The copy filmed here has been reproduced thanks to the generosity of:

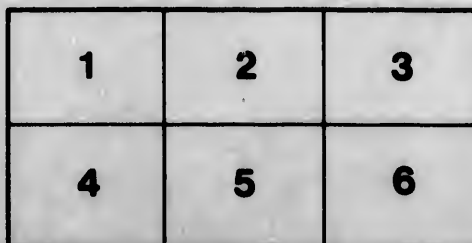

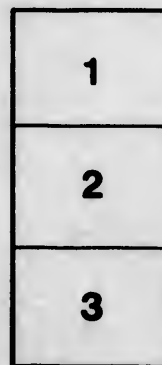

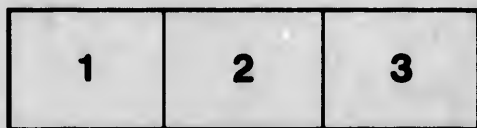

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PUBLISHED BY

HENDERSON PUBLISHING COMPANY, Ltd. Ltd.

VICTORIA AND VANCOUVER, B. C.

Entered according to Act of Parliament of Canada, in the year One Thousand
Eight Hundred and Ninety Eight, by Henderson Publishing Co., Ltd. Ltd., in
the Office of the Minister of Agriculture.

PREFACE.

The Publishers have much pleasure in submitting herewith the fifth edition of their British Columbia Gazetteer and Directory. The volume this year is divided into six parts, viz:—(1) Mining Companies doing business in British Columbia; (2) Incorporated Companies; (3) a Gazetteer Index showing the names of all places in each Electoral District; (4) Gazetteer and Directory of all cities, towns, villages, post-offices, mining camps and steamboat landings; (5) Complete Street and Alphabetical Directories of the Cities of Vancouver and Victoria; and (6) Classified Business Directory.

The compiling and publishing of Directories is our exclusive business. We have a complete plant and every facility for turning out a first-class work. The principal work pertaining to our Directories is done by men trained to the work, and who are all engaged in it the year round. Great care has been taken in revising the work, to ensure exactness as well as completeness, and we trust it will meet with the approbation of our subscribers.

The Gazetteer section has been considerably increased by the addition of the names of principal residents in our lists of country towns. The Cities and the principal towns have been carefully revised and the information brought down to a late date and will be found to be very complete.

The Directory of Mining Companies is the only work that shows the names of all the Mining and Development Companies doing business in this Province. The feature was a popular one last year, and great care has been taken in its revision and in the addition of new matter of which there is some thirty per cent.

Attention is directed to the fact that in the Gazetteer all places are found in their proper alphabetical order. The present addition gives descriptions of 817 places, last year there were 753 places. The lists of places by districts will be found a great convenience when used in connection with the Gazetteer.

For convenience of reference, sub-heads show the first and last names on each page of the City Directories, and the first and last places contained on the pages of the Gazetteer.

The preparation of Directories, perhaps as vividly as anything else, impresses the compiler with a sense of the progress of the country in all that constitutes material prosperity. Vancouver during the past year has made more rapid progress than at any former period of its existence. The new names added to the Directory indicate that the City has had an addition of over five thousand to its permanent population within a year and has now the largest population of any city in the province. The Victoria City Directory also shows a very satisfactory increase over last year. The cities of the Kootenay District are fast settling down to a permanent basis, the transitory element having moved on.

To make a Directory absolutely correct is impossible; but we believe that this volume is as nearly correct as it is possible to make it with the rapidly changing population of a mining country.

To our many kind friends who have revised proofs, and without whose assistance it would have been impossible to secure reliable information, we take this opportunity of returning our sincere thanks.

It is our intention to publish this work annually, corrected and revised to date of publication, keeping up with the rapid development of the country.

Thanking our patrons for their encouragement, courtesy and liberal support, our endeavor will be to merit a continuation of their favor.

Respectfully,

HENDERSON PUBLISHING COMPANY, LTD. LTD.

ANTLER CREEK MINING CO., Ld., filed Feb. 27, 1896; capital stock, \$1,000,000 in \$5 shares; office, Vancouver.

ANTOINE MINE; owners, George Alexander, Kaslo, and C. H. Green, Saginaw, Mich.; manager and superintendent, J. C. Ryan; secretary, W. Russell Allen, Kaslo; foreman, J. Regan, McGilligan.

