New Westminster. June 7.—(Special)—
The news from up river was discouraging this evening. During the night the water began to rise at Katz Landing and rose four inches, while at Spuzzum (above Yale) the fibod increased by seven inches. At 2 o'clock this afternoon specials were received from both points stating that the rise had ceased and a fall was expected. No change in the attention is reported from up the river. The water has dropped several inches, and the families who were requiring steamboat assistance to remove their cattle have all been attended to. The steamer Gladys with Hon. Col. Baker returned to port last night, and the steamer Blonde this morning.

COURAGEOUS AND HOPEFUL. The following description of the flooded

"A dismal situation, waste and wild," is a Miltonic expression that fitly describes the flooded farming district on the Columbia at present. Hundreds of acres of orchard, garden and meadow heretofore subject to relatively slight and harmless overflow are now lying below a depth of water varying from four to ten feet. Drift in large quantities has been borne in upon many half-submerged orchards and lodged; houses are submerged to the second story, and the roofs of barns appear foriornly above the waters. Much hardship, not to say destitution, must result from the inundations of these garden, dairy and fruit lands, and from the loss of cordwood, buildings, fences, etc. The utter desolation that reigns over an inundated agricultural section can only be understood by being seen, and to see this in its most pathetic aspect it is only necessary now to pass by steamboat from Portland to the Cascades and look over the wide waste of turbulent

The cheerful courage with which the settlers who have been driven from their homes by the irresistible flood face misfortune is worthy of admiration. It is, we are bound to say, as general and as remarkable on this side of the line as it is on the other. The women of the Fraser valley, particularly, are worthy of all honor. They, in this time of dire distress, cheer and encourage the men. They, as Col. Baker and others testify, are not in this trying crisis the weaker sex by any means. They are not tion of their country has been made to help The precise amount of damage done around them. They are not in despair when they find that the hopes which they cherished of having more beautiful homes and less tollsome lives are suddenly crushed, and that the time of struggle and privation must begin again. They do not repine. Their countenances are cheerful and their words hopeful. They are not only doing their best to lighten the burden which the men have to bear, but they are nobly helping them to carry it.

It is pleasant to find, too, that the suffer ers are exhibiting a spirit of independence and of self-reliance which is most admirable. They beg those who visit them not to put the worst face on the disaster, not to represent them as being more destitute than they really are. What at present gives many of them most concern is the fear that their creditors will begin to press them before depression lasts, rather bear the Ills that they are well on their feet again. We think that this is not likely. To be hard on men in their condition would be cruel, and really against the interest of the creditor. What is best for him as well as for all the rest of the community, is that the honest and industion extrice settler be as soon as possible in a position to work his land to the best advantage. To help and to encourage him to get into this position should be the object of everyone who has the good of the Province at heart, who has the good of the Province at heart, and it seems to us that the rest of the greatest imported the fraser will need the great deal of help from outside the Province at the lills that they have than bring upon themselves they agreed the strike of help from outside the Provincial Government is doing all it can to supply their present and immediately prospective needs. The brightest hope that these flood-sufferers cherish is that the waters will subside quickly, so that they may return to their soaked houses and sodden fields in time to replant a portion of their root crops and secure a second growth of hay. The prospect, even should their hopes be realized, is not a very inviting one, and the industry and courage that stand ready to meet and welcome even so slight a return as this for the year's endeavor is worthy of admiration and encouragement. and earned for it the contempt of all men everywhere who believe in upright dealing. The result of the election in Oregon is a surprise to many impressible people in that State. The Populist campaign was an exceedingly noisy one. Pennoyer himself was perpetually bragging. He held a large number of meetings, which were well attended, chiefly by people who went to them out of ouriosity and to hear what such a singular man as Pennoyer was known to be had to say for himself. At these meetings there was always quite a number of Populist fanatics, who were most demonstrative. They shouted and cheered at such a rate that led quiet people who were not suspicious to believe that the audience was chiefly composed of the supporters of Pennoyer. They carried the meetings, as far as noise went, by immeuse majorities, the same thing, though perhaps not to the same extent, took place at the meetings held by other leading Populists. ## ROYAL COMMISSION.

The following report of the Royal Commission appointed to inquire into certain matters concerning the Nakusp & Slocan Railway is published for general informa-By Command.

A. CAMPBELL REDDIE. Dep. Provincial Secretary.

REPORT. To the Honourable Edgar Devodney, Lieuten-

ant-Governor of the Province of British Columbia:

ters therein mentioned, concerning the Nakusp & Slocan Railway Company, have the honour to report that the manner in which that inquiry has been made, and the evidence taken therein will appear by the record of the proceedings of the Commission, which we have the honour to submit herewith.

It will be seen from the notes of evidence, penses of witnesses would be recouped to them through the Commissioners, no one has thought fit to appear in support of the accusations.

The only person from whom we have received any assistance in this direction has been the Hon. Robert Beaven, M.P.P., who, though not responsible for making the charges, broug-forward some facts upon which he suggest

the absence accusers might have relied.

