According to Mayor Wenige, a conference in Montreal two weeks from today may center around improvement of the city's chances of getting a joint depot for the railways running into London. At any rate Sir Henry as promised the mayor that a meet late for the purpose of discussing

the railway plan of L. Couchon town planning engineer, retained some years ago in connection with the mion station project. The plan came to the city clerk's office without comment or explanation.

An elevated stretch of railway ouit along Colborne street from the Canadian Pacific to the Canadian National tracks, with a union station built just north of Dundas street, is Mr. Couchon's plan. would come into the city from the east or the west, run on their own tracks to Colborne street, and then at Dundas and proceeding northward on the Canadian Pacific right-of-way. The Canadian Pacific trains would follow a similar principle, and as the tracks of the two roads run closely together at the eastern and western extremities of the city no great difficulty is anticipated in that part of the route.

part of the roufe.
Railwaymen point out that, while there might be a slight loss of time caused by this lengthened route through the city, neither road can afford to forsake its right-of-way, with warehouses and factories built up all along the tracks.

NOT SNOBBISHNESS

Has Only Desire To Avoid Pests and Keep Own Counsel.

As Told by Him to Charles E. Parker. CHAPTER VIII. Why Nurmi Works Out Alone.

Paavo Nurmi's custom of avoiding contact with athletic rivals has been the subject of lengthy comment among sports writers in this country. In conducting his preliminary workouts when his rivals are not on the track, he has been accused of uppishness. It has been the opinion of some that he has a swelled head.

That opinion is far from correct. Paavo's aloofness is traceable to no one cause. His inability to speak our language has something to do with it; a habit of keeping his own counsel, his since boyhood, is another factor; a desire to avoid the pests who would continually impose upon who would continually impose upon who would continually impose upon one of his name and fame is still an-other, and certain warnings brought back to Finland by its representa-tives at the 1912 Olympic games make a fourth item.

Those warnings had to do with

the conduct of certain of the American competitors in the Stockholm

The Finns entered the Stockholm games determined to make the best possible showing in the events in which they were proficient, and determined also to learn from foreign athletes all they could of the less familiar track and field contests, and they looked to the Americans their best instruction. But in their eagerness, earnestness and innocence they were made the subject of siderable horse-play. The practical jokers among the Yankee athletes gave them the weirdest of advice, taught them field event form which reduced rather than improved their skill, and then joined in many a hearty laugh at their expense. tonight. Because the voungsters were in weak group and therefore were given little opposition, the 75's grabbed most of the attention. Now that the latter are a shot-out battery and have a wheel off here and there, the youngsters carry on their sturdy shoulders all the hopes of London in

ockey this season.
They meet Paris here in the return game tonight-their first serious engagement since the exhibition games staged here early in the season. Local fans figured that if the locals came out of Paris Friday night with a two-goal deficit they'd prove them-selves a smart team. They came out six goals better than that after displaying phenomenal hockey. Their four-goal lead looks good, but against the Parisians it isn't any too large. Cnly a remarkable display of goal-keeping by Fries kept the Paris sharp-shooters from counting, the London officials say. And Fries had a good defence in front on him. The coaching the juniors have receivedand what is more important, listened to this season—was never more in evidence than it was Friday night. JUNIORS GRAB THE SPOT.

There have been lightweights who could hit as hard as heavyweights, but there have been few heavyweights who could show the footwork of the lighter divisions.

That is just about the difference between junior and senior hockey, when both are at their best.

The London juniors invaded Paris Friday night figuring they might have to fight their way out of the rink. Who spread this propaganda? Just rumor. It didn't bother the locals. That sort of thing is very encouraging, where juniors are concerned.

WISE-CRACKING MARATHONERS.

The Dugan and Dixon team of the office patter as follows: "Say, Longboat, I can't beat this guy Paavo."

NO ARGUMENT.