Property—**ANTOINE claim**, in McGilligan basin, 3 miles from McGilligan station, on K. & S. Ry. The **ANTOINE** lead is one of the strongest and best in the country. It varies in width from three to five feet. The ore runs from eight to eighteen inches in width, and is found in chutes never far apart. It is steel galena and gray copper. In 1896 a steam hoist and

pumping plant was put in, which, with shaft and ore houses, gives the mine complete equipment. The mine has stood this and the expense of development and has been self-sustaining from the start, at the same time paying large cash dividends.

The first ten cars shipped gave smelter returns at 270 oz. silver and 45 per cent lead, uniform in grade. One car containing 15 tons returned \$3,757. The next ten cars varied in grade, ranging as high as 356 oz. silver and 49 per cent lead, making the average of the 20 cars shipped over 240 oz. silver and 43 per cent lead. This is believed to be, next to the Reco and Good-enough records, the highest average grade ore yet shipped from Sloacan.

APEX GOLD MINING AND DEVELOPMENT CO. (foreign), filed Feb. 17, 1897; capital stock, \$1,500,000 in \$1 shares; head office, Spokane; reg. office, Rossland.

ALBERNI,

See also Beaver Creek.)

A money order postoffice and settlement, at the head of Barkley Sound, Alberni district. Mails twice weekly. Nearest express and railway station, Nanaimo, dis. 54 miles. Alberni is a valley probably 25 miles long by 10 wide. It is situated pretty near the centre of the Island, 35 miles north from Cape Beal light-house, at mouth of Barkley Sound. The water is navigable for the largest vessels right into the settlement. Distance 110 miles from Victoria, by steamer. There is also a wagon road connecting Nanaimo, by which the mails are brought. Alberni is a good settlement. Farming is the principal industry. Timber and coal, also gold and silver quartz have been found and no doubt this will be an important place in the future. A saw mill is located here, capacity 1,000 M per day. Has Presbyterian and Catholic churches and two public schools. Has telegraph office

KAMLOOPS.

(See also Morrisville, Campbell Creek, Anderson Creek, Louis Creek and North Thompson river.)

A town on the main line of the C.P. R., 250 miles east of Vancouver, called the "Inland Capital." The name Kamloops is aboriginal, meaning meeting of the waters, the town being situated at the confluence of the North and South Thompson rivers—the main tributaries of the Fraser—two magnificent streams, one of which (the North Branch) is navigable for 80 miles above the town, while the other is navigable for miles that distance. Its situation is beautiful, healthful, and its climate delightful. In no place in Canada is there longer summer, and consequently a shorter winter—that can be called winter. Though its winters are short and sharp they are bright, and would not be dispensed with if such a thing were possible. Has

money bank, phone weekly thodiat Catholic school, court h capacity system town f The ir used fo K.M.A. run occ vona, school l quarters the T valleys.

KASLO,

A city incorporated in 1893, on the Upper Kootenay Lake, at the mouth of the Kaslo river. The terminus and headquarters of the Kaslo & Slocan Ry., which was opened in 1896 and extends to the head of the Slocan mining district, Sandon dis. 23 miles and Cody dis. 30 miles. It is also the headquarters of the International Navigation & Trading Co., who despatch two steamers a day to Nelson, 45 miles, and twice a week to Bonner's Ferry, 110 miles. The C. P. R. Co.'s steamer Kokanee makes a daily trip from Nelson, and once a week to Lardo at the head of Kootenay Lake. It is one of the important distributing points for the main camps of the Slocan district and Kootenay Lake points. Has money order postoffice, savings bank and telegraph office. Distant from New Denver 30 miles. Kaslo is considered a fine townsite. It is situated on a couple of sloping benches overlooking the lake. The assessed value of property for 1898 is \$618,520. The city owns a \$30,000 system of waterworks, consisting of 3 miles of main from the head works up the Kaslo river, 2 miles of which is 12 inch wood pipe, having a capacity of one and a half millions of gallons per 24 hours, and a reservoir with a capacity of 350,000 gallons, located on the hill back of the city. There are four churches, Church of England, Methodist, Presbyterian and Roman Catholic.

Industrial enterprises comprise large saw and planing mills, a brewery of 25 barrels per day capacity and soda water works. The Kootenay Electric Light & Power Company furnish incandescent light to the majority of buildings and also light the business streets. Kaslo has a fine athletic grounds, with grandstand accommodation for four hundred people. The Kootenian, the leading paper of the district, was originally established as the Kaslo Claim in 1894, and changed to its present name in 1896. Kaslo is an important ore shipping point. In 1893-4-5 the ore was brought from the Slocan by pack trains, and in 1896, on the completion of the K. & S. railway, these have shown a steady increase and now are large volume. The sampler operated by the Kootenay Ore Co. has a capacity of 150 tons per day, and handles a large per centage of the ore shipped from this point. Has two chartered banks, money order post office, telegraph and express offices. Population about 2,500.