These were, first: irregularity in acting upon the Statute et 1893 before it had actually been brought into force, which could only be done by an Order in-Council.

by an Order in-Council.

But this seems, though an irregularity, to be quite inadequate to support the charge of corruption against the Minister. The Statute of 1893 was brought into operation by an Order-in-Council almost immediately afterwards. The whole transaction has been confirmed and ratified by the Statute of 1894, and the irregularity of the transaction that the Mineser of the transaction of the confirmed and the irregularity of the statute of 1894, and the irregularity of the statute of the confirmed and the irregularity of the statute of the confirmed and the irregularity of the confirmed and the irregularity of the confirmed and the confirm rathed by the Statute of 1881, and the irregu-larity, so far from demonstrating that the Min-ister was then the agent of the Company, points distinctly in the opposite direction, since it would have been the first care and duty of such an agent to see that everything

was in order.

And secondly: Mr. Beaven pointed out that in the opinion of many persons, the undertaking which the Statute of 1894 imposed upon the Government, in lieu of that under the Statute of the former year, was so manifestly disadvantageous, that it was to be inferred that it could only have been introduced and supported themselves corrunt motives: though it must be

But, how-ever that may be, on the issues more directly submitted to us by the Commission, there we think no room for doubt, and we find as lows, that is to say:-Firstly: That the Honourable the Premier

Westminster Mills Still Closed Down—No Further Breaks in the Dykes.

George McL. Brown, district freight and passenger agent of the C.P.R., who was in the city last evening, takes a more hopeful view of the situation—in so far as the rail way is affected—than have other officials of the road whose opinions have been telegraphed from Vancouver. He does not think that the loss sustained will approach anything like a million, and anticipates that trains will be running through from ocean to ocean within a month, while communication will be at once reopened and delayed Westbound passengers and mails landed in Victoria, to-merrow night. For the present, of course, the relief fund. J. E. & E. Phillips have subsengers and mails landed in Victoria. to-morrow night. For the present, of course the breaks in the line will be covered by steamera. The first ferry will connect Wharnock and Katz Landing, as before, and the second bridge the break at Golden. At Banff the water is very high, but the bridge standing firm there is no interruption to traffic. The Raymond excursionists who were to have gone North by the Queen—and whom one "enterprising" San Francisco paper had drowned in the Fraser—are still enjoying the hospitality of the company's hotel at Banff, and will not leave for Alaska until the salling of the Topeka.

An effort is now being made to move the accumulated freight, a portion of which at least may be expected by Victoria consignees early in the new week. Telegraphic communication is as fitful and unreliable as ever, yesterday's south business being subject to the delay entailed by the operation of a rowboat ferry across the swollen Columbia.

Superintendent Wilson, who has just returned to Vancouver from the acene of trouble, says that the difficulties were the worst he has ever had any knowledge of, as owing to the numerous slides and the rapid rise of the waters, the wires were carried away as fast as they could be put up. The company now have wires as far as Ashcroft, and if there is no trouble in the Rockies a connection will soon be established with Winnipeg. At Maria Island the workers have had to divert the line from the railway track and carry it around by a different route altogether, building a mile or more of extra line.

on Monday, Mr. Wilson says, the thermometer registered 105 in the shade at interior points, and the heat for weeks past had been terrible. On Saturday the cloud-burst near Ashcroft completed the work begun by the floods and effectually blooked all traffic. The up-river reports of vesterday were varying in character. At Kamloops, 1½ inches rise; at Ashcroft, 3 inches rise; at Gladwin, 12 inches rise; at North Bend, 3 inches rise; at Katz Landing, no change; at Mission, fall of 2½ inches; and at Westminster, a fall of 3 inches; and at Westminster, a fall of 3 inches. From Ladner's Landing the latest advices are that the water is quite two inches below the highest mark of Wednesday. The highest tides are now pest; and as the river also is falling, further damage from overflow is not apprehended.

CRIPPLE CREEK, June 8.—The miners are demoralized, and are fleeing from Bull Hill. The militia is inactive, and the sheriff has ordered his deputies to go up and make arrests. They are moving in equads of thirty, and have so far met no resistance. The only danger seems to be that the strikers may explode some hidden dynamite under them, but the resistance is deubted. Near Wells' raunoh (Luk-a-Kuk slough) the steamer or crossed a road by the side of which ran a telegraph line, the wires then being only a foct or two above the water, and the secessity of the occasion requiring that they be out to allow the steamer to pass through to the relief of the settlers. Drift and debris brought the Gladys incorrect danger on more than one occasion, and once her wheel came within an acc of being destroyed by a passing giant of the forest. During the trip, the steamer at one time lay alongide the railway track, made fast to the rails, and thus received the cattle of the neighborhood for transportation to asier quarters.

Col. Baker is enhanisation in his expressions of admiration of the seteling courage and spirit evinced by the settlers one and all; none have lost heart under their great trials, nor manifested any disposition of yielding the battle. The women especially have shown herelo dispositions during the formigh past. "But there is one bright spot among all these losses, and that is that the cattle and stock have been saved for the present, through the assistance rendered by the Government. If, however, this stock is to be saved for the future, means must be found for providing winter food. This can only be done by furnishing the farmers at once with seed, in order that it may be put into the ground just as soon as the water subsides. The seeds available would be potatoes, oats for hay, barley as food for the hogs, Hungarian grass and millet, and turnips.

