach, and a clear and concife manner of conveying his inftructions; but with a firmnefs that will command from men a perfect attention to the directions he is giving them.-He muft allow for the weak capacity of the recruit; be patient, not rigorous, where endeavour and good will are evidently not wanting; quicknefs is not at firft to be required, it is the refult of much practice. If officers and inftructors are not critically exact in meir own commands, and in obferving the exegution of what is required from others, flovenligefs muft take place, labour be ineffectual, and he end propofed will never be attained.

The recruit muft be carried on progreffively; We fhould comprehend one thing before he proaeds to another. -In the firlt circumitances of paftion; firelock, fingers, elbows, \&c. are to Ee juftly placed by the inftructor; when recruits

## $\left[\begin{array}{ll}{[ } & \text { ] }\end{array}\right.$

are more advanced, they fhould not be touched; but from the example !hown, and the directions prefcribed, be taught to correct themfelves when fo admonifhed. Recruits thould not be kept too long at any particular part of their exercife, fo as to fatigue or make them unealy; and marching without arms. hould be much intermixed with the firelock inftruction.-Fife, or mufic, muft on no account be ufed; but the recruit is to be confirmed by habit alone in that cadence of ftep which he is afterwards to maintain in his march to the enemy, in fite of every variety of noife and circuinftance, that may tend to derange him.

In the manner hereafter preferibed, muft each recruit be trained fingly, and in fquad; nor until he is fteadied in thefe, and in other points of his duty, is he to be allowed to join the battalion; for one auk ward man, imperfect in his march, or whofe perfon is diftorted, will derange his divifion, and of courrfe operate on the battalion and line, in a ftill more confequential manner. -Every foldier on his return from long abfence, muft be redrilled before he is permitted to act in the ranks of his company.

Remarks upon the neceffity, utility, or application, of what is hereafter prefcribed, are as much as poffible avoided in the firft and fecond parts : fuch remarks properly belong to the third; or battalion part, with the principles of whofe movements it muft be fuppofed an inftructor is fufficiently acquainted.

## [ 3 ]

## WITHOUT ARMS.

## S. 1.

## Poftion of the Soldier.

THE equal \{quarenefs of the fhoulders and body to the front is the firf and great principle of the pofition of a foldier.-The beels mult be in a line, and clofed.-Tie knees ftraight, without fiffnefs.-The toes a little turned out, fo that the feet may form an angle of about 60 degrees.- Let the arms hang near the body, but not Itiff, the flat part of the hand and little finger touching the thigh; the thumbs as far back as the feams of the breeches; - The elbows and houlders to be-kept back; -the belly rather drawn in, and the breaft advanced, but without conftraint; -the body upright, but inelining forward, fo that the weight of it principally bears on the fore part of the feet;-the head to be erect, and neither turned to the right nor left.

The pofition in which a foldier fhould move, determines that in which he fhould fiand fill.Toomany methods cannot be ufed to fupple the recruit, and banifh the air of the ruftic.-Bue that excefs of fetting up, which fiffens the perfon, and tends to throw the body backward inftead of forward, is contrary to every true principle of movement, and muit therefore be moit lcarefully avoided.

## $\left[\begin{array}{ll}-4 & 1\end{array}\right.$

The words on the margin, which are printed in Italics, are the words of command to be given by the inftructor.

## S. JI.

## Standing at Eafe.

Commands given by the inEructor.

Staná at E.jo.

Attention.

0$N$ the words Stand at Eafe, the right foot is to be drawn back about fix Inches, and the greatelt part of the weight of the body brought upon it; the left knee a little bent; the hands brought together before the body; but the ihoulders to be kept back, and fquare; the head to the front, and the whole attitude without conftraint.

On the word, Altention, the hands are to fall fmartly down the outfide of the thighs; the right heel to be brought up in a line with the left; and the proper unconftrained pofition of a foldier immediately refumed.

When ftanding at eafe for any confiderable time in cold weather, the men may be permitted, by command, to move their limbs'; but without quitting their ground, fo that upon the word fittention, no one flall have materially loit his drefing in the line.

## S. III.

$3<2 d$. Raife the toes, and turn to the right about on both heels.

3d. Bring the right foot fmartly back in a line with the left.

1ft. Place the right beel againft the ball of the left foot, keeping the fhoulders fquare to the front.
To the Lefi 3 about-face.

2d. Raife the toes, and turn to the left about on both heels.
$3^{\text {d. . Bring up the right foot finartly in a }}$ line with the left.
The greateft precifion muft be obferved in thefe facings, for if they are not exactly executed, a body of men, after being properly dreffed, will lofe their drefing, on every fmall movemeat of facing.

## S. V.

## Pcgition in Marcbing.

AFarcb.

IN marching, the foldier muft maintain, as much as pollible, the pofition of the body as tarected in Sect. I. He mult be well balanced on his limbs. His arms and hands, without ftiffnefs, mult be kept fteady by his fides, and, not fuffered to vibrate. He muft not be allowed to ftoop forward, ftill lefs to lean back. His body muit be kept quare to the front, and thrown rather more forward in marching than when halted, that it may accompany the movement of the leg and thigh, which movement mult foring from

## [ 7 ]

from the Haunch. The ham muft be fretcheds but without fliffening the knee. The toe a little pointed, and kept near the ground; fo that the fhoe-foles may not be vifible to a perfon in front. The head to be kept well up, ftraight to the front, and the eyes not fuffered to be calt down. The foot, without being drawn back, muft be placed flat on the ground.

## S, VI.

## Ordinary Step.

THE Length of each pace, from heel to heel, is 30 inches, and the recruit mult be taughe to take 75 of thefe fteps in a minute, without tottering, and with perfect fteadinefs.

The-ordinary ftep being the pace on all occalions whatever, unlefs greater celerity be particularly ordered, the recruit mult be carefully trained, and thoroughly intructed in this moft effential part of his duty, and perfectly made to underfand, that he is to maintain it for a long period of time together, both in line and in column, and in rough as well as finooth ground; which he may be required to march over. This is the noweft ftep which a recruit is taught, and is alfo applied in all movements of parade.

## S. VII.

## The Halt.

0N the word Halt, let the rear foot be Hals, brought upon a line with the advanced
one, fo as to finifi the flep which was taking when the command was given.

## S. VIII.

## Oblique Step.

WHEN the recruit has acquired the regular length and cadence of the ordinary pace, he is to be taught the oblique ftep. At $T_{o}$ the Left, the words, To the Left, Oblique - March, without altering his perfonal fquarenefs of pofition, he March. will, when he is to ftep with his left foot, point, and carry it forward 19 inches, in the diagonal line, to the left, which gives about 13 inches to the fide, and about 13 inches to the front. On the word Two, he will bring his right foot 30 inches forward, fo that the right heel be placed 13 inches directly before the left one. In this potition he will paufe, and on the word $\mathcal{T}$ wo, continue to march, as before directed, by advancing his left foot 30 inches, paufing at each hep till confirmed in his pofition; it being effentially neceffary to take the greateft care that his fhouiders be preferved fquare to the front. From the combination of thefe two movements, the general obliquity gained will amount to an angle of about 25 degrees. When the recruit is habituated to the lengths and directions of the ftep, he muft be made to continue the march, without paufing, with firmnefs, and in the cadence of the ordinary pace, viz. 75 fteps in the minate.

As all marching (the fide-ftep excepted) invariably begins with the left foot, wherher the obliquing
obliquing commences from the halt, or on the march, the firft diagonal ftep taken is by the leading foot of the fide inclined to, when it comes to its turn, after the command is pronounced.

The fquarenefs of the perfon, and the habitua! cadenced ftep, in confequence, are the great directions of the oblique, as well as of the direct march.

Each recruit hould be feparately and carefully inftructed in the principles of the foregoing eight fections of the drill. They form the bafis of all military movements.

Three or four recruits will now be formed in one rank, at very open files, and inftructed as follows.

## S. IX.

## Dreflang when Halted.

DRESSING is to be taught equally by the Drefs. left as by the right. On the word Drefs, each individual will caft his eyes to the point to which he is ordered to drefs, with the fmalleft turn poffible of the head, but preferving the Choulders and body fquare to their front. The whole perfon of the man muft move as may be neceffary, and bending backward or forward is not to be permitted. He muft take fhort, quick fteps, thereby gradually and exactly to gain his pofition, and on no account be fuffered to attempt it by any fudden or violent alteration, which muft infallibly derange whatever is beyond him. The faces of the men, and not their brealts or feet, are the line of dreffing. Each man is to be able juft
juft to diftinguifh the lower part of the face of the fecond Man beyond him.

In dieffing, the eyes of the men are always: turned to the Officer, who gives the word Drefs; and who is poited at the point by which the body haltis; and who from that point corrects his men, on a point at, or beyond, his oppofite flank.

The faults to be avoided, and generally committed by the foldier in drefiing, are, paffing the line; the head forward; and body kept back; the fhoulders not fquare; the head turned too much,

Two, or more men, being moved forward, or backward, a given number of paces, and placed in the new line, and direction, the following commands will be given.

By the Right. forward-Drefs.
By the Right, backward-Drefs.
By the Left, forivard-Drefs.
By the Left, backward-Drefs.
As foon as the dreffing is accomplified, the words, Eyes Front, will be given, that heads may be replaced; and remain fquare to the front.

No rank, or body, ought ever to be dreffed, without the perfon on its flank appointed to drefs it, determining, or at leaft fuppofing, a line, on which the rank, or body, is to be formed, and for that purpofe taking as his object the dittant flank man, or a point beyond fuch flank, or a man thrown out on purpofe;-dreffing mult then be made gradually, and progreffively, from the fixed point, towards the diftant flank one ; and:each man fucceffively, but quickly, muft be brought up into the true line, fo as to become a new point, from whence the perfon directing proceeds in the correction of the others; and he himfelf, when fo directing, mult take care, that

## [ 11 ]

his perfon, or his eyes at leaft, be in the true line, which he is then giving.

## S. X.

## Stepping out.

THE fquad marches as already directed in Stop out. ordinary time. On the word Acp out, the recruit mult be taught to lengthen his ftep to 33 inches, by leaning forward a little, but without altering the cadence.

This ftep is neceffary when a temporary exertion in line, and to the front, is required ; or when the rear divifions of a column, are to move up into line with the leading ones, and is applied both to ordinary, and quick time.

## S. XI.

## Mark Time.

ON the word, Mark Time, the Foot then advancing compleats. its : pace; after Time. $_{\text {Mark }}$ which the cadence is continued, without gaining any ground, but alternately-throwing out the foot, and bringing it back fquare with the other. At the word Ordinary Step, the ufual Ordinary pace of 30 inches will be taken.

This ftep is neceffary marching in line, when any particular battalion is adyanced, and has: to wait for the coming up of ochers.

## [ 12 ]

## S. XII.

## Stepping Short.

Step Short.

ON the word, Step Short, the foot advancing will finish its pace, and afterwards each recruit will ftep as far as the ball of his toe, and

Ordinary
Step. no farther, until the word, Ordinary Step, be given, when the usual pace of $30^{\circ}$ inches is to be taken.

This Hep is useful when a momentary retardment of either a battalion in line, or of a divifion in column, shall be required.

## S. XIII.

## Changing the Feet.

Change $T$ change the feet in marching, the adFact. .
vancing foot compleats its pace, and the ball of the other is brought up quickly to the heel of the advanced one, which inftantly makes another ftep forward, fo that the cadence may not be loft.

This may be required of an individual, who is ftepping with a different foot from the $=\mathrm{ft}$ of his divifion; in doing which he will in fact take two fucceffive flaps, with the fame foot.

## S. XIV.

## The Side or Clofing Step.

THE fide ftep is performed from the halt in ordinary time, by the following commands.

## $\left[\begin{array}{ll}{[3}\end{array}\right]$

Clofo to the Right (a caution)-March.
Clofe to the Left (a caution)-March.
In cloling to the right, on the word, March, Clofe to the byes are turned to the right, and each man car- $R_{i g} h t$, fes his right foot about 12 inches directly to his March. Wight (or if the files are clofed, to his neighbour's Bft foot), and inftantly brings up his left foot, Ill the heel touches his right heel; he then pauEs; fo as to perform this movernent in ordinary Wine, and procceds to take the next ftep in the anie manner; the whole with perfect precifion osf time, fhoulders kept fquare, knees not bent, and in the true line on which the body is formed. - At the word, Halt, the whole halt turn their Halt. eyes to the front, and are perifctly fteady. (V.S. XLIII.)

> S. XV.

Beck Step.

THE BACK Step is performed in the ordinary time and length of pace, from: the hatt, on the command Step back, Titarich, -The Stic tack, recruit muft be taught to move ftraight to the ${ }^{\text {Rawcb. }}$ kear, preferying his fhoulders fquare to the fron; and his bodyerect. -On the word, Halt, the foot Hait. Mi front muft be brought back fquare with the Ether.

A few paces only of the back ftep can be nebeffary at a time:

THE cadence of the ordinary pace having become perfectly habitual to the recruits, they are now to be taught to march a quick time, which is 108 fteps in the minute, each of 30 inches, making 270 feet in a minute.-The

Q:ick, March. command Quick, March, being given with a paufe between them ; the word, $2 u i c k$, is to be confidered as a caution, and the whole to remain perfectly ftill, and fteady; on the word March, they ftep off with the left feet, keeping the body in the fame polture, and the fhoulders fquare to the front; the foot to be lifted off the ground, that it may clear any ftones, or otherimpediments in the way, and to be thrown forward, and placed firm ; the whole of the fole to touch the ground, and not the heel alone; the knees are not to be bent, neither are they to be fliffened, fo as to occafion fatigue, or conftraint. -The arms to hang with eafe down the outfide of the thigh ; a fmall motion to prevent conftraint may be permitted; but not to fwing out, and thereby occafion the leaft turn, or movement of the fhoulder ; the head is to be kept to the front, the body well up, and the utmoft feadinefs to be preferved.

This is the pace to be ufed in all flings of divifions from line into column, or from column into line ; and by battalion columns of manœuvre, when independantly changing pofition. -It may occafionally be ufed in the column of march of fmall bodies, when the route is finooth, and no obftacles occur; but in the march in line of a confiderable body it is not to be required,

## [ 15 ]

quired, and very feldom in a column of manoeuvre; otherwife fatigue mult arife to the foldier, and more time will be loft by hurry and inaccuracy, then is attempted to be gained by quicknefs.

