
The Torpedo Defence Question.

Despite the fact that the attention of inventors the world over is now directed to the problem of defending ironclads against torpedo attacks, progress toward its solution is slow. Captain Morton Singer, R. N., has been carrying on a series of experiments in the capacity of repairing basin at Portsmouth, in order to find out the best form of netting to oppose to the Whitehead torpedo. It is now generally conceded that the netting system, although in some measure acts as an impediment to the vessel's movements, is better than the proposed plan of fast small launchers to be kept outside the vessel to head off torpedoes. Captain Singer has found that a chain net 5-16 inch thick is easily perforated by the Whitehead torpedo, and he has obtained the best results from a wire grummet matting composed of wire strands about 3/4 inch in thickness rove into open meshes. This yields gradually when struck and on recoiling throws off the torpedo.

A new submarine armor for vessels has been submitted to the Admiralty, and is intended to resist torpedoes. It is said to be so constructed that while normally carried on the vessel's side out of the way of the guns, it may be drawn down over her bottom in five minutes. It is difficult to see how any device of this sort can be efficacious, as the explosion of a torpedo occurs along the line of least resistance, and it is hardly to be conceived that a vessel can be rendered so strong as to oppose more resistance than several feet of water tamping.

The United States anticipate trouble with the Indians in their possessions in Alaska. The savages have become very turbulent since the withdrawal of the troops from Sitka. The chief of the Kolosh tribe took possession of the Government buildings and asserted that he claimed the country because it belonged to him, and intended to enforce his claim.

A Washington despatch to the Times says Cyrus Field informed Secretary Eliot that if the Direct Atlantic cable was cast off from the American shore because of amalgamation with the old Cable Company, that it would be then connected at Nova Scotia with the lines of the Anglo-American Company.

No sooner has the British Parliament closed its session than prominent members of both parties have begun to perambulate the country with a species of political oratory which may be very conveniently dispensed with. Not even the excitement of the moors, or the fascination of seaside watering places, seems sufficient to impose a restraint upon them. Hence LORD GRANVILLE appears at the inauguration of a new Liberal Club at Bradford, and SIR STAFFORD NORTHCOKE, the Chancellor of the Exchequer, presides at the Annual meeting of a Conservative Association at Plymouth. The addresses delivered by each was intensely political, and was simply a rehearsal of all the good and bad things they had been saying during the session. In the judgment of the Chancellor of the Exchequer, the Ministry is strong and perfect; according to Lord Granville, it is the most feeble and vacillating the country has ever seen. This is not an edifying spectacle. It is somewhat new in the history of British politics; and at a crisis like the present, it is better that such charges and recriminations should be withheld. The members of the Government may with advantage become a little more reticent; the members of the Opposition ought in fairness to leave the Government unmolested in conducting grave negotiations upon which the peace of the country may depend.

It is announced, but whether or not with authority does not yet appear, that the Fishery Commission at Halifax has arrived at one important decision. That decision is that in fixing the compensation to be paid by the United States for the privileges accorded by the Washington Treaty it is not able to take into consideration the privileges of obtaining bait, ice and provisions, and of transshipping fish, these not being specially granted by the treaty. If this be true, then the whole question now before the Commission is reduced to very narrow limits, and it may become almost a question as to whether there was any necessity for appointing the Commission at all. In one sense the decision may prove favorable to Canada, but it will leave open a door for possible litigation and trouble in the future. It establishes the fact that Americans only possess the right to catch fish within the three-mile limit; the other privileges they are receiving through the favour of the Canadian people, and the Canadian Parliament may by act at its next session debar American vessels from purchasing bait, ice, or provisions, and from transshipping fish at Canadian ports, if, indeed the existing laws do not already debar them. Stripped of these privileges, the right of Americans would be reduced to small dimensions. Their own construction of the treaty places it in the power of Canada to practically defeat the treaty's apparent intention for remainder of the period. But with such a contingency where is the advantage of a treaty or of a Commission which was to adjust all these differences upon an amicable basis?

At a meeting on Friday a vote on the proposed grant to the Toronto and Ottawa Railway of \$200,000 bonus was carried by a large majority, provided that the line be independent.

