UPRISING IN INDIANS

Some of Uncle Sam's Regular Soldiers Killed by Redskins, Who Attacked Them From Ambush—The Troops Are At Present Entrenched, But the Situation is Grave—The Fight Was a Hot One—Indian Losses Unknown.

Minneapolis, Oct. 5.—A battle took place this morning between United States regulars, under Gen. Bacon, and Barisland Indians, in which four soldiers were killed and nine wounded. How many Indians were killed is not at present known. Gen. Bacon had gone to Bear Island to enforce the authority of the United States marshal in that district. The marshal had arrested several Indians for various offences, but the other Indians on the reservation rescued their brethren and would not give them up.

According to a despatch to the Journal from Walker, Minn., Gen. Bacon, with his force of 100 regulars, who were on small river steamers, reached a point close to Bear Island early this morning and proceeded overland towards the Indian reserve. During a halt, and while preparations were being made for dinner, the Indians opened fire on the regulars. The Indians were concealed in the bushes, and the soldiers at once sought shelter themselves. The firing at once became general.

A body of Indians, said to number 150 or 200, made a rush towards several deputy marshals, who had two prisoners in their possession, but the regulars' heavy fire beat them back. Six Indians were seen to fall during the rush. The Indians then ran to the shore and fired volley after volley at the steamers that had carried the troops. Inspector Tinker, who was on the tug boat Chief, was shot through the leg, and the steersman of the Jennie was shot in the arm.

Later reports say the regulars are stretched, and will make no further move until reinforcements arrive.

Washington, D.C., Oct. 5.—Official despatches received here tonight brought the startling news of the sudden realization of an Indian rising of no less than ordinary dimensions. These despatches began coming about 6 p.m., two of them coming to Secretary Bliss, who as head of the Interior Department, has charge of General Griggs, and a third to the United States marshal at the seat of the uprising. The first despatch to Secretary Bliss was as follows:

Walker, Minn., Oct. 5.—Secretary of the Interior, Washington: "The Indians at this point, on the mainland of North Bear Island, opened fire on troops under command of General Bacon without warning this morning at 11:30. I fear the army in the field is not strong enough to subdue the Bear Island Indians. How many are hurt on their side cannot be told. A large force should be sent to the island."

Philadelphia, Pa., Oct. 5.—The hearing of United States Senator Quay, his son, Richard R. Quay, and Charles H. McKee of Pittsburgh, on the charge of using state funds in the People's Bank, began before the Senate today. The room was crowded with prominent politicians, lawyers and others. It was the general expectation that a hearing would be waived and the cases disposed of in a few minutes. This, however, proved to be an incorrect theory, as counsel for the defendants made a hard fight, on the point of insufficient evidence to establish a prima facie case, and combated the prosecution at every point.

Minneapolis, Oct. 5.—A special to the Tribune from Walker, Minn., says in regard to its staff correspondent at the scene of the Indian trouble: "Have not heard of your man Denton since the fight began at 11:30 a.m. The last I heard of him he was among the Indians, with Brill, and was running, and the Indians firing at them. I fear for his safety, as well as for General Bacon and his men. The situation is very grave. There has been a special train ordered here from Brainerd by the County Commissioners, with arms and ammunition. We have just received information from Washington that more troops are on their way here. Every one is very much excited, yet the situation is such as to warrant it."

THE VIGILANTES ARE AFTER HIM.

HEAVY BANK ROBBERY

Sixty-Two Thousand Dollars Missing From the Vaults of the Winnipeg Branch of Moisons Bank—The Napanee Robbery Discounted—Police and Officials Are Dumb—A Great Sensation.

Winnipeg, Oct. 5.—The Moisons Bank in this city has been robbed of a large sum of money, said to be in the neighborhood of \$60,000. The bank officials and solicitors are very reticent in regard to the matter, although they do not deny that the bank has been robbed. The details of the affair are kept from the public.

