HIGH SCHOOL LECTURE

The copoluting lecture of the High School series was given in the assembly ball of the school last Thursday even-The chair was acceptably filled by Mr Joseph Thompson, and a short musical and literary programme pre-ceded the lecture. Miss Arnold ren-dered a very pleasing vocal solo, Mrs Towriss a couple of humorous readings, and Miss Bottomlev two choice violin solos. Rev Wm. Usher of this village then delivered a most instructive and interesting address on Jerusalem and and Southern Palestine, in the course of which a large number of splendid lantern views were displayed. The address was listened to with keen interest throughout, and the vote of thanks to the speaker, moved by Geo. Cowan and seconded by Wm. Glover, was enthusiastically and heartily given. The school and the audience were much indebted to Mr Usher for his very able and interesting description of his visit to the Holy Land and for the excellent views which he himself had taken during his trip.

BOX SOCIAL

The Bluebird Mission Circle held a very successful box social last evening in the school room of the Methodist church. The boxes were tastily made Ella Dwyre 86, Carmen Pennock and bidding was warm at times. A. 79, Cecil Taber 76, Olive Russell 75, M. Lee was auctioneer and filled the position almurably. Mrs T. S Ken-70, Hazel Davis 70, Zeno Leeder 70, drick occupied the chair and the fol-

were given:
Piano duet-Mrs Kendrick Miss Rhena Kendrick.

Gramop one selection.
Recitation—Miss F. Wiltse, Vocal Solo-Miss Gwen Wiltse. Piano Solo-Miss M. Rowsome. Recitation -- Miss Keitha Smith. Vocal Solo-Miss M. Slack.

Gramophone selection. Vocal Duet-Misses L. Gorman and M. Brown Vocal Solo-Thos. Horsefield.

Harmonica Duet--Misses M. Slack nd M. Brown. Rev George Edwards gave a address which was well received.

AT REST

At the residence of his daughter, Mrs Edmund Halladay, on Friday morning last there passed into the Rest of Paradise, Samuel Swayne, one of the early pioneers of this country, at the nced age of over 95 years.

The deceased was a native of Ennyscorthy, County Wexford, Ireland, and came to Canada over half a century ago before steamships were in use, and settled on his farm near Smith's Falls where he resided until about two years He possessed a remarkably ealthy constitution and had the unique experience of never requiring ry 75, John Donnelley 73, Robert the attendance of a physician. Even at Taber 72, Leslie Earl 70. Myrtle the close of his long life he had no illness, passing away as if asleep. In politics Mr Swayne was a staunch Conservative; fn religion an Anglican, being a member of St. John's church, Smith's Falls from the time of its erection as a parish.

The large concourse of friends and neighbors who attended the funeral service on Sunday atternoon in St. John's church attested their respect for a consistent honorable citizen. Interment was made in the church cemetery.

The Rev W. G. Swayne, rector of Athens and Lansdowne Rear is the only surviying son.

THE MARCH TO THE BATTLE-FIELDS

Clerical Suits a Speciaity.

March 21, 1915-Jonathan and Armor-bearer.-1 Samuel 14: 146. Print 14: 1-13.

Commentary.-1. A told attack (vs. 1-12.) 1. The young man that bare his -He was Jonathan's trusted attendant, who proved himself both brave and strong on this occasion. Let s go over to the Philistines' garrison

The Philistines had come to the very centre of Israel's country with a great army, and were eacamped on the opposite side of the valley from where Saul't small force was staying. 'ona-than's suggestion to his attendant was a bold one. Told not his father-It was not in keeping with military tac-tics for such a movement as this to be undertaken. Saul would not be likely to approve of the project. 2. Utter-n.ost part of Gibeah—Saul, with his six hundred men and Samuel and Ahiah, the priest, was entrenched on one of the many hills of the extreme northern part of Gibeah. Migron— The name means precipice. Six hundred men—His army that he had had as reduced to this small company. 3. Ahiah—A great grandson of Eli. He was the high priest. Wearing an ephod -The Ephod "consisted of two parts, of which one covered the back, and the other the front, that is, the breast and upper part of the body. These were clasped together on the shoulder with two large onyx stones, each havig engraved on it six of the names of the tribes of Israel. It was further united by a 'curious gird'e' of gold. blue, purple, scarelt, and fine twined linen round the waist." It was worn by the high priest of Israel.

4. Betwen the passages—From the description of the place it is evident there was a valley leading down to the main valley from where Saul was encamped, and one leading up on the other side to where the Philistines were. Between these, in the valley, were the steep rocks of hills mentioned, called Bozez shining, and Seneh thorn. 5. Over against Michmash— One crag was to the north in front of Michmash and the other south of it in front of Gibeah. Michmash and Gibeah were on opposite sides of a valley that extended nearly east and west about seven miles north of Jerusalem. The facts stated in verses 2-5 are thrown in as parenthetical to give details as to the conditions under which the as-sault about to be described was made.

6 These uncircumcised—Circumcision was a rite by which the Israelites were set apart as God's peculiar people. The Philistines were designated as uncircumcised, since they were not the Lord's people. By this term the Israelites expressed their abhorrence of the Philistines. It may be that the Lord will work for us-This expresdid not imply a doubt; it signified simply that the object he aimed at was not in his own power, but it depended upon God, and that he expected success neither from his own strength nor his own merit.—J., F. & B. To save by many or by few—The expression just before this indicates that Jonathan believed in God's ability to give success and that his power might be exercised on this occasion He expressed his faith clearly. He had a conviction that God would give the victory that moved him to go forward trusting in him. 7. I am with thee—
Jonathan's armor bearer had confidence in his master and also in God. He did not hesitate to go with him, nor did he attempt to turn him from

We will discover ourselves unto them-They would go to the garrison of the Philistines and would make doubt prayed before for guidance, and he proposed a test by which it would be clearly indicated what course he should pursue in the matter. 10. The Lord hath delivered them into our hand-This statement shows how implicitly Jonathan depended upon the Lord's direction and aid. A sign unto us—Our action will depend upon the words received from the Philistines. understood the weakness of Israel at that time, and believed they were hiding in the numerous caverns of the locality. They could not have known for what purpose. Jonathan and his armor-bearer had come forth. 12. Answered—The two had not addressed the Philistines, but their presence called for words from them. Come up to us-with this invitation came the knowledge of what Jonathan and his armor-bearer should do and what the Lord would do for them. We will show you a thing-These words may have been spoken in contempt or derision.

Dr. Clarke thinks the Philistines desired to show the men the strength of ! their defences.

II. A great victory (vs. 13-23), 13,-Climbed up-Immediately to the east of the village of Michmash exists a natural fortress, still called the fort by the peasantry. It is a ridge rising in three rounded knolls above a perpendicular crag. ending in a narrow tongue to the east with cliffs belo Philistines may have held this position, and this crag may have been the one Jonathan and his armor-bearer ascended. They fell before Jonathan— Twenty men fell before Jonathan and his armor-bearer in a space equal to one side of a square containing an acre. 14, 15. Great fear fell upon the Philis tines because of this successful attack and the terror was increased by the quaking of the earth, 16-23. Saul was within sight of the camp of the Philistines and saw what was being done there. He caused his camp to be searched to determine who of his men were missing. His little army joined in the battle, and those who were hiding in Ephraim came out also to help their brethren. There were Hews in the camp of the Philistines, who probably were slaves. These turned against their masters and the victory was great. European III. Saul's unwise demand (vs. 24-46).

Saul was much moved by the victory which was being ained over the Philistines, and rashly decreed that no man should taste food that day. He did not consider that his men would be better fitted to pursue the enemy if they should be strengthened by taking food. There was woodland then in that country and many wild bees. Hon-ey was produced in large quantities. Jonathan was ignorant of his father's decree and ate some honey. It was learned later what Jonathan had done and Saul was determined to have him slain in accordance with his decree, but the people interfered and saved

Jonathan from death.

Questions—What was the condition
of the Israelites in their relation to Philistines at this time? Where were the two armies? What did Jonatha propose to his armor-bearer that they should do? What test did Jonathan make to learn what he should do? Describe the victory gained by Israel over the Philistines. What mistake did Saul make? How was his unwise purpose changed?

PRACTICAL SURVEY.

Topic-Inspired leadership. Revealed God's power to Israel. II. Revealed Saul's true character.
I. Revealed God's power to Israel.
This lesson shows what great results attend individual effort. In Israel's extremity, under a most noble inspiration, help came through the courageous enterprise of Jonathan, who with his body-guard opened a campaign which overcame the enemies of Israel. The approach to the Philistine garrison would have been pronounced impassable by a less decisive and less courageous mind. Jonathan believed that it was the height of wisdom to give God the opportunity to re-veal His mighty arm. His thought was of the promises and purposes of God concerning Israel. It was not his own project that was to be carried out, but the advancement of God's cause. There was a profoundly religious spirit controlling the impulse which led Jonathan to act. He believed that God's help was not dependent on the extent or the degree of the means by which it is realized, and that His power is absolute. The inspiration of faith vindicated itself and the noble self-devotion that had plunged into this otherwise desperate enterprise led to a triumph more speedy and complete than even Jonathan may have contemplated. He was the hero of the scene. Saul had no thought of making an attack on the Philistines at that time. His recent transgression was now bearing some bitter fruit in his comparative inactivity and helpless, ness, When the Israelites, who had hidden in caves, saw that the army of the Philistines had met disaster, they helped on the victory. The faith of Jonathan had a glorious reward.