NANAIMO CITY DIRECTORY,

An incorporated city on the Esquimalt & Nanaimo Railway, 70 miles from Victoria. It has daily mail steamer connection with Vancouver and regular steamers to Victoria, Westminster and Vancouver.

The city fronts on a well-sheltered harbor, and is the centre of the coal mining industry of the island. Since its incorporation in 1874, the city has made continued progress and has Episcopal, Methodist, Presbyterian, Baptist and Roman Catholic churches, public schools, fire department, court house, jail, Dominion government building, postoffice and custom house, money order post-office, telegraph office and telephone exchange. The Nanaimo Free Press (evening) is published daily and semi-weekly. The Bank of British Columbia has an agency.

The principle staple industry of Nanaimo is the production of coal, immense quantities of which are carried from here to all coast points and many foreign ports. The colliery works of the New Vancouver Coal Mining & Land Company, Limited, employ over one thousand men.

CITY OF NELSON,

An incorporated city (1897) on Kootenay outlet, which is also known as the West Arm of Kootenay lake, 22 miles from its mouth. The terminus of the Columbia & Kootenay railway, which follows the Kootenay river 25 miles to Robson, where connection is made daily with the C. P. R. steamers for Nakusp (89 miles) and Revelstoke (188 miles), also for Trail (25 miles) and Rossland (34 miles). The Slocan branch railway from Slocan Crossing to Slocan City puts Nelson in direct connection with Slocan lake ports. It is also the northern terminus of the Nelson & Fort Sheppard railway to Wauwata (60 mls). International Boundary and Spokane (200 miles).

Nelson is the government headquarters for the southern district of West Kootenay. The offices of the government agent and gold commissioner and deputy, registrar of the supreme court being located there. It is also a port of entry for Kootenay customs district and headquarters for superintendent and district freight and passenger agents of Kootenay branches of the C. P. R., and will be the western terminus of the Crow's Nest Pass Railway now under construction. This it is believed will establish Nelson more firmly as the business centre and distributing point for Southern Kootenay.

There are three chartered banks there; weekly newspapers; two saw mills, with respective capacities of 30,000 feet and 5,000 feet per day, sash and door factories, foundry and machine shops. Waterworks pressure is adequate for fire and domestic uses. Electric light is furnished by private parties. A new company are putting in an electric power and light plant at the

middle falls of the Kootenay river, seventeen miles distant, which will furnish an abundance of power for all requirements.

The principal industry is the Hall Mines and Smelter, which give employment to four hundred men. There are also a number of other mines on Tond Mountain, just back of the city, and others that are tributary, on Salmon river, Quartz creek, Kokahee creek, and other camps on Kootenay lake. It has money order post office, telegraph and express offices and telephone exchange; Church of England, Roman Catholic, Presbyterian, Methodist and Baptist churches and public schools. Kootenay Lake General Hospital. Population 1897, 3,000. Population 1898, 5,000.

NEW DENVER.

NEW DENVER,

(See also Denver Canyon.)

An important town on the east side of Slocan lake, at the mouth of Carpenter Creek. The C. P. R. station, on Nakusp & Slocan branch, called Denver Canyon, three-quarters of a mile distant. Is 82 miles from Nakusp and 9 miles from Sandon. There are a couple of saw mills near by, one a modern mill at the head of the lake, and the other a small water power plant just across the lake. There is first-class steamer accommodation daily to Rosebery, 3 miles (railway transfer for Slocan Lake points), Silverton four miles and Slocan City 19 miles.

Has money order post office, chartered bank, telegraph and express offices and telephone exchange having trunk line connections.

There are a number of promising mining properties in the immediate vicinity. New Denver has a desirable location for a residential town, and is appreciated as such by number of mining men working Slocan Lake properties, who make their homes there.

CITY OF NEW WESTMINSTER.