The word March, given fingly, at āll times denotes that ordinary time is to be taken; when the quick march is meant, that word will precede the other. The word March marks the ben ginning of movements from the balt ; but is not given when the body is in previous motion.

## S. XVII.

## The Quickeft Step.

THE quickeft time or wheeling march, is 320 fteps of 30 inches each, or 300 teet in the minute. The directions already given for the march in quick time relate equally to the march in quickeft time.

This is applied chiefly to the purpofe of wheeling, and is the rate at which all bodies accompliif their wheels, the outward file Atepping 33 inches, whether the wheel is from line into column, during the match in column, or from column intaline. In this time alio thould divifions double, and move up, when paffing obftacles in line, or when in the column of march, the front of divifions is encreafed, or diminifhed.

Three or four eecruits in one rank, with intervals of 12 inches between them, fhould be practifed in the different fleps; that they may acguire a firmnefs and independence of movegnent.

Many different times of march muft not be required of the foldier.- Thefe three mult fuffice, ordinary time ( 75 fteps in the minute), Quick sime ( 108 in the minute), wheeling, OR Quickest rime ( 120 in the minute).

Plummets, which vibrate the required times of march in a minute, are of great utility, and can alone prevent or correct uncertainty of movement ; they mult be in the poffeffion of, and conftantly referred to, by each inftructor of a fquad,-the feveral lengths of plummets fwinging the times of the different marches in a minute are as follows :

A mufket ball fufpended by a fring which is not fubject to ftretch, and on which are marked the different required lengths, will anfwer the above purpofe, is eafily acquired, and chould be frequently compared with an accurate ftandard in the adjutant's, or ferjeant-major's poffeffion.

Accurate diftances of Aeps mult alfo be marked out on the ground, along which the foldier fhould be practifed to march, and thereby acquire the juit length of each.

Six or eight recruits will now be formed in a rank, at clofe files, having a fteady, well-drilled foidier on their flank to lead, and FILE MARCH: ing may be taught them.

## S. XVIII.

## File Marcbing.

THE recruits mult firt face, and then be in frructed to cover each other exaitly if

## $\left[\begin{array}{ll}{[17}\end{array}\right]$

file, fo that the head of the manimmediately be- $\tau$ toto fore, may conceal the heads of all the otners infaci. his front. - The ftricteft obfervance of all the rules for marching is particularly neceffary in marching by files, which is firft to be taught at the ordinary time, and afterwards in quick time.

On the word March, the whole are immedi- March. ately to ftep off together, gaining at the very firit ftep 30 inches, and fo continuing each ftep without encreafing the diffance betwixt each recruit, every man locking or placing his advanced foot on the ground, before the fpot from whence his preceding man had taken up his, - no looking down, nor leaning backward is to be fuffered on any pretence whatever, - the feader is to be directed to march ftraight forward, to fome diftant object given him for that purpole, and the recruits made to cover one aintherduring the march, with the moft fcrupulous exactneis, great attention muft be paid to prevent them from marching with their $k$ nees bent, which they will be very apt to do at firft, from an apprehenfion of treading upon the heels of thofe before them.

## S. XIX.

Wheeling of a Jingle Rank in ordinary Time, from the Halt.

AT the word, To the Right wheei, the man Right on the right of the rank faces to the right; whet, on the word Maroh, they ftep off together, the Marib. whole turning their eyes to the left (the wheeling flank), except the man on the left of the rank, whe looks inwards; and, during the wheel,

## $\left[\begin{array}{lll}{[88}\end{array}\right]$

becomes a kind of bafe line, for the others to conform to, and maintain the uniformity of front. -The outward wheeling man always lengthens his ftep to 33 inches, -the whole oblerve the fame time, but each man fhortening his ftep, in proportion as he is nearer to the ftanding flank on which the wheel is made,-during the wheel, the whole remain clofed to the ftanding flank; that is, they touch, without incommoding their neighbour ; nor muft they ftoop forward, but remain upright,-opening out from the ftanding flank, is to be avoided; clofing in upon it, during the wheel, is to be refifted.-On the word Halt, Drefs, each man halts immediately, without jumping forward, or making any falfe movements.

When the recruits are able to perform the wheel with accuracy in the ordinary time, they muft be practifed in wheeling in quickeft time.

Nothing will tend fooner to enable the recruit to acquire the proper length of ftep, according to his diftance from the pivot, than continuing the wheel without halting for feveral revolutions of the circle.

## S. XX.

Wheeling of a fingle Rank, from the March.

THE recruits are firft to be taught to p :rform this wheeling at the ordinary time, and afterwards in the quickeft, or proper wheeling time,-the rank, marching to the front at the ordinary time, receives the word of command, Right, Wheel, the man on the right of the rank inftantly
inftantly halts, and faces to his right; the reft of the rank, turning their eyes to the wheeling flank (as directed in the preceding fection), immediately change the ftep together to wheeling timer, as foon as the portion of the circle to be wheeled is completed, the words Halt, Drefs, Halk, will be given, (a paufe of 2 or 3 feconds may Derf. be made), and then, March, on which the whole Marcb. sank fteps off together at the ordinary time.

## S. XXI.

## Wheeling Backwards, a fingle Rank.

AT the word, On your Right backwards, on tbe Wheel, the man on the right of the rank faces to the left ; at the word, March, the whole wobel. ftep backward in wheeling time, dreffing by the Marcb. outward wheeling man, thofe neareft the pivot man making their fteps extremely fmall, and thofe towards the wheeling man encreafing them as they are placed nearer to him. The recruit in this wheel mult not bend forward, nor be fuffered to look down; but by cafting his eyes to the wheeling flank, preferve the dreffing of the rank. On the word, Halt, the whole remain Halt. perfectly fteady, ftill looking to the wheeling flank till they receive the word, Right Drefs. Rigbt,

The recruits fhould be firlt practifed to wheel $D$ refs. backwards at the ordinary ftep; and at all times it will be neceffary to prevent them from hurrying the pace; an error foldiers are very liable to fall into, particularly in wheeling backwards; where large bodies wheel from line into column, this wheeling is neceffary to preferve the covering

## [ 20 ]

vering of pivot flanks, and the diftances of the divifions, which the line has broken into.

## S. XXII.

## Wheeling of a fingle Rank, on a nioveable Pivot.

IN wheeling on a moveable pivot, both flanks are moveable, and defcribe concentric circles, round a point, which is removed a few paces from what would otherwife be the ftanding flank; and eyes are all turned towards the directing pivot man, whether he is on the outward Hank, or on the flank wheeled to.

Rigbt Soulde: s. forward.

When the wheel is to be made to the directing pivot flank, (fuppofe the left)---the rank marching at the ordinary pace, receives the word, Right Shoulders forward; on which the pivot man, without altering either the time or length of his pace, continues his march on the circumference of the leffer circle, and, tracing out a confiderable arch, on the principle of dreffing, gradually brings round his rank to the direction required, without obliging the other fiank, which is defcribing the circumference of a larger circle, to too great hurry ;-on the
Forwaza. word, Forward, fhoulders are fquared, and the pivot marctes direct to his front.

When the directing pivot is on the outward flank, and has to defcribe the circumference of Left Boul-the larger circle, on the word, L\&ft Boulders, ders for- forward, he will, without changing the: time, or length of his pace, gradually bring round the rank to the required direction, fo as to enable

## [ 21 ]

the inward flank to defcribe a fimilar arc of a leffer circle, concentric to the one he himfelf is moving on.-During both thefe wheels, the rank dreffes to the proper pivot, and when he defcribes the funaller circle of the wheel, the ocher flaink, which has more ground te go over, will quicken its march, and ftep out.-When the pivot defcribes the greatet circle of the wheel, the other flank, which haslefs ground to go over, will ftep fhorter, and gradually conform.- In the firft cafe, the recruit muit be cautioned againft opening out from the pivot; and, in the latter, from crowding on him.

The juft performance of this mode of wheel. ing depends fo much on the directing pivot, that a well-drilled foldier fhould, at firft, be placed on the flank named, as the proper pivot, and changed occafionally.-It is ufed, when a coJumn of march (in order to follow the windings of its route), changes its direction, in general, lefs than the quarter circle.

## WITHARMS.

## S. XXIII.

## Pofition of the Soldier.

wHEN the firelock is given, and is thoul. dered, the perfon of the foldier remains in the pofition defcribed (Section.I.) except, that

## [ 22 ]

that the writt of the left hand is turned out, the better to embrace the butt, the thumb alone is to appear in front, the four fingers to be under the butt, the left elbow is a little bent inwards; without being feparated from the body, or being more back ward or forward than the right one.The firelock is placed in the band, not on the middle of the fingers, and carried in fuch manner, that it fhall not raife, advance or keep back; one fhoulder more than the orher; the butt mult therefore be forward, and as low as can be permitted without conftraint; the fore part nearly even with that of the thigh, and the hind part of it preffed by the wrift againft the thigh ; the piece muft be kept fteady and firm before the hollow of the fhoulder; fhould the firelock be drawn back or attempted to be carried high, in that cafe, one fhoulder will be advanced, the otherkept back, and the upper part of the body diftorted, and not placed fquare with refpect to the limbs.

Each recruit muit be feparately taught the pofition of fhouldered arms, and not allowed to proceed until he has acquired it.

## S. XXIV.

## Diferent Motions of the Firelock.

THE following motions of the firelock will be taught and practifed as here fet down, until each recruit is perfect in them; thềy being neceffary for the eafe of the foldier in the courfe of exercife.

#### Abstract

23 ] Supporting arms. Carrying arms. As mentioned Ordering, at ealed arms. in the fire- Standing at eafe. lock exer- Attention. cife.

Trailing arms. Shouldering from the trail.

Thefe motions are neceflary for the eafe of the foldier in the courfe of exercife:

The recruit mult be accuftomed to carry his arms for a confiderable time together; it is moft effential he fhould do fo, and not be allowed to fupport them fo often as is practifed; under the idea that long carrying them is a polition of too much conftraint.

## S. XXV.

## Attention in forming the Squad.

wHEN the SQUAD or divifion (confifting of from fix to eight files) is ordered to fall in, each man with carried arms, will as quick Fall in. as poffible take his place ir his rank, beginning from the flank, to which he is ordered to form ; he will drels himfelf in line by the rule already given ; affume the ordered pofition of a foldier, and ftand perfectly ftill, and feady, until ordered to ftand at eafe, or that fome other command be given him.-Attention mult be paid, that the files are correctly clofe; that the men in the rear ranks cover well, looking their file leaders in the middle of the neck;-That the ranks have their proper diftance of one pace ( 30 inches)
from each other ; - That all the ranks are equally well dreffed;-That the men do not turn their heads to the right, or left ; and that each man has the proper unconffrained attitude of a foldier.

## S. XXVI.

Open Order.

THE recruits being formed in three ranks at clofe order, on the word, Rear ranks Rear take open order, the flank men, on the right and ranks sake left of the centre, and rear ranks, ftep brikly back, one and two paces refpectively, face to their right, and ftand covered, to mark the ground on which each rank is to halt, and drefs at open order ; every other individual remains ready to move.-On the word, March; the March. dreffers front, and the center and rear ranks fall back one and two paces, each dreffing by the right, the initant it arrives on the ground.

## S. XXVII.

## Clofe Order.

ON the word, Rear ranks take clofe order, the Rear whole remain perfectly fteady; at the rarks take word, March, the ranks clofe within one pace, Míai erder marching one and two paces, and then halting.

## S. XXXI.

Marching to the Front, and Rear.

THE fquad, or divifion, is to be particularly well dreffed; files correct ; arms carried; pe rear ranks covering exactly, and each indiGdual to have his juft attitude, and pofition, beE fore

## $\left[\begin{array}{ll}26 & \\ & 2\end{array}\right]$

fore the fquad is ordered to move. - The march will be made by the right or left flank, and a proper trained man will therefore conduct it. -

Caution. Märck. The word, Squad, or Divijion, may be given as a caution; and at the word, March, each man fteps forward a full pace.-The recruit muft net turn his head to the hand to which he is dreffing, as a turning of the fhoulders would undoubtedly follow.-His elbows muft be kept fteady, without conftraint ; if they are opened from his bo$d y$, the next man muit be preffed upon ; if they are clofed, there arifes an improper diftance which muft be filled up; in either cafe waving on the march will take place, and muft therefore be avoided.

The going to the right or left about, in march, is not to be at firf practifed; but the fquad is to bait, front by command, and then march.

As the being able to march ftraight forward is of the utmoft confequence, he who commands at the drill, will take the greateft pains in making his fquad do fo ;-For this purpofe he will often go behind his fquad, or divifon, place himfolf behind the flank file by which the fquad is to move in marching, and take a point, or object, exactly in front of that file; he will then command, March, and remaining in his place; he will direct the advance of the fquad, by keeping the flank file always in a line with the object.-It is alfo from behind, that one foone $\mathfrak{A}^{-}$perceives the leaning back of the foldier, and the bringing forward or falling back of a houlder; faults which ought inftantly to be rectified, as productive of the worft confequence in a line, where oneman, by bringing forward a fhoulder, may change the direction of the march, and oblige the wing of a battalion to run, in order to keep dreffed.

In fhort, it is impofible to labour too much, at making the foldier march ftraight forward, keeping always the fame front as when he,fet off.-This is effected by moving folely from the haunches, keeping the body fteady; the fhoulders fquare, and the head to the front ; and will without difficulty be attained, by a frict attention to the rules given for marching, and a careful obfervance of an equal length of ftep, and an equal cadence, or time of march.

Changing from ordinary to quick time, and from quick to ordinary time, mult always be preceded by a previous, but inftantaneous, halt : although this may not appear effential for the movements of a fquad, divifion, or battalion, it is abfolutely fo for thofe of a larger body, and is therefore required in finall ones.

Turning on the march, in order to continue it, though inaccurate, and improper, for a large body, is necenny, and mein often be allowed, in the movements of fmall divifions in file, or front, when connected with others in line, or column.

As helps for fixing the true time, or cadence of the march, the plummet muft: be frequently reforted to; the words, left, right, may when neceffary be repeated flowly for ordinary time, and quicker for quick time. - Strong taps of the drum, if in juft time, and regulated by the plummet, may be allowed to be given immediately before the word, March, thereby to imprint the required meafure on the mind of the recruit ; but they are on no account, or in any fituation, to be given during the march.