II. Revealed Saul's true character. It was a tacit understanding with Saul on the settlement of the kingdom that he might rely on the guidance of God. Samuel's exhortations and instructions emphasized the same, but Saul began to disregard God's will in his public acts and was now beginning to reap the penalty. Fear of the threatening dangers had seized on his heart; then impatience prevented him from waiting the time appointed by Samuel for sacrifice; then doubt of the trustworthiness of the divine promise came in. All this drove Saul to the purpose of helping himself, which dissipated more and more his trust in God. It was the root of unbelief from which all this sprang. Here began the unsteadines and passionate character of Saul's inner life, He was indeed fulfilling Samuel's predictions. In ac-cordance with his pretext that he must seek the Lord's face before going to battle, Saul sought to set forth proofs of his piety, and godliness, such as calling for the ark of God. showing a great zeal against those who transgressed the law, in the building of an altar to the Lord, in asking God concerning further military underthemselves known to them. 9. If they takings and in swearing by the Lord say thus unto us—Jonathan had no to punish the concealed sin of the people in asking him to decide where the sin was. Saul censured and checked the people, but not himself. It was his selfish notive that determined such conduct. He appeared more deeply affected by the neglect of some out-ward and formal duty than by the indulgence within himself of a wrong and impious mind. In the exercise of that self-will he imposed on the people They will be the unconscious bearers an obligation, with a penalty attachof a message from God. 11. The
Hebrews come forth—The Philistines no direct command of God would be infringed if the people failed to conform to his word. If anything could have brought Saul to a sense of his error, it would have been the discovery that his rash decree and oath had implicated his own son, and made him consider Jonathan's case on its merits regardless of his own reputation. The honor put upon Jonathan in his charge against the Philisines was evidence to all but the obstinate king that God worked with him. A tempor that God worked with him. A tempor-ary revolution saved Jonathan. The people, wiser than their king, rescued the well-beloved Jonathan. What Saul deemed a capital offense, reason and justice declared an unconscious transgression of an unjust decree. The re-monstrance of the people was just, devout, resolute, successful.—T. R. A.

FIFTEEN YEARS

Canal Guard Who Shot Comrade is Sentenced.

St. Catharines. Desiatch—Fifteen years in Kinssten Penitentiary was the sentence imposed this morning on Frank Hardey found guilty last night of manslaughter. In naving on Oct. 7 shot Private Theodore Burg of Judge Sutherland, in cellvering sentence, said the jury might casely, on the evidence, have brought in a verifict of murder.

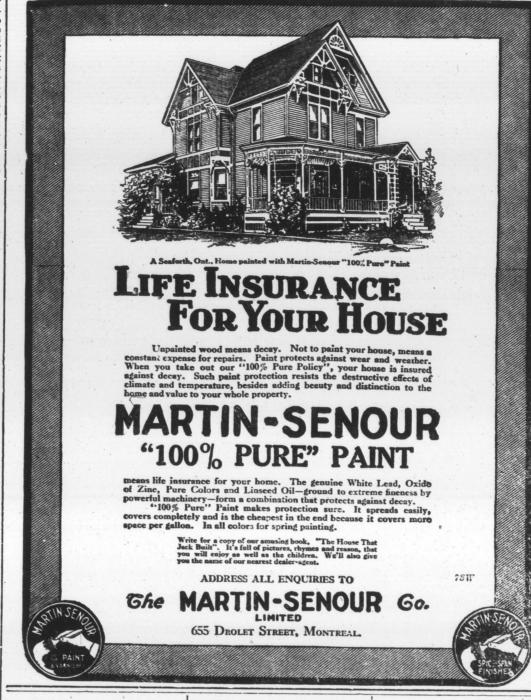

"It has been said," remarked His Lordship, "that it has been the custom of soldiers to point their rifles at each other in a joking way. Just here I may state it is a practice which should be frowned down by military authorities. It is foolish, and against the law."

To Hartley he said he might easily in the circumstances sentence him to life imprisonment, but would award a more lenient penalty.

Hartly took the sentence coolly, and had nothing to say.

Prof. Iyonaga, of Japan, thinks the European war will end aristocratic Private

war will end aristocratic

HANDLING DAIRY CATTLE. Dairying can be made a profitable

industry, and it can be the source of failure. We need dairying to conserve our soil, to better utilize our labor throughout the year, to turn into profit our low-priced forage crops, and to provide a sure and steady cash income.

Success in dairying depends not only on the cost of feed and the price received for the product, but a'so on the individuality of the man and of the cows. To be profitable the cow should produce as a Gaily average for ten months 215 to three gallons of milk, testing 4 to 5 per cent. fat. Three gallons of 4 per cent. milk means one pound of butter fat per day. This should bring an average price throughout the year of 28 cents, or \$84 for 300 days. In addition to this she will to calves, pigs and chickens. There is also the value of the marure, and the calf, which should total \$25 or more

per year. The most profitable ration to feed such a cow would consist of pasture, silage, alfalfa and a carying amount of mixed grain, consisting of bran, meal, and corn, milo or cottonseed kaffir. Silage is a very valuable feed when pasture is short. In fact, many dairymen consider it indispensable. If it is not available, its place will have to be taken by green soiling crops, supplemented in the winter by some such feed as dried beet pulp. Such feeding will mean a total cost of \$60 per year, divided about equally be-

material equipment will consist of a separator, if the cream is to be seld. If one horse will pull and the other or churned, the ordinary utensis for will not, it is advised to hitch the

the cows, a good roof with three sides enclosed, is sufficient in our climate. A silo and a good sanitary floor in the milking stable are also essential to

the best results. Cows do not, as a general thing, eat more food than they can properly digest. The more food consumed the more milk produced. The greater the amount of protein in the ration, the larger the milk flow. The great secret of high dairy production is the cow with an enorm ous capacity for assim-

The body of the cow is warmed by the food it consumes. If through exposure to cold or rain, the temperature of the body is reduced, more food will be needed to keep up the inside warmth. If this demand is very great, there will be little or none left for milk production. Cottonseed meal fed to dairy cows

rroduces hard butterfat. Linseed meal and gluten produce soft butterfat. Carrots have a feeding value far Leyond the nutriment they contain. the trees, over which the wire They aid digestion.

Experiments made some years ago

handling the milk, and a shelter for balky horse's inside trace across the tongue to the inner end of the other horse's single-tree, then hitch the pul-ler's inside trace across tongue to inner end of balker's singletree. The balky horse will be forced to pull.

> Salt is about as necessary to the system of sheep as food. Sheep are best judges of how much salt they need, hence it should be placed where they can reach it at all times. The old-time way of regularly salting them is all right, but it is better to give them access to it at will. Where sheep are not salted regularly they are liable to partake of too much of it at a time, and sometimes dropsilcal conditions are the result.

Not infrequently valuable trees are killed or seriously injured by using them for anchors, for guy wires, or for clothesline posts. If a tree is to be used for this purpose only temporarily, several blocks of inch board two inches wide should be placed around pass. This method is not safe for more than two or three years .A better way 200 days. In addition to this she will produce skim-milk worth about a third as much as the butter fat, for feeding as much as the butter fat, for feeding cent., and when fed to calves, 6 per anchorage a bolt with a hook at one

> By selecting a good herd 'bull, of some particular breed and giving caredairy cows, alfalfa can be made to take the place of at least one-half of a good herd of either book and the grain usually fed. As the made to the grain usually fed. As the made to the grain usually fed. ful attention to the raising of calves, ype, whichever is aimed at.

It has been asserted by some dairymen that the feeding of crushed oats to cows will improve the flavor of milk. To ascertain the correctness of this theory a series of experiments was made by the Bureau of Animal Industry of the United States partment of Agriculture at the experi-mental dairy farm at Beitsville, Md. Six cows were used in the experiment; three were fed a grain ration of cornmeal, bran and cottonseed meal; the other three were fed a grain better, Hogs are never injured by eating all the ashes they want, but it is not safe to give large quantities of samples of milk from the cows fed good cow. A poor cow might do little or no better than the make her own payments, and such a cow would never become profitable. A really crofitable herd can only be built up by keeping an accurate check on the production of each cow and disadriling the poor coes. Many a dairy hard would yield a larger net profit if a third, or in some cases, a half, were sold for butcher stock.

Aside from coas, the necessary material equipment will consist of a material equipment will consist of a material equipment will consist of a larger will preserve the health of the hogs, and sows which have had an abundance of such food rarely cat their young.

Will be tester Hogs are never injured by eating all the ashes they want, but it is not safe to give large quantities of samples of milk from the cows fed such to animals not accustomed to it. The salt and ashes mixture should be kept in a low box under cover, where it will be protected from rain, and it should consist of about two quarts salt for each bushel ashes. Many feeding a larger net profit if a third, or in some cases, a half, were sold for the hogs, and sows which have had an abundance of such food rarely cat their young.

