SIDNEY AND ISLANDS REVIEW

Vol. 2. No. 11

SIDNEY, B. C., FRIDAY, AUGUST 22, 1913

Subscription \$1.50 Per Year In Advance

A SUPERIOR SCHOOL FOR SIDNEY

A Higher Educational System For the Boys and Girls of This District is Now an Assured Fact—Too Much Credit Cannot Be Given to the Members of the Local School Board for Their Energy in Accomplishing This Progressive Event.

Published Below is a Copy of the Letter Received From the Superintendent of Education Stating That the Request of the School Board Would Be Granted.

Messrs. P. N. Tester, A. G. Cochran, and Alex. McDonald, the members of the School Board of North Saanich, have been busy men since their election to office a little over a month ago. Their one idea, on assuming office, was to secure for Sidney a Superior School for the boys and girls of this district, and to this end they devoted a great deal of time and made many sacrifices in regard to their several businesses to accomplish this end. Many were the trips made to Victoria to interview the heads of the educational department and the superintendent of education, Mr. Alexander Robinson.

This very important matter received the careful attention of the department from the moment of the first interview, and Mr. M. H. M. May, inspector of schools in this district, was instructed to proceed to Sidney and investigate conditions there and make a report back to the department of education on the number of scholars that would be able to attend this school if it were opened. One day early last week Mr. May arrived in town, and in company with members of the school board, made a careful canvas of Sidney and district, visiting the home of the children who were far enough advanced to be enrolled as members of a superior school. He reported favorably on the immediate establishment of a high school in Sidney, and as a result the above letter was received on August 16, by Mr. Alex. McDonald, secretary of the school board.

Education Office, Victoria, Aug. 15th, 1913.
Alexander McDonald, Esq., Sec., North Saanich School Board, Sidney, B.C.

Sir,—In respect of your application for a Superior School I am now in receipt of a report from Inspector May recommending the establishment of same. This Department, therefore, authorises such establishment. Superior Schools in rural school districts are required to teach the subjects peculiar to the senior grade of the public school course and to the junior grade of the high school course.

I am enclosing herewith requisition blank in connection with the High School free text books. No doubt the requisition in connection with public school free text books has been duly forwarded previously. I have the honour to be, Sir,

Your obedient servant,
ALEXANDER ROBINSON,
Superintendent of Education.

In another communication to the board Mr. May strongly advises that every effort should be made to have the school opened on August 25th, the date set for the opening of the public schools, with as large an attendance of high school pupils as possible, for a great deal depends upon the number of pupils that present themselves on the opening day, whether the school will be successful or not. He lays stress on the fact that even one day's delay may cause some of those already counted on to leave for the city school. The trustees have this fact in their minds, and as they have no pupils to spare, they are making arrangements to secure Berquist's small hall for the present accommodation of the school, until arrangements can be made to either build another room to the present public school or rent a more suit-

able place for the winter months.

At all events it is the intention of the board to have everything in readiness for the opening on August 25. It is also the intention of the trustees to promote Miss Logan from her former position as principal of the public school to that of teacher in the superior school. The trustees are to be congratulated on their choice, as Miss Logan justly deserves this recognition of her ability as a teacher and the record she made for herself at the entrance examinations held last June is all that any parent could desire. Out of a class of nine students who wrote on the examinations, eight passed with marks well above the number required.

The school board have also engaged the services of two other teachers for the public school and their choice fell on

Miss Florence E. Hall, who has had five years experience as a teacher. Two years of this time was spent in an ungraded school and the last three years in the Calgary city schools.

Miss Margaret Glen, a teacher who has had three years' experience in the Lady-smith public school, was the second choice. Both of these young ladies come highly recommended and the trustees feel that that they have made no mistake in their selection. Miss Macdonald, whom many will be sorry to see leaving the Sidney school, has accepted the position as teacher in the Deep Cove school, to fill the vacancy caused by Miss Simister going to Normal School at Vancouver.

Miss E. A. Buss is the choice of the board for the North Saanich school. All the vacancies on the teaching staff have now been filled and everything is in readiness for the opening on Aug. 25.

APPLICATION REFUSED.

Some time ago a petition signed by a number of residents in the southern part of the North Saanich school district, was forwarded to the educational department. On August 15, Sec. McDonald received a reply from Mr. Alexander Robinson, superintendent of education, stating that the request had been considered, and that the department could not at present see fit to establish a school in that district.

SOUTH SAANICH FARMERS HOLD ANNUAL PICNIC

A Jolly Crowd Spend the Day at the Beach, and Indulge In Sports of All Kinds

On Saturday last the farmers of North Saanich held their first annual picnic at the beach facing James Island. A good gathering of new and old time residents of the district spent a pleasurable day at this refreshing and beautiful spot on Saanich Peninsula. Baseball and other sports of the athletic order were indulged in with great zest during the afternoon. The "tug-o-war," won by the single men against the married, and the married ladies race, won by Mrs. Brooks, were the most exciting events engaged in with the utmost good humor. Messrs. Dean, Michell and Stewart officiated.

Is Your Name Here?

Since our announcement in last week's issue the following names have been added to the subscription list to establish a fire brigade in Sidney:

SATURDAY, AUGUST 30, DATE SELECTED FOR ATHLETIC MEET

THE MAIN FEATURE OF THE DAY WILL BE A RELAY RACE—FIVE OPEN EVENTS ON THE PROGRAM

All Arrangements For the Big Day Were Completed by the Committee at a Meeting Held on Tuesday Evening—Over \$200 in Prizes, a Full Detail of Which Will Appear Later.

The committee in charge of the Athletic meet to be held under the auspices of the Sidney Athletic Association, on Saturday, August 30th, on the grounds on Third street, met on Tuesday evening and completed all arrangements necessary to make the day a grand success. A very lengthy programme of about thirty events was drawn up and accepted by the committee. These events include races for boys and girls of tender years, as well as young men, young ladies, married ladies, and married men, and last, but not least, there is a race for the fat men. Some one with a keen sense of humor has made the following statement, "All the world loves a fat man," and everyone dearly loves to see a fat man run. This race, no doubt, will receive many entries, as there are quite a number of our citizens that tip the scales at 240 pounds and over.

Another special feature of the day's sports will be a bicycle race for local riders. This race will start, if the present arrangement is carried out, at the Methodist church on the East road, down Beacon avenue to Second street, and then along this street to the athletic grounds. This race will receive many entries as there are a large number of riders in this district all eager to show their ability as racers.

Another feature, and one that the committee are confident will be the drawing card of the day, is the relay race. There will be four men in each team and each man will run 220 yards, making 880 yards in all covered by each team. There are sure to be three or four entries in this

race, as the event is an open one, and teams from outside points are eligible to enter.

The other open events of the day are the 220 yard and 440 yard flat races, the 120 yard hurdle race and the 50 yard sack race. In the latter race boys under 18 years are not allowed to compete, but the running races are open to all who desire to enter, provided they are athletes in the true sense of the word.

