

BUY AT HOME==

A great war has always been followed by a period of business depression which seems more acute than an ordinary depression as it comes after the war period of intense activity. It was expected this change would be more marked than that following any previous war on account of it involving many more countries and many more people.

With past experience before it the Canadian Reconstruction Association immediately at the close of the war started a "Buy at Home" campaign. The purpose of this was to stop the stream of money sent out of the country to buy imported goods and to turn it back to keep the factories here working and the men employed. The events of the past two years prove that this was to be no exception and while this slowing up in business did not come as soon as was expected and was not apparent until a year or more after it was thought to be due, it finally came in full force in the fall and winter of 1920 and has continued to the present. The Reconstruction Association has made a complete analysis of the amount of money spent by various countries on imported goods. These statistics, when gathered together and compiled, brought out the fact that this country imported more goods in comparison to its population than any other country in the world and indeed almost twice as much as any other country. These figures also show that nearly eighty per cent. of all the goods imported came from the United States and that they amounted in a year to over \$800,000,000 or over \$2,000,000 a day. A further analysis of the actual imports showed that of the imported goods large numbers of similar goods were made in Canada and probably the buyer need not have imported them if he had wanted to buy at home.

It is no doubt true that many things are imported which cannot be bought from home manufacturers at as good advantage. There are frequently local conditions that make it impossible to compete with goods manufactured in large quantities under more favorable conditions. Other goods are imported because not being made here at all due in some cases to the demand for them not being enough to justify a Canadian plant for their production.

It frequently happens, however, that none of these conditions happen but there is a certain spite in the word "imported" both for the buyer and seller and a sale is made of foreign goods. At the same time just as good a purchase could be made as to quality and price on a home made article if either the buyer asked for it or if the seller offered it. This is the purpose of the "Buy at Home" campaign.

Not only here have past war conditions so adversely affected industry but in all other countries unemployment is more serious and most of them have adopted measures to protect their own working men and to keep out imported goods as far as possible. This has been done by the raising of import duties and other measures to encourage the use of home made goods and to keep out imported goods. This has had the effect of shutting off the market to manufacturers in different countries and this has especially affected the farmers and stock raisers in Canada who have been practically shut out of the market of the United States. While it is true that Canada buys a large quantity of goods in the United States, it on the other hand exports a large quantity more especially farm products into the United States. However, by the tariff, passed something like a year ago, the shipment of Canadian farm products has been practically shut out of the United States market. A tariff of about 70c. a barrel has prevented the shipment of large quantities of potatoes by the New Brunswick farmers to Boston, New York, and other points, which were formerly almost the best market for these potatoes. A duty of from 15c. to 30c. a lb. on wool has reduced the exports of wool to the U. S., 95 per cent. during a six months period, and the past week a bill proposing a duty of 15 per cent. on hides has been reported in the U. S. Senate which, if adopted, will close entirely the U. S. market for hides which now consumes a great quantity of the Canadian production.

With so large a part of the foreign market shut out the "Buy at Home" campaign becomes more important and it is only by supporting those who do business here that there will be a further market for farm products as well as manufactured goods.

In our previous advertisements we have called the attention to the fact that whatever reasons there may be for buying imported goods of various kinds none of these apply to fertilizer. Our prices compare favorably with the prices on imported goods. All the "Made at Windsor, N. S." brands are made of the best raw materials, properly mixed, dry and in good drilling condition and have given for ten years as good a yield of crops in all sections of the Maritime Provinces as any other imported fertilizer made.

We have agents in most sections and we are glad to quote prices and terms to anyone who uses fertilizer and would like to act as agent in any unoccupied territory.

FALKLAND RIDGE

Rita Marshall spent the week-end at her parent's home.

Mrs. M. L. Roope, of Kentville, spent the week-end, guest at the home of the Roop Bros. and Miss Annis Saunders and mother.

Mrs. Harold Mason, and little Gertrude, left on Monday and are guests at the home of Mrs. Elton Saunders, at East Dalhousie.

Edwin Wile and daughter, Nellie, left on Thursday for Halifax, where Nellie is to enter the Victoria General

Hospital for an operation for appendicitis.