If the cream is to be sold.

If one horse will pull and the other ous persons in the dairy division and they were asked to indicate their pre-ference. In all 30 activities 1.

CARDINAL FACTS

creased production. Two people's deas may be an im-rovement on those of one. Canada's future depends upon our actions of to-day.

In serving the Empire we are serv-

ing ourselves. Markets are not created, won and eld in a day.

Now is the time to prove ourselves the granary of the Empire.

We have the soil, we have the rescurces, we must have the energy to use them to the greatest advantage. As we acquit ourselves at this crisis. so will be our prosperity and price in

e years to come.
With more than half of productive Europe engaged in war the large sec-tions decimated, other countries, and especially those forming the British Empire, will have to make up deficiencies, both in foodstuffs and raw material.

Great Britain imported 51,786,915 bushels of wheat from Canada in 1913. She imported 80,013,879 bushels from the United States. She also imported 12,789,969 bushels from Russia and Central Europe. Great Britain imported 24,148,833 bushels of barley in 1913 from Russia,

Roumania, Turkey, Germany and Austria. From Canada she took 5,977,533 bushels, or less than a fourth. Great Britain took 22,454,683 bushels of oats from Germany, Russia and Roumania in 1913, of which one-half

was from her bitterest and most savage enemy of to-day.

Great Britain imported 185,125,000

bushels of wheat from August 1, 1912, to July 31, 1914. Russia exported 163, 267,000 bushels and Roumania 45,643, 600 bushels in the same time. How far is Canada going to help to make up the deficiency?

Great Britain imported from August 1, 1913 to July 31, 1914, 54,307,000 bushels of oats. Russia exported 34 750 000 bushels, Germany 25,077,000, and Rou-mania 17,195,000 bushels. Who is going to make up this deficiency of 77,000,000

erable childhood and youth.

me go to him at once!'

the earl, diplomatically.

shawl around her.

said the duke.

few moments for the duke and duchess, who had gone to their dressing rooms to change their travelling suits. At length they both entered together. And after an affectionate greeting, they sat down, and the duchess said: 'Your letter surprised us very much,

erable childhood and youth.

"Amen! Ay, thank Heaven!" murmured the duchess. Then, turning to the earl, she hastily inquired:

"But where is he? Tell me! Let us go to him at once! Ah! I have been away from him long enough—his whole lifetime! Let me see him at once! Sick and wounded, too! Let was the matter," added the duke.
"Heavens, Wellrose! how your face changes! What can have happened?" 'Out with your bad news at once! It will not improve by keeping," said

e duke, uneasily.
"There is no bad news, father, though there is something to tell that will startle you very much."

'Tell it, then.' "First, let me offer my mother a glass of wine and a biscuit," said the earl. And he rang and gave the order. After the refreshments had been brought and tasted, the duchess said: "For mercy's sake, my son, do not keep us longer in suspense.

"No, do not," added the duke "Then read this document, my father, and see if you recognize this little relic, my mother," said the earl, as he drew a small par-cel from his bosom, and placed Dr. Seton's confession in the duke's hand, and the little embroidered sock on the

The duke unfolded the paper and began to read.

The duchess picked up the little

sock, looked at it, and, with a half-suppressed cry, turned her eyes on Her color came and went; she trem

bled much; she could scarcely articulate the question:
"Where did you find it?"

"Folded in the document that my father is reading," replied the earl,

in a low tone.

She rose, pale and trembling, and

stood behind the duke's sofa, and leaned over his shoulder to look at the document. His face was as pale as hers. His eyes seemed starting from their sockets, as they followed the lines of that written confession. But, conscious of his wife's approach, without taking his eyes from the weakened condition it will be necespaper, he put out his hand and drew sary to break it to him gradually. My her to a seat by his side, wound his father, if you will trust to me, I think arm protectingly around her. and let I shall perform it more judiciously read as he did.

Their faces paled and paled as they read. Sometimes her head dropped upon his shoulder, and a great, heaving sob convulsed her bosom. And then his arm closed tight around her: but his eyes never left following the lines of that paper until he had read it to its close. Then he turned toward his wife, and their eyes met in grief

The ducness found her voice first: "Oh, my son! my son! my first-born! my best beloved! Oh, my inno-cent! my helpless! what has become of you? What has been your fate?" she cried, wringing her hands in an

anguish too deep for tears.

The Earl of Wellrose, who had been standing pale and silent before them, now dropped on one knee beside her,

"Dear mother, be comforted. Your son, my brother, lives."
"Lives!" echoed the parents, in a

breath.

"Yes, lives! Be assured of it, for I know it."

"Lives!" said the auke again. "Ay but his life may be worse than death."

"Not so," said the earl, hastily. "He has won honor in the service of his country. He was foremost in the glorious charge at Inkerman. His hand placed his regimental calors on the walls of Sebastopol. And though he has returned wounded and ill, he will yet do well."

"On which are always unselfish, Well-rose But let us examine this question in a legal point of view for a moment. You may not be so great a loser as at first sight it would appear," said the duke.

yet do well."

Leg listened to him with breathless up inquiringly.

"Our first youthful marriage, secret-They listened to him with breathless caught interest. Suddenly the duchess caught ly solemnized in England, and afterhis arm, strained her eyes into his ward openly acknowledged in Scotland

was certainly legal in the last-mentioned country, though not in the first. The son of that first marriage would father's and his mother's estates in

"Most assuredly," put in Lord Well-

"But not in England," continued the duke "And, although he is even now master of Seton, and will be, after his mother, Baron of Linlithgaw, he cannot possibly become, after me, the Duke of Cheviot. This title, with all its appendences, in England, will be the inheritance of yourself, Wellrose, as the sole son of the second marriage which was legal everywhere," said the duke

"And yet, father, in strict justice, if nc; in law, my elder brother should have been heir to all." "In strict justice, yes," admitted the

'Then, I repeat, my brother shall have strict justice. It can be managed.
A petition to the House of Lords would surely get a decree constituting that first marriage legal in England, as it is in Scotland, and making my elder brother the heir to all your titles and estates in both countries. Such decrees, under such justifiable circum-

stances, have been granted heretofore, and will be hereafter," urged the earl.
"I am, of course, aware of that, Wellrose. But you, my son—you who have been brought up to consider yourself the heir?" said the duke with teers in his case. tears in his eves

"I repeat that I must not be thought of in this matter. I have held my brother's birthright long enough. I must hold it no longer. Besides, I can make my own place in the world, dear father." Southampton to meet, though at that time I neither knew nor suspected his near relationship to us."
"Thank Heaven, the boy will do us

"Heaven bless you, my boy; you have a noble heart," said the duke.
"Kinlock is here, father. Would you fike to see him?"
"Yes, I should. I should like to

hear from his own lips further details of this discovery."

"Then I will send him here to talk

with you, while I go up to my brother's room and break the news to him."

And the earl kissed his mother's hand and left the room. He found Dr. Kinlock pacing up and

down the hall. "Have you seen my brother lately?" Lord Wellrose. "I have just left him," answered "Dear mother, be patient. He is not far off. You shall see him very soon. He is in the neighborhood," said

the doctor.
"He is awake, then?"
"Oh, yes, awake and much refresh

"Why did you not bring him to this house?" inquired the duchess. But before the earl could answer the quesed."
"Then I will go to him .The hour for the revelation has come. Go you, dear doctor, to my parents. They are in the blue drawing room waiting for you," said the earl, as he bowed and passed up the stairs. ents, related the history of Dr. Christopher Kinlock's accidental discovery

He found Benjamin still reclining on his sofa, but looking brighter and stronger from his sleep. The earl sat down beside the inva-

lid, took his hand in his own, and, while he held it, said:
"My father and mother are here for

a few days. They wish to see you, Benjamin, as soon as you are strong enough to see them.

secret of his birth?"

"No, my father." Dr. Kinlock and myself thought it due to you and my mother that you should be told of it first. So I wrote, requesting you to "They are very well. They both take"

a great interest in you, Douglas. They feel sure that you must be a near reyour mother's question, and inquire lative of the family." Benny lifted his eyes enquiringly to the face of the earl. He seemed to think that there was something to be

sofa's side when I came down here to 'And I, Douglas, have told you often, that I feel convinced you are very

nearly related to us.' "Indeed I hope it may be so. I would like to be your cousin, Lord Well-

"You may be even nearer kin to me than that. Very singular, your exact resemblance to myself and your earliest garments marked with the crest of my mother's family."
"It was," admitted Benny, still looking enquiringly into the face of his

"Would it surprise you much to find out for a certainty that you are very

nearly related to us indeed?" enquired the earl, looking wistfully into the clear eyes that were upturned to his. Benny's color came and went breathed fast, but faltered forth the

"No; I do not think it would." "Then, my dear Douglas, read this paper," said the earl, placing in his hand the written confession of Dr. Seton, watching him closely.