All the other races on the programme are open to residents of Sidney and district, Saanichton, Keatings, the islands to the east and north of Sidney, and in fact any other district outside of the city of Victoria and the southern part of the South Saanich municipality, particularly that part of the municipality bordering on the city of Victoria. The committee thought it advisable to make this restriction on account of the fact that there are a number of athletes living in South Saanich who work in the city and are under training there nearly all the year, and they considered it hardly fair that these should be allowed to enter against the local talent who have not these opportunities.

Mr. P. N. Tester, president of the Sidney Athletic Association, has received the following letter from the secretary-treasurer of the British Columbia Amateur Athletic Union giving its consent to the holding of the annual meet here:

P. N. Tester, Esq., Sidney, B.C.
Dear Sir:—Herewith I enclose sanction for track meet to be held at Sidney,

EDUCATIONAL FACILITIES

The greatest thing to start life with these days is a good sound education. Nothing worth while can be accomplished without it, and with the splendid educational advantages of this country afforded by our public schools, there is no excuse save that of health, for a child not being allowed by its parents to benefit thereby to the fullest extent.

No little amount of commendation should be given our school trustees for their efforts to obtain for Sidney a superior school. Not only would the establishment of such a one be a boon to those at present resident in the district to be able to avail themselves of the opportunity of having their children attend a local school without the additional expense, as heretofore, of having to send them to town, thereby necessitating the additional expense of boarding them out, to say nothing of depriving them of a parent's constant care and of home influence, but also it would encourage other people with families to settle in the district.

One of the first things a parent will enquire about before deciding upon a location for a home is the educational facilities.

Surely some of our neighbors on Salt Spring or an adjacent island would send their children to Sidney rather than to a larger town.

Are we going to let such a splendid chance slip through our fingers for the sake of the lack of two children to make up the required number? Surely not—it is the duty of every one with children, whether of sufficient age or qualification to attend such a school or not, to work for the attainment of such a splendid educational end as the establishment of the superior school in Sidney.

A SUGGESTION

We had the pleasure in our last issue of publishing a letter from one of our newer residents on the subject of Fire Brigade formation, and we would suggest to the commissioners that work along the lines set out could not possibly be wasted.

It is certainly a reasonable and well taken point that a brigade would be primarily protecting the interests of the fire insurance companies holding risks in the district, but it is none the less the duty of any person owning anything in the way of property to subscribe to the fund, as every dollar counts.

Everyone cannot afford to give \$10 or \$20, but there are few in this flourishing little town of ours who cannot spare \$1, and subscriptions of any size will be gladly received by the commissioners.

THE LATEST FASHION

The times in publishing the report of a wedding which took place at Christ Church Cathedral on Saturday last, gave us the following startling description of the bridegroom's travelling costume:

"Mr. and Mrs. Mogg left for the train amid showers of rice and confetti, the former wearing a becoming suit of white serge and a hat of soft black tagel straw with a crown of raspberry charmeuse and a knot of French flowers at the side."

We sincerely trust that the fashion will not extend to Sidney, but of course it might be accounted for in Victoria as the aftermath of the Carnival celebrations.

WHO IS RESPONSIBLE?

No criticism or censure could be too severe on those responsible for the road-work of this district.

Our roads would be a disgrace to a backwoods community, and a district as favored as we are with the necessary material so conveniently and easily obtained, there is no excuse for their present

condition except ignorance and incompetence.

As an example of the way repairs (so called) are carried out, we might well point out the lower end of Beacon avenue. A gentleman on seeing the regularity with which the shingle was piled in the centre of the road, asked what necessitated earthworks being thrown up in our main street. The painful exhibition of lack of knowledge with which the shingle was distributed—irrespective of season also—is deplorable.

As there is no representative of the people at present but the board of Trade, the matter should certainly be taken up by them with the authorities and a remedy obtained, even at the cost of a political head.

THE CONSUMMAT

Direct Connection With Vancouver
Laying of Thirty-mile

British Columbia has many records to its credit in connection with its progress, and the latest has attracted the attention of electrical experts the world over. It is the laying of the new submarine telephone cable across the Gulf of Georgia, between Point Grey headland on the mainland and New-castle Island, lying opposite Nanaimo and just off the eastern coast of Vancouver Island. The length of this cable between terminals is 32.6 statute miles, being in one continuous piece, while it is laid at a maximum depth of 1,380 feet. This cable is the longest submarine telephone connection of its kind, and with two exceptions is the longest continuously-loaded cable in existence.

Telephone communication between Victoria, the capital, and Vancouver, the great commercial centre of British Columbia, is taken so much as a matter of course that one hardly thinks of the time when it was not possible. Yet the cable which has been used in the past was laid less than eleven years ago, having been put down in October, 1902. That was before the day of long submarines, which have been made possible by recent inventions, such as the Pupin coils and continuous loading. These devices, while not new, have been well proven out in recent years. With coils, the inductance, giving better transmission, is lumped, the coils being placed at regular intervals;

UNLOADING

while with continuous loading the inductance is distributed the entire length of the cable. The latter method makes it much easier to pay out the cable from the ship. This system of loading is used on the new Gulf cable. It was devised by Krarup, a Danish telegraph operator, and consists of a winding of fine iron wire around the copper conductor under the insulation. A rather long-about route was employed to reach Vancouver Island by telephone previous to this month. The line went via New Westminster to Bellingham, thence to Lummi Island, Orcas Island, Shaw Island, San Juan Island and across to Victoria, necessitating five sections of submarine cable. The longest of these was ten miles. Not only did this line carry the traffic between Vancouver Island and the mainland, but it was also used for communication between Victoria and Washington state points. Because of the length of the route and varying conditions, transmission between points on Vancouver Island north of Victoria was not satisfactory. For that reason it was planned to lay a cable on the most direct route possible. Now the line runs straight across to Vancouver Island from Vancouver, and goes down

THE CONSUMMATION OF A BIG CABLE PROJECT

Direct Connection With Vancouver Island Successfully Accomplished on June 16 by Laying of Thirty-mile Submarine Wire—A Memorable Occasion.

British Columbia has many records to its credit in connection with its progress, and the latest has attracted the attention of electrical experts the world over. It is the laying of the new submarine telephone cable across the Gulf of Georgia, between Point Grey headland on the mainland and Newcastle Island, lying opposite Nanaimo and just off the eastern coast of Vancouver Island. The length of this cable between terminals is 32.6 statute miles, being in one continuous piece, while it is laid at a maximum depth of 1,380 feet. This cable is the longest submarine telephone connection of its kind, and with two exceptions is the longest continuously-loaded cable in existence.

Telephone communication between Victoria, the capital, and Vancouver, the great commercial centre of British Columbia, is taken so much as a matter of course that one hardly thinks of the time when it was not possible. Yet the cable which has been used in the past was laid less than eleven years ago, having been put down in October, 1902. That was before the day of long submarines, which have been made possible by recent inventions, such as the Pupin coils and continuous loading. These devices, while not new, have been well proven out in recent years. With coils, the inductance, giving better transmission, is lumped, the coils being placed at regular intervals;

MR. R. L. PICKERING
Manager B. C. Telephone Company
at Sidney.

to Victoria from Nanaimo, connecting with intervening points, and also goes north to Courtenay, Cumberland and Comox, as well as west to Alberni. Thus every point on the island is brought in as close touch with the mainland, as far as telephone communication is concerned, as is North Vancouver with Vancouver.