Mr. T. B. Pheoep, manager of the bank, left yesterday morning for Russell on a shooting trip and Mr. F. McEeth, accountant and acting manager of the bank during Mr. Pheoep's absence, was seen by a reporter. His statements were extremely guarded. For any inquiries of such a nature, he said, I must refer you to the bank's solicitors, under whose direction I act during the absence of the manager. The robbery was not discovered until yesterday at noon, so that it can safely be inferred that the safe was not broken into, or any evidence left in the building by the robbers.

In fact, it is asserted that the vault was opened by the regular combination. This adds much to the mystery, as only one man in the bank knows the whole combination, each clerk who uses the vault locking a portion. It is said that the money stolen was in bank notes, and the robbery is believed to have taken place since Sept. 28.

It is not impossible that arrests will be made before another day goes by. The absence of any official statement is particularly accounted for by apparent lack of authority in the part of both acting manager and solicitors to give out any information. They both declare that they have no authority to make anything public.

Mr. Wolferstan Thomas of Montreal, general manager of the Moisons Bank, confirms the report of the robbery. He was notified early this morning that \$62,000 had been taken. Out of this \$25,000 was in negotiable notes, so that \$37,000 is the real loss of the bank. Manager Pheoep has been communicated with and will be back in the city this evening.

Instructions, in consequence of the robbery, have been issued from the head office of the bank in Montreal, to the various branches, to keep a man on guard at all times over the vaults until further notice.

IRON MASK WINS THE SUIT

Centre Star Loses the Big Rosland Case.

Gooberham - Blackstock Syndicate, According to Latest Wires, Suffers an Adverse Verdict at the Hands of the British Columbia Courts - About Monte Cristo - Stocks.

Messrs. Fox & Ross yesterday received word from Rosland to the effect that the Iron Mask had won the suit with the Centre Star. The first notification came from the firm's Mr. Ross, now in the West, and later Mr. Fox wired for and received confirmation of the result from the secretary of the Iron Mask Co.

This will be interesting news to the eastern holders of the stock. One effect of the decision may be to further interfere with the proposed purchase of the property by the Gooberham-Blackstock syndicate, for, having won the action, the Iron Mask people may hold out for a higher figure than they have hitherto asked. It will be remembered that the dispute in the action was as to the right of the Centre Star owners to follow their vein on to the Iron Mask ground.

Monte Cristo. Advice from the west is to the effect that holders of Monte Cristo stock should not let go. The present slump in the stock is said to be caused by the decision of the management to postpone shipping until the spur line is run up to the mine. The body of ore in the property is said to be looking well, and a rapid advance in the stock is predicted.

Bright Outlook for Keystone. Rosland Mine, Sept. 23. There is considerable demand for Keystone both at home and abroad. The reports from the property of the Keystone Company are to the effect that the ore body is getting better with depth, and the outlook is that the Keystone will make a good mine.

Mr. Campbell tells "good roads" has just returned from a trip to Pelee Island, where he inspected the roads and addressed the people on Friday evening. The roads there are unsatisfactory, but more will be bought to work the quarries, where a serviceable stone has been discovered. Pelee Island is a pretty place and is going ahead. About \$30,000 has been spent during the last three or four years in reclaiming marshes, in erecting a drainage system, and in planting wheat and other grains. One of the questions before the people is the proposed to amend statute labor. A vote will be taken at the next municipal election.

DONE IN BURNT CORK.

The Variety Boys seem bent on having a Musical Show for Halloween in the Pavilion. There is a chance that the stalwart blue-coat may this Halloween be enabled to devote all his attention to the deprecatory annual. In former years the copper had dreams for weeks before this event, for he knew the students would be out, and worse luck, he would have to be out also. The average blue-coat does not mind employing his powers on a drunk and disorderly or a pickpocket or other criminal, but what he does dread is the students. There is, however, a move on foot at Variety to supersede the time-honored visit to the theatre, together with the subsequent happenings, and instead hold a smoking concert and a musical show on that night in the Pavilion. A meeting to discuss this was held yesterday in Variety gymnasium, but no definite conclusion was arrived at. A further meeting will be held to-night in all other colleges will be present, and the merits of burnt cork and the delights of a big caned and a musical show, each to each, will be discussed. However that may be, the copper need not get cocky, for if it is decided to hold the smoker there may be a hot time after also. One proposition which has since been recalled, was that the students should persuade brownies to do the show, and the night put the finishing touches to the City Hall, for it is asserted that, contrary to public opinion, the motto of the boys "No protection, no money" is to be destroyed. However, that shall be known one day.