"Heaven knows how glad I am of As Benny read, his wan face paled and flushed alternately. And when he finished he let the paper slip from the restoration of our eldest son. But without doubt it will complicate the question of property very much," said his hold, and he lifted his hands and laid them over his face. "Douglas! Douglas! my brother!"

"Oh, do not think of property at such a time," pleaded the duchess.
"I am sorry for you, Wellrose. This murmured the earl, anxiously bending may deprive you of your heirship," continued the duke.
"Do you think of me, dear father.

over him.
"My brother!" echoed Benny in a tone of infinite tenderness as he uncovered his face and took the hand of the earl and pressed it to his heart. "This has startled you very much, Benjamin," said the earl.

"Yes, yes; and yet it should have done so. My heart told me truth long ago, long ago!— that night when, at Brunswick terrace, in Brigh-ton, I kneeled at her feet to offer her crown of Christmas roses, and burst into tears, I know not why; and hat day in the Middlesex Hospital, when her tears fell upon my sleeping face, and I tried to wake in vain, my heart told me the truth. But I did not understand its language," said

Benny in strong emotion. "But now you do. And now you know you have a father, and, above all, a mother, and a brother, any many fair sisters. Your mother, our mother, longs to see you, Benjamin, just as soon as you are strong enough

her lovely and gracious face again! It has never left my memory since that bright day at Brunswick terrace," he said, as again his color came and went in quick successions of flush and pal-

The earl pressed the invalid's hand, and arose to leave the room; but, at a strange gurgling sound from the

a strange garging sound from the direction of the so'a, he turned.

Then he uttered an exclamation of horror unspeaks ble.

Benny had fasten back, white as death, and his bosom and pillow were crimsoned with his life blood.

CHAPTER XXXVI.

'Go and request Dr. Kinlock to con'e here immediately, and quietly." The man went away to do his er-

rand, and the surgeon quickly made is appearance.
The earl pointed in silence to the

form lying on the sofa.

"I thought so," said the dector, going up to his patient and feeling his nulse. "But you need not be alarmed my lord. This is not much of a hem-orrhage. A very little blood makes a great show. And se, it has quite ceased to flow, he added, as he went to the washstand and wetted a towel to wine the face of his patient.

Then he administered restoratives.

And finally as Benny breathed again, he settled him were comfortably on the sofa and enjoined the strictest

He even recommended Lord Well-

rose to withdraw from the room and leave him alone to attend to his pati-ent; adding, that if he should need assistance in the duty he would ring for

As Lord Wellrose went out he beck oned Dr. Kinlock to follow he hall, and there inquired: "What shall I say to my mother? She expects to see him this after-

ncon "Tel her grace that he has had as much excitement as he can bear for one day. He must rest quietly until te-morrow morning, when, if he should be better, it will be safe for her to see him."

I.ord Wellrose went below stairs

with this intelligence He found his mother alone in the

drawing-room He said nothing of the hemorrhage, but spoke only of the patient's weak-ness and fatigue, and of the doctor's

"And you told him all?" inquired Eglantine.
"I told him all," replied her son.

"And how did he take it? How die he take it?" "With very great emotion, and yet with less than I expected. He said that his heart had told him the truth

long ago, and he should have known it, had he understood the language of his heart.'

"But what, then, did the poor boy mean? His heart had told him the truth? How could his heart tell him anything, since he never saw his mother's face?" "Dear mother, he had seen you oft-

You have touched him and spokto him more than once."
"Heaven of heavens! When and where?" she asked, in profound agi-

Then Lord Wellrose told much the story of his hapless brother's life, suppressing only such parts of it as yould have overwheimed his hearer with shame, as well as with pain.

Then the duchess learned, for the first time, that the pale infant in the beggar's arms, whom she bad pitied and succored at the church dcor, on the morning of her second bridal; the starving street boy, whom her kind-hearted children had called in from the sidewalk o nthat winter night at Brunswick terrace, and had treated with a portion of their Twelfth-day

with a nortion of their Twelfth-day cake: the poor, dving child she had went over in the Middlesex Hospital; and the fair, refined-looking young man she had met in the bookseller's shon in the Strand, were one and the same, and her son! On! how she wept to hear even tubs much! How much more bitterly must have wept had she heard all!

And my heart also spoke; but, ah! I, too, misunderstood its language! she said, weeping vehemently. At that moment the duke came in.

And she hastily dried her tears, and smiled. "You have missed hearing our boy's

Willie, but I will tell it to you story, Wito-night.

surely all is well now. We have two sons instead of one."

"And now, dear Wellrose, tell me how he came by the name of Douglas, since no one could have known his right to bear it until the surgeon's discovery?" she inquired.

"I gave it to him," answered the carl.

(To be Continued.)

Finding Relief She Tells Others

MRS. W. J. MALONEY TOOK DODD'S KIDNEY PILLS FOR BACKACHE.

She Had Tried Numerous Other Medi-cines, But Found No Relief Till She Used the Great Canadian Kidney Remedy, Dodd's Kitney Pills.

Barachois West, Gaspe Co., Que., March 15th—(Special)— Mrs. W. J. Maloney, a well known resident of this place, is recommending Dcdd's Kidney Pills to those who suffer from Kidney Troubles. In an interview Mrs. Maloney says:

"After suffering for many years with backache, and trying many remedles without obtaining relief I read

about Dodd's Kidney Pills and decided to try them. "After using two boxes I was great-

Tatter using two boxes I was greatly benefitted, and recommend them to other sufferers. I also used them for my little girl for kidney troubles."

Mrs. Maloney got relief from her backache because Dodd's Kidney Pills backache because Dodd's Kidney Pills cured her Kidney trouble, and that was the cause of her backache. Dodd's Kidney Pills cure diseased Kidneys. Cured Kidneys do their work and strain all the impurities out of the blood. That's why Dodd's Kidney Pills cure so many diseases that are caused by impure blood.

I have started the fashion of deviled shirts for evening wear."—London

The Bank Graveyard.

It is not generally known that the Bank of England, "the Old Lady of Threadneedle street," contains within its walls a graveyard. The Gordon riots in 1780, during which the bank was attacked by a mob, called attention to the necessity for strengthening its defences. Competent authorities advised that an adjoining church, hav-ing the peculiar name of St. Christopher-le-Stocks, was in a military sense a source of danger, and an act of Parliament was passed to enable the directors to purchase the church and its appurtenances. This, now tastefully laid out, is called the "bank garden." In it is the largest lime tree garden." In it is the largest lin in London.—London Standard.

> GET AT THE CAUSE. (Gueiph Mercury.)

Ohio has a bill before its legislature to compensate families of drunkards from funds collected from the liquor interests. Very nice, but it would be much better to cut off the supply of drunkards. The best form of compensation for any family is a sober husband.

HOW TO CURE RHEUMATISM

The Disease is Always Rooted in the Blood, Which Must Be Made Rich and Pure.

There are still many people who imgine that rheumatism can be cured liniments and rubbing, overlooking the medical fact that the trouble is cooted in the blood. Pheumatism can only be cured by cleansing, and enriching the blood, thus driving out of the system the poisonous acids which cause the rheumatic pains. Dr. Willianis' Pink Pills cure the most cbstinate cases of rheumatism because they go straight to the root of the trouble in the blood. Every dose helps to make rich, red blood, and this new blood expels the poisonous acid bringing health and comfort to the ortured victim. Do not waste time and money in liniments and outward applications. Give Dr. Williams' Pink Pills a fair trial and thus drive the disease out of your system. Here is proof of what Dr. Williams' Pink Pills can do in cases of this kind. Mr. Richard Palmer, Wroxeter, Ont., says:
"For months my life was made miserable through a combined attack of rheumatism and sciatica. The rheumaable through a combined attack of rheumatism and sciatica. The rheumatism seemed to settle in all my joints and been put out of business and lay sadly on the side of the road, their breech blown off by the owners, evidently. Dragged all the way from Maubeuge, near the Belgium frontier, which had been conquered through a fortifications of Paris, the very weight of their shells, and meaning to carry on their work up to the very fortifications of Paris, the two monsters had foundered ignominated by two monsters had foundered ignominated by two days' rain into a second Everglades. A company of French sharpshooters as specially selected for this occasion had three times successively within a day, killed the 40 horses needed to drag each piece, and finally a battery of three-inch rapid-firers, quickly placed in position on a small hill in front of Solssons and two and one-half miles away, had, in about 20 shots, knocked to splinters their underpining.

"In the opinion of military authorities, French included, not a fortified town, fortress or protective work of any sort or description can exist any length of time under the fire of these German monsters. It is said their

GERMANS LOST 10,000 FOUR STEAMERS SUNK

British Have Won a Complete Victory at Neuve Chapelle.

British War Office Says Counter-Attacks Delivered By the Enemy on Saturday Were All Repulsed and Prisoners Up to the Present Are Over 1,700-Germans Rushing Up Reinforcements to Scene.

LONDON, March 15. — The War Office last night made the following announcement, presumably with ref-erance to the operations at Neuve Chapelle, near Lille:

'A heavy counter-attack delivered by the enemy Saturday afternoon and several minor counter-attacks earlier in the day all were repulsed.