"It is the intention of the government to at once provide this seed for the farmers, so that it may be ready for immediate service when the water disappears. Fences will also have to be replaced, and bridges put in, so as to renew communication for the settlers. This work necessarily will give employment to the farmers at wages, and it is to be hoped will assist them to tide over their serious difficulties.

Devotional exercises led by Rev. W. Finwall opened the third and last day's proceedings of the Northwestern Baptist Association yesterday.

Rev. J. Cairns read the report of the committee on the State of Religion, which set forth:

"That while acknowledging the hand of God in the salvation of upwards of 230 souls during the past year, many have been deploring the hard times instead of "lifting up their eyes to the hills whence cometh our aid." This together with the disturbed state of pastoral relations in many of our oburches will account for the falling off of state of pastoral relations in many of our churches will account for the falling off of 100 baptisms over last year. The only remedy is more entire consecration to the service and power from on high; then we may overcome all the barriers in the way of the North Pacific Coast Association for Christ and soul liberty. In this are included dime novels and cheap serials "recking with iniquity." The reports of criminal proceedings illustrated with indecent pictures and "steaming with vice and vulgarity "after the fashion of the Police Gezette are particularly pernicious in their tendencies. In view of these things the committee recommended that parents and preachers should be more careful to watch the reading of the young and as far as possible put away this objectionable literature. They should endeavor to supply good healthy literature for old and young, and the denominational papers should be placed in the home as far as practicable. Rev. D. D. Decisions Upon Appeals Held Over For Consideration—"To Stand As Assessed."

The Municipal Court of Revision-Mayor Teague (presiding), Ald. Keith-Wilson and Ald. The verdict in the great majority of cases was that the property "stand as assessed," the reductions being an infinitesimally small fraction of one per cent. on tesimally small fraction of one per cent. on the values appealed from. Improvements generatly have been greatly reduced in value this year, and on them there has been practically no complaint; the court has virtually upheld the assessor in all the assessments of the year. WASHINGTON, June 7.—By a vote of 172 to 102 the House has decided not to repeal the law imposing a tax of 10 per cent upon the issues of State banks and other associations. It decided without division to kill the Brawley bill, which proposed to suspend the operation of the law as to certificates and other evidences of money issued by clearing houses and other associations during the currency panic of '93. This latter action is unexpected because in the course of the ten days debate just closed there had been no objection expressed. Just before the vote was taken it was reported on the floor that 30 opponents of the repeal were absent and unpaired. WASHINGTON, June 7.—By a vote of 172

### From THE DAILY COLONEST. June 9. KNIGHTS OF PYTHIAS

Wind Up of the Preceedings of the Grand Lodge-Election of Micers.

List of Committees—Proposal to Es tablish a B. C. Pythyian Home.

Yesterday's session of the Grand Lodge K. of P. continued with the consider several proposed amendments to the consti-tution. These were for the most part of a mature tending to render less obscure a number of minor points, no very vital changes being considered necessary. The election of officers for the ensuing year resulted in the following list: Grand chanceller, J. C. Byrne, of Far West lodge, No. 1; grand vice-chancellor, T. Ackerman, of Royal vice-chanceller, T. Ackerman, of Royal lodge, No. 6; grand prelate, A. A. Richardson of Nanaimo lodge, No. 4; grand master of exchequer, J. B. Kennedy, of Royal lodge, No. 6; grand keeper of records and seals, W. K. Leighton, of Myrtle lodge, No. 9; grand master at arms, Frank Dowling, Vancouver; grand inner guard, J. Haddock, of Damon lodge, No. 8; grand-euter guard, Walter Fitzhenry, of Fraser River lodge, No. 12.

The Grand Lodge proceeded with the consideration of amendments to the constitution of subordinate lodges. At 4 o'clock three Past Chancellors, A. B. Nilee, J. B. Caldwell and E. E. Davies, arrived as delegates from the Grand Lodge of the State of Washington, and were welcomed by the officers and members of the Grand Lodge of British Columbia. During the afternoon the visiting Knights addressed the members of the lodge. They are eloquent speakers, and their speeches were received with considerable applause. Past Chancellor Niles is a resident of Walla Walla, and Past Chancellors Caldwell and Davies are from Waitsburg.

Vancouver Encampment No. 1, I O.O.F., Victoria, has elected the following officers: H. Waller, C.P.; W. Holmes, H.P.; J. Pope, S.W.; and W. Dempster, J.W.

The provincial police have been requested to take charge of the effects of the Island hermit, recently drowned in the neighborhood of Port San Juan. Some of his property is said to be very valuable, and it is hoped to hold it for the relatives of the eccentric man—if any can be found.

The City Council have not as yet decided upon the site for the new electric light works. It is understood that one reason for this is that there is a proposition now before them to take over the electric tramway's plant, something on the lines of the negotiations last year—the price, however, being considerably lower.