## [ 28 ]

## S. XXXII.

## Open, and Clofe Order, on the March.

THE fquad, when moving to the front in ordinary time, receives the word, Rear ranks take open order, on which the front rank continues its march, without altering the pace; and the center, and rear ranks, mark the time, viz. the center once; and fteps off at the fecond ftep; the rear rank ftepping off on the third pace.

Rear
ranks take rioje arder.

On the word Rear ranks take clofe, order, the center, and rear ranks, ftep nimbly up to clofe order, and inftantly refumenthe pace, at which the front rank has continued to march.

## S. XXXIII.

## Marcb in File to a Flank.

THE accuracy of the march in file is fo effential in all deployments into line, and in the internal movements of the divifions of the batialion, that the foldier cannot be too much exercifed to it. - The whole battalion, as well as its divifions, is required to make this flank movement, without the leaft apening out, or lengthening of the file, and in perfect cadence, and equality of ftep.
Tothe - After facing, and at the word, March, the face. Marci'. whole fquad fteps off at the fame inftant, each replacing, or rather over-ftepping the fout of the man before him ; that is, the right foot of the fecond man comes within the left foot of the firft,

## $\left[\begin{array}{ll}{\left[\begin{array}{ll}\text { 2 }\end{array}\right]}\end{array}\right.$

and thus of every one, more or lef over-lapping, according to the clofenefs, or opennefs of the files, and the length of fep. -The front rank will march ftraight along the given line, each foldier of that rank muft loök along the necks of thofe before him, and never to right, or left ; otherwife a waving of the march will take place, and of courfe the lofs, and extenfion of line, and diftance, whenever the body returns to its proper front.-The center and rear ranks muft look to, and regulate themfelves by, their leaders of the front rank, and always drefs in their file.Although file marching is in gerieral made in quick time ; yet it muft alfo te practifed, and made in ordinary time. The faine pofition of feet, as above, takes place in all marching in front, where the ranks are clofe, and tocked up.

With a little attention and practice this mode of marcling, which appears fo difficutt, will be found by every foldier to be eafier thain the common method of marching by files, whien on every halt the rear mutt run up to gain the ground it thas unneceffarily loft.

## S. XXXIV.

## Wheeling in File.

THE fquad, when marching in file, muft be accultomed to wheel its bead to either nank; each fle following fucceffyely, without lofing, or encreafing diftance.-On this occafion, eath file makes its feparate whee!, on a pivot moverble in a very fmall degree, but without altering its time of march, or the cyes of the rear

## $\left[\begin{array}{ll} & 30\end{array}\right]$

ranks being turned from their front rank. - The front rank men, whether they are pivot men, or not, muft keep up to their diftance, and the wheeling men muft take a very extended ftep, and lofe no time in moving on.

## S. XXXV.

## Oblique marching in Front.

wHEN the fquad is marching in front, and receives the word, $T_{0}$ the right, oblique; eachman, the firlt time he raifes the right foot, will, intead of throwing it fraight. forward, carry it in the diagonal direction, as has been already explained in Sect. VIIl. taking care not to alter the pofition of his body, hhoulders, or head. - The greatel attention is to be paid to the fhoulders of every man in the fquad, that they remain parallel to the line on which they firf were placed, and shat the right fhoulders do not fall to the rear, which they are very apt to do in obliquing to the right, and which immediately changes the direction of the front.
Hुo ward. On the word, forward, the incline ceafes, and the whole march forward. In obliquing to the left, the fame rules are to be obferved, with the difference of the left leg going to the left, and attention to keeping up the left fhoulder.

The fame inftructions that are given for ordinary time, fervealfo for quick time; but this movement, theugh it may be made by a fquad, or divifion, cannot be required from alarger body.

Cbliquing to the right, is to be practifed fometimes with the eyes to the left ; and obliquing

## [ 3I ]

liquing to the left, with the eyes to the right; as being abfolutely neceffary on many occafions; for if one of the battalions of a line in advancing be ordered to oblique to the right, or to the left, the eyes inuft fill continue turned towards its center.

## S. XXXVI.

## Oblique Marcbing in File.

IN obliquing to the right, or left, by files, the center and rear rank men will continue looking to their leaders of the front rank. Each fils is to confider itfelf as a rank entire, and is to preferve the fame front, and pofition of the fhoulders, during the oblique, as before it began. This being a very ufeful movement, the recruits are to be often practifed in it.

## S. XXXVII.

## Wheeling forward from the Halt.

THE dircctions already given for the wheeling of a fingle rank (vide, Sect. XIX.) are to be Itrictly attended to in this wheel of the iquad. On the word Right (or. left) wheel, the Rigbt rear ranks, if at one pace diftance, lock up. Atwbeel, the word, March, the whole ftep together in the quickeft time, and the rear ranks, during the wheel, incline fo as to cover their proper front rank men. At the word, Halt, the whole remain perfectly fteady.

S. XXXVII.

## $\left[\begin{array}{lll}{[ } & 32\end{array}\right]$

## S. XXXVIII.

## Wbeeling bucküaräd.

THE rquad muft be much practifed in wheeling backward in the quickeft time. In this wheel, the rear ranks may preferve their diftance of one pace from each other. Great attention fhould be paid, to prevent the re. cruits from fixing their eyes on the ground.(Vide Sect. XXI.)

## S. XXXIX.

Wheeing from the March; on a balted; and noveable Pivot.

THE directions for wheeling on a balted, and on a moveable pivot, have already been given, in Sects. XX. and XXII. The fquad thould now be practifed in both, until the recruits are thoroughly confirmed in thofe movements.

## S. XL.

Stepping out,-Stepping $/$ hort, - Marking the rime, —Canging tibe Feet; —Tbe Side Step,-Stepting back.

1HE quad muft likewife be practifed in, Atepping out, fetping Bort, marking the time, changing the feet, the fide fter, and fiepping;

## [ 33 ]

ping back, the inftructions for which have been fully detailed in the foregoing fections.

It cannot be too ftrongly inculcated, or too often recollected, that upon the correct equality of march, eftablifhed and practifed by all the troops of the fame army, every juit movement and manœuvre depends. When this is not attended to, difunion, and confufion, muft neceffarily take place, on the junction of feveral battalions in corps; although, when taken individually, each may be, in moft refpects, well train-ed.-It is in the original inftruction of the recruit, and fquad, that this great point is to be laboured at, and attained ; the time and length of ftep, on all occafions, are prefcribed. - The TIME is infallibly afcertained, by the frequent corrections of the plummet, which, when fo appiied, will foon give to each man that habitual meafure fo much defired ; and therefore every driller muft have it conftantly in his hand; and, as it has been already obferved, before any fquad, or larger body, is put in march, 5 or 6 ftrong taps of the drum may be given, in exact time, as regulated by the plummet, which will imprint the true meafure on each ear, and prepare for taking an accurate ftep at the word, March. -The length of ftep is only to be acquired by repeated trial, and cherefore, before the recruit, or fquad, is put in motion each inftructor fhould afcertain the fpace on which he is to drill his men; he will therefore (fuppofing that he himfelf is accurate in his paces, and that there is ground for that purpofe) mark out an oblong fquare, of 40 paces by 20 , or 30 , the corners of which he will afcertain by halberts, flones, or in any other vifible manner; along the fides of this figure he will
march the pivot flank of this fquad, making correct wheels, and halts at the angles - The time of March beine to exactly afcertained, he will then fee, that the fides of the oblong are gone over. at the known number of fteps; and if there be any inaccuracy, he will lengthen or hotten the ftep, till the fquad marches with the utinoft precifion ; every man preferving his juft potition, and all the other indifpenfible attentions in marching being ifrictly:obferved. Where there. is a fufficiency of ground, the fquads will occafionally march over greater faces, but the diftances fhould in the fame manner be exaetly afcertained, fo that there may be no doubt as to the true length of the ftep.- In proportion to the ftrength of fquads, or drills, one or more formed foldiers fhould accompany each, to march on the flank, give diftances, and, in other points, to regulate the motions of the dri!!.

End of Part I.

## PARTII.

Of the Platoon; or Company.

## S. XLI.

Formation of the Platoorto

THE recruit being thoroughly grounded in all the preceding parts of the drill, is now. to be inftructed in the movements of the platoons,

## $\left[\begin{array}{ll}{[35} & \text { ] }\end{array}\right.$

as a more immediate preparation for joining the battalion: for this purpofe from 10 to 20 files cre to be affembled, formed, and totd off in the following manner, as a company in the battalion:

The platoon falls in inthree ranks, at clofefali in. order, with fhouldered firelocks; the files lightly tơuching, bút without crouding; each man' will then occupy a fpace of about 22 inches:-The commander of the platoon takes polt on the right of the front rank, covered by a ferjeant in the rear rank. - Two other ferjeants ' will form a fourth or fupernumerary rank, three paces from the rear fẵok.

The platoon will be told off into fub-divifions, and, if of fufficient ftrengith, into four fections; but as a fection fhould never be lefs than five files, it will often-happen that, for the purpofes of march, three fections only can be formed.

The four beft trained foldiers are to be placed in the front rank, on the right and left of each fub-divifion.

When thus formed, the platoon will be practifed in
$\left.\begin{array}{l}\text { Opening, and } \\ \text { Clofing:of }\end{array}\right\}$ Ranks. (Sec. 26 and 27.)
Dreffing $\left\{\begin{array}{l}\text { to the front, } \\ \text { to the reär, } \\ \text { in an oblique direction, }\end{array}\right\} \begin{aligned} & \text { by the } \\ & \text { right, and }\end{aligned}$ and be exercifed in the feveral motions of the firelock, as have been fhewn in the preceding part.

Clofe order is the chief and primary order in which the battalion, and its : parts, at all times affemble, and form.-Open order is only regarded as an exception from it, and occafionally ufed in fituations of parade, and fhow._In clofe order, the rear ranks are clofed up to with-

## $\left[\begin{array}{lll}{[ } & 36\end{array}\right]$

in one pace ; the length of which is to be taken from the heels of one rank, to the heels of the next rank.-In open order, they are two paces diftant from each other.

In order to diftinguifh the words of command given by the inftructor of the drill (who reprefents the commander of the battalion), from thofe given by the commander of the platoon, or its divifions, the commands of the former are in CAPITAL Letters, thofe of the latter in Italics.

## S. XLII.

## Marching to the Front.

IN the drill of the platoon, the perfon inftructing muft always confider it as a company in battalion, and regulate all its movements upon

Eyes
Right, March. that principle; he will therefore, before he puts it in motion to front, or rear, indicate which flank is to direct, by giving the word, Eyes Right, or Eyes Left; and then, March. -Should the right be the directing flank, the commander of the platoon himfelf will fix on objects to march upon, in a line truly perpendicular to the front of the platoon; and when the left flank is ordered to direct, he and bis covering ferjeant will fhift to the left of the front rank, and take fuch objects to march upon.-To March on one object only, and to preferve a ftraight line, is an operation not to be depended on ; the conductor of the platoon before the word, $\mathrm{MaRCH}_{2}$ is given, will therefore endeavour to remark fome diftinct object on the ground, in his own front,

## $\left[\begin{array}{ll}{[ } & 37\end{array}\right]$

and perpendicular to the directing fank: he will then obferve fome nearer and intermediate point in the fame line, fuch as a fone, tuft of grafs, \& ac. ; thefe he will move upon with accuracy, and, as he approaches the neareft of thofe points, he muft from time to time chufe frefh ones, in the original direction, which he will by this means preferve, never having fewer than ;wofuch points to move upon.' If no object in the true line can be afcertained, his own fquarenefs of perfon muft determine the direction of the march.

A perfon placed in the rear of a body can, more readily than if placed in its front, determine the line which is perpendicular to fuch front; and, could we fuppofe ranks and files mot? perfectly correct, the prolongation of each file would be a perpendicular to the front of the body.

As the March of every body, except in the cafe of inclining, is made on lines perpendicular to its then front, each individual compofing that body mutt in his perion be placed, and remain perfectly iquare to the given line; otherwife be will naturally and infenlibly move in a direction perpendicular to his own perfon, and thereby openout, or clofe in, according to the manner in which he is turned from the true point of his March. - If the diftortion of a fingle man operates in this manner, and all turnings of the head do fo diftort him, it may be eaflly imagined what that of feveral will occafion, each of whom is marching on a different front, and whofe lines of direction are crofling each other.

Accuracy and fquarenefs of pofition, the equality of cadence and Itep, the light touch of the files, which is never to be relinquifhed, juft diftances, and true lines of movement, will give, without apparent conftraint, the head being

## $\left[\begin{array}{lll}{[ } & 38 & ]\end{array}\right.$

turned, or the leaft trouble taken in dreffing, the mot decifive exactnefs in the marches, and operations, of the largeft bodies.

The platoon, during its march in line will occafionally be ordered to
Siep out
Mark time
Siop jhort
Open, and cloje ranks
Oblizue

## S. XLIII.

## The Side Step.

THE fide, or clofing Aep, mult alfo be frequently practifed; it is veryneceffary, and ufeful on niany occations, when halted, and when a very fmall diftance is to be moved to either flank :As for inftance, to open, or clofe files ; to join one divilion to, or open it from another; to regain an interval in line; to move a whole battalion, or parade, 20 , or 30 paces to a flank; to regulate diftances between clofe columns, before deploying :-alterations made in this manier are imperceptible from the front, and bettermade, than by facing, and file marching : the words of command mutt be decided, and frong.

When the whole platoon is to clofe, at the To the word, To the right clóse, the platoon offiRIGHT Close. . Marcs. the word, March, the whole move together agreeably to the directions (in Sect. i4). On Fialt. the wori, Halt, the platoon officer refumes his place,

## [ 39 ]

place, having ftepped in the fame manner as the men, but fronting them, and thereby afinited in preferving the direction.

## S. XLIV.

## The Back Step.

THE platoon muft be accultomed from the halt, at the words, Step bace, March, Step to tep back any ordered number of paces in the pack, ordinary time, and length, as it is an operation March. that nay be frequently fequired froma batalion.

## S. XLV.

## File marching.

IN marching by files, the commander of the platoon will lead the front rank; therefore when the movement is by the left, on the word, To the left face, he and his covering fer-left jeant, will indantly thift to the left flank of the face. platoon; at the word, Quick MARCA, the gutek whole iteps off together, (vide fert. :8.) ; and March. on the word, Halt, Front, the leader, and his Hait, ferjeant, will return to their polls on the right. Frout.

