NO. 6

COUNCIL HOLD SPECIAL MEETING

Determined to Enforce Canada Temperance Act—“Hop Beer” Sales to Be Investigated—Inspector Warned to Be Vigilant.

A special meeting of the Town Council was held on Friday night for the purpose of taking action on the Temperance situation. The hotel-keepers are believed to be keeping good faith in their agreement with the Temperance authorities to refrain from the sale of liquors, but it is a self-evident fact that some liquid is being sold that produces intoxication, and the sentiment of the community favors the enforcement of the Canada Temperance Act.

Upon discussion in Council the following resolution was passed:—

“Whereas complaints have been made to the Temperance Committee of the Council by citizens of the Town that the Scott Act is not being strictly and effectively enforced in the town by the Inspector, and that intoxicating liquors are being unlawfully sold in the Town, and that people are seen drunk on the public streets;

“Therefore resolved that the Committee at once interview Mr. Messenger, the Inspector, and instruct him that he must enforce the Law and prosecute all persons violating the same, whether they be hotel-keepers, salaried persons, or persons unlawfully selling intoxicating liquor in the Town.”

“And that the Inspector be instructed to make a thorough investigation of the

sale of what is commonly called ‘Hop Beer,’ and which is sold in large quantities in the Town, and believed to be intoxicating.”

“Further resolved that if the Inspector does not attend to his duties in this respect, another Inspector be appointed as the Committee are determined to enforce the Act in the Town.”

Among other matters which came up for discussion was the matter of celebrating Coronation Day. The Committee, Town Clerk Ruggles and Councillor Anderson, appointed to arrange a program, reported verbally that, acting on a suggestion made to them by Rev. E. Underwood, they would advise the erection of a flag-staff and flag on the school-grounds, the dedication to be in connection with a school children's parade with attendant features. It was agreed that services in the Church of England in the morning should be attended by the Council in a body.

The matter of the organization of Boy Scouts for the boys of the town was also brought before the Council and they have agreed to give the movement unanimous support and to loan the Council-chamber for the public meeting.

A number of bills were passed by the Council before adjournment.

Tragic Tale of Heroic Endurance

Inspector Fitzgerald's Diary for Ten Days Preceding His Terrible Death.

Ottawa, May 16—The annals of the Royal Northwest Mounted Police contain no more tragic tale of heroic endurance, culminating in a slow and terrible death, than that disclosed in the story of the tragedy of the finding of the frozen bodies of Inspector Fitzgerald and three other members of the force, by Corporal Dempster of Dawson last February, whose detailed report was received today by Comptroller White.

LEFT ALL TO MOTHER.

The most pathetic part of the story is that telling of the finding of the diary of Inspector Fitzgerald for the ten days preceding his slowly and grimly approaching death.

A will of twenty-two words was found on his body. It was written on a torn piece of paper with a burnt twig. It left all his effects to his mother, and concluded with the words, “God bless all.” His diary for ten days preceding his death gave the tragic details of the ending of their endurance.

Rev. G. G. Tobin Weds Miss Dudley

Fashionable Wedding At Windsor last Week—Church Thronged For Occasion.

Windsor, May 16—There was a large assemblage at Christ church this morning to witness the marriage of Miss Muriel Bradley Dudley, B.A., eldest daughter of Mr. and Mrs. Geo. Dudley, of Windsor to Rev. George Edgar Tobin, B.A., Rector of Jemseg, N.B. The Rev. G.R. Martell and Rev. Canon Vroom were the officiating clergymen.

As the bride entered the sanctuary, leaning on the arm of her father, the choir sang: “Lead us, heavenly Father, lead us.” Rev. Dr. Willets, organist of the Church, presiding at the organ with his accustomed proficiency, and as the register was being signed, hymn 76 was sung. “We lift our hearts, O Father,” these hymns being selected by the bride for the happy occasion. The chancel and altar showed very pretty decorations, the work of the bride's many girl friends.

The ushers were Messrs. C.H. Boulden and Noel Wilcox, who at the recent Elocution received the degree of B.A. and were classmates of the bride.

Among the relatives present were: Miss Dudley, Niagara Falls, Ont.; Mr. and Mrs. C.G. Ross, Newmarket, Ont.; Rev. Canon Sprague, Coburg, Ont.; Mrs. Edward Hilyard and Miss Tobin, St. John, N.B. There were also others present from outside points, Mrs. N.C. Owen and daughter Miss Geraldine Owen, Bridgewater, N.S. and Mrs. Cyrrina Godard and daughter, Miss Laura Godard, Wolfville.

The bride was handsomely gowned in white messaline satin and train and trimmed with point lace yoke. Her exquisite bridal veil was caught up with a miniature brooch, an heirloom, the same as worn by her mother on her bridal day.

The winsome bridesmaids were the bride's little twin sisters, Constance and Eileen, who were prettily costumed in dresses of rose silk, embroidered sashes of the same color, with long white silk gloves, white shoes and stockings, and dainty hats of white mohair braid, trimmed with white satin rosettes, and carried in their arms white carnations and maiden hair fern. Presenting a very sweet picture of beauty and innocence they accompanied their sister bride.

The groom was unattended. There was a profusion of wedding presents, that of the groom to his charming bride being a beautiful gold bracelet set with pearls and amethysts.

The bridesmaids and ushers were also the recipients of tokens of the groom's good will.

At the close of the ceremony a wedding luncheon was served at the home of the bride's parents, Albert St., which was participated in by the guests above named, there also being present Rev. G. R. and Mrs. Martell, Rev. Canon and Mrs. Vroom, Rev. Dr. and Mrs. Willets, and the ushers. The dining room showed decorations in daffodil blooms and after a pleasant hour or two Mr. and Mrs. Tobin left in a team to drive to Bridgewater, where they will visit Rev. and Mrs. Gelling, grandparents of the bride, followed by the best wishes of very many friends and acquaintances. They expect to reach home early in June.

The bride's travelling costume was of French broadcloth, raisin shade, her hat being of biscuit color with lace and flowers to correspond with her suit.

The bride is a granddaughter of the late Walter Dudley of Newmarket Ont., and it will be of interest to Halifax people, to know that she is a great granddaughter of the late Rev. James Bradley, at one time a clergyman of that city, who was educated in England and afterwards studied for Holy Orders at King's College. Last week Mrs. Tobin received her degree of B.A. from King's University. The groom, who has many warm friends in Windsor, received his degree of B.A. in 1908, and is much esteemed in his present parish.

G. N. R. in Link with I. C. R.

Traffic Arrangement Which Will Give Canada a Third Transcontinental Line—Vancouver and St. John, Joined by 1915.

Ottawa, May 22—No later than the summer of 1915 the Canadian Northern transcontinental railway will be completed and in operation between Vancouver and St. John, according to Sir Donald Mann.

This will be the third great Canadian transcontinental. Construction work is now being carried on the Pacific coast to Port Mann on the Fraser opposite New Westminster and the only link that remains is the building of the new line from Hawkesbury through Ottawa to Port Arthur, and with traffic arrangements with the government for rights over the I. C. R. to maritime province ports there will be a continuous and direct service, and, according to Sir Donald Mann, it is the object of the company to make this service the most luxurious in Canada. The best cars, that money can buy will be put on, he says.

“When do you expect to have additional steamers on the Atlantic?” Sir Donald was asked.

“That is a question for the future, but you can bet that when we get our line completed we will have the new ships waiting at St. John and Halifax for the trade which we are going to get.”

Asked as to the traffic arrangements, Sir Donald said, they were that the Canadian Northern was to hand over its traffic to the Intercolonial at Montreal. For the present it would be carried over the Grand Trunk tracks to Atlantic and Pacific ports.

The linking up of the Intercolonial Railway with the Canadian Northern in the formation of a third great transcontinental railway from tide-water on the Atlantic to tide-water on the Pacific is probably the most important since the declaration of policy which led to the launching of the Grand Trunk Pacific and the Transcontinental. Its effect will be to secure to the Intercolonial the through trade of a great and growing Canadian system which, having been given the guarantee of its bonds by the uncompleted portion of its lines between Montreal and Port Arthur will guarantee in return to construct terminals at Montreal which shall give the Intercolonial direct connection with the west and the Canadian Northern direct and through connection with the east.

Canada Grows New Town Every Day

Montreal, May 18—By the end of the coming summer there will be at least one hundred and seventy new towns in Canada, not counting those which come into existence gradually and in the natural course of evolution from clusters of houses, into hamlets and then into towns. The one hundred and seventy will all be in the West—the great, the glorious West—Not for them the hum drum processes of conventional development; they will spring, full-panoplied, into being, with hotels, court houses, jails and all the modern improvements, on paper, and a small railroad station, a mile or so of siding and unbounded hope and confidence in the future as actual assets. The Canadian Pacific will be responsible for fifty of them, the Grand Trunk Pacific for twenty-four, and the Canadian Northern for ninety-six. It is a fair supposition that all of them will live because of the fostering care of their railroad and that most of them will prosper because the time has come for towns to succeed farms at selected locations on the prairies, and the railroads are in a better position to do the selecting than any other instrumentality except land companies. Nor will these railroad towns be the only communities to come into being in the West in the next three or four months, but from their number it is possible to draw some kind of an impression of the method and the speed of western development.

Booming Nova Scotia In Great Britain

Immigration Advertising Expert Writes of the Splendid Opportunities in This Province.

A gentleman who is largely interested in carrying out an extensive immigration advertising policy in England was met recently at the Immigration Shed by A.S. Barnstead, Secretary Industries and Immigration and was induced to remain in the Province to study its possibilities. In the course of a letter to Mr. Barnstead, from Montreal he writes his opinion and appreciation as follows:—

“I was very much impressed with Halifax, Kentville and all along the beautiful Annapolis valley and I honestly believe—and intend to convey that impression in my articles on Nova Scotia—that the possibilities are simply enormous. In fact, I am convinced that any young man with adaptability could do well and should he have sufficient means to buy some land and work it he could make lots on money. I have so far not come across a better place, both for climatic conditions, good fertile land, and so near great harbors, and I hope you will in the near future create a substantial advertising fund to boost the enormous possibilities of Nova Scotia in the United Kingdom, and the result will be very beneficial to you and Nova Scotia generally. I am sure there are thousands of good men in England, Scotland and Ireland who are only too anxious to go anywhere where there is an opportunity. Unfortunately, Nova Scotia is not sufficiently heard of in England, and the immigrants go West.

“I must thank you also for your kind suggestions as to your advertising agents in England; we will carry your esteemed instructions out with the promptness and thoroughness characteristic of the services rendered by my firm. If there is anything whatsoever you would like us to do for you in England, please do not hesitate to let us know, and nothing will be wanting on our part to adequately meet your wishes in every respect.”

Big Industries to Be Built in Canada

Three American Plants Will be Provided at C. N. R. Pacific Terminus.

Chicago, Ill., May 15—According to information on the authority of A.P. Gillies, the British Columbia Steel Company, a \$10,000,000 corporation, will establish steel rail plants at Port Mann, the Canadian Northern's Pacific terminus, and at Tacoma. The company has acquired an interest in the townsite of Port Mann, and has agreed to erect at least one thousand dwellings to cost not less than \$2,000 each. It is estimated that the industrial population will be five or six thousand workmen as soon as that and other related plants are completed. It is expected Port Mann will rival Gary in sudden and remarkable growth. It is stated that the company will have an advantage in freight rates over Pittsburgh competitors of \$16 to \$22 per ton, with an enormous supply of raw materials at hand. Charles M. Schwab and Charles P. Taft are among the Americans interested in the enterprise.

Arrangements have been completed, it is stated, with the American Car and Foundry Company to establish a plant at Port Mann with an initial pay roll of 2,000 men. The plant will turn out steel freight, passenger and sleeping-cars using the available ores at hand. The Pittsburgh Plate Glass Company also will establish a plant there, having found silica of the best quality in the adjacent district. The gas from the coke ovens and blast furnaces of the steel mills is to be utilized in furnishing fuel for the glass plant.

Messrs. MacKenzie, Mann & Co have expressed their willingness to give the British Columbia Steel Company a contract for from eighty to one hundred thousand tons of rails for branch lines through the prairie district as soon as the plant begins operations.