THOMAS SIDNEY SMITH was charged in the police court yesterday with an infraction of the revenue by-law of the corporation. Constable Smith making affidavit that the defendant is a non-resident of Victoria and a "drummer" for an outside business house. Smith of the second part says that Smith of the first part, who wears the blue, doesn't known what he is talking about, and here the matter rests until to-day.

Collector of Customs A. R. Milne was yesterday officially notified to the effect that the ninety days' quarantine on cattle entering this port from the United States has been raised temporarily, and that cattle immediately after inspection here can, if fit, be slaughtered. This measure has been taken by the Government in view of the Mainland and Eastern supply of meat being out off by the flood. All the city butchers have been notified of the change.

At the evening session the report of the mileage and per diem committee was read and adopted.

On mo ion of Supreme Representative C. L. Behnsen, seconded by Vice Chancellor Ackerman, the hearty thanks of the visiting members were tendered to Far West lodge No. 1, Sunset lodge No 10 and Victoria lodge No. 1, Sunset lodge No 10 and Victoria lodge No. 17 for the hearty welcome accorded to the Grand Lodge representatives and for the many courtesies extended during their stay in Victoria.

The time of holding the next Grand Lodge meeting was set for the first Tuesday in June next, at 2 o'clook, p.m., the city of Vancouver being selected as the next meeting place.

The committee on Necrology handed in a report which was adopted. It showed six deaths in the jurisdiction, and a fitting tribute was paid to their memories.

The following communication was then read: for Lowenberg, Harris & Co.; Mr. H. Dallas Helmcken for the Receiver.

DOMINION DAY having been looked for-

me. James P. Witherow, of Pittsburg, Pa., who is connected with some of the leading iron industries of the Eastern and Southern States, has been in Victoria and vicinity for the past two weeks, the object of his visit being the examination of the mineral resources of the Island. He has made a ten days' trip to the West Coast and to the coal mines. He is of opinion that the coal of Cemox is eminently adapted and capting of one member from each lodge in the jurisdiction was appointed to establish a Pythian Home.

Grand Lodge then passed a vote of thanks to W. J. Dowling for his services as assistant G. K. of R. and S.

A vote of thanks having been tendered the press of Victoria for their reports of the Grand Lodge, the installation of officers was proceeded with, and the new officers for the coal mines. He is of opinion that the coal of Cemox is eminently adapted for the making of coke. The magnetic iron ore deposits of Barclay Sound were visited. Tests made of these have proved that they are unequalled on the American continent for the production of the finest grades of steel, suitable for the manufacture of steel rails, ship plates, tin plates, billets, and the great iron and steel industries require. The proximity of the ores, coal and other requisites for smelting purposes, makes it persistes for the cheap production of steel and the varieus manufactures thereof will be centered on this coal.

Officers Hutchiason and Hooson, of the provincial police force, late last night captured Michael Flynn, who escaped from the chain gang on Friday. The prisoner was taken in charge by the officers on Mary Todd Island, just opposite Oak Bay, which he had reached by swimming about an hour previous to his arrest. After making his escape from the jail he completely changed his clothing, and subsequently concealed himself in the bush in the suburbs of the city. His intentions were to make his home in a cabin on the island formerly occupied by Jimmy Chickens, but his prospects in this respect were suddenly out short when the two officers located him.

There is great activity in Salvation Army quarters in connection with the extensive programme laid out for commemorating the liftieth year of General Booth's ministry. On Thursday evening a children's jubilee was held, the juniors of the Army taking a prominent part. Very special meetings are being held just now, the series extending over yesterday, to day and to-morpow svening, a floral tribute and jubilee battile of song being to-morrow's features. These meetings are led by Adjutant and Mrs. Archibald and Capt. Massecar, the total proceeds to be devoted to the Salvation citadel to be Oak and Front streets. In the evening, after supper, he went up town, having at the time a \$20 gold piece and some loose silver in his pocket. From then on he can remember nothing. He does not know how he got here, and is still under the impression that he is in Portland. The man is quite young, he says that he is only nineteen, but he looks several years older than that. He is physically healthy and has the appearance of a respectable mehas been sandbagged or shanghaied. In-vestigations are now being made which it is hoped will result in the selving of the mystery. Meantime the young fellow is being kindly cared for here. He is ruddy complexioned, about five feet six in height, has brown hair, hazel eyes, and a broad, rather flat nose. He wears a bluish green check suit, with a faded purple flannel shirt, lace-up boots and black soft felt hat. His Christian name, he says, is William.

The Sportsmen's Association of the Northwest, who held such a successful meeting in this city last year, are to open their annual tournament in Tacoma on Thursday, under the auspices of the Tacoma and Saturday, and as usual nearly all the crack shots on the Coast will be in attendance. A fine list of prizes is offered for the successful competitors, while a very amusing feature is the rewards to be presented by the last men, after the fashion of a booby prize. Among these latter are such novel prizes as a hair cut, bath tickets and a botble of hair tonic. Among the valuable trophies to be contested for are the Multnomah championship gold badge, now held by T. A. Victoria, whose gun clubs did so well hast year, will be represented by a number of crack shots who will no doubt give a good account of themselves.

