

The Weekly Monitor.

WEDNESDAY, AUGUST 31, 1881. NIENAU & ATLANTIC RAILWAY.

We need not apologise to our readers for frequently referring to this subject. It is one of immense importance to the people in the whole western portion of the Province, and if there be a man in the four counties of Kings, Annapolis, Lunenburg and Queens, who does not know it, he is to be commiserated. The interests of Annapolis and Lunenburg were particularly concerned because the right-of-way is, we believe, to be paid for by the said counties, but the expenses still being by the Government. The Government still hold out against the company, who have expended thousands of dollars in their efforts to obtain satisfactory terms on which they would be enabled to complete the work, but, so far, in vain. We understand that the Government are completing arrangements with a Syndicate for the sale of the whole line from Canoe to Yarmouth, but it is said that the said Syndicate would rather not purchase branch lines, and the Nienau & Atlantic Railway must still be a matter of dispute until the Government see fit to allow the work to be completed. The Government expect to make two millions of dollars. We think they are somewhat too sanguine. They do not know how much it will cost to acquire the road, and of course they must first get possession before they can sell. At any rate it is safe to say that they will not make a bargain unless they can make a profit. If there is any one who would like to see the prospect for all business in this valley, in produce exportation, in every way, and to see everybody interested should give up the idea of going to the States, and remain here. All information in regard to sales, shipments, quotations, etc., of the London market, will be found in our columns. Our interests are identified with those of Annapolis, and we try to do our duty faithfully; but hampered, as we are in common with every country paper, from the competition of the numerous weeklies issued from the Upper Provinces, our usefulness is not what it might be, if the inhabitants of Annapolis County would resolve to a man to support their own paper. Our list of good crops as it stands at present, but does not represent as many families as we should like to see it, therefore we call upon all those, not already subscribers, who are interested in the advancement of their own country, to send in their names at once.

That the Negro can make headway in the struggle for existence, and can make efforts to better himself, and worthy of respect, is beginning to be at last acknowledged by the Southern press, a fact which must prove exceedingly gratifying to those interested in the welfare of the colored race in this country. In reviewing the progress of the negro the Memphis "Appeal" admits that "it is an undeniable fact that the negro is making his way, and is winning a more favorable position than has been thought possible in the same generation that saw him a slave."

The street on which the Foundry is situated presents a very lively appearance just now. Mr. Craig has lately imported an improved thrasher, which he has placed in the second story of the new building erected by him, and every fine day Court street is literally blocked with loaded carts of grain, with attendant teamsters patiently waiting their turn at the thrasher. Work commences at about six a. m., and continues until after candle-light.

A Good Cow, a Large Cow, and a Cow Worth Having.—Mr. Geo. V. Knight, who lives near this town, has a cow that gives three large pails of milk per day. She is a very large animal and some curiosity being excited as to her weight, she was placed on Murdoch's hay scales the other day, and kicked the beam at 1350 lbs.

Mr. G. O. Fulton, Truro, publisher of the "Weekly Monitor," has just published the "Dural Journal," a short-lived paper, but one that has done much to establish the enterprise of course. Operations first began in Indiana and have been extended to several other States of the Union. The circular says the Association aims "to encourage helpful work, to promote economy, to endow homes, and to make married life the end and aim of rich and poor alike." The manner in which it conducted is something of the mutual life insurance plan. \$3 is paid into the treasury by the aspirant to matrimonial honors, on joining, and semi-annual payments of \$1 thereafter. Should he marry a year from date, he receives \$200; or if it is five years before he marries he will receive \$1000. During the time that he is in the society, however, should any of his co-members marry he is to pay the amount on, and these are grand possibilities in a scheme like this, and the heart of the spinner will wax glad, ditto baby carriage manufacturers, ditto dressmakers, ditto tailors (if he gets his pay), and ditto lots of fellows who can now spend their whole salary in treating their girls to ice-cream, theatre tickets, etc., secure in the smother of their certificate when they turn beneficiaries.