A TEN-ACRE VALLEY FARM

Why Invest Money in Western Lands When Ten Acres Here Properly Cultivated Will Turn Out Seventeen Per Cent Interest?

About thirty years ago Mr. G. C. Miller, of Middleton, moved on to the premises he now occupies. It consisted of ten acres of ordinary land, nine acres of it under hay and the other acre under cultivation with apple trees just set. He determined to devote all the land available (which turned out to be eight acres) to strawberries, raspberries, currants, gooseberries, and plums. Much interest centred in this little farm during the next ten years. During this time it became practically the experimental farm of Western Nova Scotia. People came from every section of the country to see the immense crops grown on fertilizer alone. The annual output from these 8 acres was never less than \$1,500 and one year it went as high as \$1,800. Four acres of the eight are under apples and from this in one year the net returns

were \$697.74, after paying all costs, which is but a fraction short of \$175 net per acre, or 17½% for the owner at a valuation of \$1,000 per acre. As Mr. Miller says, “this seems better than bank stock yielding 4½% or even gold mines in the West, which promise wealth quickly, but usually wind up with loss of expected dividend and invested capital as well.” Mr. Miller says that the statement of 17½% is not given as something wonderful or phenomenal. On the contrary, it is sent forth with the full knowledge that even better results have been obtained. It shows what is possible to all who intelligently apply themselves to the pleasant, healthful orchard work in the beautiful Annapolis Valley.

—Maritime Merchant.

St. Mary's Church, Belleisle

PRESENTATION TO THE RETIRING ORGANIST.

At the close of the service in St. Mary's church, Belleisle, on Thursday evening last, a very pleasing event took place. It having been known that Miss Eliza Wade was retiring from the position of organist, the Rector and members of the congregation were desirous of showing their appreciation of the service rendered the church by Miss Wade during the many years in which she has filled the position she has now vacated. This was done on Thursday evening, when, at a special meeting, immediately after the service, the Rector read the following:—

Dear Miss Wade,
We, the Rector and congregation of St. Mary's church, Belleisle, feel we cannot allow your retirement from the position of organist, at St. Mary's without some tangible expression of the debt we owe you for many years of faithful service at all times freely and voluntarily given. We, therefore, knowing your love for the music of the Sanctuary, ask you to kindly accept the accompanying “Book of Common Praise,” together with our hearty good wishes, in the hope that in the days to come, it will be a pleasant reminiscence of the many hours devoted to the choir of dear St. Mary's, Belleisle.

The book presented was an Organ Edition of the “Book of Common Praise,” very beautifully bound in Maroon Rutland and printed on the celebrated Oxford India paper. It bore the following inscription:—
Presented to
Miss E. Wade, Belleisle,
by
The Rector and Congregation of St. Mary's Church,
on her retirement from the position of Organist, as a mark of appreciation of faithful service, at all times freely and voluntarily given for a period of upwards of forty years.
Easter-tide, 1911.

Miss Wade was taken completely by surprise and asked the Rector to thank the congregation for the very beautiful gift, which she should always value and highly prize.

CANADIAN PACIFIC OFFICIAL PHOTOGRAPHER.

The St. John Times of Wednesday says: John MacKenzie, of Montreal, arrived in the city on the noon train today and is registered at the Dufferin. Mr. MacKenzie is connected with the C. P. R. at Montreal and while in the city will take photographs of the places of interest for the C. P. R. advertising department. He will remain in this city several days after which he will go through the Annapolis Valley. He is accompanied by his son, Gerald.

Famous German Dirigible Is a Total Wreck

Dusseldorf, Rhenish-Prussia, May 16—After a career of six weeks, the Deutschland, latest of the models of Count Zeppelin's ill-fated dirigible balloons stranded today on the roof of the shed at a town near the crash of the airship was a total wreck. The accident occurred as the Deutschland was being released for a passenger trip. Eight passengers—four men and four women—had seated themselves comfortably in the cabin, the crew were at their posts and two hundred men on the ground clung to the guide ropes as the powerful craft slowly emerged from her berth and under pressure of over half million cubic feet of gas struggled to be free.

Just as the airship cleared the shed a violent gust of wind drove her back against the entrance. At the impact several of the balloons burst and the released gas destroyed her equilibrium. The army of men at the guide ropes clung on desperately, but were powerless against the wind and another gust lifted the airship bodily and dropped upon the roof of the shed, her back broken and her hull left dangling over one edge.

In this position the crew and passengers rudely shaken but not seriously injured, were left helpless until a fire brigade, hurriedly summoned to the scene ran their ladders to the top of the balloon shed and pulled the marooned ones out of the wreck.

Today was the sixth serious accident which has befallen the Zeppelin dirigibles. All have come to grief after short though brilliant careers.

Quality
in tea may mean to you flavor or strength or fragrant richness. Red Rose Tea is blended with such nicety that it is the combination of all three points of merit. Will you try a package.

RED ROSE TEA is good tea

DOMINION ATLANTIC RAILWAY

Steamship Lines TO St. John via Digby AND Boston via Yarmouth "Land of Evangeline" Route.

On and after May 15th, 1911, the Steamship and Train Service on this Railway will be as follows (Sunday excepted):

Midland Division

Trains of the Midland Division leave Windsor daily, (except Sunday) for Truro at 7.30 a.m., 5.35 p.m. and 6.45 a.m. and from Truro at 6.50 a.m. 3.20 p.m. and 12.00 noon connecting at Truro with trains of the Intercolonial Railway, and at Windsor with express trains to and from Halifax and Yarmouth.

Boston Service

SERVICE IN EFFECT MAY 15th, 1911.

The Royal and United States Mail Steamship "PRINCE ARTHUR" will leave Yarmouth Wednesday and Saturday on arrival of Express from Halifax, arriving in Boston next morning. Returning leave LONG WHARF, BOSTON, at 1.00 p.m., Tuesday and Friday.

St. JOHN and DIGBY

ROYAL MAIL S. S. YARMOUTH. Daily Service (Sunday excepted). Arrives in Digby 10.45 a.m. Leaves St. John 7.45 a.m. Leaves Digby same day after arrival express train from Halifax.

BASIN OF MINAS SERVICE. S. S. "Prince Albert" between Arnsboro-Kingsport-Wolfville daily, (except Sunday).

Very dressy line of Ladies' Brown Suede Pumps. Prices \$2.25 to \$4.00.

C. B. LONGMIRE.

\$2,200,000 For Branch Railways In Nova Scotia, From Dartmouth to Upper Musquodoboit.

Ottawa, May 18--Supplementary estimates for the current fiscal year are tabled in the House of Commons by the finance minister, amounting to \$17,020,980, about equally divided between ordinary and capital accounts and bringing up the total of the estimates for the year ending March 31, 1912, to the record sum of \$156,289,180. This is an increase of \$23,411,555 over the estimates voted for 1911 and an increase of \$44,615,803 over the total vote of 1910.

This sum includes two millions for the construction of a couple of branch lines of the Intercolonial railway in the eastern part of the province, 120 votes for harbors and river improvements judiciously scattered, sixteen votes for public buildings in small towns, and others for several local steamship services.

THE SUMS VOTED FOR I. C. R. EXTENSIONS.

The proposed votes for the Intercolonial railway include \$600,000 for docks and wharves at Halifax; one million dollars for the construction of a branch line from New Glasgow to Guysboro and to Country Harbor; one million for a branch line from Dartmouth to Dean Settlement; \$200,000 for a branch line from Albaton to Baddeck, Cape Breton.

Appropriations of \$50,000 for a branch line from O'Leary to West Point, and \$100,000 for a line from Kensington to Stanley bridge are asked for Prince Edward Island. That province is also placed with an estimate of \$35,000 for a second survey "to ascertain the practicability and cost of a tunnel between the island and the mainland."

The Hudson Bay railway project figures for an appropriation of \$2,000,000 for construction.

FOR CENSUS, MILITIA AND NAVAL SERVICE.

The votes for Ottawa include \$100,000 for a new printing bureau. Under the head of arts, agriculture and statistics, the following sums appear:

Further amt. for census \$200,000 Exhibitions 75,000 Establishment of cold storage warehouses 125,000 Development of live stock industry 50,000 Militia votes include \$3,500 for expenses of a cadet team to England for the Empire day rifle matches; \$15,000 for the purchase of military arms.

Naval service votes consist of \$70,000 additional to establish wireless stations.

For fishery patrol service \$95,000 is asked, and for five lobster fishery patrol boats, \$25,000.

In connection with the coronation \$6,000 is asked for the expenses of the prime minister; \$8,000 for the expenses of two other ministers and \$18,000 for the expenses of eighteen senators and members of the commons forming the parliamentary delegation.

VOTES FOR PUBLIC BUILDINGS IN NOVA SCOTIA.

Among the votes for public buildings in Nova Scotia are the following:

Table listing public buildings and their costs: Amherst public buildings, improvements \$1,000; Baddeck public buildings, tower clock and sidewalk \$1,800; Halifax Detention hospital, improvements 2,500; Halifax Dominion building, (post office), improvements, repairs, etc., further amount required 10,000; Halifax quarantine station on Lawlor's Island, bacteriological laboratory 20,000; Kentville public buildings, improvements 4,000; Lunenburg public buildings, fittings, etc. 2,000; Middleton public building North Sydney public building, tower clock 1,000; Port Hawkesbury public building 2,000; Shelburne public building, to complete 3,500; Stellarton public building Sydney Mines public building, tower clock and repairs 1,500; Windsor public building, tower clock 1,000; Yarmouth public building, increased accommodation, further amount required 7,500.

THE BUILDING MATERIAL OF THE FUTURE.

As every one knows a great deal is being written and said about cement these days and the general opinion is that the buildings of the future will be constructed of concrete, a mixture of cement, sand and gravel. It is said that in the city of Montreal alone this year there will be built over five hundred concrete houses. Minard's Liniment Relieves Neuralgia

MIRACULOUS RESULTS IN DUNVEGAN, C.B.

GIN PILLS Brought Relief

"I suffered untold misery even when under treatment from the best doctors for over ten months, and nothing seemed to do me any good or relieve my painful condition. My trouble was inflammation of Kidneys and Bladder. I finally determined to go to the Victoria Hospital, Halifax, for treatment. Two days, however, before my intended departure, a neighbor called and happening to have a GIN PILL in his pocket, insisted on my taking it. I did so and six hours after taking it, the results and benefits I derived were simply nothing more or less than miracles. Instead of going to the hospital, I sent for a box of GIN PILLS with the result that I am a cured man. I recommend GIN PILLS to everyone suffering from Kidney Trouble."

Lewis MacPherson. Take GIN PILLS on our positive guarantee that they will cure you or money promptly refunded. 50c. a box - 6 for \$2.50 - sent on receipt of price if your dealer does not handle GIN PILLS. Sample box free if you write us. National Drug and Chemical Co., Dept. N. S., Toronto.

The original Gin Pills made by National Drug and Chemical Co. of Canada Limited, Toronto, are sold only in this box.

FOUND WHAT THEY LOOKED FOR.

A few years ago I attended an annual conference in one of the good towns north of us. On Sunday morning Bishop H., who was presiding over the conference, preached, and although the weather was stormy, the auditorium was well filled. The Bishop preached in the Spirit and with power. In the pew just in front of me were two young ladies, whose minds were evidently pre-occupied, perhaps with thoughts of the week's games of bridge, or of the coming ball. When the Bishop had been preaching half an hour, one of the ladies said: "Doesn't he preach long?" "He certainly does," was the assenting reply. Over to my left hand was a gentleman with pencil and paper in hand, for what purpose I learned later. To my right sat another gentleman, about sixty years old, I would guess, and whose appearance indicated that he was a man of character and culture. He seemed oblivious of everything except the preacher and his message. His face would light up and his eyes would kindle as he followed the eloquent sentences of the sermon.

The service closed and the young ladies found an end to the sermon for which they had sighed more than once. The brother with paper and pencil glanced at his notes and said: "The Bishop made twenty-seven mistakes in his sermon." The man to my right said to a friend: "Grand, grand! The bread of life and the power of God unto salvation!"