Mrs. Fay Hill was successfully operated on for appendicitis on Tuesday, March 21st, at the home of her brother, Edgar Mason, by Dr. Kenny, assisted by Drs. Sponagle and Lindsay. She is being carefully nursed by her sister-in-law, Mrs. Edgar Mason. She is making rapid progress towards recovery.

Many a fine-looking path has tracks in it that were made by the cloven hoof.

SIR JOHN EATON SUCCEUMS IN GALLANT FIGHT

Toronto Merchant Prince Takes Relapse After Six Weeks' Illness.

Sir John C. Eaton is dead. After a gallant and remarkable fight with the grim-reaper, over a period of six weeks, which last week seemed to have brought victory to the patient, the end came at 9:40 Friday night. The fatal relapse was reported Thursday. Lady Eaton, wife of Sir John, Mrs. Timothy Eaton, mother of the patient, and widow of the founder of the immense department store interests of which Sir John was president; Timothy Eaton, the eighteen-year-old son, who arrived from England only last week, together with other relatives and officials of the Eaton interests were near at hand when death ensued.

Sir John took a chill in February, while on a business trip to Montreal and New York. This developed into influenza, followed by complications.

PARADISE

Mrs. Joseph Longley is visiting friends in Wolfville.

Miss Leola Banks is visiting her brother at Morristown.

Mr. Ralph Balcom made a business trip to Lunenburg last week.

Mrs. A. C. Freeman and little daughter, recently visited friends in Clarence.

Mr. E. L. Balcom made a business trip to St. John last week, to purchase machinery.

Mrs. H. W. Longley spent the week-end with her mother, Mrs. Calnek, Upper Grandville.

Mr. G. D. Covert has sold his farm on the Balcom Road to Mr. A. Jakes, of New Bedford, Cape Breton.

The "Chewela" Camp Fire Girls hiked to West Paradise on Sunday last and attended service there by their pastor, Rev. W. S. Smith.

The Paradise Literary Society held their fortnightly meeting at the home of Mr. and Mrs. H. D. Starratt on Monday evening. Following is the program:

History of Ireland—Rev. Mr. Robinson

Selection—Paradise Male Quartette

Reading—Miss Evelyn Longley.

Reading—"A young American girl travelling in Ireland in war time," Miss Leone Banks.

Chorus—"Tipperary"

Solo—Miss Marion Bishop

Reading—"Miss Maloney on the Chinese Question" (Irish dialect) Mrs. E. G. Morse.

Dialogue—"The Cremation of Sam McGee" Miss Mabel Elliott

Selection by the Quartette

Reading—Ralph Kempton.

Duet—Miss Marion Bishop, Miss Bessie Durling.

Paper—A few notes on the music of Ireland and a sketch of the life of St. Patrick—Mrs. H. D. Starratt

Contest—"Characteristics of Pat"

A GOOD MEDICINE FOR THE SPRINGTIME

Don't Use Hard Purgatives. A Tonic is All You Need

Do not sick—but not feeling quite well. That is the way most people feel in the spring. Easily tired, appetite fickle, sometimes headaches and a feeling of depression. Pimples or eruptions may appear on the skin, or there may be twinges of rheumatism or neuralgia. Any of these indicate that the blood is out of order—that the indoor life of winter has left its mark upon you and may easily develop into more serious trouble.

Do not dose yourself with purgatives, as so many people do, in the hope that you can put your blood right. Purgatives gallop through the system and weaken instead of giving strength. Any doctor will tell you this is true. What you need in the spring is a tonic that will enrich the blood and build up the nerves. Dr. Williams' Pink Pills do this speedily, safely and surely. Every dose of this medicine helps to enrich the blood, which clears the skin, strengthens the appetite and makes tired, depressed men, women and children bright, active and strong. Miss S. L. McEchren, Nairn P. O., N. B., says: "I have been in the habit of taking Dr. Williams' Pink Pills in the spring and they keep me in the best of health. I think it is entirely due to the use of these pills that I always have such good health."

Sold by all medicine dealers, or by mail, at 50 cents a box, or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

GROW NUT-BEARING TREES

The advice to plant nut-bearing trees for shade and ornament in the older settled section of Canada is good, but, as most of it comes from other countries where the conditions are different, it must be taken with discretion. One very useful point in a recent article was to the effect that walnuts may be grown wherever peaches thrive. It is true that walnut trees have been grown where peaches are not generally cultivated, but as a rule the walnut will not attain its best development where it is too cold to grow peaches.