The soil is the best bottom land, and the locality is one of the few places in the Province where so large a piece of good farm land can be found in one block. A river runs through the property, and rainbow trout are plentiful and afford capital sport. Deer abound in considerable numbers. Bear, Wolf, Coyote and other large game are to be found in the hills. THE MEET AT NORTHFIELD.

Among those who will compete in the bicycle races at Northfield to-day are the following figers, all good men and hard racers: H. M. Hewett and J. Stevens, of the Portland Consolidated Athletic Club; S. C. Perkins and M. C. Browne, of Spokane; E. W. Bradley and E. A. Wolff, of the Victoria Wheelmen; C. Barker, A. B. Clabon, S. Mason, H. Walton, E. B. Deane, C. Milne and A. Coldwell, of the Vancouver Bloycle Club; F. English, W. Gray, A. Mogreyof, G. Fisher, R. Gibson and S. Hagne, of Nansimo; and James and Albert Deeming, J. McKay and H. Leavitt, of Northfield. Bradley goes from Victoria as the representative of the club, and while far from well will do his best to capture some of the events. It is safe to pick James Deeming as a winner in the opens, though Hewett will not doubt make better showing against him than he did here on the occasion of the Queen's Birthday meet; he was then entirely out of training while the Provincial champion had been keeping himself in riding form from last year. Perkins will of course make it extremely lively for all and sundry if he is on hand—it is feared the floods will hold him a prisoner somewhere along the line. If he succeeds in getting through, both Deeming and Hewett will have to look well to their honors and ride as they never rode before, for the Spokane wonder is a fast man on any track, and thinks he can polish off the mile on the Northfield cinders in just a little better than 2:20.

Some four years ago, when six years old, George was attacked by hip disease in his right leg. We had to get him a pair of crutches, with which he was able to move about, but became badly deformed. We had to have his right leg lanced just above the knee. In a few weeks a second sore broke out, both discharging freely. He had no appetite, and it was hard work to make him eat enough to keep him alive. A few weeks later we had his hip lanced, and following this five other cruptions broke out, making eight running sores in all. We did all we could for him, but he grew weaker every day, although we had three of the best physicians. As a last resort we were prevailed upon by relatives who had taken Hood's Sarsaparilla with beneficial results to give the medicine a trial. We got one bottle about the first of March, 1892, and he had taken the medicine only a few days when his appetite began to improve. When he had taken one bottle he could move about a little with his crutches, which he had not been able to use for the preceding three mouths. We continued faithfully with Hood's Sarsaparilla, and in 6 months he was

Air. Ward thought that the board had no right to deal with the matter at all. The work should be done under the supervision of duly qualified experts who could see that it was carried out as it was designed.

Ar. Ellis believed that some action should be taken by the board to at least show their sympathy with what had been done in Westminster and Vancouver. After some further discussion the feelings of the board were shown in the adoption of the following:

The plague that has broken out in Canton and Hong Kong appears to be a most deadly as well as a most painful disease. At first it was said that eighty per cent. of those attacked died, but the disease became milder as time advanced. At a later stage the mortality was twenty-five per cent. The "black death" is evidently a dirt disease. It is supposed to have been caused by the drought with which that part of the world was afflicted a month or two ago. The Chinese parts of both Canton and Hong Kong appear to have been in a horribly filthy condition. HOWLING AT MEETINGS.

The meeting in New Westminster on Tuesday evening was a little too noisy to be pleasant. It is to be regretted that the speakers were rudely interrupted, for outsiders will be apt to conclude that the noisy people were afraid that the gentlemen whom they interrupted would make an impression unfavorable to the Opposition candidate.

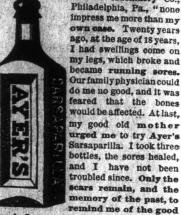

Neither Coleman nor Shroff are members of the society, and it is now settled beyond doubt that Mrs. Besant is his accuser.

the floods, says that though the repairs needed to the railway are very extensive, with the repairs and the long stretches of track which have been washed away, and it will, therefore, be a considerable time before the necessary repairs are completed, still it is hoped by means of transfers to have passengers brought through within a day or two. Mr. Peterson has carefully examined the whole line as he came along and large numbers of men are already at work upon it.

The danger is not it is feared by any means over. There is a large volume of water covering the Sumas and Matqui prairie and its only outlet is by the Fraser river. If hot weather ensues the flood will be augmented by a still greater torrent which the channel of the Fraser will be unable to carry off. If the weather remains cool the water will subside gradually.

As to the cause of the present phenomenal rise. There was an exceptionally heavy snowfall last winter, which on top of the accumulations of several previous years was let loose by several days of unusually hot weather and chinook winds, which melted the vast accumulation of snow high in the mountains and started the water on its career of destruction. The usual "June rise" was expected and would have been enough to contand with, but the people and the railroads were entirely unprepared for findlarge lakes transplanted to their midst.