## S. XLVI.

## Wheeling from a Halt.

N wheeling either forward, or backward from a balt, the commander of the platoon, on the

$$
\text { F } 2 \text { word, }
$$

Kigner Wheme, Marcis,
wor, Right or left wheel, moves out, and places himfelf one pace in front of the center of his platoon: during the wheel, he turns towards his men, and inclines towards that flank which has been named as the directing, or pivot one,
H1,ht,
Dref. giving the word, Halt, Drefs, when his wheeling man has jult compleated the required degree of wheel : he then fquares his platoon, but without moving what was the ftanding flank, and takes his poit on the now directing flank.

## S. XLVII.

## Wheeling forward by sub-divifons from Line.

Brever DivisiONS, TO
Tne
ほIGHT
Whetco

March.

ON the word, By sub-divisions, to the RIGHT WHEEL, the commander of the platoon places himfelf one pace in front of the center of the right fub-divifion, at the fame time the men on the right of the front rank of each fub-divifion face to the right.

At the word, March, each fub-divifion fteps off in wheeling time, obferving the directions given in (Sect. I9 and 37). The commander of the platoon turning towards the men of the leading fub-divifion, and inclining to its left (the
fist, proper pivot flank), gives the word, Halt, Drcss, Drss. for both fub-divitions, as his wheeling man is taking the lalf hep that finifhes the wheel fquare; and intantly poits himfelf on the left, the pivot flank.-The Serjeant coverer, during the wheel goes round by the rear; and takes polt on the pivot flank of the fecond fub-divifon.- It is to be obferved, that the conmander of the platoon in. variably

## [ 4. ]

variably takes port with the leading fub-divifon: therefore, whex the platoon wheels by fub-divifions to the left, the commander of the platoon moves out to the center of the left fub-divifion, and during the wheel inclines towards the right, now become the proper pivot flanks of the fubdivifions.

The proper pivot fank in column is that which, when wheeled up to, preferves the divifions of the line in the natural order, and to their proper front: the other may be called the reverfe flank.

In column, divifions cover and drefs to the proper pivot flank: to the left when the right is in front : and to the right when the left is in front.

## S. XLVIII.

Wheeling backward by Sub-divifions from
Line.

THE platoon will alfo break into open column of fub-divifions by wheeling backwards. -When the right is intended to be in front; at the word, By sub-divisions, on By subYOUR LEFT, BACKWARD WHEEL, the com- DIVISImander of the platoon moves out brifkly and yow, on places himfelf in front of the center of the right laft fub-divifion,- The man on the left of the front backrank of each fub-divition at. the fame time faces ward to the right.

On the word, March, each, fub-divifion march. wheels back ward in quickeft time, as directed in Sect. 21, and Sect. 38. During the wheel, the commander of the platoon turns towards his F 3 men,

## $\left[\begin{array}{ll}42\end{array}\right]$

men, inclining at the fame time to the left, or $\mathrm{pi}_{-}$ vot flank, and on compleating the wheel, gives the word, Halt, Drefs, to both divifions; he; and his covering ferjeant, then place themfelyes on the left flanks of their fub-divifions.

It may be confidered as a rule almoft general (the reafons for which are given in the following pars) that all wheels of the battalion, or line, (when halted and when the divifions do not exceed 16 ; or i8 files, ) into column, thould be backward.-And all wheels from column into line, forward.-The only neceffary exceptions feem to be in narrow ground where there is not room for fuch wheels.

## S. XLIX.

> Miarcbing on an Aignement, in Open Column of Sub-divifzons.

THE platoon having wheeled backwards by fub-divifions from line, (as directed in the foregoing Section) and a diftant marked object in the prolungation of the two pivot flanks being taken; the commander of the platoon, who is now on the pivot flank of the leading fub-divifion, immediately fixes on his intermediate points to march on, (vide Sect. 42.) On the word, March, given by the initructor of the drill, both divifions ftep off at the fame inftant; the leader of the firft divifion marching with the utmoft fteadinefs and equality of pace on the points he has taken; and the commander of the fecond divifion preferving the leader of the firft in an exact line with the diftant object; at the fame time
time he keeps the diftance neceffary for forming from the preceding divifion; which diftance is to be taken from the front rank. -Thefe objects are in themfelves fufficient to occupy the whole attention of the leaders of the two divifions; therefore they mult not look to, nor endeavour to corred, the march of their divitions, which care mult be entirely left to the non-commifioned officers of the fupernuinerary rank.

## S. L.

## Wheeing into Line from Open Column of Sub-divifons.

THE piatcon being in open column of fubdivifions, marching at the ordinary ftep on the alignement, receives the word Halt, from Harto the inltructor of the drill; bothdivifions inftantly halt, and the inftructor fees that the leaders of the divifions are correct on the line in which they have moved; he then gives the word (fuppofing the right of the plation to be in front) by fub-divilions, To the left whesl andleft FORM ; on which the commander of the platoon warel goes to the center of his fub-divifion, the two $\operatorname{AND}$, pivot men face to their left exactly fquare with the alignement, and a ferjeant runs out and places himfelf in a line with them, fo as to mark the precife point at which the right flank of the leading fub-divifion is to halt, when it fhall have compleated its wheel.-At the word, March, Marca. the whole wheel up in quickeft time; during the wheel, the coinmander of the platoon, turning towards his men, inclines to the wheeling

## [ 44 ]

Halt, flank, and gives the word, Halt, Drefs, at the Drefs. moment the wheel of the divifion is compleating; the commander of the platoon, if neceffary, corrects the internal dreffing of the platoon on the ferjeant and pivot men; this dreffing mult be quickly made, and when done, the commander of the platoon gives the word, Eyes front, in a
zeses front. moderate tone of voice, and takes potit in line as directed in Sect. 41.

In all wheels of the divifion of a column (either from the halt, or from the march), that are made on a halted pivot; the flank firelocik of the front rank on the hand wheeled to, is fuch pivot, not the officer who may be on that flank, and whofe bufinefs it is to conform to it,

All wheelings by fub-divifions, or fections, from line into column, or from column into line, are performed on the word given by the commander of a battalion, when the whole of a battalion is at the fame inftant fo to whiecl, or on the word given by the commander of the company, when companies fingly, or fucceflively, fo wheel: they are not to be repeated by the teaders of its divifions.

## S. LI.

## In Open Column of Sub-divifons wobeeling into an Alignement.

THE platoon being in open column of fubdivifions, marching in ordinaty time; when its leading divifion arrives at the ground, where the wheel is to commence, it receives the \#Fbel. Word Right, or left, whecl, from its commander;

## [ 45 ]

on which the rear ranks, if at one pace diftance, lock up; the flank front rank man alone halts, and faces into the new direction, while the others quicken their pace to the wheeling time, and regulate their ftep by the outward hand (to which they have turned their eyes), until the wheel is compleated.-He then gives the word, Halt, Drefs, for his divifion to drefs to the hand Hait, it is to move by; and whenever the fecond divi- Drefs. fion, which has continued to advance in ordinary time, arrives clofe on the wheeling point, he gives his divifion the word, March, and moves Marcb. on in ordinary time, fo as its rear rank does not occafion even a momentary fop to the divifion behind it, which at that inftant receives the word, Wheel, then, Halt, Dre/s, and finally, Wbeel. March, whenever the leading divifion has gained its proper diftance from it.

The officer conducting the leading (and every other) divifion of the column in march, on any given point or object where it is to wheel into a new direction, and to its proper pivot hand on a halted pivot, always ftops at that point, or object, clofe on his own outward hand, and gives the word, Wheel, when the front rank of his divifion has taken one pace beyond fuch object; he thus allows face for his own perfon (when the wheel is finifhed) to move on clofe behind the new direction of march.

But if the proper pivot flank is to be the wheeling one, each commander of a divifion gives his word, Wheel, as he fucceffively arrives at fuch a diftance from the point on which he has moved, as that at the completion of the wheel, his divifion may balt perpendicular to the new line, but with the given point, of courfe, behind the proper pivot, and that he alfo in his own

## $\left[\begin{array}{ll}46\end{array}\right]$

perfon be on the new direction, prepared to give his word, March, and to proceed.

The rear ranks if at one pace diftance muft clofe up at the word, Wheel, and during the wheel they incline, fo as to cover their proper front rank men.

The lub-divifions muft take care that they continue their march correctly upon, and wheel exactly at, the point where the leading one wheeled, and that they do not hift to either fiank, which without much attention they are apt to do.

In this manner the fub-divifions fucceed each other; and if the words of command be juftly given; no fop made on arriving at the wheeling point ; the wheels performed at an increafed time and ftep; and the proper halt; dreffing, and paufe, be thade'after the wheel; no extenfion of the column will take place, but the juft diftances between the divifions will be preferved,

The officer conducting the direciing flank of a divifion may during the wheel be advanced one or two paces before it, and remain fo, facing to the flank, that he may the more critically be enabled to give his word, Halt; at which inftant, he will again place himfelf on the flank ready to judge his diftance, and to give the word March.

## S. LII.

In Open Column of Sub-divifions, wbeeling into a new Direftion, on a muveable Fivot.

THE commander of the leading fub-divifion, when at a due diftance from the intended
tended new direction, will give the word, Right Rigkt (or left) Boulders forward (vide Sect. 22), and Baulders he himfelf carefully preferving the rate of march, frward. without the leaft alteration of Itep or time, will begin to circle in his own perfon from the old into the new direction, fo as not to make an abrupt wheei, or that either flank fhall be ftationary; the reft of his divilion on the principle of dreffing will conform to the direction he is giving them : when this is effected he will give the word, Forward. - The leader of the fecond Forward. fub-divifion, when he arrives at the ground on which the firft began to wheel, will in this manner follow the exact tract of the firft, always preferving bis proper diftance from him.

Thus without the conftraint of formal wheels; a column, when not confined on its flanks, may be conducted in all kinds of winding and changeable directions: for if the changes be made gradual and circling, and that the pivot leaders of divifions purfue their proper path, at the fame uniform equal pace, the true diftances of divifions will be preferved, which is the great regulating object on this occafion, and to which evesy other confideration muft give way.

## S. LIII.

## Countermarch by Files.

THE platoon, when it is to countermarch, muft always be confidered as a divifion of a battalion in column; the inftruction of the drill will therefore, previous to his giving the caution to countermarch, fignify whether the right or left is fuppofed to be in front, that the commander

## [ 48 ]

commander of the platoon, and his covering ferjeant, may be placed on the pivot flank, before fuch caution is given, as it is an invariable rule in the countermarch of the divifions of a column by files, that the facings be made from the flank, then the pivot one, to the one which is to become fuch.

- Face.

On the word, To the right, or left face, the platoon faces, the commander of it immediately goes to the other flank, and his covering ferjeant, advancing to the fot which he has quitted, faces to the right about. At the word, Qurcx Quick march, the whole, except the ferjeant March. coverer, fteps off together, the platoon officer wheeling fhort round the rear rank (viz. to his right, if he has fhifted to the right of the platoon; or to his left, if he be on the left of it;) and proceeds, followed by the platoon in file, till he has conducted his pivot front rank man clofe to his ferjeant, who has remained immove-

Hait, Frons, Drefs. able; he then gives the words, Halt, Front, and Drefs ; fquares, and clofes his platoon on his ferjeant, and then replaces him.

All countermarches by files neceffarily tend to an extenfion of the files; unity of ftep is therefore abfolutely indifpenfible, and the greateft care muit be taken, that the wheel of each file be made clofe, quick, and at an increafed length of ftep of the wheeling man, fo as not to setard or lengthen out the march of the whole.

## S. LIV.

## Whesling on the Center of the Platoon.

THE platoon muft be accuftomed to wheel upon its center, half backward, half for. ward,

## [ 49 ]

ward, and to be pliable into every Chape, which circumftances can require of it; but always in order, and by a decided command.

The Words of command are,
Platoon, on
your Cen-
terto the $\left\{\begin{array}{l}\text { Right, } \\ \text { Left, } \\ \text { Right about, } \\ \text { Left about, }\end{array}\right\}$ Wheel.

When the wheel to be made is to the right, or right about, the right half platoon is the one to wheel backward, and the left for ward :- The reverie will take place, when the wheel is to be made to the left, or to the left about.- On the word March, the whole move together in the march. quickeft time, regulating by the two flank men, who during the wheel preferve themfelves in a line with the center of the platoon; -as ion as the required degree of wheel is performed, the commander of the platoon gives the word, Halt, Halt, Dress, and intently fquares it from that flank, ${ }^{\text {Dregs. }}$ on which he himfelf is to take pot.

## S. LV

## Oblique Marching.

THE inftructor of the drill will have the oblique march frequently practiced, in pathun, in fiab-divifions, and in file: (Vide Sect. XXXV. XXXVI.) He will fee when in devifrons, that the rear ranks lock well up, and cover exactly; -when iss file, that the exact diftances are preferved between the files; -and in both cafes, that the platoon during its march, continues parallel to the pofition from which it commenced obilquing.
S. LVI.

## [ 50 ]

## S. LVI.

Increafing and diminifing the Front of an Open Columin balted.

Increafing.

THE platoon flanding ia open column of fub-divifions (fuppofe the right in front), receives from the inftructor of the drill, a caltion Form to.form platoon. The commander of the platoon-platoon inftantly orders, Rear fub-didijifion, to the Rear divi- Left oblique, quick march. When it has obliqued
fond

Ligue. fo as to open its right flank, he gives the word, 9uick Forzuard; and on its arriving in a line with the Marib. Forward. Halt, Drefs.

Form SUB-DIvieions. Left fubdivijivn.
Right face. Quick Marcb.

## Diminißbing.

On the cautionary command from the infructor of the drill, to FORM SUB-DIVISIONs, the commander of the platoon orders, Left fubdivifion to the right face; and inftantly on facing, the three leading files difengage to the rear, the ferjeant coverer running round to head them:On the word, Quick march, the ferjeant conducts the fub-divifion in file, to its proper dif- tance in rear of the firft fub-divifion.- The commander of the platoon having moved to the left flank of the leading divifion, as foon as he fees the rear file of the fecond in a line with his own perfon, gives the words Halt, Front,

Halt, front, left drefs. and $L_{\epsilon} f t, D_{r e f s}$. The ferjeant coverer at the fame time moves brilly to his poft on the left flank of the rear fub-divifion, and fquares it.