What Artemus Ward would call a "gay and festive case" was recently arrested in New York. His name is Arthur Merrill, but he has travelled under a score of aliases. He is sixty years of age and has perpetrated every villainy in his life to ruin fifty men's characters. Young men meeting him and banks were put to flight, the first he entrapped into robbing a bank, and succeeded in gaining about eleven or twelve, then by means of forged endorsements he swindled the banks out of large amounts of money. He married one woman and four days afterwards married another. Counterfeiting was also another of his accomplishments.

Diphtheria has broken out at Nictaux Falls. Mr. Horatio Bent's family is prostrated with it quite severely.

New Steamer for the Hatheway Line. Messrs Hatheway & Co., of 22 Central Wharf, Boston, Mass., send us the following under date of the 23rd inst.: "We notice the article signed 'Nova Scotia' and believe the writer must have been inspired, or had second sight, as we have just now ordered such a steamer for the route as he wishes for, and in fact somewhat better. We are second steamer we have secured the management of, viz. the steamer 'Sergeant,' built on the Clyde, of steel and iron, and every modern improvement; having plenty of staterooms, and in fact accommodations for 100 passengers, and the reputation of being a very fast boat. As iron and steel is fast superheating wood in the construction of steamers and ships, we know she will be very popular with your people, who being a British boat, and owned by Canadians, are not Nova Scotians and New Brunswickers' Gazettiers?"

We intend to keep the steamships 'Hunter' and 'Sergeant' plying between Annapolis and St. John's, and trust the public will give us the slight praise of being men who dare to make a push. A further communication from Messrs Hatheway & Co., under date of 23rd inst., says, that the 'Sergeant' is 231 feet in length, with splendid accommodations, staterooms, dining room, etc., therefore every possible convenience for the comfort of passengers will be afforded. The 'Hunter' and 'Sergeant' will make two trips per week during the fall. In the Boston market apples are quoted high and scarce, demand good; potatoes in demand at \$2.50 per barrel.

Stagnant! Stagnant!—Now is the time to subscribe to the Monitor. The prospect for all business in this valley, in produce exportation, in every way, and to see everybody interested should give up the idea of going to the States, and remain here. All information in regard to sales, shipments, quotations, etc., of the London market, will be found in our columns. Our interests are identified with those of Annapolis, and we try to do our duty faithfully; but hampered, as we are in common with every country paper, from the competition of the numerous weeklies issued from the Upper Provinces, our usefulness is not what it might be, if the inhabitants of Annapolis County would resolve to a man to support their own paper. Our list of good crops as it stands at present, but does not represent as many families as we should like to see it, therefore we call upon all those, not already subscribers, who are interested in the advancement of their own country, to send in their names at once.

The steamer "Ceres" lately wrecked on Thurin Cap Shoals, Halifax, has broken up.

REVENUE PATRONS.—Mr. Wm. Miller has just received and has for sale, the September numbers of Butcher's Patterns.

REVENUE PATRONS.—Service will be held in this church on Sunday next at 4 o'clock, p. m., Rev. James Thompson presiding.

The Annapolis Organ Company, recently sold a \$500.00 organ to the Roman Catholic chapel at Quinlanville, Digby Co.

The bark, Geo. E. Corbit sailed for Glasgow, on the 22nd inst. Her cargo consists of smoked fish, spruce pallings, and deals, valued at \$4,717.

An enjoyable time was spent by the large party of excursionists who passed over the line from Kenilworth to Digby last Thursday.

It is reported that the markets abroad are somewhat depressed, in consequence of the high price of wheat. J. W. Beckwith is paying for eggs.

The Irish Land Bill. The following are the main heads of the Land Bill as it has finally passed both Houses of Parliament:—

1. Tenants may sell their tenancy for the best price that can be obtained, subject to certain conditions.

2. No tenant shall be liable to be evicted from his holding, except in certain cases.

3. Landlords may not raise the rent of a holding, except in certain cases.

4. Landlords may not sell their tenancy, except in certain cases.

5. Landlords may not subdivide their land, except in certain cases.

6. Landlords may not evict tenants, except in certain cases.

Wanted for Clergyman. I believe it is all wrong and even wicked for clergy to be paid for their services. I am a layman, and I believe that every man who is called to the ministry should be supported by his flock, and not by the State.