The large congregation filed slowly out at the doors and went their way, each having found in the service what he looked for. -W.N. Wagner, in The Florida Methodist.

A little cap shaped like a very long thimble attached to a slender wire is useful for taking cream from milk bottles without trouble or waste or without pouring out the milk.

Disastrous Fires in Lunenburg County

Mahone, May 7--There has been a surfeit of fires in town and at Martin's River, a village four miles from here during the past two days. On Friday a chimney on fire in the town threatened the nearby buildings, and possibly a large section of it. Saturday morning a fire set by a man to burn straw on a lot back of the Parade threatened the beautiful grove, so well known to excursionists from Halifax. After one and a half hours hard work the fire was thought to be under control but it broke out again about four o'clock and again was apparently put out, but today it started afresh but was soon under control again. On Saturday evening another bush fire threatened Captain James Winter's and other houses.

BUCKET BRIGADE'S GOOD WORK.

Saturday morning a fire started on the H. & S. W. Railway near their water tank near the Indian Point road, and with the high wind raced towards Martin's River and the Narrows, burning several hundred acres of woodland and young pine timber, as well as grown timber. In the afternoon a telephone message stated that several buildings had been burned and asked for help. In a few minutes some forty-five or fifty men equipped with buckets started with teams for the scene and arrived in time to save a number of houses and barns. At five o'clock a second telephone message was sent to Mahone Bay and Bridgewater for help and some sixty or seventy men from these places came by special train just in time to render valuable help to the others who were by this time lagged out.

THE LOSS IS HEAVY

It was, however, the men from here who went down in the afternoon to whom credit is due, as they saved a number of buildings from destruction. In several cases the fire was within a few inches of buildings when they arrived. John Ernst of the Narrows lost his house and barn, saving only a few articles. James Hiltz lost his barn, which contained four tons of hay and quite a large quantity of No. 1 pine timber. Jacob Samuel Hiltz and others lost all their wood and young timber. John Ernst's son had a considerable sum of money in the house when it was burned.

Yesterday morning during church services a messenger went to the different churches and said the fire had broken out again. Within half an hour fully one hundred men started for there by every possible conveyance, but the people there had the fire under control before the Mahone men arrived. It is estimated the loss to the people of Martin's River and the Narrows will be nine to ten thousand dollars.

Sick headache results from a disordered condition of the stomach, and can be cured by the use of Chamberlain's Stomach and Liver Tablets. Try it. For sale by all dealers.

C. P. R. ENGINES WILL BURN OIL IN THE ROCKIES.

Winnipeg, Man., May 16--The C.P.R. today announced that all engines in the Rockies will be changed at once to oil burners. This means oil equipment for locomotives over six hundred miles from Calgary to Vancouver.

CRIPPLED BY RHEUMATISM

Gentleman in Vancouver Owes His Recovery TO "FRUIT-A-TIVES"

Vancouver, B.C., Feb. 1st, 1910.

I am well acquainted with a man, known to thousands in Vancouver, Victoria and New Westminster, who for nearly a year was practically a cripple from rheumatism. He was so troubled with the disease that he found it difficult to even turn over in bed. His heart appeared so weak that he could hardly get upstairs. Last June, he received a sample of "Fruit-a-tives." He used them and dates his recovery from that time. To-day there is no other man in Vancouver enjoying better health. He was building a house this fall and shingled a good part of the roof in a driving rain storm without suffering any bad effects.

JOHN B. LACY.

"Fruit-a-tives" is a positive cure for Rheumatism, Sciatica, Lumbago, Pain in the Back and all Kidney Troubles, because it is the greatest blood-purifying medicine ever discovered. 50c a box, 6 for \$2.50; trial size, 25c. At dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

NOT TILL LOVE COMES SHALL WE KNOW.

Not till we meet with Love in all his beauty, In all his solemn majesty and worth Can we translate the meaning of life's duty, Which God oft writes in cipher at our birth.

Not till Love comes in all his strength and terror Can we read each others' hearts, Not till then know A wide compassion for all human error, Or sound the quivering depths of mortal woe.

Not till we sail with him o'er stormy oceans Have we seen tempests; hidden in his hand He holds the keys to all the great emotions; Till he unlocks them none can understand.

Not till we walk with him on lofty mountains Can we quite measure heights, And oh, sad truth! When once we drink from his immortal fountains We bid farewell to the heart of youth.

Hereafter our most perfect day will borrow A dimmed shadow from some dreaded night, So great grows joy it merges into sorrow, And evermore pain tinctures our delight.

Now is the time to get rid of your rheumatism. You will find Chamberlain's Liniment wonderfully effective. One application will convince you of its merits. Try it. For sale by all dealers.

No Sick Person can Afford to throw away this chance to get a 50c. bottle of Psychine FREE

This being ill is curious business. It usually commences in a subtle fashion, almost unconsciously. Yet if you do not check your illness, it grows and grows. And one fine day you find you're sick.

The greatest scavengers of the body are the white corpuscles, or phagocytes in the blood. These white corpuscles attack and eat up every germ of disease that invades the body. That is when they are strong enough and in sufficient numbers. If they're not strong enough, then they wage an unequal warfare until they are finally overcome by their more powerful enemies.

The body becomes steadily sicker and sicker until actual disease sets in. Now, we have had all sorts of so-called cures. And a great many people have seriously endangered their health experimenting with them. But years ago--before even science was able to tell we had the right treatment for disease--viz., herbs, nature's own remedies. Now that science can tell to an absolute certainty, we know why certain herbs cure disease. Because they strengthen and increase the white corpuscles or phagocytes.

A third of a century ago Psychine made remarkable cures. To-day it is making remarkable cures. In the interim, millions of bottles of Psychine have been sold. Hundreds of thousands of people made well and kept well. Why? Because Psychine is largely made up of those herbs that scientists now know increase and strengthen the white corpuscles, the phagocytes. That's why we have received hundreds of thousands of unsolicited testimonials, that's why we can afford to buy and give away hundreds of thousands of 50-cent bottles of Psychine, that's why Psychine benefits these diseases:

Table listing ailments cured by Psychine: La Grippe, Bronchitis, Hemorrhages, Sore Throat, Anaemia, Female Weakness, Indigestion, Poor Appetite, Chills and Fevers, Sleeplessness and Nervous Troubles, After-effects of Pleurisy, Pneumonia and La Grippe; Bronchial Coughs, Weak Lungs, Weak Voice, Spring Weakness, Early Decline, Catarrh of Stomach, Catarrh of Intestines, Night Sweats, Obstinate Coughs, Laryngitis and Dyspepsia.

Now we don't ask you to take our word for the tremendously beneficial effects of Psychine. Fill out the coupon below, mail it to us and we'll give you a 50c. bottle of Psychine.

your druggist an order (for which we pay him the regular retail price) for a 50-cent bottle of Psychine to be given you free of cost. We will undoubtedly buy and distribute in this manner, hundreds of thousands of these 50-cent bottles of Psychine. And we do that to show our entire confidence in this wonderful preparation. A confidence that has been based on our 30 years' experience with this splendid preparation, with a full knowledge of the hundreds of thousands of cures it has made.

COUPON No. 20 To the Dr. T. A. SLOCUM, Ltd., 193-195 Spadina Ave., Toronto

I accept your offer to try a 50c. bottle of Psychine (pronounced "Sickness") at your expense. I have not had a 50c. bottle of Psychine under this plan. Kindly advise my druggist to deliver this bottle to me.

My Name, Town, Street and Number, My Druggist's Name, Street and Number.

This coupon is not good for a 50c. bottle of Psychine if presented to the druggist. It must be sent us--we will then mail you the 50c. bottle of Psychine from your druggist and direct him to deliver it to you. This offer may be withdrawn at any time without notice. Send coupon to-day.

Joker's Corner

MADE OF WOOD.

A local painter spent three months on a painting. He spent a good deal of money on models, but the finished product justified all his expenditures and all his time. Everybody told him so when his picture was exhibited. Everybody but one. This lady whose opinion he valued most was the one he took to the exhibition with him. "I can hardly wait," she bubbled. "This one," he told her—and waited. She studied it in detail. "What is it called," she wanted to know. "Wood Nymphs."

"How silly of me to ask! They're so natural. Why, anybody would think they were really made of wood!"

A JAR FOR THE LAWYER.

In a country police court a man was brought up by a farmer for stealing some ducks. "How do you know they are your ducks?" asked the defendant's counsel. "Oh, I should know them anywhere," replied the farmer, and he went on to describe their different peculiarities. "Why," said the prisoner's counsel, "these ducks can't be such a rare breed. I have some very like them in my own yard." "That's not unlikely, sir," replied the farmer; "they are not the only ducks I have had stolen lately!" "Call the next witness," said the counsel.

PAPA WOULD BE THERE?

Little Mary was watching me the other day as I was making a bed.

After what was for her a long silence, she said: "I always make the beds for mamma." "You shouldn't tell such stories," I said, trying to be severe. "I know it," she answered, quickly. "Mamma said the 'bad man' would get me if I tell stories." After a short silence she continued: "If the 'bad man' gets me, won't I ever see mamma or Eddie?" "I think not," I answered, "for they don't tell stories." Mary looked serious for a moment, then said: "Oh, well, I don't care, I'll see papa, anyhow."

NOT HER CELEBRATION.

Uncle Ephraim had put on a clean collar and his best coat, and was walking majestically up and down the street.

"Aren't you working today, uncle?" asked somebody.

"No, suh. I see celebraten ma golden weddin', suh."

"You were married fifty years ago today, then?"

"Yes, suh."

"Well, why isn't your wife helping you to celebrate it?"

"Mah present wife, sah," replied Uncle Ephraim with dignity, "ain't got nothin' to do with it."

WHAT DID SHE KNOW ABOUT IT?

Archbishop Ryan was visiting a small parish in a mining district one day for the purpose of administering confirmation, and asked one nervous little girl what matrimony is.

"It is a state of terrible torment which those who enter are compelled to undergo for a time to prepare them for a brighter and better world," she said.

"No, no," remonstrated her rector, "that isn't matrimony; that's the definition of purgatory."

"Let her alone," said the Archbishop; "maybe she is right. What do you or I know about it?"

"So that's the baby, eh?" "That's the baby," "Well, I hope you will bring it up a conscientious, God-fearing man."

"I am afraid that will be rather difficult."

"Pshaw! As the twig is bent the tree's inclined."

"I know, but this twig is bent on being a girl and we are inclined to let it go at that."

When dusting ceilings and walls it is a good plan to fit the broom-head with a bag provided with a string cord to draw it close. With this the walls and ceilings can be conveniently dusted.

The Doctor's Question

Much Sickness Due to Bowel Disorders

A doctor's first question when consulted by a patient is, "Are your bowels regular?" He knows that 98 per cent. of illness is attended with torpid liver, and that this condition must be removed gently and thoroughly before health can be restored. Rexall Orderlies are a positive, pleasant and safe remedy for constipation and bowel disorders in general. We are so certain of their great curative value that we promise to return the purchaser's money in every case when they fail to produce entire satisfaction. Rexall Orderlies are eaten like candy, they act quietly and have a soothing, strengthening, healing influence on the entire intestinal tract. They do not purge, gripe, cause nausea, flatulence, excessive looseness, diarrhoea or other annoying effect. They are especially good for children, weak people, old folks, Two sizes 25c and 50c only at our store—The Rexall Store, W. A. Warren.

MONOTONY.

The housewife, tired of the beastly grind, turned loose some thoughts that were in her mind, when her husband came from his toil at night; she said the world didn't use her right. "I'm always doing the same old chores, I'm always sweeping the same old floors, I'm always washing the same old frocks, and darned holes in the same old socks. I'm sick and tired of this wretched life! There is no joy for a poor man's wife!" The wife of the rich man sighed and said: "Gee whiz! A dame might as well be dead! I'm always doing my social chores, I'm always wearing my stately bores; I'm always choosing the proper gown. I'm always motoring through the town! I'm always doing the same old things! I wish, I wish I had ten-foot wings! I'd fly away to some jolly cot, and do a stunt with a coffee-pot!" We all grow tired of the work we do, and sigh and rant till the air is blue. But it does no good, and it baleo no hay, and the wise man chases such thoughts away. The world improves with each passing year, because each man in his little sphere, takes off his jacket and grins and sings, and keeps on doing the same old thing.—Wait Mason.