Lou Marsh writes: The two cleanest forwards in the Big Six are Norman Himes of Galt and D'Arcy Leamy of London, and the two cleanest defence men are "Dad" Ashley of Preston and Bill Starkings of London. It is hard to select the best goalkeeper in the league. They are all good, but every one of them has had an off night. when they are off they are terrible. The best defence in the group—that is defensively and offensively—is the Fraser-Kitchen defence of the Falls team. Both are big fellows and are very steady defensively, while both rush well. Fraser has speed and Kitchen has a lovely shot. The best pro defence prospects in the league are Starkings and Kitchen. the faster on a rush, but Starkings has a great "bean" and carries the puck right close in for most of his shots. Leamy of London and Kelterborne of the Falls would both make good as forwards in pro. hockey, for both stick to their positions and both are heady and speedy. Leamy is the better goalgetter, but Kelty is the better checker. Lowrey of London, Cole of Stratford, and Art Gauthier of Galt are the shrimps of the group. They are all featherweights, and all peppery and fast, and they check all over the ice. Lowrey and Gauthier are just kids and they are inclined to roam. Cole is older and sticks to his position fairly well. He isn't quite as fast as the other pair.

There doesn't seem to be much room for argument n this. It shows that most of the fans are experts, too, because a vote of the public About July 15 would be a safe time to make a selection of the

F. TALBOT STARS

A full house saw the London Thistles rop their first home game and the second of the L. O. B. A. season to the oronto Ladies 19 to 15 at the Y. M.

The Thistles were by no means disgraced, for they put up a great fight and gave the fans satisfaction with their splendid showing against the Ontario champions. The visitors lived up to all of experience by going right out at the first and getting a lead that was enough o carry them through for a win, for after the first quarter they were outplayed 9 to 6 by the home team. At times it looked as if the locals were going to carry away a victory. In the dying moments of the game three baskets by Bessie Graves, Ann Hazel-grove and Audrey Walker made the game a battle of minutes, but the Queen City defence tichtened up and the ity defence tightened up Thistles were forced to make fruitless outside. ries from outside.

Administrator Greer Champions New Form of Auxiliary

All that stands in the way of the organization of auxiliary classes for "gifted pupils" in the London public schools in the opinion of Administrator V. K. Greer, is lack of funds. "We have the desire," said Mr. Greer this morning, "but we haven't \$2.60, got the money. London has had under

contemplation the beginning of spe-

cial classes for gifted pupils for some

"The formation of such classes would meet a needed situation." declared Mr. Greer, "since there is apgifted pupils as there are those whose progress in the regular classes is not of the best. The gifted pupils would be selected for the class by means of combined psychological and academic tests. The regular course of study would be taken up, but it would be enlarged and enriched to meet the special capacities and talents of the individual members of the state of the individual members of the class."

"Would not a boy or girl become conceited upon being selected as a member of this gifted class?"
"I don't think so," replied Mr.
Greer. "Take for example the boy with lots of ability who is placed in the normal class. He heads the class all the time and he is liable to become conceited. On the other hand, while the boy or girl might be conceited for ball balked on the institute ring and Great Britain and France, who are the boy or girl might be conceited for the ring and Great Britain and France, who are the moment upon being placed in the they were forced to passing through Canada en route the moment upon being placed in the ring. mostly on de- home after an invasion of England gifted class competition therein the work in and Proposed in the second state of the second state insive work in and France, where they won 30 would be so keen amongst pupils of his or her own class that there are Toronto lead.

An Organ Can Play Any Tune. As a business condition prophet, the Free Press is an odd old barometer. Sometimes it cheers and says things are simply wonderful; again it concludes that they are not. Just now February 6 it said:

"The plain facts are that Canada is not going forward as it should, that business is lagging and industry is in the dumps."

s that the Free Press looks out of the window and tower, making 700 feet, and the Woolworth and sizes up the situation. The fog has been with its 792 feet above the pavement. and of course in a fog things look strange. An building can be had from the comparison that Thomas Elliott was reeve of West Williams in object that is usually bright and pleasant to gaze if half a dozen of them were laid down flat they upon takes on an unnatural appearance. June is the month for the Free Press. Things ook different then. The milk bottles are not frozen in the mornings; the editor can stick his head out of the window without getting his nose frozen or being hit on the head with an icicle. much. June's the month, and it was just last June, on the 20th day, that the Free Press tuned its lyre and sang like this:

"A few days ago the weather was drearily cold, the season was backward, the crop outlook was poor, the farmers were pessimistic, and everyone was blue. Today we have glorious summer weather, the country never appeared more beautiful, the grain is jumping ahead, the farmers are smiling and that old optimistic air is returning."