Steering Ships by Electricity. A young Scotch electrician, Mr. W. F. King, has lately introduced a contrivance whereby a ship steers itself through the agency of electricity and without the intervention of a helmsman. This is effected by means of a compass card, operated by which the compass card carries a light index, tipped with metal; and projecting inwards from the rim of the compass are two metal contact-pins, which are set so to enclose about three degrees of the compass card. The middle degree of these is the true course to be steered, and the index is placed so as to point out. As long as the ship keeps the true course the index remains in this position; but when the vessel deviates from the true direction by as much as one degree to right or left, the metal-tipped index comes in contact with one of the other two contact-pins which causes a current of electricity from a battery installed on board to operate the hydraulic apparatus which works the helm. The ship is thus brought back to her true course, and continues on her way until the next deviation occurs. A single Daniel cell is sufficient for this purpose, and the accuracy of steering is even greater than that of a first-rate helmsman. That the invention is a practical one may be gathered from the fact that a large number of steamers are fitted with the Clyde under its guidance, although the project is quite novel.

PHILADELPHIA, Aug. 29th, 1881. It would seem proper to suppress, with the grain market jumping three to four cents per bushel daily, that any material improvement in the market would be impossible, and yet the European demand has apparently kept pace in the advance, and we note the stronger and upward tendency in the market and in the price of grain and potatoes on the whole for the week has been very satisfactory, the rates secured compare favorably with those of the past, and we truly believe that a further advance may still be anticipated.

NEW ADVERTISEMENTS. Mrs. L. C. WHEELOCK. In exchange for DRY GOODS. Mrs. L. C. WHEELOCK. In exchange for DRY GOODS.

COX BROTHERS. THE attention of the public is respectfully drawn to the fact that the old firm of COX BROTHERS is still in business as the old firm.

TEA MEETING. Thursday, September 8th. Proceeds to be appropriated towards raising a fund for the relief of the poor.

TEA MEETINGS. This is the season for Tea Meetings, and in order to make them a success, the very best materials are required.

New Advertisements.

Order to make room for large fall importations, which are already beginning to arrive, I offer the BALANCE OF MY SUMMER STOCK OF DRY GOODS, BOOTS AND SHOES AT COST.

HATHWAY LINE. BOSTON AND NOVA SCOTIA. in connection with the WINDSOR & ANNOPOLE RAILWAY.

THE STAMPSH HUNTER will leave Truro, N. S., every Thursday P. M. for Digby and Annapolis, and will return from Annapolis every Monday P. M. at 3.30 o'clock, via Digby, making close connections with the trains for Halifax and intermediate Stations.

Free of Boston Wharfage. For further particulars apply to F. INNES, General Manager, and the several Offices, Agents of the W. & A. Railway, and to the Hathway Line, 22 Central Wharf, Boston, April 23-27-30.

Hathway & Co., 22 Central Wharf, Boston. T. S. WHITMAN, Agent, Annapolis, April 23-27-30.

General News.

Stock in Great Britain during the last ten years has diminished more than twenty per cent. There has been a decline of two million sheep and one million head since 1870.

The Post Office Department has received a preliminary report from the United States Postmaster general regarding the small bag charges and demanding the careful execution of the international regulation relating thereto.

A Berlin manufacturer is laboring under the impression that he is God, and has been travelling two million miles on the coast for the purpose of dealing out punishment to the world. It is said that there have been a number of cases of lunacy in Germany of which the cause has been the cause.

A London physician of Pittsburg, who is joining to a lady patient who was complaining of her stomach, and of her inability to eat, "try Hop Bitters." The lady took it in earnest and used the Bitters, from which she obtained permanent health. She now laughs at the doctor for his joke, but she is not so well pleased with it, as it cost him a good patient.—Harrisburgh Patriot.