To secure utmost efficiency of the new cable, new copper circuits were strung by the B. C. Telephone Com-

stantly in the field. They are aware of expansion perhaps before provincial authorities and plans are always prepared in advance of the time when service may be required. So, when an expenditure of nearly a quarter of a million dollars is made on a long distance line of communication, it indicates progress and expansion in the districts which it serves.

The W. T. Henley Telegraph Works Company, of London, were the makers of the big submarine, and it was under process of manufacture for something over seven months. There are four copper wires, known as conductors, in the cable, each of which weighs three hundred pounds per nautical mile. Each of these wires is reinforced with a wrapping of fine copper wire, while over this again is the iron wire, seventy turns to the inch, which is the continuous-loading feature. Each complete conductor is thoroughly insulated with gutta percha, about 32,000 pounds being used, at a cost of from \$1.50 to \$2 per pound. The four insulated wires are placed together, the interstices being filled tightly with tarred yarn, and around the whole is brass tape. This insulated core is heavily protected by a series of galvanized steel wires, each nearly one-quarter of an inch in diameter, which are imbedded in tarred yarn and compound and twisted round the core.

The shorter cable across Saanich In-

UNLOADING THE SAANICH INLET CABLE

while with continuous loading the inductance is distributed the entire length of the cable. The latter method makes it much easier to pay out the cable from the ship. This system of loading is used on the new Gulf cable. It was devised by Krarup, a Danish telegraph operator, and consists of a winding of fine iron wire around the copper conductor under the insulation.

A rather long-about route was employed to reach Vancouver Island by telephone previous to this month. The line went via New Westminster to Bellingham, thence to Lummi Island, Orcas Island, Shaw Island, San Juan Island and across to Victoria, necessitating five sections of submarine cable. The longest of these was ten miles. Not only did this line carry the traffic between Vancouver Island and the mainland, but it was also used for communication between Victoria and Washington state points. Because of the length of the route and varying conditions, transmission between points on Vancouver Island north of Victoria was not satisfactory. For that reason it was planned to lay a cable on the most direct route possible. Now the line runs straight across to Vancouver Island from Vancouver, and goes down

pany between Nanaimo and Victoria, using the most direct route, which called for another section of submarine cable across Saanich Inlet. This, however, was only two miles and a half in length. It contains ten pairs of wires in comparison with two pairs in the big cable, the increased number being necessary to take care of inter-island talking traffic. In addition, copper circuits were established on the mainland between Point Grey and the Seymour exchange of the company. A feature of the aerial construction is the highest telephone poles in the province, erected at the Brechin mine at Nanaimo, and the two on Newcastle Island, immediately opposite. These poles cost \$200 each to put into place, while the cost of the whole new route, cable and all, is nearly \$250,000.

Ordinarily, one looks at a figure of this kind merely as a statistic. It has a greater value when it is remembered that this is an extra expenditure, made so that a better service can supersede that which has served all purposes in the past, but which is now inadequate. Public service corporations, above all others, must keep closely in touch with progress, and to this end their commercial and plant engineers are con-

EDUCATIONAL FACILITIES

The greatest thing to start life with
these days is a good sound education.
Nothing worth while can be accomplished
without it, and with the splendid educa-
tional advantages of this country afforded
by our public schools, there is no excuse
save that of health, for a child not being
allowed by its parents to benefit thereby
to the fullest extent.

No little amount of commendation
should be given our school trustees for
their efforts to obtain for Sidney a super-
ior school. Not only would the establish-
ment of such a one be a boon to those at
present resident in the district to be able
to avail themselves of the opportunity of
having their children attend a local school
without the additional expense, as here-
tofore, of having to send them to town,
thereby necessitating the additional ex-
pense of boarding them out, to say nothing
of depriving them of a parent's constant
care and of home influence, but also it
would encourage other people with fami-
lies to settle in the district.

One of the first things a parent will
enquire about before deciding upon a
location for a home is the educational
facilities.

Surely some of our neighbors on Salt
Spring or an adjacent Island would send
their children to Sidney rather than to a
larger town.

Are we going to let such a splendid
chance slip through our fingers for the
sake of the lack of two children to make
up the required number? Surely not—it
is the duty of every one with children,
whether of sufficient age or qualification
to attend such a school or not, to work
for the attainment of such a splendid
educational end as the establishment of
the superior school in Sidney.

A SUGGESTION

We had the pleasure in our last issue of
publishing a letter from one of our newer
residents on the subject of Fire Brigade
formation, and we would suggest to the
commissioners that work along the lines
set out could not possibly be wasted.

It is certainly a reasonable and well
taken point that a brigade would be
primarily protecting the interests of the
fire insurance companies holding risks in
the district, but it is none the less the
duty of any person owning anything in
the way of property to subscribe to the
fund, as every dollar counts.

Everyone cannot afford to give \$10 or
\$20, but there are few in this flourishing
little town of ours who cannot spare \$1,
and subscriptions of any size will be
gladly received by the commissioners.

THE LATEST FASHION

The times in publishing the report of a
wedding which took place at Christ
Church Cathedral on Saturday last, gave
us the following startling description of
the bridegroom's travelling costume:

"Mr. and Mrs. Mogg left for the train
amid showers of rice and confetti. The
former wearing a becoming suit of white
serge and a hat of soft black tagel straw
with a crown of raspberry charmeuse
and a knot of French flowers at the side."

We sincerely trust that the fashion will
not extend to Sidney, but of course it
might be accounted for in Victoria as
the aftermath of the Carnival celebrations.

WHO IS RESPONSIBLE?

No criticism or censure could be too
severe on those responsible for the road-
work of this district.

Our roads would be a disgrace to a
backwoods community, and a district as
favored as we are with the necessary
material so conveniently and easily ob-
tained, there is no excuse for their present

condition except ignorance and incompet-
ence.

As an example of the way repairs (so
called) are carried out, we might well
point out the lower end of Beacon avenue.
A gentleman on seeing the regularity
with which the shingle was piled in the
centre of the road, asked what necessi-
tated earthworks being thrown up in our
main street. The painful exhibition of
lack of knowledge with which the shingle
was distributed—irrespective of season
also—is deplorable.

As there is no representative of the
people at present but the board of Trade,
the matter should certainly be taken up
by them with the authorities and a rem-
edy obtained, even at the cost of a politic-
al head.

624 Fort St., Victoria.

Beacon Ave., Sidney, B.C.

THE CONSUMMAT

Direct Connection With Vancou
Laying of Thirty-mil

British Columbia has many records
to its credit in connection with its
progress, and the latest has attracted
the attention of electrical experts the
world over. It is the laying of the new
submarine telephone cable across the
Gulf of Georgia, between Point Grey
headland on the mainland and New-
castle Island, lying opposite Nanaimo
and just off the eastern coast of Van-
couver Island. The length of this ca-
ble between terminals is 32.6 statute
miles, being in one continuous piece,
while it is laid at a maximum depth
of 1,380 feet. This cable is the longest
submarine telephone connection of its
kind, and with two exceptions is the
longest continuously-loaded cable in
existence.