Is beautifully situated on the north bank of the Fraser river, 75 miles from Victoria, 16 miles from the Gulf of Georgia. Sea-going ships load at the wharves with lumber and canned salmon. It contains six churches, Episcopal, Reformed Episcopal, Roman Catholic, Presbyterian, Methodist and Baptist, and Salvation Army. Most of these have two or three church buildings. The residences of Episcopal and Roman Catholic bishops are here also, Columbia Methodist college, Central public school, also Roman Catholic convent and college, and some private schools, as well as the Provincial Asylum for Insane and Dominion Penitentiary. The public and business buildings are of brick. The city owns its electric light system, which is self-supporting. The city also owns waterworks with a supply by gravitation from a mountain like, giving in business district 170 to 180 pounds pressure. There is communication with river and Vancouver Island ports, daily or oftener, by steamer. A station on the Can. Pac. Ry. is in the city, and of the Great Northern Ry., immediately opposite, on the south bank of the river. There is one daily newspaper, electric cars run to Vancouver city every hour, distant 14 miles, saw mills, iron foundries, carriage and furniture factories, wood working establishments, feed mill, tannery, etc., etc. New Westminster is the headquarters of the salmon canning and agricultural interests of Fraser Valley, and the

distributing point for the river trade. The streets are well kept, with good sidewalks. The climate is mild and equable.

OKANAGAN MISSION,

(See also Kelowna and Trout Creek.)

A post settlement on the west side of Okanagan Lake, 35 miles from Vernon, from which it is reached by regular steamer. Nearest railway station, telegraph and express office Vernon, dis. 35 miles. Has a flour mill, Roman Catholic and Presbyterian churches. Nearly all the valuable farming land is taken up. This valley is about 10 miles long, in some places 6 miles wide, in others but 2 miles. There are a number of small er valleys connecting with this valley, but they all go to form the Okanagan Mission Valley. For fruit growing this valley has few equals in B. C. Apples, pears, plums, grapes, and peaches are grown in abundance. These latter trees have just found their way into the valley. In the woods are found black brown, and grizzly bears, wolves and coyotes, lions and wolverine. Of amphibious fur-bearing animals we have otter, beaver and fisher. Deer, caribou, marmots, grouse, fowl-hens, partridges, ducks, geese, crane and many others much sought after by sportsmen are abundant. Trout and salmon are plenty. The weather is exceedingly mild in summer, it is rarely over 90 degrees in the shade, while the evenings are cool.

CITY OF ROSSLAND,

The city of Rosslund is situated at the base of Red Mountain, 7 miles in a direct line west of the town of Trail on the Columbia river, and 8 miles north of the International boundary line, at an altitude of over 4,000 feet above the Columbia river. It is reached by the Canadian Pacific Railway Company's steamers from Arrowhead to Robson, and the Columbian & Western Railway. The Red Mountain Railway also connects with Northport, Wash., 18 miles distant on the Columbia river, and thence to Spokane, a distance of 150 miles. The mines which have given the city its impetus were first staked in 1890, but for one reason or another they attracted no general attention until the autumn of 1894. Since that time the whole ground immediately surrounding Rosslund has been staked off into claims, which are now numbered by the hundreds.

Ross Thompson took up the original townsite as a pre-emption in 1892, and had it surveyed in 1894, calling it after himself.

Incorporation was granted the new city in the summer of 1897, and shortly afterwards work progressed rapidly, opening out streets, laying sewers and putting the city in the right shape for its ever-increasing development. A water works system and electric light plant are already in operation under the management of a private corporation. An electric power plant, to be utilized principally for mining purposes has been installed at Boddington Falls on the Kootenay river, over 30 miles distant, and affords cheap and convenient working power. There are also saw mills, breweries, opera house with a seating capacity of 1,300, telephone exchange and trunk line connections with Trail, Nelson and Spokane.

The principal religious bodies have their own church buildings, and the secret societies are well represented. The head offices of a large number of mining companies operating throughout the Kootenay district are located here. Has three chartered banks, telegraph, express and money order post offices. The population is increasing rapidly, and the city now ranks as the third in the province.

CITY OF SANDON,

Incorporated January 22nd, 1898. The leading mining camp of the Slo-can district, elevation 3,460 feet, situated in a narrow valley in the heart of the mining district on the south fork of Carpenter Creek at the mouth of Sandon creek. It is the terminus of the Nakusp & Slo-can branch of the C.P.R., 41 miles from Nakusp. The Kaslo & Slo-can railway (narrow gauge) gives daily connection with Kaslo, distance 28 miles. This latter road also extends to Cody, 2 miles distant, where there are also valuable mining properties. New Denver, on Slo-can Lake, is 9 miles distant. Sandon is dependent for its prosperity on the mines surrounding. It is situated between two mountains which are said to contain as great riches in galena ore as any other two adjoining mountains in the world. The leading mine, the Slo-can Star, was located in 1891, and since that time the camp has steadily progressed, and is now the great-producing camp in British Columbia. There are two chartered banks, two weekly newspapers, sawmill with capacity of 10,000 feet, sash and door factory, water works with pressure of 125 to 175 pounds, the reservoir capacity of 60,000 gallons. An electric light plant of 1,200 lights is operated by water power. There is a money order postoffice, telegraph and express office. Population, 2,000, with some 1,250 miners employed in the mines of the vicinity.