A Burlington, Iowa, despatch states that Mayor Parsons suddenly resigned and left the city. It is stated that there is a heavy deficit in the school money, of which he was custodian, and he is charged with being a defaulter to the Merchants' National Bank of \$50,000. Other sufferers are reported. His whereabouts are unknown.

The St. Andrews Standard.

Saint Andrews, Sept. 19th, 1877.

A collector from the STANDARD OFFICE is visiting Subscribers, and it is expected they will be prepared to pay the bills, as we cannot be at the expense of sending a person so frequently for small amounts long over due. Having bills to meet for recent additions of printing material, which must be paid promptly, all accounts remaining unpaid, will be placed in legal hands for collection.

The Eastern War.

We do not pretend to write anything that is original about the war now being waged between Russia and Turkey, but simply condense from reports published from authentic sources. It certainly appears that the Russians are getting the worst of it as far as the reports go, and that the Turks have proved able and courageous soldiers, well officered, by whom, it is not easy to determine, for under cover of PASHA, there is more than one officer from English speaking countries, Baker Pasha, is none other than Valentine Baker formerly a Colonel of Cavalry in the British Army. Who Omar Pasha is, has yet to be made known. Fighting before Plevna is still carried on, the Turks have taken two redoubts and cannon held by Russians; they also defeated 5,000 Russians at Elena, and again at Plevna defeated the Russians, capturing several guns, killing and wounding 8,000, and completely routing Roumanian corps to the northeast of Plevna. This, if the rumors are correct, shows that the Russians have suffered a great defeat. The Turks have hoisted a flag which brings them men and money, and while other nations do not interfere they will march forward to success.

The International Railway.

The gentlemen who visited St. Andrews a few weeks ago, Hon. J. H. Pope, President of the International Railway (or Lake Megantic) as it was first named, and C. C. Colby, M. P., one of the Directors, visited Bangor last week, with a view of combining the interests on the proposed direct line from Montreal to a port in the Maritime Provinces. The Company is composed of energetic, mened men, who, aware of the great traffic which the line will possess when in operation, are anxious to have the work completed without unnecessary delay. It is satisfactory to observe in a late Montreal journal a favorable notice of the line, and the writer was pleased to mention the harbor of St. Andrews, as one offering facilities for a shipping port. As the work progresses we may have an opportunity of publishing some general information with reference to this railway of interest to the residents of Charlotte County.

Death of a Former Resident.

The melancholy duty devolves upon us of announcing the death of our old and respected friend, SAMUEL C. BUGBEE, at Oakland, California, on the 1st instant.

In early life Mr. Bugbee served an apprenticeship with Mr. Reuben Stevenson, an accomplished house-builder, whose daughter he afterwards married. Mr. Bugbee displayed talents for Architecture, which he cultivated, and after leaving here for Boston, became one of the principal architects in that city; so much so, that his services were engaged to plan and build the old Centenary (Methodist) Church at St. John, as well as other churches in the Province. About eighteen years ago, he removed to California, and resided in San Francisco, where he designed and superintended in company with his son Charles, many of the best buildings—notably the Stanford palace, and the magnificent private residence of Charles Crocker, Esq., and others.

Mr. Bugbee was always a warm patron of St. Andrews boys who went to seek their fortunes on the Pacific Slope, as many of them have testified. In all relations of life, he was a worthy man, respected by all with whom he came in contact. Until within a few months he enjoyed excellent health, but his constitution gave way, and he left the scene of his labors in the 55th year of his age. His bereaved family consisting of a wife, daughter and sons, have the kindly sympathy of their many friends in St. Andrews and the adjoining sections. In another column is copied a brief obituary notice from the San Francisco Chronicle of the 3d inst.

LOCAL MATTER.

Hon. John MacMillan, P. O. Inspector, was here last week.

The County Rifle practice will take place to-morrow at the range at Indian Point.

The Statutes of Canada, 40 Victoria, 1877, Vols 1 & 2 have been received. The work is published in the masterly style of the Canada Gazette office.

Our young friend Mr. George A. Curran, has been elected representative for Calais in the Legislature of Maine. Mr. Curran is a lawyer by profession, and a young man of ability and integrity.