The steamer Belgic is the next vessel to arrive from Hongkong on the 19th. She left Hongkong when the plague was beginning there, but the trip to Yokohama is eight days, and as that is also the period of incubation given by medical scientists for the "black death," it is very possible that any case of pestilence would have been discovered during that period. However, in view of the dangerous nature of the disease the strictest watch will be kept on all steamers coming to this port from Chins. A conference of members of the board of health is also to be held to consider whether some special precautions should be taken in view of the prevalence of the black plague in the Chinese seaport towns.

"John Kergan was an Irish Canadian by birth, brought up in East Canada, where as a waterman on the lakes and rivers he developed that fearless skill and daring upon the waters for which he was well known. The writer showed him your description of 'the hermit,' as it appeared in your issue of March 24, '93. It drew a smile from him as he remarked, 'So they call me a hermit! Well, if they knew how I hate the drinking, smoking habits, and general conversation of those with whom I have to mix, they would not wonder at my living away from them. It is true I left Trial island because I was constantly being robbed of my small possessions, and tried to stop it by placing a cartridge over the door, intending to catch the intruder, but the man who intended to rob me evidently told the police.

"The writer's first acquaintance with this strange yet gifted man was off Cape Flattery, where, alone in an open boat of his own construction, he was seeking a new abode, 'far from the madding crowd's ignoble strifte'—for above all things he was a man of peace.

Mary Woodson was educated at home,

save for a term or two at an institution of learning for young ladies in Rich-mond, and shared the studies as well as the outdoor amusements of her brothers. She did not care for the usual accomplishments of young ladies and did not learn to play upon any musical instrument, paint or even do needlework of any kind, but was passionately fond of the study of languages, especially of Latin, which enabled her the easier to acquire others.

This habit of study and love for it came in good play when her husband was sent as minister to Brazil by President Cleveland during his first term. She spoke French well and Spanish tolerably, and one might have thought that she would have no difficulty in making herself understood in the country to which she was going, but learning that Portuguese was the language spoken in Brazil she devoted her three weeks' trip to study and had a pretty fair stock of phrases at her command when she landed. In a short time she was able to converse with ease. She greatly enjoyed her stay in Brazil and wrote a very interesting article about the women of that country for a Richmond magazine. This was by no means her first literary effort, for even as a young girl she had written a number of elever stories.

Mrs. Jarvis is of medium height, with brown hair and eyes and fair complexion. She is bright and entertaining and an acquisition to the best society of

An informal meeting of the law students of Viotoria was held yesterday morning, when a committee consisting of A. S. Potts, C. W. Ward and E. Simpkins was appointed to arrange for a suitable floral offering from the students to be placed on the coffin of the late Chief Justice. The students will show their respect for the deceased by attending the funeral in a body.

The St. Andrew's and Caledonian Society met last night and passed the following resolution: That this society expresses its regret at the decease of Sir Matthew Baillie Begbie, chief justice of this Province. By his death British Columbia has not only lost one of its pioneers, but a gentleman actively associated with the history and affairs of this Province up to the present time. actively associated with the history and affairs of this Province up to the present time, a brilliant scholar, a man of marvellous memory, a great lawyer, a close, acute reasoner and a strong, impartial judge, a charitable and sincere Christian—a man who perhaps has done more than any other one in British Columbia in the interests of law and order.

THE FUNERAL ARBANGEMENTS. Many were the friends who yesterday went to the residence of the late Sir Matthew Begbie to take a last look at the Matthew Begbie to take a last look at the face of him who lies awaiting removal to his last resting place. The remains, enclosed in a handsome casket, are lying in state in the drawing room. Little change is to be seen in the well known features of the dead man, who wears even in death the calm, dignified look which distinguished him when alive. To preparations for the public funeral are not yet completed, but arrangements to attend are being made by the different societies, the B.C.B.G.A., the Royal Marine Artillery, the Royal Engineers and the Navy. A regimental order has been issued to the B.C.B.G.A., for an escort from the three headquarter companies to meet at the drill hall at 1:30 p.m. on Thursday, the officers in review order with undress trousers, non-commissioned officers and gunners in church parade order with helmets, side arms and leggings and white gloves.

The choice of an electric light works site will come up before the city council at their next regular meeting, Ald. Munn having given notice that the tenders submitted will be then considered.

It is probable that the prosecution will be dropped in the case of Eugene Barnet, charged with attempting to commit suicide, when the matter is brought to trial in the police court to-morrow. Barnet declares that he had no intention of destroying himself, and fell into the water accidentally while very drunk. The police are inclined to the belief that such was the fact.

In the city police court yesterday morning Frank Porter was fined \$20 and costs for indecency, and John Ferguson, who had been his companion on a drunken spree, contributed \$10 and costs. John Lester, alias Randall, alias Hayward, was convicted of vegrancy and sent out for another term of thirty days at the provincial jail, where he has only recently completed a sentence for larceny.