"JUSTICE IS BLIND."

Mackenzie Sent to Jail for an Offense That He Could Not Have Committed-Released. On Tuesday Robert Mackenzie and Robert Pickett were arraigned before Police Magistrate Denison, charged with stealing a quantity of tobacco from the G.T.R. freight sheds. The evidence against Pickett was not satisfactory, and he was discharged. Detective Coburn of the Railway Service swore positively that he knew Mackenzie and had seen him in the sheds at the time of the theft. Mackenzie was sentenced to 18 months, as his previous record was not any too good. Yesterday Mr. T. P. Bohne paid a visit to the jail to see another client, and he saw Mackenzie. He told his counsel that he was in jail at the time of the theft. The book was examined, and it was found that Mackenzie's story was correct. Police Magistrate Denison has wired the facts to the Minister of Justice, and Mackenzie will be released at once.

HOLIDAY ON COPPER.

Crown Lands Agent Speaks of Parry Sound Copper. Mr. F. Holliday, Crown Lands Agent at Parry Sound, was a visitor at the Parliament Buildings yesterday. He thinks the discovery of copper in Foley Township, Parry Sound, is one of the important things. The McGowan mine was discovered on the banks of one of the small lakes in that locality, and in a recent assay gave \$3575 worth of copper. The vein is associated with copper, the latter forming 65 per cent, and the outcropping is from 12 to 15 feet wide. The lead extends over 200 yards and is thought to be worth half a million.

Where is It Going to End?

Editor World: I'd like to see a discussion in your columns by business and professional men of the daily raids, hourly ransacks, made on them by women and men, boys and girls, collecting for charitable purposes, and selling situations. It's got to be at most unbearable. The agricultural shows and plowing associations within 100 miles of Toronto, and all joined in the same way. We have so many charity establishments that all the province seem to dump their wackings on Toronto, and the more the evil grows the more men and women in the city seem to turn up, willing to go about with a book seeking subscriptions to maintain them. Why don't the business men stop their own wives and daughters doing this thing? My plain and outspoken opinion is that if the agricultural societies, the trades unions, the militia companies, and all such wish to give prizes, they should raise them among themselves, or by votes of public money. But why should the business men at the centre of the city, civic representatives and members of the Legislature be dogged to death in this matter? Let us have a discussion of it.

Anglican S. S. Program.

MILLIONS IN CORNSTALKS

A New and Gigantic Industry to Benefit the Farmers.

Alleged Discovery That Paper Can Be Made From the Stalks That Are Annually Thrown Away - Cornstalks Made a Hit, Why Not Cornstalk Paper?

Rockford, Ill., Oct. 5.—After months of patient investigation, entailing the expenditure of many thousands of dollars, A. G. Winter, superintendent and chemist of the Marsden Development Company, whose plant is in this city, says he has solved the problem of the cornstalk as a commercial and manufacturing commodity.

The Department of Agriculture at Washington has carefully watched the experiments of the Marsden Development Company, and H. W. Wiley, chief chemist of the Department of Agriculture, is expected in Rockford on Monday for the purpose of carefully looking into the new industry. Heretofore the stalks, or outside of the cornstalk, has been regarded as absolutely useless, but by Mr. Winter's experiments the stalks have become the most valuable part of the stalk from a commercial standpoint.

Cornstalks Are Stockholders. The cornstalk has been adopted for paper purposes, the pulp has long been used in the manufacturing of cellulose. The Marsden Development Company, of which the chemist, the famous shipbuilders, are the chief stockholders, was the first to bring the cornstalks as a commercial commodity to the front cellulose manufacturing industry.

According to Mr. Winter, the Marsden Company has spent thousands in the purchase of cornstalks for the manufacture of paper. The chemist's experiments began experimenting along the line of paper manufacture. The stalks were easily manufactured into a number of products. The pulp is always a commodity, but what has puzzled the market is the fact that the stalks do not with the shive. We think we have solved the problem, and feel certain that before many weeks we will be able to place on the market an article not only cheaper, but in many particulars superior to anything in all lines of paper that are now successfully manufactured.