The price of Flour is falling in the United States and Canada. Superfine is rated at \$1.50 @ \$5.50, other grades in proportion. XX Spring, \$5.75 @ \$7.25. This will consequently reduce the prices of flour in the Maritime Provinces.

Calais has a Propeller named the G. A. Gary which is engaged in freight traffic between Boston and Calais; the time occupied between ports is about 36 hours. She leaves Boston every Tuesday at 6 p. m., Portland next day, returning leaves Calais every Saturday.

From the scores of the shooting at Creedmoor, it is plain that the United States marksmen have beaten their British Cousins. Indeed it would be almost impossible to make better shooting. The British marksmen made fair shooting, but were several marks behind the men on this side of the Atlantic.

We are sorry to learn that the eldest son of C. H. Fisher, Esq., of the Fredericton Reporter, died on Friday morning last, from the effects of a fall from a woodpile, having struck on his head. We deeply sympathize with our respected contemporary in his affliction.

The parched earth was refreshed by heavy showers yesterday, which will be of great service to the after grass; the harvesting is mostly finished and it is satisfactory to learn, that the crops are larger than for several years; the turnip crop promises a good yield.

The Reform Club of Calais numbers upwards of 700 members; the Milltown Club 150, the St. Stephen Club upwards of 350, the St. Andrews Club 100. Thus the work of Reform is marking on, and the instances are few and far between of violations of the pledge.

THANKSGIVING DAY.—It is proposed by the Governors of the Provinces of the Dominion, to proclaim Thursday, the 22d day of November for a day of Thanksgiving to Almighty God, for the abundant harvest, and returning prosperity. It is a wise move, and one which should be made an annual offering by the Government.

It is reported by telegraphic advices, that the Marquis of Lorne intends visiting Nova Scotia, next month for the purpose of hunting moose. There is no doubt that should Princess Louise husband come to the Dominion, or the United States, he would receive a right loyal welcome; and as it is not improbable he may hold an important position in Canada, a visit to the Dominion would be of service to him.

The Mackerel with which our delightful Bay abounded for the past three weeks are becoming scarce. Many of the residents of this town have caught and pickled their winter supply; and several of our Calais friends also secured good hauls, besides enjoying sailing over the bay—of course we mean the waters of Passamaquoddy Bay, as to being "over the bay," in the common acceptance of the term, we will be silent, as we are blind to such matters, and as they were good "Iron Clads."

Building is being carried on extensively at St. Stephen according to the Courier, and very soon there will be no "burnt district," which is fast being filled up with a better class of buildings than recently destroyed; some have erected brick edifices in the place of wooden ones. The Watson House, although not so imposing a looking building as its predecessor, will no doubt be more remunerative to its owner than formerly, as it will meet a demand for stores and offices. Mr. Philip Breen, has a handsome brick building nearly finished which for a business location is not surpassed in the town. His large and well finished stable has no equal in the Province, and is let to Mr. George Foster, who has excellent horses and good carriages.

Our contemporary of the Courier has a few kindly words for the STANFORD, in his last issue, which we duly acknowledge, and have never regretted holding out the right hand of fellowship to him, something over twelve years ago when he was about commencing the publication of his paper. After years of labor and toil, and furnishing a large printing establishment and employing skilled labor, with the large income he derived, all was consigned to destruction by the ruthless flames of the 14th May last. Nothing daunted however, he issued a small sheet for a short time, until he purchased the well appointed Journal office, to which he has added largely modern material, and possesses one of the best offices in the Province, and in a large and thriving community. Of his ability to conduct a local journal, we have nothing to add, as his large list of subscribers and ample advertising and jobbing patronage, have established the fact. This could not have been accomplished without the expenditure of much intellectual and physical effort, which, had they been exerted in other professions would have realized a handsome competence, as well as a peace of mind, which newspaper life, with its attractions, seldom realizes, in comparatively small communities. This will apply to the Province generally, for it would not be difficult to point to those in the profession in the large business centres of Canada and particularly in the United States who have realized fortunes, and whose establishments from small beginnings have risen in value to hundreds of thousands. While wishing the Courier all prosperity we cannot indulge the hope, that it will ever arrive at that stage which will reward its present worthy editor and proprietor for his unwearied exertions. Any employment will give a bare living, but when brain power and physical exertion are required, they should receive an abundant reward.