"Judging by observations on various positions of the field of battle and by statements of prisoners, of whom there are now 1,720, the enemy's losses must have been very heavy, and cannot have fallen far short of ten thousand men within three days. three days.

"A train at the Don station was blown up by our aircraft Sunday morning."

Gen. Sir John French, commander-in-chief of the British forces on the continent, sent the following despatch to the War Office on Saturday: "A little further progress in the war was made to-day (Saturday) by the Seventh Division in the direction

of Aubere. The fighting has been very severe, as the enemy was strong-ly reinforced this morinng, opposite my right, by at least two divisions. We captured 612 prisoners, however, and I hear there are and I hear there are more to come in. "Our air craft have been very ac-

tive, and the railroad junctions at Don and Doual have been destroyed." The following official statement regarding the Lille operations was issued by the War Office last night:— "The British air squadron has effectively bombarded Westende.

"The success gained by the British armies at Neuve Chapelle proves to have been absolutely complete. They advanced on a front of about three depth of from twelve hundred to fif-teen hundred metres, capturing successively three lines of trenches and a fortified work to the south of Neuve Chapelle. Counter-attacks delivered by the Germans with great violence

by the Germans with great violence were repulsed.

"The enemy suffered great losses, and left in the hands of our allies prisoners to a number considerably greater than at first reported.

"The British heavy and field artil-lery very effectively prepared the way for and supported the vigorous action

and supported the vigorous action of the infantry."

A Rotterdam despatch says that

information received here from the frontier indicates that the British success at La Bassee has thrown the whole German right wing into a re-markable state of activity. Men are being hurried from all the garrisons in the rear of the line and some from the coast towns to stop the advance of the British.

Official advices from the front, describing the occupation of Vauquois, in the Argonne region, by the French,

say:

"After several days' desperate fighting the French troops took possession of the plateau and half the village of Vauquois, on the eastern outskirts of the Argonne, and have been able to prevent the Germans from making use of this important strategic position to their own advances. trategic position to their own advan-

Fate of Several Other British

Craft Is Still in Doubt.

German Submarines Have Torpedoed and Sent to the Bottom the Indian City, the Invergyle, the Auguste Conseil, and the Swedish Steamer Hanna—Loss of Life Is Small— Depredations Visible from Shore.

LONDON, March 15 .- Activity of German submarines within the past few days is admitted in a British Ad-miralty report last night. At least four vessels are known to have been sunk, while the fate of several others attacked is in doubt. Few lives were lost. The record is:

Torpedoed and sunk: Steamer Indian City, of Glasgow, 2,921 tons, off Scilly Islands, on March 12; the vessel had a cotton cargo and was bound from Galveston to Hayra: crow seef.

Havre; crew safe.
British collier Invergyle, of Glasow, 1,141 tons, off Cresswell, Eng., gow, 1,141 tons, off Cress on March 13; crew safe. French steamer Auguste Conseil, 1,852 tons, off southern end of Devon, on March 11; the vessel was bound

from Cardiff to Rouen with a coal cargo; crew safe. Swedish steamer Hanna, off Scar-borough; six lives lost. Torpedoed, probably lost:

British steamer Florazan, on March 11, while crossing English Channel from Havre; one of crew reported drowned; vessel was set on fire, and was probably lost.

British steamer Andalusian, Scilly Islands, on March 2; crew safe.
Steamer Hardale, reported sunk
off South Lock, in the Irish Channel,

off South Lock, in the Irish Channel, with a loss of two lives.

The steamer Adenwen was towed into Cherbourg after being torpedoed in the English Channel on March 11.

A Bordeaux despatch, via Paris, says the steamer Auguste Conseil, from Cardiff for Rouen, with a cargo of coal, was torpedoed by a submarine off the Start Point, near the southern off the Start Point, near the southern extremity of Devon, Eng., on Thurs-day afternoon. The crew of 28 men are reported to have been saved by a Danish steamer and taken to Fal-

An eye-witness of the torpedoing of the British steamers Indian City and Headlands, off the Scilly Islands, says:

'About eight o'clock Friday morn-About eight o'clock friday morning a German submarine torpedoed the steamer Indian City, off Biddeford, within sight of Hughtown, on St. Mary's Island. The submarine remained in the vicinity about an hour, and was an object of keen interest to the islanders, who watched developments as the crew of the steamer row-ed their boats toward the shore. "After evading the patrol boats the

submarine sighted the City Head-lands of Hartlepool and went in pur-suit of the ship. The chase was brief. The German easily overtook the steamer when seven miles had been covered. Both vessels were seen to be constantly turning and manoeuvering as a result of the merchantman's attempts to escape destruction. Fin-ally the steamer stopped and a large quantity of steam was seen escaping from her safety valves. Then it was noticed that preparations were being made to leave the steamer and a few minutes later the crew was observed in a lifeboat pulling away." The Headlands was then destroyed.

The crew of the British steamer Florazan, which was torpedeed at the mouth of the Bristol Channel, March 11, arrived here yesterday. The men say that their cargo of cotton had been discharged at Havre and the steamer was crossing the channel to England. No submarine had been

The Admiralty last night issued a report giving the total number of British merchant and fishing vessels lost through host outbreak of the war to March 10. The statement says that during that period 88 merchant vessels were sunk or captured. Of these 54 were victims of the hostile cruisers, 12 were destroyed by mines and 22 by submarines. The gross tonnage totaled

In the same period the total arrivals and sailings of overseas steamers of all nationalities, of over 300 tons

net were 4,745.

Forty-seven fishing vessels were sunk or captured during this time. Nineteen of these were blown up by mines and 28 were captured by hostile craft. Twenty-four of these cap-tured were caught on Aug. 26 when, it is understood, the Germans raided a fishing fleet.

Thanks For Relief.

OTTAWA, March 15. — The Government is receiving the warmest expressions of appreciation and grati-tude for supplies that have been vol-intarily sent by the Federal and Pro-vincial Governments and the people of the Dominion for the relief of dis-

tress in the United Kingdom.

Triumph at Neuve Chapelle Sets New

Record For This War. LONDON, March 15 .- The British offensive, which resulted in the capture of Neuve Chapelle and the country beyond it, began early in the morning of March 10 with a bombardment by a large number of guns and howitzers, according to an eyewitness with the Dritich Portal witness with the British Expedition-

ary Force in France.
"Our men in the trenches," he says, "describe this fire as being the most tremendous, both in point of noise and in actual effect, they have ever seen or heard. The shricking of shells in the circular tremendous with the shricking of shells." in the air, their explosion and the continuous thunder of the batteries were all merged into one great vol-ume of sound. The discharges of the guns were so rapid that they sounded like the fire of a gigantic machine

During the 35 minutes it continued our men could show themselves freely and walk about in perfect safe-Then the signal for the attack was given, and in less than half an hour almost the whole of the elaborte series of German trenches in and about Neuve Chapelle was in our hands

"The columns of prisoners as they marched back, threading their way through ambulances and transport and between the waiting ranks of our reserves, afforded no little encourage-ment. The faces of many of them were bright yellow from the effects of the lyddite; the majority looked shaken, and all admitted that the at-

tack had come as a complete surprise.
"Our success does not lie in the fact that we have gained an extent of ground probably greater than has of so short a time since the com-mencement of the present form of trench warfare, but in that our men, in spite of the disheaterning effects of months of inactivity in the trenches, have shown the utmost dash throughout these operations."

Taylor Is Elected.

THE DUMB THAT TALK

Irene B. Wrenshall in the Toronto Sunday World has an article "Teaching children to listen with their hands and eyes," which deals with the wonderful results obtained at the Ontario School for the Deaf, Belleville.

"We start with deep breathing and tongue exercises," said the teacher, for the little ones have no control over their tongues at first, on account of never having used them. A mirror we use all the time and they soon get to be adept in the quick use of their tongues. Now, I'll idustrate the final step to articulation, and suiting the action to the word, she drew one of the little ones to her, pointing out at the same time a chart with the letters p, a, wh, etc., including all the consonants. She blew on the little one's hand, then let the child do the same to her hand, pointing out the particular letter indicated by the action. Then, with the little one's hand upon her throat or nose, as might be, to feel the vibration, she made the sound. Quick to imitate, the little one made the same sound, and this vague language was begun.

"There's no further excuse for child being dumb, if we get them quickly enough, and a naturally bright, deat child should be able to hold its own with anyone, though their voices will never sound quite the same as if they could hear themselves

The article save that foremost among the trades learned is printing Several of the pupils are remarkably quick at t pesetting. Robert Swayne, son of the Rev W G. CO-OPERATIVE EXPERIMENTS IN WEED ERADICATION

During the past three years (1912-13-14) the Department of Botany of the Ontario Agricultural College in connection with the work of the Ontario Agriculturai and Experimental Union, carcied on Co-operative Experiments in the Eradication of Weeds. ime torty-five la mers co-operated in his work. The weeds experimented with were Perennial Sow Thistle, I'witch Grass, Bladder Campion, Wild Mustard and Ox-eye Daisy. Some very interesting and valuable sales were obtained. Those who ook p rt in these experiments profited ov the experience. In hearly every stance they cleaned the field xperinented with, and demonstrated to of the methods tried, and at the same one the results turnish practical inforto ion to others.