Turning Out the Product. We are not only making a superior paper and a splendid cardboard, but within a few weeks to be able to turn out something in the line of fancy products superior to anything on the market.

The stalks are easily manufactured into a number of products. The pulp is always a commodity, but what has puzzled the market is the fact that the stalks do not with the shive. We think we have solved the problem, and feel certain that before many weeks we will be able to place on the market an article not only cheaper, but in many particulars superior to anything in all lines of paper that are now successfully manufactured.

Invention Like the Cotton Gin. The discovery by the Marsden Development Company of the process by which paper from cornstalks, which, according to the officers, will reduce the price of ordinary newspaper, is a discovery of practical importance to the paper industry. It is the invention of the cotton gin.

How wide a revolution the discovery will work may be understood from the statistics which the daily newspapers of the United States alone can furnish. Last year the daily presses alone consumed \$20,000,000 worth of white paper manufactured from wood pulp. This was but a part of the total consumption of cheap paper made by this process and used by other publishers and commercial institutions.

Boon to Newspaper Readers. The present method of making paper was looked upon as a great benefit to the reader. The invention promises to make the newspaper that all the millions who read may buy is a gift to the people by the man who found the process, for cotton and the pulp of white pine and cypress. Besides it gave an added value to the bound forest and marshes of the country, and set a thousand acres ringing with the trees where not an arm swung before. No diminution of the profits of the pulper was observed, for cotton and the paper fatters are as valuable now as when the paper mills were supplied by the junk men. The discovery of the pulp process.

ALD. HALLAM AT HOME

After His Trip to England and Europe—Gallant John Hallam Presents a Bouquet.

After a pleasant three months' tour of England, Scotland, Germany and France, Ald. John Hallam has returned to Toronto. He will resume the even tenor of his way and try to forget the sights he saw in his Paris.

The World found Mr. Hallam enveloped in correspondence and feeling greatly interested in the news of the day. He left Liverpool on the 10th of last month, sailing by the steamer Scythia. When eighty miles out from Queensland the ship's machinery broke down and the vessel was forced to run at half-speed the entire trip, taking 41 days to reach New York.

Mr. Hallam refused to say anything about his pleasure from visits to technical schools and investigation of sewage disposal system, until he had reported to the council. He has two trunks full of information, which he will spring upon them in a day or two.

While away Mr. Hallam received an invitation from a firm in Schomburg, Germany, which he dealt with for over 30 years, to attend their exhibition in London. He reached Schomburg on a Sunday and found the firm in a delightful. The works were so well arranged that the nice things the alderman said to them that they presented him with a bouquet over three feet high, which he in turn had the pleasure of presenting to a young lady who was to attend a fancy ball that evening. The alderman did not say whether the young lady wore the flowers or not.

Mr. Hallam returned to Toronto on Monday. He will resume the even tenor of his way and try to forget the sights he saw in his Paris.

THE FIRE OF YOUTH.

Have you never experienced the strength of nerve, the courage, self-confidence and energy that are the characteristics of the well-developed man? Have you lost the fire of youth by dissipation and excess? Do you look with envy upon the man who has preserved his health intact? Why go on from day to day realizing that you are losing your nerve force when you can see a cure within your grasp?

The big bank robbery in the one topic of conversation in the city yesterday.

The swag got by the Napier brothers, the notes taken as a "reserve fund," being kept in department, and not handled at all.

An order has been issued by the Ontario Bank to take the numbers of the possession. By its means missing notes can be got.

It is very likely the bill will be circulated before the mis are ascertained.

A Capable Manager. Mr. T. B. Pheope, manager of the bank, was made of the robbery in a few years ago.

He in the highest terms, and his Winnipeg was a tribute to his ability.

No notification of the robbery received by the local members of the Bankers' Association.

They are bound to do all in their power to trace the missing notes, and clearing house certificates will be turned up, as they are never used except in business.

For a man to possess \$100,000 of stolen money, and to be a little suspicious, of the \$37,000 little hope of recovery.