It is to be obferved as a general rule, in diminifhing the front of a column, by the doubling of fub-divifions, or fections, (whether the co-

## [ 51 ]

limn, be halted, or in motion) that the dubdivision, or faction, on the reverie flank, is the one behind which the other fub-divifion, or fectons double; thus, when the right is in front, the doubling will be in rear of the right divifion; and, vice verfa; when the left is in front; by which means, the column is at all times in a fituation to form line to the flank, with its divifions in their natural order, by imply wheeling up on the pivot flanks. - And in encreafing the front of a column, the rear fub-divifions, or fections, oblique to the hand the pivot flank is on; fo that when the right is in front, the obliquing will be to the left; and the reverie when the left is in front.

## S. J. VII.

## Increasing and diminifing the Front of an Open Column on the March.

## Increajing.

THE platoon marching at the ordinary time in open column of fub-divifions (fuppofe the right in front), receives from the initructor of the drill the cautionary command FORM PLA- FCRM TOON; the commander of the platoon inftantly Platoon gives the words, Left oblique-quick march; on Left ob. which the rear fub-divifion obliques to the left, ligure. and as fool as its right flank is open, receives Quick the word Forward. -When it gets up to the firn March. fub-divifion (which has continued to march, with the utmoft fieadinefs, at the ordinary pace), the commander of the platoon gives the words, Halt, March, and takes port on the pivot flank. Halt,

## [ 52 ]

## Diminifing.

Form
SUB-DIvisions. Left fibdivifin, Mark time. Risk O6: in itu.

Forward.

When the inftructor of the drill gives the caution to FORM SUBDIVISIONs, the commander of the platoon immediately orders, Left subdivifion, mark time; this it does until the right one, which continues its march fteadily at the ordinary pace, has cleared its flank; he then orders the left fub-divifion, Quick oblique, and when he perceives that it is doubled properly behind the right one, he gives the word, Forward, on which it takes up the ordinary march, and follows at its due diftance.

The fame directions that apply to encreafing or diminishing by fub-divifions, apply equally by fictions, which individually repeat the fame operations.

The words for the fub-divifions or factions, encreafing or diminifing the front of a column, are given by the commander of the company; and not repeated by thole of its divifions.

Increafing and reducing the front of a column, is an operation that will frequently occur in the mach of large bodies; and it is of the utmoft importance that it be performed with exactnefs. -The inftructor of the drill mut therefore be particularly attentive, that the tranfition from one fituation to the other be made as quick as poffible; that the leading divifion continues its march at the regular time, and length of pace, and the exact diftances between the divifions be accurately preferved.-During the operation, the ranks mut be cloned, arms carried, and the greatest attention required from each individual.

## [ 53 ]

## S. LVIII.

The Platoon in Open Column of sub-divifions to pafs a jbort Deflié, by öreaking off Files.

THE platoon is fuppofed in open column of fub-divilions, with the right in fromf, marching in ordinary time; when the leading divifion is arrived within a few paces of the defile, it receives from the inltructor of the drill an brbax order to break off a certain number of files, of (fuppofe three). The commander of the leading files. divifion inftantly gives the words, Three files on Tisree the left, right turn; the named files immediately fies; right turn to their right, and wheel out in rear of the ${ }^{i u r n}$. three adjoining files.-The commander of the fub-divifion himfelf clofes into the flank of the part formed.-When the fecond fub-divifion comes to the fpot where the firf divilion contracted its front, it will receive the fame words of command from its own leader, and will proceed in like manner.

Should it be required to diminifh the front of the column, one or two files more, the commander of the leading divifion will, as before, order the defired number of files to turn; on Tzo fles, which thofe already in the rear will incline to rigit turno their right, fo as to cover the files now ordered to break off, and which are wheeling out in the manner already preferibed.

Jn this movement the files in the rear of the fub- divifions muft look well up, fo as not to impede the march of the fucceeding divifion.

As the defile widens (or the initructor of the drill fhall direct) the commander of the leading. fub-divifion, will order files to move up to the

## ［ 54 ］．

Tbrre files front，by giving the word，One，two，or three to the front．files to the front；on which the named files turn to their front（the left）and lengthening their pace， march up，file by file，to the front of their fub－ divifion，and immediately refume the ordinary pace．－Thofe files which are to continue in the rear will oblique to the left，lengthening alfo their ftep，till they cover，and are clofed up to the three files on the left flank of their fub－ divifion．

S．LIX．
Marching in Quick Time．

THE platoon muft frequently be practifed to march in quick time，particularly in file，until the men have acquired the utmoft piecifion in this movement，which is fo effential in all deployments from clofe column．－The platoon will alfo occafionally be marched in front at the fame ftep，as it may be fometimes requi－ red from fmall bodies．

## S．LX．

## Forming to the Front from File．

T1HE platoon when marching in file may form to its front，either in fections，fub－ divifions，or in platoon．－The right flank being

HALT， FRONT．
Letr BACK－ WARD W江EEき。 March． fuppofed to lead，on the word，Halt，front， the platoon inftantly halts，and faces to its left； the word is then given，By sections sub－ divisions，or Platoon，on your left back－ ward wheel，and at the word March，the wheel ordered is made in the manner directed in Sect．XLVIII．

But

## [ 55 ]

But in fituations where it may have been ne-: ceflary to order an extenfion of files, (fuch as: will fometimes occur in marching through the ftreets of a town) a body thus moving, in order to avoid incorrect diftances between the divifions, may form to the front in the following manner, either by platoon, fub-divifions, or fections. On the word, To the front form platoon; front the front rank man of the leading file alone halts, Form and is inftantly covered by his center and rear Platoon. rank men; every other file of the platoon makes a half face to the left, and fucceffively moving up, dreffes on the right file; when the commander of the platoon fees it is properly dreffed, he gives the word, Eyes left, and places.himielf Eyesleft. on the pivot flank.

Should the order have been, to the front front form sub-divisions (or Sections), thelead- form Suring fub-divifion, or fection, will proceed in the divisimanner already detailed for the platoon ; the fucceeding fub-divifions, or fections, will each continue moving on, until its front file arrives at the proper forming diftance, from the divifion in its Front front, when it will receive from its commanderform the word, To the front form, and will inftantly form up by files, in the manner already defcribed.

## S. LXI.

## Forming from File to eitber Flank.

THE platoon marching in file (fuppofe from the right) has only to halt, and front, to be formed to the left flank.

To form to the right, it will receive the word, To the right form; the front rank man of the Rigbs leading file, inftantly turns to his right, and form. halts;
halts; his center and rear rank men at the fame time move round and cover him. - All the other files of the platoon make a half turn to their left, and move round fucceffively, in a line with the right hand file ; the center and rear rank men of each file, keeping clofed well up to-their file leaders.

## - S. LXII.

## To form to either Flank, from Open Column of Sub-Divifions or Sections.

THE platoon marching in the ordinary time in open column of fub divifions, or fections, to form to its left, receives the words,

Hait, LEFT
WHKEL AND
FORM。
March.
Regrt
FORM
Pla-
TOUN. Halt, left wheel and form, march, \&c. and proceeds as has already been fhewn in Section L.

To form the platoon to its right flank, the inftructor of the drill gives the cautionary word of command, to.theright form the plaToon; on which the commanders of the feveral divifions fhift to the other flank, and the commander of the leading fub-divifion, or fection, Riglt inftantly gives the word to his divifion, Right ${ }^{\text {witeel. }}$. wheel; and when it has wheeled fquare, he orralt, rigbt, ders, Halt, right drefs; goes to the right flank
drefs. of his divifion, and drefles it on the intended line of formation. - The commander of the other fub-divifion, or fections, on the leading one being ordered to wheel, gives the word to the Left ob- To the left oblique, and gradually inchines, fo as "gue to be able to march clear of the rear rank of the divifion forming; this being effected, the word, Forward. Forzuard will be given to each divifion, and they

## [ 57 ]

they move on in the rear of the one formed. When the fecond fub-divifion, or fection, is arrived at the left flank of the firft, its commander gives the word, Right wheel, then, Halt, drefs up; Rigbe on which the divifion moves up into the line, ${ }^{\text {w b bell }}$ with the one formed, and its commander in- ${ }_{u p \text { pe }}^{\text {batt }}$, dress ftantly places himfelf, two or three files, from the left of his firt divifion, and drefies his own on it, as quickly and as accurately as poffible.Thus each fucceeding fection would proceed, until the whole bẹ formed.

## S. LXIII.

The Platoon moving to the Front, to gain Ground to a Flank, by a Marcb in Ecbellon, by Sections.

TN the drill of the platoon, when the foldier is completely formed, he may be taught to march in echellon, by fections. This is a very ufeful movement for a battalion, or larger body moving in line, that is required to gain ground to a flank, and may be fubifituted inftead of the oblique march.-It will be performed in the following manner.

The platoon marching to the front in the ordinary time, receives the word, By sections szeto the right; the xight hand men of the tions, front rank of each feetion, turning in a finall degree to their right, mark the time for three paces, during which the fections are wheeling in ordinary time on their pivot men; at the fourth pace, and at the word, Forward, the whole move For wand on direct to the front that each fection has now acquired

## $\left[\begin{array}{ll}5^{8} & ]\end{array}\right.$

acquired, and the commander of each fection, havilig taken poft on the right of his divilion, the platuon continues its march in echellon.
Form
On the word, Formplatoon, the pivot Platoos nien mark the time for three paces, turning back in a fmall degree to their left, the original front, and the fections inftantly wheel backward into line; at the fourth pace the whole move for-
Formard ward. When the platoon is in two ranks only, two paces inftead of three will be fufficient to mark time, and to ftep off at the third, inftead of the fourth pace.

## S. LXIV

## From tbree Ranks forming in two Ranks.

FORM
Two

4yy
FAcs.
Quics
March.

THE platoon halted, is ordered, FORM Two DEEP; the rear rank men of the left fubdivifion, inftantly ftep back one pace; on the word, left face, the rear rank of both fub-divifions face; the word Quicx March is then given, on which the men of the rear rank of the left fub-divifion ftep hort, until thofe of the right get up to them; they then move on with them in file; as their rear is clearing the left flank of the platcon, the commander: (who has fhifted to this flank during the movement) gives
Halt, the words, Halt, front, drefs up, he inftantly Frnnt, dreffes them on the fanding part of his platoon, Drefs ipe and refumes his poft on the right.--One third, or one more fub-divifion, is thus added to the front of the company; which is here fuppofed ftanding, as one in a battalion column.

## [ 59 ]

## S. LXV.

From two Ranks, forming into three Ranks.
TPHE platoon being halted and told off into three fections, it receives the word, Form Form three deep; on which the third fection in- three, ftintly fleps back one pace; the word, Rightigight FACE is then given, and the manon the right offace. its front rank, on facing, difengages a little to his right; on the word, Quick march, the Quick front rank men of the third fection ftep off, thofe ${ }^{\text {March, }}$ of the other rank mark the time, till they have paft, and then follow.-When the leading man has got to the right of the platoon, the commander gives the word, Halt, front, on which each Halt, man halts, faces to his left, and inftantly covers fronto his proper file leader.

IN purfuance of the foregoing inftructions, and on the principles they contain, every company of a battalion muft be frequently exercifed by its own officers, each fuperintending a rank, or an allotted part of the whole.-And on a fpace of 70 or 80 yards fquare, can every circumfance be practifed, that is neceffary to qualify it for the operations of the battalion.- That fpace being pointed out by under officers, or other marks, as directed at the latter end of the frift part, the company will, both at open and clofe files, without arms, and with arms,

## By Ranks,

Ift. March in lingle file, by fucceffive ranks, along the 4 ades of the fquare.-The fame, by two's.

## [ 60 ]

2d. March, and wheel, by ranks of fours:File off fingly and double up, preferving proper diftances, and not quickening on the wheel.

3d. March, and wheel, by fub-divifions of ranks.

4th. March, and wheel, by whole ranks.
5th. March to front, and to rear ; ranks at 10 paces afunder.

6th. March the company in a fingle rank, to front, and to rear, by a flank, and by the center.

7 th. Oblique by ranks.
8th. Open, and clofe files, and intervals, by the fide ftep.

9th. March in file, to either flank.
roth. Ranks fucceffively advance 6 or 8 paces; halt, and drefs.-Ranks fucceffively fall back 6 , or 8 paces; halt and drefs.
y ith. Advance, or retire 2 or 3 flank men; the ranks drefs to them.

12th. Open, and clofe ranks.

## At Clofe Ranks, and Files.

i3th. March, and wheel in all directions, by fub-divifions, and by company.-Shorten fiep, aidd lengthen it, the march to be made both in ordinary and quick time.-The wheels to be made in wheeling time.

3th. Advance, and retire, 2 or 3 flank files, and drefs to them.

15ih. Open, and clofe to the flank, by the fide-ftep.

16th. Change front by the countermarch by files.

18th. March oblique.

## [ 6I ]

Igth. Sub-divifions double on the march, and again form up, by obliquing.

2oth. Wheel backwards by fub-divifions.March along the line, to prolong it ;-form to the flank, by wheeling up ; or to the front by obliquing.

2 If . File from the flank of company to the rear, as in the paffage, of lines:-Halt, front; Clofe into pivot file :-Wheel up; as in forming in line.

22d. From 3 deep, form 2 deep.
23d. From 2 deep, form 3 deep.
24th. Exercife of the firelock, manual, and platoon, by ranks, and company.

25th, Firings by files, fub-divifions, and comny.

The neceffary paufes, and formations, betwixt thefe movements, in order to connect them, mult of courfe be made. -They may be practifed in whatever fucceffion thall at the fame time be found proper. - The greateft precifion muft be required, and obferved, in their execution, according to the rules already laid down.

Every officer muft be inftruGted in each individual circumftance required of a recruit, or a foldier; alfo in the exercife of the fword; and accuftomed to give words of command, with that energy, and precilion, which is fo effential. -Every officer, on firft joining a regiment, is to be examined by the commanding officer; and, if he is found imperfect in the knowledge of the movements required from a foldier, he muft be ordered to be exercifed that he may learn their juft execution. Till he is mafter of thofe points, and capable of inftructing the men under his

## [ 62 ]

command, be is not to be permitted to take the command of a platoon in the battalion.