FINNEN HADDIES—just received at CAMPBELL'S.

THE NARROWING OF THE GAUGE on the Railways has been carried on rapidly, with comparatively little delay in transmission of mails and passengers. On Monday last, the work was commenced on that portion of the N. B. & C. Railway from McAdam Junction upwards, the lower part of the line to St. Andrews, and St. Stephen branch, will be next in order. A uniform width of 4 feet 8 1/2 gauge connects all the lines from Halifax to the Pacific.

Several persons have been viewing this planet for the past fortnight by means of looking glasses for the purpose of seeing the moons recently discovered. All that can be seen is a reflection of the planet, as the looking glass is not a powerful telescope. The deception is caused by reflections between the silvered back and the front glass face of the mirrors. Let them try a metallic mirror and there will be no delusion, and no moons will be seen. People should remember that it has taken a very powerful lens to see the moons, while the glass is but a reflector.

Horse racing has become an institution in Fredericton and in a few other places in the Province. It has become popular through agricultural fairs in the United States, and without being an important aid to the improvement of the breed of horses, has led to a system of gambling as betting is largely indulged in, without alluding to other evil practices, which it is to be regretted are indulged in by those who should show a better example. Horses can be fitted for the road, riding or driving by being trained for the purpose; gambling in any shape is illegal as well as immoral, and should be discouraged.

We observe in our Provincial exchanges, that the Fall importations of English and Foreign Goods are being advertised, the Fall trade in such localities has set in earlier than usual with what is represented as a good demand.

Inquiries among importers and jobbers in New York develop the fact of greatly increased business for the fall which has already begun. Western and Southern buyers now there say the prospects are exceedingly favorable for an unusually brisk trade. The crops there are heavy, and confidence is restored.

Regulations have just been approved and issued by the British Admiralty for the appointment of torpedo-licentiates, torpedo-instructors, and torpedo-artificers, in the Navy.

Her Majesty has conferred the honor of Knighthood on Hon. W. B. Richards, Chief Justice of the Supreme Court of Canada; Hon. A. A. Dorian, Chief Justice of Quebec.

Information has been received that the Alaska Indians are in full rebellion against the United States.

Death of a Prominent Architect.

As the 8:10 boat was leaving the ferry landing, at the foot of Market street, on Saturday evening, S. C. Bugbee, the well-known architect, was seen to fall to the deck, and although immediate assistance was rendered, he died in a few minutes. He was on his way home from Clear Lake, and it is supposed over-exerted himself in hurrying from one boat to the other. Mr. Bugbee was born in New Brunswick in 1812. When quite a young man he went to Boston, where he practised his profession for several years. In 1854 he left Boston, coming directly to San Francisco, where his eminent abilities and integrity of character soon won the confidence of the community. Besides serving in the Board of Education, he represented the city in the Legislature of 1866-67. He was a member of the Occidental Lodge F. and A. Masons, also of the British Benevolent Society, and was a Trustee of the Ladies Protection and Relief Society. No man stood higher in his profession, and our city is in debt to his genius for many of its most beautiful buildings. Among the most prominent of his creations are the Stanford, Crocker and Colton mansions, Union Hall, Grand Opera House, California Theatre and many of our school buildings. Mr. Bugbee was 65 years of age at the time of his death.—San Francisco Chronicle, Sept. 3.

Fredericton Notes.

A man named Rinteen had several of his fingers taken off in a saw factory last week.

The gauge on the Fredericton Branch R. R. will be changed this week. The company are erecting a carshed for their increasing want.

The Old Fished Excursion to Woodstock by N. B. R. R. on Monday, was largely patronized. The train arrived on its return trip about 12:30 on Monday night.

As a young lad, the eldest son of Mr. Fisher, of the Reporter, was playing with some companions on Thursday Ev'g. last he fell from a pile of wood, one of the sticks striking him on the head and injuring his brain, from the effects of which he died next evening.