MINARD'S LINIMENT cures Burns, Scalds, Bruises, Sprains, Rheumatism, Neuralgia, Headaches, Toothaches, and all kinds of Pain.

The Church and the Local Newspaper

"Advertise your churches in the newspapers and keep in touch with newspaper men," is the advice the Rev. C. R. Reiser, D.D., pastor of Grace church, New York, gave the assembled clergymen at the New England annual conference, held in Cambridge, Mass. "It is a great mistake for some clergymen to keep aloof from newspaper men and refuse to be interviewed," said Dr. Reiser. "Why, everybody reads the newspapers and if you want to get your interests before the public you must advertise in this important agency. They will always treat you fairly, if you give them reason for doing so. Why I never could get a congregation in my New York church did I not get the newspapers on my side."

NO MORE INSANE CRIMINALS.

Insanity as a defense in murder trials which has become so common of late years, may eventually be eliminated as the result of a novel movement just started in Montreal. Figures have been gathered which show that in this city alone there are two thousand feeble-minded children, many of whom will inevitably become members of the criminal class. Statistics show that crime and insanity are on the increase and that fully half the criminals are criminals because of mental or nervous conditions, which obtained during childhood. Accordingly it is now proposed to catch the potential criminals suffering from some mental or nervous disorder while they are young and cure them before it becomes too late. To this end it is planned to establish here an institution where feeble-minded children shall be examined and registered since if the condition is recognized soon enough the child can generally be cured. Under the present system the procedure is to send mentally deficient children to a reformatory, from which they are released in a few months, often worse than they were before entering. Under the new plan they will not be released until they are cured. If this proposal does succeed in eliminating the overworked defense of insanity in criminal cases, it is not improbable that a long suffering public will be willing to erect a monument to its benefactor.

\$3,600 in Cash Prizes for Farmers

Tell Us How You Did It

You may win a prize by doing so

SUPPOSE your friend Bob Wilson, on the next concession, "pulled up" at your front gate on the way back from market and asked about that silo or barn foundation you built, you would be glad to tell him, wouldn't you? And it wouldn't take you long, either, would it? And, as a matter of fact, you'd find as much pleasure telling him as he would in listening— isn't that right? First you would take him over to view the silo or barn foundation. Then you would start to describe it—its dimensions—the kind of aggregate used—the proportions of cement used—number of men employed—number of hours' working time required—method of mixing—kind of forms used—method of reinforcing, if any—and finally, what the job cost. So that by the time you finished, neighbor Wilson would have a pretty accurate idea of how to go about building the particular piece of work which you described. Now couldn't you do the same for us, with this difference—that you stand a good chance of getting well paid for your time? In Prize "D" of our contest, open to the farmers of Canada, we offer \$100.00 to the farmer in each Province who will furnish us with the best and most complete description of how any particular piece of concrete work shown by photographs sent in was done. The size of the work described makes no difference. The only important thing to remember is that the work must be done in 1911 and "CANADA" Cement used.

In writing your description, don't be too particular about grammar or spelling or punctuation. Leave that to literary folk. Tell it to us as you would tell it to your neighbor. What we want are the facts, plainly and clearly told. And it is simple. And surely it is well worth your while when you think of the reward in view. Now sit right down, take your pen or pencil—all out the at-

tached coupon—or a post-card if it's handier—and write for the circular which fully describes the conditions of this, the first contest of the kind ever held in Canada.

Every dealer who handles "CANADA" Cement will also be given a supply of these circulars—and you can get one from the dealer in your town, if that seems more convenient than writing for it.

Contest will close on November 15th, 1911—all photos and descriptions must be sent in by that date, to be eligible for one of these prizes. Awards will be made as soon as possible thereafter. The decisions will be made by a distinguished committee, the following gentlemen having consented to act for us, as the jury of award: Prof. Peter Gillespie, Lecturer in Theory of Construction, University of Toronto; Prof. W. H. Day, Professor of Physics, Ontario Agricultural College, Guelph; and Ivan S. Macdonald, Editor of "Construction."

Having decided to compete for one of the prizes, your first step should be to get all the information you can on the subject of Concrete Construction on the Farm. Fortunately, most of the particulars that anyone can possibly need, are contained in our wonderfully complete book, entitled "What the Farmer Can Do With Concrete." A large number of Canadian farmers have already sent for and obtained copies of this free book. Have you got your copy yet? If not, you'd better send for one today. Whether you are a contestant for one of our prizes or not, you really ought to have this book in your library. For it contains a vast amount of information and hints that are invaluable to the farmer.

Please send full particulars and book. Name..... Address.....

M. K. PIPER

PROPRIETOR AND PUBLISHER

WEDNESDAY, MAY 24, 1911.

The idea of organizing Boy Scouts for Bridgetown has been gaining ground and a definite movement is now afoot. The boys themselves have been the prime movers and have enlisted the interest and assistance of Rev. E. Underwood, rector of St. James', who has been in correspondence with Lieut. Col. F. H. Oxley, Provincial Commissioner for the Boy Scout organization.

There is no doubt whatever that the idea is a popular one, though impressions as to the nature of the organization may be a little hazy. For the benefit of anyone wishing to familiarize himself with the subject a small supply of Baden-Powell's book "Scouting for Boys" has been obtained and may be procured from principal Bustin for the small sum of twenty-five cents each. These books are full of valuable information for anyone, and are intensely interesting. Under the headings of the various chapters are "Scoutcraft," "Campaigning," "Camp Life," "Tracking," "Woodcraft, or Nature Study," "How to be Strong," "Chivalry," "Saving Life or How to Deal With Accidents," "Patriotism or Citizenship." Under these headings are many sub-divisions, written most entertainingly. Games, competitions and displays are features.

General Baden-Powell, of His Majesty's forces, fathers the entire organization and as may be inferred he has a definite object in view. "To make boys true men" is the gist of the teaching and the whole course of instruction has this aim in prospect. A Scout has to promise on his honor

- 1. To do his duty to God and the King.
2. To help other people at all times
3. To obey the Scout Law.
"To sum up," says the text book, "the whole object of our scheme is to seize the boy's character in its red-hot stage of enthusiasm, and to weld it into the right shape and to encourage and develop its individuality—so that the boy may become a good man and a valuable citizen of our country in the immediate future, instead of being a waste of God's material."

"The nation is showing signs of illness. We can diagnose it as 'bad citizenship.' We know the kind of remedy to apply, namely, education of the rising generation in 'character.'" "Scouting" offers one such remedy—if only as a 'First Aid' pending the application of a better one. Meantime, every minute is precious." It might be surmised from the title of the organization that the military feature is prominent. This is not so, —the text book says in regard to this:—"There is no military meaning attached to scouting. Peace scouting comprises the attributes of colonial frontiersmen in the way of resourcefulness and self-reliance and the many other qualities which make them men among men. There is no intention of making the lads into soldiers or of teaching them blood-thirstiness. At the same time under 'patriotism' they are taught that a

Have you ever considered, that if in the course of events your family should be deprived of your earning power by death, all the thousand and one bills that you are NOW worried about paying, MUST STILL BE PAID! Are you willing that your widow or your old parents should be obliged to have the same worry and be obliged to get the same amount of money to pay the bills, even at the sacrifice of the home? We have eliminated all need for worry by a SPECIAL POLICY CONTRACT in

THE EXCELSIOR LIFE INSURANCE COMPANY in which we guarantee sufficient income to pay the same bills during their lives at a cost within your present earning. Inquire and see if it is not worth consideration.

Capt. S. M. BEARDSLEY, Wolfville

Manager for Nova Scotia. Office Herald Building, Halifax Box 136, Halifax - Box 230, Wolfville

citizen must be prepared to take his fair share among his fellows in the defence of the homeland against aggression in return for the safety and freedom enjoyed by him as an inhabitant. He who shirks and leaves his duty to others to do for him is neither playing a plucky nor a fair part.

"I have never met a man who has seen war in a civilized country who remained a so-called anti-militarist. He knows too well the awful and cruel results of war, and until nations have agreed to disarm he will not invite aggression or leave his country at the mercy of an enemy by neglecting its defence. You might just as well abolish the police in order to do away with crime before you have educated the masses not to steal."

Booming Nova Scotia

The Boston Sunday Globe has recently published a notable series of twelve illustrated special articles entitled "With our Next-Door Neighbors," written by Thomas F. Anderson, the well-known journalist and lecturer of that city.

These articles—the most comprehensive and instructive of their kind that have ever appeared in an American newspaper—describe the Maritime Provinces in an industrial, agricultural, scenic and historical way, and are written in an exceedingly popular style.

Particular attention has been given to Nova Scotia in the series, the fishing, lumbering, apple-raising, mining and other industries of the province being described at length, together with the development of transportation facilities and the remarkable growth of the summer vacation business. The latter furnishes the subject of the concluding article.

The articles have attracted favorable attention everywhere, and have been a valuable advertisement for Nova Scotia. No native of the province now living has written as extensively about Nova Scotia, in newspaper and magazine articles and transportation company books and folders, or has lectured as frequently on this subject, as Mr. Anderson. He has been giving effective publicity to the attractions and resources of the province in these ways for fully a quarter of a century, without cessation. Through his illustrated lectures on the Land of Evangeline alone he has reached thousands of persons all over New England, and has been the direct means of inducing many of these to make Nova Scotia their regular resting place.

COMPRESSED AIR WILL REPLACE POSTMEN

(From our own Correspondent.) Montreal, May 19—A significant notice of an important resolution was allowed to slip by without comment a few days ago when the Postmaster General announced at Ottawa that employees of the postal service were to be re-classified. Briefly Mr. Lemieux proposes to rearrange the service in such a way that mail will be on the move almost every moment from the time it is posted to the time that it is delivered. The waste seconds, minutes and even hours when a letter is at rest, either in the corner post box awaiting collection, in a sack in the post office waiting to be sorted out, or in a pigeon hole awaiting delivery, will be reduced to a minimum.

According to Mr. Lemieux's statement several of the classes of postal employees are to be abolished, and an increase of pay is to be granted to the others. In Montreal it is noticed that the uniformed force, the men who walk the city with the pouches and bags full of mail, on their backs, is to be decreased. Until the reason was discovered there was considerable objection on the part of citizens. Now, it appears, the Government has in hand plans calling for the installation of the tube system of letter delivery and collection. Drop a note into a tube in your office and, presto, it is whisked off to the post office, where it is sorted immediately with others of its kind and shot into another tube, which whisks it off to the sub-post office nearest the address on the envelope. If it is for the out-of-town mail, it, of course, has to wait for the fast-growing obsolete train service.

Garden Hints

We are not to be satisfied until we have gardens behind our houses—beautiful gardens—instead of back yards. Now, when our pansies and heliotropes and all the rest of the flowers—that we shall plant are in bloom, what sort of effect will they have against an old board fence? Is there anything that can be done to that old board fence to mitigate its dreariness?

Yes, just one thing, don't paint it but cover it with creepers. Cover it thickly and leave no bald spaces, and keep always in one corner of the yard a little nursery of your creepers to replace any that might not do well. Get the best things that are to be had for the old fence—you will like them better each year. Suppose perennials will not blossom the first year of planting you must be patient and plant the perennials just the same and fill up the between time with showy climbing annuals. First, then put as much as you can into the making of the lower part to which we are to transform the back yard.

A garden near my own has one ugly fence completely hidden by a hedge of Japanese roses, which needs no pruning. In summer, these red Rugosas form a dense mass of spiny stems and rich foliage. They grow rapidly and bear a sweet red blossom which changes to a large nep of vivid scarlet. In winter a heavy mulch of manure is heaped around each bush and they are otherwise protected by wrappings above, while the fence is something of a shelter. But whatever trouble is taken for them is taken gladly, so well do they pay in perfume and decorative quality.