Squads of officers mult be formed, and exercifed by a field officer; they mult be marched in all directions, to the front, oblique, and to the flank; they muft be marched in line, at platoon diftance, and preferve their dreffing and line from an advanced center: they mult be placed in file at platoon diftance, and marched as in open column; they muft change direction, as in file, and cover anew in column. In thefe, and other fimilar movements, the pase and the diftances are the great objects to be maintained. From the number of files in divifion, they mult learn accurately to judge the ground neceffary for each, and to extend that knowledge to the frost of greater bodies. They mult acquire the habit of readily afcertaining by the eye, perpendiculars of march, and the fquarenefs of the wheel.

An officer mult not only know the poft, which he foould occupy, in all changes of fituation, the commands which he hould give, and the general intention of the required movement; but he fhould be matter of the principles, on which each is made; and of the fauits that may be committed, in order to avoid them himfelf, and to inftruct others.-Thefe principles are in themfelves fo fimple, that moderate reflection, habit, and attention, wili foon fhow them to the eye, and fix them in the mind; and individuals, from time to time, when qualified, mult be ordered to exercife the battalion, or its parts.

The complete inftruction of an officer enlarges with his lituation, and at latt takes in the whole circle of military fcience:-From the variety of knowledge required of him, his exertion muft

## $\left[\begin{array}{lll}. & 63\end{array}\right]$

be untemitting, every one ftriving to make hims felf mafter of his own part.

Befides the inflruction peculiar to the under officers, they fhould be exercifed in the fame manner as the officers are, as they are frequently called on, to replace them :- The neceifity alio of order, fteadinefs, filence, and of executing every thing deliberately, and without hurry, fhould be ftrongly inculcated in the infantry foldier,

Find of Patt II,

## Formation of the Company.

THE company is always to be fized from Hanks to center.
The company is forined three deep.
The files lightly touch when firelocks are fonuldered and carried, but without crowding ; and each man will occupy a fpace of about twen-ty-two inches.

Clofe order is the chief and primary order, in which the battalion and its parts at all times affemble and form.-Open order is only regarded as an exception from it, and occafionally uled in fituations of parade and fhew.-In clofe order; the officers are in the ranks, and the rear ranks are clofed up within one pace. In open order; the officers are advanced three paces, and the ranks are two paces diftant from each other,

Each company is a platoon.-Each company forms two fub-divifions, and alfo four fections. But as fections inculd never be lefs than five files, it will happen, when the companies are weak, that they can only (for the purpores of march) form three fections.

When the company is fingly formed; the eape tain is on the right, the enfign on the left, of the front rank, cach covered by a ferjeant in the reat rank. The lieutenant is in the rearg as alfo the drummer and pioneer in a fourth rank, at three paces diftance.

The left of the front rank of each fubdivifion is marked by a corporal. The right of the left fubdivifion may be marked by the other corporal,

When

## $\left[\begin{array}{ll}2 & 1\end{array}\right]$

When neceffary, the places of abfent officers may be fupplied by ferjeants, thofe of ferjeants by corporals, and thofe of corporals by intelligent men.

When the company is to join others, and the battalion, or part of it, to be formed; the enfign and his covering ferjeant quit the flank, and fall into the fourth rank, until otherwife placed.
When the Cornpany is to take Open Order from Clofe Order.
At this command, the flank men on the right Rear and left of the rear ranks, ftep back to mark the ranks take ground on which each rank refpectively is to open order. halt, and drefs at open diftance; they face to the right, and ftand covered ; every other individual remains ready to move.

At this command, the rear rank dreffers front, March. and the rear ranks fall back one and two paces each dreffing by the right, the inftant it arrives on its ground: The officers move out in front three paces, and divide their ground: One ferjeant is on each flank of the front rank: The pioneer remains behind the center of the rear rank : The drummer places himfelf on the right of the right ferjeant.
When the Company is to take Clofe Order from Open Order.
The officers, ferjeants, drummer, face to the Rear right.

Rayks
The ranks clofe within one pace, marching $\begin{gathered}\text { take } \\ \text { Order. } \\ \text { clofe }\end{gathered}$ one and two paces, and then halting.

Marct.
The officers move round the flanks of the company to their refpective pofts: The ferjeants and drummers fall back, and each individual refumes his place, as in the original clofe order.

## $\left[\begin{array}{ll}{[3}\end{array}\right]$

The above regards the company when fingle ; but when united in the battalion, other pofts are alotted to the druniner and pioneer.

## Formation of the Battalion.

APERFECT uniformity in the formation and arrangement of all companies and battalions, is indifpenlible for the execution of juft, and combined movements.

Sirength of the bat. The battalion is ten companies. talion.
The battalion is ten companies. $\begin{cases}\mathbf{1} & \text { Grenadier. } \\ 8 & \text { Battalion. } \\ \text { I } & \text { Light. }\end{cases}$
Each company confifts at pre- $\begin{cases}3 & \text { Officers. } \\ 2 & \text { Serjeants. } \\ 3 & \text { Corporals. } \\ \text { fent of } & \text { I } \\ \text { Drummer. } \\ 30 & \text { Private. }\end{cases}$

Formation of the battalion.

When the companies join and the battalion is formed, there is to be no interval between any of them, grenadier, light company, or other ; but every part of the front of the battalion fhould be equally itrong.

Each company which makes a part of the fame line, and is to act in it, muft be formed and arranged in the fame manner.
Foftion of 'The companies will draw up as follows from the com- right to left :-grenadiers;-1ft captain and panies in batralion, major ;-4 ${ }^{\text {th }}$ and $5^{\text {th }}$ captain $;-3^{\text {d and } 6 \text { th }}$ captain ;-2d captain and lieutenant colonel ;light company.- The colonel's company takes place according to the rank of its captain: The four eldelt captains are on the right of the grand divifions:

## [ 4 ]

divifions : officers commanding companies or platoons, are all on the right of the front rank of their refpective ones.

The eight battalion companies will compofe Divifions. four grand divitions:- $e i g h t$ companies or platoons, -fixteen fub-divifions, -thirty-two fections, when fufficiently flrong to be fo divided, otherwife twenty-four, for the purpofes of march. The battalion is alfo divided into right and left wings. - When the battalion is on a war eftablifhment, each company will be divided into two platoons.-When the ten companies are with the battalion, they may then, for the purpofes of firing or deploying, be divided into five grand divifions from tight to left.

The battalion companies will be numbered from the right to the left, 1.2 .3 .4 .5 . 6. 7. 8.-The fubdivifions will be numbered 1. 2. of each ;-the fections will be numbered 1. 2. 3 . 4. of each ;-the files of companies will alfo be numbered I. 2. 3.4.8c.-The grenadier and light companies will be numbered leparately in the fame manner, and with the addition of thofe diftinctions.-Thefe feveral appellations will be preferved, whether faced to front or rear.

The companies muft be equalized in point of Companumbers, at all times when the battalion is form- nies equaed for field movement, and could the battalions of a line alfo be equalized; the greateft advantages would arife; but though from the differ. ent ftrengths of battalions this cannot take place, yet the firft requifite always muft, and is indifpenfable.

Ranks are at the diftance of one pace, except Formation the fourth or fupernumerary rank, which has battalion three paces.

## [ 5 ]

All the field officers and the adjutant are mounted.

The commanding officer is the only officer advanced in front, for the general purpofe of exercife when the battalion is fingle; but in the march in line; and in the firings, he is in-the rear of the colours.

Formation of the battalion at Clofe Order.

The lieutenant colonel is behind the colours, fix paces from the rear rank.

The major and adjutant are fix paces in the rear of the third and fixth companies.

One officer is on the right of the front rank of each company or platoon, and one on the left of the battalion; all thefe are covered in the rear rank by their refpective ferjeants; and the remaining officers and ferjeants are in a fourth rank behind their companies.-It is to be obferved, that there are no coverers in the center rank to the officers or colours.

The colours are placed between the fourth and fifth battalion companies, both in the front rank, and each covered by a non-commiffioned officer, or fteady man in the rear rank.-One ferjeant is in the front rank betwixt the colours; he is covered by a fecond ferjeant in the rear rank, and by a third in the fupernumerary rank, -The fole bufinefs of thefe three ferjeants is, when the battalion moves in line, to advance and direct the march as hereafter mentioned.- The place of the firft of thofe ferjeants when they do move out, is preferved by a named officer or ferjeant, who moves up from the fupernumerary rank for that purpofe.
Ufe of the The fourth rank is at three paces diftance fourth or fupernus. merary rank.
when halted, or marching in line.-When marching in column it muft clofe up to the diftance of the other ranks. - The effential ufe of

## $\left[\begin{array}{ll}6\end{array}\right]$

the fourth rank, is to keep the others clofed up to the front during the attack, and to prevent any break beginuing in the rear; on this innportant fervice, too many officers and non-commiflioned officers cannot be employed.

The pioneers are affembled behind the center, formed two deep, and nine paces from the third rank.

The drummers of the eight battalion companies are afleinbled into two divifions, fix paces behind the third rank of their fecond and feventh companies. - The grenadier and light company drummers and fifers, are lix paces behind sheir refpective companies.

The mulic are three paces behind the pioneers in a ingle rank, and at all times as well as the drummers and pioneers, are formed at loofe files only, occupying no more face that is necercary.

The ftaff of chaplain, furgeon, quarter-mafter and furgeon's inate, are three paces behind the mufic.

In general, officers remain poled with their Offeers. proper companies; but commanding officers will oseafionally make fuch changes as they may find seceffary.

Whenever the officers move out of she front Replasing rank, in parade, marching in column, wheeling ferjeanss. into line, or otherwife, their places are taker by their ferjeant coverers, and preferved uncil the officers again refume them.

When the line is balted, and efpecially during
the frings when engaged; the ferjeant coverers fall back into the fourth rank, and obferve their platoons.

## $\left[\begin{array}{ll}7 & ]\end{array}\right.$

Commands.
Rear ranks take open arder.

Marcb. At this command-the flank dreffers face to When the Battalion takes Open Order.
At this Command - the flank men on the right of the rear ranks of each company frep brikly back to mark the ground on which each rank refpectively is to halt. They face to the right, and cover as pivots, being regulated and dreffed by the adjutant or ferjeant major on the right. - Every other individual remains ready to move. the front, and the whole move as follows:

The rear ranks fall back one and two paces, each dreffing by the right the inftant it arrives on the ground.

The officers in the front rank, as alfo the co.lours, move out three paces-thole in the rear, fogether with the mufic, move through the intervals left open by the front rank officers, and divide themfelves, viz. the captains covering the fecond file from the right, the lieutenants the fecond file from the left; and the enfigns appofite the center of their refpective companies.

The mufice form between the colours, and the front rank.

The ferjeant coverers move up to the front sank, to preferve the intervals left by the officers.

The pioneers fall back to fix paces diftance behind the center of the rear rank.

The drummers take the fame diftance behind their divifions.

The major moves to the right of the line of officers. - The adjutant to the left of the front rank.

The ftaff place themfelves on the right of the front rank of the grenadiers, viz. chaplain, furgeon, quarter-matter, mate.

The

Pefing of On particular occafions, and when neceffary, ofticers. officers commanding platoons, who in line are on the right of their platoons, thift to the left to conduct the heads of files, or the pivot fanks of their divitions in column or echellon.
Colours. When the battalion wheels by companies or fub-divifions to either flank into column ; both colours and the file of directing ferjeants always wheel to the proper front, and place themfelves behind the third file from the new pivot.

There is no feparate colour referve; the pio-

Colour sefe.ve. neers, mufic, \&c. fufficiently frengthen the center; but in the firings the two files on each fide of the colours may be ordered to referve theis. fire.
Light The conftant order of the light company when company. formed in line, and united with the battalion, is at the fame clofe files as the battalion.- Their extended order is an occafional exception.
Grenadiers.

When the light company is detached, and the grenadier conpany remains, it will be undivided on one fiank of its battaiion, whenever there are feveral battalions in line: but when the battali. on is fingle, it is permitted to be occafionally divided on each flank.

When the grenadier or light companies are detached, and make no part of the line, they mag. be formed two deep, if it is found proper.

With a very few obvious alterations, thefe general rules take place when a company or battalion is permitted or ordered to form in two ranks only-and which on the prefent low eftablifhment of our battalions, may often be done for the purpofes of exercife and movement on a more confiderable front : it is alfo evident that theygenerally apply whether the companies are ftrong or weak, and whether a greater or lefler number of them compofe the battalion.

# ABSTRACT OF THE MOST ESSENTIAL GENERAL ATTENTIONS REQUIRED IN THE MOVEMEN'TS OF THE BATTALION, AND WHICH WIIL BE MORE FULLY DETAILFD UNDER THAT HEAD. 

## Attentions of the Soldier.

QUICK Time is in general confined to Times of wheelings and filings, $\begin{aligned} & \text { the other march. }\end{aligned}$ muvements of the platoon or battalion are made in Ordinary Time.-It is very feldom, indeed, that they will, or ought, to be required at quick time.

All wheelings, forward or backward, are wheelmade quick.-Eyes are turned to the wheeling ings. hand at the word March (and not before.)The wheeling flank-man'tteps out firm at a pace of thirty-three inches, till he receives his word Halt; it is the bufnefs of the reft of the rank to keep up to him._Eyes remain in all cafes to the wheeling hand, till a new_order is given by the commanding officer.

All Filings are made quick, clofe, and at filings. the lock-ftep. Files are at notime to open out, on occafions of exercife, parade, or man@uvre; but they will often be fo permitted and orDERED, when marching in the ftreets, or in common route marching, when the march by divifions cannot fo conveniently take place.

All Facings muit be accurately made on pivot the left heel. Pivot men muft cover carefully men. and exacily. In wheeling backward, the ftanding man faces the opofite way to what he does if wheeling forward.- Yivot men, whether in wheeling into column, or in wheeling into batI talion,

## [ II ]

talion, when once ponted, are to remain immoveable, and do not hift in confequence of platoon-drefing, nor on any account, but by order of the commanding officer of the battalion, when he finds it neceffary to require a more correct dreffing from the whole.