The Standard's Berlin correspondent says:—"An international police conference has opened at St. Petersburg. A representative of America is expected to attend. England is to contribute to the enterprise by the erection of an observatory in Northern Canada. America will erect stations at Point Barrow and Lady Franklin Bay."

Barren's Wares.—Sellers are still rather scarce. Able season now commands \$20 to \$30, and goods \$20 to \$30, maces \$20 to \$30, and hams and boys in like proportion. This is exclusive of blood-money. It is expected, however, that upon the arrival of a large fleet, which event must soon come, the labor market will be strengthened by an active demand for seaman of all kinds.—St. John News, 25th inst.

A Japanese coil of rope which recently fell into the hands of an English gentleman weighed 900 pounds, was seven hundred feet in length, and was made entirely of human hair cut from the heads of over 2,000 Japanese women. It has taken six years to weave it by hand, and was made for a Tycoon who, when it was completed, concluded that a steel cable would answer better, and so gave this magnificent hair to an English traveler, who afterwards presented it to the museum.

Barren's Wax Factory.—We understand that Mr. S. F. Bealman, while in the State of Michigan, has started at this place a barrel and box factory for the putting up of apples and plums, etc. He has put in improved machinery, and is able to turn out 100 barrels a day, besides boxes. It is allowed by those most competent of judging, that these barrels and boxes are fully up to the standard—in fact are superior to most that are now made. They are the thing for shipping apples to foreign markets. Next year Mr. Bealman intends putting in machinery that will turn out at least 50,000 barrels, saying nothing of boxes which he can furnish to an unlimited extent.—Harrisburgh Chronicle.

The Coming Week.—Wealth in Black Birch.

It is said that the supply of black walnuts is gradually becoming exhausted, and a substitute is being looked for. The general impression in Ontario is that black birch is the coming wood. It is close-grained, and handsome, and can be easily stained to resemble walnut exactly, and besides being very durable is suitable for all the purposes for which walnut is used. It is susceptible of a beautiful polish equal to any wood in use. The price of this wood is already advancing, and Canadian foresters are likely to realize for the people a very handsome amount. It is said to be difficult to get to the saw mills by water, as it is so heavy that it will sink after being a few days in the water, which is a slight drawback, but as a means to remedy this it is bound together with pine logs, if pine is handy to it.—Fredericton Reporter.

London, Aug. 27.—The speech from the throne on the Proclamation of Parliament, declares that the relations with foreign powers are amicable and cordial, satisfactory assurances are received from France regarding Tunis, and the government has been secured to Transvaal, which it is hoped will tranquillize South Africa. The withdrawal of British troops from Afghanistan is not expected to lead to any trouble on the north-western frontier of India. Although negotiations have been temporarily suspended, the best efforts will be made to conclude commercial treaty with France. In reference to Irish affairs the Queen says it is her earnest hope that the new Land Act may be productive of benefits commensurate with the care given to the measure. It has been the study of Her Majesty, to use the exceptional powers conferred to her in Ireland, with vigilance and firmness, but with discrimination. The desire is expressed that the condition of the country will so improve that the use of those extraordinary powers may be dispensed with at least.

Personal Appearance of the Wounded.—New York, Aug. 24.—The Secretary of State views the case in saying that the patient fails to regain strength. Possibly Mr. Blaine will not feel warranted in his statements after consultation with the physicians present. It is asserted that the President has gained some little strength from the liquid nourishment he has taken during the past few days. But it is said that the signs of returning strength are very slight. I know that last night Mr. Blaine was utterly dependent, and his melancholy was shared by other members of the Cabinet. It must seem even to Dr. Bliss, who is the most sanguine of the physicians, that it is a gigantic task to restore the President to health. None of the reports of his feeble condition are exaggerated. A large, strong man, in health neglected about 210 pounds, he is now in reality a living skeleton. The outward signs of his extreme emaciation do not affect