 municipality is only 17 miles from
 New Westminster city. Half of the
 land is prairie and the rest timbered.
 Area about 120 square miles. The
 Nicomekl and Serpentine rivers,
 both navigable, run through the
 municipality. The soil generally is
 very rich, and large crops are har-
 vested. Fruit growing is becoming
 quite an industry, for which the soil
 is especially adapted. Elgin, Halls
 Prairie, Surrey Centre and North
 Surry are the postoffices.

TRAIL.

TRAIL,

A mining and smelter town on the Columbia River at the mouth of Trail Creek; 30 miles south of Robson, from which point there is daily communication by the C. and W. Ry. The Columbia & Western Railway Co. have their headquarters here. They operate a narrow gauge road to Rossland, fourteen miles, but only seven in a direct line. On this line six passenger trains are run daily. The Robson branch, up the western bank of the Columbia River to a point opposite Robson, will be in operation this fall, and afford rapid communication with all northern points.

A ferry runs across the Colvada River—very swift at this point—where connection is made daily by stage for Sayward, on the N. & P. S. Ry. Distance, 7 miles.

The British Columbia Smelting & Refining Company's smelter and refinery is the principal industry of the place, giving employment to over 100 men. The company also operate a large saw mill, water works and the electric lights of the town. The C. & W. Railway, which is operated in connection with the smelter and refinery, have their shops on the hill adjoining the smelter plant.

There is money order post office, telegraph and express offices, chartered bank, two churches, two weekly newspapers, theatre, two saw mills, powder mill, machine shop, and a modern brewing plant, with a capacity of 40 barrels per day.

Population about 2,000.

YMIR.

(Formerly called Quartz Creek.)
 A mining camp on the Salmon River at the mouth of Quartz Creek. There are three other tributary streams coming into Salmon river within two miles of the mouth of Quartz Creek—Wild Horse, Bear Creek and Porepine Creek. Wild Horse is the largest and has on it a very large area of mining country. All these streams have many mining locations on them. Nelson & Ft. Sheppard Railway to Nelson, 24 miles north and Waneta (International boundary), 30 miles southwest. Has post office, telegraph express office and weekly newspaper. A waterworks plant has been established by a private company, with a reservoir capacity of 50,000 gallons, situated one-half miles southwest of the town, giving a fall of 285 feet through an 8 inch main. **There**

are a number of rich mining properties in the vicinity which are being developed, and many promise to be valuable mines. Nearest banking town, Nelson, distant 24 miles. Has sawmill, capacity 5,000 feet. Methodist and Presbyterian missions and public school. Population 300, with 200 men employed in the vicinity.

HENDERSON'S VANCOUVER CITY DIRECTORY

1898

STREET AND AVENUE GUIDE.

All the houses are numbered on the system of 100 numbers to the block. The following plan was adopted by the Board of Works on the 13th November, 1890: Even numbers on the east and south sides of street; all short streets to take their number from the through streets and correspond with them.

Carroll street is taken as a base for the streets running east and west, with 100 numbers to the block; on streets running west, Carroll to Abbott, 1 to 99, Abbott to Cambie 99 to 199 (on Cordova the numbers 200 to 299 are skipped, so as to keep it in unison with the other east and west streets), Cambie to Hamilton 300 to 399, and so on to western boundary of city.

Streets (west of Cambie) running north and south are numbered from the Inlet as a base. Burrard Inlet to Water 1 to 99, Water to Cordova 100 to 299, Cordova to Hastings 300 to 399, and so on to False Creek.

Streets lying east of Carroll use Carroll as a base for east and west streets, Carroll to Columbia ave., 1 to 99; Columbia ave. to Westminster ave., 100 to 199, and so on to Boundary ave., the eastern boundary of the city. North and south streets take Burrard Inlet as a base; Burrard Inlet to Alexander, 1 to 99; Alexander to Powell, 100 to 199, and so on to False Creek.

MOUNT PLEASANT.—New Westminster ave., over False Creek, starts at 1,500 and continues 100 to the block to 3,099, the southern boundary of the city. Streets running east and west of Westminster ave., are numbered from the avenue as a base, starting at 1 and going eastwards, 100 to the block, and again starting at 1 and going west wards, 100 to the block.