The sports last week passed off very well with the exception of a little unpleasantness in connection with the Regatta, which has created much discussion, was as follows: In the second race (professionals) two crews were entered—one representing Fredericton and the other from St. John. Both boats kept together for three quarters of a mile, where, after repeated attempts and being fully a hundred yards out of their course, the St. John crew succeeded in fouling their opponents. The Fredericton boat was immediately tumbled about—the others going over the course alone, and both claimed the race on a foul. The judge's decision which was not given until evening was that the race should be rowed over the following day, but the Fredericton men considering that they had already won, would not consent to row. The St. John crew at the appointments time went over the course and took the stakes.

With regard to the horse races everything appeared to be satisfactory, but the "knowing ones" assert that the fastest horses did not always win. A curious fact in connection is, that the winner of the three minute race made the time 2:30—several seconds faster than the 2:35 class.

NOTES AND ITEMS.

The Japanese Rebellion is crushed.

There are a dozen patients in the general hospital, Toronto, from typhoid fever.

St. Petersburg, Sept. 15.—The police have discovered a nihilist conspiracy to assassinate the Czar on the battle field.

The freight train on the St. Lawrence, above and below Montreal, is described as being unusually lively just now.

Cholera, but not in a serious form, has appeared in the southern provinces of Japan.

The famine has stricken the provinces of North China, and they are now further afflicted with plagues of locusts.

MARRIED.

At the Church of the Immaculate Conception, Milltown, St. Stephen, on the 13th Sept., by the Very Rev. James Quinn, assisted by the Rev. T. F. Walsh, R. J. RICHIE, Esq., Barrister at Law, St. John, to MARY A. eldest daughter of JOHN SHORT, Esq., St. Stephen. (We wish our young friends all the happiness of wedded life—and a long and prosperous journey.)

DIED.

In Oakland, Cal., 1st inst., suddenly, Samuel C. Bugbee, aged 65, a native of Charlotte Co. Provincial papers please copy.

The Premier.

Mr. Mackenzie only returned from the
Maritime Provinces the other day and is
about to leave the capital once more on a
tour through Ontario. It is said that he
may extend his peregrinations to the
Pacific slope; but this has not been defi-
nitely settled yet, or if it has, the result
has not transpired. His mission would
necessarily be a political one and possibly
his presence in British Columbia might
lead to a better understanding between
that Province and the rest of the Dominion.
A series of addresses from the responsible
head of the Canadian Government, deliv-
ered in his forcible manner and treating
of the difficult question at issue from the
practical stand-point which Mr. Mackenzie
usually occupies when reviewing men and
things, could do no harm and might be at-
tended with the happiest results. The
objection that the Premier would go there
merely on an electioneering excursion may
be well taken from a party view; the case,
however, is a peculiar one, and the near
approach of the elections rather tends to
heighten the sense of responsibility which
rests upon the leader of the Government
than to diminish it. The more immediate
object of Mr. Mackenzie's absence from
the capital, however, will be to assist at
the political demonstration which takes
place near the town of Simcoe on the 21st
inst. The Conservatives have had no less
than three picnics on the tapis for this
week, and it is only fair that the Reform-
ers should retaliate. The Simcoe demon-
stration promises to surpass everything of
the kind that has gone before it. Not
only are such prominent cabinet ministers
as Messrs. Cartwright and Huntington to
take part in the speech making, but even
the local government in the person of Mr.
Mowat is to ascend the stump.

MANHOOD: HOW LOST, HOW RESTORED!!

We have recently published a new edition
of Dr. CULVERWELL'S CELEBRATED ESSAY
of the radical and permanent cure (without
medicines) of Nervous Debility, Mental and Phys-
ical Incapacity, Impediments to Marriage, etc
resulting from excesses.
Price, in a sealed envelope, only 6 cents,
or two postage stamps.
The celebrated author in this admirable Essay
clearly demonstrates, from thirty years successful
practice, that alarming consequences may be rad-
ically cured, without the dangerous use of inter-
nal medicine, or the application of the knife:
pointing out a mode of cure at once simple, cer-
tain and effectual, by means of which every suf-
ferer, no matter what his condition may be, may
cure himself cheaply, privately and radically.
This Lecture should be in the hands of
every youth and man in the land.
Address,
THE CULVERWELL MEDICAL CO
41 ANN ST., NEW YORK.

New Brunswick, ss.