It was going to spray its optimism all over the country; it was not enough that the farmers sters who are nursing a set of mumps that they were smiling, the whole land must break out in are really having a swell time. a broad grin. Thus the paper continued:

"Anyone who is in the dumps these days should have his stomach examined by a medical expert. Not only are the prospects good for fine crops all over Canada, but there are no sound grounds for anyone being pessimistic in regard to the dominion. Canada has what the world needs, and nothing can keep the dominion back."

And just think, that was little better than seven short months ago that the Free Press delared that "anyone who is in the dumps these days should have his stomach examined by a son either putting on or dumping a load. medical expert." W. Williams Not Century Old Yet

WE are apt to forget that Ontario is a very young province. In order to realize this it is only necessary to mention that the township of West Williams, in the northwest part of Middlesex, had hardly any settlers at all in 850. In that year L. C. McIntyre and Ronald McIntyre took up farms in the west of the township, near the Aux Sables, and Henry Saul began a clearing on his lot on the 21st concession. others, and some of the Toronto skyscrapers Henry James and Lewis Mott settled there about would receive very little neck-stretching on the the same time. Human vigor! Power!

And today we know that not only does our motive power depend directly on our food-but that it comes largely from one class of food elements called "carbohydrates". At least one-third of all we eat should be made up of them.

Yet-and this is what most of us do not know-these foods in the form in which we often get them may be the cause of our commonest troubles. They must come to us in the proper form, or, instead of giving bodily energy and power, they may actually turn into harmful acids and poisons. Grape-Nuts is a perfect source of energy and power. Three-fourths of Grape-Nuts is the precious carbohydrates in the form of dextrine—the most acceptable to your body of all food substances.

Grape-Nuts, made from whole wheat and malted barley, is a wonderfully delicious and nourishing food. Serve it just as it comes from the package, with milk or cream. It is very economical. Four teaspoonfuls, sufficient for each helping, costs less than one cent. All grocers have it-in the wax-wrapped package.

HADASSAHS DINE DOMINION HEAD

Mrs. A. J. Frieman of Ottawa Is Guest of Honor at Banquet Sunday Night.

MARK 7TH BIRTHDAY

The visit of Mrs. A. J. Frieman of Ottawa to the city yesterday was an outstanding event for the local Hadassah chapter. Mrs. Frieman who is the dominion Hadassah president, was the guest of honor at a banquet arranged by the local chapter in Alma hall

Mrs. Frieman's address, on the very fine work which is being carried on in Palestine through the efforts of the Canadian Hadassahs, was the feature of the evening. She made special reference to the building of the agricultural and domestic science school for girls at Nahalal, Palestine This work, she said, had been undertaken by the Canadian Hadassahs And now, where once had stood a swamp, there was a beautiful garden city. At the beginning the girls had to work in water up to their waists, wearing mosquito netting over their heads; now the land was drained and the climate healthy. At the school they were taught how to raise vegetables, chickens, etc., according to the conditions in Palestine.

Hospital For Consumptives.

The speaker referred to the hewest work that the Canadian Hadassahs had undertaken, the sanatorium for consumptives at Sased, Palestine Two thousand dollars had already been forwarded for that institution It was Mrs. Frieman who organzed the helping hand campaign is 1919, which was instrumental in collecting \$168.000 in Canada for this purpose as well as \$40,000 in clothing. Twelve thousand dollars of this Eight million dollars had been colected throughout Canada for the alestine foundation fund through he Zionist movement, of which Hadassah is a part. It was the aim f the Hebrew people to settle Palesne, their home land. And Hebrew ar refugees from all over Europe were going there to seek a home, as the Jewish people of Canada and the United States raised money to establish them there.

Mrs. Frieman congratulated London on its excellent organization. But eight years ago the first Hadassah chapter was organized in To-ronto. London was the third center to organize a Hadassah society New there were 72 branches throughou

The Old, Old Mother-in-Law Problem-How Can a Young Couple Stop the Habit of Arguing Over Trifles?

Dear Miss Dix-I have been mar mother lives with us. She does everything that is possible to cause trouble between us. She tells him that I am unkind to her, that I gosthings, and is attempting to run me out of my home.