Telephone communication between
Victoria, the capital, and Vancouver,
the great commercial centre of British
Columbia, is taken so much as a mat-
ter of course that one hardly thinks of
the time when it was not possible. Yet
the cable which has been used in the
past was laid less than eleven years
ago, having been put down in October,
1902. That was before the day of long
submarines, which have been made
possible by recent inventions, such as
the Pupin coils and continuous load-
ing. These devices, while not new,
have been well proven out in recent
years. With coils, the inductance, giv-
ing better transmission, is lumped, the
coils being placed at regular intervals;

UNLOADIN

while with continuous loading the in-
ductance is distributed the entire
length of the cable. The latter method
makes it much easier to pay out the
cable from the ship. This system of
loading is used on the new Gulf cable.
It was devised by Krarup, a Danish
telegraph operator, and consists of a
winding of fine iron wire around the
copper conductor under the insulation.
A rather long-about route was em-
ployed to reach Vancouver Island by
telephone previous to this month. The
line went via New Westminster to
Bellingham, thence to Lummi Island,
Orcas Island, Shaw Island, San Juan
Island and across to Victoria, necessi-
tating five sections of submarine cable.
The longest of these was ten miles.
Not only did this line carry the traffic
between Vancouver Island and the
mainland, but it was also used for
communication between Victoria and
Washington state points. Because of
the length of the route and varying
conditions, transmission between points
on Vancouver Island north of Victoria
was not satisfactory. For that reason
it was planned to lay a cable on the
most direct route possible. Now the
line runs straight across to Vancouver
Island from Vancouver, and goes down

THE CONSUMMATION OF A BIG CABLE PROJECT

Direct Connection With Vancouver Island Successfully Accomplished on June 16 by Laying of Thirty-mile Submarine Wire—A Memorable Occasion.

British Columbia has many records to its credit in connection with its progress, and the latest has attracted the attention of electrical experts the world over. It is the laying of the new submarine telephone cable across the Gulf of Georgia, between Point Grey headland on the mainland and Newcastle Island, lying opposite Nanaimo and just off the eastern coast of Vancouver Island. The length of this cable between terminals is 32.6 statute miles, being in one continuous piece, while it is laid at a maximum depth of 1,380 feet. This cable is the longest submarine telephone connection of its kind, and with two exceptions is the longest continuously-loaded cable in existence.

Telephone communication between Victoria, the capital, and Vancouver, the great commercial centre of British Columbia, is taken so much as a matter of course that one hardly thinks of the time when it was not possible. Yet the cable which has been used in the past was laid less than eleven years ago, having been put down in October, 1902. That was before the day of long submarines, which have been made possible by recent inventions, such as the Pupin coils and continuous loading. These devices, while not new, have been well proven out in recent years. With coils, the inductance, giving better transmission, is lumped, the coils being placed at regular intervals;

at Sidney.

to Victoria from Nanaimo, connecting with intervening points, and also goes north to Courtenay, Cumberland and Comox, as well as west to Alberni. Thus every point on the island is brought in as close touch with the mainland, as far as telephone communication is concerned, as is North Vancouver with Vancouver.

To secure utmost efficiency of the new cable, new copper circuits were strung by the B. C. Telephone Com-

stantly in the field. They are aware of expansion perhaps before provincial authorities and plans are always prepared in advance of the time when service may be required. So, when an expenditure of nearly a quarter of a million dollars is made on a long distance line of communication, it indicates progress and expansion in the districts which it serves.

The W. T. Henley Telegraph Works Company, of London, were the makers of the big submarine, and it was under process of manufacture for something over seven months. There are four copper wires, known as conductors, in the cable, each of which weighs three hundred pounds per nautical mile. Each of these wires is reinforced with a wrapping of fine copper wire, while over this again is the iron wire, seventy turns to the inch, which is the continuous-loading feature. Each complete conductor is thoroughly insulated with gutta percha, about 32,000 pounds being used, at a cost of from \$1.50 to \$2 per pound. The four insulated wires are placed together, the interstices being filled tightly with tarred yarn, and around the whole is brass tape. This insulated core is heavily protected by a series of galvanized steel wires, each nearly one-quarter of an inch in diameter, which are imbedded in tarred yarn and compound and twisted round the core.

The shorter cable across Saanich In-

UNLOADING THE SAANICH INLET CABLE

while with continuous loading the inductance is distributed the entire length of the cable. The latter method makes it much easier to pay out the cable from the ship. This system of loading is used on the new Gulf cable. It was devised by Krarup, a Danish telegraph operator, and consists of a winding of fine iron wire around the copper conductor under the insulation.

A rather long-about route was employed to reach Vancouver Island by telephone previous to this month. The line went via New Westminster to Bellingham, thence to Lummi Island, Orcas Island, Shaw Island, San Juan Island and across to Victoria, necessitating five sections of submarine cable. The longest of these was ten miles. Not only did this line carry the traffic between Vancouver Island and the mainland, but it was also used for communication between Victoria and Washington state points. Because of the length of the route and varying conditions, transmission between points on Vancouver Island north of Victoria was not satisfactory. For that reason it was planned to lay a cable on the most direct route possible. Now the line runs straight across to Vancouver Island from Vancouver, and goes down

pany between Nanaimo and Victoria, using the most direct route, which called for another section of submarine cable across Saanich Inlet. This, however, was only two miles and a half in length. It contains ten pairs of wires in comparison with two pairs in the big cable, the increased number being necessary to take care of inter-island talking traffic. In addition, copper circuits were established on the mainland between Point Grey and the Seymour exchange of the company. A feature of the aerial construction is the highest telephone poles in the province, erected at the Brechin mine at Nanaimo, and the two on Newcastle Island, immediately opposite. These poles cost \$200 each to put into place, while the cost of the whole new route, cable and all, is nearly \$250,000.

Ordinarily, one looks at a figure of this kind merely as a statistic. It has a greater value when it is remembered that this is an extra expenditure, made so that a better service can supersede that which has served all purposes in the past, but which is now inadequate. Public service corporations, above all others, must keep closely in touch with progress, and to this end their commercial and plant engineers are con-

let, made by the Canadian British Insulated Company, of Prescott, England, contains ten conductors within a lead sheath. The diameter is a little greater than the other, which is two inches, and was much stiffer to handle because of the different interior manufacture.

On the four wires three conversations will be possible at the same time. In addition four telegraph circuits will also be maintained, all operating simultaneously without interference. It is proposed to devote one telephone circuit to business originating out of Nanaimo, which will include traffic from the small towns to the north and west and for a short distance south. The other two circuits will be required for business between Victoria and Vancouver.