To the Sheriff of the County of Charlotte, or any
Constable in the said County, Greeting:
WHEREAS Jane Frankland, Administratrix
of the Estate and Effects of Simeon J.
Frankland, late of the Parish of Grand Manan,
in the said County of Charlotte, deceased, hath
by her petition bearing date the second day of
June, instant, represented that the personal es-
tate of the deceased which has come to her hands
is insufficient for the payment of the debts due
and owing by the said Estate, and hath prayed
that Licence may be granted to her to sell a part
of the Real Estate of the said deceased, sufficient
for the payment of the debts due by the said Es-
tate.

You are therefore requested to cite the heirs
at law of the said Simeon J. Frankland, and all
other persons interested, to appear before me at a Court
of Probate, to be held at my office in Saint An-
drews, on SATURDAY the 30th day of JUNE
instant at eleven o'clock in the forenoon, for the
consideration of the said petition, and the grant-
ing (if deemed necessary) of such Licence.
Give under my hand and the Seal of the said
Proba Court, the 2nd day of June, A. D. 1877.
GEO. D. STREET,
Judge of Probates for Charlotte
County.
S. H. WHITLOCK, Registrar of Probates for
Charlotte County.

VARIETIES.
TALKED IN HER SLEEP.—We have another instance of woman's subtlety and remarkable ingenuity. She is a South Eastern woman, and she wanted to go to the Opera House the other night to such a degree that it became the chief yarning of her soul, and her bean was so overlasted with the thought of it that she couldn't take a hint unless it was the size of a hay stack. When he came around to see her on Saturday night she was tired and told him so, soon futher convincing him of the fact by going to sleep on his shoulder. She didn't snore but pretty soon she began to murmur softly in her slumbers.
"Opera House," she faintly sighed.
"Umph," queried Joe.
"Want to go opera-house," came in a dulcet whisper.
"Eh! what's that?" demanded Joe, raising her head up very gently by the back hair.
"What's the matter Joe?" and the guileless darling rubbed her eyes wearily.
"Why, I was asleep wasn't I?"
"Yes, I guess you was. Do you talk in your sleep as a general thing?"
"Oh yes, sometimes, when I am worried about anything."
"Well, you shan't be worried about anything if I can help it. Let's go to the Opera House to the first thing that comes along."
"Thank you Joe; I don't care if I do. You are a dear old darling." And the little fraud paid him for his thoughtfulness in a legal tender that sounded like two shingles slapped together.

The fog doesn't agree with some people. During the recent fog, a gentleman living in Clinton Avenue, Brooklyn, returned home in the evening very fatigued. He said to his wife: "Marisha, lessens got-bred." "What did you say asked his wife. "Lessens grow bred." "What in heaven's name is the matter with you?" asked the uncomprehending wife. "Dono Guess rits re frog." "Frog?" said the wife, said the wife, with contempt in every tone of her voice. "It's the hot rum and whiskey punches you've been drinking, you miserable old rum bottle. Go to bed you incomprehensible old fool or I'll throw a pail of water over you." He is disgusted with this treatment of him by the partner of his income. But women, he says, never could understand scientific matters. They don't know the difference between fog and whiskey.

A bachelor says if you hand a lady a newspaper with a paragraph cut out of it, not a line of it will be read, but every interest felt in the paper by the lady will centre in finding out what the missing paragraph contained.

"What did you get?" asked a wife of her husband on his return from a hunting excursion of several days duration. "I got buck," he sententiously replied.

WHAT PAYS? 1877.
IT PAYS every Manufacturer, Merchant, Mechanic, Inventor, Farmer, or Professional man, to keep informed on all the improvements and discoveries of the age.
IT PAYS THE HEAD OF EVERY FAMILY to introduce into his household a newspaper that is instructive, one that fosters a taste for investigation, and promotes thought and encourages discussion among the members.