ARBANGEMENTS for the Arion Club moon ARRANGEMENTS for the Arion Club moon-light excursion up the Arm on Thursday evening, the 21st inst., are in active pro-gress and if the present delightful weather continues it will draw a very large attend-ance. A number of well known gentlemen have kindly promised to take up the collec-tion in aid of the sufferers by the floods, and their canoes will have distinguishing marks so that they can be easily recognized.

LATER information from the scene of Saturday's accident near Kaministiquis is to the effect that all the British Columbia mail (including English) was lost. The ill fated letters include Eastern Canadian dates of June 6 and the mail leaving Liverpool by the Majestic on the 30th ultimo. No mail has reached Victoria from Eastern points since the 3rd instant, but the post office authorities anticipate heavy packages on Saturday evening.

For the first time since the waters of the Fraser began to rise, the C.P.R. were able to announce last evening "the C.P.R. wires are now O.K. right through to all points East." Supt. A VANCOUVER reporter, who also acted as correspondent for the San Francisco Examiner in the Terminal City, was served with a summons yesterday charging him with criminal libel. The action is said to have been instituted by the C.P.R., and to be the outcome of a recent "flood" special, in which it was stated that a Raymond excursion party had lost their lives. The Pokyo Asshi, which is under the same proprietorship as the Kokkai, gives some further particulars of the progress of the negotiations for treaty revision which it declares to be correct. If state that the United States and Germany have almost agreed to the new treaties, while England has been making great efforts to bring about a strilement of the negotiations with all the treaty powers, but has nob yet herself on tirely approved the new treaty.

Among the great powers, France and Russia are still unsettled in their views, but communications are being continually exchanged between them and the Japanese government. Of the two, the French Minister will prove the Asabi cannot say, but judging from his past career he is expected to be a man well disposed towards Japan, his views being different from those of his predecessor. If the negotiations could be astifiated type stilled with France, the rest of the treaty powers, it is expected, would soon follow her example.

THER NANAINO TRAGEDY.

THERE was a quiet wedding at the residence of the bride's mother, Queen's avenue, on Tuesday evening, when in the presence of a number of triends Rev. T. Baldwin united in marriage Mr. W. Fred. Adams and Miss Norah B Craig, eldest daughter of Mrs. S. J. Craig. The bride wore a very pretty white silk dress, and the brides maids, Miss Marjorie Craig and Miss Fraser, were also attired in white. Mr. Samuel Sea performed the duties of best man. A charmingly arranged wedding supper was served after the ceremony, and Mr. and Mrs. Adams, followed by the congratulations and good wishes of their many friends, left on their honeymoon trip by the San Francisco steamer.

THE "British Columbian Fancier" is the name of a new "practical poultry journal," with illustrations, published at Nanaimo, its editor being that well recognized authority, Frank W. Teaque. It is issued under the auspices of the Nanaimo Poultry Society, and will have as contributors some of America's leading fanciers. On the front page of the magazine—it is to appear monthly—are two mottoes, "Poultry for Pleasure" and "Poultry for Profit." The new-comer promises to endeavor to furnish a large amount of well edited matter bearing on both departments, considerable space being devoted to poultry in British Columbia. The B. C. Fancier hopes to occupy a place in developing the poultry industry as a whole and in bringing about a change whereby it will not be necessary to send such large sums of money away each year for poultry and eggs. It is announced that the paper starts on a substantial basis and the initial number indicates a fair amount of advertising support. Judging from the appearance of the magazine and the matter which—it contains the Faucier ought to THE " British Columbian Fancier

commend itself, and it is to be hoped that it will not fall of abundant success, as too much caunot be done to promote what ought to be the great poultry industry of this Province.

An interesting lecture on "Life in the American Church" was given by Rev. W. W. Bolton in Fairall's hall, Victoria West, Tuesday evening. The lecture was unfortunately poorly attended.

There are a number of Victorians who will be interested in two weddings which came off at Port Townsend yesterday, and their hearty good wishes will go with the respective brides and bridegrooms, not only during their honeymoon but through their subsequent life's history. This it is to be hoped will not only be happy and peaceful but in every way successful. Mr. James H. Causten, of the statistical department of the custom house in that city, was married to Miss Minnie Hastings, daughter of Oregon C. Hastings, of Victoria. Dr. Frank Gleason, a resident practitioner, was one of the principals in the other event, the bride being Miss Alma Cryderman, cousinof Frank M. CHARLES WILSON, who has been its guest on previous occasions, was introduced to the city lockup last evening, Provincial Constable McNeill giving him in charge for the theft of a lawn mower. Wilson is said to have borrowed the mower from Mrs. McInnes, for the alleged purpose of cutting the grass on a neighbor's lawn. Instead of doing this he sold the machine for \$1 50 cash.

THE CITY MARKETS.

Trade Conditions Not Very Promising Owing to the Railway Block—Arrivals of Fruit and Vegetables.