OME OF THE PRACTICAL INFORMATION GAINED FROM THESE CO OPERATIVE WEED EXPERIMENTS

1. That good cultivation, followed neans of eradicating both Perennial Taistle and Twitch Grass.

2. Toat rape is a more satisfactory p to use in the destruction of ich Gras than buckwheat.

3 Teat rape gives much better esults in the eradication of Twitch Grass and Perennial Sow Thistle when sown in drills and cultivated than it does when sown broadcast.

4 That thorough, deep cultivation n tall and spring, tollowed by a wel! cred for hoed crop, will destroy Bladler Campion.

5. That Mustard may be prevented form seeding in oats, wheat and barey by spraying with a twenty per ent solution of iron sulphate.

The e co-operative weed experiments will be continued this year The weeds to be experimented with are Perential Sow Thistle, Twitch Grass, Budder Campion or Cow Bell, Wild Mustard and Ox-eye Daisy. All who service.--Recorder. have any of these weeds on their farms are invited to write to the Director of Co-operative Experiments in Weed Evadication, O A C, Guelph, Ontario, who will gladly furnish information concerning this experimental work.

POTASH AND WOOD ASHES.

Valuable Products for Land Improvement Available From This Source.

With the supply of potash from the German mines shut off by war condi-tions, Canada should now give attention to the large quantity of this fer-tilizing agent which is allowed to go to waste through want of care and conservation of the annual production

of wood ashes.

Throughout a large part of Canada the chief fuel at all seasons, but more especially in winter, is wood. In the eastern provinces, hardwoods are chiefly used. These woods, especially beech and maple, are rich in potash, varying from 5 to 13 per cent, according to conditions of dryness of the wood and care of the ashes. Other valuable ingredients of wood ashes are a small proportion of phosphoric acid and about fifty per cent. of car-

acid and about fifty per cent, of car-bonate of lime.

In the clearing of wood lots and in the burning of debris after taking out the fuel supply, large amounts of ashes are produced. These as a rule are left where the burning is done, and are consequently wasted.

Wood ashes should be carefully stored in fire proof recentacles if pos-

wood asses should be carefully stored, in fire proof receptacles if possible; in any event away from any danger of fire, and should be kept dry to avoid leaching. In the spring they should be spread upon the land. They are especially valuable as a fortillizeral they are specially valuable as a fortillizeral they are specially valuable.

They are especially valuable as a fertilizer and to encourage the growth of
clover and the better grasses.

Wood ashes, by hastening the decay of organic matter in soils, render
more readily available the nitrogen
contained therein. In sandy soil,
wood ashes supply the phosphoric
acid and lime in which these soils are
deficient, while, on clay lands, the
lime content of the ashes tends to
render available the potash salts already present in abundance. Potash
as supplied to the land through the
medium of wood ashes has a distinct
advantage over the potash salts as
imported from Germany, in that it
is in a very soluble form, and hence
is at once available for plant food.

The importance of wood ashes, as
shown above, as a fertilizer can hardby be over-estimated. It is conse-

snown above, as a fertilizer can hardly be over-estimated. It is consequently of first interest to the agriculturists and lumber interests of Canada to conserve the supply wherever
and by what process produced.

During the present winter large undertakings in land clearing and rightof-way clearing of railway lines will

dertakings in land clearing and rightof-way clearing of railway lines will
be in progress from the burning of
the debris of which large amounts of
ashes will accoumulate. Some steps
should be taken to provide that these
ashes are not wasted, as apart from
the difficulty of securing potash supplies, the market value of ashes at
present is from \$8 to \$12 per ton,
depending upon quality.—Conserva-

nvitation

Is cordially extended to the general public to visit our new garage and service station at

18 Buell St. (old Brock Theatre Bldg.) Brockville

OVERLAND "The Car of Established Merit"

We are sole distributors for this district for the famous Overland cars which are acknowledged the greatest medium priced cars on the market to-day. This is the car that was awarded by the managing committee of the 1915 New York Automobile Show the choice of first position in reward for having shown the largest turnover sale of any car for

Canada and the United States. Our strong appeal is in our ignition systems, gasoline supply and explosive system.

Given these three and your car must go.

The motor is pretty well a standard all around. We do claim to-day that there are no other cars with the same ignition system at our price. In buying an Overland you are profiting by the combined experience of the 150,000 Overland owners who have put their approval on this reliable car. Buy an Overland and be sure.

FORD "The Universal Car"

We are also distributors for this territory for these well known cars and have on exhibition in our show rooms a car load of the new 1915 models which are better than ever this year including many body improvements, also electric lights.

It will be impossible this year as it has been in in the past to get delivery just when cars are needed owing to the enormous demand. This year already the signed orders for Fords are far in excess of any other year, which is a very strong indication that the Canadian public are buying more Fords than eyer before.

Send in your order at once and be sure of delivery. Kindly note tnese lower prices:

Touring Car \$590 f.o.b. Factory
Runabout \$540 f.o.b. Factory
Less a cash bonus of \$40 to \$60 a car if 30,000 or over are sold in Canada between August

Don't miss the opportunity when in Brockville to inspect our splendid new garage and facilities for giving Brockville and vicinity the most up-to-date motor car service in Eastern Ontario.

Gilbert & Soper Motor Car Co.

OBITUARY

Mrs. Allan Earl

The death occurred on March 5th of Mrs Allan Earl, aged forty-eight years, of Sweet's Corners. Deceased under went an operation at the Kingston General Hospital. Her maiden name was Sarah Moore, and was born at Seeley's Bay. She is survived by her husband, one son and two daughters, William Earl, Misses Mariam and Myrtle; her mother, Mrs Wellington Moore; two brothers, John and Peter Moore, of Seeley's Bay. The funeral took place on Sunday, March 7th, to Leeds Anglican church. Rev Mr

Mrs. H. E. Manchester

Word has been received here of the death of Mrs H. E. Manchester at her home in Leamington, Ont. Deceased was 28 years af age and until her marriage three years ago; had resided in Athens. She was Miss Margaret Niblock and her kindly, generous nature won for her many warm friends

Besides her husband she is survived by her mother, Mrs M. A. Niblock and one sister, Mrs Clark Eaton of

Frankville. The funeral took place on Friday afternoon last.

DRAINAGE

1914 Driest Year on Record but Drainage Gives Big Results

The Ontario Agricultural Cillege eports that the crop year of 1914 was the driest on record in Ontario. The precipitation from harvest 1913 to harvest 1914 lacked 53 inches of being up to the average. This is a shortage of almost 20 per cent. The College has often stated that tile drainage was effective in a dry season as well as in a wet one, and last year it was able to prove this in a most practical way. Since 1912 the College has been instailing Practical Drainage Demonstra tion Plots in parts of the province where little or no drainage has been done. The plan is to drain half of a field, leaving the other half undrained for comparison. Both parts are sowed to the same kind of grain and the crop from each part threshed separately Nine plots were drained prior to 1914 The average of the nine fields showed that at market prices at threshing time the drained half produced \$14.12 more per acre than the undrained half and that in the driest year on record. In an average season, the average in crease due to drainage is over \$20 per acre, and in a wet season even more

For a number of years the Agricul tural College has been making drainage surveys for farmers free of charge, except for travelling expenses. This offer is again renewed. Farmers having drainage difficulties may secure assistance by writing the Department of Physics, O. A. C. Guelph, for information and regular application forms.

CITY OF VICTORIA HEALTHY

Fortunate indeed is the Canadian city with such a record of good health as that of Victoria, B. C., as is shown by the report of Mr G. A B. Hall in

the medical officer's report for 1914. The mortality rate is only 7.23 per thousand, while the infant mortality rate reached the almost incredible figure of 6 per thousand. Of 18 cases of typhoid, only five were local, the remainder coming from logging

camps.

One of the reasons for this situation s undoubtedly the care taken to insure pure milk supply. The examinations taken during the year showed butter fat percentage to average 3.9 per cent., .the water supply is also above reproach.

The population of Victoria is now 55,000, and of the 367 deaths recorded last year 90 were over 70 years of age. Victoria, B. C, is evidently a place where there is some competition for

the position of "oldest inhabitant,"

Columbia Records For February On Sale Today

wear so long as the famous Columbia Double Disc Records. They are the best Records on the market today.

The name Columbia stands today for the best records on the market. And that in every detail. In a Columbia Record you have the best record it is possible to get at any price. You have the finest recording, years ahead of any other. You have many of the biggest and best artists and bands, most of them exclusive. And in Columbia you have a record which will unfailingly WEAR TWICE AS LONG as any other make—no matter what you pay. It is those combined points of superiority that have made Columbia supreme today—the best records and the biggest value (only 85 cents). No other records dare make such specific claims, because no other records can prove them. The people who make mistakes lead the world. The perfect people work for them, running errands and counting columns

of figures.
Only trifles are always true. Every great and serious truth has an obverse

ide which is also true.