Honeysuckle goes with roses and grows easily. Clematis is hardy, and what is lovelier than its stars of carmine and white and blue? Wistaria, with its grapelike clusters of blossoms, is a noble climber. The trumpet vine, beautiful in flower and foliage, is hardy as a tree, and this may be said, too, of the Chinese matrimony vine. Before these perennial treasures reach their finest maturity plant every sort of pretty annual you think of to cover the fence. Sweet peas will do it enchantingly if you give them the right support. What they like best is hazel boughs or any branch with many twigs. Scarlet runners on strings will give you blossoms and beans.

Climbing nasturtiums (wire netting is best for them) will give you flames of glory and screens of wide green leaves for your bower and piquant flavor for your salad. The tuberous cinnamon vine will make a huge screen in one season, and how exquisite is its scent!

For the rear and side walls of the house itself the old ampelopsis (the Boston ivy) is better than anything clinging so closely to the walls and making such masses of delicately cut foliage. And think of the ruby glow of it after the first frost. For the trellis try the new hardy rambling roses with their wonderful great nosegays of cream and crimson and pink. And if you have room do as I do and grow your own grapes on a sunny pergola.

The time will come when you will be surrounded by blossoming green creepers, with not an ugly bit of old lumber in sight, and, as a matter of course, a good lawn to walk on. Then, when you bring your friends out to drink afternoon tea in the shade of the trellis, mightn't it be well to stop calling it the back yard and say, "come out into the garden?"

FIRE AT COLDBROOK

On Monday morning about half-past one o'clock during the thunder storm, the lightning struck the barn of Havelock Lockhart at Coldbrook and it was entirely consumed, nothing but some harnesses, etc. was saved from the building. The loss consisted of barn, and wagon, house about twenty tons hay, wagon, two horses, two colts, yoke oxen, cow, fertilizer, etc. The loss is a very heavy one for Mr. Lockhart—Orchardist.

Hymeneal

FURBISH—YOUNG.

A quiet wedding took place at the home of Mr. and Mrs. Jarvis H. Furbish, East Newport, Maine, April twenty-seventh at eight o'clock, when their sister, Minnie Blanche Young, formerly of Paradise, N.S., was united in marriage to Benjamin F. Furbish, of Plymouth, Maine, the ceremony being performed by the Rev. B. W. Russell. The bride was becomingly attired in white silk with trimmings of pearl and crystal beaded embroidery with veil and orange blossoms. After the ceremony a dainty supper was served. The bride received many handsome and useful presents, consisting principally of cut glass and silver.

Mr. and Mrs. Furbish will be "at home" after July first at Plymouth, Maine.

Obituary.

EBENEZER S. CONGDON.

Mr. Ebenezer S. Congdon passed away in Dorchester, Mass., after a long illness early on the morning of May 15th. He was born at Union Square, Kings Co., Aug. 30th, 1838. For the past seventeen years he has been resident in Dorchester. His wife was Syretha Nelly who passed on to the Better Land just four years ago. He leaves one daughter, Mrs. Joseph Little and three sons, Clark of Dorchester, Theodore, of Mattapan, and Ernest, of Somerset, Kings Co., N. S. The funeral service occurred Tuesday afternoon at 8 Penhallow St., Dorchester, at three o'clock and was conducted by Rev. Charles Page, associate pastor of the Dudley St. Baptist church, of Boston. There were beautiful pillows and wreaths presented by the superintendent and clerks of the Dorchester Division of the Boston Elevated where he had been formerly employed and where his son, Clark is the chief clerk. He was laid to rest in the beautiful cemetery in Dorchester by the side of his wife since whose death he had gradually failed in health though he had been resigned and trusted that all was for the best.

TOO BUSY TO GRUMBLE.

I notice that the successful people never grumble—they are too busy with their day's work to have time to like your work and feel that you are fitted for something better, don't grumble but get out and hustle, as the saying goes. Sometimes you hear a girl say enviously of another: "Oh, she has a snap; her work is easy." Whatever her "snap" is you may be sure she has earned it. Nothing comes for nothing in this world.

All employers like to have cheerful, willing employees. That is most natural. The cheerful, obliging ones who are not afraid of doing a little more than their share of work occasionally are the ones who get advancement, and they deserve it.

DIED

HUNT.—At Bridgetown, May 23rd, Joseph Lloyd Hunt, aged seven months, infant son of Mr. and Mrs. John Hunt.

KING'S BIRTHDAY, JUNE 3rd, 1911

THE HALIFAX & SOUTH WESTERN RAILWAY will sell Excursion Tickets at the ONE-WAY FIRST CLASS FARE, minimum excursion fare twenty-five cents, between all stations, good going June 2nd and 3rd, valid for return until June 6th 1911.

TENDERS

Sealed tenders, marked on the outside "Tender," will be received by the undersigned up to six o'clock on Friday, May 26th, 1911, for the construction of a cottage and stable at Paradise, N. S. for Geo. L. Pearson, Esq.

Plans and specifications may be seen after Friday, May 10th, at owner's residence, Paradise, or at office of the architect.

LESLIE R. FAIRN, Architect, Aylesford, N. S.

LOCAL AND SPECIAL.

Street-cleaning has begun.

The Coronations contingents embarked from Quebec on board the Empress of Ireland on June 2nd.

Mr. G. E. Nicholls and Mr. George Whitman are occupying the double apartment house of Mrs. B.E. Farnsworth.

The watering cart made its welcome appearance on Thursday last, driven by Mr. James DeWitt, and has since made its daily round.

Rev. H. DeBlais was in attendance at the exercises of King's College Encenia at Windsor last week and had the honorary degree of D. C. L. conferred on him.

Tomorrow (Thursday) being Ascension Day, there will be morning prayer with the Holy Communion in St. James' church at ten o'clock. Service in St. Mary's, Belleisle at 8 a. m. (Holy Communion) and 7.30 p. m.

At the auction of G. MacGillivray, Granville, a few days since, a four-months old steer calf, raised by Mr. Gillivray, was sold to Mr. Charles Withers for \$19.25. "Pretty good for a green-horn at stock-raising," says Mr. MacGillivray.

Spectator:—The youth who broke into Herbert Hicks' store at Clamensport was let off by Judge Pelton under suspended sentence. Mr. Hicks is one of the bondsmen. It is to be hoped the considerate treatment of this case will bear good results.

Lieut. Col. F.H. Oxley, of Halifax, will address a meeting of citizens and boys in the Council Chamber on Monday evening next on the Boy Scout movement. It is hoped that all citizens having the interest of boys at heart will be present.

Lieut. Howard P. Neo, son of W.W. Pineo, Waterville, Sergeant Spurr, of Middleton, and Brenton Northup, son of Col. Northup, Canisus, have been chosen from the King's Canadian Hussars, to attend the King's Coronation, June 22nd.—Advertiser.

The re-appointment of Mr. W. H. Morse to the position of Director of Acadia Business College is of interest to his many friends in Annapolis County. Mr. Morse is an experienced and successful instructor and has done excellent work since he has been connected with the Wolfville institutions.

Manager Johnson of the Bank of Nova Scotia has received notice of his transfer to the branch at Oxford. He is, however, unable to take up his duties there just at present as he is convalescing from quite a serious illness of about a fortnight past. Mr. Johnson's many friends here will regret his departure, as both in a business way and socially he has been very much liked. Mrs. Johnson also in social circles will be much missed.

Outlook:—The annual meeting of the Hillcrest Orchard Co. was held in Middleton on Friday last. Messrs. R. S. Eaton, Kentville; S.B. Chute Berwick; G.C. Miller, J. A. Gates and A. B. Gates, Middleton; Fred Johnson, Bridgetown, and Arthur Harris, Annapolis Royal, were appointed directors. R.S. Eaton is the president, G. C. Miller, vice-president, and J. A. Gates, secretary-treasurer. Messrs. A. B. Gates, G. C. Miller and S. B. Chute were appointed the advisory board. The directors speak very optimistically of the future of their company. The Outlook also says: The meeting brought together a number of the leading fruit growers of the Valley. They all agreed that with the possible exception of the nonpariela the fruit prospects in the Valley never looked so good at this season of the year.

Mr. C.L. Reed of South Farmington arrived in Bridgetown on Thursday in his new launch, the Henrietta, on his way to Digby. The launch is to be fitted with gasoline motor, but with the aid of oars and a sail Mr. Reed made the difficult passage of the Annapolis river the entire distance from Middleton to Bridgetown. The feat was accomplished not without serious difficulties in passing the rapids at Lawrence town, Mutton Island, where the water on each side was very shallow, and the Paradise dam. He said he also passed a hundred shad nets, in which shad were not very plentiful. He was thankful to reach the head of navigation at Bridgetown without serious mishap. His boat was, in length, 28 feet; breadth 6 feet, 10 inches; depth 3 feet 4 inches, with a cabin 10 feet long, which sheltered four men. He went through to Digby to dispose of his boat, on Saturday. Mr Reed informed the Monitor reporter he had left South Farmington with the intention of taking up his residence in the western part of the County.

LOCAL AND SPECIAL

The stone-crusher has been moved up to the old driving park.

Victoria Day—blessed be the memory of Victoria the Great and Good! A thunder-storm passed over Bridgetown Monday night, but was quite severe in some sections.

A hot wave struck the Valley on Monday,—it was July weather while it lasted. Today is cooler.

The Monitor-Sentinel goes to press on Tuesday night of this week in order to give the staff a holiday on Victoria Day.

An adjourned meeting of the school board will be held tomorrow (Thursday) evening to take action regarding the selection of teachers to fill vacancies by resignation on the school-teaching staff.

It is "blossom-time" in the Valley, and no fairer scene could be found than this Valley when the apple orchards are like one huge nosegay. The warm sunshine of the past week has brought vegetation along surprisingly, notwithstanding a long period of dry weather, still unbroken. "Blossom-time" and the "24th of May" rarely arrive together.

Mr. Charles R. Chipman, a recent graduate of Dalhousie Law school, and a native of Tupperville, this County, has opened a law office in Bridgetown in the Shafter Building. With so many of our young men leaving to seek their fortune in the West it is gratifying to find a young citizen of Mr. Chipman's caliber with faith enough in his own country to remain at home.

PERSONAL

Mr. James Buckler, of Amherst has been in town for a few days.

Mr. A. J. McLean is elected Secretary-treasurer for the Bridgetown Tennis & Quoit Club.

Dr. Arch Dennison, of Lynn, has been spending a few days visiting his sister, Mrs. L. D. Shafter.

The Misses Carrie and Ella Chesley of Brooklyn, spent the week end with their cousin, Mrs. Edward Rice.

Miss Faye E. Wiggins, of Houlton, Maine, is visiting at the home of Mr. and Mrs. Herbert Gillis, Paradise.

Miss Annie Tupper returned to Digby from Roxbury, Mass., last Wednesday, via Yarmouth.—Digby Courier.

Mrs. Arthur Neaves and son, of Port Lorne, are spending a few days the guests of Mr. and Mrs. S. G. Turner.

Mr. G.E. Nicholl, representative of the National Casket Co., Toronto, has been spending a few days in town with his family.

Mr. Woodrow, lately of the staff of relieving managers of the Bank of Nova Scotia, has received the appointment of manager of the Bridgetown branch.

Mr. Lemoine Ruggles, son of H. Ruggles, Esq., has finished his three-year course at Dalhousie in civil engineering. Mr. Ruggles will go to McGill in the fall for a two years finishing course.

Dr. W. H. Beckwith and friends, Messrs Arnold Wilde and Felix Quim all of Halifax, arrived by automobile the first of the week en route for a camping trip at head of Port Midway, going all the journey in the doctor's car.

Annapolis Royal

(Thomas F. Anderson in Boston Sunday Globe.)

Annapolis Royal, at the further end of the basin is, of course, a town replete with interest to the American tourist, and many of them tarry there, if only long enough to walk through the park wherein are the remains of the famous old fortifications. A bronze statue of DeMott now occupies a prominent position there; and some day there may also be a statue erected to that illustrious advance agent of the Nova Scotia tourist industry, "Joe" Edwards, who still resides in Annapolis Royal and sees passing through on the "Flying Bluenose" the children and grand-children of many of those who got their first lesson in Acadian history from him in the pioneer days of railroading in Nova Scotia. I believe it was here or in some other part of Annapolis county that William Whitman, the "master mind" of the American textile industry, who was given a banquet by the business men of Boston at hotel Somerset several weeks ago, was born. The entire Annapolis Valley, with its alluring scenery and its prosperous farms, is one great summer vacation region.