Whether from an importer's or exporter's standpoint the condition of the market is not very promising. Traffic with the East is still blockaded as far as the Great Northnot very promising. Traffic with the East is still blockaded as far as the Great Northern and C.P.R. are concerned and is liable to be so for some time. In consequence all the supplies not in stock and required immediately must be obtained from the U.S. coast cities. Three or four large ocean vessels have arrived from foreign ports during the week; but their cargoes, other than in the sugar line, have not affected the market to any great extent. Local merchants have not given any large orders for supplies during the week, most of them getting along as best they can until the freight already on the road arrives here. In view of the early start of the sealing fleet for Behring sea, the next few weeks will doubtless bring a good demand for provisions from wholessle dealers. As will be seen by the appended list a good variety of fruits is appearing on the market. A scarcity of Canadian cheese is reported and eggs have advanced 5 cents. is reported and eggs have advanued 5 cents per dozen.

DIRECTIONS.

It is requested that the following directions be observed by those attending the funeral. The bands, societies, militia and others will assemble on Frankiln and Vancouver streets. Those in carriages will form on Cock street in the order of precedence as laid down in the programme. The procession will move at the sound of the bugle at 2:30 p.m., and will proceed by way of Vancouver, Yates and Douglas streets to St. John's church. Those preceding the hearse will pass the church deor up Fisgard street along Blanchard street until the sound of the bugle announc. a that the remains have reached the church and will remain at ease while the service in the church is being held. At the sound of the bugle the procession will again move on: proceeding by way of Blanchard. Burdette avenue, Bellot and Cook streets, and Fairfield road to the cemetery. On the arrival of the head of the procession at the vault, all those preceding the hearse will stop and open rank, and allow the hearse and mourners to pass through, standing at ease until the final rites are concluded

The funeral sermon at St. John's will be preached by Rev. Percival Jenns, and Mr. George Pauline will preside at the organ.

The city council meet at the city hall and will leave there at 2 o'clock sharp in carriages to join the funeral procession. The members of the bar meet this morning at half past ten in the court house to complete their arrangements for attending the funeral. The city police will turn out eighteen men in full uniform, and the permanent firemen will also march in the procession. During the funeral proceedings the bells of the fire halls will be tolled.

The escort furnished by the B C.B.G.A. will be in command of Capt. Smallfield, with Lieut Ross Monro and Lieut. Pearse, and detachments from the R M.A. and Royal Engineers will also participate. The bands of the Royal Arthur and B. C. B. G. A. will also be in attendance, while the society will a

the various societies of the city will turn out in force.

The following notice has been sent to the members of the Board of Trade;

I am directed by the council to ask members of the British Columbia Board of Trade to meet at the residence, 25 Franklin street, at 2:30 o'clock, p.m. (to morrow), Thursday, June 14, for the purpose of attending the funeral of the late Sir Matthew Baillie Begbie, Knight, chief justice of British Columbia.

F. ELWORMER

F. ELWORTHY,

Not alone in Victoria but all over the Province deep regret is felt at the death of the Chief Justice, and here as well as in other cities flags are flying at half mast on public and many private buildings.

The modest estimate Sir Matthew Begbie placed upon his own life is illustrated by these characteristic words he once uttered:

"Man's life," he said, "is of much less importance, and not to be compared in Secretary.

man's life," he said, "is of much less importance, and not to be compared in value to the cargo of even an insignificant craft lost at sea. My life," continued he, "is valuable to myself alone; snuffed out, its loss in the haunts and paths of life is easily filled. The cargo of a vessel, on the contrary, is a real loss of the productions of the earth—impossible to be replaced."

Blaced."

His was a life, however, not "valuable to himself alone," as the genuine sorrow at his death too plainly shows how real his loss is to the whole Province.

The Vancouver Bar Association held their annual meeting in the court house on Tuesday afternoon, but out of respect to the late Chief Justice no business was transacted beyond the passage of the two following motions:

Moved by Mr. Wilson, seconded by Mr. McPhillips, that the business to be conducted at this meeting of the association be, owing to the death of the Chief Justice, and out of respect to his memory, postponed until Monday next, the 18th inst., at the same hour, and that no business be transacted other than to give effect to the profound regret of the Bar at the loss the judiciary and the Province has sustained. Carried.

Moved by Mr. Armstrong and seconded by Mr. Spencer, that the chairman, Mr. John Campbell, and Mesers. McPhillips, Wilson, Davis, Harris and Russell be a Wilson, Davis, Harris and Russell be a Wilson.

The Pioneer Society of Vancouver decided to send Mr. D. Oppenheimer to Victoria to represent them at the funeral.

According to the schooner's Indian crew who arrived from Ounslaska on the steamer Barbara Boscowitz, there is no truth in the report that the steam schooner Shelby has been seized. The Indians state that the schooner has a very small catch, and that last month she went to Ounslaska for fresh supplies, intending to remain there until the Bebring sea scaling season commences. The Indians did not care about staying with the vessel until then and accordingly oame home.

TWO BOATS' CREWS LOST.

The schooner Louis Olsen put into Hakodate, May 10, having 608 skins on board. She had had her rudder head carried away and reported losing two boats with their orews. Two of the men belonging to the Henry Dennis have joined the Olsen. The Aurora is also reported in Hakodate, endeavoring to effect the dischargelof her mate and cook. A letter dated May 28, which R P.