Professor William James was the greatest phychologist of our time, but the best he could do in defining truth was this:
"The truth is simply what will

work." Whatever is may not necessarily be right, in spite of Pope; but whatever is is That is the main point. And it is every man's job to accept the is-ness and get down to business.

Most men have the wrong location. have taken up the wrong profession, have failed to improve the opportun-ities for education they had in youth, have not married the woman ideally suited to them, have not the money, influence and position they need to

show what's in them.

And they are of two classes. One class sits around the loafing places and tells its woes, and whistles and pities itself. The other plucks up, for-gets it, takes the situation as it is and

makes the best of things. The genius is not the man who never made mistakes, who had his chance thrust on him who was endowed and all that; he is the man who had no chance and was not gifted but who took the raw material of life and fate as he found it and made something The only perfect person you will

ever meet is the perfect fool.

The faultless—they are the biggest frauds of us all.—Rockford (ill.) Register-Gazette.

TAKE A LOOK.

(Niagara Falls, N. Y. Gazette) Have you ever taken the trouble to an-lyze your troubles-or more properly, erhaps, the causes of them? As a rule people don't.

alyze your troubles—or more properly, perhaps, the causes of them?

As a rule people don't.

They come to regard trouble and themselves as a good deal like Daniel Webster's ideas of liberty and union—one and inseparable. And they go through life accordingly.

There is much to justify the belief that Nature intends a certain amount of disappointment for every one. The commonplace experiences of life prove that neither wealth nor rank afford immunity.

But the notion that there can be no divorce from trouble is wrong ninety-nine times out of the hundred.

Usually the worth of one's troubles are of one's own making—or at any rate of one's own permitting. The man defies the laws of Nature or common sense—or both—and pays the penalty. Or he sits supinely by adversity ties him up, with the exception of his tongue. This he works overtime to tell of his misfortunes.

The overruing Power is beneficient.

fortunes.

The overruing Power is beneficient.

Man is meant to be healthy, prosperous and happy. But in the sweat of his brow he must make not merely his living, but his life.

We have been using MINARD'S LINIMENT in our home for a number of years and use no other Liniment but MINARD'S, and we can recommend it highly for sprains, bruises, pains or tightness of the chest, soreness of the throat, head-ache or anything of that sert. We will not be without it one single day, for we get a new bettle before the other is all used. I car recommend it highly to anyone.

THE BUTARISTS AND FARMING. To be sure, we can farm without being betanists, but we can not farm so Through the ages agricultural has stumbled on many important well. facts and principles that the botanist has later on explained, thus making more scientific farming possible. Witness the enrichment of land by growing leguminous crops—a fact mention-ed by Pliny, and explained by modern betany, and as a result utilized with vastly increased success by the present-day agriculturist. Witness, too, the history of our knowledge of the wheat rust, or the recently discovered hereditary symbiosis of bacteria and seed plants—phenomena seen by agriculturists as in a glass, but very very darkuntil the theoretical botanist ex-

plained them.

In spite of these instances and a hundred more, the practical man is coming increasingly to look with se upon the theoretical botanists. matters ft, say we? Alas, it n much, unless we happen individually to be endowed. For botanical posi-tions, like other things in life, are controlled by the law of supply and de-mand. In more than one institution that I know the tenure of position of the botanist depends upon his success in attracting students. The student, in attracting students. The student, needing bread and butter, will not be needing oreas and better, will not be attracted in lines in which he cannot earn it, and, as Mr. Dooley says: "There ye are." In several state uni-versities the clash has already come, and in every case of which I am cog-nizant, the more practical botany of the agricultural department has won as against the more theoretical botany of the academic department. Even in our private institutions we comm have practical trustees who sooner or later may see the trend of the time and act accordingly.—Prof. C. Cowles in Science.

The happiness of your life depends upon the quality of your life depends therefore, guard accordingly.—Marcus Aurelius.

TWO DROWNED

Port Hope Canceists Met Watery Grave.

Port Hope Despatch-The canoe has made an early start on its 1915 levy of death tolls, and this afternoon two young men of this town found watery graves in Lake Ontario. They were Ralph Wilson, son of F. W. Wilson, proprietor of the Guide, and Horace Smith, son of Town Councilor George A. Smith. Wilson was 18 years of age and Smith a little younger. The boys left town about 4 o'clock heading out from land, and a short time later a stiff breeze sprang up and the lake was lashed into a fairly rough seal Friends became alarmed, and Capt. McMann and the lifeboat crew as well as the lifeboat crew from Co-bourg, were called out to search for the young men, but no trace was found of them, and it is believed that they perished.

CANADIANS IN

Fought On Flank in Victory at Neuve Chapelle.

Gen. Alderson Speaks Highly of His Command.

London Cable .- Information has been received here to the effect that one battalion of Canadian infantry assisted in the capture of Neuve Chapelle, fighting, with great bravery on one flank of the advancing troops. The fourth battalion, including 36th Peel Regiment of Toronto, has been under exceptionally heavy shell fire, but has escaped lightly. fire, but has escaped lightly. Up to two days ago not a man had been kill-ed, and only a few had been wounded.

There is very little sickness among the Canadian troops.

A Toronto officer, writing from the trenches, says: "The Germans and Canadians cheer each other. The Cana-dians sing the 'Fatherland' and the Germans sing songs in English. The trenches are only forty yards apart." Speaking of the men, he says they are brave, but cautious, and their dis-

cipline is splendid.

There have been a number of casualties in the Ontario brigade during the last two days. Another batch of wounded arrived at Southampton today. The French people are treating the Canadians with the utmost kind-

MESSAGE FROM GEN, ALDERSON. Ottawa Report.—The following cable from Sir George H. Perley, Acting High Commissioner for Canada, has been received by the Government:

"Just received letter from General Alderson (commander of the Canadian division), in which he makes the following statement: 'Our men have now been in trenches for over a week, and I am very glad to be able to say that they are doing quite remarkably well. I knew they would do well, but they I knew they would go well, but they have done much better than I expected, and all has gone with less trouble than I anticipated. All artillery, infantry, engineers, medical people, supfantry, engineers, medical people, sup-ply, etc., have settled into their places, and work in a way that makes me both pleased and proud.' Sir Robert Borden read the message

in the House of Commons this afternoon.

CANADIAN HORSE

Two Troops Arrive at Canterbury at Once.

Cable. --- The ancient town of Canterbury to-day witnessed remarkable meeting between two branches of Canada's mounted troops. The Fort Garry Horse, which came England with the first Canadian centingent as infantry, has now been converted into a cavalry corps, as originally intended, and having come along from Tidworth is nfow located at the barracks here, under Col. R. W. T. Urquhart, Lance-Corp. Edward Arnaud, Private Charles Little, Private George Simmons, Private William

Canterbury has also welcomed the Mounted Rifles from Toronto, which came along with that portion of the second contingent reaching here this week. This mounted section, under Major McColl, reached Canterbury almost at the same time as the Fort Carry Herse arrived in the famous

Both sections have been warmly welcomed by British cavalry, for which Canterbury has long been one of the most ineportant depots. The

the fact majoritant depots. The health of both corps is excellent.

Things with the Canadians at Shorneliffe are settling down rapidly. To-day's weather is apringlike. A party of new arrivals from Canada today gave their British comrades initia tion into the mystery of baseball.

Turk Reply Less Violent—Smyrna TWELVE SUBS

Are Missing, and Germany May Abandon Scheme.

London Cable. A despatch to the Daily Express from the Hague says: "A report has been sent from Cux-

haven to the Admiralty at Berlin that twelve submarines have failed to re-port at their base, eight of them be-ing among Germany's newest boats. "The naval council will meet to-day or to-morrow under the presidency of Emperor William, to discuss whether or not it would be better to abandon the submarine war."

GROUND THEY

North Bay Despatch-The Grand

Big Gain at Neuve Chapelle Maintained Despite Heavy Counter-Attacks.

CALAIS RAID

Germans Are Preparing for Another Dash to the Channel Coast.

Paris Cable. The victory won by the British troops north of La Basse, where they captured the village of Neuve Chapelle yesterday appears from additional details of affairs received to-day to have been the great est single advance which the British have made since the fighting entered upon its present stage.

In addition to the capture of Neuve Chapelle itself, the British offensive resulted in the occupation of German trenches over a front of 2,500 metres, the attack reaching its furthest point one and a quarter miles beyond the village. Thus the British troops advillage. Thus the British troop vanced nearly two miles on a about that distance wide.

To-day the British are holding their gains, despite a number of German counter-attacks.

It is believed that the improvement in the British position brought about by the victory is of great importance and, if pressed further, might compel the Germans to evacuate La Basse and perhaps other points which make their line so strong at present. Equally important was the success achieved by British airmen in destroying the railway junctions at Menin and Courtrai. These are on one of the German main lines of communica-tion, and there destruction will delay the arrival of new contingents troops, which are reported to again concentrating in Belgium for another attempt to break through to Calais and Boulogne. According to Dutch reports, these troops have brought with them a large number of boats for the passage of the canals and rivers, and for the first time in months they include cavalry units. There has been some fighting in Champagne, but on the whole the French seem to be satisfied for the present with the progress they have made in that region.