The schooner Cupola, Capt. Peter LeBlanc, arrived at Halifax Saturday afternoon from Yarmouth for bait. She is bound halibut fishing and carries eight dories.

MAY NOT DISCUSS QUESTION OF UNION

It is said that no definite action may be taken this year to unite the Methodist, Presbyterian and Congregational Churches, as the Presbyterian special committee on property rights may not be able to report in time for the general assembly to deal with the matter at its next annual session. If the committee which is looking into the question of property rights is unable to report to the General Assembly this summer, the Methodist General Conference cannot go any further in the matter of union at its September gathering.

YOUR CUP OF TEA

Your cup of Tea means much to you. It is more than an item in the daily fare. It is the one thing that "rounds off"—or spoils—an enjoyable repast.

Tea is fortunately so cheap in this country that there are few who cannot afford Choice Tea. The cost per pound is only slightly higher than ordinary Tea, while the increased pleasure you get from every cup you make is worth many times the difference. It is true also, that a FLAVOR-FULL Tea like KING COLE Orange Pekoe will actually spend further—that is, make more cups to the pound. KING COLE Orange Pekoe is prepared particularly for lovers of Choice Tea.

INSTRUCTIVE LECTURE ON CANADA'S NATURAL RESOURCES

Large Crowd Hear Dean McKeil in United Baptist Church Hall Last Tuesday Evening

Dean McKeil, of the School of Engineering Faculty, Mount Allison University, delivered the third of a series of lectures in the United Baptist Church last Tuesday evening to a large and interested audience. Rev. J. H. Freestone introduced the speaker of the evening in a few well chosen words, and said he was proud to have the opportunity of listening to such instructive and educational lectures, and felt sure that the speaker for the evening would uphold the great impression which the previous speakers had left behind.

In opening his remarks, Dean McKeil said that Canada, at present, was overwhelmed with a tremendous debt, and the natural resources would be the means of paying this off. Canada's undeveloped resources were still the means of luring people from Europe. He had been a visitor to Bridgetown before, and was always interested in its problems, and was glad to say that he had kept in touch with local happenings by being a constant reader of that widely read journal, THE MONITOR.

Our agricultural resources were, of course, primarily of first importance, and three times as great as the developed mineral wealth of Canada. In several provinces the governments were still offering free land to homesteaders, and in Nova Scotia land could be purchased for \$25.00 an acre. Great possibilities could be found in this province, and the speaker submitted facts and figures to prove his argument. All kinds of agricultural products can be produced in Canada, and the possibilities were unlimited. All grindstone produced in Canada came from Nova Scotia, and samples of the product was shown to the audience, as well as samples of all mineral resources of this fair Dominion.

In discussing the coal question, Mr. McKeil claimed that Alberta had about 15% of the world's supply, and at the present rate of production enough to last several hundred years. Canada held the supremacy in the

production of nickel, but she may lose this in years to come, as lately it was noticed that China had discovered a great nickel deposit on her land, although it may be some years before it reaches the development stage. The speaker claimed that Canada held the greatest mineral wealth in the world to-day.