those who have seen him constantly since he was shot, but he would scarcely be recognized by those who knew him well before July 2. There is very little flesh on the body. The bones protrude. The eyes are swollen, cheeks hollow and skin drawn over the face, parchments. Mrs. D. Eschling has said as a point d'honneur, that the President's forehead is not thicker than his wrist was before he was injured. The stomach of the sick man is as capricious as the stomach of an infant. No one can tell as to what moment it will refuse even the liquid nourishment which it now retains, and upon the operation of this organ the life of the sick man depends. There is another danger threatening which may or may not be averted. This danger is suppuration of the swollen parotid gland. While the physicians hope that the swelling may be reduced without suppuration there are many indications to present that this hope will not be realized. If the swelling suppurates and is lanced the experience of the past indicates that it will be attended with another derangement of the stomach. The physicians are certainly engaged in a desperate fight, with large odds against them, and they will deserve all praise if they win.

Guineau's Great Crime.—AN ALLEGED CONSPIRACY OF THE FORTUNE-TELLERS.

The following letter has been addressed to the New York "World," the allegations in which, if true, and but one of the many which have been made, are so utterly untrue, and so utterly absurd, that it is almost impossible to believe that any man of sense would believe them. The following is a translation of the letter, which is addressed to the New York "World," and is signed "Guineau," the name of the assassin of President Garfield. It is a translation of the letter, which is addressed to the New York "World," and is signed "Guineau," the name of the assassin of President Garfield. It is a translation of the letter, which is addressed to the New York "World," and is signed "Guineau," the name of the assassin of President Garfield.

Paris, Aug. 21, 1881.—Private advices received in this city state that the explorer Stanley is lying dangerously ill half way between Stanley Pool and the mouth of the Congo. He is in a very bad way, and it is feared that he will not survive. He has been suffering from a fever, and his condition is very serious. It is said that he has been in the hands of the French government, and that they are doing everything possible to cure him. It is hoped that he will recover, but the odds are against it.

Washington, Aug. 25.—The Herald's dispatch says:—"A representative of a telephone company, who had been in the city for some time, was seen by a man who was in the city for some time. The man was in the city for some time, and was seen by a representative of a telephone company. The man was in the city for some time, and was seen by a representative of a telephone company. The man was in the city for some time, and was seen by a representative of a telephone company.

Graveyard Life Insurance.—HOW MANY MEN AND WOMEN ARE DEVED BY THE AGENTS—A PROVISIONAL FARMER BEING.

Reading, Pa., Aug. 20.—A case heard before Alderman Grant of this city today resulted in an exposure of the methods of those engaged in the business of grave yard life insurance. An old man, bent with infirmities and a mispent life, brought suit against an agent to recover \$25. The man was in the city for some time, and was seen by a representative of a telephone company. Paris, Aug. 21, 1881.—Private advices received in this city state that the explorer Stanley is lying dangerously ill half way between Stanley Pool and the mouth of the Congo. He is in a very bad way, and it is feared that he will not survive. He has been suffering from a fever, and his condition is very serious. It is said that he has been in the hands of the French government, and that they are doing everything possible to cure him. It is hoped that he will recover, but the odds are against it.

Washington, Aug. 25.—The Herald's dispatch says:—"A representative of a telephone company, who had been in the city for some time, was seen by a man who was in the city for some time. The man was in the city for some time, and was seen by a representative of a telephone company. The man was in the city for some time, and was seen by a representative of a telephone company.

Graveyard Life Insurance.—HOW MANY MEN AND WOMEN ARE DEVED BY THE AGENTS—A PROVISIONAL FARMER BEING.

Reading, Pa., Aug. 20.—A case heard before Alderman Grant of this city today resulted in an exposure of the methods of those engaged in the business of grave yard life insurance. An old man, bent with infirmities and a mispent life, brought suit against an agent to recover \$25. The man was in the city for some time, and was seen by a representative of a telephone company. The man was in the city for some time, and was seen by a representative of a telephone company.