GERMANY USING ELEPHANTS .. A Copenhagen despatch says Ger-many has mobilized the elephants in Hagenbeck's menagerie, and has sent them to Valenciennes for work in heavy hauling. Dr. Koenig, the Austrian explorer, is using for war services 57 dogs which were present-ed by the Greenland authorities to the Filchener Antarctic expedition.

PADEREWSKI AIDS POLES.

Ignace Paderewski, who is here trying to establish a committee for the relief of distress in Poland, said today that 17,000,000 Poles are now suffering from the horrors of war. Of-ficial statistics show, according to Paderewski, that 120 towns and 400 villages in Poland have been destroyed, and the losses of the residents and these places are estimated at \$1,-200,000,000. Ten millions of people, he says are without food or shelter. The committee at Lausanne is already distributing assistance, including \$60-000 received from American Poles. PRINCE OF WALES "FEARLESS."

The Figaro quotes a letter from an artilleryman in France, which says: 'We had a visit from the Prince of Wales right on the firing line. He goes everywhere, fearing nothing. The troops admire his courage immensely.

WON'T INTERN

Eitel Friedrich's Captain Would Continue Cruise.

Newport News, Va., Despatch-Commander Thierichens, of the German Auxiliary cruiser Prinz Eitel Priedrich, agreed late to-day to deliver in writing to the American Government, through the collector of the port here, his explanation and reasons for sinking in the South Atlantic Ocean the American sailing ship Wm. P. Frye. He also agreed, after Collector of Castems Hamilton had boarded the Prioz Eitel and submitted neutrality requirements of the Washington Government, to commu-ricate an estimate of the time required to repair his ship, at the same time stating that it was his desire time stating that it was his desire not to intern his vessel, but to proceed as soon as repairs made her seaworthy.

Government that he land here the erews of captured and sunken ves and such passengers as could comply with immigration regulations, the German commander gave assent. The crew of the American ship Frye was landed late in the afternoon, and arrangements were made for taking off later to-night the crews of British. French and Russian ships in the south sea. The Eitel Friedrich herself steamed into Newport News shipbuilding yard and went into dry dock, where experts began an exami-nation of her condition.

Held on board are about 75 third-class passengers of the French liner Floride, refused admission by immigration inspectors on the ground of ineligibiltty. Consuls of these passe gers will arrange as soon as possible for their departure to Ellis Island, N.

HAMILTON NEXT

Grand Orange Lodge Meets There Next Year.

Orange Lodge of Ontario West closed its anual session here to-day with the election of the following officers: the election of the following officers:

The Grand Lodge will meet next year in Hamilton.

The majority of the members left for their homes to night A for well.

for their homes to-night. A few will take a trip up the T. & N. O. as far as Cochrane.

Grants were voted to the French missions, to the Church of England. Presbyterian, Methodist and Baptist Churches, as well as to the Salvation

FLYING CORPS WANTS CANUCKS

Imperial War Office Asks Ottawa for Men.

Meningitis Feared Again in Toronto Camp.

Toronto, Despatch-Recruiting for the Royal Flying Corps is to be undertaken by the Canadian militia officers in response to a request just received from the Imperial War Office. The communication received at Ottawa and forwarded to divisional headquarters asks for the names of any British subjects who are qualified avia-tes, or air mechanics who are willing to enlist for Imperial service. Special inductments in the way of pay and expenses are ofered, \$2.00 per day being offered to any qualified aviator and in addition any officer or man holding the Royal Aero Club or American Ciub certificate will be given a grant of \$375 to cover the cost of his certificate and other expenses. Recruits for this special service will be sent to England immediately on enlistment. It is felt that while the num-ber of qualified Canadian aviators is limited, there are more in the United States who are of British birth, and who would be able to qualify for the Royal Flying Corps.

MENINGITIS AGAIN FEARED. The camp medical authorities fear that once again the dangerous spinal meningitis germ has gained access to the Exhibition grounds, this time the suspect being a member of the 4th C. M. R. It will not be known until this morning definitely whether the case is meningitis or merely a bad form of grippe. No chances were tak-en of having another epidemic in camp, however, and all the men in contact with the suspected patient were immediately sent off to the iso-lation quarters on Strachan avenue, 23 in all leaving camp. It is considered probable that if the suspected man had the disease he has brought it in from the city, as the camp was considered to be quite fre The remaining carriers at the old General Hospital have had their fourth examination for cultures and if none is found they may be returned to the Exhibition to-day.

Still another death, among the sol-

diers suffering from meningitis, occurred. Private William Talbot, who joined the second expeditionary force with the quota from the 48th Highlanders, succumbing to the dis

Highlanders, succumbing to the disease yesterday afternoon.

Of the other soldiers with spinal meningitis only Pte. Taylor was reported last night as in a serious condition. Of the others Ptes. Pakenham and McMillan were in the best shape and Sergt. Wilkinson and Pte. Houghton were doing well. Pte. Speers of the third Canadian expeditionary force, was only in a fair condition force, was only in a fair condition

Arrangements whereby members of Arrangements whereby members of the Divisional Signallers may sup-plement their training so as to be able to read wireless messages were being made at camp yesterday afternoon, when Capt. Dunn, divisional signalling officer, had his men place a set of wireless aerials in position above the raministration Building, in which are the camp headquarters.

TIN PLATE ADVANCES. Pittsburg Despatch-Independent

in plate manufacturers in the Pittsburg district yesterday announced an advance in the price of tin plate equal to \$3 a ton. The announcement followed that recently made by the American Sheet and Tin Plate Com-pany of the same increase in price, which brings the market up t per base box. The advance is effective at once. Tin plate mills in this district, it is estimated, are operat ing at fully ninety per cent. of cap-

15 MONTHS FOR MANSLAUGHTER Owen Sound Despatch—Robert Knolls, of Griersville, was sentenced to 15 months in the Central Prison to-day for manslaughter, for the shooting of Jeanh Power level Halls ing of Joseph Ferry last Hallowe'er The jury brought in a verdict of guilty with a recommendation to mercy. Ferry, with several other youths, was engaged in Hallowe'en pranks on the date mentioned, and had been annoy-ing Knolls, who finally took a 22-calibre rifle and fired four shots in the dark, in the air, and in the direction of the marauding party. One of the bullets struck Ferry and penetrated the brain, causing death,

was so seriously burned that her recovery is extremely doubtful. Frank L. Schwoob pleaded guilty in

Berlin, to to four charges of securing goods fraudulently by issuing worthless cheques to merchants. Magistrate Weir imposed the maximum sentence of three years. Posing as a lieutenant in the 45th Battalion, and about to leave for active service, a man first giving his name as Collins and later as Gillespie.

neither of which is believed to correct, passed a number of bogus cheques in Port Arthur. and was arrested on a request from Sudbury. It is announced from the Vatican that the Pope has directed that all parish priests in Italy be instructed to aid and co-operate with the military

and civil authorities in case of mobilization of the Italian army. Valleyview Villa. one of the largest residences in St. Thomas, was almost totally destroyed by fire. The building was empty, having recently been sold by John Farley, K. C., and was to have been converted into a hospital by the Catholics of the city. The ori-

gin of the fire is a mysterv. Sixteen Germans were arrested by the South Porcupine police officials while in the act of drilling in a shed near there. Col. Sherwood. Commissioner of Dominion Police at Ottawa, has been notified. The men will be brought to trial at Timmins on Mon-

10.000-ton steamer for the Great Lakes has just been booked at Detroit by ship-building concerns. The lake stea-mer, which is to be built at a cost of \$500,000, will be 560 feet over feet keel, 60 feet beam and 31 feet

FATAL FIRE

Blaze in Montreal Court House Caused One Death.

Montreal Despatch Fire Seriously damaged the Court House here, and was responsible for the death of Pat-rick Gleason, a messenger, this afternoon. A number of firemen were overcome by smoke. The fire began in one of the rooms where a quantity of paper was stored, and spread rapidly. Judges who occupied rooms on the floor attacked made hurried escapes what papers they could collect, whole fire-fighting-force of the city was called out to cope with the blaze. Gleason was found unconscious in one of the corridors, and after partially reviving, died later in the Notre Dame Hospital as a result of shock.

Huge quantities of water were
thrown into the floor beneath and upthose above. The great-copper roof, hich cost \$590,000 when the Court louse was erected, some

tantly playing upon it.

Sheriff Lemieux late this afternoon stimated the loss at about \$350,000. A ozen companies are concerned in the eing hit much the hardest, with \$73,on the building and contents, and 0,000 on the library, a total of \$103,-000 insurance.

streams of water were kept con-

DUTCH PASSPORTS FORGED.

RioJaneiro, Cable.—Two men moder arrest in connection with the alleged forgery of Dutch passports have informed the police, it is said, that they sold the papers, but did not falsify them. They are reported to have declared that the passports were obtained from a German clerk in the Netherlands consulate who sailed for Europe on the Dutch steam-er Tubantia two weeks ago. The police are continuing their investi-gation.