The Gulf cable arrived in Vancouver on May 31st on the Harrison liner Crown of Galicia. It was stowed in a specially constructed steel tank, twenty-five feet in diameter and twelve feet deep, and was kept immersed in water throughout the voyage in order to protect the insulation from the heat. By means of a hand unloading gear, rigged for power, the cable was trans-

Here Is Your Chance to Make Some Pocket Money

THE REVIEW SUBSCRIPTION CONTEST

**\$30.00 Given Away
IN CASH PRIZES**

Contest Opens August 15, and Closes Nov. 15

Costs You Nothing to Enter

In our issue of Aug. 15 we commenced a genuine contest, for which we are offering the following:

- 1st Prize—\$15.00 in Gold
- 2nd Prize—\$10.00 in Gold
- 3rd Prize—\$5.00 in Gold

The rules and conditions of the contest are as follows:

1. Anyone is entitled to enter who deposits with the Editor one coupon properly filled in. Coupons will appear in the issue of August 15, and all issues during term of contest.
2. Points will be awarded as follows:
For every Coupon - - - - - 5 points
For every paid up Annual Subscription of \$1.50 to The Review 100 points
For every Half-year Subscription of 75c to The Review - 50 points
For every Three Months Subscription of 40c to The Review 10 points
3. No first prize will be awarded unless the number of points secured by the highest competitor is 3,000 or more.
4. No points will be awarded for subscriptions unless accompanied by cash for same.
5. Competitors to turn in all subscriptions and coupons weekly. Any number of coupons of one issue count. Address "Contest Editor, Review."
6. During the contest no commission for subscriptions will be paid.

**The Standing of all Competitors
will be Published Each Week**

Get in touch with that friend who wants to know all about Sidney and district and serve a double purpose by getting his subscription for

HERE, THERE AND EVERYWHERE

Not Suffragettes, Anarchists

London, Aug 11.—"You women are overstepping the ordinary bounds of lawlessness, you are becoming anarchists," said the magistrate in Bow street police court today, in sentencing the militant suffragists who took part in the street fighting yesterday when Sylvia Pankhurst led a mob of 10,000 women in an attempted assault upon the residence of Premier Asquith.

Edith Billings was sentenced to pay a fine of \$10 or spend one month in jail, and Kathleen Jarvis was sentenced to two months at hard labor.

Verity Oates and Gwendoline Cook were discharged on their promise to take part in no more Sunday riots of women in the future.

Four other suffragettes were bound over in the sum of \$40 to keep the peace. A laborer who had taken part in the rioting was sentenced to two months. He announced that he would not go on a hunger strike.

Object to Polacks

Hull, August 10.—Wrightville citizens had a largely signed petition before the Hull council at the last meeting, asking that the chief of police be asked to order a number of Polacks away from houses on Farley and Alonzo streets and to see that they vacate the city.

The request goes on to say that the mentioned residents are a disgrace to the city, being drunk frequently and having free-for-all fights nearly every night. The houses in question were 82 Alonzo and 47 Farley streets.

Residents of that ward are aldermen Davies and Black, and they supported the petition. "From 25 to 35 Polacks live in one house," said alderman Black, "and they are fighting all the time, knives and bottles being used in the rows."

Alderman Davis said that he had personally seen these conditions. He said that the M. O. H. was aware of the condition existing and should force the offenders to obey the law. He moved that the chief of police and the M. O. H. make an investigation and see that the law is enforced. This motion carried.

Seattle's Population

Seattle, Aug. 15.—Figures, compiled as a result of what was probably the most exact count ever made of Seattle residents, as announced today, establish that the city's population totals 301,670.

The census was taken by 181 mail carriers in every part of the city under the direct supervision of Superintendent

of Mails Charles I. Lynch, who was instructed to prepare the report by Postmaster George F. Russell for submission to Washington, D.C.

The thorough manner in which it was conducted is shown by the fact that it enumerated every family, every house under construction, every person receiving mail, and even the number of houses, offices and apartments where mail is delivered.

Among the most notable features of the elaborate report is the proof that the figures announced by the government census July 1, 1913, for Seattle, was conservative, and approximately 6,500 less than the actual count of the mailmen. The government total was announced as 295,225.

Couldn't Find Diamonds

Ottawa, August 11.—"As a diamond country there is nothing doing," This was the remark made by R. E. G. Burroughs, a prospector sent to the Labrador country by a party of Ottawa capitalists about six months ago when it was reported that rich diamond finds had been made, and who has just returned. Burroughs and his party were at times as far as 700 miles from civilization in the Mississinipi country. They made a thorough search and found nothing that even looked like diamonds. Other minerals were discovered in a country having a soil formation very much like that of Cobalt, but these have not yet been analysed.

The Hindu Raid

Ottawa, August 3.—A concern just incorporated under the name of the Simla Ship company is taken as lending some color to the reports from British Columbia of fears of a Hindu invasion, says an evening paper. The company is authorized to charter ships and enter upon a general shipping business. It has been incorporated by a Vancouver law firm.

At the present time this class of British subjects, who are evidently regarded on the coast as most undesirable, are kept out by the provision that they must come in a direct line from their native country. There being no such line of steamships the influx is limited and by establishing a line of steamships and chartering vessels directly operated, the existing limitations of the law would be evaded.

It is not known here definitely that the incorporation is designed to carry out the objects credited to the British Columbia Hindu colony, co-operating with their people at home, but there is some suspicion of this.

SATURDAY, AUGUST 30, DATE OF ATHLETIC MEET

(Continued from page 1)

Aug. 30th, as per your letter of the 12th and acknowledge receipt of \$1 for same. Wishing you every success with your meet,

Yours truly,
HARRY SKUCE,
Sec. Treas.

Posters will be issued shortly giving the full announcement of the meet and the following programme will be carried out, commencing at one 1.30, on August 30th, on the grounds of the association:

1. 50 yard race for girls under 8 years
2. 50 yard race for boys under 8 years
3. 100 yard race for men
4. 50 yard race for girls under 10 years
5. 50 yard race for boys under 10 years
6. 100 yard race for men, open
7. 100 yard race for girls under 14 years
8. 100 yard race for boys under 14 years
9. Putting the shot.
10. Running broad jump
11. Running high jump
12. One and one-half mile bicycle race
13. 220 yard race, open
14. 220 yard race, local
15. 100 yard race, young ladies over 18 yrs.
16. 100 yard race, men over 40 years
17. 50 yard race, fat men over 240 lbs.
18. Relay race, open
19. Vaulting, with pole
20. Kicking football
21. Throwing lacrosse ball
22. Throwing baseball
23. Running bases
24. 440 yard race, open

25. 120 yard hurdle race, open
26. 50 yard married ladies race
27. 100 yard married men's race
28. Running hop, step and jump
29. One mile running race
30. Tug-of-war, mill vs. district

The selection of officials for the day received the careful attention of the committee, and the following were selected:

Starter, Mr. Fletcher North. Announcer, P. N. Tester. Clerks of course, Messrs. A. E. Moore, L. E. Spencer, H. A. Dennis, W. H. Warne, A. Critchley, and F. M. Humber. Timers, Messrs. S. A. Kelly and C. Moses. Judges, H. A. McKillican and R. H. McKenzie. Referee, Seaver Halseath.

The committee on prizes will make the selection early next week and as they have quite a lot of money on hand, donated by the business men of Sidney and Victoria, they will be handsome and well worth the effort necessary to obtain one of them. Most of the events will have at least two prizes and in some of the particularly hard and trying races three prizes will be awarded.

The only thing necessary to make the day a better success than in former years is a bright sunny day, and if the present weather conditions hold for any length of time we are almost sure of that at this time of year.

The latest bit of enterprise in Jerusalem is the beginning of a telephone system. For the first time in all its long history the Holy City hears the tinkle of a telephone bell. The new court house at Jerusalem has been connected with the old serai, and the system is to be extended until, first, all official points, and then business houses and residences are supplied with telephone talk.