Pofition.
The great observance of the foldier in the ranks, and under arms, is the fquarenefs of the fhoulders and body, the head to the front, and the eyes only glaneed to the point of dreffing. When the battalion is balted, and a moreaccurate $d r e f / n g$ is ordered; the head may be a little turned during that operation only, and each man fhould jaft diftinguifh the lower part ${ }^{\text {b }}$ of the face of the fecond man from him:- Whether in movement, or halted, each man io juft to touch, (without crowding) his neighbour's arm, towards whom he drefles, and to depend on that chiefly for his line.
March.
At the word March, the famp of the foot is not to be inade, but the firft tiep is to be taken as firm and lengthy as any other, and the body of each man, if in his true pofition under arms, is prepared for it by an inclination forward. On the perfect exccution of this depends much of the accuracy of march.-On the word March, the firft Itep in all fituations is taken with the left foot.-When the commanding officer of the battalion gives the word March, the whole ftep off together, whether in line or in column. When he gives the word Halt, the whole halt at shat inftant.

At the word March, eyes are directed to the pivot flank, if in column, or to the head of the file if filing ; to the colours, if marching in battalion; and in general to that point by which they are conducted.

At the word Halt, the foot in the air finifhes falt. its ftep, and the other is brought up to it.- Eyes remain directed to the pivot flank, if marching in column; to the colours, if in line ; or to the wheeling flank ${ }_{3}$ if wheeling; and in general, to the point to which shey were turned when in movement, until a new order commands a new dreffing, Whenever the word $D r e / s$ is given by platoon $r$ ficers to their platoons, eyes are turned to the pivot, where the officer is, and from whence he corrects them upon a diftant object.

In marching in line, each man muí preferve line. his body perfegtly fquare, and juit feel the touch of nis neighbour, who is nearer than himelf, to the directing point; and the rear ranks are to be well locked up, particularly when firing. In marching in battalion, or when halted, rear ranks will be locked up; but in marching in column, smey may in generit ve at one pare atitames: the fteps are to be taken firm and marked.

All alterations in corrying, fupporting arms, Eve. Carriage oi $^{2}$ are done by the whole battation at once, whether armac in line or column, and not by the divitions of it feparately, -The commanding officer gives the word, and not the plation officers; and no fuch change is at any time made, but in confequence of his command; the men therefore in all cafes, wheel, balt, march, drefs, E'c. with their amms carried, fupported, Eric. according as the laft given command directed them. The fame is to be obferved whenever the battalion, moving in line, or column, changes its time of march.

In column, when the right of the battalion is pivot in front, the left is the pivot flank; and when Flanks. the left of the battalion is in front, the right is the pivot flank.

In marching in column, the pivot files of men Pivot Fites

## $\left[\begin{array}{ll}{[3]}\end{array}\right.$

next to the officers, mult have great attention in covering, when tie movement is made in afraight line, as they are points on which the formation is made, and therefore for that purpofe, they remain clofe to their pivot officers, who in that Situation cover and give diftance.

Supported arms hould only be allowed when halted in line, or when moving in column.-But the march in line, and in general all wheelings up into line, and all formings of the line or dreffing it, hould be made with carried arins, as the only fituation which preferves the true diftance of files, or can give an accurate line.

## Covering Platoon Serjeants.

Potrion
 of the Co vering Serjeanc. and preferves his place in line, or on the pivot flank in column, whenever the officer's duty requires him occalionally to quit it. - In battalion, he covers in the rear rank.-At open order, he moves into the officer's place in the front rank. At clofe order he leaves it for the officer to take it. In the march in echellon he is on the outward flank of the tront rank.

In Column.

When the battalion breaks ipto column to the right, or left, the ferjeant falls back two paces; and when the wheel is finithed, he covers his officer on the pivot flank. When the Column marches, if the officer is in front of the platoon, the ferjeant is on the pivot of the front rank, and is anfwerable, for the platoon diftance; if the officer remains on the pivot flank, the ferjeant then falis behind the tear, rank, and covers the jecond fle from the pivot.

When from column, the right in frost pla- Wheeling toons wheel up to the left in line; the ferjeant, into line. at the word Wheel, goes to the right of the tront rank of the platoon, and wheels up with it, thereby preferving the officer's place. If the wheel is to the right, the ferjeant is behind the right file, ready to move up to the officer's place at the conclution of the wheel. On all occafions, when any platoon (which is then feparated) joins in line to the one on its right, at that inflant mult the covering ferjeant be on its. right, to preferve the place of his-officer, who may be employed in dreffing his platoon.

When the platoons wheel either into line, or teading into column, the ferjeant of the leading platoon platoon. runs out, and marks the point in the line of pivots, where its flank is to halt.

When platoons countermarch in column, the counterferjeant moves into the officer's place (when he warct. quits it to lead in file), faces to the right-about, ftands faft, and becones the pivat point for the front rank leader to clofe to after the enountermarch is finifhed, and his place is occupied by the officer after dreffing his divilion.

When the platoons from columns file in or-In File. der to take a new line, either to the front or rear ; the ferjeant of each fucceffively, as it arrives within thirty yards of that line (and no fooner), runs out, takes diftance, places himfelf on it, and remains as a point to which his officer is to bring, and clofe in the pivot flank man of his platoon, and as a point which the officer himfelf is afterwards to occupy.

Whenever the battalion halts to fire, the fer. Firings. jeants fall back, and in concert with the fupernumerary rank, keep the rear ranks well locked up, and attentive to their duty. - When the bat-
talion again moves, ferjeants refume their places.
sub-divifions.

Pioneers.

Clore column.

When the battalion is in column of fub-divifrons, if the officer is ordered to march in front of his platoon, the ferjeant is ' on the pivot of the leading fub-divifion.- If the officer is on the flank of his leading fub-divifion, the ferjeant takes the flank of the fecond. In column of fections the ferjeznt alfo takes the flank of the fecond fection.

In clofe column the ferjeant is on the flank of the rear rank behind his officer; and in forming line after the balt, front of the platoon, he remains on its outward flank.

The Pioneers in column of march, are in front.-In line; they are formed two deep behind the center, and nine paces from the rear rank.

Drum. mers.

Drummers in column of march, or clofe column, are with their companies, and on the flank, not the pivot one-ln line, the grenadier and light diummers are fix paces behind the rear rank of their companies.- The battalion drummers are in two divifions, and formed fix paces behind the third and feventh companies.-In parade, at open ranks, the drummers preferye their fix paces from the rear rank.
Whenever the platoon is cautioned to wubeel forward or back ward any named number of paces the ferjeant immediately pofts himfelf before or behind the tenth, or any other given file, from the ftanding flank, and takes the oroered number of paces; when his platoon bas conformed, he places himfelf on its out ward flank.:

The Music, in open or clofe column', are on the flank, which is not the pivot one; in line they are in a fingle rank behind the center, twelve

## $\left[\begin{array}{ll}{[6]}\end{array}\right]$

twelve paces from the rear rank; in parade, at open ranks, they are between the colours and the front rank.

Drummers, mufic, pioneers, \&c. will take care Mufic, \&c. not to impede the flank movements of the clofe column, nor its formation into line, but will get ints the rear of their refpective battalions as foon as they are difengaged from each other.

## Altentions in Platoon Officcr's.

When the battalion is formed in line, com- Pofition of pany or Platoon Officers are all on the right of platoon their platoons. -In column, they are on the pi- officers. vot flank, unlefs particularly ordered into the front of each platoon, if a march for any confiderable diftance is to be made. - When on the pivot fianks, they are anfwerable in their own perfons for diftances and covering: When in front, their ferjeants, under their direction, preferve the ordered diftance.

In wheeling from line to column, each moves wheeling out, and places himfelf one pace before the cen- into coter of his platoon ; each turns towards his men lumn. during the wheel, and inclines to his pivot Gank; each gives his word Halt, Dre/s, when his wheeling man has juft compleated his degree of wheel ; each fquares his platoon, but without moving what was the ftanding flank; each then places himfelf on the proper pivot flank.-After the wheel into column is cumpleated, no one is to caufe his platoon to fhift, by way of covering on the pivot flank, unlefs fo ordered by the commanding officer, or that in the courfe of marching a ftraightline is gradually taken up.

## $\left[\begin{array}{ll}{[17}\end{array}\right]$

Wheeling into line.

In wheeling from column intoline, each places himfelf one pace before the center of his platoon; each turns towards his men during the wheel, and inclines towards the pivot of his preceding platoon, each gives his word Halt, when his wheeling man, on whom his eyc is fixed, is juft arrived at the next ftanding pivot man ; each then from that next pivot man corrects the interior of his platoon upon his own pivot man; each then takes his place and remains fteady on the right of his platoon.

Whesling in column on a fixed point.

If the column is in movement, and platoons are fucceffively to wheel into a new direction, each officer, to whatever hand he is to wheel, gives his word from the point he is then placed at, whether in front, or on the flank.-If on the wheeling flank, he conducts it. -If he is on the ftanding flank, he fteps out two or three paces, the better to iee that his platoon wheels quick, with a lengthy fep, and that he may time his word Halt; this done, he is to fall back to his place on the pivot flank, no longer to look to his platoon, but having his eye fixed on the officer of the preceeding platoon, he is to give his word Narch at the iisfant that officer is taking the latit itep which eftablifhes the proper diffance betwixt the platoons.
On the pi- When an officer is marching on the pivot vot flank. flank, he is to be anfwerable for diftance and covering; thefe circumftances alone muft folely engage his whole attention, be can only occafionally give a glance of his eye towards his platoon, which mult drefs to him of courle, and without any particular direction.

Counter march of platoons.

When platoons in column are each to counmarch on its own ground, the officer when his platoon faces, goes to that flank, which is to de-

## [ 18 ]

come the pivot flank, conducts his platoon in file, and clofes its leader to the ferjeant, who has remained to mark the pivot, halt, fronts, and drefles it fquare; he then places himfelf where the ferjeant Rood.

When the battalion marches in line, officers In line. then become individuals, equally attentive as the foldier; nor can officers then be attentive to any thing but the correctnefs of their own perfonal march, every operation then depends on the word from the comnanding officer, who moves, halts, and dresses the battalionsWhenever the battalion is in line; officers give no commands, except in the firings.

When the platoons of a column file feparately in file. so a flank, the oficer conducts the head, and when he arrives within thirty paces of the new pofition, in which he is to form, he detaches his ferjeant to inark the point at which ate is to place his pivot front rank man, either in fili.g to front or rear; the officer ftops at that ferjeant, and balts, fronts, and dreffes his platoon clofe to the ferjeant; he then, himfelf, after correcting his platoon, replaces the ferjeart, who falls back to the rear rank.-In Eiling, diftances and dreffing are generally taken from that hand to which by a face of the platoons, the whole would ftand fronted in column, and the line breaks into column towards the directing point.-The leaders of the third, fourth, \&cc. platoons, from the directing flank, are never to overpafs the ftraight line which joins the heads of the firft and fecond, but are if any thing to be behind it, till they arrive and halt exactly in the new line. - In movements to the rear, diftances and drefing are al. ways taken from the fame point to which they would be made if the movement was to the front,
that is, from the left, in going to the rear, if it fhould be from the right in going to the front.

Leading officer.

On the leading platoon officer of the column, much of the precifion of march depends; he mult lead at an equal, fteady pace; he mult lead on two objects either given to him, or which he himfelf takes up after every alteration of pofition ; this demands his utmoft attention; nor muft he allow it to be diverted by luoking at his platoon, the care of whofe regularity depends on the other officers, and non-commiffioned officers, belonging to it. -The fecond platoon officer muft alfo be fhewn, and know the points on which the firt leads; he is always to keep that firfo officer and thofe points in a line, and thofe two officers, together with the placed inounted offacers, thus become a direction for the othes pivat officers to cover,-In marching in oper
 the fecond file from the pivot officers, that the D雨cere may the more correetly fee and cover each stituer in column.

When pivers march.

In the column of march, after the word Hass is given, no one is to move, and pivots particularly muft remain where they are then placed. In this.fituation, when ordered to Form, each plasoan Wheels up to its adjoining pivot; the whole will then, perhaps, (as in the cafe of marching on a road, alung the different turnings of a height, \&c.) be in a winding line, and muit not attempt to get into a ftraight line, unlefs fo ordered by the commanding officer to anfwer fome particular object.
Wheeling When the platoon wheels backwards, from backwards. line into column, the fituation and bufinefs of the officer is the fame as when wheeling forwards. And he balts and drefles from his pivot flank, which he gains during the wheel.

## [ 20 ]

In clofe column, divifion officers are on the In clofe pivot flanks.-In forming line, before the divi-columns. fions face, they are fhifted to the leading flank, if neceflaty.-The officer of each fops in his own perfon when the divifion nearer to the forming point than himfelf receives the word, Halt, Front. -He allows his ferjeant to proceed with the divifion; at the due inftant gives his word Halt, Front, Drefs, and as foon as the front of his divifion is clear, the word Marab conducting ir into line.-Before the divifion arrives within three or four paces of its ground, the officer will have fteppedout nimbly to the flank of the preceding divifion, and will be thus ready to give the word Halt, Drefs, at the inftant his inward flank manjoins the preceding divifion.-- The mendrefs by the formed part of the line, and the officer correats then ons the known diftant paint. -He then refumes his platoon place, which has been preferved by a ferjeant. - When the clufe column, or part of it, forms line on a rear divifion - the officer of each, when the one behind him halles, fronts, will fep nimbly round to the rear (and without impeding his divifion, allow his Serjeant to proceed), from thence he can better judge the proper moment of giving his words Halt, Frons, to his divifion; he then places himfelf on its outward flank, and marches up when his front is clear.

The officer of one of the center platoons is gelours. always in open column to preferve diftance for the colour files.-The colours wheel upinto column, with the leading center platoong. and place themfelves. behind the third file of men from its pivot flank; when the line forms, they clofe in to that flank.

When offecers march in front of their divifi- In front ons, the mult in their own perfons keep fo clofe divitions.

## $\left[\begin{array}{ll}2 \mathrm{I}\end{array}\right]$

to the preceding ones, as not to hinder the flank of their own divifion from preferving its propes diftance.

Wheels in column of march.

Clore column.

Supernu. merary rank.