Personal Appearance of the Wounded.—New York, Aug. 24.—The Secretary of State views the case in saying that the patient fails to regain strength. Possibly Mr. Blaine will not feel warranted in his statements after consultation with the physicians present. It is asserted that the President has gained some little strength from the liquid nourishment he has taken during the past few days. But it is said that the signs of returning strength are very slight. I know that last night Mr. Blaine was utterly dependent, and his melancholy was shared by other members of the Cabinet. It must seem even to Dr. Bliss, who is the most sanguine of the physicians, that it is a gigantic task to restore the President to health. None of the reports of his feeble condition are exaggerated. A large, strong man, in health neglected about 210 pounds, he is now in reality a living skeleton. The outward signs of his extreme emaciation do not affect

those who have seen him constantly since he was shot, but he would scarcely be recognized by those who knew him well before July 2. There is very little flesh on the body. The bones protrude. The eyes are swollen, cheeks hollow and skin drawn over the face, parchments. Mrs. D. Eschling has said as a point d'honneur, that the President's forehead is not thicker than his wrist was before he was injured. The stomach of the sick man is as capricious as the stomach of an infant. No one can tell as to what moment it will refuse even the liquid nourishment which it now retains, and upon the operation of this organ the life of the sick man depends. There is another danger threatening which may or may not be averted. This danger is suppuration of the swollen parotid gland. While the physicians hope that the swelling may be reduced without suppuration there are many indications to present that this hope will not be realized. If the swelling suppurates and is lanced the experience of the past indicates that it will be attended with another derangement of the stomach. The physicians are certainly engaged in a desperate fight, with large odds against them, and they will deserve all praise if they win.

Guineau's Great Crime.—AN ALLEGED CONSPIRACY OF THE FORTUNE-TELLERS.

The following letter has been addressed to the New York "World," the allegations in which, if true, and but one of the many which have been made, are so utterly untrue, and so utterly absurd, that it is almost impossible to believe that any man of sense would believe them. The following is a translation of the letter, which is addressed to the New York "World," and is signed "Guineau," the name of the assassin of President Garfield. It is a translation of the letter, which is addressed to the New York "World," and is signed "Guineau," the name of the assassin of President Garfield.

Apple Exportation.  
Sun.—noticed an article in the Herald of the 8th under this head, giving extracts from a London fruit dealer, I would endeavor to write them about the condition of the market for apples, selection of the fruit, etc., and would add that a letter style of barrel would be an advantage to the sale of our fruit. But I cannot agree with our London friend that the wildest and damaged condition of a large portion of the apples that arrived in the English markets from this side last season, was caused solely by frost and not frost. But on the contrary, the damage in most all cases was from excess, and not from frost. Sound apples shipped in the hold of a grain loaded steamer, are almost invariably ruined before they reach the other side. This has been proved by the dear brought experience of shippers from the Annapolis Valley, and it was only when the fruit was stored in some spare apartment or on the deck, that it was saved. Apples will stand very severe frost without injury. If kept in a temperature just above the freezing point, the most delicate fruit such as our Gravenstein, will stand a frost of 8 to 10 months, and the hard fruit 9 to 12 months. The best temperature for apples is 35° to 40° kept very damp and kept in temperature. I have seen a quantity of apples, packed in boxes with refrigerators to keep up an even cold temperature (as now being fitted up in London for dead meat), apples should be kept in good condition the year round by the use of the "Iceberg" method. The "Iceberg" method is to pack the fruit in a mixture of sawdust, straw, and other material, and to keep it in a cold storage. This method is the best for long storage.

REMARKABLE RESULTS FOLLOW.—Pain, cough, swellings, ulcers, fever, and a host of other ailments, were cured by the use of the "Iceberg" method. The "Iceberg" method is the best for long storage of fruit. It is a method of packing fruit in a mixture of sawdust, straw, and other material, and keeping it in a cold storage. This method is the best for long storage of fruit. It is a method of packing fruit in a mixture of sawdust, straw, and other material, and keeping it in a cold storage.