HENDERSON, S

VANCOUVER CITY DIRECTORY

1898

This wonderful young city is situated at the western terminus of the Canadian Pacific Railway, 15 miles north of the mouth of the Fraser River. The principal part of the city occupies a peninsula, bounded north by the waters of Burrard Inlet, south by a small indentation called False Creek, and west by English Bay, of which the other two are arms. The city is extending to the east, and to the south across False Creek.

The site of Vancouver could scarcely have been better chosen for a large city. The peninsula on which it is located rises to an altitude of about two hundred feet at the highest point, and from the central ridge there is a distinct descent to the water's edge, on either side. This affords the most perfect drainage at all times. Burrard Inlet is always safely navigable for the deepest draft vessels, and is one of the finest harbors in the world. The passage at the narrows or mouth of the Inlet is about an eighth of a mile in width. Opposite the city front, however, it is three miles wide, with a depth varying from six to twenty fathoms, and extends inland about twelve miles, and affords access to a considerable area of rich country, the products of which Vancouver governs; in this respect serving the commercial purposes of a large river. On the west and south, English Bay and False Creek also afford accommodation for shipping. The capacity of the city for marine commerce can never be outgrown, no matter what magnitude it may attain.

A few wooden buildings occupied by fishermen and lumbermen were known by the name of "Gastown." After a time it assumed more importance, and was called Granville. When it was settled that the Canadian Pacific Railway would make this point its western terminus, the hitherto insignificant village suddenly sprang into prominence, and it was incorporated under the name "Vancouver" on April 6, 1886, the population being about 600. The name is in honor of Capt. Geo. Vancouver, R. N., who, one hundred years ago, discovered, explored and named Burrard Inlet. Its prosperity in the near future is a matter of certainty, and it is sure to increase until it attains the proportions of a magnificent city.

Twelve years ago nine-tenths of the present area of the city was a dense, unbroken forest of high firs, with but a single street and a few rough logging roads leading into the forest; one of these to New Westminster. The timber was being removed at a cost of about \$300 an acre, and the place was being transformed from a wilderness to a city, when, in a few hours, on the 13th June, 1886, a fire swept the place, and only left a few buildings standing. Phoenix-like, it has sprung from its own ashes, for on the completion in May, 1886, of the C. P. R. into Vancouver, and the arrival of the first through train from Montreal, an impetus was given the growth of the city, and the advancement made is marvellous.

HENDERSON'S BRITISH COLUMBIA

CITY OF VANCOUVER.

The climate is temperate; the thermometer seldom registering above 90 degrees in the summer, and lower than 10 degrees in winter. The rainy season may be considered from November till March. The driest months in the year are June, July, August and September. Spring is early and mild. Summer is warm, even temperature, cool and pleasant evenings, even after the hottest days. Autumn bright and pleasant. Winter is damp, snow falling occasionally, remaining but a short time, interspersed with clear, beautiful weather, when the majestic snow-capped mountain peaks across the Inlet look dazzlingly beautiful in the sunshine.

The city is laid out on a magnificent scale, and is being built up in a style fully in accordance with the plan. The street names are placed on the houses at the corners. The system of street numbering which allows 100 numbers to each block is fully explained in the street directory.

Handsome blocks of buildings three and four stories high, built of granite and brick, with all modern conveniences. The residence portion is not lacking in houses that would do credit to any of our Canadian cities.

Nearly all the streets are graded. The important business streets are paved with asphalt, and others are planked. Good wide sidewalks. Streets are well lighted with the electric arc light. Electric tram cars are in successful operation in the principal streets, and are a great boon in bringing the outlying residence portions within a few minutes' ride of the business centre, and also connects with New Westminster, distance 14 miles.

The water works system is second to none. The elevation of the reservoir on Capilano River across the Inlet is over 400 feet above high water mark, the average height of the city being about 100 feet; extreme height south of False Creek (Mount Pleasant) 200 feet. Over 60 hydrants are provided for the Fire Department, and they can supply abundant water to defend against fire. A sewerage system of wooden boxes is giving satisfaction.

The Fire Department was established as a paid department in 1890. It has three stations; each containing a steam fire engine and hose reels, all of which are drawn by horses. There is also a hook and ladder truck at the central station.

Stanley Park, a peninsula of 350 acres, almost surrounded by water, is encircled by a beautiful ten-mile driving road, and intersected by drives and walks.

East End Park contains 160 acres granted by the Local Government. The city has also 40 acres of land on south side of False Creek reserved for park purposes.