Victoria Day Races

The following entries have been received for the races at the Middleton Driving Park on Victoria Day:—

- 3 Minute Class
- Bob Zebina Foster
- Lady Alice S. H. V. Gates
- Mollie Brown Stuart Wambolt
- Marion S. J. E. Smith

- Belle Mack W.R. Perkins
- Brenton King Dr. M. E. Devins
- William Mack H. G. Collins
- Little Egypt J. R. DeWitt
- Ferron S.W. Bligh
- Perfection A. Dr. J. P. Annis
- The Reaper Dr. J. P. Annis

Farewell Banquet to W. B. A. Ritchie, K. C.

The Bar of Halifax and Representatives of Bench Unite in Doing Honor to a Former Annapolis Co. Lawyer.

W. B. A. Ritchie, K.C., was the guest of honor at a farewell banquet given at the Queen hotel last evening by the bar of Halifax. The company that assembled numbered about sixty including practically every member of the bar in this city and Justices Russell and Drysdale of the supreme court and Judge Wallace of the county court. The chair was occupied by J. J. Ritchie, K. C., president of the Bar society. Mr. Ritchie leaves Halifax the middle of next week for Vancouver where he becomes a leading member of the firm of which Hon. Mr. Bowser, attorney-general of British Columbia, is the present head. Mr. and Mrs. Ritchie will carry with them the best wishes of a great many friends in Halifax and throughout the province and the regret of the bar as expressed at the banquet, both by representatives of the bench and bar, was unmistakable. It is understood that J. J. Ritchie will take his brother's place in the Halifax firm.—Halifax Herald.

How Judge Pelton Dealt with Chicken Thieves

(Truro News.) Sheriff Horace Reid, of Bridgetown arrived in Truro by D. A. Ry. Midland train last evening and left by the C.P.R., No. 25, this morning, having with them four persons sentenced by Judge Pelton at Annapolis last week to Dorchester for terms as follows:— Robert Pierce, age 42—10 years. Priscilla Pierce, age 52—7 years. Arthur Layte, age 17—7 years. Benjamin Morine, age 25—10 years. Robert and Priscilla Pierce are man and wife. Arthur Layte is son of Mrs. Pierce by a former husband. Many cases of theft from poultry yards, barns and farm houses near Lawrence town, Bricton, Clarence and other sections of Annapolis county, were fastened upon the quartette, hence the severe sentence as stated above. It behooves all thieves to sit up and seriously consider with such punishment as Judge Pelton meted out, staring them in the face.

Big Canadian Combine

The enormous growth of combinations of capital in Canadian industries is not perhaps generally known. Mr. Monk, M.P., from statistics made up a year ago, recently gave the following figures of the authorized capital of twelve of the largest concerns:—

Amalgamated Asbestos Corporation	\$25,000,000
Belmina Consolidated Asbestos Company	2,900,000
Black Lake Asbestos Co.	5,500,000
Canada Cement Co.	38,000,000
Canadian Colored Cotton Mills Co.	7,000,000
Canadian Consolidated Rubber Co.	7,600,000
Dominion Iron and Steel Co.	58,000,000
Dominion Textile Co.	10,000,000
Ogilvie Flour Mills Co.	6,250,000
Montreal Light, Heat and Power Co.	23,500,000
Quebec Railway, Light, Heat and Power Co.	20,000,000
Quebec Railway Light and Power Co.	6,000,000
Total	\$214,750,000

It was Mr. Monk's opinion that the total capitalization of special companies could be brought up to \$300,000,000.

TOWN OF BRIDGETOWN

Stone Wanted

Any quantity of the ordinary brown, field stone, suitable for the rock-crusher, to be delivered at the crusher on the road leading to the old Driving Park in said Town, subject to the inspection and measurement of the Superintendent of streets, William Connell, or Mr. Avard L. Anchor SHINGLE STAINS

The Best Preservative of Undressed Wood

Anchor Shingle Stains indefinitely postpone, if not absolutely prevent wet or dry rot. They show up the grain of the wood, giving delicately artistic finish, not only to the surface coated, but to the entire building.

We have used infinite pains in the selection of pigments best suited to combine with our specially treated COAL TAR CREOSOTE, and our success has been proportionate with our care.

Anchor Shingle Stains are being very largely used on the roofs, and in many instances also on the bodies, of the most attractive houses in our midst; they are also employed with excellent results from an economic standpoint on sheds and other outbuildings.

If your dealer cannot at the moment supply Anchor Shingle Stains, please write us to arrange for you.

MONTREAL HALIFAX ST. JOHN
TORONTO WINNIPEG 60

Union of Newfoundland with Canada Advocated By Harry J. Crowe

(The Daily News, St. John's, Nfld., May 2nd.)

The President of the Newfoundland Pine and Pulp Co., Mr. Harry J. Crowe, having arrived today to settle up the business of this season's logging operations, was requested by the leaders of the Orange Lodge and Fishermen's Union to address them on the burning questions of the day, including the order of Orangemen. Mr. Crowe consented and selected the above subjects.

The meeting was held in the new Orange Hall and keen interest was manifested by a very large and enthusiastic audience. The Chair, was occupied by the Rev. J. L. Williams, who, being a stenographer as well as a clergyman, took down the speeches in short hand.

Mr. Crowe, on rising to speak, received a warm reception. He complimented the Orangemen on their attractive Hall, and paid worthy tribute to the local men who performed such excellent workmanship in the construction of the building. He said "I am not an Orangeman, and I do not know anything about the mysteries of the Order, but I understand and believe it is a fraternal Society, united for promoting the temporal, social, mental and moral welfare of its members. In this I am sure it must accomplish a great good, especially in these outports, where you are deprived of so many advantages, and need to come together in these Societies for mutual benefit. I am sure that those who wear the green are doing the same good work in their sphere. We are all called into this world to do a particular work, and these different societies are necessary in order to meet the different needs, and to reach and help different classes, but we all can work in harmony for the good of each and for a common goal, and still cling to that good old British policy of "What we have we hold."

"As to uniting our schools, that is a different problem, the denominational school system being so deeply rooted in this country, and I am wondering if this be not largely the cause of education being so backward on the island, and your progress and the development of your resources being so retarded."

"Roman Catholics should have their own schools in Newfoundland, for it is required that the atmosphere of their religion should permeate their school life, but I think the Protestants should unite. There are many places on this island that can hardly support one good school, that have two or three denominational Protestant schools. They cannot offer proper inducements for good teachers the Primary, Intermediate and more advanced are huddled together for one teacher, resulting in the sacrifice of all. If the force in the community and the Government grants were united in one graded school, with a local inter-denominational Board of Trustees made responsible, subject to the supervision of the united Superintendents of each denomination, which would mean more frequent inspection, I venture to say we would be making a step in the right direction in the interests of education."

After referring to the narrowing effect it has on the young mind, by separating them from their fellows, in erecting these Protestant denominational walls in their schools, causing lack of charity and good feeling with his neighbors in after years, Mr. Crowe appealed to the audience in the name of Christianity, as well as education, saying: "try and be united on this important matter, so that the young brains in these outports, which are by no means limited, will be developed, and your children fill the position in life they are entitled to occupy."

Regarding the Fishermen's Union, Mr. Crowe said he hardly knew where he was on this subject. It came as a bolt out of a clear sky, and did not know whether it was going to strike him or the other fellow. Continuing he said—

"Mr. Croaker, the President and moving spirit of the Union, I have not yet had the pleasure of meeting but from what I can observe, he is a leader and a man of ability. He certainly has a large following, and is organizing and uniting the backbone of this island, namely, the fishermen, which, if directed in the right channels, and guided by wisdom, will be a power for good, in advancing the interests of labor, as well as all the fishermen of this island. I do not know the constitution of the Fishermen's Union, or their methods of carrying out their objects, but if it be to correct any real existing evils, and improvement along legitimate lines, which I believe is their intention, I offer them my whole-hearted support."

After touching on the question of Socialism, and saying there was fifty-seven different kinds of Socialists, of

which he was one, Mr. Crowe said he had no sympathy with the class that demanded equal position for all. The agitators for an equal division of property etc., were generally—"never do wells," those who ask for work and pray they won't get it, or try to impose on the employer, as well as their more efficient workmen by demanding equal wages to those who do double the work. This class belongs to the "Never Sweat Club," who don't believe in working between meals.

"I believe every man should have a square deal, without regard to class, and he should be given encouragement in proper wages, and in improving his surroundings and conditions so as to bring out the best that is within him and give him a chance to make good."

"I understand this Union talks of making heavy demands upon the lumbering and pulp industries of this island. I would suggest going slowly, for fear you might "kill the goose that lays the golden egg." Lumbering has not always been profitable in this country. The tariff and size of wood is much against us. The properties I have handled and operated, namely, about four thousand square miles, were operated at a great loss by my predecessors. These are Gambo, Gander Bay, Glenwood, Indian Arm, Notre Dame Junction, Norris' Arm, Millertown, Badger and Ft. Leamington properties. I say the previous owners of all these properties lost heavily, although in most cases they secured the limits free from the Crown, while we were obliged to pay high prices to the original owners and speculators. In all these properties we have greatly enlarged the operations and have expended over two million dollars in labour. Not one acre have we ever received from the Government. Great difficulties have been experienced in continuing these operations, which we have succeeded in doing, until the pulp and paper industry has been established on this island, which I think will bring in a new era of prosperity. But you must not make too heavy demands while these industries are struggling to their feet. We have advanced wages in the woods fifty per cent during the last ten years, and improved the food and other conditions of the men. I admit there is still room for improvement, which must be gradual, and I am desirous of co-operating with your Union, and shall be glad to receive your suggestions as to the best method of bringing about a more happy condition of affairs among our laborers."

"Now we have talked about the Union of our different Societies, union of schools and the Fishermen's Union, but there is another Union, one in which I am interested, and one I believe to be vital for the best interests of the Colony. Since I observe you have no guns, I will venture to mention it—the Union of Newfoundland with Canada. Unfortunately, Canada has been very much misrepresented, very much abused and very much misunderstood in this Colony. Perhaps some of the Canadians and Newfoundland politicians have both been to blame, but—"let us forget those things which are behind," and look forward to the possibilities that are before. I think the day has now passed when politicians will dare to insult your intelligence by telling you as they have, that Confederation means higher taxation, that the Canadian collector will call at your door for the tax on your pans of glass, old china, teapots, and tin kettles, and that your children will be used for wads in the Canadian cannon. As to taxes, which seem to be the one great bugbear against Union with Canada, I will challenge anyone to show that under Confederation they will be as high as they are in Newfoundland today."

"I have read in the debates in your House of Assembly during the last session, and it has never been disputed, that one-third of the money received by the wage earners of this island goes to the Government in taxes. This is not the case in Canada; it is far from it. That is why the thousands of Newfoundlanders who are now living in Canada today, are in most cases, in favour of Confederation. Every suit of clothes you buy you pay about forty per cent duty, or about four dollars on a ten-dollar suit. In Canada it would not be half this amount. So it is with all your hardware, glassware, and everything you import from the Mother Country. Canada allows British goods to enter one-third less than from other nations, of which, if united with the Dominion you would have the full benefit. Newfoundland has the same high tariff against the Mother Country as she has for foreign nations. If united with Canada, the duty of three dollars per ton on hay, and five cents per bushel on oats would be removed, as well as on all agricultural products. You would not be compelled to eat oleomargarine, for it would then be illegal to manufacture it in this country—you would have good fresh Canadian butter free of duty. Yes, and your woodsmen would have it three times a day as they all have it in

Canada, and not as your "Fishermen's Advocate" complains, that some of you are only getting your oleo once a day.

"Your debt is how over twenty-seven million, and I don't know where it is going to end. It is certainly increasing much more rapidly than your population, and it is now over one hundred dollars for every man, woman and child on the island. This would be taken over and borne by the whole Dominion. I cannot see what you can lose by being united with that great and prosperous nation. All that I can see you would part with would be your oleomargarine factories, your heavy taxes in duties and the burden of your debt. Perhaps there would not be so many titles and knightships distributed among your merchants and statesmen, but you fishermen won't mind that. You would have in place of that, the Marine and Fisheries Department of Canada spending their millions in dotting your coast with lighthouses, breakwaters, and the other advantages that fishermen of Nova Scotia have over you.