Do you think that I should put up with this? I love my husband dearly, were made for a social, to be held in but when I tell him how she does St. Mary's parish hall on Thursday he only says, "Oh, well, she's old," and that he is her only child, and there is no one else to take care of MRS. L. O. W.

The mother-in-law problem, my dear, causes more tears, more heartaches, and misery than any other one in the world. It is the most inscrutable, for it has a thousand different angles, and the wise way to solve it is gen-

erally the way it can't be solved. It is literally true that the soft answer turns away wrath, and that there are very few persons that you cannot get around with

a little jollying. After all, the best way to handle a mother-in-law is by

making a friend of her. Your husband's defence of his Dr. W. J. Nesbitt of Detroit, has returned home after spending some time with his parents, Mr. and Mrs. J. D. We should find it easier to bear with the weaknesses of age, because some time the young must us, and we should show to our mothers-in-law the consideration that some day we shall pray a daughter-in-law to show to us. DOROTHY DIX.

Dear Miss Dix-My wife and I have been married thirteen months We argued from the first, but loved each other just the same. But now we find that we are quarreling all the time over trifles, and we are less and less guarded about what we say He was so disappointed that he almost noise right at the very foot of that tree. to each other, and I am afraid that it is going to wreck our happiness. A. F. N. What do you think?

I think there is no other such first-aid to divorce as the arguing habit, and that any two persons who indulge in this vicious practice are sure to come to hate each other in the end. There can be no peace and harmony in a home where every statement brings on a dispute and where everything one does, or leaves undone, calls for criticism and endless discussion.

But why argue? No one is ever convinced by an argument. No one

one point-not to argue. If she says black is white, let it go at that. If she says that Chicago is the capital of Oklahoma, permit the statement to stand uncontradicted. Try to get her to be equally fair to you. And if she still persists in arguing don't answer back, and she will be forced into silence, because you can't argue with anyone who won't argue back.

Dear Miss Dix-How can I get rid of a girl who wants to marry me and whom I don't want to marry? don't want to marry anybody, for I am only 21, and I have a good home, and money, and lots of companionship, so why should I tie myself down with a wife? But this girl is determined to have me. I have tried n every way to show her that I am not in love with her and don't want to marry her, but she pursues me, and what to do is a cross-word puzzle I can't solve. IN TOUGH.

Peter Rabbit Saves Happy Jack From a Bad Night In the Tree

By THORNTON W. BURGESS.

Never in all his life had Happy Jack quirrel been more frightened or miser able. There he was in a little tree that stood all by itself away from the other trees, a tree so small that there was no place for him to hide. He didn't dare leave that tree because he knew that Reddy Fox was hiding and waiting for him. It would have been bad enough in daylight, but to Happy Jack it was

New York, Feb. 8.—Beef still is the backbone of the cattle industry, but the by-products yield the profit to the buyers of cattle. That fact, according to some authorities, should be given deep consideration in working out legislative plans for the betterment of the stock growers. The origin of some of the profits from livestock is shown in the figures for the past year Issued by Swift & Co. There show that an average of \$60.08 a head was paid an average of \$60.08 a head was paid
for live cattle and \$12.63 per head for
texpenses, including treight, a total of
\$72.71. On the other hand, an average
of \$63.11 was received for beef and \$11.55
for by-products, leaving a profit of

Strange Antics Are Performed When Fourteen Join Medical Fraternity.

HOLD INITIATION

Dundas and Richmond Streets Is Stage For Unique Ceremony.

Dollar Day shoppers, down town Saturday afternoon, could scarcely believe their eyes when they saw four young men meandering down Dundas street with fishing poles over their shoulders, halt at the main Intersection, cast their lines in the direction of the traffic cop on duty and proceed to haul in fish.

When a few moments later four other youths appeared on the scene. garbed in aprons and began to hang miscellaneous laundry on an improvised clothesline these shoppers concluded that either there was home brew in the atmosphere or the end of the world had arrived a day later than prophesied.

The huge crowd which soon gathered about the eccentrically acting ones suspected that their antics were an advertising stunt. It was. The principals in the comedy were advertising the fact that the annual initiation ceremony of Alpha Kappa Kappa Fraternity of Western Ontario was in full sway, and the young men did their stuff well.

Fourteen Received.