Its docks present a lively appearance. From them regularly arrive and depart steamers and ships for local and foreign ports. Several sailing ships are generally anchored in the harbor discharging general cargo or loading lumber at the saw mills, as a large foreign export trade is carried on through them.

That great chain, the C. P. R., binds British Columbia to the eastern part of our Dominion, first giving existence to Vancouver, and is now doing much for its prosperity as well as for the general good of the Province. The Company have been true to their word in making Vancouver their terminus, of which the centralization of their work and machine shops, car factories, etc., in the portion of our city called Yaletown gives the best proof. Vancouver, by reason of its transportation facilities, is rapidly becoming the point of the Canadian North Pacific for the transmission of freight and passengers to and from the Orient and Australia.

The Board of Trade are indefatigable in their endeavors to extend the trade of the port, which has already assumed a large proportion of the commerce of the Province, and is steadily increasing.

As to the industries of the city, it is only necessary to examine the following pages and also the classified business directory, to realize that Vancouver has a great future before it. Other places have sprung up rapidly, but there is no record on this continent of the building of a similar city with all the improvements of modern civilization in so short a period.

TO FIND A NAME

You must know how to Spell it.

Directory Borrowers.

Many are the complaints of those who regularly patronize the Directory that they are bored so much by borrowers; not the stranger or private citizen who steps into the office, looks at the Directory, and goes out, but merchants, business men, who continually need it for reference yet are too close-fisted to buy one. These are the individuals who carry off your Directory "just for a few minutes," which generally means A FEW DAYS unless you send for it before; then you have scarcely housed it before some one else presents the request "please lend me your Directory for a few minutes." Perhaps you won't see it again for a week; yet this same borrower will tell our solicitor that he has no use for a Directory, he "knows everybody" and "everybody knows him,"—perhaps, too well

TO FIND A NAME

You must know how to Spell it.

Directory Borrowers.

Many are the complaints of those who regularly patronize the Directory that they are bored so much by borrowers; not the stranger or private citizen who steps into the office, looks at the Directory, and goes out, but merchants, business men, who continually need it for reference yet are too close-fisted to buy one. These are the individuals who carry off your Directory "just for a few minutes," which generally means A FEW DAYS unless you send for it before; then you have scarcely housed it before some one else presents the request "please lend me your Directory for a few minutes." Perhaps you won't see it again for a week; yet this same borrower will tell our solicitor that he has no use for a Directory, he "knows everybody" and "everybody knows him,"—perhaps, too well

HENDERSON'S VICTORIA CITY DIRECTORY

1898

Victoria, the capital of British Columbia, is one of the beautiful cities of the Pacific Coast, and is situated in the southeast part of Vancouver Island, about an irregular indenture from the strait of Juan de Fuca on the south. The city is built on moderately undulating ground, and contains an area of about eight square miles. The nearest mainland is about 20 miles distant south to Port Angeles, Wash. The nearest Canadian mainland is about 65 miles northward by the main route of travel. Vancouver is 90 miles, San Francisco 750 miles and Tacoma 127 miles. Vancouver Island extends some 40 miles farther south than the 49th parallel, so Victoria faces U. S. territory to the south and east.

The Hudson's Bay Company established a trading post at Victoria early in the present century. In 1847 a fort was built. Five years later, the town was platted, and in 1862 it was incorporated. The first vessel arrived from England in 1845. For many years the Hudson Bay Company practically owned the entire Vancouver Island, and whatever industrial operations were engaged in were related in some manner to the Company's interests. This condition of affairs prevailed to a considerable extent till about the year 1858, when the Fraser River gold excitement drew throngs of miners to British Columbia. In a few months then Victoria developed into a flourishing city, though but few of the twenty-five or thirty thousand miners who spent the winter in the vicinity remained as permanent residents. Still its real growth began at that time, and it has had a gradual and healthy increase since.

No evidence of growth is more satisfactory than that supplied by the liberal expenditure of capital on business blocks, handsome private residences and church edifices.

The city's mercantile, manufacturing and shipping interests have been developed by the support which it commanded as the central trading point of the Province. Victoria has always been the chief trading point of the entire British possession west of the Rocky Mountains, because it was so accessible by water, which was the great highway for all commerce.

Until the completion of the Canadian Pacific Railway, Victoria was the only place of importance in British Columbia, now other places are springing up. It could not be expected, with a province so rich in coal, minerals, lumber and fish, that one city would long remain the only distributing point for so vast and rich a territory. It is the ocean gateway to the Province, and must ever command and receive a large portion of the interior and coast trade.