"They are now paying a cash bounty to every fisherman in Nova Scotia, according to their number and size of boats. I do not see how they can treat one part of Canada differently from another, and if you became a part of the Dominion, some arrangement, I believe, would be made for extending this bounty to you. The merchants of St. John's now complain that Nova Scotia fish merchants enter into competition with them and put up the price of fish. Have you anything against Canada for that? If you can be thus helped while outside of the Dominion how much more would be your gain if you were within? I think if the merchants are against Confederation because they fear Canadian competition in selling you goods and buying your fish, you should be in favor of it."

"What would be the greatest gain to you in being united with Canada, is the opportunity of securing the free entry of your fish into the markets of the United States, which you have been trying in vain to secure for the last hundred years. At the present time the United States is offering to allow Canadian fish to enter her markets free of duty. If you were a part of Canada, this offer would, of course, be extended to you, without giving up anything. Canada is to allow the United States free entry on fruit and other farm products, and many other articles of which you are large consumers, and you would be getting the benefit of the low prices on these articles. No interests here would suffer, because you are not producing them.

"Whether the Reciprocity Treaty between Canada and the United States is ratified or not, Canada and Newfoundland practically control the fisheries of the North Atlantic coast, (continued on page 7)

Five Roses Flour

Not Bleached Not Blended

MADE BY THE WOODS MILLING COMPANY, LIMITED, MONTREAL

Let's make a Jelly Roll—
With FIVE ROSES flour.

Its Strength and Fineness hold your batter together in the long well-greased pan.

Bakes evenly.

Smooth Texture—soft, golden Crumb, spongy, porous, yielding.

No holes, nor lumps to vex you.

And when you turn it out on the damp napkin hot and savory, and you spread the under side with "jell"—

It doesn't get soggy nor crumbly.

Roll it gently, carefully.

Not a crack—not a break.

Perfect Smoothness—a Perfect Roll—Yours.

Bake anything, make anything.

Use FIVE ROSES—bread and pastry.

Melting puff paste—flaky pie crust—crinkly fritters—

tooth some rolls.

FIVE ROSES for anything—everything.

Be flourwise.

NEW WALL PAPERS!

Here we are again with a larger stock than ever of new and leading designs in WALL PAPERS.

I buy direct from the largest mills in Canada, and in large quantities, and CAN QUOTE YOU VERY REASONABLE PRICES.

I have another large shipment to arrive Feb. 1st.

WRITE, CALL or PHONE and I will show samples in any part of the country.

A purely herbal balm; best thing for the tender skins of children, yet powerful enough to heal an adult's chronic sore; highly antiseptic; eases pain and smarting soon as applied—that is Zam-Buk. Remember it is purely herbal—no mineral poisons, no animal fats. Power and purity combined!

All druggists and stores sell at 50c. a box.

THE HOME

LITTLE THINGS THAT HELP WORKERS IN THE KITCHEN

A well-equipped kitchen spells comfort to the whole house. A kitchen indicates what the rest of the house is like, whether its ways are well looked after, whether it has a real home sense behind it, or is a mere stopping place. Everybody who loves home loves a kitchen even though she (or he) may have no desire to perform the work of it. There is no normal woman but who likes to get into one once in a while and make something or do something that pertains strictly to it, if it is no more than chocolate fudge or a salad dressing. A store that has kitchen utensils for sale is a fascination to men and women. In big cities there are stores devoted especially to this sort of thing and to them may be looked for the latest and best in this line. New things are constantly brought out. Some appeal at once by reason of their evident utility, while others require time to prove their worth and still others never attain to popularity because their practical value is never proved.

In the class of the first of these is a spoonholder that fits to the side of a pan or kettle and extends into the pan over the contents. The stirring spoon is laid in this, its handle resting over the edge of the pan, always ready for use and a place to put it always at hand. The holder is of course adjustable. Half a dozen are by no means too many to have on hand.

In the second class come the butter churns. When they were introduced they were thought to be a mere fad, and were taken up somewhat in that way, but have since established themselves as a permanent requisite. This is chiefly in those families that keep a cow or two and like to make their own butter. The churning is done quickly and daintily and the butter is thus insured to be fresh and delicate. The churns come in one, two, three and four-quart sizes.

The mayonnaise mixer is another indispensable novelty. Salads are used more and more on the American table, and mayonnaise, therefore, is increasing in demand. With many it has been a difficult thing to make it smooth, and unless it is smooth mayonnaise had better not be. With the mixer this difficulty is at once practically nullified.

The fireless cooker is one of those novelties that has come to stay. Not so much is heard of it now as was two or three years ago. That is because it has won its place and is busy extending its lines. Nearly every thing can be cooked in it, even to a sponge cake.

She who finds it beyond her powers to cut a slice of bread so that it will be no thinner at the bottom than at the top will welcome the bread slicer. It is a handy little thing that exactly gauges the thickness of each slice and makes one uniform all the way through.

The Maryland biscuit brake is not in great demand only because the luscious Maryland beaten biscuit is little known beyond the line that distinguishes the southern states from the northern and it has been supposed that only a colored mammy could make them. It is finding its way to the north so that even on a New England table may be found this delicate viand, hot from the oven. Buttered with fresh sweet butter and eaten with maple syrup from Vermont or with honey, the biscuits are without compare.

Lazy Susans are tongue-like scissors. They have handles like a small pair of scissors, and tongs as for lump

sugar. When opened, they shoot out like a Jacob's ladder for two feet or more. They are used for picking things up from the floor, a spool of thread, a spoon or whatever may have been dropped. They are more for sewing baskets than the kitchen, but are useful everywhere.

PLAN THE BOY'S ROOM.

The mother who is planning to include her boy's room in the spring doing-over, should remember that the ideal bedroom for a boy—from the boy's point of view, at any rate—has plenty of room in it, not much furniture, and nothing that is easily spoiled or upset. This is especially the case when the bedroom has to be, to a large extent, his 'den' as well.

If you want to inculcate neatness and personal pride in a little lad you must not, furnish his room with odds and ends. The joy of having a room of one's own is enhanced if the room has been especially fitted up for its proud possessor.

The ideal floor covering for a boy's room is, an experienced housewife says a really good coconut matting which fits the room, and is securely fastened down. This does not show the dirt easily, and it deadens sound. If this is too expensive a cork linoleum is the next best choice, with just one gaily-colored rug for the bedside. An ordinary carpet is impossible, and a bare floor with rugs—well, we all know what happens to loose rugs when boys are about!

The window curtains should be only the length of the window, there must be no trailing draperies anywhere. The boy should really be consulted about what color he wants—wall paper or paint to be; distemper or washable paint is preferable to paper. If you have a good picture or two that you know the boy will admire, put them up, in narrow wood frames, but it is wise on the whole to leave the walls practically bare and allow the occupant to decorate them as he chooses. A framed picture of the King draped with a small Union Jack will be welcomed by any Canadian boy.

Put up shelves for his books, and let him have other shelves or boxes or whatever he cares to contrive for his 'collection,' if he is making one. An interest in, or at least sympathy with that same 'collection' may be a passport to the boy's confidence. A satisfactory table for the boy's room is one of the kitchen variety, of suitable size, with one or two drawers in it. Covered with a washable linen cloth harmonizing with the room, and the legs stained or painted, it looks well, and yet when the cover is off it is available for all kinds of experiments.

Make such provision for the boy taking care of his clothes, boots, etc., as will leave him no excuse for being untidy, and then, beyond insisting on cleanliness and a reasonable neatness let him be to a great extent 'lord of his own domain.'

ROLL TABLECLOTHS.

In some of the best schools the pupils are now taught to roll tablecloths instead of folding them, since the folds in linen are usually the first places that show wear. The tablecloths are ironed flat and rolled while being ironed. It is best to use a table for the ironing board, as this gives more space. Start to roll the tablecloth as soon as a quarter of a yard is ironed and keep the roll directly in front, turning it as fast as the ironing is done. Sometimes thick brown paper is used to roll the cloth on, but it must be the width of the linen. A clever woman has procured sev-

eral mailing tubes, placed them end to end and covered them with fancy wall paper, pasting it on securely. This makes a firm foundation for the roll. Napkins should be folded once with the iron and all other folding done by hand so they will not wear in the creases.

SYMPATHY THE GREATEST NEED OF THE CHILD.

The child's greatest help in its education is found in the sympathy it receives at home. The parent who listens to the recital of the story of the discovery of America as to something new and thrilling lays the foundation for the love of history. The child whose first prize is received with enthusiasm by his parents is half way towards another. By believing in our children's abilities and stirring their ambitions—never their vanity—we get their feet on the road to success in their school.

Is there anything in all this world that is of more importance to you than good digestion? Food must be eaten to sustain life and must be digested and converted into blood. When the digestion fails the whole body suffers. Chamberlain's Tablets are a rational and reliable cure for indigestion. They increase the flow of bile, purify the blood, strengthen the stomach, and tone up the whole digestive apparatus to a natural and healthy action. For sale by all dealers.

REVOLUTIONARY ARMY NOW NUMBERS 27,000 MEN TO 23,000 WHO ARE LOYAL TO THE GOVERNMENT

Mexico City, May 17.—The city of Pachuca is quiet this evening, but business is not at a standstill. All the banks have been wrecked, the vaults are still intact. The state records and other governmental documents have been burned. Joaquin Gonzalez, the citizen who has been named provisional governor by the rebels, has been imprisoned by the governor. The rebels stormed the jail and succeeded in liberating the prisoners. The governor later was captured in the office of the jefe politico and he is now held a prisoner.

Washington, May 16.—President Diaz of Mexico probably will resign in two months, according to a telegram received at the White House tonight from Colonel Steyer, in command of the United States troops at El Paso. The telegram follows:— "Prospects for peace brighter today and armistice will probably be agreed upon in twenty-four hours. Madero demands four places in cabinet, one of them secretary of war, and fourteen governorships. Mexican government agrees to give him governorship and justice, and possibly one other, while the secretary of war is to be chosen jointly by the two parties. Madero will likely get ten governorships, Diaz to resign after new governors appointed, probably in two months. This is the latest reliable information I can procure."

The president's advisers indicate that the insurrecto army in Mexico now numbers 27,000 men, while the federal army is only 23,000.

J. M. Howell, a popular druggist of Greensburg, Ky., says, "We use Chamberlain's Cough Remedy in our own household and know it is excellent." For sale by all dealers.

OUTDOOR SLEEPING TONES THE NERVES.

The latest health fad is to 'sleep out' either on balconies or in tents, and many persons are having butts erected in their gardens with one side open, or screens fitted to their balconies for this purpose. They are not doing it because they are consumptive or anything like that, but simply because they think it is the finest thing in the world for nerves, and because it tones up the whole system.

"The human system wants plenty of oxygen," says a physician who is interested in the movement, "and the time when the air is best is in the early morning, when the air in bedrooms is at its worst, because it has been breathed again and again in the night. Huts are generally made so that they can be closed in to keep the winds out, but, though persons usually close them at first in windy weather, in a few days' time they leave them wide open, wind or calm. The whole idea is to breathe perfectly fresh air all the time one is sleeping."

Another physician, however, offers a warning "not to take to sleeping out even in summer unless you have been accustomed to plenty of air in your bedroom. It is only the hardy out-of-door man who can fold himself in a blanket and go to sleep under the stars with impunity—at any rate, without special preparation. But healthy persons can train themselves to do this, and the gain to overworked nerves can hardly be overestimated."

For soreness of the muscles whether induced by violent exercise or injury, Chamberlain's Liniment is excellent. This liniment is also highly esteemed for the relief it affords in cases of rheumatism. Sold by all dealers.

Constipation is the root of many forms of sickness and of an endless amount of human misery.

Dr. Morse's Indian Root Pills,

thoroughly tested by over fifty years of use, have been proved a safe and certain cure for constipation and all kindred troubles. Try them. 25c. a box.