SECOND INTERNATIONAL EGG LAYING CONTEST

A Most Satisfactory Report for the Eight
Months Just Closed Has Been Sent
Out by the Department

On December 2nd, 1912, the Provincial
Department of Agriculture inaugurated
at the Exhibition grounds, Victoria, an
international egg laying contest. There
were in all thirty-six pens entered, the
great majority of them being from the
Province of British Columbia. The out-
side points are fairly well represented,
one pen coming from Mead, Nebraska,
U.S. Nearly all classes of domestic
fowls are represented by at least one pen.
White Leghorns are the predominating
feature of the contest, eleven pens being
entered from Vancouver Island alone.
These fowl not only head the list in the
number of pens entered, but take first
place in egg production.

Pen No. 15, White Leghorns, owned
by Norie Bros., Cowichan, takes the lead
for the eight months just closed by a
magnificent total of 961 eggs, and pen
No. 17, White Leghorns, owned by E.
Sooile, Cowichan, is running a close second
with 952 eggs to its credit. Cowichan
seems to be getting the lion's share of
the honors, as pen No. 16, also White
Leghorns, owned by J. Amsden, of that
place, holds third place by a yield of 933.
Pen No. 4, owned by J. Unsworth, Sardis,
is well up to the front with a total of 931,
and pen No. 18, owned by Seymour
Greene, Duncan, is only three eggs be-
hind, having laid 928.

These pens head the list, but they are
by no means sure winners as there are
several other pens that have totals of
only a few points below them, and during
the next two or three months may over-
top them and win out.

In class 1, pens 15 and 17 are still
fighting it out for premier place, 17
reduced 15's lead by seven eggs last
month, and on the last four days have
laid four eggs more than 15. Both pens
have had one bird broody each. The next
four pens are so close up that the final
issue will be hard to predict. Pen 4 dis-
places 18, which drops to fifth place. The
former pen distinguished itself by product-
ing 143 eggs during the month, pen 14
following with 133. On July 3rd, pen 20
laid eight eggs between sunrise and sun-
set, all being laid in the nests.

In class 2, pen 32 still lead, increasing
there score over 37 by eight eggs. Their
position, however, is by no means impreg-
nable, as through broodiness during the
last week they laid only 11 eggs. Pen 31
were leaders with 129 eggs, gaining 14
on pen 39. The latter pen are still, how-
ever, nearly 100 eggs ahead of 31.

This year 120 birds in class one have
laid more eggs in eight months than class
one last year, 138 birds, laid in twelve
months.

Total eggs to date. Class 1, 16,308.
Class 2, 12,688. Grand total, 28,996. To-
tal eggs for month, 4,068.

The next contest starts October 28th.
Twenty additional pens are to be built
immediately.

PAVING CONTRACTS ARE LET BY SAANICH COUNCIL

A Clause in the Agreement Provides for
the Employment of Local Labour,
and Foreigners are Excluded

Mr. Frank Verdier, the well known
and popular South Saanich councillor,
was in Sidney for a few hours Wednesday.
He gave out the information that the
South Saanich Municipal Council on Wed-
nesday morning signed the contract for
the paving of the Burnside, Cedar Hill
and Saanich roads, from Victoria to the
boundary of North Saanich, in all about
23 miles. The contractors were Warren
Bros., of the Bitulithic Paving Co. and
the Worswick Paving Co. The advan-
tages of this improvement can readily be
appreciated and we hope that efforts will
be made to have similar paving done in
North Saanich, in order to complete a
through road from Victoria to Sidney and
adjacent districts.

The contract which will call for an ex-
penditure in the neighborhood of \$400,000
and contains a clause which compels the
contractors to employ local teams and
labor, until exhausted, and oriental labor
is strictly excluded. We understand that
the Provincial government is assisting
this undertaking to the extent of \$100,000
in two annual instalments of \$50,000.

The Kind They Used to Drink.

"D. Ogden Mills had many a good
story of the old bonanza days," said a
San Franciscan. "I liked especially
his whisky story."

"A tenderfoot, the story ran, en-
tered a saloon in Arizona and ordered
whisky. Whisky in those days and in
those parts was a very weird drink.
Queer effects were sure to follow it.
The tenderfoot knew he must expect
something out of the common, but, for
all that, he was taken aback when the
bartender handed him a small whisk-
broom along with the bottle and glass.
"Tenderfoot-like, he didn't care to
expose his ignorance by asking what
the whiskbroom was for, so he just
stood there and fidgeted. He didn't
drink. He waited in the hope that
somebody would come in and show him
what was what."

"Well, in a few minutes a cowboy in
a red shirt entered. He, too, ordered
whisky, and he, too, got a broom.
"The tenderfoot watched him close-
ly. He poured himself a generous
drink, tossed it off, and, taking up his
whiskbroom, went over into a corner
and carefully cleaned on the floor a
space about seven feet by three. There
he lay down and had a fit."—Washing-
ton Star.

Poultry Notes.

Unclean material in nests means
dirty eggs and a good breeding place
for vermin.

Never keep chicks and old fowls in
the same yard, and never feed them
together, if you want either to do well.

If the fowls are kept in a small yard
and the ground is bare and filthy,
scrape off the top of the earth and
spade up the rest of it.

A bucket of water is quite likely to
drown any goslings that are on the
farm, for they will climb into it head
first and be unable to get out.

A good laying hen which is not pro-
perly fed will sometimes almost lay
herself to death. Care should be taken
to feed enough and of sufficient va-
riety.

Be sure that the ducks and duck-
lings have plenty of fresh water at
meal-times, and that it is deep enough
so that they can get their heads into it
up to their eyes.

If a disease breaks out in the flock,
it is a good plan to put a little film of
kerosene on the drinking water to pre-
vent disease germs passing from fowl
to fowl through that medium.

THE CONSUMMATION OF THE BIG CABLE PROJECT

(Continued from page 3)

ferred from the ocean liner to the cable ship, Princess Louise. It was a coincidence that this "old steamer, which in the early days of transportation across the Gulf made history by her trips between Victoria and Vancouver, should in these latter days again make history in holding the cable which marks a new era in communication between these two portions of the province which are so intimately connected.

Laying of the cable was done by the Pacific Coast Cable Company, a Vancouver concern. Mr. H. W. Kent is president, Capt. Lincoln Rogers, commodore of the Lincoln Steamship Co., vice-president; Capt. A. R. Bissett; and Capt. A. B. Richardson being the superintendent. Capt. Richardson is a cable-laying expert who came to this coast from the Mackay-Bennett interests at New York, and was first officer on the cable ship Restorator. He resigned that position to become asso-

was constantly engaged in making tests. "Experts all over the world are watching the results of this cable," Mr. Savage said, "for not only is it one of special manufacture, but it is laid at a great depth." The water pressure on the cable at its greatest depth is over five hundred pounds to the square inch, which is about three times the pressure of an ordinary steam boiler.