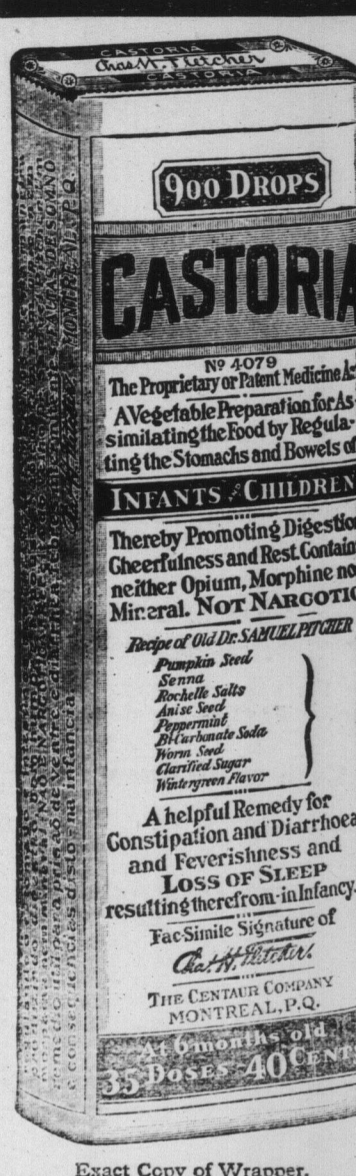

Oil shale could not be counted as an actual resource to-day, as firms who had gone into the proposition were forced to abandon the field. Alberta would yet prove to be a great oil producing country, and lately the Imperial Oil Company had taken an interest in that part of Canada and were spending a large sum of money to develop this enterprise.

In dealing with water power and waterways of this Dominion, a question which is a live topic to-day, Dean McKeil said that some people were under the impression that a high fall was needed for water power, which is erroneous. In Annapolis and Digby Counties enough water power can be found to develop 57,000 horse power. Rates were given to show that hydro-electric was far cheaper than electricity. It takes between seven and eight tons of coal to develop one horse power, which proves that water power can be developed cheaper. If coal were used in the supply of all power in Canada to-day it would mean a total consumption of three hundred and twelve million tons a year, two thousand times as great as the present production.

The traffic through the Soo canal was three times as great as that which passed through the great Panama last year.

At the conclusion of his address, Dean McKeil was asked several questions to which he replied satisfactorily. A hearty vote of thanks was moved and seconded and tendered unanimously to the speaker for the interesting and instructive manner in which he dealt with his subject.

The meeting closed by the singing of the National Anthem.

THE PLEASURES OF PRESS DAY

It happened on a press day, When all through the busy shop, Everyone was in a hurry, And the Editor was on the hop.

There were still two forms to "make-up" With but two hours to spare, When the sad accident happened That set things in a tear.

The "devil" was setting type, As if he were run on steam, And the foreman was threatening him With a clout upon the "bean".

The foreman foamed and raved, And then he cursed and swore, When the "devil" accidentally dropped The type upon the floor.

He zimed at the poor "devil" Some very hefty blows, But somehow or another He hit the Editor's nose.

The Editor swung at the foreman, A mighty well-meant crack; Unfortunately his fist landed Into the "dead type" rack.

The sad Editor stood astounded When he saw that by his rage, His blow had completely "pied" A full sized "six point" page.

The cause of all the mischief, Was having a mournful time, Trying to pick up the type To help erase his crime.

The foreman's graceful foot, Took a very sudden leap, And a number eleven boot Connected with the "devil's" seat.

The "devil" jumped up enraged, And quickly whirled about, And his "clean" flying fist Caught the foreman on the snout.

The Editor got then perted, And back to work again, But how he ever accomplished it, He never could explain.

Within the space of an hour The engine commenced to bang, And the press got into motion With a rattle, shiver and clang.

There is sure to be an accident When the Editor gets on the hop; And the foreman hustles the "devil" In the old printing shop.

L. G. C.

AN EDITOR'S RESOLUTION

"Here is my 1922 resolution," a certain western newspaper Editor exploded recently. "I am going to publish in this column all the society gossip, all the town scandal, tell about who is suspected of having hooted in their basements, lambast the loafers and good-for-nothings, tell every inside story I hear, publish all the barber shop gossip I hear, bowl the hypocrites out every time I hear of them putting their religion behind them to make a dollar, tell where the neighbors' chickens scratch out the other fellow's gardens, kick like thunder every time the electric lights "wink", howl like the dickens every time I have to ring more than once to get central and tell all the secrets the city marshal knows."

A COAL SEAM

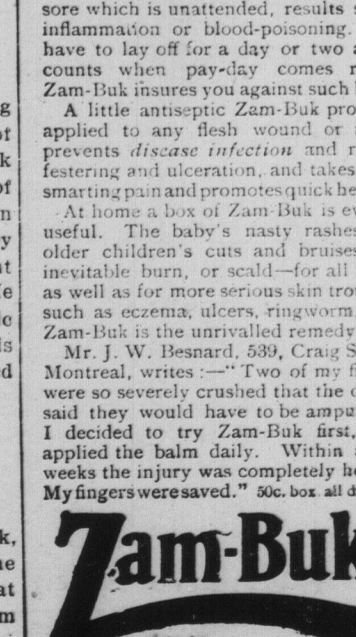

Is reported on the property of Mr. Bremner at Falmouth, Hants County. Several bags of the coal have been taken and tested and the article is said to be first class. During next month Mr. Miller, of Annapolis County, a mining engineer, will visit Falmouth and carry out a thorough investigation.