When the head of a column of march changes its direction, and that marching in an alignement is not in queftion, inftead of making regular wheels on fixed points, the officer who conducts the leading divifion will often be directed gradually to bring it round into the new direction, by the turn of the outward fhoulder, making both his flanks continue moveable; but each fucceeding divifion, without the formality of command, or halt, does the fame thing, the whole attention refling on each pivot flank, which at no rate muft encreafe its diftance ; but during this operation preferves the fame equal time and ftep at which it was before moving, wheeling up from open column, or in moving up from clofe column, or in marching up from echellon, \&c,-the conducting officer moves nimbly to his point d'appui, fome paces before the arrival of his divifion in the line, and from thence gives his word to balt, and inftantly dreffesit.

Officers and ferjeants of the supernumeraRY rank are in the rear of their refpective companies, -when the battalion is halted, or marching in line, they are three paces from the rear rank.-In open column, they are within one pace of the rear rank.-In clofe column, they go on the flank of their divifion which is not the pivot-Their great attention during movements is, that files are correct, ranks keep up, and that perfect order is preferved among the foldiers, rircumfances in which they greatly affift the platoon officer, who having the impor-

## $[22]$

tant abjects of diftance and covering of pivots to obferve, cannot in fuch fituation be giving minute directions to his platoon, without lofing fight of his mere material duties.-During the firings, the fupernumerary rank, aflifted by the platoon ferjeants, are to keep the rear ranks well clofed up to the front: and to prevent any break beginning in the rear.

The Staff (adjutant accepted) in line are Staf. three paces behind the mufic.-In parade at open. ranks, they are on the right of the grenadier front rank.

It is the particular bufinefs of the Adjutant adjutant at all times to afcertain the direction on which gives the column is to move, or on which the forma- point. tion of the line is tobe made. For this purpofe, he ought to be mounted, otherwife he cannot properly difcharge this important duty; and he can be much affifted in it, by having two or three camp colour men, or non-commiffioned officers properly trained to line themfeives quickly with any two given points.-He is to take care, that the point where the battalion in column enters ant alignement is afcertained to it. When it is moving in that alignement, that two points a head of the column are always prepared.- When it wheels up into line, that a point beyoad each flank in that line is afcertained.-W hen the line is to be prolonged, and has wheeled backward by divifions, that two points in the exact line of the pivots are ready for its march. -When the clofe column is to form in line, that two points to each flank are given:-When the battalion changes pofition, either by files or by the diagonal march of divifions, that there are points given on which the pivots of files will cover, and can drefs their divifions upon, from their feveral

## [ 23 ]

points of appui.-In thort, that upon all occafions, fixed points of forming, dreffing, and march, a:s given, except in advancing in line, where the afcertaining fuch points does not depend on the adjutant.
Echellon.
When the battalion changes pofition by the echellon march, the named divifion wheels its roth file into the new direction.-The other divifions wheel sheir roth file half the number of paces as the named one. The Serjeant is on the outward flank, the Officer on the inward flank of each divifion.-At the word March, they move on, preferving their relative diftance, and covering of pivots from before them, and juft before the inward flank of each divifion arrives at the outward flank of its preceding one, which is already halted in line, its officer places himfelf befere that flank; and when his inward man touches it, he gives his word Halt, Drefs $u p$; if the movement is to the front, and dreffes his divifion on the diftant given flank point, fo that his divifion is iteadied before the arrival of the next one.-When the change is made to the rear, the retiring part faces about before the divifion wheels are made, proceeds as above, and each officer balt, front, drefs back his divifion when its inward man touches the preceding formed one.

> Sitentions of Commanding Officers of Battalions.

The battalion may be confidered to the line, what the platoon is to the battalion.

Field Officers mounted.

Commanding and Field Officers are always to be mounted, and, unlefs they are active on horfeback,
back, it is impoffible for them to fee, to correct, to prevent miltakes, or to move writh that difpatch which is neceffary from one point to another.

Whatever operation is to be performed by the Comewhole of the Batialion at once, is done upon the ${ }^{\text {rands. }}$ word from the commanding officer, without any repetition being made by platoon officers; he puts it in motion and balts it, whether in line or column; he wheels it from line into column, and from column into line; he orders arms to be carried, fupported, \&c.; he dreffes is from the center, when it has marched, and halt, and from what was the leading flank when it has wheeled up from column into line.

Before the column marches, the commanding points of officer afcertains points to the leading officer, and march. when he intends to change the direction of the march he gives new poincs, and he watches over the juft leading of the column. He takes care that all wheels of platoons are made at the identical point where the leading platoon wheeled; that all doublings of fub-divitions are made fucceffively in the fanie manner, and at the fame point ; and that forming up to platoons is made at the fpot whers the firft forming up is made. -That in all diminutions of the front, the natu- Points of ral order of the column is preferved, whether the doubling right or left of the battalion leads. - That a co- and luinn of half platoons occupies no more fpace wheling. than a column of whole platoons, viz. juft fufficient to wheel up into battalion.

When the open column marching in an a- Hoft of lignement is to form in a fraight line, and for the coshat purpofe balts; the inflant that it does halt, lumn. the commanding officer from the head of the battalion at that inftant corrects the pivot files of men (which ought not to be neceffary) in the

## [ 25 ]

true line, and upon a rear point.-But if the march is making in a winding direction, and that the intention is not to form, or not to take up a ftraight line, the Platoons remain on the ground on which they balt, and do not move in any thape, until they receive a further order, either to form in:line; or firf to cover, and then to form; or to continue the march.
Drefisag, The cominanding officer always conducts the head of his battalion column to the point at which it is to enter a new line, and he takes care in time to difpatch a mounted officer to afcertain that point.-When the platoons wobeel up into line, he inmediately (if neceffary) corrects the drefling of the Battalion from the flank which led when in column, and that generally upon a point beyond the other flank.
com.
mands in Jise.

When acting in line with others, the Commanding Officer of each Battalion conforms to the movements of the regulating one, and from it takes and rapidly repeats his words of Hait, WEbel, March; \&c.; and the leaft delay in repeating the words Halt, or March, muft undoubtedly diforder the line in proportion to that delay, for the whole of a line fhould march, or bolt, at the fame inftant.
furenions In line, the commanding officer is in rear of in lire the colours, from thence, by marked cautions, he makes his batalion flep-out, or flep-finort, or incline, as is neceffary to preferve its place in the reneral line; his great attention is to fee and jrevent the beginning of faults, and not to wait till they have had their effect; by watching and regulating his advanced ferjeants, he beft regulates his battalion; the fquarenefs of the march, the compactnefs of the files, and the equality of flep, are the great objects he is to have in view.
-The other mounted officers are behinat the wings, and can affift much in preventing faults; and in correcting them.

All the battalions of a line muft balt at the Dreffing fame inftant in confequence of that word, re-in line. peated by coinmanding officers, whether they are then correct or not in line.-Each half battalion from its own colour, and the men looking to it; will be immediately dreffed on the colours of the next adjoining battalion; by this means‘a gëneral continued line will be obtained, and, at any rate, a flraight one between each two colours: and if all the colours fhould have truly balted in one line, the whole corps will be completely formed in a ftraight line. But if the balt is not juftly made, and that a better line mutt be obtained, the colours of the defective battalions will be brought into the general line; the platoon officers will quickly arrange themfelves, eyes will be ordered to the right, and the men will in an inftant move up; too much celerity cannot be ufed in completing this opera:tion.

A fingle battalion, when it halts, is dreffed on its right or left center company, and is theretore in a fraight line. - Two battalions drefs each from its center on each other's colours, their. outward wings conforming, and are therefore in: a ftraight line. - Three or more battalions drefs from the center of each on their next colour; and taerefore if all the colours halt in a line, the line of the whole will beftraight: if they are not in a line, the general line will not be: flaight (till a (pecial correction is made), but no flank will be thrown out of the general direction.

When a battahon tetires, and balts, it ought never to remain in that fituation, but be imine-
diately faced about, and dreffed to the proper front.
Intervals. - The greateft fault that a battalion in line can make is increafing its interval : bad dreffing may be remedied without danger, but a falfe diftance prefents a weak part to an enemy, and is not to be clofed, without a hazardous movement, and great operation of the-line.
sids in Commanding officers cannot take too much exercife.

Attentions.

Clofe cotumn. precaution to afcertain true points in the line in which they are to form, before the arrival of their battalions in ite.

When a battalion is exercifing fingly, a commanding officer fhould have two camp colour bearers behind each flank, properly trained, and seady to run out to that flank, to give points of marching, forming or dreffing upon the true line. -In doing which, one flank of the battalion is generally confidered as in that line, and often both.

Words of command cannot be fpecified for all the variety of circumflances and fituations that orcur; but commanding officers being themrelves clear in what is to be done, hould by diftinct and explicit orders, which they divide and adapt to the occafion, lead their battalions through all the points of execution with precifion ; this will always be found the fhorteft path, nor on any account hould any operation (once a batialion is affembled under arms) be performed in a carelefs or flovenly manner, which: will always be the cafe if the commander's orders are not pointed, loud, and fufficiently explanatory.

A battalion clofe column forms in line on its front divifion, on its rear divifion, or on a central one, according as circumftances require; and in all cafes the line formed upon is that on which

## [ 28 ]

which the head of the column or columns is halted before the formation begins, and therefore the divifion on which each battalion at any time forms, moves up at the proper inftant, and halts on that line:-When feveral clofe battalions, ftanding on the line, are to extend and form, the regulating and named battalion only can be obliged to form on a central divifion; each of the others wiil form on its front, or rear divifion, viz. on that which firft arrives at its ground, where it balts, fronts, and occupies its proper place, while the others move on, and fucceffively come up to it.

In forming line from clofe column, points Forming mult be given beyond both flanks in the directi-in tine. on of the line, and a mounted officer halts, and fronts, each divifion, which is equally neceflary for thofe that form upon a rear one, although lefs fo for thofe that form upon a front one. -The dreffing and correction of the line is from the firt sormed divifion towards the orher flank, and all the eyes of the battalion are of courie turned to that firlt formed divifion.

The fame number of points are required for As many the march in any alignement, and wheeling up points are into line of an open column of one battalion, as for one for that of feveral battalions, viz. one where the battalion line is entered, and (always) iwo beyond the head as for feof the column.- Therefore, though thefe precautions may appear formal for the movements of the baitalion when fingle, yet are they neceffary in all its exercifes; when it is recollected, that fuch battalion is in the place of and mult conifider itfelf as the leading one of the column, on whofe correct pofitions thofe of every following one depends.-The fame exactnefs is required in every extenfion from clofe column into

## [ 29 j

line, and in every forming and change of polition that the battalion makes.- ln fine, in order to qualify the battalion for acting in general line, it muft at its fingle exercifes work on points fixed and relative and make no chance and accidental movements and formations.
In all fitu-
Although on moft occations of movement and ations ex-formation, and at all times in infruction; deteraet points mined points marked by detached and mounted of march officers, are given : yet fuch helps cannot be exgiven.

The battalion in no fituation covers more ground than the proper ex: tent of its front. pected or depended on, when the line is advancing on an enemy, when a corps is harraffed in its retreat, and when it is unfafe to fend out officers, \&c.-In fuch fituations every thing will depend on the eye and judgment of conducting officers, who mult preferve fuch direction of movement, and reize fuch accidental points as prefent themfelves, and lead to tne object which is to be accomplifhed.
In whatever hape a battalion is moving, the commanding officer is never to lofe fight of this great principle, that the battalion fhould at no time cover more ground than its proper extent when formed in line.-Therefore if he is marching in line he mult takecare that his files do: not open; and if he is marching in column, his great attention is that his divifions do not open. For this purpofe his march muft be jult, and compact, his wheels quick, and all doublings up, or back, which alter the extent of front, mult be made fo as not to impede the general movements of the column or to change its diftances.- When the front is to be diminithed, he mult fee that the doubling divifron flackens its pace, and when difengaged from the other divifioi, that it inclines, well up; quick, and covers; thereby not impeding the divifion behind it. When the front is to be increáfed,

## $[30]$

increafed, the moving up divifion does it quick. and by oblique marching.

The commanding officer muft recoilect, that Marching in the winding movements of the open columis of in an alig: inarch, -the wheeling diftances muft be juft; that the pirots are to follow on the exact tract, which the leading one has traced out; that the whole, when ordered, halt on the precife ground they then occupy; and that when they wheel up and forms the line will then be a continued, but prom bably an irregular curved one.-But if a fraight line is to be entered and formed upon, from the point where the head enters, and not fooner, and where a mounted officer iemains pofted, does every platoon pivot officer begin to cover in the true line, to march in that line, and to preferve. his true diftance: nor muit any obftacle thatcan poffibly be furmounted, ever force the pivot. officers out of that line; although the men of their platoon, when it becomes neceffary, may open or widen their files from them.- And if the pivots on account of any material obftacle are thrown for a time out of the line, they fhould always, if poffible, move to the hand which carries' them behind the line, and again re-enter it when they can; and for which purpofe an officer, or non-commiffioned officer, fhould be placed where they are to re-enterit. - In marching in the alignement, the field officer fhnuld frequently place himfelf init, with a glance of the eyefee whe: ther his files preferve it, and correct them if neceffary.

As one field officer at a time muft command the battalion, the others prefent can only act in aid of him, nor can their fituation in all cafes be afcertained; but hould the commanding officer not be at the head of the open column (when it

## $[31]$

marches, and particularly when it halts) to correct, if neceffary, the pivots in the generdl line, another field officer, or the leading officer if no field officer is there, fhould inftantly atiend t. it, that the wheeling up may not be delayed. -If, in the courfe of exercife and inftruction, the commanding officer is not behind the center when the battalion marches in line or halts, the other field officer from that fituation can immediately give every proper aid in movement; or in lining as it ought when halted ; and in every cafe it mult be evident in what manner the commanding officer can be affifted.

Wheeling backward.

When the line is to break and wheel into open column of march, in almoft all cafes it is berter done by wheeling backward than forward, for the wheel is in this manner made on the pivot flanks; and although divifions may be une. qual, yet thefe flanks cover after the wheel, an advantage which is loft after the wheels are made forviard.

Actensions to Eche llon.

When a battalion makes a retired ECHELLON, or part of an echellon of a confiderable line: the commanding officer muft take great care to regulate his movements by thofe of the one preceding him, viz. that he preferves his parallelifin; his ordered diftance; his proper flank interval; and when the leading echellons halt, and that he is to move up into line, that the outward flank is not thrown too forward (which withous great attention will happen) and thereby perhaps be expofed to the enemies enfilade.
** The words marked in Capitass are given by the commandist af the battalion.

The words marked in Italics are given by the commander of she company.