The end of the long day saw a satisfactory conclusion of the operation, and after passing through a number of light rainstorms the cable ship anchored, with her two tugs, under the arch of an auspicious rainbow which stretched its multi-colored span over the entrance to Nanaimo harbor. This phenomenon, seemingly more glorious in the soft golden glow of the summer evening, was hailed with great delight.

That the people of Nanaimo thoroughly appreciated the excellent and direct service that this cable will give was shown by the large flotilla of

LAYING THE GULF CABLE ON JUNE 16

ciated with the members of the Pacific Coast Cable Company. It was owing to the excellent work of this concern that the long strand was successfully laid without a hitch on June 16th.

It all sounds easy reading of the accomplishment in print but it was an anxious day for the principals. There were many possibilities for accident, but these were averted by constant and careful supervision not only by the laying company's officers but by plant officials of the B. C. Telephone Company.

An anxious man was Mr. Henry Savage, M. I. E. E., of London, representative of the manufacturers. Mr. Savage came to the coast to attend the cable laying, so that he could personally report its efficiency. During the whole day, from early dawn, for a start was made from the dock at 2.30 a. m., until dark, when the shore end on Newcastle Island was connected up, he

launches and other craft that met the cable ship four or five miles off the Vancouver Island coast. The mayor of the city, the representative of the district in the federal parliament, and a large number of other civic and public officials came out to extend an official welcome. Owing to the fine working condition of the cable they were able to communicate directly for the first time with civic officials in Vancouver, and voiced their pleasure at being able to personally see the completion of a project which will be a factor in the development of Vancouver Island. This section of the province has come rapidly to the fore in recent years and the established interests identified with its progress will suffer no handicap such as isolation might bring, for intercommunication by telephone between each and every part and between Vancouver Island and the mainland is now a perfect fact.—Telephone Talk.

PUBLIC WORKS REPRESENTATIVE

Visits Sidney on Tuesday to
Look Over Proposed Sites
for Public Building

Mr. W. F. Teetzel, of the Dominion Public Works department, visited Sidney on Tuesday of this week for the purpose of looking over the proposed sites for the new public building to be erected in Sidney by the Dominion government. Mr. Teetzel will recommend one of these sites to his department and in all probability the erection of the handsome new structure will be commenced in the near future.

This event was foreshadowed in an interview Mr. Shepherd, the local member in the House of Commons gave the Review about a month ago, in which he spoke of the speedy arrangement made by the government for a Dominion public building in Sidney, and for which a handsome appropriation was made in the estimates during the last session of parliament. Its erection on Beacon Avenue, somewhere between First and Fifth streets, will give an air of substantiality to the present business houses and will be the means of keeping this section in a compact space, as it is a well known fact that the post office alone in almost any growing town, is considered the centre and around it cluster stores, offices, and business places of all kinds.

Take Photograph of Water

On Tuesday afternoon, Mr. M. F. Hill, the representative of the Canadian Pipe Co., of Vancouver, the firm that installed the waterworks system recently in Sidney, visited our town in company with a leading Victoria photographer. On their arrival the recently organized fire department turned out and laid three lines of hose to the hydrant on the corner of First street and Beacon avenue, and threw three splendid streams of water high over the Sidney Hotel. The photographer took several pictures of the display, and these, along with several others taken at the pumping station, will shortly be used in advertising Sidney and its water works system. It is the intention of the Pipe Co., Mr. Hill stated to a Review representative, to offer a cup for local competition, provided there are two hose reel companies formed in the local fire brigade. The same company are also offering a grand challenge cup to be competed for by the different towns on Vancouver Island in which they have installed their system.

SIDNEY LACROSSE TEAM MEET DEFEAT IN VICTORIA

The Grounds Were Very Wet and the Game Was Not as Fast as Former Contests On This Field

On a wet field the Sidney Lacrosse team went down to defeat Saturday when they met Oak Bays for the crucial game in the Intermediate Island Lacrosse series. The game was played at North Ward Park and resulted in a score of four to one, Simpson of the Sidney team getting their only tally, while McDonald and Beasley each netted two for Oak Bay, Sidney netting their only goal in the first quarter on a pass from Bedford to Simpson. While there was little to choose between the teams, Oak Bays seemed faster in the field. Sidney lined up as follows:

Goal, H. Pottinger; point, E. Munro; cover point, G. Pottinger; 1st defence, F. Humber; 2nd defence, M. Norton; 3rd defence, W. Munro; Centre, P. Humber; 3rd home, Robertson; 2nd home, S. Humber; 3rd home, Gerkhe, Outside home, Simpson; inside home, Bedford.

Referees McDonald and McGregor handled the game well and kept the players in hand so that the game was very clean, only one penalty being handed out, Martin, of Oak Bay, getting five minutes for a minor foul.

RUBBER ROOFING COMPANY ERECTING HUGE BUILDINGS

Work On the Big Plant Is Progressing Rapidly and Many of the Big Tanks Are Now in Position.

The site of the Sidney Rubber Roofing plant is a scene of great activity these days. A large force of men are constantly employed on the buildings in course of construction and finishing up the ones that are already well under way. The engine house, containing two large steam boilers, for the operation of the machinery of the plant, is now almost completed, the concrete floor having been laid last week. The roof of this building will be covered by the company's own make of rubber roofing as soon as the plant is in operation.

The two huge steel tanks erected on the water front for the purpose of storing the crude oil as it is pumped from the oil barges, are now finished and are ready for use.

These tanks each hold 10,000 barrels of oil and are connected with the condenser and other cooling tanks by means of iron pipes. Several other large and small tanks are being installed to care for the oil in its different stages after it leaves the condenser.

The company is erecting two huge warehouses just south of the engine room and fronting on the V. & S. railway. The foundation piers for the smaller one of the two are already in and work has commenced on the frame work.

This building when constructed will be 130 feet long and 50 feet wide. The other one to be erected shortly will be ten feet longer and 50 feet wide. These buildings will be used partially as store rooms, and the machinery for making the roofing will be installed here.

The drainage system for the whole plant is being installed during the course of construction, and the water pipes are being laid under ground all over the plant and taps will be located everywhere there is need for them.

TERRIFIC STORM PASSES OVER PRAIRIE PROVINCES

Farmers Around Willow Bunch, Saskatchewan, Suffer Losses as Result of Severe Hail Storm.

Moose Jaw, Sask., Aug. 16.—Reports are coming in from the south country of damage done by the storm on Thursday night. Mr. J. J. Wilson, a farmer, received a message to the effect that over 100 farmers around Willow Bunch had been hailed out, many buildings blown over and other damage done in that district. At Corinne nine box cars were blown off the track, and at Trux twenty-six cars were blown from the siding on to the main line.

The storm seems to have been at its worst along the boundary, and in Montana and North Dakota farmers have suffered heavily and some of the crops there look as though disc harrows had been run through them.

The priests in charge are the Rev. Father M. M. Rondon and W. Corteraad. Address—R. M. D., No. 1, Turgoose P.O. Telephone Y11.

LOCALS and PERSONALS

Mr. J. Hobden, Miss Hamlyn and Mrs. J. Hicks spent Thursday visiting in Victoria.

The B.C. Telephone Co. has just finished the installation of a telephone system in Kaslo, B.C.

We are what we are today because of what we were yesterday. Usually we control our own fate.