The Scientific American
which has been published weekly for the last thirty one years, does this, to an extent beyond that of any other publication; in fact it is the only weekly paper published in the United States devoted to MANUFACTURES, MECHANICS, INVENTIONS AND NEW DISCOVERIES in the Arts and Sciences.
Every number is profusely illustrated and its contents embrace the latest and most interesting information pertaining to the Industrial, Mechanical, and Scientific Progress of the world. Descriptions, with beautiful Engravings of New Inventions, New Implements, New Processes and Improved Industries of all kinds; Useful Notes, Receipts, Suggestions and Advice by Practical Writers, Workmen and Employers, in all the various arts forming a complete practical encyclopedia of New Inventions and Discoveries, containing a weekly record, not only of the progress of the Industrial Arts in our own country, but also of all New Discoveries and Inventions used every branch of Engineering, Mechanics, and Science abroad.

THE SCIENTIFIC AMERICAN
has been the foremost of all industrial publications for the past thirty one years. It is the oldest, largest, cheapest and the best weekly illustrated paper devoted to Engineering, Mechanics, Chemistry, New Inventions, Science and Industrial Progress, published in the world.
The practical Receipts are well worth ten times the subscription price, and for the shop and house will save many times the cost of subscription.
MERCHANTS, FARMERS, MECHANICS, ENGINEERS, INVENTORS, MANUFACTURERS, CHEMISTS, LOVERS OF SCIENCE, AND PEOPLE OF ALL PROFESSIONS, will find THE SCIENTIFIC AMERICAN useful to them. It should have a place in Family, Library, Study, Office and Counting Room; in every Reading Room, College and School. A new volume commences January 1st, 1877.
A year's number contains 832 pages and several Hundred Engravings. Thousands of volumes are preserved for binding and reference. Terms, \$3.20 a year by mail, including postage. Discount to Clubs. Special circulars, giving Club rates, sent free. Single copies mailed on receipt of 10 cents. May be had of all News Dealers.

PATENTS.
In connection with THE SCIENTIFIC AMERICAN, Messrs. Munn & Co. are Solicitors of American and Foreign Patents, and have the largest establishment in the world. More than fifty thousand applications have been made for patents through their agency.
Patents are obtained on the best terms. Models of New Inventions and Sketches examined, and advice free. A pamphlet containing full directions for obtaining Patents sent free. THE SCIENTIFIC AMERICAN Reference Book, a volume bound in cloth and gilt, containing the Patent Laws, Customs of the U. S., and 142 Engravings of mechanical movements. Price 25 Cents.
Address for the Paper, or concerning Patents, MUNN & CO., 37 Park Row, New York, Branch Office, Cor. F. and 7th Sts., Washington D. C.

VINEGAR BITTERS
PURELY VEGETABLE
DEWALKER'S CALIFORNIA
VINEGAR BITTERS

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BITTERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilious Diseases.

If men will enjoy good health, let them use VINEGAR BITTERS as a medicine, and avoid the use of alcoholic stimulants in every form.
R. H. McDONALD & CO.,
Druggists and General Agents, San Francisco, California, and cor. Washington and Charles Sts., New York.
Sold by all Druggists and Dealers.

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.
Grateful Thousands proclaim VINEGAR BITTERS the most wonderful invigorant that ever sustained the sinking system.

Bilious, Remittent, and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Complaints of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offspring of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertisement.
Scrofula, or King's Evil, White Swellings, Ulcers, Erysipelas, Swelled Neck, Gout, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc., etc. In these, as in all other constitutional diseases, WALKER'S VINEGAR BITTERS have shown their great curative powers in the most obstinate and intractable cases.
For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys, and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiating Blood.
Mechanical Diseases.—Persons engaged in Paints and Minerals, such as Gunners, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetters, Salt Rheum, Eruptions, Spots, Pimples, Pustules, Boils, Carbuncles, Ringworms, Scald Head, Sore Eyes, Erysipelas, Itch, Scurvy, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.
Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuges, no anthelmintics, will free the system from worms like these Bitters.
For Female Complaints, in young or old, married or single, at the dawn of womanhood or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.
Jaundice.—In all cases of jaundice, rest assured that your liver is not doing its work. The only sensible treatment is to promote the secretion of the bile and favor its removal. For this purpose use VINEGAR BITTERS.

Cleanse the Vitiating Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
R. H. McDONALD & CO.,
Druggists and General Agents, San Francisco, California, and cor. Washington and Charles Sts., New York.
Sold by all Druggists and Dealers.