Union of Newfoundland with Canada Adjourned By Harry J. Crowe

(continued from page 2)

upon which the United States must rely for their future supply. If you are united with Canada, then it would be in the hands of one Government to dictate terms to Uncle Sam, but at the present time he can put up one country against the other. He can say to Newfoundland, "if you do not allow me certain concessions without my giving you anything in return (for our friends to the south of us like both ends of the bargain and a slice out of the middle if they can get it), we will get them from Canada" and vice versa. The same argument applies to our forest resources. The United States are endeavoring in every possible way to get some hold on this raw material for the paper mills, and have made overtures to Newfoundland and Canada for this purpose, but we want the wood manufactured into the finished article, so that the largest amount of labor will be left in the country that owns this raw material of wood, which is the greatest asset any country can possess.

"Does it not appeal to you as being good business for these countries to unite in the development of their resources, with which Canada and Newfoundland have been so richly endowed? Why be in opposition to each other, and allow outsiders to enter into negotiations that will prevent us from receiving the full benefit of our rich heritage?"

"I received a great deal of abuse in your press during the last elections on the charge of trying to sell the Island to Canada. While I am a Canadian, I have staked my all during the last ten years in this country. Every dollar I own or can secure from my friends or outside capital is invested in this country, and it was because I thought it was in the interests of Newfoundland, that I had the presumption to use my faint efforts to see what terms could be secured in connection with this Union. Why should Canada need this Colony or desire a Union, if you do not wish it? She has more territory now than all the United States. She has almost unlimited wheat fields, waiting for the hand of man, which will produce boundless wealth. She is now the largest producer of nickel in the world; her silver mines at Cobalt would make a nation wealthy. She has vast deposits of coal east and west; her revenue is increasing with leaps and bounds, until it is over one hundred million dollars a year. I ask you gentlemen, which country would gain most by the union? Your people go to Sydney for higher wages, and where they have more advantages of paying heavy taxes.

"No, Canada does not seek union against your will; on the contrary, as a sister colony, she will offer you her best support whether you come into the Dominion or not, which was demonstrated at the recent Hague Conference in connection with the Fishery Arbitration, in which Canada had no quarrel with the United States. It is only a few days ago that I received a letter from Sir Wilfrid Laurier, in which he said Canada has no opposition to offer to a trade arrangement between Newfoundland and the United States, similar to the one which they themselves obtained. The charge that Canada is disposed to urge Confederation, even though the people of Newfoundland don't want it has as little foundation as the charge that she would use your children as wads for the Canadian cannon. It is purely sentiment and nerves that is the richest asset of a Dominion that is the richest on the face of the globe, and the brightest gem in the British Empire.

It is easier for the Mother Country to govern five Colonies than six. Cape Colony, Transvaal, Orange Free State and Natal have united. Therefore let us help consolidate the Empire, and facilitate the mission of the English speaking nations, in advancing civilization, preserving peace and promoting the welfare of all mankind."

The Chairman of the Fishermen's Union, Mr. James Andrews, next addressed the meeting, and expressed his hearty support of the arguments advanced by Mr. Crowe in favor of Confederation, but said, regarding his reference to Fishermen's Union killing the goose that laid the golden egg, that he would like to get some of the 'golden eggs.' Here Mr. Crowe interrupted, saying he was perfectly satisfied, provided he did not break the eggs in his effort.

Mr. Jonas Rice, W. M. of Orange Society, expressed his views on Confederation. He was in sympathy with it and said he hoped it would come soon.

Mr. George Andrews also spoke agreeably with the previous speaker, meeting expressed its appreciation of an motion of W. H. Bages, that the speeches by a vote of thanks, to which Mr. Crowe replied.

"God Save the King" being sung, a very successful meeting came to an end. Point Leamington, S. W. Arm, New Bay, April 13th, 1911.

NEW HEALTH THEORY.

"Massage your solar plexus" is the newest rule of health as laid down by Robert King in a lecture delivered by him at the Austace Miles Normal Physical School, Charing Cross. For the sake of those who might be unacquainted with physiology, Mr. King explained that the solar plexus is the great sub-brain of the human body—between the stomach and the spine, whose function it is to control such unconscious operations as respiration, circulation and digestion. The special significance of the solar plexus lies in its extreme susceptibility to emotions.

"Directly the emotion of fear is felt," was Mr. King's theory, "the solar plexus begins to shut up, its capacity for passing on the vital forces becomes limited, and the whole of the nervous system drops. With the emotion of joy or pleasure the solar plexus expands. When a person is thoroughly enjoying a good laugh it is expanded almost to its utmost capacity, with the result that the whole nerve tone of the body rises up."

"Thus the lecturer arrived at one of the first of his rules, which is to banish all forms of morbid thoughts, which he declared affect the solar plexus injuriously. As an example, he instanced the idea at the back of the phrase, 'We are miserable sinners.' Constant dwelling on this idea must tend to depress the solar plexus, and through it the physical body of the sinner. On the other hand, a realization of the great conception 'God is Love' tends at once to an expansion of the solar plexus and the vitality of the system. In addition to this mental treatment the important organ so frequently named is often in need of physical assistance.

"What we must do is to wake up the solar plexus," Mr. King declared with conviction. In many people, he remarked, the solar plexus is partly atrophied. Such unfortunate creatures may be said to exist rather than to live. They merely crawl along from day to day. For such people—and they make up about eighty per cent. of folk of middle age—there is health and vigor waiting if they will but follow the injunction, 'Massage your solar plexus.'

"It is possible to apply the massage with the hands, Mr. King explained, but nature has provided a far more efficient instrument in the diaphragm—the great muscle that separates the chest from the abdomen. By deep breathing the diaphragm is given a gentle motion which causes it to rub and press upon the solar plexus, which in turn, energizes the entire body.

"Learn to breathe properly, learn to think joyously," said Mr. King, summing up his gospel. Fitzsimmons, the famous pugilist, discovered the uses of the solar plexus many years ago, and developed a punch which which reached and jarred that organ so much that apparently it shut up altogether. At any rate, his opponents had had enough."

MINARD'S LINIMENT CO., Ltd.

Gentlemen,—In January last, Francis Leclaire, one of the men employed by me, working in the lumber woods, had a tree fall on him, crushing him fearfully. He was, when found placed on a sled and taken home, where grave fears were entertained for his recovery, his hips being badly bruised and his body turned black from his ribs to his feet. We used MINARD'S LINIMENT on him freely to deaden the pain and with the use of three bottles he was completely cured and able to return to his work. FAUVEUR DUVAL Elgin Road, L'Islet, Que.

"The Only Thing That Will Relieve Neuralgia."

The piercing pains of Neuralgia, which often follows a bad cold or La Grippe, are frequently almost unbearable and few medicines afford any relief to the sufferer.

"I am a rural mail carrier and have been a user of the Dr. Miles medicines for years. Dr. Miles' Anti-Pain Pills can't be beaten. They are the only thing I have found that will relieve my neuralgia and I have tried most everything, besides medicine from the doctor. I am willing to tell anyone what the Anti-Pain Pills did for me."

CHARLES HILDERBRANDT, Box 205 Woodville, Ohio. If you, like Mr. Hilderbrandt, "have tried most everything" in vain, why not do as he did, fight your aches and pains with Dr. Miles' Anti-Pain Pills. Let the pills bear the brunt of the battle. No matter how stubborn the contest, they will come out victorious.

Dr. Miles' Anti-Pain Pills stand on their record, which is a long list of cures extending back a generation. Druggists everywhere sell them. If first package fails to benefit, your druggist will return your money. MILES MEDICAL CO., Toronto, Can.

REAL ESTATE

FOR SALE OR TO LET

Mrs. Edward Hudson and baby, of Hillsburn visited relatives here last week.

Services here in the Methodist church Sunday at half-past two, Rev. Mr. Davis, pastor.

NEW "PEACE" MAGAZINE.

"The Canadian Conciliator" is the prospectus number of a proposed monthly or quarterly magazine to be devoted to the interest of world-wide peace.

This prospectus number contains interesting extracts from speeches and articles by men famous as advocates of peace: Mr. Aequith, Lloyd George Hamilton Holt, Norman Angell, author of "The Great Illusion," and many others. It contains also brief descriptions of the different Good-will Organizations of the World, and some carefully compiled facts and figures which show clearly to what greater advantage the efforts expended in preparing for war might be turned.

There are, in addition to this, some reflections on war and peace, with news relating to international movements.

It is possible for Canada to exert a unique influence for the world's peace; it is time that we think of ourselves as citizens of the world, and think of everything in world-wide terms. May the 21st and 28th have been suggested as Peace Sundays, and it is hoped that they will be observed in every city, town and village in Canada.

Those who wish to support such a publication and take part in forming a Peace Society in Canada should write to:

MR. C. H. KEYS,
225 Confederation Life Bldg.,
Toronto, Ont.

Port Wade

John W. Snow has sold the S. S. Geneva to Messrs Colwell and Son, of St. John. Quite an exciting race took place on the Basin Saturday between the boats Geneva and Port Wade from the pier to Digby, the Port Wade winning at three minutes.

Fred Connor returned to Boston Saturday to stay the summer.

Carleton Nelly arrived here from Florida on Saturday. He reports it a splendid country for the winter.

The fishing schooner 'Wilfrid L.', Capt. Johnson, is here at anchor.

Mr. I. Matheson, of the Matheson Iron Co. of New Glasgow, was here Friday inspecting the work of the past month.

Potatoes are scarce in this vicinity selling at one dollar per bushel.

Miss Lena Keans is very sick at Middleton.

Mrs. E. Keans is expected home from Boston this week. She has been quite ill while there on a visit.

Capt. Wm. Ryder returned to Boston Saturday after a stay of some weeks with his family here.

C. D. Arthur and wife have moved to New York to stay indefinitely.

Harry Runnels, of Digby spent Sunday with friends here.

George Morrison at the St. John Hospital, is slowly convalescing from the recent operation for appendicitis.

The small boy and some of the larger are enjoying the pollock fishing now at the pier, where they are seen in abundance.

Albany

Messrs. Gifford Oakes, of Kingston, and Robert McKay, of Middleton were the guests of Mr. and Mrs. Harris Oakes on Sunday, 14th.

The Aid Society met last week with Mrs. Lemuel Murray.

Miss Dora Kniffin has gone to Lawrencetown to do dressmaking.

Mr. and Mrs. Harvey Kniffin and little son, Chester, of Dorchester, Mass., have come to live on the homestead with Mr. Kniffin's mother.

We welcome to our community Mr. and Mrs. W. H. Oakes and daughter, Carrie, of Nictaux, who have come to spend the summer with Mr. Oakes' brother and wife, before leaving for California, where they expect to make their future home.

Mr. and Mrs. L. R. Fair and daughter, Alice, also C. W. Fair, of Dartmouth passed through here on Friday 15th. They are spending a few days at their camp at the Cross.

We are sorry to report that Mrs. F. A. Hubley (who with her husband, spent last summer in Albany), is now in a very critical state with tumor of the stomach. We understand she is soon to undergo an operation in Halifax. They had just got comfortably settled in Shelburne, where Mr. Hubley is to have charge of a church this summer.

No promotion was ever honestly earned without plenty of hard work. The difficult thing is to call attention to yourself. Ordinary plodding will not do that. But extra effort, keen interest in the affairs of the concern for which you are working and determination to do a little more than your share toward making them prosper will attract attention. The man who hires other men is looking for employees who will be able to fill high places. He cannot afford not to recognize their ability substantially when he finds them.

Give the New Meat Market a Call

E. S. PIGGOTT

The May number of The Athletic World is a particularly strong one, both in illustrations and reading matter. This magazine is serving a national purpose in the field of Canadian sports. Its manner of covering the special interests of all branches from coast to coast is thorough and exhaustive. The editorial department is universal in scope and comprehensive in treatment. This periodical is invaluable to all followers of general outdoor life who desire an authoritative work on things in the world of athletic sports.

CARDING WOOL

Carding will be done as usual at Leguille carding mill. Send your wool to the same place in good shape for carding, as I want to do the work satisfactorily. Any one who wants a certain part of their wool made into hats should write on tag on the outside bundle as well as the inside one.

Yours truly,
JOHN CARR.
