A POSSIBLE CLUE.

A farmer named Roddy, who lives near the Roseville cheese factory, informed a reporter that on Monday norning last, while he was drawing milk to the factory, he met Harry Blair in the vicinity of Orr's. He knows Blair well by sight. This the crown considers very important evi-

TALK OF A CONFESSION. A report was freely circulated to the ffect that the prisoner Allison had nade a confession. The officers were een, but they would say nothing bout the matter, as everything is being quietly arranged for the inquest. It is, however, said that Allison stated that while he was taking the cows to pasture, he saw a man, and the latter concealed himself from view behind a bush. Immediately after this he (Allison) commenced raking up the yard, and while doing so he discovered blood on some chips. He also says he found a heavy stick on which there was blood, but he thought nothing of it, and deposited it on the wood pile.

The second theory connects Harry Blair vith the tragedy. A reporter had a talk with Blair in his shop yestowal and at a talk with Blair in his shop yestowal and, after some persuasion, succeeded in getting him to give an account of his movements on the morning of the tragedy. Blair says that he was at the railway station at 7 o'clock that morning, and that after leaving the station he did some work around his house, and at 8 o'clock was at his son's tea store. Between 8 and that is not all. The next week to money on goods, \$5.75; next week, \$5 in being quietly arranged for the inquest.

DETECTIVE MURRAY'S COURSE Detective Murray is making energetic and apparently successful ef-forts in the matter of determining who murdered Mrs. Anthony Orr. As with the case and the subsequent de-

# Forging Ahead With the Rebuilding.

The whole front of our two stores is torn out now, but that does not interrupt this remarkable sale going on inside. It only seems to emphasize things. It emphasizes the fact that we must clear out every bit of goods possible. It makes us willing o take prices we never were compelled to ask for such goods before. Things may not look in their usual neat, trim condition. We haven't room for display now, but it's the prices that are making things fly. We are making still deeper price cuts.

## Ask for These in Millinery:

Toronto, Aug. 18.—Mr. Thomas Southworth, clerk of forestry, returned yesterday from a visit to the timber lands in the northern to the timber lands in the northern sections of the province, in company with other members of the forestry commission. The party were away nearly a fortnight, and during that time visited the forests in the vicinity of North Bay and along the north shore of Lake Nipissing, afterwards proceeded along the western end of the lake and through the district traversed by the Canadian Pacific Railway to Whitefish, thence along the ed: Credential, finance, written and unwritten work, state of the order, north shore of Georgian Bay, making particular examination of the section known as Collins' Inlet. Mr. Southworth states that the tim-

er conditions at Collins' Inlet are already of such a character as to make it an ideal forest preserve. The limit owned by the Collins' Inlet Lumber Company is large and extremely wellwatered, and there are pine trees of second growth which are now shooting up vigorously, ranging from six inches in height up to twelve inches in diameter. On the north shore of Lake Nipissing the conditions are not so good, because the district has been re peatedly swept by fire, and it will take a longer period for the second growth to appear.

Mr. Hutchison, St. Thomas, received a telegram from Woodstock stating that Mrs. (Rev.) Circle at Sarnia.

Annual Meeting of the A. O. F.

Progress of the Order - Interesting Financial Statement.

S. Williams, of Toronto, in the chair. About 30 members were present, including the permanent secretary and the high court treasurer. Addresses of welcome were read from Court St. Clair, A. O. F., and the Sarnia Circle; and an invitation was extended to the delegates to go to Stag Island in the evening. The usual committees were appoint-

and press.

The high chief companion then read his annual report, which stated that by the action taken at the special meeting of the supreme circle, held in Galt, Feb. 18, 1896, we ceased to exist as a supreme body, and became a re-cognized branch of the subsidiary high court of Canada, Ancient Order Foresters. With the basis upon which this change was founded, you are a familiar, and it will not be necessar or me here to allude to it. Owing very probably to the still continued depre sion of trade, and the almost chron complaint of hard times, the progress of the branch numerically has not been so pronounced as it was generally anticipated would have been the result of the change accomplished. Six new circles have, however, been instituted nce our last meeting, viz., 127, Win-peg, Man.; 128, Petrolea; 129, Nanao, B. C.; 130, Oshawa; 131, Ottawa; 32, Kingston; and there are prospects of other circles being instituted at a very early date. But while our antiipations in this regard have not been ully realized, it is gratifying for me to be able to report very substantial improvement in our general condition,

provides his horse with a sun bonnet when it is oppressively warm. This action has been taken at the suggestion of the government and the Society for the Prevention of Cruelty to Animals, and so great has been the demand that the straw manufacturers of Luton have been kept busy supplying the novel headgear. The hats are shaped on the Bordeaux model, having a high crown and a broad brim, like the straw bathing hat used in Canada, with holes for the horse's ears. The use of the bonnets has greatly decreased the summer mortality among horses in France. Wise Canadian horsemen will no doubt take note of this experiment.

SE SE A cable correspondent confirms the statements recently made by returned Canadians to the effect that trade in Great Britain has been brisker during the past year than for many seasons past. In the great manufacturing city of Birmingham, for example, the enorstimulated all of the innumerable trades, large and small, for which that city is famous, and everyone has been able to get good wages. Tanners, saddlers, steel ornament makers, jewelers, brass and iron founders, tube and chain makers, nail and screw and spring makers, japanners, enamelers and silver platers, workers in rubber, booming. Every man, woman and child who wanted work was able to get it, and for nearly a quarter of a century there has not been so small a number of applicants for relief. The motherland declines to earn the fame, attempted to be placed upon her by Canadian trade restrictionists, of being a played-out community, unable to hold her own in the world's competition. She is very much alive.

Thamesville, Aug. 18 .- While Dent Bros., of North Thamesville, were drillwater near their mill on Saturday afternoon, they struck rock at a depth of 65 feet, and after going down in the rock about 20 feet further, they struck a heavy flow of gas, which they estimate at 75 to 100 pounds pressure there being no water apparently to shut off its escape.

Monday night, after an interval of 48 hours, it had every indication of making a steady well. The pressure seems to be increasing instead of diminishing. The mill where the well was put down is less than 20 rods from the C. P. R. station, and could easily be converted to the benefit of the company to furnish light and fuel.

CRETAN FRATERNITY. One of the curious Cretan customs which prevailed on the eve of every insurrection is known as adelphope sis, or fraternization. One of its results, says the Fortnightly Review, is the cessation of all feuds, enmity and rancour. It is carried out as follows:

A number of individuals choose a young girl, who must be pretty-no difficult matter in Crete. They inform her parents of their intention, and the Then a priest is sent for and told to begin the ceremony. He takes a ve long girdle and joins all the men wi t in a circle, in the center of the young girl is placed. The clergyman recites a number of prayers and winds up by giving his benediction to all present. TWO FIRE ALARMS-FALSE AND TRUE.

The firemen were called out twice p.m., to a supposed fire at Nash's FIXTURES FOR THURSDAY AND streets. Smoke was seen issuing from the factory chimney, and an alarm sent in. It was nothing more serious, however, than a fire in the varnish room, where employes were working overtime

At 2:45 a.m. an alarm called the department to York street, near Ridout. Fire had broken out in the second house east of Gerry's planing mill. The building was occupied by Mr. Purdy, confectioner, as a factory, and it is supposed that the blaze started near the roof from the fire in the oven. Mr. Purdy lives next door, and when aroused by his little girl, who first discovered the fire, found the roof to the extent of about \$150.