Until the completion of the northern transcontinental railways, the chief route of travel and traffic was by way of San Francisco or Portland, so it was no small advantage that Victoria was situated comparatively near these great commercial centres to the south. It is the oldest city in the province, and also the commercial metropolis and social centre. Shipping from all parts of the world enters the harbor, making it an important port of the Pacific seaboard.

No limit is known to the scope for industrial development on the Island, which is three hundred miles in length, northwest and southeast, an area of about twelve thousand miles, which territory may be considered as tributary to Victoria, and from the smaller islands of the adjoining waters and from the mainland much business flows to the capital city. The government is administered from here, and, if no other reason existed, that alone would have a tendency to draw business. The Victoria custom house shows by far the largest business of any port of the Province, and ranks as fifth port of the Dominion.

The main thoroughfares are clearly defined for long distances, but in all parts of the city are streets of varying widths, joining each other at every conceivable angle. Many streets are lined with shade trees. The streets and roads are

all macadamized. An electric tramway is in operation on the principal streets. The city owns its own water works system, which cost upwards of \$400,000, and returns a very handsome revenue on the investment. The commercial value is said to be \$1,200,000, and is ample for the needs of the city. The street electric lighting plant is also owned and operated by the city. There is also a gas works plant. An efficient paid fire department with the latest improved equipment gives ample fire protection.

Victoria is a city to delight the heart of the tourist. In a drive over any of the excellent roads leading out from the city, the eye rests upon an enchanting landscape, handsome residences with well kept ground and gardens, and on every side evidences of wealth and culture.

It is a favorite winter resort, not only for the people of British Columbia, but for many south of the line, while in summer it is filled with tourists. No place on the Pacific coast offers more comfort, better climate or more beautiful scenery; and no city of its size in the Dominion has so many wealthy residents retired from active business.

Beacon Hill Park is the favorite resort. It occupies a large tract of ground in the eastern side of the city, being washed by the waters of the Straits of Juan de Fuca. A slight elevation, around which is a race track, gives the park its name. The park itself is a rare combination of the beauties of nature and artistic design. Three artificial lakes have been excavated, into the smaller one of which goldfish have been placed. A number of wild animals and birds are in cages or inclosures. Good roads and footpaths enable visitors to go comfortable all over the park. This is a great resort for all kinds of athletic games, and a favorite one with tourists, especially as the outlook from it is most grand, overlooking the broad strait, with the snow-capped Olympian Mountains plainly in view, on the mainland of Washington to the south, and the majestic peaks of the Cascades relieving the landscape to the southeast and east. From the higher points of the city can be enjoyed perhaps the finest landscape views of mountain, water and islands that are to be seen in any part of the world.

The north arm of the harbor, which forms "The Gorge" about a mile from the city, is a favorite resort for boating parties.

The city is amply provided with educational facilities, both public and private, and has a free public library. The churches are well represented.

The Royal Jubilee Hospital, built in the outskirts of the city, on a tract of 10 acres of land. There is also a private hospital.

Not alone as a growing City of promising prospects does it attain its full importance. The strategic point which it occupies as a national post of observation, supply and defence entitles it to the consideration it receives from Her Majesty's home government.

Esquimalt harbor, about three miles to the westward of Victoria, is the site of Her Majesty's Pacific Naval Station. It is probably the best one on the shores of Vancouver Island. It being a perfectly land-locked refuge, and easy of access for vessels of the deepest draught, war vessels are stationed there constantly, and it is general headquarters for Her Majesty's navy in the Pacific. Facilities are provided for doing all sort of repairing for ships. A dry dock, 450 feet long and 27 feet deep, with an entrance 55 feet wide, was constructed at a cost of \$900,000. The arsenal contains large quantities of stores and ordnance supplies of all descriptions. The Royal Naval Hospital and cemetery are located there. Quite a town has been built up about the dry dock.

Though located on an island, Victoria does not suffer from the lack of outside communication; as that fact might imply. The harbor is generally a lively place, especially during the summer season, for then the ships that do the carrying trade between here and England generally arrive with large cargoes of merchandise of all kinds, for general distribution in the Province, and by them are returned those cargoes of salmon, lumber and furs, principal exports of the Province, and for which she is noted. The Alaskan steamers of the P. C. S. S. Co. make Victoria their clearing port north bound, and entry port south bound.

Victoria is a metropolitan city, and betrays it to the eye of the least practical observer. Its position is such that it will always be the distributing point for a large amount of territory, and its numerous banking corporations have given it a prestige as a financial centre that the commercial revolutions of the next few years will be powerless to disturb.