Fourteen new members were re-ceived into Beta Kappa, the local chapter of the medical fraternity on Saturday, and just to prove their mettle, part of the proceedings were held down town. Shortly after two o'clock, the first group of four neophytes made their appearance on Dundas street. Wearing bath robes bundas street. Wearing bath robes
of varied hues, their assignment included stops at Wellington, Clarence
and Richmond streets, where they
sang sweetly, "Shall We Go Gathering Nuts in May," with "Where's My

Here" was included in their reper-Here' was included in their reper-toire, which went over with a punch. The next group of initiates, directed by a surveyor, strung a clothesline at the above mentioned street cor-ners, and proceeded to hang out the garden variety of family washing.
Even the traffic cop joined in the laugh provided by these self-conscious young medicos bravely doing their duty. They were followed closely by the four fishermen, wearing Panama straw hats and the speedy Panama straw hats, and the speedy manner in which the finny tribe were drawn in near the Bank of Commerce will no doubt lead to this district

"A few years ago it was thought that the best street lighting could be obtained by having a large number of lights spaced relatively close of the commission, and chairman ber of lights spaced relatively close together, and no doubt this does produce the most uniform lighting, but if the intensity is made adequate, such a system becomes altogether too expensive. London's residential streets are an example of low intensity close-spaced lighting and it is not a success. The system which has been installed on Waterloo street consists of lights with prismatic globes at a height of about 30 feet and about 125 feet apart. It has the advantages of using no more power than the present installation and the annual cost for maintenance will be little more if any. I believe that the annual cost for maintenance will be little more if any. I believe that the system might even be continued on our downtown streets, with somewhat higher intensities. By attach-

MAGNESIA BEST FOR YOUR INDIGESTION

Warns Against Doping Stomach With Artificial Digestents.

Most people who suffer, either occasionally or chronically from gas, sourness and indigestion, have now discontinued disagreeable diets, patent foods and the use of harmful drugs, stomach tonics, medicines and artificial digestents, and instead, following the advice so often given in these columns, take a teaspoonful or two tablets of Bisurated Magnesia in a little water after meals with the result that their stomach no longer troubles them, they are able to eat as they please and they enjoy much better health. Those who use Bisurated Magnesia never dread the approach of meal time, because they know this wonderful anti-acid and food corrective, which can be obtained from any good drug store, will instantly neutralize the stomach, prevent food fermentation, and without the slightest pain or discomfort. Try this plan yourself, but oe certain to get pure Bisurated Magnesia especially prepared for stomach use.—Advt.

Convicts Board Locomotive and Smash Way To Freedom

Special to The Advertiser.

Jackson, Mich., Feb. 8.—Boarding a small switch engine used in the Chelsea cement plant, five convicts made their escape from the Michigan state prison here late yesterday when they pulled the throttle wide open and sent the locomotive crashing through the iron gates guarding the plant. The five are still at liberty.

The crash was heard by guards just as the 650 convicts in the big prison were entering the mess hall for their evening meal. While some herded the prisoners into the building, others rushed for the opening in the gates to forestall any effort by the main body of the prisoners to make a break for freedom. The convicts who escaped were nearly all long-term men.

startling things—he let overy hot coffee percolator simmer away on the un guarded table top. He lifted the steaming lid off, and set it down quite rudely on the varnish. He let the boiling coffee drip over. And he set hot plates about with a promiscuousness which fairly astounded the cautious house

Yet none of these apparently disastrous things had the slightest effect on that lovely polished table top! If you hadn't been there to see for yourself, I should feel it necessary to give you my own word of honor that all this really happened.

Neal's Fig Pudding ____

Long after the other courses are forgotten a well-chosen and tasty des-

The following recipe makes a delicious dish, tasty and substantial without

21/2 cups Neal's bread crumbs 1/2 cup chopped beef suet 1/2 lb. finely-chopped figs

2 eggs

That Important Dinner!

1/2 cup sugar or syrup 1/2 teaspoon salt

Work the suet with a wooden spoon until of a creamy consistency, then add the figs. Soak bread crumbs in milk, add well beaten eggs, sugar and salt. Combine mixtures, turn into a buttered mold. Steam three hours. Serve with molasses sauce, which is made by boiling two cups molasses and two tablespoons butter for three minutes. Remove from fire, add two tablespoons lemon juice. Serve hot.

For ordinary table use or cooking always use the best bread-