Frederick Blanchard, fifty-six years of age, one of the best known fishermen of Swampscott, Mass., and prominently identified in politics, dropped dead last week while fishing in his power boat, eight miles from the shore.

Quickest for Healing

A cut sustained in the workshop, sore which is unattended, results say in inflammation or blood-poisoning. You have to lay off for a day or two and it counts when pay-day comes round. Zam-Buk insures you against such loss! A little antiseptic Zam-Buk promptly applied to any flesh wound or injury prevents disease infection and risk of festering and ulceration, and takes away smarting pain and promotes quick healing. At home a box of Zam-Buk is ever so useful. The baby's nasty rashes, the older children's cuts and bruises, the inevitable burn, or scald—for all these, as well as for more serious skin troubles, such as eczema, ulcers, ringworm, etc., Zam-Buk is the unrivalled remedy. Mr. J. W. Besnard, 539, Craig St. E., Montreal, writes:—"Two of my fingers were so severely crushed that the doctor said they would have to be amputated. I decided to try Zam-Buk first, and applied the balm daily. Within a few weeks the injury was completely healed. My fingers were saved." See box at station.

QUESTIONS AND ANSWERS ON FORESTRY

A. The Ontario government will welcome your co-operation. Write to the Provincial Forester, Toronto, for full particulars of the new provincial plan. The government is willing to supply the tree stock and do the planting if the county will supply the waste land. At the maturity of the trees, the county gets the whole of the timber crop without deduction.

NO MUSIC

A business man, Rotarian, and mayor of a small southern city, arriving late to luncheon, was informed by the toastmaster that he would be required to sing a solo as a penalty for being late. The business man promptly replied that he couldn't sing without his notes, and everyone in town had them.

HE WAS EXCUSED.

The business man promptly replied that he couldn't sing without his notes, and everyone in town had them.

TORTURED BY KIDNEY TROUBLE

Quickly Relieved By Short Treatment With "FRUIT-A-TIVES"

MADAM LALONDE
170 CHAMPLAIN ST., MONTREAL, P.Q.

"I am writing to tell you that I owe my life to 'Fruit-a-tives'. This fruit medicine relieved me when I had given up all hope of recovering my health.

"I suffered terribly from Kidney Trouble, Dyspepsia and Weakness. I had these troubles for years and all the medicine I took did not do me any good.

"I read about 'Fruit-a-tives' and I tried them. After I had taken a few boxes, I was entirely relieved of the Kidney Trouble, and Dyspepsia, and had gained in strength.

"I hope those who suffer with Kidney Trouble, Dyspepsia and Weakness will take 'Fruit-a-tives' to recover their health."

WANTED

WANTED TO BUY—If you would like to turn into cash that something you don't need, try a For Sale or Want Ad. The cost is trifling. You are reading this ad, others will read yours.

Q. One forest fire in our district last year destroyed 56,000 cords of spruce. Is there any way of estimating what this quantity would cost to reproduce by planting small trees and waiting until they mature?

A. A very interesting calculation. It works out at about \$8,000 for the young seedlings and cost of planting them. But you would have to compound the interest for fifty years at least, plus cost of protection and administration compound for a like period. The original eight thousand dollars would multiply many times before the plantation would reproduce the original 56,000 cords.

Q. I plan to plant a few hundred spruce trees in our local park next spring. Are there any precautions I should take?

A. You had better secure nursery-grown stock and save disappointment. Arrange for planting immediately after arrival of trees. Keep the roots thoroughly covered and moist. Make planting holes amply large and plant the trees slightly deeper than they were in the nursery. Avoid destroying the fine hair roots during the planting process.

Q. As an Ontario farmer I would appreciate information as to how to go about planting pine trees on a large stretch of sand dunes. With the right information I believe I can persuade our county council to tackle the job.