Mrs. Donovan, and her niece Ellen, returned to town Tuesday after spending the week at Cordova Bay.

Mrs. F. Burr, of Victoria, is spending the week visiting her parents, Mr. and Mrs. F. G. Norris, Deep Cove.

Captain Johnson, an old-timer in this district but now living at Esquimalt, spent the day in Sidney on Wednesday, visiting his old time friends.

Mr. and Mrs. J. J. White returned to Sidney on Tuesday after spending several weeks with the Alpine Club, climbing the mountain peaks in the Rockies.

The sports committee made a wise decision when they decided to hold their programme on the athletic field instead of on Beacon avenue. Just look what they are doing to this thoroughfare now.

Rev. J. Hobden, of New Westminster, occupied the pulpit of the Methodist churches on the Sidney circuit on Sunday last. His discourse was listened to attentively by quite a large congregation at the North Saanich Methodist church in the evening.

The tug S.S. Salvor, of Victoria, on Thursday brought the freighter, John C. Potter, to the wharf of the Sidney Island Brick and Tile Co. to load 400,000 bricks consigned to Grandby Bay. We congratulate the Sidney Island Brick & Tile Co. on getting this large order.

The annual Fall Fair will be held at the Exhibition grounds, Victoria, on Sept. 23 to 27. There is such a demand for space in which to exhibit that the management have decided to erect several new buildings, and these will be rushed to completion in time for the opening. The horse show committee report that this feature of the show will excel anything of the kind yet seen on the Island. Altogether the fall show promises to be a huge success.

Miss Elliot spent Wednesday of this week visiting friends in the city.

Miss Millie Horth, of Deep Cove, is visiting friends in the city for the week.

Mr. and Mrs. T. J. Converse left last Monday on an extended visit to different points in Canada and the United States.

The many friends of Miss Allie Norris are pleased to learn that the young lady is improving rapidly after her recent illness.

Quite a number of friends spent the evening of August 10 at the home of Miss Elliot's parent on Beacon avenue. The occasion was in honor of the young lady's birthday.

It is estimated that there is five hundred million dollars of American capital invested in Canada. The International Harvester company alone employs between three and four thousand men.

Mrs. Perry Jones, of Shelton, Wash., arrived in town on Tuesday on a visit to Mrs. A. E. Moore. Mrs. Jones and Mrs. Moore were schoolgirls together in the old town of Portage la Prairie, Man.

"What is the idea of piling that loose shingle up in the middle of the street," is the question asked by visitors to our town. We are unable to answer it and would be pleased if any of the authorities that be would answer it for us.

T. P. O'Connor says the Home Rule and Welsh Disestablishment Bills "will be stuffed down the throats of the Lords whether they like them, or not—and it will not be the first medicine they have had to swallow."

Mr. Roy Brethour has been duly installed as agent at the V. & S. station and his presence there is very much appreciated by the citizens of Sidney, especially those who are in the habit of receiving freight over this line.

A large catch of salmon was landed at the Sidney wharf one day last week. A Chinaman bought up the whole lot and retailed them at a very reasonable price. There are plenty of this finny tribe in the Strait just now and the fishermen are making good hauls.

Among those who have had to go out of business consequent on the recent depression have been a great many who failed to play the game straight. If a man does not deal honestly with his customers his own credit is not good. Shun him.

The ruling classes in China are now turning to Christianity. The entire Board of Trade of Foochow recently joined the Y.M.C.A. in a body, and the Provincial Parliament adjourned in order to give a Y.M.C.A. General Secretary an opportunity to address them.

Hotel Arrivals.

Mrs. G. Smith, Seattle; Mrs. J. F. Sutcliffe, Seattle; A. L. Garven, Victoria; C. Senior, Victoria; W. R. Wright, Vancouver; H. Housen, Vancouver; D. Charleton, Winnipeg; Mr. and Mrs. G. L. Edwards, Vancouver; W. L. Burns, Vancouver; Mrs. and Miss Holyake, Vancouver; Mr. and Head, Vancouver; W. F. Teitzel, Victoria; L. J. Smith, Victoria; F. J. Roach, Victoria.

Change of Management

Mr. Fred Bowcott has sold his animated picture showing outfit to Mr. Charles Senior, of Chesterfield, Eng. Mr. Senior is a new arrival in this country, having been only about a month here, but the moving picture show is certainly not new to him as he was one of the first to introduce this form of entertainment into England. He made a splendid success of this business in the old country and feels confident that he can build up a business right here in Sidney that will not only be a credit to himself but to the town as well.

He believes in showing good pictures and with this end in view has made a selection of travel, educational, dramatic and humorous films that are second to none in this province.

Mr. Senior has also thought it advisable to make a change in the nights of the show and also the hours. In future the

show will be on Tuesday and Saturday evenings instead of Tuesday and Friday, and the time of opening has been changed from 8.30 to 7.45 p.m.

PRESENCE OF MIND.

An Englishman in travelling through Ceylon was the guest of a dockyard official at Trincomalee.

"The dinner was excellent," he says, "but when it was about half over I was startled by hearing the wife of my host tell the native servant to place a bowl of milk on a deer-skin near her chair."

Although she spoke as calmly as if giving an ordinary order, I knew at once there was a snake somewhere in the room, for they prefer milk to anything else. As a hasty movement might have meant certain death we all sat like statues; but, for all that, my eyes were inspecting every nook and corner, with a peep under the table. However, it was not until the milk was placed on the deer-skin that the snake appeared. And then, to our amazement, a large cobra uncoiled itself from my hostess' ankle and glided towards the bowl, when, of course, it was immediately killed.

"But just fancy the nerve of the woman, though she fainted when the thing lay dead on the floor. How many could have remained motionless in such circumstances?"

In the past Sidney has had to depend on the V. & S. railway well for its water supply, which of late years has become entirely insufficient for its needs. Recognising the fact that without an adequate supply of pure water for domestic use the further development of Sidney would be greatly retarded, the Sidney Water and Power Co., Ltd., was formed, and after considerable exploratory work finally decided upon a system of wells, a pumping plant and storage reservoirs.

Fire protection being the primary object of a water supply in a town of the proportions of Sidney, the system was designed on a scale sufficient to fairly meet this requirement, Mr. F. J. O'Reilly being the consulting engineer.

Tenders were accordingly called for and the Canadian Pipe Co., Ltd., though not the lowest bidders, were entrusted with the business of furnishing all material and installing the system complete as follows:—about ten miles of wire wound wood stave pipe, in sizes ranging from two inches in diameter to eight inches in diameter, with fire hydrants, gate valves, corporation cocks, air valves, blowoffs, castings, etc., also two 100,000 gallon patent Redwood tanks for storage were purchased from A. C. Langley & Co. The Canadian Pipe Co., Ltd., having just completed a fine gravity water system for the town of Alberni, B.C., shipped their outfit to Sidney, and field superintendent Mr. Arthur Rochester, soon had his camp established and trenching started. It is the purpose of this pipe company to so organize their work that upon arrival from the factory the pipe goes to its place in the ditch without delay, and this is very desirable with wood pipe.

Barge shipments were very slow in arriving and the laying of the pipe in this case was fully thirty days late in starting.
